The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

## I. Introduction to the NCES Common Core of Data, National Public Education Financial Survey (NPEFS): School Year 2000-01, Fiscal Year 2001 (Revision 1b, Revised August 2004)

This documentation contains a brief description of the survey collection, along with information required to understand and access the data files. These data were collected by the National Center for Education Statistics (NCES), a branch of the Institute of Education Sciences in the U.S. Department of Education. NCES is authorized to collect these data by Congress through the Education Sciences Reform Act of 2002, PL 107-279 (Title I, Part C, 151 (b)). The data on the files are based on information from state education agencies (SEAs) for fiscal year 2001 (school year 2000-01.) There is a record for each state, the District of Columbia and four of the outlying areas (American Samoa, Northern Marianas, Puerto Rico and Virgin Islands). Guam did not report any data. The data were collected through the "National Public Education Financial Survey" (NPEFS) of the Common Core of Data (CCD) series. The U.S. Bureau of the Census is currently the collection agent for this survey. These data are presented by state and contain revenue data by source and expenditure data by function and object. Average daily attendance is also provided. Total student membership from the 2000-2001 Common Core of Data State Nonfiscal Survey has also been added. Information from the fiscal year 2001 data plan appears at the end of the documentation.

Revised File Changes - CCD files are revised one year after their initial release, if states submit revised data or errors are found on the file. The following states submitted revised revenue data: Arizona and Kansas. The following states submitted revised expenditure data: Arizona, Colorado, Illinois, Kansas, Maryland, Massachusetts, and North Carolina. The following states and the District of Columbia submitted revised average daily attendance data: District of Columbia, Kansas, and New Mexico. The revised data may have a small impact on the adjustments and distributions made by NCES in other states.

## II. User's Guide

There is one ASCII data file containing 55 state records. Each record contains 288 fields. There are 4 record identification fields, 142 data fields and 142 imputation flag fields. The ASCII data file has an overall size of 77 KB . A record layout is provided in appendix A; a glossary with definitions of key variables is included in appendix B; state codes and abbreviations are in appendix C; details regarding imputations and adjustments are in appendix D ; imputation flag frequencies are in appendix E; and a survey form is in appendix F. Questions from the fiscal data plan appear in appendix G, and responses to those questions are in appendix H. Appendix I includes tables from "Statistics in Brief: Revenues and Expenditures for Public Elementary and Secondary Education: School Year 2000-01" (NCES 2003-362).

Values for missing data are reported as ' -1 ' on the data file, and non-applicable data are reported as '-2.' Guam did not report any finance data for FY 2001 and so all of the items for Guam are reported as ' -1 .' States where none of the school districts have independent tax raising authority will have items R1A and R1B (local revenue items) coded as ' -2 .'

## A. Survey Methodology

These data are based on information collected from state education agencies (SEAs) from their administrative records. In compiling these data, each SEA obtains data from the local education agencies (LEAs) that operate public schools. Each SEA may edit or examine the individual LEA reports. SEAs also include data for any state-run schools such as special education residential schools or prison schools serving inmates under the age of 20. NCES and the SEAs work cooperatively to assure comparability between data elements requested and reported.

NCES requests that states report " 0 " for items in which no activity occurred and " -1 " for items in which an activity occurred, but no data are available. Review of the data and subsequent discussions suggests that these practices are not always followed. In some instances, a "-1" may have been reported when there was no activity. Conversely, a " 0 " may have been used when in fact there was some activity. When producing the final file, NCES edited some missing and " 0 " responses.

Average daily attendance figures are collected in the NPEFS survey as required under Title I of the Elementary and Secondary Education Act of 1965 as amended by PL-107-279 section $1124 \mathrm{~A}(1)$. Under this law, states are to provide average daily attendance in accordance with state law; however, NCES provides a definition for states to use in the absence of state law. Per pupil expenditures (calculated by dividing net current expenditures by average daily attendance) are used in the formula to allocate Title I and other program funds to states and school districts. Since some states use their own definitions and others use the NCES definition, the data on average daily attendance are not comparable across states. Student membership counts from the CCD "2000-2001 State Nonfiscal Survey" have been included in the data set as a more comparable student count. Student membership is the count of students enrolled on or about October1, 2000 and is comparable across all states.

Since the FY 1989 data collection, NCES has provided "crosswalk" software to assist states in their reporting and to improve comparability across states. This software converts a state's existing accounting reports to the federal standard, as described in the NCES accounting handbook, Financial Accounting for Local and State School Systems, 2003. (Files from earlier years followed the standards described in Financial Accounting for Local and State School Systems, 1990.) The current accounting publication can be found on the web at: http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2004318. States which did not have this crosswalk software developed for them have had their protocol for converting data from their state accounts to the federal standard reviewed and validated.

When data were received from the state education agency, edits were conducted and an edit report was sent back to the state listing previous and current years' data, and the percent increase
(or decrease) of every item. Notification of any arithmetic errors and special text containing NCES's understanding of specific missing data items were also included with the edit report. States were asked to correct addition errors, verify or correct information on missing items, and explain any extraordinary changes from previous year's data.

## B. Imputations and Adjustments

NCES introduced the practice of imputing and adjusting data to correct for missing or misreported data beginning with the FY 1990, School Year 1989-90, collection. Imputations and adjustments were performed to correct for item nonresponse only and were limited to the 50 states and the District of Columbia. This process consisted of several stages and steps, and varied as to the nature of the missing data. A list of all of the items affected by these imputations and adjustments is presented in appendix D. All items (except totals and subtotals) affected by these adjustments are presented on the left side of the list.

Imputations correct cases in which a value is not reported at all, indicating that subtotals for the item are under-reported. An imputation by NCES would assign a value to the missing item, and the subtotals containing this item would increase by the amount of the imputation.

Adjustments are corrections to a situation in which a value reported for one item contained a value for one or more additional items not reported elsewhere. For example, a state may not differentiate between instructional support staff and student support staff, reporting "-1" (Missing) for student support staff salaries and a value representing the salaries for both items as instructional staff support salaries. NCES adjusts these two responses by reducing the amount reported for instructional staff support salaries and adding that amount to student support staff salaries. The total for salaries and total expenditures would not be affected by this adjustment.

Imputations. The same method was used for imputing revenues and expenditures. Revenues were imputed using total revenues, and expenditures were imputed using total expenditures. Imputed data are coded as " I " in the data flag section of the file.

The following example illustrates the procedure. Assume that a state had revenues from student activities, but did not report them. The method used for imputing local revenue - student activities was to (1) calculate the ratio of student activity revenues (R1K) to total revenues (TR) for each state reporting these items strictly by the definition; (2) calculate the average of these ratios; and (3) multiply total revenues (TR) of the state with the missing student activities revenue item times the average ratio. States reporting an item "Strictly by the definition" are those states reporting values greater than " 0 " for each of the items involved in the imputation, and none of whose values are affected by another "contains" or 'combined with" adjustment. "Contains" and "combined with" adjustment are described below.

Adjustments. Since adjustments consist of redistributing a reported value, any adjustment affects at least two variables. Adjusted data are coded as " A " in the data flag section of the file.

There are several variations in the way adjustments were carried out. These variations are indicated in the following "Imputations and Adjustment List," and are described below.

Statements with "combined" indicate that the first item was reported as missing and the value included in the item(s) following "combined with". These statements can be matched to statements with "contains" where the first variable contains the value for that item plus the value for the item(s) following "contains." For example, "E212 combined with E11" means the value for E212 was included in the value reported for E11; while "E11 contains E212" means the value reported for E11 contains the value for E212 in addition to E11. At the end of the "contains" statement, the total used in calculating the ratio used in the adjustment is indicated by the word "using." In most cases these totals are TE11 (total expenditures) or TR (total revenues).

The method used for "combined" and "contains" adjustments was to: 1) calculate the ratios of each missing item and the item containing the missing values to the total indicated at the end of the "contains" statement for all states reporting these items strictly by definition; 2) calculate the average of each of these ratios; 3) calculate the ratio of each average ratio to the sum of the average ratios; and 4) multiply the reported item by the ratio calculated in step 3 to determine the share for each item. States reporting these items "strictly by definition" are those states reporting values greater than 0 for each of the items involved in the adjustment, and none of those values are affected by another "contains" or "combined with" adjustment.

Adjustment statements with "distribute by" are used only for the distribution of direct state support expenditures to specific objects and functions listed in the statement. In all but one case, these are distributed by destination, the ratio of items to which the reported value is being distributed. This means that the ratio of each item (in the destination list) to the sum of all the listed items for the state is calculated and these ratios are used to distribute the direct support amount to each specific item. For example, "E4B1 distribute by dest. E217, E227, E237, E247, E267" means the value for E4B1 is distributed based on the distribution of the items following "dest." E4B1 times the ratio of E217 / (E217 + E227 + E237 + E247 + E267) would be added to the amount in E217. E4B1 times the ratio of $\mathrm{E} 227 /(\mathrm{E} 217+\mathrm{E} 227+\mathrm{E} 237+\mathrm{E} 247+\mathrm{E} 267)$ would be added to the amount in E227, and so on. In a few cases the amount is "distributed" to only one item. Data adjustments resulting from direct support distributions are not indicated in the data flag section of the file.

The "distribute by salary" adjustment used to distribute E4C1 (direct support employee benefits) is different from the other direct support distributions. In this case the ratio of each salary item to the sum of all listed salary items is calculated, and the amount reported for E 4 C 1 distributed to each employee benefit item. Data adjustments resulting from direct support distributions are not indicated n the data flag section of the file.

These distributions were performed after all other imputations and adjustments had been performed.

Adjustment statements with "supplemented by" indicate that the item on the left was reported as missing, and the value is included in the reported function subtotal. For example, "E3B11
supplemented by E3B1" means the value for E3B11 was increased by the distribution of E3B1. These statements can be matched to a "totals" statement or a "derived from" statement. The "totals" statement indicates that the reported total contains values for missing detail. The adjustment here is similar to that in the "contains" adjustment described above: 1) calculate the ratios of each missing item and the items containing the missing values to total expenditures (TE11) for all states reporting these items strictly in agreement with the definition; 2) calculate the average of each of these ratios; 3) calculate the ratio of each average ratio to the sum of the average ratios; and 4) multiply the reported subtotal by the ratios calculated in step 3 to determine the share for each item.

There are a few cases in which some local revenues are imputed and these values are carried over and added to expenditures. This occurs with revenues from student activities and food services, where these activities are run as an enterprise and the states report no revenues and only net expenditures. NCES requires that gross expenditures be reported for all expenditure items on the NPEFS survey. These occurrences are documented on the "List of Imputations and Adjustments" with "impute" for the revenue item and "derived from" for expenditure item (subtotal E3A1 or E3B1) to which the imputed revenue amount is added. This amount is then distributed to the items making up the subtotal in the same manner as the "total" and "supplemented by" distributions as described above. For example, "E3B1 derived from R1K, distribute over E3B11, E3B12, E3B13, E3B14, E3B16" indicated that the value imputed for R1K has been added to the value for E3B1, and that the new value for E3B1 id distributed to E3B11, E3B12, E3B13, E3B14, and E3B16 based on the distribution of these items.

The order in which these imputations and adjustments were performed is: 1) imputations, 2) adjustments, 3) totals, 4) derivations, and 5) distributions. Totals and subtotals were recalculated after each step had been performed. All totals and subtotals affected by adjustments or imputations are flagged as " T " in the data flag section of the file.

Only total student membership for grades prekindergarten through grade 12 (plus ungraded) is on the NPEFS data file. Student membership is collected by grade on the CCD "State Nonfiscal Survey of Public Elementary and Secondary Education." Some states do not report data on prekindergarten students. Prekindergarten student counts were imputed for those states and added to the total student count. These cases are noted as imputed in the data flag file and imputation lists.

For each cell there is a companion cell containing a flag indicating whether the figure in the cell was reported by the state or was placed in the cell by NCES using one of several methodologies.

> R - As reported by the state
> A - Adjustment
> I - Imputed based on a method other than prior year's data
> T - Total based on sum of internal or external detail

The companion cell in each case is identified by the name of the data cell preceded by an "I." This documentation explains any action taken by NCES in regard to each variable.

## C. Variations in File Over Time

The Common Core of Data state fiscal survey underwent a major revision with the inauguration of the "National Public Education Financial Survey," that began with the collection of Fiscal Year 1989 data. Since the FY 1989 collection, items have been added to or deleted from the survey. These items are listed below.

Beginning with the FY 1992 survey:
Food Services Expenditures were broken out by object, adding items: E3A11, E3A12, E3A13, E3A14, and E3A16.

Enterprise Operations Expenditures were broken out by object, adding items: E3B11, E3B12, E3B13, E3B14, and E3B16.

Facilities Acquisition and Construction Services - Nonproperty Expenditures was broken out into Buildings Built and Alterations Performed by LEA's Own Staff (E611) and Buildings Built and Alterations Performed by Contractors (E612). In addition to this breakout, Facilities Acquisition and Construction Services - Property Expenditures was broken out into Land (E62A) and Buildings (E62B). STE6, the sum of all of the Facilities Acquisitions and Construction Services items, was added beginning with the FY 1992 survey.

Beginning with FY 1998 survey:
The Facilities Acquisition and Construction Services breakouts listed above (items E611, E612, E62A and E62B) were discontinued.

## D. Fiscal Data Plan

In addition to the finance data specified in the NPEFS survey, NCES collects information to help process the data and to gain a better understanding of what programs and/or policies are connected with the data items and definitions. The questions for this "data plan" appear in appendix G, and the responses (by state) appear in appendix H. Forty-eight states and the District of Columbia responded to the data plan questions.

Common Core of Data (CCD), National Public Education Finance Survey (NPEFS), School Year 20002001, Fiscal Year 2001 (Imputed File) (Revision 1b, Revised August 2004)

This tab-delimited file has the following layout and description
( 55 physical records, 1 per observation -288 fields in this file)
Values for missing data are reported as ' -1 ' on the data file, and non-applicable data are reported as ' -2 .'

## Appendix B. Glossary

Average Daily Attendance: average resident attendance as defined by state law or regulations. In the absence of such laws and regulations, average daily attendance (ADA) should be the sum of the counts of resident students attending public school each day of the school year, divided by the number of days school was in session during the school year. Students who reside in one state and attend public school in another state should be counted in the state where they reside.

CCD: the primary database on public elementary and secondary education in the United States. Data are collected annually from states' administrative records.

Community services: a functional category of expenditures (line item number 3300) for such services as swimming pools, day care centers, and programs for the elderly. Community services expenditures reported in this publication are funds for the use of these services by public education students. (Variable names: E81 and E82.)

Current expenditures: comprise the functional categories instruction (100.000), support services (2000), and non-instructional services (3000). These are expenditures for the day-to-day operation of public elementary and secondary education, distinct from long-term expenditures and expenditures for other types of education. Property expenditures are excluded from current expenditure subtotals. (Subtotals STE1, STE2T, and STE3 sum to total TE5.)

Debt service: a sub-function (5100.00) within the expenditure function other uses (5000). It includes only long-term debt service (obligations exceeding one year). (Variable names: E7A1 and E7A2.)

Direct program support: expenditures made by state education agencies for, or on behalf of, local education agencies. The majority of these expenditures are for teacher's retirement funds, and the rest include expenditures for textbooks, busing, and special programs such as education for disabled students. Although states often report these expenditures in the appropriate function, these expenditures are sometimes reported together under the heading direct program support, in which case NCES distributes them into function and object after consultation with state officials. Direct program support for public elementary and secondary education is reported as zero on the data file. (Variable names E4A1, E4A2, E4B1, E4B2, E4C1, E4C2, E4D, E4E1, E4E2, and subtotal STE4. NOTE: STE4 does not include E4A2, E4B2, E4C2, E4D, and E4E2.)

Direct cost programs: a category of expenditures for programs not part of public elementary and secondary education. These programs include community colleges, adult education and nonpublic school support. (Variable names E9A, E9B, E9C, E9D, E91, and subtotal STE9. NOTE: STE9 does not include E91.)

Employee benefits: one of six expenditure objects (line item 200). It is for expenditures made in addition to gross salary that are not paid directly to employees. It includes amounts paid by, or on behalf of, an LEA for fringe benefits such as group insurance, social security contributions, retirement contributions, tuition reimbursements, unemployment compensation, worker's compensation, and other employee benefits (e.g., unused sick leave). Variable names: E12,

## Appendix B. Glossary

E222, E223, E224, E225, E226, E227, E228, E3A2 and E3B2. Variables E222, E223, E224, E225, E226, E227, and E228 sum to TE22.)

Enterprise operations: a sub-function (3200) of the function non-instructional services (3000). Enterprise operations are activities that are financed, at least in part, by user charges, similar to a private business. These operations are sometimes subsidized by local education agencies. (Variable names: E3B11, E3B12, E3B13, E3B14, E3B2, E3B16, and subtotal E3B1. NOTE: E3B1 does not include E3B2.)

Equipment: an object subcategory (730) within the function facilities acquisition and construction services (4000). It includes the initial purchase of property items such as books for a newly constructed school or addition. Replacement equipment is labeled property, and is reported by function. (Variable name E63.)

Facilities acquisition and construction services: an expenditure function (4000) that includes the acquisition of land and buildings; building construction, remodeling, and additions; the initial installation or extension of service systems and other built-in equipment; and site improvement. (Variable names: E61, E62 and E63.)

Federal revenues: are reported in four categories: 1) unrestricted and restricted Grants-in-Aid direct from the federal government, 2) unrestricted and restricted Grants-in-Aid direct through the state, 3) Grants-in-Aid through other intermediate agencies, and 4) other federal revenues (including payments in lieu of taxes). (Variable names: R4A, R4B, R4C, R4D, and subtotal STR4.)

Food services: a sub-function (3100.00) of the function non-instructional services (3000). Food services are activities that provide food to students and staff in a school or LEA. These services include preparing and serving regular and incidental meals or snacks in connection with school activities as well as delivery of food to schools. (Variable names: E3A11, E3A12, E3A13, E3A14, E3A2, E3A16, and subtotal E3A1. NOTE: E3A1 does not include E3A2.)

Function: a category of expenditure, defining the activity supported by the service or commodity bought.

General administration: one of nine sub-functions (2300) within the expenditure function support services (2000). It includes expenditures for the board of education and administration of local education agencies. (Variable names: E214, E224, E234, E244, E254, 264, and subtotal STE24. NOTE: STE24 does not include E254.)

Instruction: activity between teachers and students. Instruction expenditures includes salaries and benefits for teachers and instructional aides, supplies, and purchased services such as instruction via television. Tuition expenditures to other LEAs are also included here. (Variable names: E11, E12, E13, E14, E15, E16, E17, E18, and subtotal STE1. (Variables E15 and E17 are not included in the subtotal.)

## Appendix B. Glossary

Instructional staff support services: one of nine sub-functions (2200) within the expenditure function support services (2000). It includes instructional staff training, educational media (library and audiovisual), and other instructional staff support services. (Variable names: E213, E223, E233, E243, E253, E263 and subtotal STE23. NOTE: STE23 does not include E253.)

Intermediate sources of revenue: educational agencies with fund raising capabilities that operate between the state and local government levels. One example is New York's Board of Cooperative Educational Services (BOCES). (Variable name: R2.)

LEA: local education agency, also called school district or board of education.

Local revenues: funds produced within the boundaries of an LEA that are available for the use of the LEA. These revenues include money collected by other government units for use by the LEA. Local revenues include: property taxes, non-property taxes, parent government contributions, student fees, and other local sources. (Variable names: R1A, R1B, R1C, R1D, R1E, R1F, R1G, R1H, R1I, R1J, R1K, R1L, R1M, R1N, and subtotal STR1. Variables R1F and R 1 H are not included in the subtotal.)

NPEFS: the National Public Education Financial Survey, a component of the Common Core of Data (CCD) and the source of the data in this report.

Object: a category of expenditure, defining the service or commodity bought.
Operations and maintenance: one of nine sub-functions (2600) within the expenditure function support services (2000). It includes expenditures for the supervision of operations and maintenance, operation of buildings, the care and upkeep of grounds and equipment, vehicle operations (other than student transportation) and maintenance, and security. (Variable names: E216, E226, E236, E246, E256, E266, and subtotal STE26. NOTE: STE26 does not include E256.)

Other support services: combines three of nine sub-functions (2500, 2800, and 2900). It includes expenditures for business support services (activities concerned with the fiscal operation of the LEA), central support services (activities, other than general administration, that support each of the other instructional and supporting services programs, including planning, research, development, evaluation, information, and data processing services), and other support services expenditures not reported elsewhere. (Variable names: E218, E228, E238, E248, E258, E268, and subtotal STE28. NOTE: STE28 does not include E258.)

Pupils in membership: the count of students on the current roll taken on the school day closest to October 1 by using either 1) the sum of original entries and reentries minus total withdrawals, or 2 ) the sum of the total present and the total absent.

Purchased services: one of six expenditure objects. It is for professional and technical services, and the renting of equipment. (Variable names: E13, E232, E233, E234, E235, E236, E237,

## Appendix B. Glossary

E238, E3A13, and E3B13. Support services subtotal TE23 is the sum of E232, E233, E234, E235, E236, E237, and E238.)

Property: one of six expenditure objects (line item 700). Property includes expenditures for initial, additional, and replacement furniture and fixtures such as desks, file cabinets, computers, copying machines, printing equipment, and other equipment. Property expenditures are not included in current expenditure subtotals. (Variable names: E17, E252, E253, E254, E255, E256, E257, E258, E3A2, E3B2, E62, E63, E82, E91, and subtotal TE10. Property variables are excluded from all totals and subtotals on the file except for variables TE25, TE10 and TE11. Support services subtotal TE25 is the sum of: E252, E253, E254, E255, E256, E257, and E258.)

Revenue: revenues are categorized by source as federal, state, intermediate government agencies, or local.

Salaries: one of six expenditure objects (line item 100.00). It includes the gross salaries of permanent and temporary staff on the payroll of LEAs including those substituting for permanent employees. Salaries for full- and part-time staff are included along with overtime and salaries for staff on sabbatical leave. Also included are supplemental amounts for additional duties such as coaching or supervising extracurricular activities, bus supervision, and summer school teaching. (Variable names: E11, E212, E213, E214, E215, E216, E217, E218, E3A11, and E3B11. Support services subtotal TE21 is the sum of: E212, E213, E214, E215, E216, E217, and E218.)

School administration: one of nine sub-functions (2400) within the expenditure function support services (2000). It includes expenditures for the office of the principal, full-time department chairpersons, and graduation expenses. (Variable names: E215, E225, E235, E245, E255, E265 and subtotal STE25. NOTE: STE25 does not include E255.)

State revenues: revenues received by the LEA from the state are reported in a single total. This total includes unrestricted grants-in-aid, restricted grants-in-aid, revenue in lieu of taxes, and payments for, or on behalf of, LEAs. (Variable name: R3.)

Student support services: one of nine sub-functions (2100.00) within the expenditure function support services (2000). It includes attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other student support services. (Variable names: E212, E222, E232, E242, E252, E262, and subtotal STE22. NOTE: STE22 does not include E252.)

Student transportation: one of nine sub-functions (2700) within the expenditure function support services (2000). It includes expenses for the supervision, vehicle operation, monitoring, and vehicle servicing and maintenance associated with student transportation services. (Variable names: E217, E227, E237, E247, E257, E267, and subtotal STE27. NOTE: STE27 does not include E257.)

Supplies: one of six expenditure objects (line item 600). Supplies are items that are consumed, worn out, or deteriorated through use, or items that lose their identity through fabrication or

## Appendix B. Glossary

incorporation into different or more complex units or substances. These include expenditures for general supplies; paper and other materials required for printing and copying; and books, periodicals, and reference materials. (Variable names: E16, E242, E243, E244, E245, E246, E247, E248, E3A14, and E3B14. Support services subtotal TE24 is the sum of: E242, E243, E244, E245, E246, E247, and E248.)

Support services: an expenditure function (2000) divided into nine sub-functions: student support services (2100.00), instructional staff support (2200), general administration support services (2300), school administration support services (2400), operations and maintenance (2600), student transportation support services (2700), and other support services (2500, 2800, 2900). (Support services subtotal STE2T is the sum of subtotals: STE22, STE23, STE24, STE25, STE26, STE27 and STE28. STE2T is also the sum of subtotals: TE21, TE22, TE23, TE24 and TE26.)

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1850-0067. The time required to complete this information collection is estimated to average 78 hours, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this survey, please write to: U.S. Department of Education, Washington, D.C. 20202-4651. If you have comments or concerns regarding the status of your individual survey, write directly to: U.S. Department of Education, National Center for Education Statistics, Elementary/Secondary and Libraries Studies Division, Washington, DC 20008-5651.

\section*{Appendix G. Fiscal Data Plan Questions}

\section*{Fiscal Data Plan: FY 2001}

\section*{1. ADOPTION OF GASB-34 CHANGES}

In June 1999, the Governmental Accounting Standards Board (GASB) issued Statement No. 34. This statement established new requirements for the preparation of state and local government financial statements, including the addition of an entity-wide statement of activities using the economic resources measurement focus and the accrual basis of accounting. The statement of activities also calls for reporting depreciation expense. A complete description of Statement No. 34 can be found at the following website:

\section*{http://www.rutgers.edu/accounting/raw/gasb/repmodel/index.html}

Statement No. 34 will be effective for the FY 2002 financial statements of public entities with more than \(\$ 100\) million of total annual revenues and for the FY 2003 or FY 2004 statements of smaller entities.

Each state education agency will need to closely examine their state-wide financial reporting system to determine changes needed in order to be in compliance with Statement No. 34.
A. Are GASB-34 requirements causing you to make changes in your statewide finance reporting format for LEA's?
B. If YES, when will these changes be made?
C. After the changes are made will you still be able to report property expenditures (object 700) in NPEFS?
D. After the changes are made will you be able to report the facilities acquisition and construction services (function 4000) in NPEFS ?
E. Are there any other NPEFS items that will be affected by GASB 34 requirements?
F. If yes, please identify and explain how they will be affected:

\section*{2. STUDENT ACTIVITY REPORTING}
A. Do your reported student activity revenues include amounts for:
1. Sales by students for bookstores
2. Revenue from patrons of school sponsored activities, i.e. sports and concerts
3. Student organization dues and fees
4. Other fees from students, i.e. lockers

\section*{Appendix G. Fiscal Data Plan Questions}
B. Where do you report student activity expenditures:
1. Instruction
2. Enterprise operations
3. Instructional staff support services
4. Other, please list

\section*{3. DIRECT PROGRAM SUPPORT}
A. Do you include Direct Program support monies in the Revenue section of your NPEFS report?
B. If you are able to report these amounts in their appropriate expenditure functions, please fill in the amounts on the following lines for further analysis.
a. Textbooks for Public School Children
b. Transportation for Public School Children
1. Property (700)
c. Employee Benefits for Public School Employees
1. Property (700)
d. Direct Program Support for Private School Children
e. Direct Program Support for Public School Children
1. Specify Program

\end{tabular}
—Missing.
1) Changes are few. They relate mostly to minor refinement of some LEAs use of certain funds. The newly required government-wide statements will not otherwise significantly alter current reporting practices.
2) The questions above are not really appropriate relative to the NPEFS. GASB Statement 34 made changes to the fiduciary fund structure and this is the only structural change to school
3) Iowa will collection information at the fund level prior to districts/AEAs making the adjustments necessary to complete the entity-wide financial statements.
4) We have fixed asset codes in our reporting now and always have.
5) Changes ongoing as GASB34 kicks in for individual counties (changes on county level \& in stand-alone LEAs).
6) We are at an early stage, so it is too soon to tell. Also, we will do our best to collect the info NPEFS requests, so guidance would be appreciated.

— Missing.
7) They are reported in the function that best fits the expenditure.
8) Student Support Services
9) Student activities conducted by groups wholly separate from the LEA, such as parent associations or student body organizations, are not reported. Ancillary student activities conducted by the LEA are reported in the instructional program.
10) General Administration, School Administration, Other Support-Business Operations, Transportation, Technology, Non-Instructional Supr
11) For Question 1, revenues that support club activities are handled through a checking acct at the district. What we report under Student Activities are gate receipts from athletic events.
12) Student Activity expenditures are not reported in the DC Public Schools financial statement. Student activity is reported as a fiduciary fun
13) We do not include student activity funds in our NPEFS reporting.
14) Agency Fund
15) Indiana does not collect or report student activity revenues or expenditures
16) The majority is in enterprise. If student activities are supported by state aid and property tax, that portion is in instruction.
17) We have not included building level reporting at this time.
18) These revenues from these student activities are not reported.
19) We cannot report student activitiy information; it has always been imputed for us.
20) Other Support Services (2900)
21) Student Transportation
22) This is filed as part of annual audit report as required by regulations of NYS Ed. Commissioner Section 172.3
23) Transportation - support expense (2700), Extracurricular - non-instructional (3400)
24) Our activity fund expenditures are in each function/object code that is correct for the expenditure.
25) It varies, depending on the activity. Most of it is through Instruction.
26) No one specific area.
27) Fidicuiary/agency funds
28) School Sponsored Activities
29) Student activity revenue not linked to expenditure. Revenue is receipted into general fund.

\({ }^{1}\) Value cotains imputation for missing data. Imputed value is less than 2 percent of total expenditures in any one state.
\({ }^{2}\) Value affected by redistribution of reported values to correct for missing data items.
NOTE: Detail may not sum to totals because of rounding. National figures do not include outlying areas.
SOURCE: Data reported by states to the U.S. Department of Education, National Center for Education Statistics, Common Core of Data
(CCD), "National Public Education Financial Survey," 2000-01 (Revision 1b, Revised June 2004).```
