## Contents

## What is The Nation's Report Card ${ }^{\text {TTW }}$ ?

The Nation's Report Card ${ }^{\text {TM }}$ informs the public about the academic achievement of elementary and secondary students in the United States. Report cards communicate the findings of the National Assessment of Educational Progress (NAEP), a continuing and nationally representative measure of achievement in various subjects over time.

Since 1969, NAEP assessments have been conducted periodically in reading, mathematics, science, writing, U.S. history, civics, geography, and other subjects. NAEP collects and reports information on student performance at the national and state levels, making the assessment an integral part of our nation's evaluation of the condition and progress of education. Only academic achievement data and related background information are collected. The privacy of individual students and their families is protected.

NAEP is a congressionally authorized project of the National Center for Education Statistics (NCES) within the Institute of Education Sciences of the U.S. Department of Education. The Commissioner of Education Statistics is responsible for carrying out the NAEP project. The National Assessment Governing Board oversees and sets policy for NAEP.

[^0]
# Executive Summary Reading scores up since 2007 at grade 8 and unchanged at grade 4 

Nationally representative samples of more than 178,000 fourth-graders and 160,000 eighth-graders participated in the 2009 National Assessment of Educational Progress (NAEP) in reading. At each grade, students responded to questions designed to measure their knowledge of reading comprehension across two types of texts: literary and informational.

At grade 4, the average reading score in 2009 was unchanged from the score in 2007 but was higher than the scores in other earlier assessment years from 1992 to 2005 (figure A). About two-thirds ( 67 percent) of fourth-graders performed at or above the Basic level in 2009, and one-third ( 33 percent) performed at or above Proficient. Both percentages were unchanged from 2007 but were higher than previous assessment years. Eight percent of fourth-graders performed at the Advanced level, which was the same as in 2007 but higher than in 1992.

At grade 8, the average reading score in 2009 was one point higher than in 2007 and four points higher than in 1992 but was not consistently higher than in all the assessment years in between. Gains since 2007 were seen for lower- and middle-performing students at the 10th, 25th, and 50th percentiles, while scores for higher-performing students at the 75th and 90th percentiles showed no significant change. In 2009, about three-quarters ( 75 percent) of eighth-graders performed at or above the Basic level, and one-third (32 percent) performed at or above Proficient. Both percentages were higher in 2009 than in 2007 and 1992. Three percent of eighth-graders performed at the Advanced level in 2009, which was the same as the percentages in 2007 and 1992.

Figure A. Trend in fourth- and eighth-grade NAEP reading average scores

[^1]
# Gains for some student groups but gaps persist 

Trends in scores for student groups were generally similar to those for students overall. At grade 4, there were no significant changes in the average reading scores from 2007 to 2009 for student groups by race/ethnicity, gender, or type of school. Scores for most of the student groups were, however, higher in 2009 than in 1992.

At grade 8, average scores were higher in 2009 than in both 2007 and 1992 for most racial/ethnic groups, male students, and public school students. There were no significant changes compared to either 2007 or 1992 for female students or private school students, and no significant change for Asian/Pacific Islander students compared to 1992.

Even with gains for most student groups from 1992 to 2009 at both grades, and since 2007 at grade 8 , score gaps have changed little. Compared to 2007, there have been no significant changes in the racial/ethnic gaps, gender gaps, or gaps by type of school at either grade. Compared to 1992, only the White - Black gap at grade 4 and the female - male gap at grade 8 have narrowed.

# Scores increase in three states/jurisdictions at grade 4 and nine states at grade 8 

'Department of Defense Education Activity (overseas and domestic schools).

Eighth-graders at the Proficient level were likely to be able to

- recognize an interpretation of the author's point in a persuasive essay, or
- interpret lines of a poem to explain the speaker's perspective.

The 2009 NAEP reading assessment measured students' reading and comprehension skills by asking them to read selected grade-appropriate materials and answer questions based on what they had read. The results of the 2009 assessment are compared to those from previous years, showing how students' performance in reading has progressed over time.

## The Reading Framework

The National Assessment Governing Board oversees the development of NAEP frameworks, which describe the specific knowledge and skills that should be assessed. Frameworks incorporate ideas and input from subject area experts, school administrators, policymakers, teachers, parents, and others. The Reading Framework for the 2009 National Assessment of Educational Progress describes the types of texts and questions that should be included in the assessment, as well as how the questions should be designed and scored. The development of the NAEP reading framework was guided by scientifically based reading research that defines reading as a dynamic cognitive process that allows students to

- understand written text;
- develop and interpret meaning; and
- use meaning as appropriate to the type of text, purpose, and situation.
The NAEP reading framework specifies the use of both literary and informational texts. Literary texts include three

The complete reading framework for 2009 is available at http://www.nagb.org/publications/frameworks/reading09.pdf.
types at each grade: fiction, literary nonfiction, and poetry. Informational texts include three broad categories: exposition; argumentation and persuasive text; and procedural text and documents. The inclusion of distinct text types recognizes that students read different texts for different purposes.
The Reading Framework for the 2009 National Assessment of Educational Progress replaces the framework first used for the 1992 reading assessment and then for subsequent reading assessments through 2007. Compared to the previous framework, the 2009 reading framework includes more emphasis on literary and informational texts, a redefinition of reading cognitive processes, a new systematic assessment of vocabulary knowledge, and the addition of poetry to grade 4. Results from special analyses determined the 2009 reading assessment results could be compared with those from earlier assessment years. These special analyses started in 2007 and included in-depth comparisons of the frameworks and the test questions, as well as a close examination of how the same students performed on the 2009 assessment and the earlier assessment. A summary of these special analyses and an overview of the differences between the previous framework and the 2009 framework are available on the Web at http://nces.ed.gov/ nationsreportcard/reading/trend_study.asp.

The framework specifies three reading behaviors, or cognitive targets: locate/recall, integrate/interpret, and critique/ evaluate. The term cognitive target refers to the mental processes or kinds of thinking that underlie reading comprehension. Reading questions are developed to measure these cognitive targets for both literary and informational texts.
In addition, the framework calls for a systematic assessment of meaning vocabulary. Meaning vocabulary questions measure readers' knowledge of specific word meaning as used in the passage by the author and also measure passage comprehension.

## Reading Cognitive Targets

Locate and Recall: When locating or recalling information from what they have read, students may identify explicitly stated main ideas or may focus on specific elements of a story.

Integrate and Interpret: When integrating and interpreting what they have read, students may make comparisons, explain character motivation, or examine relations of ideas across the text.
Critique and Evaluate: When critiquing or evaluating what they have read, students view the text critically by examining it from numerous perspectives or may evaluate overall text quality or the effectiveness of particular aspects of the text.

## Reporting NAEP Results

The assessment results are based on nationally representative samples of 178,800 fourth-graders from 9,530 schools and 160,900 eighth-graders from 7,030 schools. Because the elementary schools participating in NAEP are given the option to include all of their fourth-grade students in the sample, and fourth-grade response rates are typically greater, the number of students assessed at grade 4 are often higher than the number of students at grade 8 . Results for the nation reflect the performance of students attending public schools, private schools, Bureau of Indian Education schools, and Department of Defense schools. Results for states and jurisdictions reflect the performance of students in public schools only and are reported along with the results for public school students in the nation.

## Scale scores

NAEP reading results for grades 4 and 8 are reported as average scores on a 0-500 scale. Because NAEP scales are developed independently for each subject, scores cannot be compared across subjects.
In addition to reporting an overall reading score for each grade, scale scores are reported at five percentiles to show trends in results for students performing at lower (10th and 25th percentiles), middle (50th percentile), and higher (75th and 90 th percentiles) levels.

## Achievement levels

Based on recommendations from policymakers, educators, and members of the general public, the Governing Board sets specific achievement levels for each subject area and grade. Achievement levels are performance standards showing what students should know and be able to do. NAEP results are reported as percentages of students performing at or above the Basic and Proficient levels and at the Advanced level.
As provided by law, NCES, upon review of congressionally mandated evaluations of NAEP, has determined that achievement levels are to be used on a trial basis and should be interpreted with caution. The NAEP achievement levels have been widely used by national and state officials.

## NAEP Achievement Levels

Basic denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade.
Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
Advanced represents superior performance.

## Interpreting the Results

## Changes in performance over time

National results from the 2009 reading assessment are compared to eight previous assessment years at grade 4 and seven previous years at grade 8 (the 2000 reading assessment was administered at grade 4 only). State results for 2009 are compared to seven previous assessment years at grade 4 and five previous years at grade 8 . Changes in students' performance over time are summarized by comparing the results in 2009 to 2007 and the first assessment year, except when pointing out consistent patterns across assessments.

NAEP reports results using widely accepted statistical standards; findings are reported based on a statistical significance level set at . 05 with appropriate adjustments for multiple comparisons (see the Technical Notes for more information). The symbol (*) is used in tables and figures to indicate that an earlier year's score or percentage is significantly different from the 2009 results. Only those differences that are found to be statistically significant are discussed as higher or lower. The same standard applies when comparing the performance of one student group to another.

When scores significantly increase or decrease from one assessment year to the next, we are confident that student performance has changed. However, NAEP is not designed to identify the causes of these changes. Further, the many factors that may influence average student achievement scores also change over time. These include educational policies and practices, the quality of teachers, available resources, and the demographic characteristics of the student body.

## Explore Additional Results

Not all of the data for results discussed in this report are presented in corresponding tables or figures. These and other results can be found in the NAEP Data Explorer at http://nces.ed.gov/nationsreportcard/naepdata/.

## Accommodations and exclusions in NAEP

It is important to assess all selected students from the target population, including students with disabilities (SD) and English language learners (ELL). To accomplish this goal, many of the same testing accommodations allowed on state assessments (e.g., extra testing time or individual rather than group administration) are provided for SD and ELL students participating in NAEP. Accommodations were first made available for national and state samples in reading in 1998. Prior to 1998, no accommodations were provided in the NAEP reading assessment.

Because providing accommodations represented a change in testing conditions that could potentially affect the measurement of changes over time, split national and state samples of students were assessed in 1998—one sample permitted accommodations, and the other did not. Although the results for both samples are presented in the tables and figures, the comparisons to 1998 in the text are based on just the accommodated samples.

Even with the availability of accommodations, some students may still be excluded. Variations in exclusion and accommodation rates, due to differences in state policies and practices for identifying and including SD and ELL students, should be considered when comparing students' performance over time and across states. States and jurisdictions also vary in their proportion of special-needs students (especially ELL students). While the effect of exclusion is not precisely known, comparisons of performance results could be affected if exclusion rates are markedly different among states or vary widely over time. See appendix tables A-1 through A-8 for the percentages of students accommodated and excluded at the national and state levels. More information about NAEP's policy on the inclusion of special-needs students is available at http://nces.ed.gov/nationsreportcard/about/inclusion.asp.

## GRADE 4

## Fourth-graders' performance unchanged from 2007

There has been no significant change in the performance of the nation's fourth-graders in reading from 2007 to 2009. State results, however, show increases in average scores from 2007 to 2009 for three states and jurisdictions and decreases for four states.

Figure 1. Trend in fourth-grade NAEP reading average scores

Figure 2. Trend in fourth-grade NAEP reading percentile scores

* Significantly different ( $p<.05$ ) from 2009.

Figure 3. Trend in fourth-grade NAEP reading achievement-level performance

# No significant change in reading score since 2007 

The average reading score for the nation's fourth-graders was unchanged from 2007 to 2009 (figure 1). The score in 2009 was, however, higher than the scores in the other assessment years from 1992 to 2005.
As shown in figure $\mathbf{2}$, there were no significant changes in scores from 2007 to 2009 for lower-performing students (at the 10th and 25th percentiles), middle-performing students (at the 50th percentile), or higher-performing students (at the 75th and 90th percentiles). The scores in 2009 for students at the 10th, 25th, 50th, and 75th percentiles were higher than in 1992, but the score for students at the 90th percentile was not significantly different.

## One-third of fourthgraders perform at or above the Proficient level

The percentages of students performing at or above the three achievement levels were the same in 2009 as in 2007: 67 percent at or above Basic, 33 percent at or above Proficient, and 8 percent at Advanced (figure 3). While the percentages of students at or above Basic and at or above Proficient were higher in 2009 than in the other assessment years from 1992 to 2005, the percentage of students at Advanced was not consistently higher than the other assessment years, although it was higher than in 1992.

[^2]
## Performance of racial/ethnic groups not significantly changed since 2007

As was seen in the results for fourthgraders overall, there were no significant changes in scores between 2007 and 2009 for any of the five racial/ethnic groups (figure 4). Scores for White, Black, and Hispanic students in 2009 did, however, remain higher than the assessment years prior to 2007. While the score for Asian/Pacific Islander students in 2009 was also higher than most of the earlier assessment years from 1992 to 2005, the apparent difference in comparison to 2000 was not statistically significant. The apparent decrease in the score for American Indian/Alaska Native students in comparison to 1994 was not found to be statistically significant.
In 2009, both White and Asian/ Pacific Islander students scored higher on average than Black, Hispanic, and American Indian/Alaska Native students. While White students scored higher on average than Asian/Pacific Islander students in 1992, the score for Asian/ Pacific Islander students was higher than the score for White students in 2009.

Figure 4. Trend in fourth-grade NAEP reading average scores, by race/ethnicity

ASIAN/
PACIFIC ISLANDER

AMERICAN INDIAN/
ALASKA NATIVE

[^3]Figure 5. Trend in fourth-grade NAEP reading average scores and score gaps, by selected racial/ethnic groups

## Racial/ethnic gaps persist

The 26-point score gap in reading between White and Black students in 2009 was not significantly different from the gap in 2007 but was narrower than in all other earlier assessment years (figure 5). The 25-point score gap between White and Hispanic students in 2009 was not found to be significantly different from the gaps in either 2007 or 1992.

*Significantly different (p<.05) from 2009.
NOTE: Black includes African American, and Hispanic includes Latino. Race categories exclude Hispanic origin. Score gaps are calculated based on differences between unrounded average scores.

Table 1. Percentage of students assessed in fourth-grade NAEP reading, by race/ethnicity: Various years, 1992-2009

| Race/ethnicity | $1992^{1}$ | $1994^{1}$ | 1998 | 2000 | 2002 | 2003 | 2005 | 2007 | 2009 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| White | $73^{*}$ | $72^{*}$ | $66^{*}$ | $63^{*}$ | $61^{*}$ | $60^{*}$ | $59^{*}$ | $58^{*}$ | 56 |
| Black | 17 | 17 | 15 | 17 | $17^{*}$ | 17 | 16 | 16 | 16 |
| Hispanic | $7^{*}$ | $7^{*}$ | $14^{*}$ | $14^{*}$ | $16^{*}$ | $17^{*}$ | $18^{*}$ | $19^{*}$ | 20 |
| Asian/Pacific Islander | $2^{*}$ | $3^{*}$ | 4 | 4 | $4^{*}$ | $4^{*}$ | 5 | 5 | 5 |
| American Indian/ <br> Alaska Native | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 |

* Significantly different ( $p<.05$ ) from 2009.
${ }^{1}$ Accommodations were not permitted in this assessment year.
NOTE: Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin. Detail may not sum to totals because results are not shown for students whose race/ethnicity was unclassified.

The percentage of White fourth-graders decreased from 73 percent in 1992 to 56 percent in 2009, and the percentage of Hispanic students increased from 7 to 20 percent over the same period (table 1). The percentage of Asian/Pacific Islander students was also higher in 2009 than in 1992. The percentage of Black students in 2009 was not significantly different from 2007 or 1992.

[^4]
## Private school students outperform public school students

In 2009, the average reading score for fourth-graders attending public schools was 15 points lower than the overall score for students attending private schools, and 16 points lower than students in Catholic schools specifically (figure 6).
There were no significant changes in the average scores for students attending public schools, private schools, or Catholic schools from 2007 to 2009. The 15 -point score gap between private and public school students in 2009 was not significantly different from the gaps in 2007 or 1992.

It is important to note that there may be many reasons why private school students perform differently, on average, from public school students. Differences in demographic composition, admissions policies, availability of resources, parental involvement, and other factors not measured in NAEP can influence average student achievement scores.

Figure 6. Trend in fourth-grade NAEP reading average scores, by type of school

* Significantly different ( $p<.05$ ) from 2009.

NOTE: Private schools include Catholic, other religious, and nonsectarian private schools. Results are not shown for private schools in 2005 because the participation rates fell below the required standard for reporting.

Table 2. Percentage of students assessed in fourth-grade NAEP reading, by type of school: Various years, 1992-2009

| Type of school | $1992^{1}$ | $1994^{1}$ | 1998 | 2000 | 2002 | 2003 | 2005 | 2007 | 2009 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Public | $89^{*}$ | 90 | 90 | 90 | $90^{*}$ | $90^{*}$ | $90^{*}$ | 90 | 91 |
| Private | $11^{*}$ | 10 | 10 | 10 | $10^{*}$ | $10^{*}$ | 10 | 10 | 9 |
| Catholic | $8^{*}$ | $7 *$ | 6 | $6^{*}$ | $6^{*}$ | $5^{*}$ | $5^{*}$ | 5 | 4 |

[^5]Ninety-one percent of fourthgraders attended public schools in 2009, and 9 percent attended private schools, including 4 percent in Catholic schools (table 2). The percentage of students attending public schools in 2009 was higher than the percentage in 1992, and the percentage of students attending private schools was lower than in 1992.

## Female students score higher than male students

Female students scored 7 points higher on average than male students in 2009, which was not significantly different from the score gaps in either 2007 or 1992 (figure 7). Average reading scores for male and female students in 2009 remained unchanged from 2007.

## Results by family income level show no significant change since 2007

NAEP uses students' eligibility for the National School Lunch Program as an indicator of low income. Students from lower-income families are eligible for either free or reduced-price school lunches, while students from higher-income families are not (see the Technical Notes for eligibility criteria).

Students who were not eligible have typically scored higher on average than those eligible for reduced-price lunch, who in turn scored higher than those eligible for free lunch (figure 8). The scores for all three groups showed no significant change from 2007 to 2009 but remained higher than in 2003.

Figure 7. Trend in fourth-grade NAEP reading average scores and score gaps, by gender

* Significantly different ( $p<.05$ ) from 2009.

NOTE: Score gaps are calculated based on differences between unrounded average scores.

Figure 8. Trend in fourth-grade NAEP reading average scores, by eligibility for free or reduced-price school lunch

Table 3. Percentage of students assessed in fourth-grade NAEP reading, by eligibility for free or reduced-price school lunch: Various years, 2003-09

| Eligibility status | 2003 | 2005 | 2007 | 2009 |
| :--- | ---: | ---: | ---: | ---: |
| Eligible for free lunch | $32^{*}$ | $34^{*}$ | $35^{*}$ | 38 |
| Eligible for reduced-price lunch | $8^{*}$ | $7 *$ | 6 | 6 |
| Not eligible | 50 | 50 | $52^{*}$ | 50 |
| Information not available | $10 *$ | $8^{*}$ | 7 | 7 |

*Significantly different ( $p<.05$ ) from 2009.
NOTE: Detail may not sum to totals because of rounding.

Some changes were seen since 2007 in the proportion of fourth-graders eligible for the National School Lunch Program. The percentage of fourth-graders eligible for free lunch increased from 35 percent in 2007 to 38 percent in 2009, while the percentage of students who were not eligible decreased from 52 to 50 percent (table 3). There was no change in the percentage of students eligible for reduced-price lunch from 2007 to 2009.

## State Performance at Grade 4

NAEP state results make it possible to examine the progress of public school students in each participating state over time. All 50 states, the District of Columbia, and Department of Defense schools participated in the 2009 reading assessment. These 52 states and jurisdictions are all referred to as "states" in the following summary of results. State results are also available for seven earlier assessments at grade 4. While all states participated in the assessments since 2003, not all participated or met the criteria for reporting in earlier assessment years.

## Scores increase since 2007 in three states and decrease in four states

The map shown below highlights changes in states' average reading scores from 2007 to 2009 at grade 4 (figure 9). While there was no significant change in the overall average score for fourth-grade public school students in the nation from 2007 to 2009, scores increased in three states (District of Columbia, Kentucky,
and Rhode Island) and decreased in four states (Alaska, lowa, New Mexico, and Wyoming). In comparison to the results in 1992, scores were higher in 2009 for 25 of the 42 states that participated in both years and lower in 4 states.

Figure 9. Changes in fourth-grade NAEP reading average scores between 2007 and 2009

## A Closer Look at State Results

Changes in states' overall average reading scores do not always reflect comparable changes in scores for all student groups. Among the seven states listed in figure 10 that showed either an increase or decrease in the overall average score, none showed significant changes across all student groups.

Among the three states where overall average reading scores increased since 2007, results for racial/ethnic groups showed increases for Black students in the District of Columbia and for both White and Black students in Rhode Island. In the four states where scores decreased since 2007, average scores for male students decreased in Iowa, New Mexico, and Wyoming, while scores for female students showed no significant change.

Although not shown here, among the 45 states where there were no significant changes in overall average reading scores since 2007, scores increased for Asian/Pacific Islander
students in Pennsylvania and for students eligible for free/ reduced-price school lunch in Connecticut, Florida, and New York. Scores decreased for male students in Idaho, Maine, and Wisconsin, and for students eligible for free/reduced-price lunch in Hawaii.

## Additional State Results

Additional state results for grade 4 are provided in figure 11, table 4, and appendix tables A-9 through A-16. Web-generated profiles of state results and a one-page print snapshot report that presents key findings are available for each participating state and jurisdiction at http://nces.ed.gov/ nationsreportcard/states/.

Figure 10. Change in fourth-grade NAEP reading average scores between 2007 and 2009, by selected student groups and state/jurisdiction

[^7]
## Assessment Content at Grade 4

To reflect developmental differences expected of students at varying grade levels, the proportion of the reading assessment devoted to each of the three cognitive targets varies at each grade assessed.

## 20\% Critique and Evaluate

These questions ask students to consider all or part of the text from a critical perspective and to make judgments about the way meaning is conveyed.

## $50 \%$ Integrate and Interpret

These questions move beyond a focus on discrete information and require readers to make connections across larger portions of text or to explain what they think about the text as a whole.

## $30 \%$ Locate and Recall

These questions focus on specific information contained in relatively small amounts of text and ask students to recognize what they have read.

Because the assessment covered a range of texts and included more questions than any one student could answer, each student took just a portion of the assessment. The 199 questions that made up the entire fourth-grade assessment were distributed across 20 sets of passages and items. Each set typically comprised 10 questions, a mix of multiple choice and constructed response. Each student read and responded to questions in just two 25-minute sets.

## Reading Achievement-Level Descriptions for Grade 4

NAEP reading achievement-level descriptions present expectations of student performance in relation to a range of text types and text difficulty and in response to a variety of assessment questions intended to elicit different cognitive processes and reading behaviors. The specific processes and reading behaviors mentioned in the achievement-level descriptions are illustrative of those judged as central to students' successful comprehension of texts. These processes and reading behaviors involve different and increasing cognitive demands from one grade and performance level to the next as they are applied within more challenging contexts and with more complex information. While similar reading behaviors are included at the different performance levels and grades, it should be understood that these skills are being described in relation to texts and assessment questions of varying difficulty.

The specific descriptions of what fourth-graders should know and be able to do at the Basic, Proficient, and Advanced reading achievement levels are presented below. (Note: Shaded text is a short, general summary to describe performance at each achievement level.) NAEP achievement levels are cumulative; therefore, student performance at the Proficient level includes the competencies associated with the Basic level, and the Advanced level also includes the skills and knowledge associated with both the Basic and the Proficient levels. The cut score indicating the lower end of the score range for each level is noted in parentheses.

## Basic (208)

Fourth-grade students performing at the Basic level should be able to locate relevant information, make simple inferences, and use their understanding of the text to identify details that support a given interpretation or conclusion. Students should be able to interpret the meaning of a word as it is used in the text.

When reading literary texts such as fiction, poetry, and literary nonfiction, fourth-grade students performing at the Basic level should be able to make simple inferences about characters, events, plot, and setting. They should be able to identify a problem in a story and relevant information that supports an interpretation of a text.

When reading informational texts such as articles and excerpts from books, fourth-grade students performing at the Basic level should be able to identify the main purpose and an explicitly stated main idea, as well as gather information from various parts of a text to provide supporting information

## Proficient (238)

Fourth-grade students performing at the Proficient level should be able to integrate and interpret texts and apply their understanding of the text to draw conclusions and make evaluations.

When reading literary texts such as fiction, poetry, and literary nonfiction, fourth-grade students performing at the Proficient level should be able to identify implicit main ideas and recognize relevant information that supports them. Students should be able to judge elements of an author's craft and provide some support for their judgment. They should be able to analyze character roles, actions, feelings, and motivations.

When reading informational texts such as articles and excerpts from books, fourth-grade students performing at the Proficient level should be able to locate relevant information, integrate information across texts, and evaluate the way an author presents information. Student performance at this level should demonstrate an understanding of the purpose for text features and an ability to integrate information from headings, text boxes, and graphics and their captions. They should be able to explain a simple cause-and-effect relationship and draw conclusions.

## Advanced (268)

Fourth-grade students performing at the Advanced level should be able to make complex inferences and construct and support their inferential understanding of the text. Students should be able to apply their understanding of a text to make and support a judgment.

When reading literary texts such as fiction, poetry, and literary nonfiction, fourth-grade students performing at the Advanced level should be able to identify the theme in stories and poems and make complex inferences about characters' traits, feelings, motivations, and actions. They should be able to recognize characters' perspectives and evaluate characters' motivations. Students should be able to interpret characteristics of poems and evaluate aspects of text organization.
When reading informational texts such as articles and excerpts from books, fourth-grade students performing at the Advanced level should be able to make complex inferences about main ideas and supporting ideas. They should be able to express a judgment about the text and about text features and support the judgments with evidence. They should be able to identify the most likely cause given an effect, explain an author's point of view, and compare ideas across two texts.

## What Fourth-Graders Know and Can Do in Reading

The item map below is useful for understanding performance at different levels on the NAEP scale. The scale scores on the left represent the average scores for students who were likely to get the items correct or complete. The cut score at the lower end of the range for each achievement level is boxed. The descriptions of selected assessment questions indicating what students need to do to answer the question correctly are listed on the right, along with the corresponding cognitive targets.

For example, the map on this page shows that fourth-graders performing near the top of the Basic range (students with an average score of 229) were likely to be able to recognize the main problem faced by a historical figure. Students performing near the top of the Proficient range (with an average score of 260) were likely to be able to infer and provide the relationship between the main subject and a historical movement.

GRADE 4 NAEP READING ITEM MAP

|  | Scale score | Cognitive target | Question description |
| :---: | :---: | :---: | :---: |
| 500 |  |  |  |
|  | // |  |  |
|  | 332 | Critique/evaluate | Make and support judgment about author's craft and support with information from text |
|  | 326 | Integrate/interpret | Use information to explain causal relations in a process (shown on page 23) |
|  | 309 | Integrate/interpret | Use specific information to describe and explain a process |
|  | 301 | Critique/evaluate | Evaluate subheading and informational text and use information to support evaluation |
|  | 299 | Critique/evaluate | Make complex inferences about historical person's motivation and support with central idea |
|  | 292 | Integrate/interpret | Use information across paragraphs to make complex inference about story event |
|  | 279 | Integrate/interpret | Provide comparison of character traits across two texts of different genres |
|  | 273 | Integrate/interpret | Recognize meaning of a word used to describe a story setting |
|  | 268 | Integrate/interpret | Describe main story character using text support |
| 268 |  |  |  |
| $\begin{aligned} & \stackrel{\rightharpoonup}{\mathrm{S}} \\ & \frac{3}{U} \\ & \frac{0}{2} \end{aligned}$ | 264 | Critique/evaluate | Recognize technique author uses to develop character |
|  | 260 | Integrate/interpret | Infer and provide relationship between main subject and historical movement |
|  | 258 | Integrate/interpret | Recognize meaning of a word that describes a character's actions |
|  | 255 | Critique/evaluate | Use information from an article to provide and support an opinion |
|  | 251 | Integrate/interpret | Provide cross-text comparison of two characters' feelings |
|  | 249 | Integrate/interpret | Provide text-based comparison of change in main character's feelings |
|  | 244 | Locate/recall | Recognize explicitly stated information that explains a character's behavior |
|  | 239 | Locate/recall | Recognize specific detail of supporting information (shown on page 22) |
| 238 |  |  |  |
| - | 234 | Critique/evaluate | Use an example to support opinion about a poem |
|  | 229 | Integrate/interpret | Recognize main problem faced by historical figure |
|  | 221 | Integrate/interpret | Interpret character's statement to provide character trait |
|  | 220 | Locate/recall | Recognize reason for action by a historical figure |
|  | 220 | Integrate/interpret | Use information across text to infer and recognize character trait |
|  | 219 | Integrate/interpret | Recognize main idea not explicitly stated in article |
|  | 216 | Critique/evaluate | Provide a relevant fact from an article |
|  | 211 | Integrate/interpret | Recognize main purpose of informational science text |
|  | 208 |  |  |
|  | 205 | Integrate/interpret | Recognize meaning of word as used by character in a story |
|  | 201 | Integrate/interpret | Provide general comparison of two characters based on story details |
|  | 190 | Integrate/interpret | Retrieve relevant detail that supports main idea |
|  | 187 | Locate/recall | Make a simple inference to recognize description of character's feeling |
|  | 177 | Locate/recall | Recognize details about character in a story |
|  | // |  |  |
|  | 0 |  |  |

NOTE: Regular type denotes a constructed-response question. Italic type denotes a multiple-choice question. The position of a question on the scale represents the average scale score attained by students who had a 65 percent probability of successfully answering a constructed-response question, or a 74 percent probability of correctly answering a four-option multiple-choice question. For constructed-response questions, the question description represents students' performance at the highest scoring level. Scale score ranges for reading achievement levels are referenced on the map.

## Grade 4 Sample Reading Passage

## What＇s the Buzz？

by Margery Facklam

＂What do bees do？＂Ask most people and they will say，＂Bees make honey and they sting．＂They may even tell you that bees are fuzzy，black－and－yellow insects that live in hives．But there are lots of kinds of bees， and they＇re not all the same．Some fly at night．Some can＇t sting．Some live only a few months，and others live several years．Every species of bee has its own story．A species is one of the groups used by scientists to classify，or group，living things．Animals of the same species can mate with each other．And they give birth to young that can mate and give birth，or reproduce．

Scientists have named about 20，000 species of bees． But they think there may be as many as 40,000 species． Why so many？

Over millions of years，environments change．Animals slowly evolve，or change，too．These changes help the animals survive，or live，so that they can reproduce．And it＇s reproducing that matters，not how long an animal lives．

To survive，some bee species developed new ways to live together．Some found new ways to＂talk＂to each other，or communicate．Others developed other new skills and new behaviors．Scientists call these kinds of changes adaptations．Over a long time，a group of bees can change so much it becomes a new species．

Bees come in different sizes．There are fat bumblebees and bees not much bigger than the tip of a pencil．There are bees of many colors，from dull black to glittering green．Some species of tropical bees are such bright reds and blues that they sparkle in the sun like little jewels．

Most bees play an important role in plant reproduction． Bees collect pollen，a powderlike material that flowers make．By carrying pollen from one flower to another，

Day－active
bees help plants reproduce. Bees are among the world's most important insects. Without them, many plants might not survive. And for most animals, life would be impossible without plants.

## Pollination

Picture 1
Pollination is the first step in making seeds. The male part of the plant is called the stamen. The female part is called the pistil. A plant can't make seeds until the pollen from the stamen reaches the pistil. Some flowers pollinate themselves when pollen from the stamen falls on the pistil. Other flowers are pollinated when pollen blows from one flower to another.

Many animals spread pollen. But bees are the best pollinators of all. They go to the flowers to gather pollen for food. Bees collect pollen in different ways. Some bees gather pollen from flower stamens by brushing against them. Some of the pollen then rubs off on the next flower the bees visit. In this way, bees spread pollen from flower to flower as they gather food.

Picture 2
Bees also drink nectar, a sweet liquid in flowers. As a bee goes inside this orchid for nectar, its weight makes the orchid's stamen bend over. Pollen from the stamen brushes on the bee.

Picture 3
Stingless bees like this one sometimes shake themselves to gather pollen from flowers. Shaking loosens the pollen and makes it fall on the bee.

The following sample questions assessed fourth-grade students' comprehension of informational text in the article titled "What's the Buzz?", which describes different species of bees and the important role some bees play in plant reproduction.

## Sample Question: Locate and Recall

This sample question from the 2009 fourth-grade reading assessment measures students' performance in recognizing a specific detail from the article that supports the discussion of bees. Sixty-three percent of fourth-graders were able to identify the correct response.

Percentage of fourth-grade students in each response category: 2009

| Choice A | Choice B | Choice C | Choice D | Omitted |
| ---: | ---: | ---: | ---: | ---: |
| 10 | 19 | 63 | 7 | 1 |

NOTE: Detail may not sum to totals because of rounding.
The table below shows the percentage of fourth-graders within each achievement level who answered this question correctly. For example, 64 percent of fourth-graders at the Basic level selected the correct answer choice.

Percentage correct for fourth-grade students at each achievement level: 2009

| Overall | Below Basic | At Basic | At Proficient | At Advanced |
| ---: | ---: | ---: | ---: | ---: |
| 63 | 38 | 64 | 82 | 93 |

## SAMPLE QUESTION:

According to the article, what can animals of the same species do?
(A) Travel in groups over long distances
(B) Live together in homes such as hives
(C) Mate with each other and give birth
(D) Find food for their young

[^8]
## Sample Question: Integrate and Interpret

This sample constructed-response question measures fourth-graders' performance in integrating and interpreting the information they have read about bees and pollination. Successful responses demonstrated understanding of a causal relationship between bees helping plants to reproduce and plants feeding animals. Student responses to this question were rated using four scoring levels.

Extensive responses provided a text-based explanation of why bees are important to both plants and animals.
Essential responses provided a text-based explanation of why bees are important to either plants or animals.
Partial responses provided relevant information from the article without using it to explain why bees are important to plants or animals.
Unsatisfactory responses provided incorrect informadion or irrelevant details.

The sample student responses shown on the right were rated as "Extensive" and "Essential." The response rated "Extensive" connects the information about what bees do in pollination to plant growth and to those plants providing food for animals. Twenty percent of fourthgraders' responses to this question received an "Extensive" rating. The response rated "Essential" demonstrates understanding that bees are important to plants because they help them to grow, but the response does not explain why helping plants grow is important to animals. The response does not explain that plants are important to the survival of animals.

Percentage of fourth-grade students in each response category: 2009

| Extensive | Essential | Partial | Unsatisfactory | Omitted |
| ---: | ---: | ---: | ---: | ---: |
| 20 | 39 | 23 | 16 | 2 |

NOTE: Detail may not sum to totals because the percentage of responses rated as "Off-task" is not shown. Off-task responses are those that do not provide any information related to the assessment task.

The table below shows the percentage of fourth-graders within each achievement-level interval whose response to this question was rated as "Extensive." For example, among the students assessed who answered this question, 17 percent of fourth-graders at the Basic level provided a response rated as "Extensive."

Percentage of answers rated as "Extensive" for fourth-grade students at each achievement level: 2009

| Overall | Below Basic | At Basic | At Proficient | At Advanced |
| ---: | ---: | ---: | ---: | ---: |
| 20 | 5 | 17 | 31 | 51 |

## SAMPLE QUESTION:

Explain why bees are important to both plants and animals. Use information from the article to support your answer.

Extensive response:

Essential response:
bees are inporiont to plate
cause they help them grow by spreading the colin around
the plants so they con glow.

[^9]
## GRADE 8

## Eighth-graders' performance improves since 2007

Average reading scores increased from 2007 to 2009 for eighth-graders in the nation and in nine states, and no states showed a decline.

Figure 12. Trend in eighth-grade NAEP reading average scores

* Significantly different (p<.05) from 2009.

Figure 13. Trend in eighth-grade NAEP reading percentile scores

* Significantly different (p<.05) from 2009.

Figure 14. Trend in eighth-grade NAEP reading achievement-level performance

## All racial/ethnic groups make gains since 2007

Average reading scores were higher in 2009 than in 2007 for all racial/ethnic groups (figure 15). Scores were higher in 2009 than in 1992 for White, Black, and Hispanic students. However, even with recent gains, apparent increases in comparison to 1992 for Asian/Pacific Islander students and to 1994 for American Indian/Alaska Native students were not statistically significant.

In 2009, both White and Asian/Pacific Islander students scored higher on average than Black, Hispanic, and American Indian/Alaska Native students. The score in 2009 for American Indian/ Alaska Native students was 5 points higher than for Black students, and the score for Hispanic students was 3 points higher than for Black students.

Figure 15. Trend in eighth-grade NAEP reading average scores, by race/ethnicity

HISPANIC

ASIAN/ PACIFIC ISLANDER

AMERICAN INDIAN/ ALASKA NATIVE

[^10][^11]Figure 16. Trend in eighth-grade NAEP reading average scores and score gaps, by selected racial/ethnic groups

* Significantly different ( $p<.05$ ) from 2009.

NOTE: Black includes African American, and Hispanic includes Latino. Race categories exclude Hispanic origin.
Score gaps are calculated based on differences between unrounded average scores.

## Racial/ethnic gaps persist

Significant score gaps persisted between White students and their Black and Hispanic peers in 2009. Because all three racial/ethnic groups have made progress, neither the White - Black nor the White - Hispanic score gap in 2009 was significantly different from its corresponding gap in 2007 or 1992 (figure 16).

## Achievement-Level Results

Information is available on achievementlevel results for racial/ethnic groups and other reporting categories at http:// nationsreportcard.gov/reading_2009/.

Table 5. Percentage of students assessed in eighth-grade NAEP reading, by race/ethnicity: Various years, 1992-2009

| Race/ethnicity | $1992^{1}$ | $1994^{1}$ | 1998 | 2002 | 2003 | 2005 | 2007 | 2009 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| White | $72^{*}$ | $72^{*}$ | $70^{*}$ | $65^{*}$ | $63^{*}$ | $61^{*}$ | $60^{*}$ | 58 |
| Black | $16^{*}$ | 16 | 15 | 15 | $16^{*}$ | $16^{*}$ | $16^{*}$ | 15 |
| Hispanic | $8^{*}$ | $8^{*}$ | $11^{*}$ | $14^{*}$ | $15^{*}$ | $16^{*}$ | $17^{*}$ | 20 |
| Asian/Pacific Islander | $3^{*}$ | $3^{*}$ | $3^{*}$ | $4^{*}$ | $4^{*}$ | $4^{*}$ | 5 | 5 |
| American Indian/ <br> Alaska Native | $1^{*}$ | 1 | \#*$^{*}$ | 1 | 1 | 1 | $1^{*}$ | 1 |

## \# Rounds to zero.

* Significantly different ( $p<.05$ ) from 2009.
${ }^{1}$ Accommodations were not permitted in this assessment year.
NOTE: Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin. Detail may not sum to totals because results are not shown for students whose race/ethnicity was unclassified.

The percentage of White students decreased from 72 percent in 1992 to 58 percent in 2009, and the percentage of Hispanic students increased from 8 to 20 percent (table 5). The percentage of Asian/ Pacific Islander students was higher in 2009 than in 1992, but the percentage of Black students was lower.

## Public school students make gains since 2007

In 2009, the average reading score for eighth-graders attending public schools was 19 points ${ }^{1}$ lower than the overall score for students attending private schools (figure 17). The average reading score for eighth-graders attending public schools was 1 point higher in 2009 than in 2007. There was no significant change from 2007 to 2009 in the average score for students attending private schools overall, or for the subset of students attending Catholic schools.

The 19-point gap between public and private schools in 2009 was not significantly different from the gap in any of the previous assessment years with reportable results for both groups.

Ninety-one percent of eighth-graders attended public schools in 2009, and 9 percent attended private schools, including 5 percent in Catholic schools. The proportions of students attending public and private schools have not changed significantly in comparison to either 2007 or 1992.

## Gender gap smaller than in 1992

The average reading score for male students was higher in 2009 than in both 2007 and 1992, while the score for female students was not significantly different from either year (figure 18). The 9-point score gap between male and female students in 2009 was not significantly different from the gap in 2007 but was smaller than the gap in 1992.

[^12]Figure 17. Trend in eighth-grade NAEP reading average scores, by type of school

* Significantly different ( $p<.05$ ) from 2009.

NOTE: Private schools include Catholic, other religious, and nonsectarian private schools. Results are not shown for private schools in 2005 because the participation rates fell below the required standards for reporting.

Figure 18. Trend in eighth-grade NAEP reading average scores and score gaps, by gender

* Significantly different ( $p<.05$ ) from 2009.

NOTE: Score gaps are calculated based on differences between unrounded average scores.

SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), various years, $1992-2009$ Reading Assessments.

## Some gains for lower-income students

Changes in reading performance since 2007 varied by family income, as indicated by students' eligibility for free or reduced-price school lunch. Average scores were higher in 2009 than in 2007 and 2003 both for students who were eligible for free school lunch and students who were not eligible, while the score in 2009 for students eligible for reduced-price lunch was not significantly different from either 2007 or 2003 (figure 19).

As was seen in the results for grade 4, eighth-graders who were not eligible for free or reduced-price school lunch scored higher on average than those who were eligible, and students eligible for reduced-price lunch scored higher than those eligible for free lunch.

Figure 19. Trend in eighth-grade NAEP reading average scores, by eligibility for free or reduced-price school lunch

Table 6. Percentage of students assessed in eighth-grade NAEP reading, by eligibility for free or reduced-price school lunch: Various years, 2003-09

| Eligibility status | 2003 | 2005 | 2007 | 2009 |
| :--- | :---: | :---: | :---: | ---: |
| Eligible for free lunch | $26^{*}$ | $29^{*}$ | $31^{*}$ | 33 |
| Eligible for reduced-price lunch | $7^{*}$ | $7^{*}$ | 6 | 6 |
| Not eligible | 55 | $56^{*}$ | 55 | 54 |
| Information not available | $11^{*}$ | 8* $^{*}$ | 7 | 7 |

* Significantly different ( $p<.05$ ) from 2009.

NOTE: Detail may not sum to totals because of rounding.

Thirty-nine percent of eighth-graders were eligible for free or reduced-price school lunch in 2009 (table 6). The percentage of students who were eligible for free lunch increased from 31 percent in 2007 to 33 percent in 2009.

## Score increases for students in city schools

Students' performance on the reading assessment differed based on the location of the school they attended. In 2009, students attending schools in suburban locations scored the highest on average (figure 20). Those in rural schools scored higher on average than students attending schools in cities and towns. See the Technical Notes for more information on how these school location categories were defined.

Score gains since 2007 varied by school location. Average scores were higher in 2009 than in 2007 for students attending schools in city locations but showed no significant change for students whose schools were located in rural locations, suburbs, or towns.

Figure 20. Average scores in eighth-grade NAEP reading, by school location: 2007 and 2009

*Significantly different ( $p<.05$ ) from 2009.

Table 7. Percentage of students assessed in eighth-grade NAEP reading, by school location: 2007 and 2009

| School location | 2007 | 2009 |
| :--- | ---: | ---: |
| City | 29 | 29 |
| Suburb | 37 | 37 |
| Town | 13 | 13 |
| Rural | 21 | 22 |

NOTE: Detail may not sum to totals because of rounding.

In 2009, a higher proportion of eighth-graders attended schools in suburban locations than in other locations (table 7). The proportion of students in each type of location remained stable between 2007 and 2009, with no significant changes in the percentages of students attending schools in any of the four categories.

## State Performance at Grade 8

All 50 states, the District of Columbia, and Department of Defense schools participated in the 2009 reading assessment. These 52 states and jurisdictions are all referred to as "states" in the following summary of results. State results are also available for five earlier assessments at grade 8 . While all states participated in the assessments since 2003, not all have participated or met the criteria for reporting in earlier assessment years.

## Scores increase since 2007 in nine states, and no states show a decline

The map shown below highlights changes in states' average reading scores from 2007 to 2009 at grade 8 (figure 21). While the overall average score for eighthgrade public school students in the nation was higher in 2009 than in 2007, increases were seen in less than 20 percent of the states. Scores were higher in 2009
than in 2007 for 9 states. No states showed a decline since 2007. In comparison to the results in 1998, scores were higher in 2009 for 11 of the 38 states that participated in both years, and lower in 6 states.

Figure 21. Changes in eighth-grade NAEP reading average scores between 2007 and 2009

## A Closer Look at State Results

Not all student groups made gains in the 9 states shown in figure $\mathbf{2 2}$ where overall eighth-grade reading scores increased from 2007 to 2009. Results by race/ethnicity showed increases for White, Hispanic, and Asian/Pacific Islander students in Connecticut, and for White students only in Kentucky, New Mexico, and Utah. Results by students' eligibility for free/ reduced-price school lunch showed higher scores in 2009 than in 2007 both for students who were eligible and for those who were not eligible in Florida, Hawaii, Kentucky, and New Mexico, and just for students who were not eligible in Connecticut, Pennsylvania, and Utah. Although not shown here, among the 43 states where reading scores showed no significant change since 2007, scores increased for Hispanic students in Rhode Island, South Carolina, and Wyoming; for female students in

Rhode Island; and for male students in Wyoming. The average score decreased from 2007 to 2009 for students not eligible for the school lunch program in lowa.

## Additional State Results

Additional state results for grade 8 are provided in figure 23, table 8, and appendix tables A-17 through A-24. Web-generated profiles of state results and a one-page print snapshot report that presents key findings are available for each participating state and jurisdiction at http://nces.ed.gov/ nationsreportcard/states/.

Figure 22. Change in eighth-grade NAEP reading average scores between 2007 and 2009, by selected student groups and state/jurisdiction

| State/jurisdiction | Overall | Race/ethnicity |  |  |  | Gender |  | Eligibility for free/reducedprice school lunch |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | White | Black | Hispanic | Asian/Pacific Islander | Male | Female | Eligible | Not eligible |

## Assessment Content at Grade 8

The distribution of items among the three cognitive targets reflects the different developmental emphases across grade levels as specified in the reading framework.

## 30\% Critique and Evaluate

These questions ask students to consider all or part of the text from a critical perspective and to make judgments about the way meaning is conveyed.

## 50\% Integrate and Interpret

These questions move beyond a focus on discrete information and require readers to make connections across larger portions of text or to explain what they think about the text as a whole.

## 20\% Locate and Recall

These questions focus on specific information contained in relatively small amounts of text and ask students to recognize what they have read.

Because the assessment covered a range of texts and included more questions than any one student could answer, each student took just a portion of the assessment. The 257 questions that made up the entire eighth-grade assessment were distributed across 25 sets of passages and items. Each set typically comprised 10 questions, a mix of multiple choice and constructed response. Each student read and responded to questions in just two 25 -minute sets.

## Reading Achievement-Level Descriptions for Grade 8

NAEP reading achievement-level descriptions present expectations of student performance in relation to a range of text types and text difficulty and in response to a variety of assessment questions intended to elicit different cognitive processes and reading behaviors. The specific processes and reading behaviors mentioned in the achievement-level descriptions are illustrative of those judged as central to students' successful comprehension of texts. These processes and reading behaviors involve different and increasing cognitive demands from one grade and performance level to the next as they are applied within more challenging contexts and with more complex information. While similar reading behaviors are included at the different performance levels and grades, it should be understood that these skills are being described in relation to texts and assessment questions of varying difficulty.

The specific descriptions of what eighth-graders should know and be able to do at the Basic, Proficient, and Advanced reading achievement levels are presented below. (Note: Shaded text is a short, general summary to describe performance at each achievement level.) NAEP achievement levels are cumulative; therefore, student performance at the Proficient level includes the competencies associated with the Basic level, and the Advanced level also includes the skills and knowledge associated with both the Basic and the Proficient levels. The cut score indicating the lower end of the score range for each level is noted in parentheses.

## Basic (243)

Eighth-grade students performing at the Basic level should be able to locate information; identify statements of main idea, theme, or author's purpose; and make simple inferences from texts. They should be able to interpret the meaning of a word as it is used in the text. Students performing at this level should also be able to state judgments and give some support about content and presentation of content.

When reading literary texts such as fiction, poetry, and literary nonfiction, eighth-grade students performing at the Basic level should recognize major themes and be able to identify, describe, and make simple inferences about setting and about character motivations, traits, and experiences. They should be able to state and provide some support for judgments about the way an author presents content and about character motivation.

When reading informational texts such as exposition and argumentation, eighth-grade students performing at the Basic level should be able to recognize inferences based on main ideas and supporting details. They should be able to locate and provide relevant facts to construct general statements about information from the text. Students should be able to provide some support for judgments about the way information is presented.

## Proficient (281)

Eighth-grade students performing at the Proficient level should be able to provide relevant information and summarize main ideas and themes. They should be able to make and support inferences about a text, connect parts of a text, and analyze text features. Students performing at this level should also be able to fully substantiate judgments about content and presentation of content.

When reading literary texts such as fiction, poetry, and literary nonfiction, eighth-grade students performing at the Proficient level should be able to make and support a connection between characters from two parts of a text. They should be able to recognize character actions and infer and support character feelings. Students performing at this level should be able to provide and support judgments about characters' motivations across texts. They should be able to identify how figurative language is used.
When reading informational texts such as exposition and argumentation, eighth-grade students performing at the Proficient level should be able to locate and provide facts and relevant information that support a main idea or purpose, interpret causal relations, provide and support a judgment about the author's argument or stance, and recognize rhetorical devices.

## Advanced (323)

Eighth-grade students performing at the Advanced level should be able to make connections within and across texts and to explain causal relations. They should be able to evaluate and justify the strength of supporting evidence and the quality of an author's presentation. Students performing at the Advanced level also should be able to manage the processing demands of analysis and evaluation by stating, explaining, and justifying.

When reading literary texts such as fiction, literary nonfiction, and poetry, eighth-grade students performing at the Advanced level should be able to explain the effects of narrative events. Within or across texts, they should be able to make thematic connections and make inferences about characters' feelings, motivations, and experiences.

When reading informational texts such as exposition and argumentation, eighth-grade students performing at the Advanced level should be able to infer and explain a variety of connections that are intratextual (such as the relation between specific information and the main idea) or intertextual (such as the relation of ideas across expository and argument texts). Within and across texts, students should be able to state and justify judgments about text features, choice of content, and the author's use of evidence and rhetorical devices.

# What Eighth-Graders Know and Can Do in Reading 

The item map below illustrates the range of reading comprehension skills demonstrated by eighth-graders. The scale scores on the left represent the average scores for students who were likely to get the items correct or complete. The cut score at the lower end of the range for each achievement level is boxed. The descriptions of selected assessment questions indicating what students need to do to answer the question correctly are listed on the right, along with the corresponding cognitive targets.

For example, students performing in the middle of the Basic range (with an average score of 266) were likely to be able to recognize a character's motivation as it related to the theme of the story. Students performing in the middle of the Proficient range (with an average score of 294) were likely to be able to recognize an interpretation of the author's point in a persuasive essay.

## GRADE 8 NAEP READING ITEM MAP

|  | Scale score | Cognitive target | Question description |
| :---: | :---: | :---: | :---: |
|  | 500 |  |  |
|  | // |  |  |
|  | 364 | Critique/evaluate | Evaluate presentation of information and support with examples |
|  | 353 | Integrate/interpret | Interpret poetic image in relation to poem's events |
|  | 352 | Critique/evaluate | Explain how setting enhances central idea of essay |
|  | 346 | Critique/evaluate | Evaluate arguments and justify reasoning with support from text |
|  | 340 | Integrate/interpret | Compare two texts of different genres to provide similarity and difference |
|  | 336 | Integrate/interpret | Describe event and explain causal relation in narrative poem (shown on page 41) |
|  | 330 | Integrate/interpret | Synthesize across story to provide theme and support with text |
|  | 324 | Critique/evaluate | Make judgment about author's craft and support with information from text |
|  | 323 | Critique/evaluate | Explain relation between information in box and rest of article |
|  | 323 - |  |  |
|  | 318 | Integrate/interpret | Interpret lines of poem to explain speaker's perspective |
|  | 301 | Integrate/interpret | Analyze to connect character descriptions in story and poem |
|  | 297 | Critique/evaluate | Evaluate subheading and use information to support evaluation |
|  | 294 | Integrate/interpret | Recognize interpretation of author's point in persuasive essay |
|  | 291 | Integrate/interpret | Recognize central purpose of expository text with multiple viewpoints |
|  | 286 | Integrate/interpret | Recognize meaning of word describing character's action |
|  | 284 | Critique/evaluate | Recognize that poetic lines indicate a change in what the poem describes (shown on page 40) |
|  | 281 | Integrate/interpret | Provide information that defines key concept related to main idea |
| 281 |  |  |  |
| $\begin{aligned} & \text { U } \\ & 0 \\ & \infty \end{aligned}$ | 280 | Integrate/interpret | Provide relevant information from text to support a given argument |
|  | 277 | Locate/recall | Recognize specific event in narrative poem |
|  | 268 | Locate/recall | Recognize specific information in expository text |
|  | 266 | Integrate/interpret | Recognize character motivation related to theme of story |
|  | 264 | Integrate/interpret | Recognize meaning of word linked to central argument |
|  | 259 | Critique/evaluate | Provide and support an opinion about the title of persuasive essay |
|  | 257 | Critique/evaluate | Use information from an article to provide and support an opinion |
|  | 243 | Integrate/interpret | Provide text-based comparison of change in main character's feelings |
| 243 |  |  |  |
|  | 239 | Locate/recall | Recognize causal relationship between facts in article |
|  | 238 | Integrate/interpret | Infer trait that describes person in biographical text |
|  | 229 | Integrate/interpret | Use information across text to infer and recognize character trait |
|  | 226 | Integrate/interpret | Recognize main problem faced by historical figure |
|  | 200 | Locate/recall | Recognize character motivation based on explicit story details |
|  | $189$ | Integrate/interpret | Provide text-based description of character |
|  | $\begin{aligned} & \text { // } \\ & 0 \end{aligned}$ |  |  |

NOTE: Regular type denotes a constructed-response question. Italic type denotes a multiple-choice question. The position of a question on the scale represents the average scale score attained by students who had a 65 percent probability of successfully answering a constructed-response question, or a 74 percent probability of correctly answering a four-option multiple-choice question. For constructed-response questions, the question description represents students' performance at the highest scoring level. Scale score ranges for reading achievement levels are referenced on the map.

## Grade 8 Sample Reading Passage

## Alligator Poem <br> by Mary Oliver

## I knelt down

at the edge of the water, and if the white birds standing in the tops of the trees whistled any warning I didn't understand,
I drank up to the very moment it came crashing toward me, its tail flailing
like a bundle of swords, slashing the grass, and the inside of its cradle-shaped mouth gaping, and rimmed with teethand that's how I almost died of foolishness in beautiful Florida. But I didn't.
I leaped aside, and fell, and it streamed past me, crushing everything in its path as it swept down to the water and threw itself in, and, in the end,
this isn't a poem about foolishness but about how I rose from the ground and saw the world as if for the second time, the way it really is.

The water, that circle of shattered glass, healed itself with a slow whisper
and lay back
with the back-lit light of polished steel,
and the birds, in the endless waterfalls of the trees,
shook open the snowy pleats of their wings, and drifted away
while, for a keepsake, and to steady myself,
I reached out,
I picked the wild flowers from the grass around me-
blue stars
and blood-red trumpets
on long green stems-
for hours in my trembling hands they glittered
like fire.

The following sample questions assessed eighth-grade students' comprehension of literary text from a first-person narrative poem entitled "Alligator Poem," which describes the speaker's encounter with an alligator and her subsequent reaction to that experience.

## Sample Question: Critique and Evaluate

This sample question from the 2009 eighth-grade reading assessment measures students' recognition of how two lines function within the poem to shift the emphasis of the content. Sixty-five percent of eighth-graders were able to identify the correct response.

Percentage of eighth-grade students in each response category: 2009

| Choice A | Choice B | Choice C | Choice D | Omitted |
| ---: | ---: | ---: | ---: | ---: |
| 65 | 13 | 17 | 4 | $\#$ |

\# Rounds to zero.
NOTE: Detail may not sum to totals because of rounding.
The table below shows the percentage of eighth-graders within each achievement level who answered this question correctly. For example, 63 percent of eighth-graders at the Basic level selected the correct answer choice.

Percentage correct for eighth-grade students at each achievement level: 2009

| Overall | Below Basic | At Basic | At Proficient | At Advanced |
| ---: | ---: | ---: | ---: | ---: |
| 65 | 44 | 63 | 83 | 97 |

## SAMPLE QUESTION:

On page 3, the speaker says: "and, in the end, this isn't a poem about foolishness" What is the purpose of these lines in relation to the rest of the poem?
(4) To signal a turning point in the poem
(B) To emphasize the speaker's confusion
(C) To focus the reader on the first part of the poem
(D) To show the speaker was embarrassed

[^14]
## Sample Question: Integrate and Interpret

This sample constructed-response question measures eighth-graders' performance in interpreting a first-person narrative poem. Successful responses demonstrated understanding of both the explicit narrative in the poem and the implicit effect of the narrated event on the speaker. Responses to this question were rated using four scoring levels.

Extensive responses both described what happens to the speaker in the poem and interpreted what the speaker realizes from the experience.
Essential responses described what happens to the speaker and generalized about what the speaker realizes, or responses interpreted what the speaker realizes without describing what happens to her.

Partial responses either described something that happens in the poem or provided text-based generalizatons about the speaker.

Unsatisfactory responses provided incorrect information or irrelevant details.
The sample student responses shown on the right were rated as "Extensive" and "Essential." In the response rated "Extensive," the student focuses on the lines of the poem that describe what happens to the speaker and interprets the end of the poem by providing a text-based explanation of what the speaker realizes. Sixteen percent of eighth-graders' responses to this question received an "Extensive" rating. The response rated "Essential" describes the speaker's experience but offers only a general explanation of how the speaker's perspective on the world has changed.

Percentage of eighth-grade students in each response category: 2009

| Extensive | Essential | Partial | Unsatisfactory | Omitted |
| ---: | ---: | ---: | ---: | ---: |
| 16 | 20 | 55 | 7 | 2 |

NOTE: Detail may not sum to totals because the percentage of responses rated as "Off-task" is not shown. Off-task

NOTE: Detail may not sum to totals because the percentage of responses rated as "Off-task" is not shown. Off-task responses are those that do not provide any information related to the assessment task.

The table below shows the percentage of eighth-graders within each achievement-level interval whose response to this question was rated as "Extensive." For example, among the students assessed who answered this question, 10 percent of eighth-graders at the Basic level provided a response rated as "Extensive."

Percentage of answers rated as "Extensive" for eighth-grade students at each achievement level: 2009

| Overall | Below Basic | At Basic | At Proficient | At Advanced |
| ---: | ---: | ---: | ---: | ---: |
| 16 | 2 | 10 | 31 | 66 |

## SAMPLE QUESTION:

Describe what happens to the speaker of the poem and explain what this experience makes the speaker realize.

Extensive response:

Essential response:
The speaker is attacked by an alligator and barely survives, so after that the speaker starts seeing the world in a better way.

[^15]
## Technical Notes

## Sampling and Weighting

The schools and students participating in NAEP assessments are selected to be representative of all schools nationally and of public schools at the state level. Samples of schools and students are drawn from each state and from the District of Columbia and Department of Defense schools. The results from the assessed students are combined to provide accurate estimates of the overall performance of students in the nation and in individual states and other jurisdictions.
While national results reflect the performance of students in both public schools and nonpublic schools (i.e., private schools, Bureau of Indian Education schools, and Department of Defense schools), state-level results reflect the performance of public school students only. Results are also reported separately for Department of Defense schools in state tables and maps. More information on sampling can be found at http://nces.ed.gov/nationsreportcard/about/nathow.asp.

Because each school that participated in the assessment, and each student assessed, represents a portion of the population of interest, the results are weighted to account for the disproportionate representation of the selected sample. This includes oversampling of schools with high concentrations of students from certain racial/ethnic groups and the lower sampling rates of students who attend very small nonpublic schools.

## School and Student Participation

## National participation

To ensure unbiased samples, NAEP statistical standards require that participation rates for original school samples be 70 percent or higher to report national results separately for public and private schools. In instances where participation rates meet the 70 percent criterion but fall below 85 percent, a nonresponse bias analysis is conducted to determine if the responding school sample is not representative of the population, thereby introducing the potential for nonresponse bias.

The weighted national school participation rates for the 2009 reading assessment were 97 percent for grade 4 (100 percent for public schools and 73 percent for private schools), and 97 percent for grade 8 (100 percent for public schools and 72 percent for private schools). Weighted student participation rates were 95 percent at grade 4 ( 95 percent for public school students and 96 percent for private school students), and 93 percent at grade 8 ( 92 percent for public school students and 95 percent for private school students). The nonresponse bias analysis for private schools at grades 4 and 8 showed that, while the original responding school sample may not have been fully representative, the potential bias was reduced by including substitute schools and by adjusting the sampling weights to account for school nonresponse.

## State participation

Standards established by the National Assessment Governing Board require that school participation rates for the original state samples need to be at least 85 percent for results to be reported. In 2009, all 52 states and jurisdictions participating in the reading assessment at grades 4 and 8 met this requirement with rates ranging from 96 to 100 percent.

## Interpreting Statistical Significance

Comparisons over time or between groups are based on statistical tests that consider both the size of the differences and the standard errors of the two statistics being compared. Standard errors are margins of error, and estimates based on smaller groups are likely to have larger margins of error. The size of the standard errors may also be influenced by other factors such as how representative the assessed students are of the entire population.

When an estimate has a large standard error, a numerical difference that seems large may not be statistically significant. Differences of the same magnitude may or may not be statistically significant depending upon the size of the standard errors of the estimates. For example, a 2-point change in the average score for White students may be statistically significant, while a 2-point change for American Indian/Alaska Native students may not be. Standard errors for the estimates presented in this report are available at http://nces.ed.gov/nationsreportcard/naepdata/.

To ensure that significant differences in NAEP data reflect actual differences and not mere chance, error rates need to be controlled when making multiple simultaneous comparisons. The more comparisons that are made (e.g., comparing the performance of White, Black, Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students), the higher the probability of finding significant differences by chance. In NAEP, the Benjamini-Hochberg False Discovery Rate (FDR) procedure is used to control the expected proportion of falsely rejected hypotheses relative to the number of comparisons that are conducted. A detailed explanation of this procedure can be found at http://nces.ed.gov/nationsreportcard/tdw/analysis/infer.asp. NAEP employs a number of rules to determine the number of comparisons conducted, which in most cases is simply the number of possible statistical tests. However, there are two exceptions where the FDR is not applied: when comparing multiple years and when comparing multiple jurisdictions to the nation, neither the number of years nor the number of jurisdictions counts toward the number of comparisons.

## National School Lunch Program

NAEP collects data on student eligibility for the National School Lunch Program (NSLP) as an indicator of low income. Under the guidelines of NSLP, children from families with incomes below 130 percent of the poverty level are eligible for free meals. Those from families with incomes between 130 and 185 percent of the poverty level are eligible for reduced-price meals. (For the period July 1, 2008 through June 30, 2009, for a family of four, 130 percent of the poverty level was $\$ 27,560$, and 185 percent was $\$ 39,220$.)
Some schools provide free meals to all students irrespective of individual eligibility, using their own funds to cover the costs of non-eligible students. Under special provisions of the National School Lunch Act intended to reduce the administrative burden of determining student eligibility every year, schools can be reimbursed based on eligibility data for a single base year. Participating schools might have high percentages of eligible students and report all students as eligible for free lunch.

Because of the improved quality of the data on students' eligibility for NSLP, the percentage of students for whom information was not available has decreased compared to the percentages reported prior to the 2003 assessment. Therefore, trend comparisons are only made back to 2003 in this report. For more information on NSLP, visit http://www.fns. usda.gov/cnd/lunch/.

## School Location

NAEP results are reported for four mutually exclusive categories of school location: city, suburb, town, and rural. The categories are based on standard definitions established by the Federal Office of Management and Budget using population and geographic information from the U.S. Census Bureau. Schools are assigned to these categories in the NCES Common Core of Data locale codes based on their physical address.

The classification system was revised for 2007; therefore, results are only included in this report for 2007 and 2009. The new locale codes are based on an address's proximity to an urbanized area (a densely settled core with densely settled surrounding areas). This is a change from the original system based on metropolitan statistical areas. To distinguish the two systems, the new system is referred to as "urbancentric locale codes." More details on the classification system can be found at http://nces.ed.gov/ccd/rural_locales. asp.

## Appendix Tables

Table A-1. Percentage of fourth- and eighth-grade public and nonpublic school students with disabilities (SD) and/or English language learners (ELL) identified, excluded, and assessed in NAEP reading, as a percentage of all students, by grade and SD/ELL category: Various years, 1992-2009

| Grade and SD/ELL category | Accommodations not permitted |  |  | Accommodations permitted |  |  |  |  |  |  |

- Not available. The state/jurisdiction did not participate or did not meet the minimum participation guidelines for reporting.
\# Rounds to zero.
$\ddagger$ Reporting standards not met. Sample size insufficient to permit a reliable estimate.
* Significantly different ( $p<.05$ ) from 2009 when only one state/jurisdiction or the nation is being examined.
'Accommodations were not permitted in this assessment year.
${ }^{2}$ Department of Defense Education Activity (overseas and domestic schools).
NOTE: Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin. Results are not shown for students whose race/ethnicity was unclassified and
for students whose eligibility status for free/reduced-price school lunch was not available. Data on eligibility for free/reduced-price school lunch were not collected until 1998.

## U.S. Department of Education

The National Assessment of Educational Progress (NAEP) is a congressionally authorized project sponsored by the U.S. Department of Education. The National Center for Education Statistics, within the Institute of Education Sciences, administers NAEP. The Commissioner of Education Statistics is responsible by law for carrying out the NAEP project.

National Center for
Education Statistics

## The National Assessment Governing Board

In 1988, Congress created the National Assessment Governing Board to set policy for the National Assessment of Educational Progress, commonly known as The Nation's Report Card ${ }^{\text {TM }}$. The Governing Board is an independent, bipartisan group whose members include governors, state legislators, local and state school officials, educators, business representatives, and members of the general public.
