

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

**Overall Mathematics Results for Delaware**

- In 2007, the average scale score for fourth-grade students in Delaware was 242. This was higher than their average score in 2005 (240) and was higher than their average score in 1992 (218).<sup>1</sup>
- Delaware's average score (242) in 2007 was higher than that of the nation's public schools (239).
- Of the 52 states and other jurisdictions that participated in the 2007 fourth-grade assessment, students' average scale score in Delaware was higher than those in 25 jurisdictions, not significantly different from those in 13 jurisdictions, and lower than those in 13 jurisdictions.<sup>2</sup>
- The percentage of students in Delaware who performed at or above the NAEP *Proficient* level was 40 percent in 2007. This percentage was greater than that in 2005 (36 percent) and was greater than that in 1992 (17 percent).
- The percentage of students in Delaware who performed at or above the NAEP *Basic* level was 87 percent in 2007. This percentage was greater than that in 2005 (84 percent) and was greater than that in 1992 (55 percent).

**Percentages at NAEP Achievement Levels and Average Score**

<sup>a</sup> Accommodations were not permitted for this assessment.

NOTE: The NAEP grade 4 mathematics achievement levels correspond to the following scale points: Below *Basic*, 213 or lower; *Basic*, 214–248; *Proficient*, 249–281; *Advanced*, 282 or above.

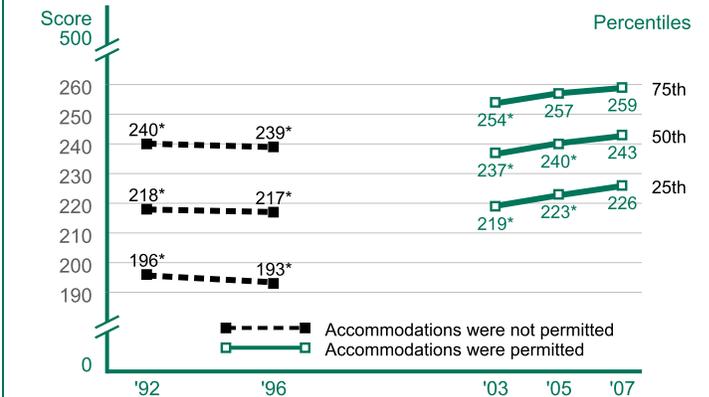

**Performance of NAEP Reporting Groups in Delaware: 2007**

Reporting groups	Percent of students	Average score	Percent below <i>Basic</i>	Percent of students at or above <i>Basic</i>	Percent <i>Proficient</i>	Percent <i>Advanced</i>
Male	50	242	13	87	40	5
Female	50	241 ↑	13	87	40 ↑	4
White	54	249	6	94	53	7
Black	33	230 ↑	24	76	20	#
Hispanic	10	234 ↑	17	83	25	1
Asian/Pacific Islander	3	261	1	99	70	17
American Indian/Alaska Native	#	‡	‡	‡	‡	‡
Eligible for National School Lunch Program	39	232 ↑	21	79	23	1
Not eligible for National School Lunch Program	61 ↑	248	8	92	50	7

**Average Score Gaps Between Selected Groups**

- In 2007, male students in Delaware had an average score that was not significantly different from that of female students. In 1992, there was no significant difference between the average score of male and female students.
- In 2007, Black students had an average score that was lower than that of White students by 20 points. This performance gap was narrower than that of 1992 (30 points).
- In 2007, Hispanic students had an average score that was lower than that of White students by 16 points. Data are not reported for Hispanic students in 1992, because reporting standards were not met.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 16 points. This performance gap was narrower than that of 1992 (27 points).
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 33 points. This performance gap was narrower than that of 1992 (44 points).

**Mathematics Scores at Selected Percentiles**

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

# Rounds to zero.

‡ Reporting standards not met.

\* Significantly different from 2007.

↑ Significantly higher than 2005. ↓ Significantly lower than 2005.

<sup>1</sup> Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Delaware were 5 percent and 1 percent in 2007, respectively. For more information on NAEP significance testing see <http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical>.

<sup>2</sup> "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
