Florida

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500 .

## Overall Mathematics Results for Florida

- In 2007, the average scale score for fourth-grade students in Florida was 242. This was higher than their average score in 2005 (239) and was higher than their average score in 1992 (214). ${ }^{1}$
- Florida's average score (242) in 2007 was higher than that of the nation's public schools (239).
- Of the 52 states and other jurisdictions that participated in the 2007 fourth-grade assessment, students' average scale score in Florida was higher than those in 25 jurisdictions, not significantly different from those in 18 jurisdictions, and lower than those in 8 jurisdictions. ${ }^{2}$
- The percentage of students in Florida who performed at or above the NAEP Proficient level was 40 percent in 2007. This percentage was greater than that in 2005 (37 percent) and was greater than that in 1992 (13 percent).
- The percentage of students in Florida who performed at or above the NAEP Basic level was 86 percent in 2007. This percentage was greater than that in 2005 ( 82 percent) and was greater than that in 1992 (52 percent).

Percentages at NAEP Achievement Levels and Average Score

${ }^{a}$ Accommodations were not permitted for this assessment
NOTE: The NAEP grade 4 mathematics achievement levels correspond to the following scale points: Below Basic, 213 or lower; Basic, 214-248;
Proficient, 249-281; Advanced, 282 or above

Performance of NAEP Reporting Groups in Florida: 2007

| Reporting groups | Percent | Average | Percent | Percent of students at or above |  | Percent Advanced |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | of students | score | below Basic | Basic | Proficient |  |
| Male | 51 | $243 \uparrow$ | $13 \downarrow$ | $87 \uparrow$ | $43 \uparrow$ | 7 |
| Female | 49 | $241 \uparrow$ | $14 \downarrow$ | $86 \uparrow$ | 38 | 5 |
| White | 48 | 250 | $6 \downarrow$ | $94 \uparrow$ | 54 | 8 |
| Black | 21 | 225 | 29 | 71 | 15 | 1 |
| Hispanic | 25 | $238 \uparrow$ | $17 \downarrow$ | $83 \uparrow$ | 33 | 3 |
| Asian/Pacific Islander | 2 | 255 | 7 | 93 | 59 | 17 |
| American Indian/Alaska Native | \# | $\ddagger$ | $\ddagger$ | $\ddagger$ | $\ddagger$ | $\ddagger$ |
| Eligible for National School Lunch Program | 48 | $233 \uparrow$ | $21 \downarrow$ | $79 \uparrow$ | 25 | 2 |
| Not eligible for National School Lunch Program | 51 | 251 | 7 | 93 | 55 | 9 |

## Average Score Gaps Between Selected Groups

- In 2007, male students in Florida had an average score that was higher than that of female students by 3 points. In 1992, there was no significant difference between the average score of male and female students.
- In 2007, Black students had an average score that was lower than that of White students by 25 points. This performance gap was narrower than that of 1992 (34 points).
- In 2007, Hispanic students had an average score that was lower than that of White students by 13 points. In 1992, the average score for Hispanic students was lower than that of White students by 16 points.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 18 points. This performance gap was narrower than that of 1996 (24 points).
- In 2007, the score gap between students at the 75th percentile and students at the 25 th percentile was 35 points. This performance gap was narrower than that of 1992 ( 42 points).
\# Rounds to zero.
* Significantly different from 2007.
$\uparrow$ Significantly higher than 2005. $\downarrow$ Significantly lower than 2005.
${ }^{1}$ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Florida were 2 percent and 2 percent in 2007, respectively.For more intormation on NAEP significance testing see http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp\#statistical. ${ }^{2}$ "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.
NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit http://nces.ed.gov/nationsreportcard/states/ for additional results and detailed information.
