

NCES 2007-495FL8

Mathematics 2007 State Snapshot Report Report Card

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for Florida

- In 2007, the average scale score for eighth-grade students in Florida was 277. This was not significantly different from their average score in 2005 (274) and was higher than their average score in 1990 (255).1
- · Florida's average score (277) in 2007 was lower than that of the nation's public schools (280).
- · Of the 52 states and other jurisdictions that participated in the 2007 eighth-grade assessment, students' average scale score in Florida was higher than those in 9 jurisdictions, not significantly different from those in 11 jurisdictions, and lower than those in 31 jurisdictions.²
- The percentage of students in Florida who performed at or above the NAEP Proficient level was 27 percent in 2007. This percentage was not significantly different from that in 2005 (26 percent) and was greater than that in 1990 (12 percent).
- The percentage of students in Florida who performed at or above the NAEP Basic level was 68 percent in 2007. This percentage was not significantly different from that in 2005 (65 percent) and was greater than that in 1990 (43 percent).

^a Accommodations were not permitted for this assessment.

NOTE: The NAEP grade 8 mathematics achievement levels correspond to the following scale points: Below Basic, 261 or lower; Basic, 262-298; Proficient, 299-332; Advanced, 333 or above.

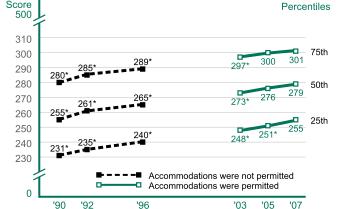

Performance of NAEP Reporting Groups in Florida: 2007

	Percent	Average	Percent	Percent of students at or above		Percent
Reporting groups	of students	score	below Basic	Basic	Proficient	Advanced
Male	49 ↓	278	32	68	29	6
Female	51 ↑	277 ↑	32	68	26	5
White	48	289	20	80	37	8
Black	23	259 ↑	52 ↓	48 ↑	11	1
Hispanic	24	270	39	61	21	3
Asian/Pacific Islander	2	293	20	80	48	14
American Indian/Alaska Native	#	‡	‡	‡	‡	‡
Eligible for National School Lunch Program	44	265 ↑	45	55	16	1
Not eligible for National School Lunch Program	56	287	22	78	37	9

Average Score Gaps Between Selected Groups

- · In 2007, male students in Florida had an average score that was not significantly different from that of female students. In 1990, there was no significant difference between the average score of male and female students
- . In 2007, Black students had an average score that was lower than that of White students by 29 points. In 1990, the average score for Black students was lower than that of White students by 34 points.
- In 2007, Hispanic students had an average score that was lower than that of White students by 18 points. In 1990, the average score for Hispanic students was lower than that of White students by 19 points.
- · In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 23 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 27 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 47 points. In 1990, the score gap between students at the 75th percentile and students at the 25th percentile was 49 points.

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

Rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2007.

↑ Significantly higher than 2005. ↓ Significantly lower than 2005.

¹ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Florida were 2 percent and 1 percent in 2007, respectively.For more intormation on NAEP significance testing see http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical. ² "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit http://nces.ed.gov/nationsreportcard/states/ for additional results and detailed information.
