

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for Washington

- In 2007, the average scale score for eighth-grade students in Washington was 285. This was not significantly different from their average score in 2005 (285) and was higher than their average score in 1996 (276).¹
- Washington's average score (285) in 2007 was higher than that of the nation's public schools (280).
- Of the 52 states and other jurisdictions that participated in the 2007 eighth-grade assessment, students' average scale score in Washington was higher than those in 23 jurisdictions, not significantly different from those in 20 jurisdictions, and lower than those in 8 jurisdictions.²
- The percentage of students in Washington who performed at or above the NAEP *Proficient* level was 36 percent in 2007. This percentage was not significantly different from that in 2005 (36 percent) and was greater than that in 1996 (26 percent).
- The percentage of students in Washington who performed at or above the NAEP *Basic* level was 75 percent in 2007. This percentage was not significantly different from that in 2005 (75 percent) and was greater than that in 1996 (67 percent).

Percentages at NAEP Achievement Levels and Average Score

^a Accommodations were not permitted for this assessment.

NOTE: The NAEP grade 8 mathematics achievement levels correspond to the following scale points: *Below Basic*, 261 or lower; *Basic*, 262–298; *Proficient*, 299–332; *Advanced*, 333 or above.

Performance of NAEP Reporting Groups in Washington: 2007

Reporting groups	Percent of students	Average score	Percent below <i>Basic</i>	Percent of students at or above		Percent <i>Advanced</i>
				<i>Basic</i>	<i>Proficient</i>	
Male	50	285	26	74	37	10
Female	50	285	24	76	35	8
White	69 ↓	291	19	81	42	10
Black	5	264	44	56	16	4
Hispanic	14	263	46	54	13	2
Asian/Pacific Islander	10	289	24	76	41	14
American Indian/Alaska Native	2	265	45	55	18	3
Eligible for National School Lunch Program	33	268	41	59	19	3
Not eligible for National School Lunch Program	65	294	17	83	45	12

Average Score Gaps Between Selected Groups

- In 2007, male students in Washington had an average score that was not significantly different from that of female students. In 1996, there was no significant difference between the average score of male and female students.
- In 2007, Black students had an average score that was lower than that of White students by 26 points. In 1996, the average score for Black students was lower than that of White students by 38 points.
- In 2007, Hispanic students had an average score that was lower than that of White students by 27 points. In 1996, the average score for Hispanic students was lower than that of White students by 33 points.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 26 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 24 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 48 points. In 1996, the score gap between students at the 75th percentile and students at the 25th percentile was 47 points.

Mathematics Scores at Selected Percentiles

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

Rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2007.

↑ Significantly higher than 2005. ↓ Significantly lower than 2005.

¹ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Washington were 3 percent and 1 percent in 2007, respectively. For more information on NAEP significance testing see <http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical>.

² "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
