

Enhancing the Quality and Use of Student Outcomes Data (1997)

By Maryann J. Gray and Judy D. Grace

- *How can you improve your student outcomes data systems?*
- *What are the limitations of student outcomes data in analyzing institutional effectiveness and student workforce preparedness?*

About This Report

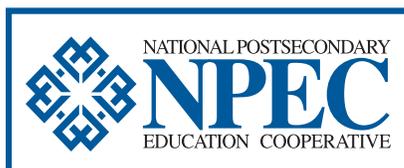

With the increasing use of student outcomes data to measure institutional performance, policymakers, institutional leaders, administrators, and faculty want to ensure the quality and utility of student outcomes measurement systems. *Enhancing the Quality and Use of Student Outcomes Data* analyzes the strengths and weaknesses of existing student outcomes data systems based on case studies in Texas and Virginia. The report also recommends ways to improve student outcomes data systems.

Who Can Use This Report

Data providers, data users, and data systems design personnel can use *Enhancing the Quality and Use of Student Outcomes Data* to improve existing data systems or develop new innovative approaches to data collection.

How To Obtain This Report

The National Postsecondary Education Cooperative (NPEC) is a voluntary partnership of postsecondary institutions, associations, government agencies, and organizations. NPEC's mission is to promote the quality, comparability, and utility of postsecondary data and information that support policy development at the federal, state, and institution levels. NPEC receives funding from the National Center for Education Statistics (NCES), U.S. Department of Education.
