<sup>1</sup> Parents' highest level of education. Data not shown for students who did not know parents' level of education.

<sup>2</sup> As measured by the National Assessment of Educational Progress (NAEP). Forty-four jurisdictions (state, territory, Department of Defense overseas schools) participated in 1998. Due to sample size and school participation guidelines, some states are not shown.

<sup>3</sup> Did not satisfy one or more of the guidelines for school sample participation rates. Data are subject to appreciable nonresponse bias.

<sup>4</sup> Sample size is insufficient to permit a reliable estimate.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively com-

plicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500. Excludes states not participating in the survey. Standard errors appear in parentheses.
