—Not available.  
<sup>1</sup>Survey question changed in 1993; data are not comparable to figures for earlier years.  
<sup>2</sup>Other illicit drugs include any use of LSD, other hallucinogens, crack, other cocaine, or heroin, or any use of other narcotics, amphetamines, barbiturates, or tranquilizers not under a doctor's orders.  
 NOTE: A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of non-prescription stimulants. This slightly reduced the positive responses for some types of drug abuse.
