

Students who took Advanced Placement (AP) examinations

October 1999

The Advanced Placement (AP) program is associated with a demanding academic curriculum and illustrates the desire of high schools to offer college-level courses to high school students. By participating in the AP program, high school students may acquire college credit for their knowledge of college-level subjects. The number of students per 1,000 12th-graders who participated in AP examinations each year shows the level of importance that students, schools, and colleges place on the AP program and how that importance has changed over time.

- Between 1984 and 1997, the number of students who took AP examinations increased dramatically, rising from 50 to 131 students per 1,000 12th-graders. The number of examinees increased for both sexes and all racial-ethnic groups during this period.
- In 1984, equal proportions of male and female students took AP examinations. Between 1984 and 1997, the number of females who took the examinations rose at a faster rate than did the number of males who took the examinations. In 1997, 145 females compared with 117 males per 1,000 12th-graders took AP examinations.
- In 1997, whites were more likely than blacks or Hispanics to take AP examinations in all subject areas, with the exception of foreign languages. Hispanics were at least three times as likely to take a foreign language AP examination as whites.

Number of U.S. students¹ who took AP examinations (per 1,000 12th-graders), by sex and race-ethnicity: 1984-97

Sex and race-ethnicity	1984	1985	1986	1987	1988	1989	1990	1991	1992	1993	1994	1995	1996	1997
Total²	50	59	64	66	81	88	100	103	109	117	115	125	131	131
Sex														
Male	50	61	65	68	76	86	101	96	102	108	101	111	117	117
Female	50	58	63	65	85	90	98	111	117	127	129	140	144	145
Race-ethnicity														
White	48	60	62	63	82	92	103	107	112	115	116	125	133	132

Hispanic	26	27	41	12	1	12	11	12	36	6	0	5

¹ Includes all participation by 11th- and 12th-graders.

² Included in the total but not shown separately are students from other racial-ethnic groups.

³ The number of examinations taken by males and females includes a small number of examinations taken by 9th-graders, 10th-graders, college students, and others (9 percent of all students who took AP examinations in 1997).

NOTE: Included in this analysis are students who participated in the United States only. Students scoring 3 or higher on an AP examination usually receive college credit. Since, on average, AP candidates take more than one examination, there is not a 1:1 ratio between candidates and examinations.
