Appendix 1
Supplemental Tables

Appendix 1 contains all the supplemental tables for the special analysis and the indicators in this volume.

The supplemental tables for the special analysis are labeled with the prefx "SA" "ollowed by a number representing the table's sequence in the special analysis.

The indicator tables are numbered sequentially according to indicator with a numbered suffix added to reflect the order of the supplemental table in each indicator. For example, indicator 13 has three supplemental tables, so the tables are numbered Table 13-1, 13-2, and13-3.

The standard errors for the supplemental tables in appendix 1 are not included here, but can be found on the NCES website. Go to http://nces.ed.gov, select the Annual Reports tab, and then select The Condition of Education. The supplemental and standard error tables for the special analysis and each indicator (and all other supporting information) are included with the special analysis and each indicator in that volume.

$\ddagger$ Reporting standards not met (too few cases).
NOTE:Dual-credit courses allow students to earn both high school and postsecondary credits for a single course. AP courses and their end-of-course examinations are developed and administered by The College Board and allow students to earn postsecondary credit. IB courses are defined as courses that make up a 2 -year liberal arts curriculum that leads to an IB diploma. Percentages are based on unrounded numbers. Detail may not sum to totals because of rounding or missing data. For the FRSS study sample, there were 29 cases for which the percent minority enrollment in the school was missing. Those cases were included in the totals and in analyses by other school characteristics. See supplemental note 1 for school locale definitions.

${ }^{1}$ Includes nonoccupational vocational education, vocational general introduction, agriculture, business, marketing, health, occupational home economics, trade and industry, and technical courses.
NOTE:The Carnegie unit is a standard of measurement that represents 1.0 credit for the completion of a 1 -year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

${ }^{2}$ Indicates that student transcript records did not list any recognized English courses; however, these graduates may have studied some English. If graduates took only English as a second language (ESL) courses for credit, they would be listed in this category.
${ }^{3}$ Low academic level courses include all general English courses classified as "below grade level." Graduates may have taken a general English course classified as regular or "honors"and be classified in the low academic level if the percentage of "below grade level" courses completed was the plurality of courses completed.
NOTE:For each graduate, the percentages of completed courses classified as "below level,""at grade level," and "honors" were calculated. (Not all graduates completed 4 years of English.) After the percentage of graduates at each level had been calculated, the percentage of graduates who fit the category requirement for each level was determined, as explained in supplemental note 12 . Detail may not sum to totals because of rounding.

${ }^{1}$ Foreign language coursetaking based upon classes in Amharic (Ethiopian), Arabic, Chinese (Cantonese or Mandarin), Czech, Dutch, Finnish, French, German, Greek (Classical or Modern), Hawaiian, Hebrew, Italian, Japanese, Korean, Latin, Norse (Norwegian), Polish, Portuguese, Russian, Spanish, Swahili, Swedish, Turkish, Ukrainian, or Yiddish.
NOTE:Foreign language coursetaking based upon classes in Spanish, French, Latin, or German, unless noted otherwise. From 1982 to 2000, less than 1 percent of students studied only a foreign language other than Spanish, French, Latin, or German. The distribution of graduates among the various levels of foreign language courses was determined by the level of the most academically advanced course they completed. Graduates who had completed courses in different languages were counted according to the highest level course completed. Graduates may have completed advanced levels of courses without having taken courses at lower levels. See supplemental note 12 for more details on these levels. Detail may not sum to totals because of rounding.

NOT:TOtal averages for all examinations and by subject area include other race/ethnicity categories not separately shown. Biology, calculus AB, chemistry, English literature and composition, physics B, and U.S. history are some of the most frequently taken AP exams. The grades for all AP exams range from 1.0 to 5.0 , with 5.0 being the highest score. Data reported are for all students who completed an AP exam. The College Board collects racial/ethnic information based on the categories American Indian/Alaska Native;Asian/Asian American;Black/Afro-American; Latino:Chicano/Mexican, Puerto Rican, Other Latino;White; and Other. Hispanic refers to the sum of all Latino subgroups. Race categories exclude persons of Hispanic ethnicity.

NOTE:Total averages for all examinations and by subject area include other race/ethnicity categories not separately shown. Biology, calculus AB, chemistry, English literature and composition, physics B, and U.S. history are some of the most frequently taken AP exams. The grades for all AP exams range from 1.0 to 5.0 , with 5.0 being the highest score. Data reported are for all students who completed an AP exam. The College Board collects racial/ethnic information based on the categories American Indian/Alaska Native;Asian/Asian American;Black/Afro-American; Latino:Chicano/Mexican, Puerto Rican,Other Latino;White;and Other. Hispanic refers to the sum of all Latino subgroups. Race categories exclude persons of Hispanic ethnicity.

${ }^{1}$ Race categories exclude persons of Hispanic ethnicity. Included in the total, but not shown separately, are children from other racial/ethnic groups.
${ }^{2}$ Poor is defined to include families below the poverty threshold; nonpoor is defined to include families whose incomes are at or above the poverty threshold. See supplemental note 1 for more information on poverty.
NOTE: Estimates are based on children who have not yet entered kindergarten. Center-based programs include day care centers, Head Start programs, preschool, nursery school, prekindergarten, and other early childhood programs. Children without mothers in the home are not included in estimates for mother's education or mother's employment.

${ }^{1}$ Other religious schools have a religious orientation or purpose, but are not Roman Catholic. Conservative Christian schools are those with membership in at least one of four associations-Accelerated Christian Education, American Association of Christian Schools, Association of Christian Schools International, or Oral Roberts University Education Fellowship. Affiliated schools are those with membership in one of 12 associations-Association of Christian Teachers and Schools,Christian Schools International, Council of Islamic Schools in North America, Evangelical Lutheran Education Association,Friends Council on Education, General Conference of the Seventh-Day Adventist Church, Islamic School League of America,National Association of Episcopal Schools, National Christian School Association, National Society for Hebrew Day Schools, Solomon Schechter Day Schools, Southern Baptist Association of Christian Schools—or indicating membership in "other religious school associations." Unaffiliated schools are those that have a religious orientation or purpose, but are not classified as Conservative Christian or affiliated.
${ }^{2}$ Nonsectarian schools do not have a religious orientation or purpose.
${ }^{3}$ Grades K-8 and 9-12 do not include ungraded students; therefore, these two categories do not sum to grades K-12.

${ }^{1}$ From 1989 through 2002,Asian and Pacific Islander students were not reported separately; therefore, Pacific Islander students are included with Asian students during this period.
NOTE:Figures include all public school students enrolled in kindergarten through 12th grade. Race categories exclude persons of Hispanic ethnicity. Over time, the Current Population Survey (CPS) has had different response options for race/ethnicity. In 1994, the survey methodology for the CPS was changed and weights were adjusted. In 1996, the Census revised procedures for editing and allocating the race variable to offset an underestimation of Asians/Pacific Islanders. One should use caution when making comparisons between data for 1995 and earlier and data for 1996 and later. See supplemental note 2 for more information on the CPS. Detail may not sum to totals because of rounding.

${ }^{1}$ Respondents were asked if each child in the household spoke a language other than English at home. If they answered "yes,"they were asked how well each child could speak English. Categories used for reporting were"very well,""well,""not well,"and "not at all."All those who reported speaking English less than "very well" were considered to have difficulty speaking English.
NOTE:Spanish-language versions of both the Current Population Survey (CPS) and the American Community Survey (ACS) were available to respondents. In 1994, the survey methodology for the CPS was changed and weights were adjusted. Due to differences between the CPS and the ACS, use caution when comparing data before 2000 (CPS) with data from 2000 (ACS). See supplemental notes 2 and 3 for more information.

${ }^{1}$ Number of children served as a percentage of all children ages 3-21 enrolled in early education centers and elementary and secondary schools.
${ }^{2}$ Number of children served under IDEA as a percentage of the total population ages 3-21.
NOTE:Special education services through the Individuals with Disabilities Education Act (IDEA) are available for eligible youth identified by a team of qualified professionals as having a disability that adversely affects academic performance and in need of special education and related services. The total includes youth receiving special education services through IDEA in early education centers and elementary and secondary schools in the 50 states and the District of Columbia and in Bureau of Indian Affairs (BIA) schools through 1993-94. Beginning in 1994-95, totals exclude BIA schools. See supplemental note 8 for more information about student disabilities represented here. \# Rounds to zero.
${ }^{1}$ Beginning in 1976, data were collected for preschool-aged children by disability type; those data are combined above with data for youth ages 6-21. However, the 1986 Amendments to the Education of the Handicapped Act (now known as IDEA) mandated that data not be collected by disability for students ages 3-5. Accordingly, those data are reported as a separate row for years 1990-91 through 1999-2000. Beginning in 2000-01, states were again required to report preschool children by disability.
NOTE:Detail may not sum to totals because of rounding. Special education services through the Individuals with Disabilities Education Act (IDEA) are available for eligible youth identified by a team of qualified professionals as having a disability that adversely affects academic performance and in need of special education and related services. The total includes youth receiving special education services through IDEA in early education centers and elementary and secondary schools in the 50 states and the District of Columbia, excluding Bureau of Indian Affairs schools. ${ }^{1} 1992$ was the first year for state-level data in grade 4. Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted.
${ }^{2} 1998$ was the first year for state-level data in grade 8 . Data used to calculate differences are for the 1998 assessment where testing accommodations (e.g., extended time,small group testing) for children with disabilities and limited-English-proficient students were permitted.
NOTE:State samples were not collected for grade 12; therefore, state results for grade 12 are not available. At the state level, the NAEP includes only students in public schools, while other reported national results in this indicator include both public and private school students.Variations or changes in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples may affect comparative performance results. Beginning in 2002, the NAEP national sample for grades 4 and 8 was obtained by aggregating the samples from each state and the District of Columbia, rather than by obtaining an independently selected national sample. As a consequence, the size of the national samples for grades 4 and 8 increased, and smaller differences between years or between types of students were found to be statistically significant than would have been detected in previous assessments. Differences are based upon unrounded estimates. See supplemental note 4 for more information on testing accommodations and on NAEP.

NOTE:The 2005 National Assessment of Educational Progress (NAEP) introduced a new mathematics assessment for 12th-grade students. As a result, the 2005 12th-grade assessment results cannot be compared with those from previous assessments. See supplemental note 4 for more information on NAEP

${ }^{1}$ Race categories exclude persons of Hispanic ethnicity.
NOTE:The score gap is determined by subtracting the average Black or Hispanic score, respectively, from the average White score. Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted in 1990-94. Beginning in 2002, the NAEP national sample for grades 4 and 8 was obtained by aggregating the samples from each state, rather than by obtaining an independently selected national sample. As a consequence, the size of the national sample increased, and smaller differences between years or between types of students were found to be statistically significant than would have been detected in previous assessments. See supplemental note 4 for more information on NAEP.

Totals include other race/ethnicity categories not separately shown. The long-term trend NAEP scores range from 0 to 500 and have been evaluated at certain performance levels. Students at reading score level 150 are able to follow brief written directions and carry out simple, discrete reading tasks.Students at reading score level 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students at reading score level 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students at reading score level 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Students at reading score level 350 can extend and restructure the ideas presented and can synthesize and learn from specialized and complex texts. SOURCE:Perie, M., Moran, R., and Lutkus, A.D. The long-term trend NAEP scores range from 0 to 500 and have been evaluated at certain performance levels. A score of 150 implies the knowledge of some basic addition and subtraction facts, and most students at this level can add 2-digit numbers without regrouping. They recognize simple situations in which addition and subtraction apply. A score of 200 implies considerable understanding of 2-digit numbers and knowledge of some basic multiplication and division facts. A score of 250 implies an initial understanding of the four basic operations. Students at this level can also compare information from graphs and charts and are developing an ability to analyze simple logical relations. A score of 300 implies an ability to compute decimals, simple fractions, and percents. Students at this level can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. A score of 350 implies an ability to apply a range of reasoning skills to solve multistep problems. Students at this level can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots.

${ }^{1}$ Race categories exclude persons of Hispanic ethnicity. Other includes Native Hawaiian, Pacific Islander, American Indian, Alaska Native, and non-Hispanic children of more than one race.
${ }^{2}$ The federal poverty-level status composite variable is derived from household income and the total number of household members at each administration of the survey and is used to define households below the poverty level. For instance, in 1998 , if a household contained four members and the annual household income was lower than $\$ 16,600$, then the household was considered to be below poverty.
${ }^{3} 0$ ther refers to related and unrelated guardian(s).
NOTE:The mathematics skills presented are those that students are expected to develop between the spring of 3rd grade and the spring of 5th grade. Findings are based on all students who participated in the ECLS-K, not just those at grade level. Although most of the children in the sample were in 5th grade in spring 2004, some 14 percent were in a lower grade, and 1 percent were in a higher grade. Findings are representative of the 3.8 million students in school in spring 2004 who were in kindergarten in fall 1998 . Poverty status, kindergarten through spring 2004; family type, kindergarten through spring 2004;and school type, kindergarten through spring 2004, are composite variables that are derived from each round of the survey (fall 1998, spring 1999, spring 2000, spring 2002, and spring 2004). Estimates were weighted by C1_6FC0.

${ }^{3}$ Met international guidelines for participation rates only after replacement schools were included.
${ }^{4}$ National defined population covers less than 95 percent of the national desired population.
${ }^{5}$ National desired population does not cover all of the international desired population.
${ }^{6}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included.
NOTE: Countries were required to sample students in the upper of the two grades that contained the largest number of 9 -year-olds and 13 -year-olds. In the United States and most countries, this corresponds to grades 4 and 8 , respectively. Participants were scored on a 1,000-point scale.The international standard deviation is 100

1 Race categories exclude persons of Hispanic ethnicity.In 1992, respondents were allowed to identify only one race; ;in 2003, respondents were allowed to identify multiple races. Included in the total but not shown separately are American Indians/Alaska Natives and respondents with more than one race.
${ }^{2}$ The"English and Spanish" category includes adults who spoke only English and Spanish as well as adults who spoke English, Spanish, and another language(s).The"Spanish" category includes adults who spoke only Spanish as well as adults who spoke Spanish and another non-English language(s). The "Other language" category includes only adults who spoke neither English nor Spanish.
NOTE:Adults are defined as people age 16 or older living in households or prisons. Prose literacy is the knowledge and skills needed to perform prose tasks (i.e., to search, comprehend, and use information from continuous texts, such as paragraphs from stories); document literacy is the knowledge and skills needed to perform document tasks (i.e., to search, comprehend, and use information from noncontinuous texts in various formats, such as bills or prescription labels); and quantitative literacy is the knowledge and skills required to perform quantitative tasks (i.e., to identify and perform computations, either alone or sequentially, using numbers embedded in printed materials). Results are reported in terms of average scores on a $0-500$ scale.To compare results between 1992 and 2003 , the 1992 results were rescaled using the criteria and methods established for the 2003 assessment. $\ddagger$ Reporting standards not met (too few cases).
${ }^{1}$ Race categories exclude persons of Hispanic ethnicity.
${ }^{2}$ From 1989 through 2002, Asians and Pacific Islanders were not reported separately; therefore, Pacific Islanders are included with Asians during this period. Pacific Islander data, for years available separately, did not meet reporting standards.
NOTE:Earnings are presented in constant dollars by means of the Consumer Price Index (CPI) to eliminate inflationary factors and allow direct comparison across years. See supplemental note 11 for further discussion. Full-year worker refers to those who were employed 50 or more weeks the previous year; full-time worker refers to those who were usually employed 35 or more hours per week. The Current Population Survey (CPS) questions used to obtain educational attainment were changed in 1992. In 1994, the survey instrument for the CPS was changed and weights were adjusted. Estimates are revised from previous editions. See supplemental note 2 for further discussion.

- Not available
$\ddagger$ Reporting standards not met (too few cases).
${ }^{1}$ From 1989 through 2002, Asians and Pacific Islanders were not reported separately; therefore,Pacific Islanders are included with Asians during this period. Pacific Islander data, for years available separately, did not meet reporting standards. NOTE:Earnings are presented in constant dollars by means of the Consumer Price Index (CPI) to eliminate inflationary factors and allow direct comparison across years. See supplemental note 11 for further discussion. Full-year worker refers to those who were employed 50 or more weeks the previous year; full-time worker refers to those who were usually employed 35 or more hours per week. The Current Population Survey (CPS) questions used to obtain educational attainment were changed in 1992 . In 1994, the survey instrument for the CPS was changed and weights were adjusted. Estimates are revised from previous editions. See supplemental note 2 for further discussion. Race categories exclude persons of Hispanic ethnicity.

## Time Spent on Homework

Table 21-1. Percentage distribution of 10th-graders reporting time spent on homework, by hours spent on homework per week: 1980 and 2002

| Hours spent per week | All |  | Male |  | Female |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1980 | 2002 | 1980 | 2002 | 1980 | 2002 |
| Total | 100 | 100 | 100 | 100 | 100 | 100 |
| Less than 1 | 17 | 2 | 21 | 2 | 13 | 1 |
| Between 1 and 3 | 29 | 21 | 31 | 24 | 28 | 19 |
| More than 3 but less than 5 | 25 | 14 | 24 | 14 | 26 | 14 |
| Between 5 and 10 | 22 | 26 | 18 | 26 | 25 | 26 |
| More than 10 | 7 | 37 | 6 | 33 | 8 | 41 |

NOTE:Caution must be used when interpreting the estimates reported here because the survey method used to ask about time spent on homework per week differed in 1980 and 2002 . The 1980 survey asked about"homework" without differentiating between homework completed in school and out of school;it also used the categories reported here as predefined response categories. The 2002 survey asked separately about in-school and out-of-school homework and used an open-ended response format. The 2002 responses to both questions were then grouped into the 1980 response categories. Detail may not sum to totals because of rounding.

$\dagger$ Not applicable.
${ }^{1}$ The rate is the number of graduates divided by the estimated count offreshmen 4 years earlier.The estimated averaged freshman enrollment count is the sum of the number of 8th-graders 5 years earlier, the number of 9 th-graders 4 years earlier (because this is when current year seniors were freshmen), and the number of 10 th-graders 3 years earlier, divided by 3 . Enrollment counts include a proportional distribution of students not enrolled in a specific grade.
${ }^{2}$ Graduates include only those who earned regular diplomas or diplomas for advanced academic achievement (e.g., honors diploma) as defined by the state or district.
${ }^{3}$ The 2003-04 national estimates include imputed data from two states that did not report diploma counts:New York and Wisconsin.
${ }^{4}$ To impute the number of graduates in these states in 2003-04, the 2002-03 averaged freshman graduation rates for Wisconsin and New York were applied to the average of the grade specific enrollment data in the state for grade 8 in 1999-2000, grade 9 in 2000-01, and grade 10 in 2001-02.

— Not available. Data on family income were not available in 1974.
$\dagger$ Not applicable because data for one of the three consecutive years are not available or one of the years is not applicable.
${ }^{1}$ Low income refers to the bottom 20 percent of all family incomes, high income refers to the top 20 percent of all family incomes, and middle income refers to the 60 percent in between. See supplemental note 2 for further information.
${ }^{2}$ Included in the total but not shown separately are high school completers from other racial/ethnic groups. Race categories exclude persons of Hispanic ethnicity.
${ }^{3}$ Due to small sample sizes for the low-income, Black, and Hispanic categories, 3 -year averages also were calculated for each category. For example,the 3-year average for Blacks in 1977 is the average percentage of Black high school completers ages 16-24 who were enrolled in college the October after completing high school in 1976, 1977, and 1978.
NOTE: Includes those ages 16-24 completing high school in a given year. The Current Population Survey (CPS) questions about educational attainment were reworded in 1992. Before then, high school completers referred to those who completed 12 years of schooling; beginning in 1992, the term referred to those who received a high school diploma or equivalency certificate.In 1994, the survey methodology for the CPS was changed and weights were adjusted. See supplemental note 2 for further information. Detail may not sum to totals because of rounding. Some estimates have been revised from previous publications.

- Not available. Data on type of institution were not collected until 1973.
${ }^{1}$ From 1973 through 1986, due to a skip pattern in the Current Population Survey (CPS), about 3-9 percent of high school completers ages 16-24 who enrolled in college immediately were not asked the question about the type of institutions attended. Such respondents were assumed to have the same probability of enrolling at a 2-or 4-year institution as those who were asked the question.
NOTE:Includes those ages 16-24 completing high school in a given year.The Current Population Survey (CPS) questions about educational attainment were reworded in 1992. Before then, high school completers referred to those who completed 12 years of schooling; beginning in 1992, the term referred to those who received a high school diploma or equivalency certificate. In 1994,the survey methodology for the CPS was changed and weights were adjusted. See supplemental note 2 for further information. Detail may not sum to totals because of rounding.

NOTE:Includes Ph.D.,Ed.D, and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D.,D.D.S., and law degrees. For years 1984-85 through 2004-05, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

${ }^{1}$ Included in the totals but not shown separately are estimates for those from other racial/ethnic categories.
NOTE: Prior to 1992, high school completers referred to those who completed 12 years of schooling; beginning in 1992, the term referred to those who received a high school diploma or equivalency certificate. In 1994, the survey instrument for the Current Population Survey (CPS) was changed and weights were adjusted. See supplemental note 2 for further discussion. Some estimates are revised from previous publications. Race categories exclude persons of Hispanic ethnicity.

! Interpret data with caution (estimates are unstable).
'Included in the totals but not shown separately are estimates for those from other racial/ethnic categories.
NOTE:Some college also includes those with a bachelor's degree or higher. Prior to 1992, some college referred to those who completed 1 or more years of college; beginning in 1992, the term referred to those who completed any college at all. In 1994, the survey instrument for the Current Population Survey (CPS) was changed and weights were adjusted. See supplemental note 2 . Some estimates are revised from previous publications. Race categories exclude persons of Hispanic ethnicity.

${ }^{1}$ Included in the totals but not shown separately are estimates for those from other racial/ethnic categories.
NOTE: The Current Population Survey (CPS) questions used to obtain educational attainment were changed in 1992. In 1994, the survey instrument for the CPS was changed and weights were adjusted. See supplemental note 2.Some estimates are revised from previous publications. Race categories exclude persons of Hispanic ethnicity.

! Interpret data with caution (estimates are unstable).
${ }^{1}$ Race categories exclude persons of Hispanic ethnicity.
${ }^{2}$ Poor is defined to include families below the poverty threshold, near-poor is defined to include families at 100-199 percent of the poverty threshold, and nonpoor is defined to include families at 200 percent or more than the poverty threshold.
${ }^{3}$ Parents' education based on highest level of education attained by either parent.
${ }^{4}$ Only includes children who had a mother in the household. Not employed includes both (1) mothers who are seeking work but unemployed and (2) mothers not in the labor force.
${ }^{5}$ Community type is based on a U.S. Census classification of places. Urban is a place with at least 50,000 people and includes both inside urbanized areas and outside urbanized areas. Rural is a place not classified as urban. NOTE: Homeschooled students and students older than 15 years are excluded. When asked about their children's participation in various afterschool activities, parents could respond either"yes" or"no."The percentage of parents who responded "yes" for each activity is shown. Children could participate in multiple activities; therefore, percentages may sum to more than 100 .

$\ddagger$ Reporting standards not met (too few cases).
${ }^{1}$ Included in the totals, but not shown separately, are full-time teachers of combined elementary and secondary schools.
${ }^{2}$ Roughly 3,250 cases were missing data for the school-level variable in 1993-94;these cases were excluded from the school-level analyses.
${ }^{3}$ Estimates are for teachers who reported that they had participated in a teacher induction program and for those who had worked with a mentor or master teacher, respectively, in their first year of teaching. These questions were only asked of teachers with 3 or fewer years of teaching experience.
${ }^{4}$ Main teaching assignment only. About 16.5 percent of full-time teachers reported having multiple main assignments. For such teachers, the subject listed first in their response was counted as the main assignment.
${ }^{5}$ The Regular certification category includes regular or standard state certificates and advanced professional certificates (for both public and private school teachers) and full certificates granted by an accrediting or certifying body other than the state (for private school teachers only). Provisional certificates are for those who are still participating in an "alternative certification program." Probationary certificates are for those who have satisfied all requirements except the completion of a probationary period. Temporary certificates are for those who require additional college coursework and/or student teaching. Emergency certificates or waivers are for those with insufficient teacher preparation who must complete a regular certification program in order to continue teaching.
NOTE:Detail may not sum to totals because of rounding. See supplemental note 3 for more information on the Schools and Staffing Survey (SASS).

${ }^{1}$ Included in the totals but not shown separately are principals of combined elementary and secondary schools.
${ }^{2}$ Roughly 900 cases were missing data for the school level variable in 1993-94;these cases were excluded from the school-level analyses.
${ }^{3}$ Race categories exclude persons of Hispanic ethnicity. Before 2003-04, Asian and Pacific Islander were not reported separately; therefore, Pacific Islander is included in Asian for the 1993-94 and 1999-2000 survey administrations.
${ }^{4}$ At least 1 year beyond the master's level.
${ }^{5}$ An award that requires completion of a degree program that meets all of the following criteria: (1) completion of the academic requirements to begin practice in the profession; (2) at least 2 years of college work before entering the degree program; and (3) a total of at least 6 academic years of college work to complete the degree program, including previously required college work plus the work required in the professional program itself. See glossary for a complete list of first-professional degrees.
NOTE:Data are only for principals, not assistant principals. Principals from Bureau of Indian Affairs schools were excluded from the analysis. Detail may not sum to totals because of rounding. ${ }^{1}$ Does not distinguish between full- and part-time status of staff.
${ }^{2}$ The average number of students per staff is based on student enrollment in schools with such staff and the total number of full- and part-time staff. This measure differs from pupil/teacher ratios that are based on the total number of full-time-equivalent teachers. Student enrollment data used to calculate this ratio are for schools with such staff.
${ }^{3}$ This measure is intended to reveal how many schools have access to staff; it does not distinguish between the full- and part-time status of such staff.
NOTE:Regular public schools do not include alternative, special education, special program emphasis, or vocational/technical schools. High-poverty schools are those where at least 75 percent of students are approved for free or reduced-price lunches; low-poverty schools are those where less than 15 percent of students are approved for free or reduced-price lunches. Data for combined elementary and secondary schools and for ungraded schools are excluded. Detail may not sum to totals because of rounding.

${ }^{1}$ Other expenditures include funds for student support, other instructional staff, other student transportation, other support services, food services, and enterprise operations, all of which are components of current expenditures. Also included in other expenditures are funds for adult education, community colleges, private school programs funded by local and state education agencies, and community services.
NOTE: Detail may not sum to totals because of rounding. Estimates are revised from previous publications. Expenditures are in constant 2003-04 dollars, adjusted using the Consumer Price Index (CPI). See supplemental note 11 for information about this index and about classifications of expenditures for elementary and secondary education. See supplemental note 1 for information on regional categorizations. See supplemental note 3 for more information about the Common Core of Data (CCD).

${ }^{1}$ The Theil coefficient measures variation for groups within a set (i.e.,states within the country) and indicates relative variation and any differences that may exist among them. It can be decomposed into components measuring between-state and within-state variation in expenditures per student. It has a minimum value of zero and increasing values indicate increases in the variation. See supplemental note 11 for more information.
NOTE: Detail may not sum to totals because of rounding. Public elementary and secondary unified districts are those districts that serve both elementary and secondary grades. In 2003-04, approximately 71 percent of all school districts were unified school districts.

${ }^{1}$ District poverty was determined by ranking school districts by the percentage of related children ages $5-17$ from families with an income below the poverty threshold to all district children ages $5-17$, and then dividing these districts into five categories with equal proportions of the total enrollment. The low-poverty district category consists of the 20 percent of students in districts with the lowest percentages of poor school-age children. Conversely, the high-poverty district category consists of the 20 percent of students in districts with the highest percentages of poor school-age children. See supplemental note 1 for further information on poverty.

## - Not available.

! Interpret data with caution (estimates are unstable).
'Per student expenditures are calculated based on public and private full-time-equivalent (FTE) enrollment figures for the 2002-03 school year and on current expenditures and capital outlays from both public and private sources where data are available.
${ }^{2}$ Includes postsecondary nontertiary data (International Standard Classification of Education [ISCED] level 4) for Australia, Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Japan, Netherlands, New Zealand, Norway, Poland, Slovak Republic, Spain, Sweden, Switzerland, and the United Kingdom. Also includes preprimary data (ISCED level 0) for Canada, Greece, and Luxembourg.
${ }^{3}$ Includes all tertiary-level data (ISCED levels 5A, 5B, and 6). Also, includes postsecondary nontertiary data for Canada, Denmark, Iceland, and Japan.
${ }^{4}$ Total includes elementary/secondary, postsecondary, and postsecondary nontertiary expenditures with the exception of Italy, Korea, Luxembourg, Mexico, Portugal, Turkey, and the United States where data for postsecondary nontertiary are either not applicable or not available.
${ }^{5}$ Data are for 2002.
${ }^{6}$ Public institutions only.
${ }^{7}$ Luxembourg data are excluded from percentages because of anomalies with respect to their GDP per capita data (large revenues from international finance institutions distort the wealth of the population). Luxembourg has no postsecondary institutions.
NOTE: Educational expenditures are from public and private revenue sources. Purchasing power parity (PPP) indices are used to convert other currencies to U.S. dollars. Private sources include payments from households for school-based expenses such as tuition, transportation fees, book rentals, or food services, as well as funds raised by institutions through endowments or returns on investment. Within-country consumer price indices are used to adjust the PPP indices to account for inflation because the fiscal year has a different starting date in different countries. See supplemental note 6 for more information on ISCED levels.

${ }^{1}$ Includes journalism, agriculture, and services.
${ }^{2}$ Each country contributes equally to the OECD mean
${ }^{3}$ Each country contributes to the OECD mean in proportion to the number of degrees awarded by that country.
${ }^{4}$ Included under science.
NOTE:Includes academic degrees conferred at International Standard Classification of Education (ISCED), levels 5 A and 6 . Data include all degrees awarded by institutions located in the country, even when the degree awards were made to foreign students. These levels correspond to bachelor's, master's, first-professional, and doctoral degrees in the United States. See supplemental note 6 for more information about the International Standard Classifcation of Education. Detail may not sum to totals because of rounding.

\#Rounds to zero.
${ }^{1}$ Total compensation is the sum of salary and fringe benefits. Salary does not include outside income. Fringe benefits may include, for example, retirement plans, medical/dental plans, group life insurance, or other benefits.
${ }^{2}$ Institutions in this indicator are classified based on the number of highest degrees awarded. For example, institutions that award 20 or more doctoral degrees per year are classified as doctoral universities. See supplemental note 9 for more information about classifications of postsecondary institutions.
NOTE:Full-time instructional faculty on less-than-9-month contracts were excluded. In 2005-06, there were about 3,600 of these faculty, accounting for less than 1 percent of all full-time instructional faculty at degree-granting institutions. Salaries, benefits, and compensation adjusted by the Consumer Price Index (CPI) to constant 2003-04 dollars. Detail may not sum to totals because of rounding. See supplemental note 11 for more information about the CPI. See supplemental note 3 for more information about the Integrated Postsecondary Education Data System (IPEDS).

NOTE:Total loans include federal, State, institutuional, and private loans. Total grants include federal, state, institutional, and private grants, including employer reimbursements. Federal loans include Perkins, subsidized and unsubsidized Stafford, and Supplemental Loans to Students (SLS). Federal grants are primarily Pell Grants and Supplemental Educational Opportunity Grants (SEOG) but also include Byrd scholarships. Parent Loans for Undergraduate Students (PLUS) loans to parents, veterans' benefits, and tax credits are not included in this table. Loans as a percentage of aid is determined by dividing the amount of loans received (including zero loan amounts) by the amount of total aid (or federal aid) received for each case. Income for financially dependent students is based on parents' annual income in the prior year.The cutoff points for low, middle, and high income were obtained by identifying the incomes at the 25th and 7 5th percentiles. Adjusted to constant 2003-04 dollars, the values were in 1992-93, $\$ 39,200$ and $\$ 84,900$; in $1999-2000, \$ 35,700$ and $\$ 94,100$; and in 2003-04, $\$ 34,200$ and $\$ 94,400$. Data adjusted by the Consumer Price Index for All Urban Consumers (CPI-U) to constant 2003-04 dollars. See supplemental note 11 for more information about the CPI-U.

| NOTE:Net access price is an estimate of the cash outlay that students and their families need to make in a given year to cover educational expenses. It is calculated here as the total price of attendance minus grants and loans. Full time means students attended full time (as defined by the institution) for the full year (at least 9 months at a 2- or 4 -year institution or 6 months at a less-than-4-year institution). Loans promote access to postsecondary education by providing the cash needed to enroll. However, because the funds must be repaid (with interest), loans defer rather than reduce the price of attending. Information on the use of tax credits by individual families is not available and therefore could not be taken into account in calculating net access price. Averages were computed for all students, including those who did not receive financial aid. Data adjusted by the Consumer Price Index for All Urban Consumers (CPI-U) to 2003-04 dollars. See supplemental note 11 for more information about the CPI-U. Estimates exclude students who were not U.S. citizens or permanent residents, and therefore were ineligible for federal student aid; students who attended more than one institution in a year, because of the difficulty matching information on price and aid; and students who attended private for-profit 4 -year institutions, because of their small number. Detail may not sum to totals because of rounding. <br> SOURCE:U.S. Department of Education, National Center for Education Statistics, 1989-90, 1999-2000, and 2003-04 National Postsecondary Student Aid Studies (NPSAS:90, NPSAS:2000, and NPSAS:04). |  |  |  |

${ }^{1}$ Employer aid is considered a type of grant aid and therefore is included in the estimates for grants as well.
${ }^{2}$ If grants were greater than tuition, net tuition was set to zero. Consequently, average net tuition may be larger than average tuition and fees minus average grants.

[^9]:    ${ }^{1}$ Total includes other race/ethnicity categories not separately shown.
    ${ }^{2}$ Race categories exclude persons of Hispanic ethnicity. Beginning in 2003, respondents were able to identify as being more than one race.From 2003 onwards, the Black and White categories include individuals who considered themselves to be of only one race.
    NOTE:The status dropout rate is the percentage of 16 - through 24 -year-olds who are not enrolled in high school and who lack a high school credential. A high school credential includes a high school diploma or equivalent credential such as a General Educational Development (GED) certificate. Estimates beginning in 1987 reflect new editing procedures for cases with missing data on school enroll ment items. Estimates beginning in 1992 reflect new wording of the educational attainment item. Estimates beginning in 1994 reflect changes due to newly instituted computer-assisted interviewing. See supplemental note 7 for more information.

[^13]:    ${ }^{1}$ Does not distinguish between full- and part-time status of staff.
    ${ }^{2}$ The average number of students per staff is based on student enrollment in schools with such staff and the total number of full- and part-time staff. This measure differs from pupil/teacher ratios that are based on the total number of full-time-equivalent teachers. Student enrollment data used to calculate this ratio are for schools with such staff.
    ${ }^{3}$ This measure is intended to reveal how many schools have access to staff; it does not distinguish between the full- and part-time status of such staff.
    NOTE:Regular public schools do not include alternative, special education, special program emphasis, or vocational/technical schools. Data for combined elementary and secondary schools and for ungraded schools are excluded.
    Detail may not sum to totals because of rounding.

[^14]:    ${ }^{\prime}$ 'Excludes those who were employed but not at work during the survey week; therefore, detail may not sum to total percentage employed. Hours worked per week refers to the number of hours the respondent worked at all jobs during the survey week.
    ${ }^{2}$ Includes those who were employed but not at work during the survey week.
    NOTE:COllege includes both 2 - and 4 -year institutions. College students were classified as attending full time if they were taking at least 12 hours of classes (or at least 9 hours of graduate classes) during an average school
    week and were classified as part time if they were taking fewer hours.

    ${ }^{1}$ Total price (also known as the student budget) includes tuition and fees, books and materials, and living expenses.
    ${ }^{2}$ Ph.D. in education, Ed.D., or any other doctoral degree in which education is the field of study.
    ${ }^{3}$ Examples include D.B.A. (Doctor of Business Administration), D.F.A. (Doctor of Fine Arts), and D.P.A. (Doctor of Public Administration),
    NOTE:Table is limited to students who attended for the full year at only one institution in 2003-04 to keep aid and price data consistent. Full-time means enrolled full time (according to the institution's definition) for at least 9 months during the 2003-04 academic year; full-time enrollment does not preclude working as well. Detail may not sum to totals because of rounding.
