Appendix 1
Supplemental Tables

Appendix 1 contains all the supplemental tables for the indicators in this volume.
The indicator tables are numbered sequentially according to indicator with a numbered suffix added to reflect the order of the supplemental table in each indicator. For example, indicator 13 has three supplemental tables, so the tables are numbered Table 13-1, 13-2, and13-3.

The standard errors for the supplemental tables in appendix 1 are not included here, but can be found on the NCES website. Go to http://nces.ed.gov, select the Annual Reports tab, and then select The Condition of Education.
The supplemental and standard error tables for each indicator (and all other supporting information) are included with each indicator in that volume.

See notes at end of table.

## Early Education and Child Care Arrangements of Young Children

Table 2-1. Percentage distribution of the early education and child care arrangements of the 2001 birth cohort at about 4 years old, by type of arrangement and selected child and family characteristics: School year 2005-06-Continued

| Child or family characteristic | Percentage distribution of population ${ }^{1}$ | Percentage distribution by primary type of care arrangement ${ }^{2}$ |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | No regular nonparental arrangement | Home-based care |  | Center-based care ${ }^{3}$ |  |  | Multiple rrangements ${ }^{4}$ |
|  |  |  | Relative care | Nonrelative care | Total | Head Start | Other than Head Start |  |
| Socioeconomic status ${ }^{6}$ |  |  |  |  |  |  |  |  |
| Lowest 20 percent | 20.0 | 30.5 | 15.0 | 5.0 | 47.1 | 24.7 | 22.4 | 2.3 |
| Middle 60 percent | 60.0 | 19.6 | 15.0 | 7.4 | 56.2 | 12.5 | 43.7 | 1.8 |
| Highest 20 percent | 20.0 | 10.3 | 5.5 | 10.7 | 71.6 | 1.0 | 70.6 | 1.9 |

! Interpret data with caution (estimates are unstable).
$\ddagger$ Reporting standards not met (too few cases).
${ }^{1}$ Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort (ECLS-B) survey population between 44 and 65 months of age with data on primary care arrangements.
${ }^{2}$ Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.
${ }^{3}$ Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.
${ }^{4}$ Children who spent an equal amount of time in each of two or more arrangements.
${ }^{5}$ Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $\$ 18,392$.
${ }^{6}$ Socioeconomic status (SES) was measured by a composite score on parental education and occupations and on family income.
NOTE: Estimates weighted by W3RO. Estimates for children at about 4 years old pertain to children assessed between 44 and 65 months. See supplemental note 3 for more information about the Early Childhood Longitudinal Study, Birth Cohort. Race categories exclude persons of Hispanic ethnicity.Detail may not sum to totals because of rounding and suppression of cells that do not meet standards.

| ! Interpret data with $\ddagger$ Reporting standa | (estimates | e). |  |  |  |  |  |  |  |
| ${ }^{1}$ From 1989 through 2002,Asian and Pacific Islander students were not reported separately; therefore, Pacific Islander students are included with Asian students during this period. |  |  |  |  |  |  |  |  |  |
| NOTE: Figures include all public school students enrolled in kindergarten through 12th grade. Race categories exclude persons of Hispanic ethnicity. Over time, the Current Population Survey (CPS) has had different response options for race/ethnicity. In 1994, the survey methodology for the CPS was changed and weights were adjusted. In 1996, the Census revised procedures for editing and allocating the race variable to offset an underestimation |  |  |  |  |  |  |  |  |  |

${ }^{1}$ Data on language spoken at home and difficulty speaking English were obtained from household respondents. Respondents were asked if each child in the household spoke a language other than English at home.If they answered "yes,"they were asked how well each child could speak English. Categories used for reporting were"very well,""well,""not well," and "not at all."All those who reported speaking English less than "very well" were considered to have difficulty speaking English. Since the American Community Survey (ACS) does not ask whether household children speak English at home, these data cannot be used to determine whether English or another language is the primary language spoken at home.
NOTE:Spanish-language versions of both the Current Population Survey (CPS) and the American Community Survey (ACS) were available to respondents. Due to differences between the CPS and the ACS, use caution when comparing data before 2000 (CPS) with data from 2000 onward (ACS). See supplemental notes 2 and 3 for more information.

${ }^{1}$ Data on language spoken at home and difficulty speaking English were obtained from household respondents. Respondents were asked if each child in the household spoke a language other than English at home. If they answered "yes," they were asked how well each child could speak English. Categories used for reporting were"very well,""well,""not well," and "not at all."All those who reported speaking English less than "very well" were considered to have difficulty speaking English. Since the American Community Survey (ACS) does not ask whether household children speak English at home, these data cannot be used to determine whether English or another language is the primary language spoken at home.
${ }^{2}$ Percentage of the total subgroup population for that particular subgroup. For example, 3.4 percent of all American Indians/Alaska Natives ages 5-9 spoke a language other than English at home and spoke English with difficulty.
${ }^{3}$ An Indo-European language other than Spanish (e.g.,French, German, Portuguese, etc.)
${ }^{4}$ Any native language spoken by Asians or Pacific Islanders, which linguists classify variously as Sino-Tibetan, Austroasiatic, or Austronesian languages.
${ }^{5}$ Race categories exclude persons of Hispanic ethnicity.
${ }^{6}$ Poor is defined to include families below the poverty threshold, near-poor is defined to include families at 100-199 percent of the poverty threshold, and nonpoor is defined to include families at 200 percent or more than the poverty threshold. See supplemental note 1 for more information. Detail may not sum to totals because of missing values for poverty.
NOTE:Detail may not sum to totals because of rounding. A Spanish-language version of the American Community Survey (ACS) was available to respondents. For the states in each region, see supplemental note 1 .

$\dagger$ Not applicable.
\# Rounds to zero.
${ }^{1}$ A disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations, including conditions such as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia.
${ }^{2}$ Beginning in 1976, data were collected for preschool-aged children by disability type; those data are combined above with data for youth ages 6-21. However, the 1986 Amendments to the Education of the Handicapped Act (now known as IDEA) mandated that data not be collected by disability for students ages 3-5. Accordingly, those data are reported as a separate row for years 1990-91 through 1999-2000. Beginning in 2000-01, states were again required to report preschool children by disability
NOTE: Detail may not sum to totals because of rounding. Special education services through the Individuals with Disabilities Education Act (IDEA) are available for eligible youth identified by a team of qualified professionals as having a disability that adversely affects academic performance and as in need of special education and related services. The total includes youth receiving special education services through IDEA in early education centers and elementary and secondary schools in the 50 states and the District of Columbia and in Bureau of Indian Affairs (BIA) schools through 1993-94.Beginning in 1994-95, estimates exclude BIA schools. See supplemental note 8 for more information about the student disabilities represented here.

| - Not available. |  |  |  |  |  |  |  |  |
| ${ }^{1}$ Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted. |  |  |  |  |  |  |  |  |
| ${ }^{2}$ The 2003 and 2007 National Assessment of Educational Progress (NAEP) Reading Assessments were not administered to 12th-grade students. |  |  |  |  |  |  |  |  |
| NOTE:The NAEP reading scale ranges from 0 to 500 . Beginning in 2002, the NAEP national sample for grades 4 and 8 was obtained by aggregating the samples from each state and the District of Columbia, rather than by obtaining an independently selected national sample. As a consequence, the size of the national sample for grades 4 and 8 increased, and smaller differences between years or between types of students were found to be statistically significant than would have been detected in previous assessments. See supplemental note 4 for more information on NAEP. |  |  |  |  |  |  |  |  |

## Reading Performance of Students in Grades 4, 8, and 12

— Not available (state did not participate in assessment).

* Change in score is statistically significant from 1992 or 1998 ( $p<.05$ )
${ }^{1} 1992$ was the first year for state-level data in grade 4. Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted.
${ }^{2} 1998$ was the first year for state-level data in grade 8. Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were permitted.
NOTE:The National Assessment of Educational Progress (NAEP) reading scale ranges from 0 to 500 . State samples were not collected for grade 12; therefore, state results for grade 12 are not available. At the state level, NAEP includes only students in public schools, while other reported national results in this indicator include both public and private school students.Variations or changes in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples may affect comparative performance results. The 2007 NAEP national sample for grades 4 and 8 was obtained by aggregating the samples from each state and the District of Columbia, rather than by obtaining an independently selected national sample. As a consequence, the size of the national samples for grades 4 and 8 increased, and smaller differences between years or between types of students were found to be statistically significant than would have been detected in previous assessments. See supplemental note 4 for more information on NAEP.

- Not available.
${ }^{1}$ Testing accommodations (e.g., extended time,small group testing) for children with disabilities and limited-English-proficient students were not permitted.
${ }^{2}$ The 2005 Grade 12 Mathematics Assessment was based on a new framework. The assessment includes more questions on algebra, data analysis, and probability to reflect changes in high school mathematics standards and coursework. Results could not be placed on the old National Assessment of Educational Progress (NAEP) scale and could not be directly compared with previous years; therefore, information on previous assessments are not shown. For more information on NAEP Grade 12 Mathematics Assessments, see http://www.nces.ed.gov/nationsreportcard/mathematics/.
NOTE:The NAEP mathematics scale ranges from 0 to 500 for grades 4 and 8 and ranges from 0 to 300 for grade 12 . Beginning in 2003, the NAEP national sample for grades 4 and 8 was obtained by aggregating the samples from each state and the District of Columbia, rather than by obtaining an independently selected national sample. As a consequence, the size of the national samples for grades 4 and 8 increased, and smaller differences between years or between types of students were found to be statistically significant than would have been detected in previous assessments. The 2007 NAEP Mathematics Assessment was not administered to 12 th-grade students. See supplemental note 4 for more information on NAEP.

| West Virginia | 215 | 236* | 52 | 81* | 12 | 33* | 256 | 270* | 42 | 61* | 9 | 19* |
| Wisconsin | 229 | 244* | 71 | 85* | 24 | 47* | 274 | 286* | 66 | 76* | 23 | 37* |
| Wyoming | 225 | 244* | 69 | 88* | 19 | 44* | 272 | 287* | 64 | 80* | 19 | 36* |

— Not available (state did not participate in assessment).

* Change in score is statistically significant from 1990 or 1992 ( $p<.05$ )
${ }^{1}$ Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted.
NOTE:State samples were not collected for grade 12; therefore, state results for grade 12 are not available. At the state level, the National Assessment of Educational Progress (NAEP) includes only students in public schools, while other reported national results in this indicator include both public and private school students.Variations or changes in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples may affect comparative performance results. The 2007 NAEP national sample for grades 4 and 8 was obtained by aggregating the samples from each state and the District of Columbia, rather than by obtaining an independently selected national sample. As a consequence, the size of the national samples for grades 4 and 8 increased, and smaller differences between years or between types of students were found to be statistically significant than would have been detected in previous assessments. See supplemental note 4 for more information on testing accommodations and on NAEP.

## Writing Performance of Students in Grades 8 and 12

Table 14-1. Average writing scale scores and percentage of students at each achievement level, by grade: 1998,2002, and 2007

| Grade, scale score, and achievement level | 1998 | 2002 | 2007 |
| :---: | :---: | :---: | :---: |
| Grade 8 |  |  |  |
| Average scale score | 150 | 153 | 156 |
| Percentage at each achievement level |  |  |  |
| Below Basic | 16 | 15 | 12 |
| At or above Basic | 84 | 85 | 88 |
| At or above Proficient | 27 | 31 | 33 |
| At Advanced | 1 | 2 | 2 |
| Grade 12 |  |  |  |
| Average scale score | 150 | 148 | 153 |
| Percentage at each achievement level |  |  |  |
| Below Basic | 22 | 26 | 18 |
| At or above Basic | 78 | 74 | 82 |
| At or above Proficient | 22 | 24 | 24 |
| At Advanced | 1 | 2 | 1 |
| NOTE:National Assessment of Educational Progress (NAEP) writing scores range from 0 to 300. The achievement levels define what students should know and be able to do: Basic indicates partial mastery of fundamental skills; Proficient indicates demonstrated competency over challenging subject matter; and Advanced indicates superior performance. | Grade 8 | 24 | 28 | - | 30 | - | 31 | - | 29 | 27 | 26 |

— Not available (tests not conducted in all grades for all years).
${ }^{1}$ Race categories exclude persons of Hispanic ethnicity.
NOTE:The score gap is determined by subtracting the average Black or Hispanic score, respectively, from the average White score. Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted from 1990 through 1994. Beginning in 2002, the National Assessment of Educational Progress (NAEP) national sample for grades 4 and 8 was obtained by aggregating the samples from each state, rather than by obtaining an independently selected national sample. As a consequence, the size of the national sample increased, and smaller differences between years or between types of students were found to be statistically significant than would have been detected in previous assessments. See supplemental note 4 for more information on NAEP.

- Not available.
${ }^{1}$ Race categories exclude persons of Hispanic ethnicity.
NOTE:Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or a disability.Totals include other race/ethnicity categories not separately shown. The long-term trend NAEP scores range from 0 to 500 and have been evaluated at certain performance levels. Students at reading score level 150 are able to follow brief written directions and carry out simple, discrete reading tasks.Students at reading score level 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students at reading score level 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students at reading score level 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Students at reading score level 350 can extend and restructure the ideas presented and can synthesize and learn from specialized and complex texts.

${ }^{1}$ Race categories exclude persons of Hispanic ethnicity.
NOTE:Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or a disability. Totals include other race/ethnicity categories not separately shown. The long-term trend NAEP scores range from 0 to 500 and have been evaluated at certain performance levels. A score of 150 implies the knowledge of some basic addition and subtraction facts, and most students at this level can add 2-digit numbers without regrouping.They recognize simple situations in which addition and subtraction apply. A score of 200 implies considerable understanding of 2-digit numbers and knowledge of some basic multiplication and division facts. A score of 250 implies an initial understanding of the four basic operations. Students at this level can also compare information from graphs and charts and are developing an ability to analyze simple logical relations. A score of 300 implies an ability to compute decimals, simple fractions, and percents. Students at this level can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. A score of 350 implies an ability to apply a range of reasoning skills to solve multistep problems. Students at this level can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots.

## International Comparisons of Reading Literacy in Grade 4

Table 18-3. Average combined reading literacy scale scores of 4th-graders, by reading subscale, sex, and educational jurisdiction: 2006—Continued

| Educational jurisdiction | Combined reading literacy |  | Reading subscale |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Literary subscale |  | Informational subscale |  |
|  | Male | Female | Male | Female | Male | Female |
| Spain | 511 | 515 | 513 | 520* | 508 | 508 |
| Sweden | 541 | 559* | 536 | 557* | 541 | 557* |
| Trinidad and Tobago | 420 | 451* | 419 | 450* | 426 | 455* |
| United States ${ }^{1}$ | 535 | 545* | 534 | 547* | 532 | 542* |
| * Significantly different from the other sex ( $p<.05$ ). <br> ${ }^{1}$ Met guidelines for sample participation rates only after replacement schools were included. <br> ${ }^{2}$ Hong Kong SAR is a Special Administrative Region (SAR) of the People's Republic of China. <br> ${ }^{3}$ Did not meet guidelines for sample participation rates after replacement schools were included. <br> NOTE:Results from the Progress in International Reading Literacy Study (PIRLS) assessment are reported on a combined reading literacy scale, which captures students' overall literacy skills, and two subscales that measure two types of purposes of reading: reading for literary purposes and reading for informational purposes. The combined reading literacy score is calculated on the basis of all the items in the assessment, whereas the subscale scores are calculated on the basis of the items making up each of the two subscales. Because the combined reading literacy scale and the two subscales are calculated separately using the properties of all of the items in the given scale or subscale, the combined reading literacy score is not the simple average of the two subscales. <br> SOURCE:Baer, J., Baldi, S., Ayotte, K., and Green, P. (2007). The Reading Literacy of U.S. Fourth-Grade Students in an International Context: Results From the 2001 and 2006 Progress in International Reading Literacy Study (PIRLS) (NCES 2008-017), tables R4 and R5, data from the International Association for the Evaluation of Educational Achievement (IEA), Progress in International Reading Literacy Study (PIRLS), 2006. |  |  |  |  |  |  |

Table 18-4. Average combined reading literacy scale scores of U.S.4th-graders, by reading subscale and race/ethnicity: 2006

|  | Combined <br> Race/ethnicity | Reading subscale |  |
| :--- | :--- | ---: | :--- |
| White | Literary <br> subscale | Informational <br> subscale |  |
| Black | 560 | 562 | 555 |
| Hispanic | $503^{*}$ | $501^{*}$ | $505^{*}$ |
| Asian | $518^{*}$ | $517^{*}$ | $57^{*}$ |
| American Indian/Alaska Native | 567 | 569 | 561 |
| Other | $468^{*}$ | $468^{*}$ | $472^{*}$ |

* Significantly different from average score of White students ( $p<.05$ ).

NOTE:Other includes students who were identified as Pacific Islander as well as those non-Hispanic students who were identified as belonging to multiple racial groups. Race categories exclude persons of Hispanic ethnicity. The United States met guidelines for sample participation rates only after replacement schools were included. Results from the Progress in International Reading Literacy Study (PIRLS) assessment are reported on a combined reading literacy scale, which captures students' overall literacy skills, and two subscales that measure two types of purposes of reading: reading for literary purposes and reading for informational purposes. The combined reading literacy score is calculated on the bassis of all the items in the assessment, whereas the subscale scores are calculated on the basis of the items making up each of the two subscales. Because the combined reading literacy scale and the two subscales are calculated separately using the properties of all of the items in the given scale or subscale, the combined reading literacy score is not the simple average of the two subscales. SOURCE: Baer, J., Baldi, S., Ayotte, K., and Green, P. (2007). The Reading Literacy of U.S. Fourth-Grade Students in an International Context: Results From the 2001 and 2006 Progress in International Reading Literacy Study (PIRLS) (NCES 2008-017), table 3, data from the International Association for the Evaluation of Educational Achievement (IEA), Progress in International Reading Literacy Study (PIRLS), 2006.

## International Comparisons of Science Literacy

| Asian | - | - | $36,300{ }^{3}$ | 34,400 ${ }^{3}$ | 42,100 ${ }^{3}$ | 41,300 | 45,000 |
| Male | - | - | $37,400^{3}$ | $37,000^{3}$ | 48,000 ${ }^{3}$ | 46,500 | 50,000 |
| Female | - | - | $33,400^{3}$ | $33,100^{3}$ | 41,000 ${ }^{3}$ | 41,300 | 40,000 |
| Pacific Islander | - | - | $\left.{ }^{3}\right)$ | $\left.{ }^{3}\right)$ | $\not \ddagger^{3}$ | $\ddagger$ | 30,000 |
| American Indian/Alaska Native | - | - | 30,900 | 26,500 | 28,100 | 31,000 | 27,000 |
| More than one race | - | - | - | - | - | 36,100 | 35,000 |
| Male | - | - | - | - | - | 38,200 | 35,000 |
| Female | - | - | - | - | - | 32,200 | 35,000 |
| Other | 36,700 | 37,100 | キ | - | - | - | - |
| Male | 42,800 | 41,200 | $\ddagger$ | - | - | - | - |
| Female | 30,600 | 32,000 | $\ddagger$ | - | - | - | - |
| - Not available. |  |  |  |  |  |  |  |
| $\ddagger$ Reporting standards not met (too few cases). |  |  |  |  |  |  |  |
| ${ }^{1}$ Race categories exclude persons of Hispanic ethnicity. Estimates by sex for Pacific Islander, American Indian/Alaska Native, and More than one race subgroups did not meet reporting standards. |  |  |  |  |  |  |  |
| ${ }^{2}$ Due to changes in categories across time, the category "some college" prior to 1992 is not comparable with"some college" from 1992 onwards. Prior to 1992, some college may include students who earned an associate's degree. |  |  |  |  |  |  |  |
| NOTE:Earnings are presented in constant dollars by means of the Consumer Price Index (CPI) to eliminate inflationary factors and allow for direct comparison across years. See supplemental note 11 for further discussion. Full-year worker refers to those who were employed 50 or more weeks during the previous year; full-time worker refers to those who were usually employed 35 or more hours per week. $\dagger$ Not applicable.
${ }^{1}$ The rate is the number of graduates divided by the estimated count of freshmen 4 years earlier. The estimated averaged freshman enrollment count is the sum of the number of 8 th-graders 5 years earlier, the number of 9 th-graders 4 years earlier (because this is when current year seniors were freshmen), and the number of 10 th-graders 3 years earlier, divided by 3 . Enrollment counts include a proportional distribution of students not enrolled in a specific grade.
${ }^{2}$ Graduates include only those who earned regular diplomas or diplomas for advanced academic achievement (e.g., honors diploma) as defined by the state or district.
${ }^{3}$ The 2003-04 national estimates do not include data from two states with missing diploma counts:New York and Wisconsin.
${ }^{4}$ To impute the number of graduates in these states in 2003-04, the 2002-03 averaged freshman graduation rates for Wisconsin and New York were applied to the average of the grade-specific enrollment data in the state for grade 8 in 1999-2000, grade 9 in 2000-01, and grade 10 in 2001-02.

${ }^{1}$ Students who exited an educational program and received a certificate of completion, modified diploma, or some similar document. This includes students who received a high school diploma, but did not meet the same standards for graduation as those for students without disabilities.
${ }^{2}$ Students may exit special education services by reaching the maximum age beginning at age 18 , depending on state law or practice or order of any court.
${ }^{3}$ Defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit for any of the other reasons described. For the purpose of calculating dropout rates, the Office of Special Education Programs (OSEP) counts as dropouts students who moved and were not known to continue.
NOTE: Data are from a cumulative 12-month reporting period. Detail may not sum to totals because of rounding. Estimates include students from the United States and other jurisdictions including American Samoa, Guam, Northern Marianas, Puerto Rico,Virgin Islands, and Bureau of Indian Education (BIE) schools.

| 2003 | 9.9 | 6.3 | 10.9 | 23.5 |
| 2004 | 10.3 | 6.8 | 11.8 | 23.8 |
| 2005 | 9.4 | 6.0 | 10.4 | 22.4 |
| 2006 | 9.3 | 5.8 | 10.7 | 22.1 |

${ }^{1}$ Total includes other race/ethnicity categories not separately shown.
${ }^{2}$ Race categories exclude persons of Hispanic ethnicity. From 2003 onwards, respondents were able to identify as being more than one race, and the Black and White categories include individuals who considered themselves to be of only one race.
NOTE:The status dropout rate is the percentage of 16 - through 24 -year-olds who are not enrolled in high school and who lack a high school credential. A high school credential includes a high school diploma or equivalent credential such as a General Educational Development (GED) certificate. Estimates beginning in 1987 reflect new editing procedures for cases with missing data on school enrollment items. Estimates beginning in 1992 reflect new wording of the educational attainment item. Estimates beginning in 1994 reflect changes due to newly instituted computer-assisted interviewing. See supplemental note 7 for more information on measures of student persistence and progress.

| 2005 | 68.6 | 73.2 | 55.7 | 54.0 | 17.5 | 19.2 | 53.5 | 65.1 | 81.2 | 27.6 |
| 2006 | 66.0 | 68.5 | 55.5 | 57.9 | 13.0 | 10.6 | 50.9 | 61.4 | 80.7 | 29.8 |

- Not available. Data on family income were not available in 1974.
${ }^{1}$ Included in the total but not shown separately are high school completers from other racial/ethnic groups. Race categories exclude persons of Hispanic ethnicity.
${ }^{2}$ Low income refers to the bottom 20 percent of all family incomes, high income refers to the top 20 percent of all family incomes, and middle income refers to the 60 percent in between. See supplemental note 2 for further information.
NOTE:Includes those ages 16-24 completing high school in a given year.The Current Population Survey (CPS) questions about educational attainment were reworded in 1992. Before then, high school completers referred to those who had completed 12 years of schooling;beginning in 1922, the term referred to those who had received a high school diploma or equivalency certificate. In 1994, the survey methodology for the CPS was changed and weights were adjusted. See supplemental note 2 for further information. Detail may not sum to totals because of rounding. Some estimates have been revised from previous publications.

| 2006 | 65.8 | 24.9 | 40.9 | 66.1 | 24.5 | 41.7 |

- Not available. Data on type of institution were not collected until 1973.
${ }^{1}$ From 1973 through 1986 , due to a skip pattern in the Current Population Survey (CPS), about 3-9 percent of high school completers ages $16-24$ who enrolled in college immediately were not asked the question about the type of institutions attended. Such respondents were assumed to have the same probability of enrolling at a 2 - or 4 -year institution as those who were asked the question.
NOTE:Includes those ages $16-24$ completing high school in a given year. The Current Population Survey (CPS) questions about educational attainment were reworded in 1992. Before then, high school completers referred to those who had completed 12 years of schooling;beginning in 1992,the term referred to those who had received a high school diploma or equivalency certificate. In 1994 , the survey methodology for the (PS was changed and weights were adjusted. See supplemental note 2 for further information. Detail may not sum to totals because of rounding.

## Immediate Transition to College

Table 24-3. Percentage of high school completers who were enrolled in college the October immediately following high school completion, by parents' education: 1992-2006

| Year | Total | Less than high school | High school diploma or equivalent | Some college, including vocational/ technical | Bachelor's degree or higher | Not available ${ }^{1}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1992 | 61.9 | 33.1 | 55.5 | 67.5 | 81.3 | 38.0 |
| 1993 | 62.6 | 47.1 | 52.3 | 62.7 | 87.9 | 42.0 |
| 1994 | 61.9 | 43.0 | 49.9 | 65.0 | 82.5 | 43.1 |
| 1995 | 61.9 | 27.3 | 47.0 | 70.2 | 87.7 | 30.8 |
| 1996 | 65.0 | 45.0 | 56.1 | 66.6 | 85.2 | 45.6 |
| 1997 | 67.0 | 51.4 | 61.7 | 62.6 | 86.1 | 51.3 |
| 1998 | 65.6 | 49.8 | 57.2 | 67.7 | 82.3 | 50.1 |
| 1999 | 62.9 | 36.3 | 54.4 | 60.3 | 82.2 | 53.1 |
| 2000 | 63.3 | 44.4 | 51.8 | 63.8 | 81.2 | 50.5 |
| 2001 | 61.7 | 39.0 | 51.9 | 62.0 | 81.3 | 41.9 |
| 2002 | 65.2 | 43.3 | 51.9 | 65.9 | 82.6 | 58.7 |
| 2003 | 63.9 | 43.3 | 53.9 | 62.9 | 82.1 | 48.8 |
| 2004 | 66.7 | 40.2 | 53.8 | 67.0 | 85.9 | 53.6 |
| 2005 | 68.6 | 43.0 | 62.1 | 65.6 | 88.8 | 54.8 |
| 2006 | 66.0 | 43.0 | 56.1 | 67.0 | 78.2 | 54.6 |

${ }^{1}$ Information on parents' education was not available for those who did not live with their parents and were classified as a householder, and for those whose parents' educational attainment was not reported; about 9 - 14 percent of high school completers ages $16-24$ were in this category for the period covered.
NOTE:Includes those ages 16-24 completing high school in a given year. High school completers referred to those who received a high school diploma or equivalency certificate. In 1994, the survey methodology for the CPS was
changed and weights were adjusted. See supplemental note 2 for further information, including the definition of parents' education. Some estimates have been revised from previous publications.

| 2007 | 87.0 | 84.9 | 89.1 | 93.5 | 92.7 | 94.2 | 87.7 | 87.4 | 87.9 | 65.0 | 60.5 | 70.7 |

${ }^{1}$ Included in the totals but not shown separately are estimates for those from other racial/ethnic categories.
NOTE: Prior to 1992, high school completers referred to those who completed 12 years of schooling; beginning in 1992, the term referred to those who received a high school diploma or equivalency certificate. In 1994 , the survey instrument for the Current Population Survey (CPS) was changed and weights were adjusted. See supplemental note 2 for further discussion. Some estimates are revised from previous publications. Race categories exclude persons of Hispanic ethnicity.

! Interpret data with caution (estimates are unstable).
${ }^{1}$ Included in the totals but not shown separately are estimates for those from other racial/ethnic categories.
NOTE: Some college also includes those with a bachelor's degree or higher. Prior to 1992, some college meant completing 1 or more years of college; beginning in 1992, the term meant completing any college at all. In 1994, the survey instrument for the Current Population Survey (CPS) was changed and weights were adjusted. See supplemental note 2 for further discussion. Some estimates are revised from previous publications. Race categories exclude persons of Hispanic ethnicity.

! Interpret data with caution (estimates are unstable).
'Included in the totals but not shown separately are estimates for those from other racial/ethnic categories.
NOTE:The Current Population Survey (CPS) questions used to obtain educational attainment were changed in 1992. In 1994, the survey instrument for the CPS was changed and weights were adjusted. See supplemental note
2 for further discussion. Some estimates are revised from previous publications. Race categories exclude persons of Hispanic ethnicity.

## Degrees Earned

Table 26-1. Number of degrees conferred by degree-granting institutions, by type of degree: 1990-91 through 2005-06

|  |  |  | First- <br> Academic year <br> Associate's | Bachelor's |
| :--- | ---: | :--- | ---: | ---: |

${ }^{1}$ An award that requires completion of a degree program that meets all of the following criteria: (1) completion of the academic requirements to begin practice in the profession; (2) at least 2 years of college work before entering the degree program; (3) a total of at least 6 academic years of college work to complete the degree program, including previously required college work plus the work required in the professional program itself. See glossary for a definition of first-professional degree.
${ }^{2}$ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and law degrees.
NOTE:Detail in accompanying tables may not sum to totals shown here because of rounding.
SOURCE:U.S. Department of Education, National Center for Education Statistics, 1990-91 through 2004-05 Integrated Postsecondary Education Data System,"Completions Survey" (IPEDS-C:90-99), and Fall 2000 through Fall 2006.

Degrees Earned

${ }^{1}$ An award that requires completion of a degree program that meets all of the following criteria: (1) completion of the academic requirements to begin practice in the profession; (2) at least 2 years of college work before entering the degree program; (3) a total of at least 6 academic years of college work to complete the degree program, including previously required college work plus the work required in the professional program itself. See glossary for a definition of first-professional degree.
${ }^{2}$ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and law degrees.
NOTE:Reported racial/ethnic distributions of students by type of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Race categories exclude persons of Hispanic ethnicity. Nonresident aliens are shown separately because information about their race/ethnicity is not available. Detail may not sum to totals because of rounding.

- Not available.
! Interpret data with caution (estimates are unstable)
${ }^{1}$ Theft/larceny (taking things worth over $\$ 10$ without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm Included are pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theff from a building, theff from a motor vehicle or of motor vehicle parts or accessories, theft of bicycles, theff from vending machines, and all other types of thefts."
${ }^{2}$ The questionnaire wording for possession of a knife or sharp object differed among survey administrations. In 1999-2000 and 2005-06, the question asked about possession of a knife or sharp object. In 2003-04, the question was changed to refer to possession of a knife or sharp object with intent to harm.
NOTE:"At school"was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session. Reported crimes are computed by dividing the number of public schools that reported crimes to the police by all public schools, including those that did not report experiencing crime. For more information, please see supplemental note 3.

${ }^{1}$ Violent incidents include serious violent incidents (rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon,threat of physical attack with a weapon, and robbery with or without a weapon), physical attack or fight without a weapon, and threat of physical attack without a weapon.
${ }^{2}$ Serious violent incidents include rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.
${ }^{3}$ Theff/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as"the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. Included are pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or of motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts."
${ }^{4}$ Other incidents include possession of a firearm or explosive device, possession of a knife or sharp object, distribution, possession, or use of illegal drugs or alcohol, and vandalism.
${ }^{5}$ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8 . Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 . Combined schools include all other combinations of grades, including $\mathrm{K}-12$ schools.
${ }^{6}$ Estimates are based on the 2006 urban-centric locale codes and may differ from previously published figures. Excludes 52 schools without information on locale. See supplemental note 1 for more information.
${ }^{7}$ These estimates exclude data from the 73 schools that did not report estimates of student race/ethnicity.
NOTE:"At school"was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session. Reported crimes are computed by dividing the number of public schools that reported crimes to the police by all public schools, including those that did not report experiencing crime. For more information, please see supplemental note 3.

${ }^{1}$ Includes other racial/ethnic groups not separately shown.
NOTE:The National School Lunch Program is a federally assisted meal program. To be eligible, a student must be from a household with an income at or below 130 percent of the poverty threshold for free lunch or between 130 percent and 185 percent of the poverty threshold for reduced-price lunch. Approximately 10,745 public schools (or 11 percent) did not report information on the number of students eligible for free or reduced-price school lunch. For details on Census-defined areas and poverty thresholds, see supplemental note 1. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

Teacher Turnover

Table 31-1. Number of 1987-88, 1990-91, 1993-94, 1999-2000, and 2003-04 public and private K-12 teachers who did not teach in the same school the following school year, by turnover category and reason for leaving

| Turnover category and reason for leaving | 1987-88 | 1990-91 | 1993-94 | 1999-2000 | 2003-04 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Total turnover at the end of the year | 391,000 | 383,000 | 418,000 | 546,000 | 621,000 |
| Transfers at the end of the year | 218,000 | 209,000 | 205,000 | 269,000 | 289,000 |
| Leavers | 173,000 | 174,000 | 213,000 | 278,000 | 333,000 |
| Took other job | 64,000 | 56,000 | 90,000 | 126,000 | 141,000 |
| Pursued further education | 11,000 | 13,000 | 8,000 | 12,000 | 12,000 |
| Left for family reasons | 48,000 | 33,000 | 35,000 | 47,000 | 45,000 |
| Retired | 35,000 | 47,000 | 50,000 | 67,000 | 87,000 |
| Other ${ }^{1}$ | 14,000 | 25,000 | 30,000 | 26,000 | 47,000 |

"Leavers in this category left teaching for a variety of personal reasons, ranging from"starting their own business"to becoming"a member of a contemplative religious community." However, the most common reason reported by leavers who left for "other" reasons was to take a year-long sabbatical or leave of absence from teaching.
NOTE: Schools and Staffing Survey (SASS) teachers who died or left the country are excluded. Retired category includes all teachers who reported retiring between the SASS and Teacher Follow-up Survey (TFS) school year including those 45 years old or younger who were excluded in earlier estimates. Detail may not sum to totals because of rounding.

! Interpret data with caution (estimates are unstable).
${ }^{1}$ High- and low-poverty schools can only be identified in 1990-91 based on the percentage of students who receive free or reduced-price lunches and not on the percentage eligible to receive free or reduced-price lunches. NOTE:Schools were considered high poverty if 75 percent or more of their students were eligible for free or reduced-price lunch, and low poverty if less than 15 percent of their students were eligible.Public schools for which data are missing or that do not participate in the program were excluded. Estimates for 1999-2000 have been revised. Denominator used to calculate the percentage is the weighted number of Schools and Staffing Survey (SASS) teachers surveyed during the Teacher Follow-up Survey (TFS) year;SASS teachers who died or left the country are excluded. Retired category includes all teachers who reported retiring between the SASS and TFS year, including those 45 years old and younger who were excluded in earlier estimates. Detail may not sum to totals because of rounding.

! Interpret with caution (estimates are unstable).
${ }^{1}$ Includes principals, vice principals, and assistant principals.
${ }^{2}$ Includes English as a second language (ESL)/bilingual aides, and special education instructional and noninstructional aides.
${ }^{3}$ Includes all other aides: regular Title I aides, library media center instructional and noninstructional aides, and other classroom instructional and noninstructional aides.
${ }^{4}$ Includes secretaries and other support staff;food service personnel; custodial, maintenance, and security personnel;and other employees not reported above.
${ }^{5}$ Includes schools with a special program emphasis, such as science/math schools, performing arts schools, talented/gifted schools, foreign language immersion schools, etc.
NOTE: Estimates are for both full- and part-time staff. Full-time-equivalent calculations were completed for part-time staff within each staff category. Elementary schools are defined as schools with at least one grade lower than 5 and no grade higher than 8 . Middle schools are defined as schools with no grade lower than 5 and no grade higher than 8 . Secondary schools are defined as schools with no grade lower than 7 and at least one grade higher than 8 . Combined schools have at least one grade lower than 7 and at least one grade higher than 8 ; schools with only ungraded classes are also included in combined schools. Detail may not sum to totals because of rounding. See supplemental note 3 for more information on the Schools and Staffing Survey (SASS).

${ }^{5}$ Includes schools with a special program emphasis, such as science/math schools, performing arts schools, talented/gifted schools, foreign language immersion schools, etc.
NOTE:Estimates are for both full- and part-time staff.Full-time-equivalent calculations were completed for part-time staff within each staff category. Measures in this table are intended to reveal how many schools have access to staff: Elementary schools are defined as schools with at least one grade lower than 5 and no grade higher than 8 . Middle schools are defined as schools with no grade lower than 5 and no grade higher than 8 . Secondary schools are defined as schools with no grade lower than 7 and at least one grade higher than 8 . Combined schools have at least one grade lower than 7 and at least one grade higher than 8 ;schools with only ungraded classes are also included in combined schools. See supplemental note 3 for more information on the Schools and Staffing Survey (SASS).

## Student/Teacher Ratios in Public Elementary and Secondary Schools

Table 33-1. Student/teacher ratios in public schools, by type, level, and enrollment of school: Selected years, fall 1990-2005

| Type, level, and enrollment of school | Year |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1990 | 1992 | 1994 | 1996 | 1998 | 2000 | 2002 | 2004 | 2005 |
| All schools | 17.4 | 17.7 | 17.7 | 17.6 | 16.9 | 16.4 | 16.2 | 16.2 | 16.0 |
| Regular schools | 17.6 | 17.8 | 17.8 | 17.7 | 17.0 | 16.5 | 16.3 | 16.3 | 16.1 |
| Elementary schools | 18.2 | 18.1 | 18.0 | 17.9 | 17.0 | 16.5 | 16.2 | 16.0 | 15.8 |
| Under 300 | 16.0 | 15.9 | 15.7 | 15.6 | 15.1 | 14.4 | 13.9 | 13.7 | 13.6 |
| 300-499 | 17.6 | 17.5 | 17.5 | 17.2 | 16.4 | 15.8 | 15.5 | 15.3 | 15.2 |
| 500-999 | 18.8 | 18.7 | 18.5 | 18.3 | 17.4 | 16.9 | 16.7 | 16.5 | 16.3 |
| 1,000-1,499 | 19.5 | 19.7 | 19.6 | 19.4 | 18.4 | 18.1 | 18.0 | 17.7 | 17.2 |
| 1,500 or more | 19.9 | 20.3 | 20.4 | 21.2 | 19.9 | 20.5 | 20.3 | 20.5 | 19.6 |
| Secondary schools | 16.7 | 17.4 | 17.6 | 17.6 | 17.1 | 16.7 | 16.8 | 16.9 | 16.8 |
| Under 300 | 12.3 | 12.3 | 12.7 | 12.7 | 12.5 | 12.0 | 12.0 | 12.0 | 12.2 |
| 300-499 | 14.9 | 15.3 | 15.7 | 15.5 | 15.1 | 14.5 | 14.4 | 14.7 | 14.6 |
| 500-999 | 16.1 | 16.7 | 16.8 | 16.7 | 16.2 | 15.8 | 15.8 | 15.9 | 15.8 |
| 1,000-1,499 | 17.2 | 17.9 | 17.9 | 17.9 | 17.2 | 16.8 | 16.9 | 17.0 | 16.8 |
| 1,500 or more | 19.3 | 20.0 | 19.9 | 20.0 | 19.3 | 18.9 | 18.8 | 19.0 | 18.8 |
| Combined schools | 15.8 | 15.8 | 16.1 | 15.7 | 14.6 | 14.9 | 15.2 | 15.2 | 15.3 |
| Under 300 | 11.0 | 10.9 | 11.3 | 10.0 | 10.4 | 10.4 | 10.8 | 10.3 | 11.1 |
| 300-499 | 14.8 | 14.5 | 14.4 | 14.6 | 14.1 | 13.9 | 14.1 | 14.2 | 14.5 |
| 500-999 | 16.7 | 15.8 | 16.5 | 16.6 | 15.6 | 15.9 | 16.2 | 15.9 | 15.9 |
| 1,000-1,499 | 17.8 | 18.5 | 18.1 | 17.9 | 17.2 | 17.6 | 18.1 | 17.6 | 16.7 |
| 1,500 or more | 19.0 | 19.8 | 20.0 | 19.6 | 18.9 | 20.0 | 20.7 | 19.4 | 20.7 |
| Alternative | 14.2 | 16.5 | 18.0 | 16.6 | 16.4 | 15.2 | 14.9 | 14.4 | 14.0 |
| Special education | 6.5 | 7.0 | 6.9 | 7.4 | 7.3 | 7.0 | 7.0 | 7.4 | 6.2 |
| Vocational | 13.0 | 13.0 | 12.9 | 12.9 | 13.1 | 12.7 | 9.9 | 11.5 | 12.0 |

NOTE:The student/teacher ratio is determined by dividing the total number of full-time-equivalent teachers into the total fall enrollment. Regular schools include all schools except special education schools, vocational schools, and alternative schools. Combined schools include both elementary and secondary grades. Charter schools can be of any school type. This analysis excludes schools that did not report both enrollment and teacher data. See supplemental note 3 for more information about the Common Core of Data (CCD).

\# Rounds to zero.
${ }^{1}$ Includes expenditures for student support, other instructional staff, and other support services.
NOTE:Detail may not sum to totals because of rounding. Estimates are revised from previous editions. Expenditures are in constant 2006-07 dollars, adjusted using the Consumer Price Index (CPI). See supplemental note 11 for information about this index and about classifications of expenditures for elementary and secondary education. See supplemental note 3 for more information about the Common Core of Data (CCD).

| 2000-01 | 0.0266 | 0.0161 | 0.0105 | 100.0 | 60.4 | 39.6 |
| 2001-02 | 0.0277 | 0.0168 | 0.0108 | 100.0 | 60.9 | 39.1 |
| 2002-03 | 0.0290 | 0.0180 | 0.0110 | 100.0 | 62.2 | 37.8 |
| 2003-04 | 0.0313 | 0.0204 | 0.0109 | 100.0 | 65.3 | 34.7 |
| 2004-05 | 0.0342 | 0.0226 | 0.0117 | 100.0 | 65.9 | 34.1 |

${ }^{1}$ The Theil coefficient measures variation for groups within a set (i.e., states within the country) and indicates relative variation and any differences that may exist among them. It can be decomposed into components measuring between-state and within-state variation in expenditures per student. It has a minimum value of zero and increasing values indicate increases in the variation, with a maximum value of 1.0 . See supplemental note 11 for more information.
${ }^{2}$ The NCES Comparable Wage Index (CWI) was used to adjust for geographic cost differences for 1997-98, the first year that it is available, through 2004-05. For more details on the CWI, see supplemental note 11 .
NOTE:Detail may not sum to totals because of rounding. Public elementary and secondary unified districts are those districts that serve both elementary and secondary grades. In 2004-05, approximately 91 percent of all public elementary and secondary school students were enrolled in unified school districts.
SOURCE:U.S. Department of Education, National Center for Education Statistics (NCES), Common Core of Data (CCD),"NCES Longitudinal School District Fiscal-Nonfiscal (FNF) File, Fiscal Years 1990 to 2002";"School District Finance Survey (Form F-33)," 2002-03 to 2004-05; and NCES Comparable Wage Index Files, "School District CWI."

## Public Elementary and Secondary Expenditures by District Poverty

Table 37-1. Current expenditures per student at fall enrollment in public school districts, by district poverty category: Various years, 1997-98 to 2004-05

| District poverty category ${ }^{1}$ | Current expenditures per student |  |  |  |  |  |  | Percent change from 1997-98 to 2004-05 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1997-98 | 1999-2000 | 2000-01 | 2001-02 | 2002-03 | 2003-04 | 2004-05 |  |
| Unadjusted dollars |  |  |  |  |  |  |  |  |
| Total | \$6,023 | \$6,727 | \$7,200 | \$7,541 | \$7,870 | \$8,135 | \$8,539 | 42.0 |
| Low | 6,552 | 7,207 | 7,713 | 8,126 | 8,477 | 8,833 | 9,241 | 41.0 |

| High | 7,848 | 8,422 | 8,897 | 9,147 | 9,444 | 9,531 | 9,892 | 26.0 |

${ }^{1}$ District poverty was determined by ranking school districts by the percentage of related children ages $5-17$ from families with an income below the poverty threshold to all district children ages $5-17$, and then dividing these districts into five categories with equal proportions of the total enrollment. The low-poverty district category consists of the 20 percent of students in districts with the lowest percentages of poor school-age children. Conversely, the high-poverty district category consists of the 20 percent of students in districts with the highest percentages of poor school-age children. See supplemental note 7 for further information on poverty. ${ }^{2}$ Current expenditures have been adjusted for the effects of inflation using the Consumer Price Index (CPI) and are in constant 2006-07 dollars. See supplemental note 11 for information about the CPI.
${ }^{3}$ The NCES Comparable Wage Index (CWI) was used to adjust for geographic cost of living differences. For more details on the CWI, see supplemental note 11.
NOTE: Data are for regular districts, elementary/secondary combined districts, and separate elementary or secondary districts. They exclude Department of Defense districts and Bureau of Indian Education districts. See supplemental note 1 for further information about the accounting terms used in this indicator.

| Private 2-year colleges | 0.8 | 2,500 | 0.7 | 3,900 | 1.7 | 6,600 | 1.7 | 8,000 | 221.2 | 21.9 |

${ }^{1}$ Total compensation is the sum of salary and fringe benefits. Salary does not include outside income. Fringe benefits may include, for example, retirement plans, medical/dental plans, group life insurance, or other benefits. ${ }^{2}$ Institutions in this indicator are classified based on the number of highest degrees awarded. For example, institutions that award 20 or more doctoral degrees per year are classified as doctoral universities. See supplemental note 9 for more information about Classification of Postsecondary Education Institutions.
NOTE:Full-time instructional faculty on less-than-9-month contracts were excluded. In 2006-07, there were about 3,600 of these faculty, accounting for less than 1 percent of all full-time instructional faculty at degree-granting institutions. Salaries reflect an average of all faculty on 9- through 12-month contracts, rather than a weighted average based on contract length that appears in some other NCES reports. Salaries, benefits, and compensation adjusted by the Consumer Price Index (CPI) to constant 2006-07 dollars. Percentages based on unrounded numbers. Detail may not sum to totals because of rounding. See supplemental note 11 for more information about the (PI. See supplemental note 3 for more information about the Integrated Postsecondary Education Data System (IPEDS).

[^18]
[^0]:    ${ }^{1}$ Beginning in 1994 , new procedures were used to collect preprimary enrollment data. As a result, pre-1994 data may not be comparable to data from 1994 or later.
    NOTE:Detail may not sum to totals because of rounding. Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Excludes enrollments in less-than-2-year postsecondary institutions and enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools. The age breakouts used in this indicator reflect the different schooling stages that are typical for students given their age. For example, students at ages 18-19 are typically transitioning from elementary/secondary education into postsecondary education or the workforce. See supplemental note 2 for more information on the Current Population Survey (CPS).
    SOURCE:U.S. Department of Education, National Center for Education Statistics, Digest of Education Statistics, 2007 (NCES 2008-022), table 7, data from U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970-2006.

[^1]:    - Not available.
    ${ }^{1}$ 'From 1989 through 2002, Asian and Pacific Islander students were not reported separately; therefore, Pacific Islander students are included with Asian students during this period.
    NOTE: Stimates include all public school students enrolled in kindergarten through 12th grade. Race categories exclude persons of Hispanic ethnicity. Over time, the Current Population Survey (CPS) has had different response options for race/ethnicity. In 1994, the survey methodology for the CPS was changed and weights were adjusted. In 1996, the Census revised procedures for editing and allocating the race variable to offset an underestimation of Asians/Pacific I slanders. One should use caution when making comparisons between data for 1995 and earlier and data for 1996 and later. See supplemental note 2 for more information on the CPS. Detail may not sum to totals because of rounding.
