The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained therein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you.

## Acknowledgments

The authors would like to extend special thanks to the U.S. Department of Education's Office of Safe and Drug-Free Schools (OSDFS) for funding this survey, and offer specific gratitude to Bill Modzeleski and Deborah Rudy of OSDFS for their continued support and guidance.

Finally, the authors would like to thank all of the schools and school staff who responded to the SSOCS survey. This report would not be possible without their participation.

Table
Page

1. Number and percentage of public schools reporting incidents of crime that occurred at school, the number of incidents, and the rate of incidents per 1,000 students, by incident type and selected school characteristics: School year 2007-08.7
2. Number and percentage of public schools reporting student threats of physical attack and incidents of robbery that occurred at school, the number of incidents, and the rate of incidents per 1,000 students, by selected school characteristics: School year 2007-088
3. Number and percentage of public schools reporting at least one incident of the distribution, possession, or use of illegal drugs or alcohol at school, or of vandalism at school, the number of incidents reported, and the rate of incidents per 1,000 students, by selected school characteristics: School year 2007-089
4. Number and percentage of public schools reporting incidents of hate crime, gang-related crime, and gang-related hate crime at school, the number of incidents reported, and the rate of incidents per 1,000 students, by selected school characteristics: School year 2007-08
5. Percentage of public schools reporting selected types of disciplinary problems occurring at school daily or at least once a week, or at all, by selected school characteristics: School year 2007-08
6. Number and percentage of students in public schools involved in the use or possession of a weapon other than a firearm or explosive device at school receiving various disciplinary actions, by selected school characteristics: School year 2007-08.12
7. Percentage distribution of public schools reporting selected percentages of students with a parent or guardian who attended an open house or back-to-school night or attended regularly scheduled parent-teacher conferences, by selected school characteristics: School year 2007-08
8. Percentage of public schools reporting the use of selected violence prevention program components, by selected school characteristics: School year 2007-08.
9. Percentage of public schools that had a written plan for a specific crisis situation, by selected school characteristics: School year 2007-0815
10. Percentage of public schools that drilled students on a written plan for a specific crisis situation, by selected school characteristics:
School year 2007-08
11. Percentage of public schools reporting that their efforts to reduce or prevent crime at school were limited in a major way, a minor way, or not at all, by selected factors: School year 2007-08.17

A-1. Standard errors for the number and percentage of public schools reporting incidents of crime that occurred at school, the number of incidents, and the rate of incidents per 1,000 students, by incident type and selected school characteristics: School year 2007-08.

A-2. Standard errors for the number and percentage of public schools reporting student threats of physical attack and incidents of robbery that occurred at school, the number of incidents, and the rate of incidents per 1,000 students, by selected school characteristics: School year 2007-08

A-3. Standard errors for the number and percentage of public schools reporting at least one incident of the distribution, possession, or use of illegal drugs or alcohol at school, or of vandalism at school, the number of incidents reported, and the rate of incidents per 1,000 students, by selected school characteristics: School year 2007-08

A-4. Standard errors for the number and percentage of public schools reporting incidents of hate crime, gang-related crime, and gangrelated hate crime at school, the number of incidents reported, and the rate of incidents per 1,000 students, by selected school characteristics: School year 2007-08.

A-5. Standard errors for the percentage of public schools reporting selected types of disciplinary problems occurring at school daily or at least once a week, or at all, by selected school characteristics:
School year 2007-08.
A-6. Standard errors for the number and percentage of students in public schools involved in the use or possession of a weapon other than a firearm or explosive device at school receiving various disciplinary actions, by selected school characteristics: School year 2007-08A-8

B1. Unweighted and weighted unit response rates, by selected school characteristics: School year 2007-08 ..... B-8

## Introduction

This report presents findings on crime and violence in U.S. public schools, ${ }^{1}$ using data from the 2007-08 School Survey on Crime and Safety (SSOCS:2008). First administered in school year 1999-2000 and repeated in school years 2003-04, 2005-06, and 2007-08, SSOCS provides information about school crime-related topics from the perspective of schools. Developed and managed by the National Center for Education Statistics (NCES) within the Institute of Education Sciences and supported by the Office of Safe and DrugFree Schools of the U.S. Department of Education, SSOCS asks public school principals about the frequency of incidents, such as physical attacks, robberies, and thefts, in their schools. Portions of this survey also focus on school programs, disciplinary actions, and the policies implemented to prevent and reduce crime in schools.

SSOCS:2008 is based on a nationally representative stratified random sample of 3,484 U.S. public schools. Data collection began on February 25, 2008, when questionnaires were mailed to principals, and continued through June 18, 2008. A total of 2,560 public primary, middle, high, and combined schools provided usable questionnaires, yielding an unweighted response rate of approximately 75 percent. When the responding schools were weighted to account for their original sampling probabilities, the response rate increased to approximately 77 percent. A nonresponse bias analysis was performed because the weighted response rate was less than 85 percent, and the results indicate that nonresponse bias is not an issue for SSOCS:2008. For more information about the methodology and design of SSOCS, including how response rates were calculated and the details of the nonresponse bias analysis, please see Appendix B: Methodology and Technical Notes in this report.

Because the purpose of this report is to introduce new NCES data through the presentation of tables containing descriptive information, only selected findings are presented below. These findings have been chosen to demonstrate the range of information available when using SSOCS:2008 data rather than to discuss all of the observed differences.

The tables in this report contain totals and percentages generated from bivariate crosstabulation procedures. All of the results are weighted to represent the population of U.S. public schools. Comparisons drawn in the bulleted items below have been tested for statistical significance at the .05 level using Student's $t$ statistic to ensure that the differences are larger than those that might be expected due to sampling variation. Adjustments for multiple comparisons were not included. Many of the variables examined are related to one another, and complex interactions and relationships have not been explored. Due to the large sample size, many differences (no matter how substantively minor) are statistically significant; thus, only differences of 5 percentage points or more between groups are mentioned in the findings.

[^0]More information about the SSOCS survey and other SSOCS products can be found at http://nces.ed.gov/surveys/ssocs.

## Selected Findings: School Year 2007-08

- During the 2007-08 school year, the rate of violent incidents ${ }^{2}$ per 1,000 students was higher in middle schools (41 incidents) than in primary schools (26 incidents) or high schools (22 incidents) (table 1).
- While 48 percent of schools reported at least one student threat of physical attack without a weapon, 9 percent of schools reported such a threat with a weapon (table 2).
- The rate of the distribution, possession, or use of illegal drugs was higher in schools with 1,000 or more students ( 5 incidents per 1,000 students) than in schools with lower enrollments ( 1 to 2 incidents per 1,000 students) (table 3).
- About 13 percent of city schools reported at least one gang crime, a higher percentage than that reported by suburban ( 5 percent), town ( 5 percent), or rural schools (3 percent) (table 4).
- About 18 percent of city schools reported that student acts of disrespect for teachers (other than verbal abuse) happen daily or at least once a week, a higher percentage than that reported by suburban ( 9 percent), town (11 percent), or rural schools (5 percent) (table 5).
- For students involved in the use or possession of a weapon other than a firearm or explosive device at school, the most frequently used disciplinary action was an out-of-school suspension lasting 5 or more days ( 41 percent) (table 6 ).
- A lower percentage of schools with 1,000 or more students reported that more than 75 percent of students had a parent or guardian who attended regularly scheduled parent-teacher conferences ( 22 percent) than did schools with lower enrollments (49 to 59 percent) (table 7).
- A higher percentage of schools with minority enrollments of 50 percent or more involved students in resolving student conduct problems as a component of violence prevention programs ( 58 percent) than did schools with minority enrollments of less than 5 percent ( 42 percent) or 20 to less than 50 percent ( 51 percent) (table 8).
- Compared to schools in towns (31 percent) or rural areas (34 percent) larger percentages of city (49 percent) and suburban (43 percent) schools reported

[^1]having a written plan for procedures to be followed if the Department of Homeland Security issues a warning for a severe risk of terrorist attack (table 9).

- A higher percentage of middle schools reported drilling students on a written plan describing the procedures to be performed during a shooting ( 63 percent) than high schools ( 57 percent) or primary schools (49 percent) (table 10).
- Among the factors that were reported to limit schools' efforts to reduce or prevent crime "in a major way," three were more likely to be reported than others: a lack of or inadequate alternative placements or programs for disruptive students (25 percent); inadequate funds ( 24 percent); and federal, state, or district policies on disciplining special education students (18 percent) (table 11).

Interpret data with caution. The standard error for this estimate is from 30 percent to 50 percent of the estimate's value.
'Violent incidents include rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon
${ }^{2}$ Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon
${ }^{3}$ Theft or larceny (taking things worth over $\$ 10$ without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. This includes pocke picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theff from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts."
${ }^{4}$ Other incidents include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; and vandalism.
${ }^{5}$ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8 . Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades incluaing K-12 schools.
OT: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school

${ }^{1}$ Physical attack or fight was defined for respondents as an "actual and intentional touching or striking of another person against his or her will, or the intentional causing of bodily harm to an individual."
${ }^{2}$ Weapon was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. This includes look-alikes if they are used to threaten others."
${ }^{3}$ Robbery was defined for respondents as "the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theftlarceny is that robbery involves a threat or battery."
${ }^{4}$ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8 . Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12 . Combined schools include all other combinations of grades, including $\mathrm{K}-12$ schools.
NOTE: "At school" was defined for respondents to include activities happening in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Detail may not sum to totals because of rounding. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

## $\ddagger$ Reporting standards not met. The standard error for this estimate is equal to 50 percent or more of the estimate's value.

${ }^{1}$ Firearm or explosive device was defined for respondents as "any weapon that is designed to (or may readily be converted to) expel a projectile by the action of an explosive. This includes guns, bombs, grenades, mines, rockets, missiles, pipe bombs, or similar devices designed to explode and capable of causing bodily harm or property damage."
${ }^{2}$ Specialized school was defined for respondents as "a school that is specifically for students who were referred for disciplinary reasons, although the school may also have students who were referred for other reasons. The school may be at the same location as your school."
${ }^{3}$ Other disciplinary actions include suspension for less than 5 days, detention, etc.
${ }^{4}$ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8 . Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9 . High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K-12 schools.
NOTE: Detail may not sum to totals because of rounding. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school

Table 11. Percentage of public schools reporting that their efforts to reduce or prevent crime at school were limited in a major way, a minor way, or not at all, by selected factors: School year 2007-08

| Factor | Efforts to reduce or prevent crime were limited in a major way | Efforts to reduce or prevent crime were limited in a minor way | Efforts to reduce or prevent crime were not limited at all |
| :---: | :---: | :---: | :---: |
| Lack of or inadequate teacher training in classroom management | 6.1 | 36.6 | 57.3 |
| Lack of or inadequate alternative placements or programs for disruptive students | 25.4 | 38.5 | 36.1 |
| Likelihood of complaints from parents | 4.0 | 30.8 | 65.2 |
| Lack of teacher support for school policies | 3.8 | 21.1 | 75.2 |
| Lack of parental support for school policies | 9.1 | 39.1 | 51.8 |
| Teachers' fear of student retaliation | 2.1 | 18.9 | 79.0 |
| Fear of litigation | 4.9 | 31.7 | 63.4 |
| Inadequate funds | 23.7 | 39.6 | 36.7 |
| Inconsistent application of school policies by faculty or staff | 7.3 | 39.2 | 53.5 |
| Fear of district or state reprisal | 2.6 | 16.4 | 81.0 |
| Federal, state, or district policies on disciplining special education students ${ }^{1}$ | 17.6 | 42.2 | 40.3 |
| Federal policies on discipline and safety other than those for special education students ${ }^{1,2}$ | 5.2 | 30.7 | 64.1 |
| State or district policies on discipline and safety other than those for special education students ${ }^{1,2}$ | 6.3 | 30.6 | 63.1 |

${ }^{1}$ A special education student was defined for respondents as "a child with a disability, defined as mental retardation, hearing impairments (including deafness), speech or language impairments, visual impairments (including blindness), serious emotional disturbance, orthopedic impairments, autism, traumatic brain injury, other health impairments, or specific learning disabilities, who needs special education and related services and receives these under the Individuals With Disabilities Education Act (IDEA)."
${ }^{2}$ The wording of this item was changed in 2008 to include the phrase "other than those for special education students." Therefore, caution should be exercised when making direct comparisons to prior School Survey on Crime and Safety collections.
NOTE: Detail may not sum to totals because of rounding. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

## Methodology and Technical Notes

The School Survey on Crime and Safety (SSOCS) is managed by the National Center for Education Statistics (NCES) on behalf of the U.S. Department of Education. SSOCS collects extensive crime and safety data from principals and school administrators of U.S. public schools. Data from this collection can be used to examine the relationship between school characteristics and violent and serious violent crimes in primary schools, middle schools, high schools, and combined schools. In addition, data from SSOCS can be used to assess what crime prevention programs, practices, and policies are used by schools. SSOCS has been conducted in school years 1999-2000, 2003-04, 2005-06, and 200708. A fifth collection is planned for school year 2009-10.

SSOCS was developed by NCES and is funded by the Office of Safe and Drug-Free Schools of the U.S. Department of Education. The 2007-08 SSOCS (SSOCS:2008) was conducted by the U.S. Census Bureau. Data collection began on February 25, 2008, when questionnaire packets were mailed to sampled schools, and continued through June 18, 2008. A total of 2,560 public schools submitted usable questionnaires: 618 primary schools, 897 middle schools, 936 high schools, and 109 combined schools.

## Sample Design

The sampling frame for SSOCS:2008 was constructed from the public school universe file created for the 2007-08 Schools and Staffing Survey (SASS). The SASS frame was derived from the 2005-06 Common Core of Data (CCD) Public Elementary/Secondary School Universe data file. The CCD is an annual survey system of all public K-12 schools and school districts. Certain types of schools were excluded from the CCD file in order to meet the sampling needs of SASS: those in U.S. outlying areas ${ }^{1}$ and Puerto Rico, overseas Department of Defense schools, newly closed schools, home schools, and schools with a high grade of kindergarten or lower. Additional schools were then excluded from the SASS frame to meet the sampling needs of SSOCS: special education schools, vocational schools, alternative schools (e.g., adult continuing education schools and remedial schools), ungraded schools, schools sponsored by the Bureau of Indian Education, and other "nonregular" schools. ${ }^{2}$ Charter schools were not excluded. The use of the modified SASS sampling frame for SSOCS:2008 is consistent with the 1999-2000 SSOCS (SSOCS:2000) and the 2003-04 SSOCS (SSOCS:2004). The 2005-06 SSOCS (SSOCS:2006) deviated from this by using the CCD directly as a sampling frame. This deviation was necessary because SSOCS:2006 occurred between SASS collections.

The objectives of the SSOCS sampling design were twofold: to obtain overall crosssectional and subgroup estimates of important indicators of school crime and safety and to yield precise estimates of change in these indicators between 1999-2000, 2003-04, 2005-06, and 2007-08. To attain these objectives, a stratified sample of 3,484 regular public schools was drawn for SSOCS:2008 using the same general sampling design as in

[^3]the previous survey administrations for stratification variables, number of strata, method of sample allocation, and sorting of variables before selection. ${ }^{3}$ As in the 2005-06 SSOCS, there was no attempt to minimize overlap between the SSOCS:2008 sample and samples for other NCES surveys.

The initial goal of SSOCS:2008 was to collect data from at least 2,550 schools, taking nonresponse into account. One possible method of allocating schools to the different sampling strata would have been to allocate them proportionally to the U.S. public school population. However, while the majority of U.S. public schools are primary schools, the majority of school violence is reported in middle and high schools. Proportional allocation would, therefore, have yielded an inefficient sample design because the sample composition would have included more primary schools (where crime is an infrequent event) than middle or high schools (where crime is a relatively more frequent event). As a result, a larger proportion of the target sample of 2,550 schools was allocated to middle and high schools. The target sample was allocated to the four instructional levels as follows: 640 primary schools, 895 middle schools, 915 high schools, and 100 combined schools. Schools in the 1999-2000 SSOCS (SSOCS:2000), SSOCS:2004, and SSOCS:2006 were allocated to instructional levels in a similar manner.

The same variables and categories used to create strata in SSOCS:2000, SSOCS:2004, and SSOCS:2006 were used to create strata in SSOCS:2008. The population of schools was stratified (grouped) into four instructional levels, ${ }^{4}$ four types of locale settings, ${ }^{5,6}$ and four enrollment size categories. ${ }^{7}$ These variables were chosen because they have been shown to be associated with school crime (Miller 2004). The sample of schools in each instructional level was allocated to each of the 16 cells formed by the cross-classification of the four categories of enrollment size and four types of locale. In order to obtain a reasonable sample size of lower enrollment schools while giving a higher probability of selection to higher enrollment schools, the sample was allocated to each subgroup in proportion to the sum of the square roots of the total student enrollment in each school in that stratum.

The effective sample size within each stratum was then inflated to account for nonresponse. Once the final sample sizes were determined for each of the 64 strata, the subgroups were sorted by region ${ }^{8}$ and percent minority enrollment, and an initial sample of 3,484 schools was selected. Sorting by these variables before selection has the same effect as stratification with proportional allocation of schools to the strata. For more information on the sample design, see chapter 2 of the School Survey on Crime and Safety: 2007-08 Data File User's Manual (Ruddy et al. forthcoming).

[^4]
## Data Collection

SSOCS:2008 was conducted as a mail survey with telephone follow-up. Four months before the onset of data collection, NCES began working with the school districts of sampled schools that required prior approval to participate in the survey. On February 19, 2008, school administrators of sampled schools were sent advance letters that included the date of the first questionnaire mailing and a toll-free number to call with any questions.

Upon distribution of the advance letters, letters were mailed to chief state school officers and superintendents to inform them that schools within their states and districts, respectively, had been selected for SSOCS:2008. The letters included information about the survey and were accompanied by a promotional SSOCS pen, an informational copy of the questionnaire, and the SSOCS brochure. The letters were not designed to request permission from these officials to participate in the survey, but rather as a vehicle to enhance participation.

On February 25-26, 2008, questionnaires were sent via FedEx directly to the principals of the sampled schools, with a cover letter describing the importance of the survey, a promotional SSOCS pen, and a CD-ROM of the Statistical Abstract of the United States: 2008. See appendix D for a copy of the questionnaire.

During the two weeks following the first questionnaire mailing, a screener telephone operation was conducted to verify that each sampled school had received the questionnaire and was, in fact, eligible to participate. Two weeks after the screener ended, a reminder telephone operation began, which was conducted in two 1-week phases. The primary objective of the reminder operation was to follow up with the principal or school contact to determine the status of the questionnaire; however, during the second week, the interviewer could complete the SSOCS interview over the phone at the respondent's request.

Returned questionnaires were examined for quality and completeness using both manual and computerized edits. If a questionnaire did not meet predetermined levels of completeness, the respondent was contacted again to resolve issues related to the missing data, irrespective of whether the items missing data were considered "critical." ${ }^{9}$ The criteria used to determine completeness are detailed in section 3.1 of the School Survey on Crime and Safety: 2007-08 Data File User's Manual (Ruddy et al. forthcoming). Data collection ended on June 18, 2008. If a satisfactory resolution could not be reached, imputation was used to resolve data quality issues for questionnaires in which at least 60 percent of all items, ${ }^{10} 80$ percent of critical items, 60 percent of item 16 , and 60 percent of item 22 had been completed. Questionnaires that did not meet the imputation criteria were considered incomplete and are excluded from the analyses in this report.

[^5]
## Weighting

Sample weights allow inferences to be made about the population from which the sample units were drawn. Because of the complex nature of the SSOCS:2008 sample design, weights are necessary to obtain population-based estimates, to minimize bias arising from differences between responding and nonresponding schools, and to calibrate the data to known population characteristics in a way that reduces sampling error. The procedures used to create the SSOCS sampling weights are described below.

An initial (base) weight was first determined within each stratum by calculating the ratio of the number of schools available in the sampling frame to the number of schools selected. In order to reduce the potential of bias from nonresponse, weighting classes were determined by using a statistical algorithm similar to CHAID (chi-square automatic interaction detector) to partition the sample so that schools within a weighting class were homogenous with respect to the probability of responding. The predictor variables for the analysis were school instructional level, locale, region, enrollment size, percent minority enrollment, student-to-teacher ratio, percentage of students eligible for free or reducedprice lunch, and number of full-time-equivalent teachers. When the number of responding schools in a class was small, that weighting class was combined with another class to avoid the possibility of large weights. After combining the necessary classes, the base weights were adjusted to produce nonresponse adjusted weights so that the weighted distribution of the responding schools resembled the initial distribution of the total sample.

The nonresponse-adjusted weights were then calibrated to agree with known population counts obtained from the sampling frame to reduce bias in the estimates due to undercoverage. The calibration process, a form of poststratification, separates the sample into a number of classes (poststrata) defined by a cross-classification of variables. The known population counts may be available for the individual cells of the crossclassification or only for certain margins of it. In the latter situation, the calibration proceeds iteratively, one margin at a time, and is often called "raking." Poststratification works well when the noncovered population is similar to the covered population in each poststratum. Thus, to be effective, the variables that define the poststrata must be correlated with the outcome of interest (school crime, in this report). They must also be well measured in the survey, and the control totals must be available for the population as a whole. As in SSOCS:2006, these requirements were satisfied in SSOCS:2008 by the two margins set up for the raking ratio adjustment of the weights: (1) instructional level and school enrollment size; and (2) instructional level and locale. All three variablesinstructional level, school enrollment size, and locale-have been shown to be correlated with school crime (Miller 2004).

## Imputation Procedures

Files containing missing data can be problematic because, depending on how the missing data are treated, analysis of incomplete datasets may cause different users to arrive at different conclusions. Another problem with missing data is that certain groups of respondents may be more likely than others to leave some survey items unanswered, creating bias in the survey estimates. Completed SSOCS:2008 surveys contained some level of item nonresponse after the conclusion of the data collection phase, and imputation procedures were used to create values for all questionnaire items with missing information.

The imputation methods utilized in SSOCS:2008 were tailored to the nature of the survey item. Four methods were used: aggregate proportions, best match, logical, and clerical. These methods are described in detail in section 4.4 of the School Survey on Crime and Safety: 2007-08 Data File User's Manual (Ruddy et al. forthcoming).

## Unit Response Rates

A unit response rate is, at its most basic level, the ratio of surveys completed by eligible respondents to the total count of eligible respondents. In some surveys, this calculation can be rather complicated because it is difficult to distinguish between eligible and ineligible units. For school surveys, however, the Department of Education updates its list of known schools on a fairly regular basis, so estimating eligibility among nonrespondents is relatively straightforward.

Unit response rates can be unweighted or weighted and are traditionally reported because they reflect the potential effects of nonsampling error and indicate whether portions of the population are underrepresented due to nonresponse. In order to calculate any of these measures, it is first necessary to know the disposition (outcome) of each sampled case. Table B-1 shows the dispositions of the 3,484 cases initially selected for participation in SSOCS:2008, as well as the unweighted and weighted unit response rates by selected school characteristics. ${ }^{11}$ The overall weighted ${ }^{12}$ unit response rate was 77 percent.

## Analysis of Unit Nonresponse Bias

The existence of nonresponding schools has the potential to introduce bias into survey estimates, depending on the magnitude of the nonresponse and whether differences exist between responding and nonresponding schools in characteristics related to the estimates of interest. A unit-level nonresponse bias analysis was conducted to evaluate the extent of this bias in SSOCS:2008. Responding and nonresponding schools were compared across

[^6]Table B1. Unweighted and weighted unit response rates, by selected school characteristics: School year 2007-08

| School characteristic | Initial sample | Completed survey ${ }^{1}$ | $\begin{array}{r} \text { Non- } \\ \text { respondents }^{2} \end{array}$ | Ineligible ${ }^{3}$ | Unweighted response rate (percent) ${ }^{4}$ | Weighted response rate (percent) ${ }^{5}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Total | 3,484 | 2,560 | 872 | 52 | 74.6 | 77.2 |
| Level |  |  |  |  |  |  |
| Primary | 833 | 618 | 200 | 15 | 75.6 | 77.0 |
| Middle | 1,214 | 897 | 297 | 20 | 75.1 | 77.0 |
| High school | 1,295 | 936 | 347 | 12 | 73.0 | 76.2 |
| Combined | 142 | 109 | 28 | 5 | 79.6 | 80.8 |
| Enrollment size |  |  |  |  |  |  |
| Less than 300 | 371 | 285 | 60 | 26 | 82.6 | 83.3 |
| 300-499 | 630 | 486 | 131 | 13 | 78.8 | 76.7 |
| 500-999 | 1,318 | 992 | 315 | 11 | 75.9 | 76.2 |
| 1,000 or more | 1,165 | 797 | 366 | 2 | 68.5 | 68.6 |
| Urbanicity |  |  |  |  |  |  |
| City | 1,046 | 679 | 335 | 32 | 67.0 | 69.4 |
| Suburb | 1,151 | 814 | 329 | 8 | 71.2 | 73.1 |
| Town | 469 | 390 | 70 | 9 | 84.8 | 84.6 |
| Rural | 818 | 677 | 138 | 3 | 83.1 | 83.9 |
| Percent minority enrollment |  |  |  |  |  |  |
| Less than 5 percent | 427 | 353 | 70 | 4 | 83.5 | 84.3 |
| 5 to less than 20 percent | 892 | 707 | 181 | 4 | 79.6 | 80.8 |
| 20 to less than 50 percent | 895 | 656 | 231 | 8 | 74.0 | 76.7 |
| 50 percent or more | 1,270 | 844 | 390 | 36 | 68.4 | 71.4 |
| Region |  |  |  |  |  |  |
| Northeast | 597 | 399 | 189 | 9 | 67.9 | 69.5 |
| Midwest | 832 | 648 | 168 | 16 | 79.4 | 80.8 |
| South | 1,274 | 950 | 304 | 20 | 75.8 | 79.7 |
| West | 781 | 563 | 211 | 7 | 72.7 | 74.6 |

${ }^{1}$ In SSOCS:2008, A minimum of 60 percent of the 241 subitems eligible for recontact (i.e., all subitems in the questionnaire except for the seven introductory items) were required to have been answered for a survey to be considered complete, including a minimum of 80 percent of the 103 critical subitems.
${ }^{2}$ Nonrespondents include 94 schools whose districts denied permission to NCES and those eligible schools that either did not respond or responded but did not answer the minimum number of items required for the survey to be considered complete.
${ }^{3}$ Ineligible schools include those that had closed, merged with another school at a new location, or changed from a regular public school to an alternative school.
${ }^{4}$ The unweighted response rate is calculated as the following ratio: completed cases / (total sample - known ineligibles).
${ }^{5}$ The weighted response rate is calculated by applying the base sampling rates to the following ratio: completed cases / (total sample - known ineligibles).
SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007-08 School Survey on Crime and Safety (SSOCS:2008).
the characteristics available for both groups: instructional level, enrollment size, type of locale, percent minority enrollment, region, number of full-time-equivalent teachers, student-to-teacher ratio, and percentage of students eligible for free or reduced-price lunch. This analysis indicated that there were no measurable differences between the responding schools and the full sample of schools, leading to the conclusion that nonresponse bias is not an issue. For more information on the analysis of unit nonresponse, please see section 3.6 of the School Survey on Crime and Safety: 2007-08 Data File User's Manual (Ruddy et al. forthcoming).

## Item Response Rates

Just as principals sometimes chose not to respond to the SSOCS:2008 survey request, those that did respond occasionally chose not to answer all of the survey items. Unweighted item response rates are calculated by dividing the number of sampled schools responding to an item by the number of schools asked to respond to the item. Weighted ${ }^{13}$ item-level response rates in SSOCS:2008 were generally high, ranging from 72 to 100 percent. Of the 241 subitems in the SSOCS questionnaire (i.e., all subitems except for the seven introductory items), most (199) had response rates greater than 95 percent, 29 had response rates between 85 and 95 percent, and 13 had response rates less than 85 percent. The 13 subitems with response rates less than 85 percent are listed below:

- C0234-Number of part-time security guards
- C0236-Number of full-time school resource officers
- C0238-Number of part-time school resource officers
- C0240-Number of full-time sworn law enforcement officers
- C0242-Number of part-time sworn law enforcement officers
- C0326-Number of physical attacks or fights with a weapon
- C0330-Number of physical attacks or fights without a weapon
- C0408-Out-of-school suspension or removal for less than the remainder of the school year with no curriculum/services provided was used this school year
- C0542-Number of paid part-time special education teachers
- C0546-Number of paid part-time special education aides
- C0550-Number of paid part-time regular classroom teachers
- C0554-Number of paid part-time regular classroom aides/paraprofessionals
- C0558-Number of paid part-time counselors

## Analysis of Item Nonresponse Bias

For all items with response rates below 85 percent, an item-level bias analysis was performed to determine the extent to which schools that did not answer the item differed from schools that did answer the item. This analysis was done because differences between the schools that did and did not respond to an item can lead to bias in estimates.

[^7]The magnitude of item nonresponse bias is determined by factors including the level of item response, the differences between item respondents and item nonrespondents on a survey item, and the distribution of item responses across categories of auxiliary variables. Because the values of the survey items are not known for item nonrespondents, the distributions of eight sampling frame variables ${ }^{14}$ were compared between the nonrespondents and respondents for the 13 subitems with response rates of less than 85 percent. In addition, item medians were examined to determine if variation exists in responses between the categories of the eight sampling frame variables. The susceptibility to bias was also considered within each item by examining the effects of extreme outliers on the estimates.

Among the items examined, 12 (C0234, C0236, C0238, C0240, C0242, C0326, C0408, C0542, C0546, C0550, C0554, C0558) were identified as having negligible nonresponse bias. The other item (C0330, total number of physical attacks or fights without a weapon) had statistically significant differences in its distributions across most of the key variables examined, and had statistically significant differences in its distributions of responses across categories of the eight sampling frame variables. The distributions between respondents and the sample for survey items associated with item C0330 were then examined. Based on these analyses, it was determined that the increased potential for bias in this item was not enough to warrant its exclusion from the data file. More detailed information on the analysis of item nonresponse, including the specific comparisons that were significant in the tests outlined above, is available in the School Survey on Crime and Safety: 2007-08 Data File User's Manual (Ruddy et al. forthcoming).

## Sampling Variability

Estimates derived from a probability sample are subject to sampling error because only a small fraction of the target population is surveyed. In surveys with complex sampling designs, such as SSOCS:2008, estimates of standard errors that assume simple random sampling typically underestimate the variability in the point estimates. The standard errors in this report were produced using the jackknife replication method. The standard errors for a range of survey estimates can be computed by using a statistical package such as SAS, Stata, or SUDAAN. For guidance on how to produce survey estimates and their related standard errors using SSOCS data, please see sections 2.6 and 2.7 of the School Survey on Crime and Safety: 2007-08 Data File User's Manual (Ruddy et al. forthcoming).

[^8]
## Statistical Tests

The tests of significance used in this analysis are based on Student's $t$ statistic at the . 05 level. Adjustments for multiple comparisons were not included. The $t$ statistic between estimates from various subgroups presented in the tables can be computed by using the following formula:

$$
t=\frac{x_{1}-x_{2}}{\sqrt{S E_{1}^{2}+S E_{2}^{2}}}
$$

where $x_{1}$ and $x_{2}$ are the estimates to be compared (e.g., the means of sample members in two groups) and $S E_{1}$ and $S E_{2}$ are their corresponding standard errors.

Due to the large sample size, many differences (no matter how substantively minor) are statistically significant; thus, only differences of 5 percentage points or more between groups are mentioned in the findings. Certain characteristics discussed in this report may be related to one another, but this analysis does not control for such possible relationships. Therefore, no causal inferences should be made when reading these results.

## Appendix C:

## Description of Variables

This page is intentionally left blank

## Description of Variables

Several variables from the 2007-08 School Survey on Crime and Safety (SSOCS:2008) were used to produce the tables in this report. Listed first are the school characteristic, or row, variables that appear in all tables in this report (except table 11). These variables have been ordered as they appear in the tables. Listed after the school characteristics are the column variables for each table.

## School Characteristic (Row) Variables

School Level (FR_LVEL): This variable was created using the 2005-06 Common Core of Data (CCD) Public Elementary/Secondary School Universe data file. Schools are classified as primary schools, middle schools, high schools, or combined schools, based on the low grade and high grade. "Primary schools" are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8 . "Middle schools" are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. "High schools" are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. "Combined schools" include all other combinations of grades not included in the three former categories, including K-12 schools.

Enrollment Size (FR_SIZE): The enrollment classification categories were created using the school enrollment data in the 2005-06 CCD Public Elementary/Secondary School Universe data file. The enrollment size categories are (1) less than 300 students, (2) 300499 students, (3) 500-999 students, and (4) 1,000 or more students.

Urbanicity (FR_URBAN): ${ }^{1}$ This collapsed variable was constructed from a variable in the 2005-06 CCD Public Elementary/Secondary School Universe data file that is composed of 12 categories. In order for the sample size to be large enough in each cell, and to be consistent with prior reports, the 12 categories were collapsed into a four-level urbanicity variable with the values "city," "suburb," "town," and "rural," according to the following criteria:

City:
$11^{2}=$ Large: Territory inside an urbanized area and inside a principal city with a population of 250,000 or more.
$12=$ Midsize: Territory inside an urbanized area and inside a principal city with a population less than 250,000 and greater than or equal to 100,000 .

13 = Small: Territory inside an urbanized area and inside a principal city with a population less than 100,000 .

[^9]Suburb:
21 = Large: Territory outside a principal city and inside an urbanized area with a population of 250,000 or more.
$22=$ Midsize: Territory outside a principal city and inside an urbanized area with a population less than 250,000 and greater than or equal to 100,000 .
$23=$ Small: Territory outside a principal city and inside an urbanized area with a population less than 100,000.

Town:
$31=$ Fringe: Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.
$32=$ Distant: Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.
$33=$ Remote: Territory inside an urban cluster that is more than 35 miles from an urbanized area.

Rural:
$41=$ Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster.
$42=$ Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
$43=$ Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.

Percent Minority Enrollment (FR_CATMN): The percent minority enrollment classification categories were created using the school enrollment data in the 2005-06 CCD Public Elementary/Secondary School Universe data file. The percent minority enrollment size categories are (1) less than 5 percent, (2) 5 to less than 20 percent, (3) 20 to less than 50 percent, and (4) 50 percent or more.

Region (CENRGN): As defined by the U.S. Census Bureau. This variable was created during sampling from the 2005-06 CCD Public Elementary/Secondary School Universe data file variable FIPS (Federal Information Processing Standard): $1=$ Northeast, $2=$ Midwest, $3=$ South, and $4=$ West. For a list of states in each region category, please see section 5.7 of the School Survey on Crime and Safety: 2007-08 Data File User's Manual (Ruddy et al. forthcoming).

## Column Variables

## Table 1

Violent Incidents Recorded (C0310, C0314, C0318, C0322, C0326, C0330, C0334, C0338): This information is taken directly from questions 16a_1-eii_1 in the SSOCS 2008 questionnaire. A total count of violent incidents recorded was obtained by adding the number of recorded rapes (C0310), sexual batteries other than rape (C0314), robberies with a weapon (C0318), robberies without a weapon (C0322), physical attacks or fights with a weapon (C0326), physical attacks or fights without a weapon (C0330), threats of physical attack with a weapon (C0334), and threats of physical attack without a weapon (C0338) at each school.

Serious Violent Incidents Recorded (C0310, C0314, C0318, C0322, C0326, C0334): This information is taken directly from questions 16a_1-di_1, and 16ei_1 in the SSOCS 2008 questionnaire. A total count of serious violent incidents recorded was obtained by adding the number of recorded rapes ( C 0310 ), sexual batteries other than rape ( C 0314 ), robberies with a weapon (C0318), robberies without a weapon (C0322), physical attacks or fights with a weapon (C0326), and threats of physical attack with a weapon (C0334) at each school.

Thefts Recorded (C0342): This information is taken directly from item 16f1 in the SSOCS:2008 questionnaire. Theft/larceny (taking things worth over $\$ 10$ without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or [of] motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts."

Other Incidents Recorded (C0346, C0350, C0354, C0358, C0362): A total count of other incidents recorded was obtained by adding the number of incidents of possession of a firearm or explosive device (C0346); possession of a knife or sharp object (C0350); distribution, possession, or use of illegal drugs (C0354); distribution, possession, or use of alcohol (C0358); and vandalism (C0362).

## Table 2

Threats of Physical Attack With a Weapon Recorded (C0334): This information is taken directly from item 16ei_1 in the SSOCS:2008 questionnaire. "Physical attack or fight" was defined for respondents as "an actual and intentional touching or striking of another person against his or her will, or the intentional causing of bodily harm to an individual." "Weapon" was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. This includes look-alikes if they are used to threaten others."

Threats of Physical Attack Without a Weapon Recorded (C0338): This information is taken directly from item 16eii_1 in the SSOCS:2008 questionnaire. "Physical attack or fight" was defined for respondents as "an actual and intentional touching or striking of
another person against his or her will, or the intentional causing of bodily harm to an individual." "Weapon" was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. This includes look-alikes if they are used to threaten others."

Robberies With a Weapon Recorded (C0318): This information is taken directly from item 16ci_1 in the SSOCS:2008 questionnaire. "Robbery" was defined for respondents as "the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theft/larceny is that robbery involves a threat or battery." "Weapon" was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. This includes look-alikes if they are used to threaten others."

Robberies Without a Weapon Recorded (C0322): This information is taken directly from item 16cii_1 in the SSOCS:2008 questionnaire. "Robbery" was defined for respondents as "the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theft/larceny is that robbery involves a threat or battery." "Weapon" was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. This includes look-alikes if they are used to threaten others."

## Table 3

Incidents of Distribution, Possession, or Use of Illegal Drugs Recorded (C0354): The count of incidents of distribution, possession, or use of illegal drugs recorded is taken directly from item 16i1 in the SSOCS:2008 questionnaire.

Incidents of Distribution, Possession, or Use of Alcohol Recorded (C0358): The count of incidents of distribution, possession, or use of alcohol recorded is taken directly from item 16j1 in the SSOCS:2008 questionnaire.

Incidents of Vandalism Recorded (C0362): The count of incidents of vandalism recorded is taken directly from item 16k1 in the SSOCS:2008 questionnaire. "Vandalism" was defined for respondents as "the willful damage or destruction of school property including bombing, arson, graffiti, and other acts that cause property damage. This includes damage caused by computer hacking."

Table 4
Hate Crime (C0366): This information is taken directly from item 17a in the SSOCS:2008 questionnaire. A "hate crime" was defined for respondents as "a criminal offense or threat against a person, property, or society that is motivated, in whole or in part, by the offender's bias against a race, color, national origin, ethnicity, gender, religion, disability, or sexual orientation."

Gang-Related Crime (C0368): This information is taken directly from item 17 b in the SSOCS:2008 questionnaire. A "gang" was defined for respondents as "an ongoing loosely organized association of three or more persons, whether formal or informal, that has a common name, signs, symbols, or colors, whose members engage, either individually or collectively, in violent or other forms of illegal behavior."

Gang-Related Hate Crime (C0369): This information is taken directly from item 17c in the SSOCS:2008 questionnaire. A "hate crime" was defined for respondents as "a criminal offense or threat against a person, property, or society that is motivated, in whole or in part, by the offender's bias against a race, color, national origin, ethnicity, gender, religion, disability, or sexual orientation." A "gang" was defined for respondents as "an ongoing loosely organized association of three or more persons, whether formal or informal, that has a common name, signs, symbols, or colors, whose members engage, either individually or collectively, in violent or other forms of illegal behavior."

Table 5
Disciplinary Problems (C0374, C0376, C0378, C0380, C0382, C0384, C0386, C0388):
This information is taken directly from items 20a-h in the SSOCS:2008 questionnaire. Disciplinary problems include student racial/ethnic tensions, student bullying, student sexual harassment of other students, student verbal abuse of teachers, widespread disorder in classrooms, student acts of disrespect for teachers other than verbal abuse, gang activities, and cult or extremist group activities.

## Table 6

Disciplinary Actions (C0460, C0462, C0464, C0466, C0470, C0472, C0474, C0476, C0480, C0482, C0484, C0486, C0490, C0492, C0494, C0496, C0500, C0502, C0504, C0506, C0510, C0512, C0514, C0516): This information is taken directly from items $22 \mathrm{a} 2-5,22 \mathrm{~b} 2-5,22 \mathrm{c} 2-5,22 \mathrm{~d} 2-5,22 \mathrm{e} 2-5$, and $22 \mathrm{f} 2-5$ in the SSOCS: 2008 questionnaire.
Disciplinary actions include removals with no continuing services for at least the remainder of the school year; transfers to specialized schools; out-of-school suspensions lasting 5 or more days, but less than the remainder of the school year; and "other" disciplinary actions (suspension for less than 5 days, detention, etc.).

## Table 7

Parental Involvement in School Events (C0196, C0198): This information is taken directly from items 5a-b in the SSOCS:2008 questionnaire. Respondents were asked to estimate the percentage of students with at least one parent or guardian who attended an open house or back-to-school night (C0196) or regularly scheduled parent-teacher conferences (C0198). A value of " 1 " for each of these items indicates that $0-25$ percent of students had a parent or guardian who participated in the specified event. A value of " 2 " indicates that $26-50$ percent of students had a parent or guardian who participated in the specified event. A value of " 3 " indicates that $51-75$ percent of students had a parent or guardian who participated in the specified event. A value of " 4 " indicates that 76-100 percent of students had a parent or guardian who participated in the specified event. A value of " 5 " indicates that the school does not offer the specified event.

Table 8
Use of Violence Prevention Program Components (C0174, C0176, C0178, C0180, C0182, C0184, C0186, C0188): This information is taken directly from items $3 \mathrm{a}-\mathrm{h}$ in the SSOCS:2008 questionnaire. Violence prevention program components include prevention curriculum, instruction, or training for students (C0174); behavioral or behavior modification intervention for students (C0176); counseling, social work, psychological, or therapeutic activity for students (C0178); individual attention/mentoring/tutoring/coaching of students by students or adults (C0180); recreational, enrichment, or leisure activities for students (C0182); student involvement in resolving student conduct problems (C0184); programs to promote a sense of community/social integration among students (C0186); and a hotline/tipline for students to report problems (C0188). Respondents were asked whether their schools had any of the aforementioned formal programs intended to prevent or reduce violence. A "yes" response to each of these items was coded with a value of " 1 ," and a "no" response was coded with a value of " 2 ."

Table 9
Schools With a Written Plan for Responding to a Specific Crisis Situation (C0154, C0158, C0162, C0166, C0170, C0169, C0171, C0173): This information is taken directly from items 2a_1-h_1 in the SSOCS:2008 questionnaire. Respondents were asked if their school had a written plan for the following: shootings (C0154); natural disasters (C0158); hostages (C0162); bomb threats or incidents (C0166); chemical, biological, or radiological threats or incidents (C0170); suicide threats or incidents (C0169); the U.S. national threat level is changed to Red by the Department of Homeland Security (C0171); and pandemic flu (C0173). A "yes" response to each of these items was coded with a value of " 1 ," and a "no" response was coded with a value of " 2 ."

Table 10
Schools That Drilled Students on a Written Plan for Responding to a Specific Crisis Situation (C0156, C0160, C0164, C0168, C0172): This information is taken directly from items 2a_2-e_2 in the SSOCS:2008 questionnaire. If respondents indicated that their school had a written plan for a specific crisis, they were subsequently asked to indicate whether the students at their school were drilled on the plan during school year 2007-08. Respondents were asked if their students had been drilled on the following: shootings (C0156), natural disasters (C0160), hostages (C0164), bomb threats or incidents (C0168), and chemical, biological, or radiological threats or incidents (C0172). A "yes" response to each of these items was coded with a value of " 1 ," and a "no" response was coded with a value of " 2 ."

## Table 11

Limitations on Crime Prevention (C0280, C0282, C0284, C0286, C0288, C0290, C0292, C0294, C0296, C0298, C0300, C0302, C0304): This information is taken directly from items 13a-m in the SSOCS:2008 questionnaire. Respondents were asked to what extent the following factors limited their school's efforts to reduce or prevent crime: lack of or inadequate teacher training in classroom management (C0280); lack of or inadequate alternative placements/programs for disruptive students (C0282); likelihood of
complaints from parents (C0284); lack of teacher support for school policies (C0286); lack of parental support for school policies (C0288); teachers' fear of student retaliation (C0290); fear of litigation (C0292); inadequate funds (C0294); inconsistent application of school policies by faculty or staff (C0296); fear of district or state reprisal (C0298); federal, state, or district policies on disciplining special education students (C0300); other federal policies on discipline and safety (C0302); and other state or district policies on discipline and safety (C0304). A value of " 1 " for any of these items indicates that the factor limits crime prevention in a "major way" at the respondent's school, a value of " 2 " indicates that the factor limits crime prevention in a "minor way," and a value of " 3 " indicates that the factor does not limit crime prevention.

## Appendix D:

2007-08 School Survey on Crime and Safety Questionnaire

This page is intentionally left blank

## SCHOOL SURVEY ON CRIME AND SAFETY PRINCIPAL QUESTIONNAIRE 2007-08 SCHOOL YEAR

(Please correct any errors in name, address, and ZIP Code.)

## THIS SURVEY HAS BEEN ENDORSED BY:

American Association of School Administrators American Federation of Teachers American School Counselors Association Association of American Educators Center for the Prevention of School Violence
Council of Chief State School Officers
National Association of Elementary School Principals National Association of School Resource Officers National Association of School Safety and Law Enforcement Officers

National Association of Secondary School Principals National Association of State Boards of Education National Education Association
National Middle School Association National PTA
National School Boards Association
National School Safety Center
Northwest Regional Educational Laboratory
Police Executive Research Forum
School Safety Advocacy Council
School Violence Resource Center

This survey is authorized by Title I, Part E, Sections 151(b) and 153(a) of Public Law 107-279, the Education Sciences Reform Act of 2002.

## PLEASE RESPOND BY:

## Definitions

The following words are bolded and marked by an asterisk (*) wherever they appear in the questionnaire. Please use these definitions as you respond.

At school/at your school - activities happening in school buildings, on school grounds, on school buses, and at places that hold schoolsponsored events or activities. Unless otherwise specified, this refers to normal school hours or to times when school activities/events were in session.

Cult or extremist group - a group that espouses radical beliefs and practices, which may include a religious component, that are widely seen as threatening the basic values and cultural norms of society at large.
Firearm/explosive device - any weapon that is designed to (or may readily be converted to) expel a projectile by the action of an explosive. This includes guns, bombs, grenades, mines, rockets, missiles, pipe bombs, or similar devices designed to explode and capable of causing bodily harm or property damage.
Gang - an ongoing loosely organized association of three or more persons, whether formal or informal, that has a common name, signs, symbols, or colors, whose members engage, either individually or collectively, in violent or other forms of illegal behavior.
Hate crime - a criminal offense or threat against a person, property, or society that is motivated, in whole or in part, by the offender's bias against a race, color, national origin, ethnicity, gender, religion, disability, or sexual orientation.

Insubordination - a deliberate and inexcusable defiance of or refusal to obey a school rule, authority, or a reasonable order. This includes but is not limited to direct defiance of school authority, failure to attend assigned detention or on-campus supervision, failure to respond to a call slip, and physical or verbal intimidation/abuse.
Physical attack or fight - an actual and intentional touching or striking of another person against his or her will, or the intentional causing of bodily harm to an individual.

Rape - forced sexual intercourse (vaginal, anal, or oral penetration). This includes penetration from a foreign object.
Robbery - the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theft/larceny is that robbery involves a threat or battery.

Sexual battery - an incident that includes threatened rape, fondling, indecent liberties, child molestation, or sodomy. Classification of these incidents should take into consideration the age and developmentally appropriate behavior of the offender(s).

Sexual harassment - unsolicited, offensive behavior that inappropriately asserts sexuality over another person. The behavior may be verbal or nonverbal.

Special education student - a child with a disability, defined as mental retardation, hearing impairments (including deafness), speech or language impairments, visual impairments (including blindness), serious emotional disturbance, orthopedic impairments, autism, traumatic brain injury, other health impairments, or specific learning disabilities, who needs special education and related services and receives these under the Individuals with Disabilities Education Act (IDEA).

Specialized school - a school that is specifically for students who were referred for disciplinary reasons, although the school may also have students who were referred for other reasons. The school may be at the same location as your school.

Theft/larceny (taking things worth over \$10 without personal confrontation) - the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

Vandalism - the willful damage or destruction of school property including bombing, arson, graffiti, and other acts that cause property damage. This includes damage caused by computer hacking.

Violence - actual, attempted, or threatened fight or assault.

Weapon - any instrument or object used with the intent to threaten, injure, or kill. This includes look-alikes if they are used to threaten others.

# WHERE SHOULD I RETURN MY COMPLETED QUESTIONNAIRE? 

Please return your completed questionnaire in the enclosed postage-paid envelope or mail it to:

```
U.S. CENSUS BUREAU
ATTN: SPB 64C
1201 E 10TH STREET
JEFFERSONVILLE, IN 47132-0001
```

## Paperwork Burden Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1850-0761. Public reporting burden for this collection of information is estimated to average 45 minutes, including the time for reviewing instructions, searching existing data sources, gathering the data needed, and completing and reviewing the collection of information. If you have any comments concerning the accuracy of the time estimate or suggestions for improving the survey instrument, please write to: U.S. Department of Education, Washington, D.C. 20202-4651. If you have comments or concerns regarding the status of your individual response to this survey, write directly to: School Survey on Crime and Safety, National Center for Education Statistics, 1990 K Street, N.W., Room 9017, Washington, D.C. 20006.

## SURVEY INSTRUCTIONS:

i For most questions, please mark the box that best reflects your school's circumstances. Please mark your response with an "X".

- For questions that ask for counts or percents, please mark $(X)$ the none box, rather than leaving the item blank.
It is not necessary to consult any records for items 5 and 26 . Please provide estimates for these questions.
Definitions are available for many terms on page 2. Defined terms are bolded and marked with an asterisk (*) throughout the survey.
d Some questions refer to the 2007-08 school year. Please report for the school year to date.
- Please have this questionnaire filled out by the person most knowledgeable about school crime and policies to provide a safe environment. Please keep a copy of the completed questionnaire for your records.

Please provide the following information:

If you have any questions about this questionnaire, please contact the U.S. Census Bureau at: 1-800-221-1204 or at dsd.education@census.gov.

D-6

## School Practices and Programs

1. During the 2007-08 school year, was it a practice of your school to do the following?
it If your school changed its practices during the school year, please answer regarding your most recent practice.
© Check "Yes" or "No" on each line.
a. Require visitors to sign or check in
b. Control access to school buildings during school hours (e.g., locked or monitored doors)
c. Control access to school grounds during school hours (e.g., locked or monitored gates)
d. Require students to pass through metal detectors each day
e. Perform one or more random metal detector checks on students
f. Close the campus for most or all students during lunch
g. Use one or more random dog sniffs to check for drugs
h. Perform one or more random sweeps for contraband (e.g., drugs or weapons*), but not including dog sniffs
i. Require drug testing for athletes
j. Require drug testing for students in extra-curricular activities other than athletics 130
k. Require drug testing for any other students
I. Require students to wear uniforms
m. Enforce a strict dress code
n. Provide school lockers to students
2. Require clear book bags or ban book bags on school grounds
p. Provide an electronic notification system that automatically notifies parents in case of a school-wide emergency
q. Provide a structured anonymous threat reporting system (e.g., online submission, telephone hotline, or written submission via drop box)
r. Require students to wear badges or picture IDs
s. Require faculty and staff to wear badges or picture IDs
t. Use one or more security cameras to monitor the school
u. Provide telephones in most classrooms
v. Provide two-way radios to any staff
W. Prohibit all tobacco use on school grounds
*Please use the definition on page 2.
3. Does your school have a written plan that describes procedures to be performed in the following crises? If yes, has your school drilled students on the use of this plan during the 2007-08 school year?
a. Shootings
b. Natural disasters (e.g., earthquakes or tornadoes)
c.
c. Hostage
d. Bomb threats or incidents
e. Chemical, biological, or radiological threats or incidents (e.g., release of mustard gas, anthrax, smallpox, or radioactive materials)
f. Suicide threat or incident
g. The U.S. national threat level is changed to Red (Severe Risk of Terrorist Attack) by the Department of Homeland Security
h. Pandemic Flu

4. During the 2007-08 school year, did your school have any formal programs intended to prevent or reduce violence* that included the following components for students?

- If a program has multiple components, answer "Yes" for each that applies.
© Check "Yes" or "No" on each line.
a. Prevention curriculum, instruction, or training for students (e.g., social skills training)
b. Behavioral or behavior modification intervention for students
c. Counseling, social work, psychological, or therapeutic activity for students
d. Individual attention/mentoring/tutoring/coaching of students by students or adults
e. Recreational, enrichment, or leisure activities for students
f. Student involvement in resolving student conduct problems (e.g., conflict resolution or peer mediation, student court)
g. Programs to promote sense of community/social integration among students
h. Hotline/tipline for students to report problems

|  | YES | NO |
| :---: | :---: | :---: |
| 174 | 1 | 2 |
| 176 | 1 | 2 |
| 178 | 1 | 2 |
| 180 | 1 | 2 |
| 182 | 1 | 2 |
| 184 | 1 | 2 |
| 186 | 1 | 2 |
| 188 | 1 | 2 |

*Please use the definition on page 2.

## Parent and Community Involvement at School

4. Which of the following does your school do to involve or help parents?
$\dagger$ Check "Yes" or "No" on each line.
a. Have a formal process to obtain parental input on policies related to school crime and discipline
b. Provide training or technical assistance to parents in dealing with students' problem behavior
C. Have a program that involves parents at school* helping to maintain school discipline

|  | YES | NO |
| :--- | :--- | :--- |
| 190 | 1 | 2 |
| 192 | 1 | 2 |
| 194 | 1 | 2 |

5. What is your best estimate of the percentage of students who had at least one parent or guardian participating in the following events during the 2007-08 school year?

- Check one response on each line.
a. Open house or back-to-school night
b. Regularly scheduled parent-teacher conferences
C. Special subject-area events (e.g., science fair, concerts)
d. Volunteered at school* or served on a committee

|  | $0-25 \%$ | $26-50 \%$ | $51-75 \%$ | $76-100 \%$ | School does <br> not offer |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 196 | 1 | 2 | 3 | 4 | 5 |
| 198 | 1 | 2 | 3 | 4 | 5 |
| 200 | 1 | 2 | 3 | 4 | 5 |
| 202 | 1 | 2 | 3 | 4 | 5 |

6. Were any of the following community and outside groups involved in your school's efforts to promote safe, disciplined, and drug-free schools?
© Check "Yes" or "No" on each line.
a. Parent groups
b. Social service agencies
c. Juvenile justice agencies
d. Law enforcement agencies
e. Mental health agencies
f. Civic organizations/service clubs
g. Private corporations/businesses
h. Religious organizations

|  | YES | NO |
| :--- | :--- | :--- |
| 204 | 1 | 2 |
| 206 | 1 | 2 |
| 208 | 1 | 2 |
| 210 | 1 | 2 |
| 212 | 1 | 2 |
| 214 | 1 | 2 |
| 218 | 1 | 2 |

*Please use the definition on page 2.

FORM SSOCS-1 (1-14-2008)

## School Security

7. During the 2007-08 school year, did you have any security guards, security personnel, or sworn law enforcement officers present at your school* at least once a week?
$\begin{array}{ll}1 & \text { Yes } \\ 2 & \text { No } \rightarrow \text { GO TO Question } 12 \text { on page } 9 .\end{array}$
8. Were these security guards, security personnel, or sworn law enforcement officers used at least once a week in or around your school at the following times?

Check "Yes" or "No" on each line.
a. At any time during school hours
b. While students were arriving or leaving
c. At selected school activities (e.g., athletic and social events, open houses, science fairs)
d. When school/school activities were not occurring
e. Other - Please specify
10. Did any of the security guards, security personnel, or sworn law enforcement officers at your school* routinely:
d Check "Yes" or "No" on each line.
a. Wear uniforms or other identifiable clothing
b. Carry a stun gun (e.g., Taser gun)
C. Carry chemical aerosol sprays (e.g., Mace, pepper spray)
d. Carry a firearm*

|  | YES | NO |
| :--- | :--- | :--- |
| 244 | 1 | 2 |
| 246 | 1 | 2 |
| 248 | 1 | 2 |
| 250 | 1 | 2 |

11. Did these security guards, security personnel, or sworn law enforcement officers participate in the following activities at your school*?
d Check "Yes" or "No" on each line.
a. Security enforcement and patrol
b. Maintaining school discipline
C. Coordinating with local police and emergency team(s)
d. Identifying problems in the school and proactively seeking solutions to those problems
e. Training teachers and staff in school safety or crime prevention
f. Mentoring students
g. Teaching a law-related education course or training students (e.g., drug-related education, criminal law, or crime prevention courses)

## Staff Training

12. During the 2007-08 school year, did your school or school district provide any of the following for classroom teachers or aides?
© Check "Yes" or "No" on each line.
a. Training in classroom management for teachers
b. Training in school-wide discipline policies and practices related to violence*, alcohol, and/or drug use
C. Training in safety procedures
d. Training in recognizing early warning signs of students likely to exhibit violent behavior
e. Training in recognizing signs of students using/abusing alcohol and/or drugs
f. Training in positive behavioral intervention strategies

|  | YES | NO |
| :--- | :--- | :--- |
| 266 | 1 | 2 |
| 268 | 1 | 2 |
| 270 | 1 | 2 |
| 272 | 1 | 2 |
| 274 | 1 | 2 |
| 276 | 1 | 2 |

*Please use the definition on page 2.

FORM SSOCS-1(1-14-2008)

## Limitations on Crime Prevention

13. To what extent do the following factors limit your school's efforts to reduce or prevent crime?

- Check one response on each line.
a. Lack of or inadequate teacher training in classroom management
b. Lack of or inadequate alternative placement/programs for disruptive students
c. Likelihood of complaints from parents
d. Lack of teacher support for school policies
e. Lack of parental support for school policies
f. Teachers' fear of student retaliation
g. Fear of litigation
h. Inadequate funds
i. Inconsistent application of school policies by faculty or staff
j. Fear of district or state reprisal
k. Federal, state, or district policies on disciplining special education students*
I. Federal policies on discipline and safety other than those for special education students*
m . State or district policies on discipline and safety other than those for special education students*

|  | Limits in <br> major way | Limits in <br> minor way | Does not <br> limit |
| :---: | :---: | :---: | :---: |
| 280 | 1 | 2 | 3 |
| 284 | 1 | 2 | 3 |
| 286 | 1 | 2 | 3 |
| 288 | 1 | 2 | 3 |
| 290 | 1 | 2 | 3 |
| 292 | 1 | 2 | 3 |
| 294 | 1 | 1 | 2 |

## Frequency of Crime and Violence at School

14. During the 2007-08 school year, have any of your school's students, faculty, or staff died as a result of a homicide committed at your school*?

$$
\begin{array}{lll}
306 & 1 & \text { Yes } \\
& 2 & \text { No }
\end{array}
$$

15. During the 2007-08 school year, has there been at least one incident at your school* that involved a shooting (regardless of whether anyone was hurt)? Please include those incidents that occurred at school*, regardless of whether a student or non-student used the firearm*.

$$
\begin{array}{rll}
308 & 1 & \text { Yes } \\
2 & \text { No }
\end{array}
$$

*Please use the definition on page 2.

## Number of Incidents

16. Please record the number of incidents that occurred at school* during the 2007-08 school year for the offenses listed below.
. If none, please mark ( X ) the box.
Please provide information on:

- The number of incidents, not the number of victims or offenders.
( Recorded incidents, regardless of whether any disciplinary action was taken.
$\dagger$ Recorded incidents, regardless of whether students or non-students were involved.
- Incidents occurring before, during, or after normal school hours.

|  | Total number of recorded incidents |  |  | Number reported to police or other law enforcement |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Rape* or attempted rape* | 310 | 0 | None | 312 | 0 | None |
| b. Sexual battery* other than rape* (include threatened rape*) | 314 | 0 | None | 316 | 0 | None |
| C. Robbery* (taking things by force) <br> i. With a weapon* | 318 | 0 | None | 320 | 0 | None |
| ii. Without a weapon* | 322 | 0 | None | 324 | 0 | None |
| d. Physical attack or fight* <br> i. With a weapon* | 326 | 0 | None | 328 | 0 | None |
| ii. Without a weapon* | 330 | 0 | None | 332 | 0 | None |
| e. Threats of physical attack* <br> i. With a weapon* | 334 | 0 | None | 336 | 0 | None |
| ii. Without a weapon* | 338 | 0 | None | 340 | 0 | None |
| f. Theft/larceny* (taking things worth over $\$ 10$ without personal confrontation) | 342 | 0 | None | 344 | 0 | None |
| g. Possession of a firearm or explosive device* | 346 | 0 | None | 348 | 0 | None |
| h. Possession of a knife or sharp object | 350 | 0 | None | 352 | 0 | None |
| i. Distribution, possession, or use of illegal drugs | 354 | 0 | None | 356 | 0 | None |
| j. Distribution, possession, or use of alcohol | 358 | 0 | None | 360 | 0 | None |
| k. Vandalism* | 362 | 0 | None | 364 | 0 | None |

*Please use the definition on page 2.

FORM SSOCS-1 (1-14-2008)
17. During the 2007-08 school year, how many of the following incidents occurred at your school*?
di If none, please mark ( X ) the box.

| a. | Hate crime* | Total number |  |
| :---: | :---: | :---: | :---: |
|  |  | 366 |  |
|  |  |  | None |
| b. | Gang-related* crime | 368 |  |
|  |  | 0 None |  |
| c. | Gang-related* hate crime* | 369 |  |
|  |  | 0 | None |

18. How many times during the 2007-08 school year were activities disrupted by unplanned fire alarms (i.e., false alarms)?
© Do not include fire alarms due to actual emergencies.

- If none, please mark $(X)$ the box.

370
Number of unplanned fire alarms
o None
19. Excluding planned and unplanned fire alarms, how many times during the 2007-08 school year were activities disrupted by other actions such as death threats, bomb threats, or chemical, biological, or radiological threats?
© If none, please mark $(X)$ the box.
${ }^{372}$ Number of disruptions
*Please use the definition on page 2.

## Disciplinary Problems and Actions

20. To the best of your knowledge, how often do the following types of problems occur at your school*?
d Check one response on each line
a. Student racial/ethnic tensions
b. Student bullying
c. Student sexual harassment* of other students
d. Widespread disorder in classrooms
e. Student verbal abuse of teachers
f. Student acts of disrespect for teachers other than verbal abuse
g. Gang* activities
h. Cult or extremist group* activities

*Please use the definition on page 2.
22. During the 2007-08 school year, how many students were involved in committing the following offenses, and how many of the following disciplinary actions were taken in response?
© If none, please mark ( X ) the box.
Please follow these guidelines when determining the number of offenses and disciplinary actions:

- If more than one student was involved in an incident, please count each student separately when providing the number of disciplinary actions.
- If a student was disciplined more than once, please count each offense separately (e.g., a student who was suspended five times would be counted as five suspensions).
- If a student was disciplined in two different ways for a single infraction (e.g., the student was both suspended and referred to counseling), count only the most severe disciplinary action that was taken. If a student was disciplined in one way for multiple infractions, record the disciplinary action for only the most serious offense.
firearm/
explosive device*
b. Use/possession of a weapon* other than a firearm/ explosive device*
c. Distribution, possession, or use of illegal drugs
d. Distribution, possession, or use of alcohol
e. Physical attacks or fights*
f. Insubordination*

23. During the 2007-08 school year, how many of the following occurred?
d If none, please mark ( X ) the box.
a. Students were removed from your school without continuing services for at least the remainder of the school year for disciplinary reasons. (NOTE: This number should be greater than or equal to the sum of entries in item 22, column 2).

| Total number |  |
| :---: | :---: |
| 518 |  |
| 0 | None |
| 520 |  |
| 0 | None |

## School Characteristics: 2007-08 School Year

24. As of October 1, 2007, what was your school's total enrollment?

522
Students
25. What percentage of your current students fit the following criteria?
. If none, please mark ( X ) the box.
a. Eligible for free or reduced-price lunch
b. Limited English Proficient (LEP)
C. Special education students*
d. Male
$\qquad$

| Percent of students |  |
| :---: | :---: |
| 524 | \% |
| 0 | None |
| 526 | \% |
| 0 | None |
| 528 | \% |
| 0 | None |
| 530 | \% |
| 0 | None |

26. What is your best estimate of the percentage of your current students who meet the following criteria?
id If none, please mark $(\mathrm{X})$ the box.
a. Below the $15^{\text {th }}$ percentile on standardized tests
b. Likely to go to college after high school
C. Consider academic achievement to be very important

None

| Percent of students |  |
| :---: | :---: |
| 532 | \% |
| 0 | None |
| 534 | \% |
| 0 | None |
| 536 | \% |
| 0 | None |

27. How many classroom changes do most students make in a typical day?

Count going to lunch and then returning to the same or a different classroom as two classroom changes. Do not count morning arrival or afternoon departure.
d If none, please mark ( X ) the box.
538 Typical number of classroom changes
0 None
*Please use the definition on page 2.

111609

D-18
28. How many paid staff at your school* are in the following categories?
(if a staff member works full-time across various schools in the district, please count this staff member as "part-time" for your school.
di If none, please mark ( X ) the box.
a. Special education teachers
b. Special education aides
c. Regular classroom teachers
d. Regular classroom teacher aides or paraprofessionals
e. Counselors or mental health professionals

29. How would you describe the crime level in the area(s) in which your students live?

ض Check one response.
5601 High level of crime
2 Moderate level of crime
3 Low level of crime
4 Students come from areas with very different levels of crime
30. How would you describe the crime level in the area where your school is located?

- Check one response.

5621 High level of crime
2 Moderate level of crime
3 Low level of crime
31. Which of the following best describes your school?

- Check one response.

5641 Regular public school
2 Charter school
3 Has a magnet program for part of the school
4 Exclusively a magnet school
5 Other - Please specify $\boldsymbol{Z}_{\boldsymbol{Z}}$

565
*Please use the definition on page 2.
32. What is your school's average daily attendance?

568 Percent of students present
33. During the 2007-08 school year, how many students transferred to or from your school after the start of the school year? Please report on the total mobility, not just transfers due to disciplinary actions.
it If a student transferred more than once in the school year, count each transfer separately.
d If none, please mark $(X)$ the box.
a. Transferred to the school
b. Transferred from the school

| Total number of transfers |  |
| :---: | :---: |
| 570 |  |
| 0 | None |
| 572 |  |
| 0 | None |

34. Please provide the following dates.
a. Start date for your school's 2007-08 academic year
b. End date for your school's 2007-08 academic year
C. Date you completed the questionnaire

|  | Month | Day |
| :--- | :--- | :--- |
|  |  |  |
| 574 |  | 12007 |
| 576 |  |  |
| 578 |  | 12008 |

35. How long did it take you to complete this form, not counting interruptions?

ゅ Please record the time in minutes (e.g., 55 minutes, 65 minutes).

580
Minutes

Please return your completed questionnaire in the enclosed postage-paid envelope or mail it to:
U.S. Census Bureau

Attn: SPB 64C
1201 E 10th Street
Jeffersonville, IN 47132-0001

Thank you very much for your participation in this survey. If you have any questions, please contact us, toll-free at: $1-800-221-1204$ or by e-mail at: dsd.education@census.gov

To learn more about this survey and to access reports from earlier collections, see the School Survey on Crime and Safety (SSOCS) website at:
http://nces.ed.gov/surveys/ssocs

Additional data collected by the National Center for Education Statistics (NCES) on a variety of topics in elementary, secondary, postsecondary, and international education are available from the NCES website at:
http://nces.ed.gov

For additional data collected by various Federal agencies, including the Department of Education, visit the Federal Statistics clearinghouse at:
http://www.fedstats.gov

[^0]:    ${ }^{1}$ The School Survey on Crime and Safety (SSOCS) includes public charter schools, but excludes special education schools, vocational schools, alternative schools (e.g., adult continuing education schools and remedial schools), newly closed schools, home schools, ungraded schools, schools with a high grade of kindergarten or lower, overseas Department of Defense schools, schools sponsored by the Bureau of Indian Education, schools in the U.S. outlying areas and Puerto Rico, and other nonregular schools.

[^1]:    ${ }^{2}$ Violent incidents include rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon.

[^2]:    Examples of natural disasters provided to respondents were earthquakes or tornadoes.

[^3]:    ${ }^{1}$ The U.S. outlying areas include the following: America Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands.
    "Nonregular" schools include cases of schools-within-schools, which were found in Minnesota and Georgia.

[^4]:    ${ }^{3}$ Adopting the same basic design for all survey administrations increases the precision of the estimates of change.
    ${ }^{4}$ The four instructional levels are primary, middle, high, and combined.
    ${ }^{5}$ The four types of locales are city, suburb, town, and rural.
    ${ }^{6}$ Starting with the 2007-08 SSOCS, a 12-cateogry urban-centric CCD locale variable was collapsed into the following 4 categories: city, suburb, town, and rural. Prior SSOCS collections used an 8-cateogry CCD variable, which was collapsed into the following 4 categories: city, urban fringe, town, and rural.
    ${ }^{7}$ The four categories of enrollment size are less than 300 students, $300-499$ students, $500-999$ students, and 1,000 students or more.
    ${ }^{8}$ The four regions are the Northeast, Midwest, South, and West.

[^5]:    ${ }^{9}$ The critical items in SSOCS:2008 included all subitems associated with items $7,8,14,15,16,17,20,22,23,24,25,26,28,31,32$, and 33.
    ${ }^{10}$ All subitems on the questionnaire except for the seven introductory items.

[^6]:    ${ }^{11}$ While it is reasonable to assume that the ineligible rate among nonrespondents is not zero, a zero ineligibility rate was assumed when calculating the unweighted and weighted response rates. This is the most conservative approach.
    ${ }^{12}$ The weighted response rate is calculated by applying the base sampling rates to the following ratio: completed cases / (total sample known ineligibles).

[^7]:    ${ }^{13}$ Base weights were used to calculate item response rates.

[^8]:    ${ }^{14}$ The eight 2005-06 CCD frame variables used in this analysis are instructional level, school enrollment size, locale, percent minority enrollment, region, number of full-time-equivalent teachers, student-to-teacher ratio, and percentage of students eligible for free or reduced-price lunch.

[^9]:    ${ }^{1}$ The 12-category urbanicity variable used for SSOCS:2008 is new to the 2005-06 CCD Public Elementary/Secondary School Universe data file. In previous SSOCS administrations, an eight-category CCD variable was used to create the urbanicity variable. Caution should be exercised when making direct comparisons to prior SSOCS collections.
    ${ }^{2}$ The number at the beginning of each urbanicity category represents the 2-digit urban-centric code given as the value assigned to the category in the CCD data file.
