U.S. DEPARTMENT OF EDUCATION DECEMBER 2012 NCES 2013-156

## Trends in Debt for Bachelor's Degree Recipients a Year After Graduation: 1994, 2001, and 2009

These Web Tables provide information about the borrowing, repayment, further education, employment, and life choices of first-time bachelor's degree recipients 1 year after they graduated. ${ }^{1}$ The tables are grouped into four sections. Sections 1 and 2 focus on firsttime college graduates who borrowed to pay for their undergraduate education, and sections 3 and 4 provide information on both borrowers and nonborrowers. The Web Tables present data for three cohorts of first-time bachelor's degree recipients over a 15-year period: those who graduated in 199293, 1999-2000, and 2007-08. All tables show results for key demographic and enrollment characteristics, and sections 3 and 4 also include the borrowing characteristics of first-time graduates.

Section 1 (tables 1 and 2 ) details the borrowing status of first-time graduates at the time of graduation. The tables display the percentage of firsttime graduates who borrowed for their undergraduate education and the cumulative amount borrowed for both total loans and federal loans.

Section 2 (tables 3-9) presents information on the loan status of first-time graduates 1 year after graduation. The tables provide data on their repayment status, amount owed, monthly payments, various measures of debt burden, and whether parents assisted graduates with loan repayment.

Section 3 (tables 10-14) depicts aspects of further enrollment and employment 1 year after graduation for both borrowers and nonborrowers.

The tables provide detail on first-time graduates' subsequent enrollment in postsecondary education, entrance into K-12 teaching, labor force participation, annual salary, and related employment information such as whether graduates considered their job to be the start of their career and whether the job was related to their undergraduate major.

Section 4 (tables 15-17) describes life 1 year after graduation in terms of living arrangements and family formation patterns for borrowers and nonborrowers. The tables present detail on whether first-time graduates were living with their parents, owned or rented their residence, were married, or had children and whether borrowers had spouses who were also repaying loans.

## DATA

The estimates presented in these Web
Tables are based on data from three Baccalaureate and Beyond (B\&B) Longitudinal Studies: B\&B:93/94, B\&B:2000/01, and B\&B:08/09. These studies, conducted by the U.S. Department of Education's National Center for Education Statistics (NCES), provide information on the education and work experiences of those who received bachelor's degrees from Title IV eligible postsecondary institutions. ${ }^{2}$ The B\&B:93/94, B\&B:2000/01, and B\&B:08/09 studies were 1-year followups of bachelor's degree recipients who completed their degrees between July 1, 1992 and June 30, 1993, between July 1, 1999 and June 30, 2000, and between July 1, 2007 and June 30, 2008, respectively, and who were first interviewed as part of the 1992-93, 1999-2000, and 2007-08 National Postsecondary Student Aid Studies (NPSAS), respectively. The 1992-93 graduates were followed up again in 1997 and 2003, but no data from these later follow-ups are used in this report. Data from all components of NPSAS (including the institutional record
abstract, the student interview, matches with U.S. Department of Education financial aid records, and SAT/ACT scores) are used as base-year data for the B\&B Studies.

The estimates presented in these Web Tables are based on the results of interviews with approximately 12,500 bachelor's degree recipients in 199293, 11,600 in 1999-2000, and 17,000 in 2007-08. These bachelor's degree recipients represent approximately 1.2 million bachelor's degree completers in each of the first two studies and 1.6 million undergraduates who completed requirements for a bachelor's degree in 2007-08. The bachelor's degree recipients in $B \& B$ were interviewed twice: near the end of their last year as undergraduates and 1 year after they had graduated. The second interview focused on their undergraduate education, current employment, and postsecondary enrollment after completing a bachelor's degree. These tables are based on first-time bachelor's recipients only. For more information about the methodology used in $B \& B$, see the following reports:

## KEY TERMS

Loan types. There are two major types of loans held by undergraduates: federal Stafford loans and private loans. In 2007-08, 35 percent of undergraduates took out Stafford loans, and 14 percent took out private loans. About 27 percent of borrowers took out both types of loans (Woo 2011).

Federal loans. These student loans have fixed interest rates and various repayment benefits, and they are guaranteed by the federal government. The largest federal loan program is the Stafford program. Stafford loans have eligibility requirements and limits on loan amounts. There are two types of federal Stafford Loans: subsidized and unsubsidized. Subsidized Stafford loans are awarded based on financial need, and the federal government pays interest on the loan until the student begins repayment and during authorized periods of deferment thereafter. Unsubsidized Stafford loans are not need based, and students are charged

VARIABLES USED
All estimates presented in these Web Tables were produced using PowerStats, a web-based software application that allows users to generate tables for many of the postsecondary surveys conducted by NCES. The variables used in these Web Tables are listed below. Visit the NCES DataLab website http://nces.ed.gov/datalab to view detailed information on how these variables were constructed and their sources. Under Code Books choose B\&B: 1993-2003, B\&B: 2000-2001, and B\&B: 2008-2009 under view by subject or view by variable name. The program files that generated the statistics presented in these Web Tables can be found at http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2013156.

| Type of residence in April 1994 | WHERELIV |

[^0]interest for the duration of the loan, although the interest can be capitalized. Subsidized and unsubsidized Stafford loans can carry different interest rates. Other smaller loan programs are PLUS loans available to parents of dependent undergraduates or graduate or professional students, Perkins loans for low-income students, and several small loan programs targeted to students in health fields.

Private loans. Private loans are education loans, not guaranteed by the federal government, from commercial lenders, credit unions, or nonprofit entities. Their terms are determined by the lender. Private loans carry a market interest rate, which is usually variable and based on credit history, and they generally have higher fees and interest rates than federal student loans.

Loan repayment. Loan statuses are divided into three groups: repayment, still owe but not in repayment, and no longer outstanding. Repayment is making regular payments. Still owe but not in repayment is having a deferment, forbearance, grace period, or default. No longer outstanding is having paid off the loan or received a full discharge. These are a summary of many possible loan statuses; borrowers can have multiple loans in differing statuses and in more than one program (see above).

In general, federal loans go into repayment 6 months after graduation in what is termed a "grace period." When repayment begins, payments are due every month unless the borrower requests a cessation of payments in the form of a deferment or forbearance. These are granted automatically if the borrower is deemed eligible. A borrower, or his or her family, can also request a full loan discharge for certain rare circumstances-death, disability, bankruptcy, closed school, or fraud by the school. Otherwise, payments are expected until the amount due is paid off. Failure to pay on time leads to delinquency and after 270 days to loan default. For private loans, the payments are due from the month after disbursement is completed unless principal and interest is deferred until graduation. Deferments, forbearances, or loan discharge are not standard and are only granted upon negotiation with the lender.

## ABOUT POWERSTATS

PowerStats produces the designadjusted standard errors necessary for testing the statistical significance of differences in the estimates. It also contains a detailed description of how each variable was created and includes question wording for items coming directly from an interview.

With PowerStats, users can replicate or expand upon the tables presented in this report. The output from

PowerStats includes the table estimates (e.g., percentages or means), standard errors, and weighted sample sizes for the estimates. If the number of valid cases is too small to produce a reliable estimate (fewer than 30 cases), PowerStats prints the double dagger symbol ( $\ddagger$ ) instead of the estimate.

In addition to producing tables,
PowerStats users may conduct linear or logistic regressions. Many options are available for output with the regression results. For a description of all the options available, users should access the PowerStats website at http://nces.ed.gov/datalab/index.aspx. For more information, contact powerstats@ed.gov.

## ENDNOTES

${ }^{1}$ First-time bachelor's degree recipients constitute 93 percent of students (for whom information on prior degrees is available) in 1994, 98 percent in 2001, and 93 percent in 2009.
${ }^{2}$ Title IV refers to the Higher Education Act of 1965 and eligible institutions are those whose students are eligible for federal student financial aid according to this statute.

Table 1.
TOTAL LOANS: Percentage of first-time bachelor's degree recipients with loans and, of those who borrowed, average cumulative amount borrowed (any loans) in current and 2009 dollars, by selected demographic, enrollment, and employment characteristics: 1994, 2001, and 2009 -Continued

| Demographic, enrollment, and employment characteristics | Percentage who borrowed |  |  | Average cumulative amount borrowed for undergraduate education |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | In current dollars |  |  | In 2009 dollars |  |  |
|  | 1994 | 2001 | 2009 | 1994 | 2001 | 2009 | 1994 | 2001 | 2009 |
| Ever received a Pell Grant ${ }^{6}$ |  |  |  |  |  |  |  |  |  |
| Yes | 85.9 | 88.3 | 87.0 | 10,600 | 19,400 | 26,100 | 15,300 | 23,500 | 26,100 |
| No | 41.0 | 48.9 | 52.9 | 9,900 | 16,500 | 23,200 | 14,300 | 19,900 | 23,200 |
| Average hours worked during final year of undergraduate enrollment |  |  |  |  |  |  |  |  |  |
| Did not work | 44.5 | 55.1 | 55.9 | 10,400 | 18,600 | 24,400 | 15,000 | 22,600 | 24,400 |
| 1-19 hours per week | 48.7 | 66.6 | 61.8 | 10,700 | 19,000 | 24,600 | 15,500 | 23,000 | 24,600 |
| 20-34 hours per week | 54.4 | 67.5 | 69.0 | 10,100 | 18,300 | 24,300 | 14,600 | 22,200 | 24,300 |
| 35 hours or more per week | 52.0 | 63.7 | 73.6 | 8,800 | 17,500 | 25,300 | 12,700 | 21,200 | 25,300 |

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met.
${ }^{1}$ Black includes African American; Hispanic includes Latino; Asian includes Pacific Islander and Native Hawaiian; Other includes American Indian, Alaska Native, and graduates having origins in two or more races or a race not listed. Race categories exclude persons of Hispanic ethnicity unless specified. Questions concerning race/ethnicity changed over time. In 1994, graduates of Two or more races were asked to choose one category, whereas in subsequent studies graduates could identify as multiracial.
${ }^{2}$ Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree receipt.
${ }^{3}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received the bachelor's degree from a less-than-4-year institution.
${ }^{4}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions.
${ }^{5}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years.
${ }^{6}$ In 1994, includes only respondents who received a Pell Grant during their final year of enrollment for their bachelor's degree; in 2001 and 2009, includes all respondents who had ever received a Pell Grant.
NOTE: Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

| 35 hours or more per week | 43.0 | 62.7 | 68.6 | 7,900 | 16,600 | 21,100 | 11,500 | 20,100 | 21,100 |

## $\dagger$ Not applicable.

$\ddagger$ Reporting standards not met.
${ }^{1}$ Black includes African American; Hispanic includes Latino; Asian includes Pacific Islander and Native Hawaiian; Other includes American Indian, Alaska Native, and graduates having origins in Two or more races or a race not listed. Race categories exclude persons of Hispanic ethnicity unless specified. Questions concerning race/ethnicity changed over time. In 1994, graduates of Two or more races were asked to choose one category, whereas in subsequent studies graduates could identify as multiracial.
${ }^{2}$ Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree receipt.
${ }^{3}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution.
${ }^{4}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions.
${ }^{5}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years.
${ }^{6}$ In 1994, includes only respondents who received a Pell Grant during their final year of enrollment for their bachelor's degree; in 2001 and 2009, includes all respondents who had ever received a Pell Grant.
NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

REPAYMENT STATUS: Among first-time bachelor's degree recipients with loans, percentage distribution of loan repayment status 1 year after bachelor's degree receipt, by selected demographic, employment, and undergraduate borrowing characteristics: 1994, 2001, and 2009 —Continued
! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.
$\ddagger$ Reporting standards not met.
${ }^{1}$ Borrowers can be not repaying but still owe when they have a deferment, forbearance, are in a grace period, or default. Borrowers are eligible for deferment-the temporary cessation of loan payments-for one of the following conditions: education, economic hardship, temporary disability, parental leave, unemployment, public service, or displaced homemaker. The largest category is enrollment in further education. Forbearance is granted at the discretion of the lender.
2 "No longer outstanding" includes loans that have been paid in full or loans that met specific circumstances for federal loan forgiveness, including school closure, death, disability, bankruptcy, and fraud by the school. In 2009, the category explicitly includes graduates who were receiving help repaying
${ }^{3}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution.
${ }^{4}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions.
${ }^{5}$ Graduates who were not working but looking for work were defined as unemployed, and those who were not working and not looking for work were defined as out of the labor force. In 1994 and 2001 , respondents self-reported full- or part-time work. In 2009, respondents were categorized as part time if they worked fewer than 35 hours per week.
${ }^{6}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years.

 borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more. NOTE: In 1994 and 2001, repayment status was reported by the respondent. In 2009, repayment status was based on loan data and self-reported data. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. Detail may not sum to totals because of rounding.

Table 4.

# AMOUNT OWED AFTER 1 YEAR: Among first-time bachelor's degree recipients with loans, average and median cumulative amount owed 1 year after bachelor's degree receipt in current dollars and 2009 dollars, by selected demographic and enrollment characteristics: 1994, 2001, and 2009-Continued 

[^11]
 were asked to choose one category, whereas in subsequent studies graduates could identify as multiracial.
${ }^{2}$ Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree receipt.

${ }^{4}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions.
${ }^{5}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years.
${ }^{6}$ In 1994, includes only respondents who received a Pell Grant during their final year of enrollment for their bachelor's degree; in 2001 and 2009 , includes all respondents who had ever received a Pell Grant.
${ }^{7}$ Includes science, technology, engineering, and mathematics.
${ }^{8}$ Includes liberal arts and sciences; general studies and humanities; multi/interdisciplinary studies; other; basic skills; citizenship activities; health-related knowledge and skills; interpersonal and social skills; leisure and recreational activities; personal awareness and self-improvement; and high school/secondary diplomas and certificates.
${ }^{9}$ Includes architecture; communications; public administration and human services; design and applied arts; law and legal studies; library sciences; and theology and religious vocations. NOTE: Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. This is loan principal only; does not include interest. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

## MONTHLY LOAN PAYMENTS: Among first-time bachelor's degree recipients with loans and who were repaying their loans 1 year after bachelor's degree receipt, average monthly loan payment in current and 2009 dollars, by selected demographic, enrollment, and employment characteristics: 1994, 2001, and 2009—Continued

#### Abstract

$\dagger$ Not applicable. $\ddagger$ Reporting standards not met. ${ }^{1}$ Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree completion. ${ }^{2}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions. ${ }^{3}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution. ${ }^{4}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009 ${ }^{5}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned \$52,570-\$88,156 were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years. ${ }^{6}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more. ${ }^{7}$ Graduates who were not working but looking for work were defined as unemployed, and those who were not working and not looking for work were defined as out of the labor force. In 1994 and 2001, respondents self-reported full- or part-time work. In 2009, respondents were categorized as part time if they worked fewer than 35 hours per week. ${ }^{8}$ Dollar amounts represent quarters of the annual salary distribution for employed bachelor's degree recipients, i.e., in 2009 those who had an annual salary of $\$ 11,648$ or less were the 25 percent of bachelor's degree recipients with the lowest annual salary, those who had an annual salary of $\$ 11,649-\$ 28,000$ were the 25 percent of bachelor's degree recipients with lower middle annual salaries, those who had an annual salary of $\$ 28,001-\$ 41,413$ were the 25 percent of bachelor's degree recipients with upper middle annual salaries, and those who had an annual salary of $\$ 41,414$ or more were the 25 percent of bachelor's degree recipients with the highest annual salary. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 14,186$ or less, and $\$ 15,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 14,187-\$ 20,200$ and $\$ 15,001-\$ 28,000$; the ranges for the upper middle 25 percent were $\$ 20,201-\$ 26,978$ and $\$ 28,001-\$ 37,970$; and the ranges for the highest 25 percent were $\$ 26,979$ or more, and $\$ 37,971$ or more. ${ }^{9}$ Includes science, technology, engineering, and mathematics. ${ }^{10}$ Includes liberal arts and sciences; general studies and humanities; multi/interdisciplinary studies; other; basic skills; citizenship activities; healthrelated knowledge and skills; interpersonal and social skills; leisure and recreational activities; personal awareness and self-improvement; and high school/secondary diplomas and certificates. ${ }^{11}$ Includes architecture; communications; public administration and human services; design and applied arts; law and legal studies; library sciences; and theology and religious vocations. NOTE: Includes those who reported they were unemployed or out of the labor force but still repaying their loans. Excludes the 15 percent in 1994 and the 9 percent in 2001 for which a salary amount could not be determined. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

#### Abstract

! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate. $\ddagger$ Reporting standards not met. ${ }^{1}$ Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree receipt. ${ }^{2}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions. ${ }^{3}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution. ${ }^{4}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009. ${ }^{5}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years. ${ }^{6}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed \$20,689-\$32,625 were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more. ${ }^{7}$ Graduates who were not working but looking for work were defined as unemployed, and those who were not working and not looking for work were defined as out of the labor force. In 1994 and 2001, respondents self-reported full- or part-time work. In 2009, respondents were categorized as part time if they worked fewer than 35 hours per week. ${ }^{8}$ Dollar amounts represent quarters of the annual salary distribution for employed bachelor's degree recipients, i.e., in 2009 those who had an annual salary of $\$ 11,648$ or less were the 25 percent of bachelor's degree recipients with the lowest annual salary, those who had an annual salary of $\$ 11,649-\$ 28,000$ were the 25 percent of bachelor's degree recipients with lower middle annual salaries, those who had an annual salary of $\$ 28,001-\$ 41,413$ were the 25 percent of bachelor's degree recipients with upper middle annual salaries, and those who had an annual salary of $\$ 41,414$ or more were the 25 percent of bachelor's degree recipients with the highest annual salary. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 14,186$ or less, and $\$ 15,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 14,187-\$ 20,200$ and $\$ 15,001-\$ 28,000$; the ranges for the upper middle 25 percent were $\$ 20,201-\$ 26,978$ and $\$ 28,001-\$ 37,970$; and the ranges for the highest 25 percent were $\$ 26,979$ or more, and $\$ 37,971$ or more. ${ }^{9}$ Includes science, technology, engineering, and mathematics. ${ }^{10}$ Includes liberal arts and sciences; general studies and humanities; multi/interdisciplinary studies; other; basic skills; citizenship activities; healthrelated knowledge and skills; interpersonal and social skills; leisure and recreational activities; personal awareness and self-improvement; and high school/secondary diplomas and certificates. ${ }^{11}$ Includes architecture; communications; public administration and human services; design and applied arts; law and legal studies; library sciences; and theology and religious vocations. NOTE: Excludes borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they were unemployed or out of the labor force. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

## National Center for Education Statistics

Table 8.
RATIO OF FEDERAL LOANS TO INCOME: Among first-time bachelor's degree recipients with loans, percentage distribution of ratio of federal loans borrowed to annual income, by selected demographic, enrollment, employment, and undergraduate borrowing characteristics: 1994, 2001, and 2009-Continued
! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.
$\ddagger$ Reporting standards not met.
${ }^{+}$Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree receipt.
${ }^{2}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions.
${ }^{3}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their B\&B degree from a less-than-4-year institution
${ }^{4}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009.
${ }^{5}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years.
${ }^{6}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more. ${ }^{7}$ Graduates who were not working but looking for work were defined as unemployed, and those who were not working and not looking for work were defined as out of the labor force. In 1994 and 2001, respondents self-reported full- or part-time work. In 2009, respondents were categorized as part time if they worked fewer than 35 hours per week.
${ }^{8}$ Includes science, technology, engineering, and mathematics.
${ }^{9}$ Includes liberal arts and sciences; general studies and humanities; multi/interdisciplinary studies; other; basic skills; citizenship activities; health-related knowledge and skills; interpersonal and social skills; leisure and recreational activities; personal awareness and self-improvement; and high school/secondary diplomas and certificates.
${ }^{10}$ Includes architecture; communications; public administration and human services; design and applied arts; law and legal studies; library sciences; and theology and religious vocations. NOTE: Graduates with zero income were assigned a ratio of 100 percent, and they made up 19.0 percent of the sample in 1994, 23.9 percent of the sample in 2001, and 28.9 percent of the sample in 2009. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

## PARENTS HELPING REPAY LOANS: Among first-time bachelor's degree recipients with loans and who were repaying their loans 1 year after bachelor's degree receipt, percentage whose parents were helping repay loans, by selected demographic, enrollment, employment, and undergraduate borrowing characteristics: 2001 and 2009—Continued

#### Abstract

! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate $\ddagger$ Reporting standards not met. ${ }^{1}$ Black includes African American; Hispanic includes Latino; Asian includes Pacific Islander and Native Hawaiian; Other includes American Indian, Alaska Native, and graduates having origins in Two or more races or a race not listed. Race categories exclude persons of Hispanic ethnicity unless specified. Questions concerning race/ethnicity changed over time. ${ }^{2}$ Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree receipt. ${ }^{3}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution. ${ }^{4}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions. ${ }^{5}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009. ${ }^{6}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years. ${ }^{7}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 2001 the corresponding range for the lowest 25 percent was $\$ 10,000$ or less; the range for the lower middle 25 percent was $\$ 10,001-\$ 17,000$; the range for the upper middle 25 percent was $\$ 17,001-\$ 23,076$; and the range for the highest 25 percent was $\$ 13,001 \$ 23,077$ or more. ${ }^{8}$ Graduates who were not working but looking for work were defined as unemployed, and those who were not working and not looking for work were defined as out of the labor force. In 2001, respondents self-reported full- or part-time work. In 2009, respondents were categorized as part-time if they worked fewer than 35 hours per week. ${ }^{9}$ Dollar amounts represent quarters of the annual salary distribution for employed bachelor's degree recipients, i.e., in 2009 those who had an annual salary of $\$ 11,648$ or less were the 25 percent of bachelor's degree recipients with the lowest annual salary, those who had an annual salary of $\$ 11,649-\$ 28,000$ were the 25 percent of bachelor's degree recipients with lower middle annual salaries, those who had an annual salary of $\$ 28,001-\$ 41,413$ were the 25 percent of bachelor's degree recipients with upper middle annual salaries, and those who had an annual salary of $\$ 41,414$ or more were the 25 percent of bachelor's degree recipients with the highest annual salary. In 2001 the corresponding range for the lowest 25 percent was $\$ 15,000$ or less; the range for the lower middle 25 percent was $\$ 15,001-\$ 28,000$; the range for the upper middle 25 percent was $\$ 28,001-\$ 37,970$; and the range for the highest 25 percent was $\$ 37,971$ or more. ${ }^{10}$ In 2001, repayment status was reported by the respondent. In 2009, repayment status was based on loan data and self-reported data. ${ }^{11}$ Borrowers can be not repaying but still owe when they have a deferment, forbearance, are in a grace period, or default. Borrowers are eligible for deferment, the temporary cessation of loan payments, for one of the following conditions: education, economic hardship, temporary disability, parental leave, unemployment, public service, or displaced homemaker. The largest category is enrollment in further education. Forbearance is granted at the discretion of the lender. ${ }^{12}$ "No longer outstanding" includes loans that have been paid in full or loans that met specific circumstances for federal loan forgiveness including school closure, death, disability, bankruptcy, and fraud by the school. In 2009, the category explicitly includes graduates who were receiving help repaying. ${ }^{13}$ Monthly loan payment as percentage of monthly income. Excludes borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they were unemployed or out of the labor force. Categories represent quarters of the 2008-09 distribution for bachelor's degree recipients for whom it was calculated. NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. Table 10.
FURTHER ENROLLMENT: Among first-time bachelor's degree recipients, percentage distribution of highest degree program in which enrolled within 1 year of bachelor's degree receipt, by selected demographic, enrollment, academic, and undergraduate borrowing characteristics: 1994, 2001, and 2009—Continued

## ! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.

$\ddagger$ Reporting standards not met.

 borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more. ${ }^{2}$ Dollar amounts represent halves of the cumulative loan amount distribution for first-time bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed less than $\$ 20,519$ were the 50 percent of first-time bachelor's degree recipients with the lowest cumulative amount borrowed, and those who borrowed $\$ 20,519$ or more were the 50 percent of first-time bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest cumulative amount borrowed were less than $\$ 7,932$ and less than $\$ 17,114$, respectively; the ranges for the highest cumulative amount borrowed were $\$ 7,932$ or more, and $\$ 17,115$ or more.

 were asked to choose one category, whereas in subsequent studies graduates could identify as multiracial.
${ }^{4}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution.
${ }^{5}$ In 1994, includes only respondents who received a Pell Grant during their final year of enrollment for their bachelor's degree; in 2001 and 2009 , includes all respondents who had ever received a Pell Grant.
${ }^{6}$ Includes science, technology, engineering, and mathematics.
${ }^{7}$ Includes liberal arts and sciences; general studies and humanities; multi/interdisciplinary studies; other; basic skills; citizenship activities; health-related knowledge and skills; interpersonal and social skills; leisure and recreational activities; personal awareness and self-improvement; high school/secondary diplomas and certificates; architecture; communications; public administration and human services; design and applied arts; law and legal studies; library sciences; and theology and religious vocations.
${ }^{8}$ In 1994, undergraduate GPA was reported by the respondent. In 2001 and 2009, GPA data were collected from the bachelor's degree-granting institution, where available, and supplemented with student-reported data.
NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1993/94, 2000/01, and 2008/09 Baccalaureate and Beyond Longitudinal Studies (B\&B:93/94, B\&B:2000/01, and B\&B:08/09).

| Borrowed | 62.0 | 73.3 | 28.7 | 41.7 | 23.6 | 27.8 | 47.8 | 30.5 |
| At or above median of income |  |  |  |  |  |  |  |  |
| Did not borrow | 80.9 | 88.8 | 18.0 | 17.7 | 23.0 | 26.6 | 59.1 | 55.7 |
| Borrowed | 78.8 | 87.8 | 17.8 | 18.7 | 22.8 | 26.6 | 59.4 | 54.7 |

! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.
$\ddagger$ Reporting standards not met.
${ }^{1}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 2001 the corresponding range for the lowest 25 percent was $\$ 10,000$ or less; the range for the lower middle 25 percent was $\$ 10,001-\$ 17,000$; the range for the upper middle 25 percent was $\$ 17,001-\$ 23,076$; and the range for the highest 25 percent was $\$ 23,077$ or more.
${ }^{2}$ Monthly loan payment as percentage of monthly income. Excludes borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they were unemployed or out of the labor force. Categories represent quarters of the 2008-09 distribution for bachelor's degree recipients for whom it was calculated.
${ }^{3}$ Dollar amounts represent halves of the monthly loan payment amount distribution for first-time bachelor's degree recipients, i.e., in 2009 those who had a monthly repayment amount of less than $\$ 207$ were the 50 percent of bachelor's degree recipients with the lowest monthly repayment amount, and those who had a monthly repayment amount of $\$ 208$ or more were the 50 percent of bachelor's degree recipients with the highest monthly repayment amount. In 2001 the corresponding range for the lowest monthly repayment amount was less than $\$ 170$; the range for the highest monthly repayment amount was $\$ 171$ or more.
${ }^{4}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution.
${ }^{5}$ Dollar amounts represent halves of the earned income distribution for dependent bachelor's degree recipients' family in 2006 for the 2009 survey, i.e., dependent students whose family earned less than $\$ 88,156$ were the 50 percent of dependent bachelor's degree recipients with the lowest earned income, and those whose family earned $\$ 88,156$ or more were the 50 percent of dependent bachelor's degree recipients with the highest income. Dependency status is that of the final year of undergraduate enrollment.
${ }^{6}$ Dollar amounts represent halves of the annual salary distribution for bachelor's degree recipients 1 year later, i.e., in 2001 and 2009 those who earned $\$ 28,000$ or less were the 50 percent of bachelor's degree recipients with the lowest cumulative amount earned, and those who earned more than $\$ 28,000$ were the 50 percent of bachelor's degree recipients with the highest cumulative amount earned.
NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

## Table 13.

AVERAGE ANNUAL SALARY: Among first-time bachelor's degree recipients who were employed, average annual salary in current and 2009 dollars, by selected demographic, enrollment, and undergraduate borrowing characteristics: 1994, 2001, and 2009—Continued

| Demographic, enrollment, and undergraduate borrowing characteristics | In current dollars |  |  | In 2009 dollars |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1994 | 2001 | 2009 | 1994 | 2001 | 2009 |
| Loan status 1 year after bachelor's degree receipt ${ }^{8}$ |  |  |  |  |  |  |
| Repayment | 23,500 | 33,200 | 35,800 | 34,000 | 40,200 | 35,800 |
| Not in repayment (still owe) ${ }^{9}$ | 14,300 | 25,800 | 25,700 | 20,700 | 31,300 | 25,700 |
| No longer outstanding ${ }^{10}$ | 24,400 | 37,400 | 37,400 | 35,400 | 45,400 | 37,400 |

$\dagger$ Not applicable.
$\ddagger$ Reporting standards not met.
${ }^{1}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more.
${ }^{2}$ Dollar amounts represent halves of the cumulative loan amount distribution for first-time bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed less than $\$ 20,519$ were the 50 percent of first-time bachelor's degree recipients with the lowest cumulative amount borrowed, and those who borrowed $\$ 20,519$ or more were the 50 percent of first-time bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest cumulative amount borrowed were less than $\$ 7,932$ and less than $\$ 17,114$, respectively; the ranges for the highest cumulative amount borrowed were $\$ 7,932$ or more, and $\$ 17,115$ or more.
${ }^{3}$ Black includes African American; Hispanic includes Latino; Asian includes Pacific Islander and Native Hawaiian; Other includes American Indian, Alaska Native, and graduates having origins in Two or more races or a race not listed. Race categories exclude persons of Hispanic ethnicity unless specified. Questions concerning race/ethnicity changed over time. In 1994, graduates of Two or more races were asked to choose one category, whereas in subsequent studies graduates could identify as multiracial.
${ }^{4}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution.
${ }^{5}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009.
${ }^{6}$ Includes science, technology, engineering, and mathematics.
${ }^{7}$ Includes liberal arts and sciences; general studies and humanities; multi/interdisciplinary studies; other; basic skills; citizenship activities; healthrelated knowledge and skills; interpersonal and social skills; leisure and recreational activities; personal awareness and self-improvement; high school/secondary diplomas and certificates; architecture; communications; public administration and human services; design and applied arts; law and legal studies; library sciences; and theology and religious vocations.
${ }^{8}$ In 1994 and 2001, repayment status was reported by the respondent. In 2009, repayment status was based on loan data and self-reported data.
${ }^{9}$ Borrowers can be not repaying but still owe when they have a deferment, forbearance, are in a grace period, or default. Borrowers are eligible for deferment, the temporary cessation of loan payments, for one of the following conditions: education, economic hardship, temporary disability, parental leave, unemployment, public service, or displaced homemaker. The largest category is enrollment in further education. Forbearance is granted at the discretion of the lender.
10 "No longer outstanding" includes loans that have been paid in full or loans that met specific circumstances for federal loan forgiveness, including school closure, death, disability, bankruptcy, and fraud by the school. In 2009, the category explicitly includes graduates who were receiving help repaying.
NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1993/94, 2000/01, and 2008/09 Baccalaureate and Beyond Longitudinal Studies (B\&B:93/94, B\&B:2000/01, and B\&B:08/09).

| Did not borrow | 9.9 | 10.5 | 11.3 |
| Borrowed | 11.8 | 13.9 | 13.4 |

! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.
$\ddagger$ Reporting standards not met.
${ }^{1}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more.
${ }^{2}$ Monthly loan payment as percentage of monthly income. Borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they are unemployed or out of the labor force, had no debt burden.
${ }^{3}$ Dollar amounts represent halves of the monthly loan payment amount distribution for first-time bachelor's degree recipients, i.e., in 2009 those who had a monthly repayment amount of less than $\$ 207$ were the 50 percent of bachelor's degree recipients with the lowest monthly repayment amount, and those who had a monthly repayment amount of $\$ 208$ or more were the 50 percent of bachelor's degree recipients with the highest monthly repayment amount. In 1994 and 2001 the corresponding ranges for the lowest monthly repayment amounts were less than $\$ 109$, and less than $\$ 170$, respectively; the ranges for the highest monthly repayment amounts were $\$ 110$ or more, and $\$ 171$ or more.
${ }^{4}$ Excludes the 0.3 percent of 1999-2000 bachelor's degree recipients and the 0.1 percent of 2007-08 bachelor's degree recipients who received their bachelor's degree from a less-than-4-year institution.
${ }^{5}$ Dollar amounts represent halves of the earned income distribution for dependent bachelor's degree recipients' family in 2006 for the 2009 survey, i.e., dependent students whose family earned less than $\$ 88,156$ were the 50 percent of dependent bachelor's degree recipients with the lowest earned income, and those whose family earned $\$ 88,156$ or more were the 50 percent of dependent bachelor's degree recipients with with the highest income. Dependency status is that of the final year of undergraduate enrollment.
NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1993/94, 2000/01, and 2008/09 Baccalaureate and Beyond Longitudinal Studies (B\&B:93/94, B\&B:2000/01, and B\&B:08/09).

## National Center for Education Statistics

Table 15.
LIVING ARRANGEMENTS: Among first-time bachelor's degree recipients, percentage living with parents or in-laws, renting or owning homes, or neither owning homes nor paying rent 1 year after bachelor's degree receipt, by selected demographic, enrollment, employment, and undergraduate borrowing characteristics: 1994, 2001, and 2009-Continued
! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.
$\ddagger$ Reporting standards not met.
${ }^{1}$ In 2009, excludes the 1.4 percent who both own home and pay rent.

 borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more.
${ }^{3}$ Dollar amounts represent halves of the cumulative loan amount distribution for first-time bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed less than $\$ 20,519$ were the 50 percent of first-time bachelor's degree recipients with the lowest cumulative amount borrowed, and those who borrowed $\$ 20,519$ or more were the 50 percent of first-time bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest cumulative amount borrowed were less than $\$ 7,932$ and less than $\$ 17,114$, respectively; the ranges for the highest cumulative amount borrowed were $\$ 7,932$ or more, and $\$ 17,115$ or more.
${ }^{4}$ Dollar amounts represent halves of the earned income distribution for dependent bachelor's degree recipients in 2009, i.e., dependent students who earned less than $\$ 88,156$ were the 50 percent of dependent bachelor's degree recipients with the lowest earned income, and those who earned $\$ 88,156$ or more were the 50 percent of dependent bachelor's degree recipients with with the highest income.
${ }^{5}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009.
${ }^{6}$ In 1994 and 2001, repayment status was reported by the respondent. In 2009, repayment status was based on loan data and self-reported data.
${ }^{7}$ Borrowers can be not repaying but still owe when they have a deferment, forbearance, are in a grace period, or default. Borrowers are eligible for deferment, the temporary cessation of loan payments, for one of the following conditions: education, economic hardship, temporary disability, parental leave, unemployment, public service, or displaced homemaker. The largest category is enrollment in further education. Forbearance is granted at the discretion of the lender.
8 "No longer outstanding" includes loans that have been paid in full or loans that met specific circumstances for federal loan forgiveness, including school closure, death, disability, bankruptcy, and fraud by the school. In 2009, the category explicitly includes graduates who were receiving help repaying.
${ }^{9}$ Monthly loan payment as percentage of monthly income. Borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they are unemployed or out of the labor force, had no debt burden.
${ }^{10}$ Graduates who were not working but looking for work were defined as unemployed; and those who were not working and not looking for work were defined as out of the labor force. In 1994 and 2001 respondents self-reported full- or part-time work. In 2009, respondents were categorized as part-time if they worked fewer than 35 hours per week.
${ }^{11}$ Dollar amounts represent halves of the earned income distribution for dependent bachelor's degree recipients' family in 2006 for the 2009 survey, i.e., dependent students whose family earned less
 degree recipients with with the highest income. Dependency status is that of the final year of undergraduate enrollment.
NOTE: The question on whether the respondent lived with parents is separate from the question on whether a respondent owned or rented a home. The latter question was not asked of respondents in the 1994 survey. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.

# National Center for Education Statistics 

## Table 16. <br> FAMILY FORMATION: Among first-time bachelor's degree recipients, percentage who were married/cohabiting or who had dependent children 1 year after bachelor's degree receipt, by selected demographic, enrollment, employment, and undergraduate borrowing characteristics: 1994, 2001, and 2009-Continued

! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.
$\ddagger$ Reporting standards not met.
${ }^{1}$ In 1994, defined as children living with bachelor's degree recipient. In 2009 only dependents who were financially supported by the respondent are included; in 1994 and 2001 all dependents were included.
${ }^{2}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent quarters of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 12,049$ or less were the 25 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, those who borrowed $\$ 12,050-\$ 20,688$ were the 25 percent of bachelor's degree recipients with lower middle cumulative amount borrowed, those who borrowed $\$ 20,689-\$ 32,625$ were the 25 percent of bachelor's degree recipients with upper middle cumulative amount borrowed, and those who borrowed $\$ 32,626$ or more were the 25 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest 25 percent were $\$ 4,000$ or less, and $\$ 10,000$ or less, respectively; the ranges for the lower middle 25 percent were $\$ 4,001-\$ 8,000$ and $\$ 10,001-\$ 17,000$; the ranges for the upper middle 25 percent were $\$ 8,001-\$ 13,000$ and $\$ 17,001-\$ 23,076$; and the ranges for the highest 25 percent were $\$ 13,001$ or more, and $\$ 23,077$ or more.
${ }^{3}$ Dollar amounts represent halves of the cumulative loan amount distribution for first-time bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed less than $\$ 20,519$ were the 50 percent of first-time bachelor's degree recipients with the lowest cumulative amount borrowed, and those who borrowed $\$ 20,519$ or more were the 50 percent of first-time bachelor's degree recipients with the highest cumulative amount borrowed. In 1994 and 2001 the corresponding ranges for the lowest cumulative amount borrowed were less than $\$ 7,932$ and less than $\$ 17,114$, respectively; the ranges for the highest cumulative amount borrowed were $\$ 7,932$ or more, and $\$ 17,115$ or more.
${ }^{4}$ Dollar amounts represent halves of the earned income distribution for dependent bachelor's degree recipients in 2009, i.e., dependent students who earned less than $\$ 88,156$ were the 50 percent of dependent bachelor's degree recipients with the lowest earned income, and those who earned $\$ 88,156$ or more were the 50 percent of dependent bachelor's degree recipients with with the highest income.
${ }^{5}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009.
${ }^{6}$ In 1994 and 2001, repayment status was reported by the respondent. In 2009, repayment status was based on loan data and self-reported data.
${ }^{7}$ Borrowers can be not repaying but still owe when they have a deferment, forbearance, are in a grace period, or default. Borrowers are eligible for deferment, the temporary cessation of loan payments, for one of the following conditions: education, economic hardship, temporary disability, parental leave, unemployment, public service, or displaced homemaker. The largest category is enrollment in further education. Forbearance is granted at the discretion of the lender.
8 "No longer outstanding" includes loans that have been paid in full or loans that met specific circumstances for federal loan forgiveness, including school closure, death, disability, bankruptcy, and fraud by the school. In 2009, the category explicitly includes graduates who were receiving help repaying.
${ }^{9}$ Monthly loan payment as percentage of monthly income. Borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they are unemployed or out of the labor force, had no debt burden.
${ }^{10}$ Graduates who were not working but looking for work were defined as unemployed, and those who were not working and not looking for work were defined as out of the labor force. In 1994 and 2001, respondents self-reported full- or part-time work. In 2009, respondents were categorized as part time if they worked fewer than 35 hours per week.
${ }^{11}$ Dollar amounts represent halves of the earned income distribution for dependent bachelor's degree recipients' family in 2006 for the 2009 survey, i.e., dependent students whose family earned less than $\$ 88,156$ were the 50 percent of dependent bachelor's degree recipients with the lowest earned income, and those whose family earned $\$ 88,156$ or more were the 50 percent of dependent bachelor's degree recipients with with the highest income. Dependency status is that of the final year of undergraduate enrollment.
NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1993/94, 2000/01, and 2008/09 Baccalaureate and Beyond Longitudinal Studies (B\&B:93/94, B\&B:2000/01, and B\&B:08/09).

|  | Percent with spouse repaying | Average monthly payment of spouse | Percent with spouse repaying | Average monthly payment of spouse |
| Loan status 1 year after bachelor's degree receipt ${ }^{4}$ |  |  |  |  |
| Repayment | 23.6 | 180 | 30.3 | 270 |
| Still owe but not in repayment ${ }^{5}$ | 17.2 | 200 | 23.0 | 220 |
| No longer outstanding ${ }^{6}$ | 13.2 | $\ddagger$ | 16.3 | 220 |
| Debt burden 1 year after bachelor's degree receipt ${ }^{7}$ |  |  |  |  |
| Borrowed but not repaying | 14.3 | 170 | 24.8 | 250 |
| 1-12 percent | 24.7 | 180 | 28.4 | 250 |
| More than 12 percent | 26.6 | 220 | 33.0 | 290 |

! Interpret data with caution. Estimate is unstable because the standard error represents more than 30 percent of the estimate.
$\ddagger$ Reporting standards not met.
${ }^{1}$ Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Dollar amounts represent halves of the cumulative loan amount distribution for bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed $\$ 20,688$ or less were the 50 percent of bachelor's degree recipients with the lowest cumulative amount borrowed, and those who borrowed more than $\$ 20,688$ were the 50 percent of bachelor's degree recipients with the highest cumulative amount borrowed. In 2001 the corresponding ranges for the lowest and highest cumulative loan amount categories were $\$ 17,000$ or less, and more than $\$ 17,000$, respectively.
${ }^{2}$ Dollar amounts represent halves of the cumulative loan amount distribution for first-time bachelor's degree recipients who borrowed, i.e., in 2009 those who borrowed less than $\$ 20,519$ were the 50 percent of first-time bachelor's degree recipients with the lowest cumulative amount borrowed, and those who borrowed $\$ 20,519$ or more were the 50 percent of first-time bachelor's degree recipients with the highest cumulative amount borrowed. In 2001 the corresponding range for the lowest cumulative amount borrowed was less than $\$ 17,114$; the range for the highest cumulative amount borrowed was $\$ 17,115$ or more.
${ }^{3}$ Graduates who were not working but looking for work were defined as unemployed; and those who were not working and not looking for work were defined as out of the labor force.
${ }^{4}$ In 2001, repayment status was reported by the respondent. In 2009, repayment status was based on loan data and self-reported data.
${ }^{5}$ Borrowers can be not repaying but still owe when they have a deferment, forbearance, are in a grace period, or default. Borrowers are eligible for deferment, the temporary cessation of loan payments, for one of the following conditions: education, economic hardship, temporary disability, parental leave, unemployment, public service, or displaced homemaker. The largest category is enrollment in further education. Forbearance is granted at the discretion of the lender.
${ }^{6}$ "No longer outstanding" includes loans that have been paid in full or loans that met specific circumstances for federal loan forgiveness, including school closure, death, disability, bankruptcy, and fraud by the school. In 2009, the category explicitly includes graduates who were receiving help repaying.
${ }^{7}$ Monthly loan payment as percentage of monthly income. Borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they are unemployed or out of the labor force, had no debt burden.
NOTE: Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico.     $\ddagger$ Reporting standards not met.
    ${ }^{1}$ Black includes African American; Hispanic includes Latino; Asian includes Pacific Islander and Native Hawaiian; Other includes American Indian, Alaska Native, and graduates having origins in Two or more races or a race not listed. Race categories exclude persons of Hispanic ethnicity unless specified. Questions concerning race/ethnicity changed over time. In 1994 , graduates of Two or more races were asked to choose one category, whereas in subsequent studies graduates could identify as multiracial
    ${ }^{2}$ Indicates the number of months elapsed between initial enrollment in postsecondary education and bachelor's degree receipt.
    
    ${ }^{4}$ Includes private nonprofit 2-year, for-profit 2-year, and all less-than-2-year institutions.
    ${ }^{5}$ Excludes the 0.3 percent of graduates who were enrolled in more than one program in 2001 and the 2.4 percent of graduates who were enrolled in an equal mix of part time and full time in 2009.
    ${ }^{6}$ Dollar amounts represent quarters of the earned income distribution by dependency status for bachelor's degree recipients in 2006 for the 2009 survey, i.e., dependent students whose parents earned less than $\$ 52,570$ were the 25 percent of dependent bachelor's degree recipients with the lowest earned income, those whose parents earned $\$ 52,570-\$ 88,156$ were the 25 percent of dependent bachelor's degree recipients with lower middle income, those whose parents earned $\$ 88,157-\$ 126,368$ were the 25 percent of dependent bachelor's degree recipients with upper middle income, and those whose parents earned $\$ 126,369$ or more were the 25 percent of dependent bachelor's degree recipients with the highest income; independent students (including spouses) who earned less than $\$ 9,579$ were the 25 percent of independent bachelor's degree recipients with the lowest earned income, those who earned $\$ 9,579-\$ 23,838$ were the 25 percent of independent bachelor's degree recipients with lower middle income, those who earned $\$ 23,839-\$ 49,464$ were the 25 percent of independent bachelor's degree recipients with upper middle income, and those who earned $\$ 49,465$ or more were the 25 percent of independent bachelor's degree recipients with the highest income. Amounts for the 1994 and 2001 surveys are defined within the variable definitions for those years.
    ${ }^{7}$ Includes science, technology, engineering, and mathematics.
    ${ }^{8}$ Includes liberal arts and sciences; general studies and humanities; multi/interdisciplinary studies; other; basic skills; citizenship activities; health-related knowledge and skills; interpersonal and social skills; leisure and recreational activities; personal awareness and self-improvement; and high school/secondary diplomas and certificates.
    ${ }^{9}$ Includes architecture; communications; public administration and human services; design and applied arts; law and legal studies; library sciences; and theology and religious vocations
    ${ }^{10}$ Excludes borrowers who no longer had an amount owed; who were not repaying due to deferment, forbearance, or grace period; or who had no income because they are unemployed or out of the abor force.
    NOTE: Includes loans from all sources. In 1994 and 2001, loans from family and friends were included; in 2009, they were not. Estimates include students enrolled in Title IV eligible postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. Detail may not sum to totals because of rounding.
