# Chapter 1. Introduction

## 1.1 Organization of the Field Test Report

The High School Longitudinal Study of 2009 (HSLS:09) is conducted by RTI International—a not-for-profit university-affiliated research organization—for the National Center for Education Statistics (NCES), a part of the Institute of Education Sciences in the U.S. Department of Education. This report describes the methodology and results of the 2012 Update and high school transcript field test. The field test report is divided into seven narrative chapters. The seven narrative chapters are:

- Chapter 1: Introduction—Organization of the Field Test Report, HSLS:09 objectives and components, and the Update and transcript studies
- Chapter 2: Instrumentation for 2012 Update
- Chapter 3: Data Collection and Processing for 2012 Update
- Chapter 4: Data Quality Analysis for 2012 Update
- Chapter 5: Data Collection and Preparation for the High School Transcript Study
- Chapter 6: Analysis of Transcript Quality
- Chapter 7: Conclusions, Recommendations for the Main Study

Please note that various field test materials, such as (for example) the facsimile of the instruments and the codebooks, can be obtained from NCES if needed by a data user: contact NCES at the HSLS Web Page, <http://nces.ed.gov/surveys/hsls09/>.

## 1.2 High School Longitudinal Study of 2009

### 1.2.1 Overview of HSLS:09

The core research questions for HSLS:09 pertain to secondary to postsecondary transition plans and the evolution of those plans; the paths into and out of STEM (science, technology, engineering, and mathematics); and the educational and social experiences that affect these outcomes.

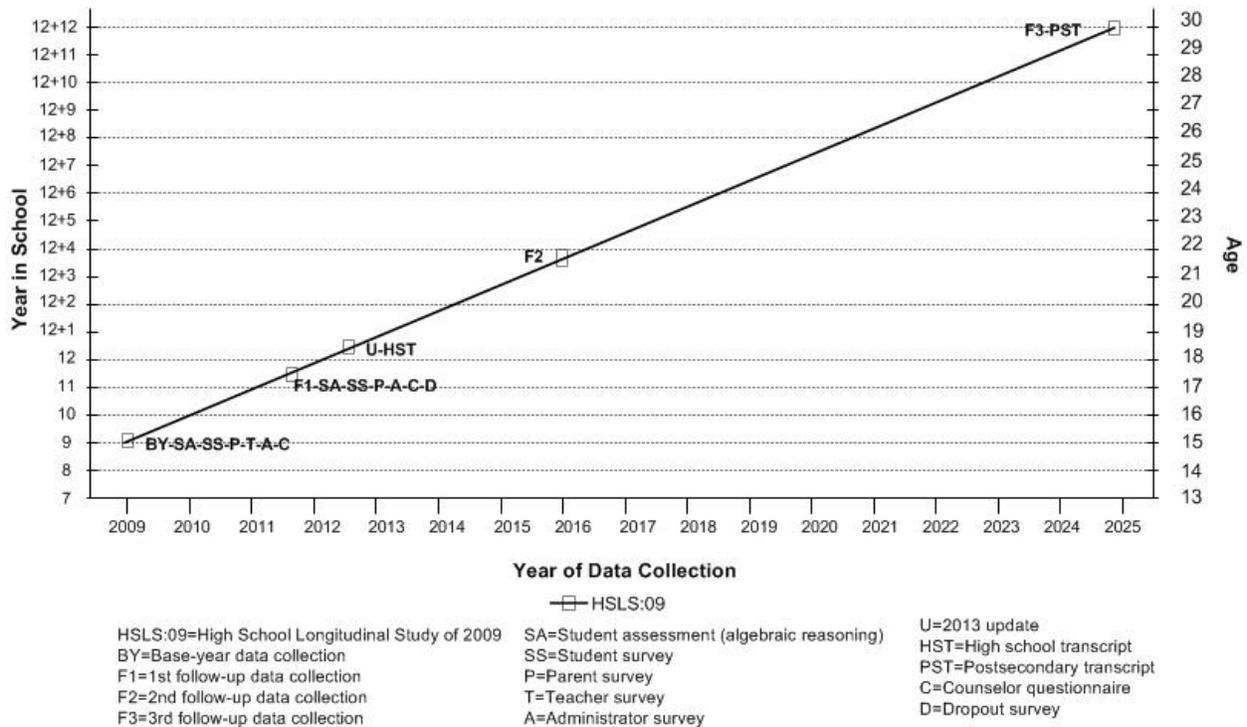

The tentative longitudinal design of HSLS:09 is illustrated in figure 1. The HSLS:09 base-year data collection took place in the fall term of the 2009–10 school year, with a randomly selected sample of fall-term 9th-graders in 944 public and private high schools with both 9th and 11th grades.<sup>1</sup> Students completed a mathematics assessment (in algebraic reasoning) and survey.

---

<sup>1</sup> Types of schools that were excluded from the sample based on the HSLS:09 eligibility definition are described as part of the discussion of the target population in the *HSLS:09 Base-Year Data File Documentation* (see chapter 3, section 3.2.1), Ingels et al. (2011).

Students' parents, principals, and mathematics and science teachers as well as the school's lead counselor completed surveys on the phone or online.

**Figure 1. Longitudinal design for the HSLs:09 ninth-grade cohort: 2009–2025**

The first follow-up of HSLs:09 took place in the spring term of 2012, when most sample members were in 11th grade. The student cohort was again assessed in mathematics, and completed a questionnaire. Contextual data were collected from a subsample of parents, and from school administrators and counselors.

The status update that is the subject of this report was field-tested in 2012, with the main study update taking place in the summer/fall of 2013. It was designed to collect information on the cohort's postsecondary plans and choices. More specifically, the Update component of HSLs:09 elicits information concerning high school completion status, applications (and acceptances) to postsecondary institutions; education and work plans for the fall; financial aid applications and offers; choice of institution; and employment experiences.

In the main study, high school transcripts were collected in the 2013–14 academic year; the field test methodology tested in the transcript field test (2012–13) is a major focus of this

report. A second follow-up is scheduled for 2016, when most sample members will be 3 years beyond high school graduation. Although there are plans for an additional and possibly final round of data collection in 2025, the precise number and timing of future follow-ups is yet to be determined.

### 1.2.2 HSLS:09 Research and Policy Issues

HSLS:09 measures mathematics achievement gains in the first 3 years of high school, but also will relate tested achievement to students' choice, access, and persistence—in high school courses and completion as well as in postsecondary education and careers.

More broadly, HSLS:09 focuses on students' decision-making processes. Generally, the study questions students on if, when, why, and how they make decisions about high school courses, postsecondary options, and majors and careers, including what factors, from parental input to considerations of financial aid for postsecondary education, enter into these decisions. At the individual level, the study examines educational attainment and personal development while also providing data on the background correlates of social and educational outcomes. At the institutional level, HSLS:09 focuses on school effectiveness issues, including promotion, retention, and curriculum content, structure, and sequencing, especially as these affect students' choice of, and assignment to, different mathematics and science courses and achievement in these two subject areas. By collecting extensive information from students, parents, teachers, school counselors, school administrators, and school records, it will be possible to investigate the relationships between home and school factors and academic achievement, interests, and social development.

In the second follow-up, when most sample members are 3 years beyond high school graduation, postsecondary access and choice, and subbaccalaureate attainment, will be the chief foci. Although for the high school years HSLS:09 collects information about the base-year school and high schools transferred to, institutional data post–high school are provided by the Integrated Postsecondary Education Data System (IPEDS), which contains information from colleges, universities, and technical and vocational institutions. Further HSLS:09 data collections (interviews and postsecondary transcripts) will examine baccalaureate attainment, rate of return to education, family formation, occupational choice, and other outcomes that mark the transition to adulthood.

Over coming years, HSLS:09 data will allow researchers, educators, and policymakers to understand:

- academic, social, and interpersonal growth;
- transitions from high school to postsecondary education, and from school to work;
- students' choices about, access to, and persistence in math and science courses, majors, and STEM careers;

- the characteristics of high schools and postsecondary institutions and their impact on student outcomes;
- baccalaureate and sub-baccalaureate attainment;
- family formation, how prior experiences in and out of school relate to marital or parental status, and how marital or parental status affects educational choice, persistence, and attainment; and
- the contexts of education, including how minority and at-risk status are associated with education and labor market outcomes.

### 1.2.3 HSLs:09 Base Year and First Follow-up

The HSLs:09 base-year field test took place in the 2008–09 school year, with fall-term 2008 ninth-graders. A subsample of the base-year field test sample of schools and students was followed to provide the basis for the first follow-up field test; the first follow-up field test sample provided the basis for the field test of the Update survey and transcript study as well. The base-year field test is comprehensively documented in a field test methodology report by Ingels et al. 2010. (Available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=201001>.)

The base-year main study took place in the 2009–10 school year, with a nationally representative sample of fall-term 2009 9th-graders. From approximately 944 participating schools, 21,444 students participated, as well as their parents, school administrators, counselors, mathematics teachers, and science teachers. The base-year main study is documented in Ingels, Pratt et al. 2011b, NCES 2011-328 (available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2011328>). Initial findings from the HSLs:09 base year may be seen in two *First Look* reports—Ingels et al. 2011, NCES 2011-327 (available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2011327>) and LoGerfo, Christopher, and Flanagan 2011, NCES 2011-355 (available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2011355>).

The HSLs:09 first follow-up took place in the spring term of 2012 (for the main study) and spring term 2011 (for the field test). The field test evaluated survey instruments (mathematics assessment and student, parent, administrator, and counselor questionnaires) and basic methodologies and procedures; the field test report is appended to the Data File Documentation. The first follow-up main study methods and results are fully documented in the same document, the *HSLs:09 Base-Year to First Follow-up Data File Documentation*, Ingels et al. 2013, NCES 2014-361 (available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2014361>). Initial findings from the first follow-up main study are documented in Ingels and Dalton 2013, NCES 2014-360 (available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=201360>).

### 1.2.4 HSLS:09 2012 Update and High School Transcript Field Tests

The overall purpose of the two field tests (Update and Transcript) was to provide a trial and evaluation of the instrument and data collection forms, and contact materials and data collection and processing procedures to be used in the main study Update and Transcript studies. (However, various main study statistical procedures, such as weighting, imputation, and disclosure analysis, have no role in the field test and were therefore not evaluated as part of the field test process.)

For both Update and Transcript components, the field test sample comprises 2008 ninth-grade cohort members from the prior rounds of HSLS:09, based on the first follow-up field test subsample of the base-year field test schools.

The main products of the field tests are the recommendations, contained in this report, for how study instruments, forms, and procedures can be improved. Data generated in the field test were used to guide the final choice of Update questionnaire items, to support specific recommendations for the revision of included questionnaire items, and to revise data collection procedures as needed.

Likewise, the transcript field test assessed key features of the main study transcript component design, including identification of the high schools sample members had attended in addition to their base-year schools, enlisting the cooperation of both sets of schools and obtaining transcripts from these schools, use of the course catalogs collected in earlier rounds of HSLS:09, matching transcript titles to catalog titles for both the course offerings and the transcript files, standardization for grades and other measures, success of quality control measures for transcript and catalog entry, training data entry and coding staff, and evaluation of systems for coding and entering transcript data. Some special issues included in the field test analysis and recommendations are the feasibility of capturing dual enrollment, postsecondary credit, online/distance learning, and exam scores for International Baccalaureate and Advanced Placement.

In anticipation of the 2013 Update questionnaire, the 2012 Update (field test) instrument has been evaluated in a number of ways. Analyses (presented in detail in chapter 4) include analysis of response distribution and variance, analysis of levels of item nonresponse, analysis of timing and item position, and analysis of inter-respondent agreement (comparison of responses of matched parent-student pairs). Given the design of the Update, and its central premise that certain items can be asked, with equal validity, from either student or parent (see chapter 2 for further discussion), the analysis of inter-respondent agreement (see chapter 4 for details) for the subset of students and parents with a matched validation interview, is extremely important. In addition to its role in the development of the Update questionnaire, the field test also provides a test of data collection procedures, including procedures for tracing and locating of the dispersing field test sample, gaining cooperation, and data collection results as measured by response rates

and bias indicators. The HSLS:09 Technical Review Panel (TRP) assisted in deliberations on the form and content of the Update and Transcript data collections.

The field test (2012 Update) survey was conducted in the summer and fall of 2012 after expected graduation from high school of the majority of the 2008 ninth-grade cohort, and encompassed all HSLS:09 field test sample members with membership in the first follow-up field test subsample. The field test for transcript collection commenced in the fall after expected graduation of the ninth-grade field test (2008) cohort, running from October 2012 through May 2013 (for the main study, the dates are September 2013 through June 2014). The transcript study is designed to capture course data for a roughly 4-year period, from start of ninth grade through a terminus either in spring term or summer term (as applicable) 2013 (2012 in field test). The study also seeks to obtain the (necessarily) incomplete data available for dropouts and late completers.

Although the transcript study is modeled on prior secondary longitudinal high school studies (while also taking advantage of systems and processes developed for previous NCES postsecondary transcript data collections), strict comparisons cannot be made between the HSLS:09 transcript main study and the prior high school transcript studies (including those of the National Assessment of Educational Progress) because HSLS:09 is based on an entering 9th-grade rather than an exiting 12th-grade sample, and the study does not include a senior cohort freshening sample as in the National Education Longitudinal Study of 1988 or Education Longitudinal Study of 2002.

## Chapter 2. Instrumentation

The completed 2012 Update (field test) and 2013 Update (main study) are intended as a brief (15- to 20-minute) status update to take place just after the modal senior year of high school, when most sample members will be at the crossroads between different postsecondary pathways. The Updates supply parent or student data that typically come early in time after the actual decisions as to which postsecondary institution to attend (if any) or not to attend. Such data, as included in the field test 2012 Update instrument, comprise such topics as high school completion, role of school counselors, postsecondary educational applications and acceptances, financial aid applications and offers, reasons for choice of a particular institution, and employment experiences. As earlier indicated, the field test 2012

A further requirement for the Update questionnaire (in addition to its need to equally accommodate either parent or student cohort member) is that the instrument should be suitable both for high school graduates and for those who dropped out or lag behind in high school completion. Thus, for example, the Update asks dropouts about their expected completion and postgraduation educational and work plans, including questions about alternative program participation in anticipation of taking a General Educational Development exam.

For all respondents, the Update gathers contact information that would assist tracing and locating activities for any future follow-ups. Given the high mobility of this cohort at this particular transition point, having post-high school address information for student cohort members or their parents will be a major benefit for the study. Finally, the Update's confirmation of last high school enrolled feeds directly into the needs of the transcript study.

The transcript study includes a detailed information request to schools, at three levels, and success in obtaining this information, and the quality of information, is evaluated in this report, to the extent possible. The three levels are hierarchical, with school-level data at the highest level, and then students within schools, and finally courses within students. *School-level information* encompasses grade scale, course grade weighting system, availability of student-level information, GPA formula, Carnegie unit conversion information, term system used, and course catalogs (if not collected in earlier years). *Student-level information* includes type of high school credential awarded, date awarded, date student left school (if a dropout), reason left school, cumulative GPA, dual (concurrent enrollment) and standardized test scores (PSAT, SAT, ACT, and AP). *Coursetaking histories* are collected for grades 9 through 12 (complete high school data for spring or summer 2013 graduates) with course title and number; year, grade level, and term course taken; number of credits earned; and grade assigned.

*This page intentionally left blank*

## Chapter 3.

# Data Collection and Processing

The data collection processes for the 2012 Update field test included identifying the student sample, tracing the sample, and gaining cooperation from sample members to complete the interview. A responsive design methodology for minimizing nonresponse bias was tested to explore possible approaches for the main study. Processes associated with these activities are described in this section as are the field test data collection results. Systems used to collect the data and manage the data collection are also described.

### 3.1 Data Collection and Processing

#### 3.1.1 Identifying the 2012 Update Sample

The sample for the 2012 Update field test comprised students sampled as ninth-graders as of the fall of 2008 who participated in the 2008 base year of the study, the 2011 first follow-up, or both. The field test sample, as described in the base-year field test report (Ingels et al. 2010; NCES 2011-01), was selected using a two-stage sampling design with primary sampling units defined as schools selected in the first stage and students randomly selected from the sampled schools in the second stage. The 41 participating schools in the base year were selected from public and private high schools in five states: California, Florida, Illinois, New York, and Texas. The base-year student sample consisted of 1,035 ninth-graders from the 41 base-year participating schools.

The High School Longitudinal Study of 2009 (HSLS:09) first follow-up field test used a subsample of 26 of the participating base-year schools. Twenty-four of these schools conducted in-school student sessions. The two remaining schools did not participate in the in-school sessions. Rather, students associated with those two schools were contacted to participate outside of the school setting. The 2012 Update student sample, therefore, included 754 students who were selected as fall 2008 ninth-graders for the HSLS:09 field test sample, attended one of the 26 schools included in the first follow-up field test, and who responded in one or both of the first two rounds of the HSLS:09 field test.

#### 3.1.2 Tracing and Locating the Field Test Sample

Tracing and locating activities began prior to the commencement of 2012 Update data collection and continued throughout the data collection period. Tracing and locating for the 2012 Update was conducted at the parent and student levels, given that either the student or the parent could provide a survey response and most sampled students were known to be 18 years of age or older at the start of or during the data collection period. Locating information for each case was gathered from a variety of sources, both before and during data collection, including a pre-data-

collection mailing to parents to request updated contact information in preparation for the 2012 Update.

All cases were sent to Accurint for batch tracing to confirm existing locating information or to get new information when available. After batch tracing was completed, the locating data for each case were analyzed and the “best” address and telephone number were identified. Each case, however, retained all available locating information, unless that information had been determined to be incorrect or obsolete. All mail-out materials were sent to the best-known address unless it was found to be incorrect.

New locating information was often gathered from contacting materials that were returned as undeliverable. When the United States Postal Service (USPS) returned mail-out materials as undeliverable, the old address was marked as no longer current and new any addresses provided by USPS were entered into the locator database. Similarly, the utility of e-mail addresses was determined by undeliverable e-mails, out-of-office notices, and specific requests by the owner of e-mails. Mail-out materials and e-mails were then sent to another address if available.

During data collection, computer-assisted telephone interview (CATI) tracing and intensive tracing were used to locate sample members. CATI tracing is a de facto method of tracing conducted by the telephone interviewers as they work through the various telephone numbers that may be available for each case. When the interviewer makes contact with a household, the interviewer determines whether the student or a parent is a member of that household. If the interviewer determines that the student or parent is not a household member, the interviewer then attempts to gather new locating information from the contact. If the contact does not have any locating information for the student or parent, the interviewer will close out the current number and attempt the next best number.

If the student or parent cannot be reached at any of the telephone numbers associated with the case, the case is then sent to RTI’s Tracing Services for intensive tracing. Intensive tracing employs known information associated with the student, the parent, or both, such as names, dates of birth, Social Security numbers, and historical address information, to locate the student or parent in credit reports and other private-use databases. Cases were traced in intensive tracing for up to 60 minutes, or until the sample member’s location was discovered. During the last month of data collection, cases that had gone through intensive tracing without locating the student or parent were sent back to intensive tracing for an additional 30 minutes of intensive tracing.

The 2012 Update achieved a provisional locate rate of 98 percent from batch tracing, CATI tracing, and intensive tracing; current or updated information could not be identified for the remaining 2 percent. Contact information for located cases included updates to and confirmations of names, addresses, telephone numbers, and e-mail addresses; such information

became the basis for contacting sample members by mail, telephone, and e-mail to encourage participation in the 2012 Update.

### 3.1.3 Interviewer Training

The 2012 Update telephone interviewers (TIs) and quality-control supervisors were trained during the second week of June 2012. TIs were responsible for gaining cooperation and conducting the interviews with sample members by telephone. All TIs working on the 2012 Update were previously trained as interviewers for the HSLS:09 first follow-up data collection, and therefore only required an 8-hour training session which focused on topics unique to the 2012 Update. The CATI training for the 2012 Update focused on gaining cooperation, obtaining informed consent, administering the interview to either the student or parent, conducting cross-validation reinterviews (see sections 4.4.1 and 4.4.2 for more information about the cross-validation reinterviews), and answering frequently asked questions unique to the 2012 Update. The training agenda is presented below in figure 2.

**Figure 2. HSLS:09 field test 2012 update interviewer training agenda: 2012**

<b>Day 1</b>	<b>Day 2</b>

Front-End Practice	Q&A/Wrap Up

## 3.2 Web and CATI Data Collection Procedures

Data collection for the 2012 Update consisted of three distinct phases. The first phase began on June 15, 2012, with a 3-week, web-only data collection effort. The second phase consisted of outbound CATI calls, which were placed to nonresponding sample members. After 3 weeks of the second phase, the third data collection phase began, which consisted of targeted nonresponse follow-up. Either the parent or student could complete the 2012 Update questionnaire at any point during the data collection period.

The first phase of data collection—a 3-week, self-administered, web interview period—began on June 15, 2012, after an initial contact packet was mailed to all student and parent sample members. The initial contact packet consisted of a study brochure and a letter, which included the 2012 Update website address, a unique study ID and password, and a request that the sample member complete a self-administered interview on the Web. Parents were informed that the initial contact packets had been sent to the student, and students were informed that their parents had also been sent the initial contact letter. Additionally, the student letters provided instructions to call the help desk in the event that the student did not want his or her parent to be

contacted during the 2012 Update. Initial contact packets were sent to 739 of the 754 students and parents included in the sample. Study materials were not sent to 15 cases lacking valid contacting information for both student and parent sample members. The letters asked the students and parents to log into the study website using the unique login credentials. During the first phase, survey data were primarily collected via the Web instrument; however, CATI interviews were completed if requested by sample members during inbound calls.

Three weeks after the initial contact mailing was sent, the second phase of data collection commenced. In this phase, TIs began placing calls to nonresponding cases. When the interviewers made contact with a household, they attempted to complete the CATI interview with either the student or parent, depending on who was available at the time of the call. Sample members continued to have the option of completing a self-administered questionnaire on the Web throughout the entire data collection period. The third phase, which added a responsive design approach to target nonrespondents after the first 6 weeks of data collection, is described in section 3.2.1.

Some students were still minors during the 2012 Update data collection period. Therefore, parental permission was required before a minor could participate. If a student was a minor, study materials were only sent to parents until parental permission had been obtained. Parents were given several options to provide their permission:

1. Contacting materials sent to the parent also included a second sealed envelope that contained student contacting materials. The parent letter instructed parents to give the enclosed envelope to the students, thereby indicating that they granted their permission to the student.
2. Parent contacting materials instructed parents to log into the study website to provide their permission online, as needed.
3. When a parent deferred participation to a minor student, the TI attempted to gain parent permission. Immediately after gaining parent permission, the interviewer asked to speak with the student to conduct the interview at that time. If the student was not available, the interviewer made an appointment to conduct the interview at a time when the student would be available.
4. If the questionnaire was completed by a parent of a minor student and also selected for a cross-validation reinterview, the parent was prompted to provide permission for the student reinterview at the end of the 2012 Update questionnaire.

After parent permission was granted, all subsequent phone calls, letters, and e-mails were sent to both the student and the parent until the interview was completed. Mailings were sent to nonresponding sample members every 3 weeks, while e-mail reminders were sent every 10 days.

### 3.2.1 Responsive Design-based Approach to Targeting Nonrespondents

The 2012 Update field test used a responsive design methodology to strategically target nonresponse cases that could potentially contribute to bias if they remained nonrespondents. To address the possible source of nonresponse bias in the 2012 Update sample, the responsive design included generating a Mahalanobis distance function score (a regression-based approach that predicts response propensity) for nonresponding cases to rank them in terms of their overall difference from existing respondents. The Mahalanobis distance function is a case-level measure that can be defined simply as the distance between the value for a single nonresponding case and the mean value for all responding cases. For the 2012 Update, larger distance scores indicate cases likely to be dissimilar from existing respondents. That is, because of the variables used in the calculation of the Mahalanobis distance (see figure 3 below), these cases would be characterized by notable differences in model variables.

**Figure 3. Variables used for calculation of Mahalanobis distance**

Source	Variables
Survey data	Student enrollment status at first follow-up
Sample frame data	School type Metro area Race Sex
Paradata	Whether sample member contacted the help desk Whether sample member logged in but did not complete the 2012 Update questionnaire Number of contact attempts in the early data collection period Whether sample member made an appointment to complete the interview Whether sample member told interviewer he or she would do the web interview Student base-year and first follow-up response outcomes Parent base-year and first follow-up response outcomes Parent response in the panel maintenance update Reason for prior student nonresponse (refusal, absent) if applicable Call counts in base year and first follow-up

SOURCE: U.S. Department of Education, National Center for Education Statistics. High School Longitudinal Study of 2009 (HSLS:09) 2012 Update.

As used in the 2012 Update field test, the Mahalanobis distance function determines a likelihood of ultimate response among current nonrespondents. Therefore, paradata (e.g., prior-round response outcomes, results of prior contacts) are useful to include with substantive data (e.g., survey variables and analytic variables) in the case selection process, because of their effectiveness in predicting response outcomes. When targeting cases during nonresponse follow-up, it is most efficient to select nonrespondent cases that differ from respondents across many variables, rather than a single variable. In theory, this nonresponse follow-up approach will target cases that have the greatest potential for bias reduction, because it selects cases that are the most different from existing respondents.

### 3.2.2 Help Desk

The 2012 Update data collection used a help desk to assist sample members to resolve problems accessing the web interview, answer questions about the study, and give sample members log-in information. Sample members could contact help desk agents via a toll-free telephone number or e-mail. All contacting materials sent to parents and students included both methods of contacting the help desk.

The primary reason sample members contacted the help desk was to request their password, study ID, or both. If a sample member called for a technical problem that was not resolved within 5 minutes, help desk agents offered to conduct a telephone interview with the sample member.

### 3.2.3 Interviewer Monitoring

Call center supervisory staff conducted live monitoring, which allowed supervisors to oversee TIs in real time. This ensured that interviewers were following scripts, coding responses accurately, and conducting interviews in a professional manner. Each call placed by an interviewer was also recorded, which provided supervisory staff and project staff the flexibility to monitor when time was available. Approximately 5 percent of the cumulative interviewing hours (including activities other than conducting interviews, as listed in section 3.2) were monitored via both live and recorded interviews. Additionally, RTI project staff monitored recorded interviews for quality assurance purposes.

### 3.2.4 Quality Circle Meetings

Weekly Quality Circle (QC) meetings were held during the first 2 months of data collection, and then biweekly thereafter. The QC meeting established a direct line of communication between telephone interviewers and project staff. QC meeting topics included using successful techniques for gaining participation, avoiding and converting refusals, and getting feedback from interviewers about data collection issues. Notes from each meeting were made available for all interviewers and supervisors so that those who were not at the meeting could be kept informed.

### 3.2.5 Cross-validation Reinterviews

The 2012 Update data collection design allowed for either the sampled student or a parent to respond to the questionnaire. A cross-validation analysis was conducted to measure the reliability of responses between parents and students. To sufficiently assess the reliability between student and parent respondents, the initial interview and the validation reinterview used the same instrument. At the end of the initial interview, student respondents were informed that their parent would also be asked to complete the questionnaire as part of the validation reinterview. Similarly, parent respondents were informed that the student sample member would

also be asked to complete the questionnaire. Sections 4.4.1 and 4.4.2 of this field test report include discussions about the purposes, methods, and results of the validation reinterviews.

### 3.3 Data Collection Results

The 2012 Update data collection began on June 15, 2012, and concluded on October 31, 2012. The 2012 Update questionnaire was designed to be completed by the student—or a parent or guardian of the student—in approximately 20 minutes (see chapter 4 for a timing analysis of the questionnaire).

#### 3.3.1 Results by Respondent Type and Mode of Data Collection

Table 1 shows unweighted response rates by respondent type and mode. A total of 514 questionnaires were completed for the 2012 Update for a 68 percent response rate. Of all completed questionnaires, 292 (57 percent) were completed by students and 222 (43 percent) were completed by parents. Approximately 58 percent of the questionnaires were completed via self-administered Web mode, while 42 percent were completed via telephone interviewer.

**Table 1. Responses by 2012 update respondent type and mode: 2012**

	Questionnaire responses	
	Number	Percent
Total sample	754	100.0
2012 Update response status		
Nonrespondents	240	31.8
Respondents	514	68.2
Respondent type		
Students	292	56.8
Parents	222	43.2
Mode of data collection		
Web	300	58.4
Computer-assisted telephone interview	214	41.6

SOURCE: U.S. Department of Education, National Center for Education Statistics. High School Longitudinal Study of 2009 (HSLS:09) 2012 Update.

#### 3.3.2 Results by Prior-round Response Status

The 2012 Update field test sample was made up almost entirely of students who had responded to the HSLS:09 base-year field test data collection, first follow-up field test data collection, or both. Although inclusion in the 2012 Update was based on prior student response, either the student or the parent could complete a 2012 Update questionnaire and, together, the student and parent pair constituted a single “case.”

Table 2 presents the results of the 2012 Update by prior student response status.<sup>2</sup> Approximately 90 percent of the 2012 Update sample had a completed student questionnaire from the base-year data collection. Of the cases that responded to the 2012 Update, 69 percent of associated students had responded in the base year, and 60 percent were base-year nonrespondents. Similarly, some 75 percent of the cases in the 2012 Update sample completed a student questionnaire for the first follow-up data collection. A 2012 Update questionnaire was completed for 77 percent of the first follow-up student respondents and 40 percent of first follow-up student nonrespondents. Overall, 495 of the 754 cases (66 percent) in the 2012 Update sample had students who responded to both the base-year and first follow-up field test data collections. Of those 495 cases, almost 80 percent of these 495 cases had a 2012 Update questionnaire completed by either a student or parent sample member.

**Table 2. Response outcomes by prior-round student response status: 2012**

Prior-round student response status	Outcome in 2012 Update field test			
	Overall		Number interviewed <sup>1</sup>	Percent interviewed <sup>1</sup>
	Eligible sample	Percent of total eligible		
Total sample	754	100.0	514	68.2
Base year				
Respondents	681	90.3	470	69.0
Nonrespondents	73	9.7	44	60.3
First follow-up				
Respondents	566	75.1	438	77.4
Nonrespondents	188	24.9	76	40.4
Double respondents	495	65.6	394	79.6
BY respondent/F1 nonrespondent	186	24.7	76	40.9
BY nonrespondent/F1 respondent	71	9.4	44	62.0
Double nonrespondents	2	0.3	0	0.0

<sup>1</sup>Number and percent interviewed includes 2012 Update questionnaires completed by both student and parent sample members.

NOTE: BY = base-year; F1 = first follow-up.

### 3.3.3 Results of the Responsive Design Implementation

Student and parent sample members completed a total of 209 questionnaires within the first 6 weeks of data collection. Of the remaining 545 cases in the sample, the 375 that were most unlike the 209 respondents were given a \$5 prepaid incentive with the promise of an additional

<sup>2</sup> Although either the parent or student could complete the 2012 Update questionnaire, results are discussed in terms of student, because the focus of the questionnaire was on the student sample members.

\$10 incentive to be paid after the questionnaire was completed. Results of the phase 3 responsive design approach are presented in table 3.

**Table 3. Response rates during the responsive design phase: 2012**

	Eligible cases <sup>1</sup>	Respondents	
		Number	Percent
Total	545	305	56.0
Incentive offered	375	205	54.7
No incentive offered	170	100	58.8

<sup>1</sup> Some 209 cases were completed during the early Web and early computer-assisted telephone interview data collection phases. The remaining 545 nonresponding cases were considered for the responsive design targeted intervention: a \$5 prepaid incentive with an offer for an additional \$10 upon completion of the interview.

SOURCE: U.S. Department of Education, National Center for Education Statistics. High School Longitudinal Study of 2009 (HSL:09) 2012 Update.

Table 4 provides a breakout of the respondents during the responsive design phase by respondent type and response mode. Student sample members completed questionnaires for approximately 55 percent of the incentivized cases and 44 percent of the nonincentivized cases. Incentivized and nonincentivized cases were completed via the Web at 53 percent and 54 percent, respectively.

**Table 4. Response patterns among completed cases during phase 3 by respondent type and mode of data collection: 2012**

	Total respondents <sup>1</sup>	Incentive offered		No incentive offered	
		Number	Percent	Number	Percent
Total respondents <sup>1</sup>	305	205	100.0	100	100.0
Respondent type					
Students	157	113	55.1	44	44.0
Parents	148	92	44.9	56	56.0
Mode of data collection					
Web	162	108	52.7	54	54.0
Computer-assisted telephone interview	143	97	47.3	46	46.0

<sup>1</sup> Some 209 cases were completed during the early Web and early computer-assisted telephone interview data collection phases. The remaining 305 respondents participated during the responsive design phase.

SOURCE: U.S. Department of Education, National Center for Education Statistics. High School Longitudinal Study of 2009 (HSL:09) 2012 Update.

As described in section 3.2.1, the method used to calculate the Mahalanobis distance scores indicates that the cases with the highest distance scores should also be those cases that are most difficult to complete. Therefore, the nonresponding cases predicted to be the most difficult to complete were targeted to receive an incentive during phase 3. The goal of the incentive was

to increase the likelihood of response for the 375 targeted cases to reduce the potential for nonresponse bias in key survey estimates.

Because an experimental design was not possible because of the small sample size, it is not possible to estimate the effects of the incentive. However, key survey estimates were examined for indications of reduced nonresponse bias resulting from the phase 3 intervention. Survey estimates were calculated for several subgroups of cases, which included

- nonrespondent cases targeted during phase 3;
- nonresponding cases not targeted during phase 3; and
- all eligible, responding cases in the sample.

Unweighted survey estimates were also calculated for five key variables: (a) earned a high school diploma, (b) taking classes at a college or university, (c) applied to postsecondary institution(s), (d) completed a Free Application for Federal Student Aid (FAFSA), and (e) currently working. Table 5 displays these survey estimates.

**Table 5. Unweighted survey estimates for respondent in phase 3 and overall: 2012**

Variable	Phase 3 targeted cases (n = 205)	Phase 3 non targeted cases (n = 100)	Overall estimate (n = 514)
Earned a high school diploma	84.4	95.0	91.6
Taking classes at a college or university	67.8	87.0	79.8
Applied to postsecondary institution(s)	35.6	56.0	49.4
Completed a Free Application for Federal Student Aid	62.0	79.0	70.4
Currently working	53.7	41.0	46.5

SOURCE: U.S. Department of Education, National Center for Education Statistics. High School Longitudinal Study of 2009 (HSLS:09) 2012 Update.

Although the Mahalanobis distance function identified cases that were different from cases completed in phases 1 and 2, the targeted cases also appear to be different in their responses to the 2012 Update questionnaire from the cases not targeted in phase 3. The examination of the survey estimates shows that the targeted respondent set was less likely to have earned a high school diploma, less likely to be taking college or university classes, less likely to have applied to a postsecondary school, less likely to have completed a FAFSA, but more likely to be working. Therefore, the inclusion of these targeted cases may ameliorate nonresponse bias in these key survey estimates. Examining these estimates also suggests that the high-distance cases were a good choice of nonresponding cases to target. Although the survey estimates for the targeted cases look different from the overall survey estimates, the nontargeted phase 3 nonrespondents look more similar to the overall survey estimates. Therefore, targeting the latter set of cases would simply have brought into the respondent pool cases that look similar to those who have already been interviewed, a nonresponse follow-up scenario that is not advisable (Schouten, Cobben, and Bethlehem 2009).

### 3.4 Automated Systems and Procedures

Systems and processes used in the HSLs:09 2012 Update were designed and developed to test and identify areas of improvement in preparation for the main study. The smaller scope of the field test provides opportunities to test new systems and processes, which can provide greater efficiencies in the main study. The following major systems used for the field test are described in this section:

- Integrated Management System (IMS)—a comprehensive tool used to exchange files between RTI and National Center for Education Statistics (NCES), and to provide access to a centralized repository of project data and documents.
- Survey Control System (SCS)—the central repository of the status of each activity for each case in the study.
- Hatteras Survey Engine and Survey Editor—a web-based application used to develop and administer the 2012 Update questionnaire.
- Computer-Assisted Telephone Interview Case Management System (CATI–CMS)—a call scheduler and case delivery tracking system for parent telephone interviews.
- HSLs:09 sample member website—the sample member website hosted at NCES and used to disseminate study information, collect sample data, and administer the 2012 Update questionnaire.

Systems were developed using the full system development life cycle process. Each system makes necessary safeguards to handle personally identifying information (PII). Systems such as IMS, Hatteras, and SCS are standard RTI systems used successfully in prior rounds of HSLs:09 and other studies, and were developed using the latest software tools such as Microsoft .NET and Microsoft SQL Server database.

Processing of PII by all systems was developed in accordance with the Federal Information Processing Standards (FIPS) moderate security standard. Movement of the data containing PII was handled appropriately, meeting the security requirements between the locations. Data when moved between locations were encrypted, which met the FIPS 140.2 standards, and were decrypted once they successfully reached the destination. The automated systems were developed to handle the need of moving data and files between locations in an efficient and secure way.

#### 3.4.1 Integrated Management System

The IMS is a web-based system that provides project management tools to give project staff and NCES ready access to a repository of reports and other project information and deliverables. The IMS website provides online, instant access to project management tools, such as the current project schedule, monthly progress reports, daily data collection reports and status reports, and project plans and specifications.

### **3.4.2 Survey Control System**

The SCS was designed to manage processes at multiple levels of study participation and relationships across levels. The SCS is the main engine that controls various data collection tasks, and functions as the central information system that receives information from all other systems managing various data collection process.

### **3.4.3 Hatteras Survey Engine and Survey Editor**

Hatteras is the web-based system in which project staff developed, reviewed, tested, modified, and communicated changes to specifications and code for the 2012 Update field test instruments. Hatteras provided tools to administer the same instrument in multiple modes (i.e., web and CATI). Hatteras provided specification, programming, and testing interfaces for the 2012 Update field test instruments.

### **3.4.4 CATI-CMS**

The CATI-CMS facilitated the telephone-based survey of parents and students. The CATI-CMS is a comprehensive system that manages all aspects of telephone-based data collection by connecting the various components of the CATI system, including the questionnaire, utility screens, databases, call scheduler, report modules, links to outside systems, and other system components. The CATI-CMS facilitated an efficient way to conduct situations where both parent and student interviews were needed and situations where only parent permission was needed for student interviews.

### **3.4.5 HSLs:09 Sample Member Website**

The HSLs:09 sample member website, which was hosted at NCES, has acted as the main source for information to state/district/school staff, parents, and students about HSLs:09. The website provided an option for parents to update their locating information. Parents and students used the HSLs:09 website to log into and complete the 2012 Update questionnaire.

## Chapter 4.

# Data Quality Analysis for 2012 Update

Chapter 4 summarizes the various analyses employed in the evaluation of the field test items. There are four subsections: analysis of item distributional properties, item nonresponse and “don’t know” rates, timing, and validation across different respondent types (e.g., agreement of student and parent reports).

Specifically, section 4.1 addresses *item distributional properties*. The minimal distributional criterion for any item is that it exhibit nonzero variability. Beyond that, analysts typically assess whether the response categories that the instrument designers anticipated needing are in fact selected with sufficient frequency to justify a category’s standing alone (as contrasted to being collapsed with an adjacent category). Conversely, if a category is quite frequently selected, it may be best to divide it into two categories to make finer distinctions among respondents. Additionally open-ended field test items may also be converted to close-ended response options, based on the field test distributions.

Section 4.2 examines item response rates based on illegitimate skips or high rates of “don’t know.” Data marginal distributions were examined in order to identify item response problems. Relatedly, in addition to rates of illegitimate skips, rates of “don’t know” response need to be evaluated, to determine whether they reflect poor item construction or inappropriateness for the respondent population (i.e., reflect lack of information on the respondents’ part), or whether, in contrast, lack of information is in fact a meaningful datum within the research context of the study.

Section 4.3 investigates timing, both at the individual level and overall for the instrument. Section 4.4 looks at cross-validation issues, that is, whether, on factual matters, student respondents and parent respondents agree.

### 4.1 Analysis of Response Distribution and Variance

Most of the questions in the 2012 Update questionnaire are factual questions where skew in the response distribution may simply reflect actual experiences. For example, one would expect the distribution of high school credentials to be highly skewed toward high school diplomas. These instances are expected and not problematic. On occasion, however, a response pattern to a factual question suggests that respondents are misinterpreting the question. These instances are discussed below. This section of the Field Test Report will also address the matter of response distributions to questions that are subjective in nature, and for which student and parent responses therefore may not be interchangeable.

One noteworthy pattern was a high rate of “don’t know” responses to the questions about financial aid. Although it is sometimes suggested that instruments should not ask questions that

respondents cannot answer, in this case the respondents' lack of information is in and of itself noteworthy for public policy. Therefore, rates of "don't know" response are mentioned for these items, but are not necessarily problematic for the instrument's design.

The discussion is partitioned by section headings indicating the screen on which the survey question was located. Results are summarized for unproblematic items and recommendations for revision are made for problematic items.

### **CUANYDUAL**

The percentage of respondents who reported college course enrollment other than Advanced Placement (AP) and International Baccalaureate (IB) was 13.6 percent for science, 17.3 percent for math, and 33.8 percent for all other subjects. These percentages suggest the possibility that in some instances respondents may be including AP or IB courses. Therefore, for the main study instrument, the recommendation is to ask about AP courses, IB courses, and all other college courses separately to help respondents parse their answers and provide more complete data for analysts.

### **CUFALL2012**

More respondents than expected (6.9 percent) indicated that the teenager would be receiving a form of training that was not listed. Upon review of the "other specify" responses to this item, it was clear that respondents were reporting specific fields of training or reporting a type of training that could be categorized within one of the existing categories. Therefore, it is recommended that the item asking for unlisted forms of training be eliminated (alternatively, if space is not an issue, the item could be retained with elimination of "other specify").

Also, a higher percentage of respondents than expected (6.2 percent) reported studying for an industry certification or license. It may be that this item is being misinterpreted to include any type of occupational training.

### **CUNOFAFSA**

This question asks respondents for the reasons that they did not complete a Free Application for Federal Student Aid (FAFSA). Seven reasons were offered. The percentage of positive responses ranged from 44.0 percent for the "can afford school or college" item to 8.1 percent for the "too much work or too time-consuming" item.

### **CUNOQUALRSN**

Respondents who indicated that they did not apply for financial aid because they did not think they would be eligible or qualify were asked why they believed that. Six items were offered. The percentage of positive responses ranged from 69.7 percent for the "income is too high" item to 9.7 percent for the "concerns about a credit score" item.

## **CUAPPFAFSA**

This question asks respondents if they completed a FAFSA. Almost 10 percent did not know; 4.6 percent indicated that they did not know what a FAFSA was and another 4.6 percent did not know if one had been completed.

## **CUAPPOTHAID**

This question asked respondents if they had completed any other financial aid applications besides the FAFSA. Almost 20 percent did not know (18.1 percent). This item either needs to be clarified or eliminated.

## **CUAIDFALLCLG and CUAIDCHOICE**

CUAIDFALLCLG asked respondents what types of financial aid they were offered to attend the college that the teenager would be attending in the fall. The percentage of don't knows ranged from 32.2 percent for "Stafford loan" to 12.5 percent for "other type of scholarship or grant."

CUAIDCHOICE asked respondents what types of financial aid they were offered to attend their first choice college if that college was not the one that they were attending. The percentage of don't knows ranged from 39.6 percent for "Stafford loan" to 10.0 percent for "other type of scholarship or grant."

Taken together, the high percentage of "don't know" responses indicates that respondents are not well informed about the types of financial aid that they were offered. In particular, the relatively low percentages indicating that Stafford loans were received coupled with the high percentage of "don't know" responses suggest that respondents do not know what a Stafford loan is.

## **CUQUALITY**

This question asked respondents about the importance that they placed on various college characteristics when choosing the college they are going to attend in the fall. Eleven college characteristics were offered. Three of the items had very well-balanced responses, with at least 15 percent of respondents selecting each of the three response options: Very important, Somewhat important, and Not at all important. The response distributions of six of these items were highly skewed toward the positive with less than 15 percent of respondents choosing "not at all important": "academic quality or reputation" (3.7 percent), "cost of attendance" (11.6 percent), "a good record of placing graduates in jobs" (10.5 percent), "a good record of placing graduates in graduate or professional schools" (13.5 percent), "a good record of placing graduates in 4-year Bachelor's degree programs" (11.6 percent), and "offers a particular program of study" (12.5 percent). For two items, "Very important" was chosen by less than 15 percent of respondents: "far from home" (13.9 percent) and "opportunity to play sports" (14.5 percent).

### **CUYNOTATTEND**

This question asks respondents who will not be attending a postsecondary institution in the fall why they made that decision. There were nine reasons offered. All but one of the items had well-balanced distributions with at least 15 percent of respondents answering affirmatively to each response option. The one exception was “because you do not want to attend the schools that accepted you” with only 11.1 percent answering “yes.”

### **CUJOBRELATE**

This question asks respondents who are currently employed the degree to which their job is related to the job that they want to have when their education is completed: closely related, somewhat related, and not at all related. The response distribution for this question is skewed toward “not at all related” with nearly three-quarters selecting that option (72.6 percent). Nonetheless, this response distribution is expected, given that most of the teenagers had just completed high school at the time of the interview.

### **CUAPPRENTSHIP**

This question asks respondents if their current job is a formal apprenticeship. Close to one-fifth of respondents (17.8 percent) indicated that they were working as an apprentice, which is much higher than the expected percentage. The definition of an apprenticeship provided in the question wording should be refined if this question is to be included in the main study instrument.

### **CUHOWGOTJOB**

The percentages of students who reported getting their job through a high school–arranged program (1.3 percent) and with assistance from the school (3.6 percent) are very low but may reflect actual experiences.

### **CUHSCOUNSEL**

This question asked respondents how well their high school counselor prepared them to gain admission to a college or university, to apply for financial aid, and to find a job. The response options were Extremely well, Somewhat well, Not well, Not at all, and Don’t know. The responses were positively skewed for gaining admission to college and applying for financial aid and negatively skewed for finding a job.

## **4.2 Analysis of Levels of Item Response Rates**

The item response rates in the field test instrument were generally very high, averaging 95 percent (table 6). A cutoff of 85 percent was used, in accordance with National Center for

**Table 6. HSL:09 field test 2012 update item response rates**

Variable	Description	Number responding	Number administered	Item response rate
CUHSCRED	Earned high school credential and credential type	639	639	100.0
CUHSCREDMO	Month high school credential awarded	597	603	99.0
CUHSCREDYR	Year high school credential awarded	599	603	99.3
CUENROLLHS12	High school enrollment status	35	36	97.2
CULASTHSMO	Month last attended high school	16	18	88.9
CULASTHSYR	Year last attended high school	16	18	88.9
CULASTHS	Last attended BY school, F1 school or another school	638	639	99.8
CULASTHSNAME	Name of high school last attended	58	58	100.0
CUOTHHS	Has attended any other high school besides BY school & most recent	633	639	99.1
CUOTHHSNAME	Name of first other high school attended	32	32	100.0
CUOTHHSCOD	CCD or PSS code of first other high school	32	32	100.0
CUOTHERHS	Attended any other high schools	30	32	93.8
CUOTHHSNAME_2	Name of second other high school attended	7	8	87.5
CUOTHHSCOD_2	CCD or PSS code of second other high school	7	8	87.5
CUOTHERHS_2	Attended any other high schools	7	8	87.5
CUOTHHSNAME_3	Name of third other high school attended	3	3	100.0
CUOTHHSCOD_3	CCD or PSS code of third other high school	3	3	100.0
CUOTHERHS_3	Attended any other high schools	3	3	100.0
CUDUALMATH	Has taken a math course for college credit	586	638	91.9
CUDUALSCIENCE	Has taken a science course for college credit	579	638	90.8
CUDUALOTHER	Has taken a course in another subject for college credit	615	638	96.4
CUCLGUNIV	Taking classes at a college or university in fall 2012	634	637	99.5
CUOCCSCHOOL	Taking classes at a school for occupational training in fall 2012	619	637	97.2
CUCERTLIC	Studying for an industry certification or license in fall 2012	617	637	96.9
CUAPPRENTICE	Participating in an apprenticeship program in fall 2012	616	637	96.7
CUOTHTRAIN	Receiving another form of training in fall 2012	613	637	96.2
CUWORK	Working in fall 2012	622	637	97.7
CUMILITARY	Serving in the military fall 2012	618	637	97.0
CUFAMILY	Starting a family or taking care of children in fall 2012	618	637	97.0
CUHS	Attending high school in fall 2012	35	36	97.2
CUGEDCOURSE	Attending a GED completion course in fall 2012	35	36	97.2
CUFOCUS	Teenager's main focus in fall 2012	294	300	98.0
CUBACHELOR	Enrolling in Bachelor's degree program	542	544	99.6
CUAABA	Enrolling in Associate's degree program-plans to transfer to BA/BS	542	544	99.6

See notes at end of table.

**Table 6. HSLS:09 field test 2012 update item response rates—continued**

Variable	Description	Number responding	Number administered	Item response rate
CUAANOBA	Enrolling in Associate's degree program-no plans to transfer to BA/BS	542	544	99.6
CUCERTPROG	Enrolling in certificate/diploma program at school providing occupational training	542	544	99.6
CUNOPROG	Not enrolling in program, just taking classes	542	544	99.6
CUOTHPROG	Enrolling in another type of program	542	544	99.6
CUDK	Don't know what type of program will enroll in	542	544	99.6

SOURCE: U.S. Department of Education, National Center for Education Statistics. High School Longitudinal Study of 2009 (HSLS:09) 2012 Update.

Education Statistics (NCES) standards (unit or item response rates less than 85 percent must be evaluated for the potential magnitude of nonresponse bias [Seastrom 2003]). Only nine items had a response rate less than 85 percent (see shaded rows).

Several of these were items located at the bottom of a list of choices on a screen (CUNOQUALOTH, CUFLOTHAID, CUFLNOAID, and CUCHOTHAID). They asked the respondent to either indicate if there was anything else that applied to their situation or to

indicate that none of the options applied to their situation. The relatively low rates of item response for these items are typical for items of this type and reflect respondent satisficing behavior.

Most of the other items were just shy of the 85 percent response rate and related to financial aid, college costs, and financing (CUCHPELL, CUFALLBORROW, CUCOSTCHOICE, CUHCBORROW, and CUHCSCHOLAR). It is likely that nonresponse to these items is indicative of respondents' uncertainty. Therefore, the recommendation is to add an explicit "don't know" option on these screens for the main study instrument.

The two variables with the lowest response rates were the ones that held the 2-digit and 6-digit Occupational Information Network (O\*NET) occupation codes that were assigned when the occupation coding application was used to code the teenager's expected job on November 1 (CUJ2OCC2 and CUJ2OCC6). All respondents who were administered the question provided a job title and job duties (CUNOV1JOBTTL and CUNOV1JOBDDUT), but only 61 percent selected a detailed 6-digit O\*NET code and 65 percent selected a general 2-digit O\*NET code for the occupation. The comparable rates for the current job (CUJ1OCC2 and CUJ1OCC6) were 94 percent for both the detailed and the general O\*NET code.

### **4.3 Analysis of Timing**

On average, the 2012 Update instrument took 16.8 minutes to complete, slightly longer than the targeted 15 minutes. Excluding the informed consent and introduction screens, there were 62 screens in the instrument. The average time spent on these screens was 29 seconds; the median was 25 seconds. There were nine screens that required textual responses to be coded. All of these screens took longer than average with completion times ranging from 40 seconds to 81 seconds. Providing contact information for the teenager and the parent required 68 seconds and 75 seconds, respectively. Several other screens took more than 1 minute to complete because they had multiple items. These included reasons for choosing a college (74 seconds), reasons for not going to college (65 seconds), and reasons for not applying for financial aid (62 seconds).

## **4.4 Purposes and Method of the Student-parent Cross-validation Interview**

### **4.4.1 Validity as Student-parent Agreement**

The 2012 Update interview was designed to be administered to either the teenage sample member or one of his or her parents. When selecting items for the instrument, preference was given to factual questions that could be answered by either the teenager or the parent and had the highest likelihood of consistent teenager-parent responses. However, some substantively important questions that were subjective in nature were included as well.

To evaluate consistency of responses, the complete field test interview was conducted with both the student and one of his or her parents for 112 pairs. At the beginning of the data

collection cycle, student and parent respondents who reached the end of the interview were asked to provide contact information for the other so RTI could follow up. Student-parent pairs were recruited regardless of the mode of the first interview, self-administered web interview, or computer-assisted telephone interview. RTI then attempted to contact and interview the other or encourage completion by web. When a sample of sufficient size to yield at least 100 pairs of completed interviews had been achieved, participants were no longer recruited.

Two statistics were examined to evaluate the degree of consistency between the student and parent responses: percentage agreement and percentage answering “don’t know.” The process for deriving each of these is discussed next. A discussion of the results follows in section 4.4.2.

Before the percentage agreement was calculated for a variable, cases with a “don’t know” response or a nonresponse to the question were eliminated from the analysis. In other words, both the student and the parent had to have a response other than “don’t know” to be considered a valid pair for comparison. Additionally, continuous variables were categorized and job earnings were calculated from the dollar amount provided and the earnings unit. Also, when questions pertained to a particular institution named by the respondent, care was taken to only compare responses when the institutions named by the student and the parent were the same. When the two respondents listed the same schools but in a different order, the responses were matched up by institution before comparison.

Many of the items in the 2012 Update provided an explicit “don’t know” option for students and parents. However, students and parents who did not know may have also left the question unanswered. Therefore, for the comparison of the percentage of “don’t know” responses, both explicit and implicit forms of “don’t know” were counted. Cases where an item was legitimately skipped based on instrument routing were excluded from the analysis.

#### **4.4.2 Summary Statistics and Findings From Student-parent Cross-validation Interview**

Results from analysis of the student-parent cross validation interview are presented for each 2012 Update variable in table 7 below. The table presents the number of valid student-parent pairs, the percent of agreement within valid pairs, and the percent of students and parents who either answered with a “don’t know” category, or left the item missing. Discussion of rates of agreement appears first followed by discussion of rates of “don’t know” and missing responses.

In summary, 106 variables had sufficient and appropriate data to conduct an analysis (table 7). Among these variables, 41 percent (43 variables) had very good or excellent agreement with at least 85 percent of valid pairs giving the same answer. About one-third of the variables (36 variables) had moderate agreement with between 70 and 84.9 percent of valid pairs in agreement. The remaining one-quarter of the variables (27 variables) had relatively poor rates of

**Table 7. Percent agreement of valid pairs and percent of students and parents who did not answer item**

Variable name	Variable label	Number of valid pairs	Percent agreement of valid pairs	Percent of respondents who answered don't know or did not answer

consistency with less than 70 percent in agreement. The discussion that follows will focus on variables that had moderate and relatively low rates of agreement (less than 85 percent agreement).

The retrospective questions about high school and the general questions about the teenager's planned activities for the fall (see CUHSCRED–CUWORKFT) had the highest rates of consistency overall. However, the question about dual enrollment (see CUDUALMATH–CUDUALOTHER) did not perform as well, suggesting that respondents may have been confused about what types of courses to include and exclude. The question about plans for the fall (see CUCLGUNIV–CUGEDCOURSE) had two items that did not perform quite as well as the others. For one item (CUOCCSCHOOL), the terminology “school for occupational training” may have been a source of confusion. For the other (CUWORK), it may be that “working” was ambiguous because it did not specify to exclude unpaid jobs. Answers about the teenager's intended major for the fall (CUMAJORGEN01) were also consistent less often than answers to most of the questions in this block of questions. This is most likely because of the question's hypothetical nature.

Generally, the questions about college applications and acceptances (see CUAPPCLG–CUCHOICEACC) had excellent or moderate rates of agreement. Roughly one-quarter of the valid pairs disagreed on whether the teenager had applied to or registered at a college (apart from the one selected for enrollment, if applicable) (CUAPPCLG). Although about 30 percent of the valid pairs differed in the reported number of college applications (CUCLGAPPNUM), the responses were almost always off by only one. The names of the two colleges applied to or registered at (apart from the one selected for enrollment, if applicable) differed for 19 percent of the valid pairs for the first college named (CUAPP1IPEDS) and 42 percent for the second college named (CUAPP2IPEDS). The analysis accounted for instances where respondents named the colleges in a different order. When respondents had more than two colleges to report in these questions, they were asked to report on the colleges most seriously considered. It appears that in some cases teenagers and their parents have different judgments about the degree of consideration given to colleges in the pool. The fact that 28 percent of valid pairs disagreed on which college was the teenager's first choice of those applied to (CUCHOICEAPP) may also be indicative of somewhat different perspectives of teenagers and their parents about college choice.

Most of the questions about financial aid and college costs (see CUAPPFAFSA–CUCHCSCHOLAR) had moderate rates of agreement. Fortunately, the lead-in question, which asked whether the family had completed a FAFSA (CUAPPFAFSA), was answered consistently by almost all valid pairs (97 percent). Some of the items that did not fare quite as well were among subjective questions that asked for reasons for not applying for financial aid (see CUNODEBT–CUNOQUALOTH), knowledge questions about the specific types of financial aid received (see CUFLSTAFFORD–CUAIDANYCLG), and financial questions that asked for estimates of enrollment costs, scholarship and grant money received, and loan amounts (see

CUCOSTFALLCLG–CUCHCSCHOLAR). Given the policy relevance of these questions, a moderate level of agreement is likely to be acceptable.

Many of the subjective items about the teenager’s reasons for choosing his or her college (CUREPUTATION–CUSOCIALLIFE) and reasons for not going to college (see CUDISLIKE–CUOTHRSN) had relatively low rates of agreement. However, selected items in each of these questions performed well. NCES may wish to consider reducing the set of items to those that performed best.

The performance of the questions about the teenager’s employment varied (see CUJOBNOW–CUJ2OCC2). Five had excellent rates of agreement, three had moderate rates of agreement, and three had relatively low rates of agreement. The first two questions asked whether the teenager was working for pay (CUJOBNOW) and, if so, what his or her job was (CUJ1OCC2). Each question had consistent responses for almost three-quarters of valid pairs. Relatively low consistency was achieved for the question that asked if the job was an apprenticeship (CUAPPRENTSHP), most likely because of confusion about what an apprenticeship is. Providing a better definition is recommended. The question about job earnings (CUJOBearn) also had a low rate of agreement, but this may in part be because of assumptions that had to be made to construct a standardized earning estimate. Respondents were allowed to choose the unit in which they reported the earnings. However, the survey did not ascertain how many of those units were worked in a given year. Therefore, standardizations required assumptions such as teenagers whose earnings were reported in weeks worked were assumed to have worked 52 weeks per year. Naturally, these assumptions were not always valid. Adding clarifying questions to the questionnaire may allow for more accurate standardization. Only two pairs were asked to name the job the teenager expected to hold in the fall (CUJ2OCC2), and in both instances, the teenager and the parent disagreed. Given that only two pairs were analyzed, the results must be interpreted with caution. Nonetheless, it may be that the predictive nature of the question is problematic.

The last question in the survey asked respondents to evaluate the high school guidance counselor’s performance along three dimensions (see CUCNSLCLG–CUCNSLJOB). Each of these three items had low rates of response consistency. A less subjective and more fact-based question about the counselor’s involvement may perform better in the context of a data collection design allowing either the student or the parent to participate.

Also examined were the percentages of teenagers and parents who either selected “don’t know” or skipped each item (table 7). Items where either 10 percent or more of teenagers or 10 percent or more of parents answered “don’t know” or skipped the item were flagged for review. In summary, almost half of the items (51 variables) were flagged for review for teenagers, parents, or both. Twenty percent of the items (21 variables) were flagged for review for both teenagers and parents, another 20 percent (21 variables) were flagged for review for parents only, and an additional 8 percent of the items (9 variables) were reviewed for teenagers only. Many of

the questions flagged for both teenagers and parents were questions about the specific types of financial aid received (see CUFLSTAFFORD–CUCHNOAID with the minor exception of CUCHOTHGRANT), and financial questions that asked for estimates of enrollment costs, scholarship and grant money received, and loan amounts (see CUFALLBORROW and CUCOSTCHOICE–CUHCSCSCHOLAR). This analysis suggests that many teenagers and parents are not well informed about financial aid, a finding with important policy implications. Among the other variables identified for both teenagers and parents were items about whether the teenager would be working in the fall (CUWORK) and what job he or she would hold (CUJ2OCC2). It appears that plans for working are less defined than plans for schooling.

Items that were flagged for review for parents only included subjective items asking about the reasons for not applying for financial aid (CUNODEBT–CUNOQUALOTH), choosing a particular college (CUFARHOME–CU4YRBAPLC), and not attending college (some items in the CUDISLIKESCH–CUOTHRSN series). Items pertaining to job earnings (CUJOBearn) and job counseling (CUCNSLJOB) were also flagged for parents only.

Items that were flagged for review for teenagers only included items on occupational training (CUOCCSCHOOL), industry certification or licensure (CUCERTLIC), and apprenticeships (CUAPPRENTSHP) although parents had relatively high rates of uncertainty as well. Teenagers expressed more uncertainty than parents about whether they would be working full time in the fall (CUWORKFT) and whether a desire to work was a factor in choosing not to go to college (CURATHERWORK). They were also slightly less likely to provide an expected major than parents (CUMAJORGEN01). Finally, although a number of items pertaining to financial aid and college costs were flagged for both teenagers and parents, several were only flagged for students. These were the questions about whether the family had completed a FAFSA (CUAPPFSA), the total cost of the college selected for enrollment (CUCOSTFALLCLG), and the amount of scholarships or grants received to attend that college (CUFALLSCHOLAR).

## Chapter 5.

# Data Collection and Preparation for the High School Transcript Study

The data collection process for the field test transcript collection included identifying the school sample and gaining cooperation from schools to submit student transcripts, course catalogs, and other school information. Procedures associated with these activities are described in this section.

### 5.1 HSLS:09 Field Test Transcript Sample

Transcripts were collected for students sampled as ninth-graders for the base-year field test and who participated in the 2008 base-year field test, the 2011 field test for the first follow-up, or both. The base-year field test sample was a two-stage sampling design with primary sampling units defined as schools selected in the first stage and students randomly selected from the sampled schools in the second stage. Schools were selected from five states: California, Florida, Illinois, New York, and Texas. Further details on the base-year field test sample design may be found in Ingels et al. 2010 (NCES 2011-01).

The base-year field test included 1,035 ninth-grade student participants from 41 schools. A subsample of schools was included in the first follow-up field test, which comprised 24 schools conducting in-school sessions and two schools that did not participate in the in-school session. Among the 26 schools included in the first follow-up field test, 568 of the 826 study-eligible students remaining in the sample participated.

Students were included in the field test transcript data collection if they were sampled from one of the 26 schools included in the first follow-up field test and if they responded in either of the first two field test rounds of HSLS:09. Among students sampled from the 26 schools in the first follow-up field test, 754 participated in either or both prior rounds.

Transcripts were requested from the 26 base-year schools included in the first follow-up field test and any schools attended by the sample members who transferred out of their base-year school. Eighty-three transfer schools were asked to submit student transcripts.

### 5.2 Data Collection Materials

Data collection materials were mailed to schools beginning in October 2012. The initial request for transcripts was sent to the principal in each school (base year and transfer). The materials guided school personnel in the preparation of transcripts and related documents. Each school was asked to provide basic enrollment, testing, and coursetaking information for each student, as well as information about the school's grading and graduation policies/requirements. The information requested included the following:

#### Student-level information:

- Student address
- Participation in specialized programs
- Type of diploma awarded
- Date diploma awarded
- Date student left school (graduation date or final withdrawal date)
- Reason student left school (graduated, transferred, etc.)
- Cumulative GPA
- Standardized test scores and dates taken for the PSAT, SAT/ACT, AP, or SAT subject tests

Coursetaking histories for grades 9 through 12 (plus high school–level courses such as algebra taken before ninth grade):

- Course title and number
- School where course was taken
- Year, grade level, and term course taken
- Number of credits earned
- Grade assigned
- Classification of Secondary School Courses (CSSC) code

#### School-level information:

- Grade scale
- Course grade weighting system used, if any
- Availability of student-level information
- GPA formula
- Term system used
- Course catalogs (if not collected previously)
- Types of diplomas granted
- Credits required for different types of diplomas

The data collection materials also included the following:

- *Cover letter*: Two letters were used: one for schools that participated in the HSLS:09 base year or first follow-up and one for schools that had not previously been contacted regarding participation in HSLS:09.

- *Transcript request memo*: This memo was addressed to the transcript coordinator or registrar and was intended to be used when the principal passed the request along to the appropriate school contact.
- *Instructions for preparing student transcripts*: These instructions provided details on how to complete the school information page, submit student transcripts, and submit course catalogs.
- *Family Education Rights and Privacy Act (FERPA) information*: Provided relevant text for the schools.
- *Disclosure notice*: Federal regulations required that school staff place a copy of a disclosure notice in the school file of each sample member whose transcript was released.
- *Values and use document*: This document provided a summary of the potential benefits and uses of transcript data.

The instructions for preparing student transcripts requested that transcripts be prepared for the students listed on the secure study website. The transcripts could be uploaded via the secure study website, sent as an encrypted attachment by e-mail, faxed to a secure fax number, sent by Secure File Transfer Protocol (sFTP), sent via the SPEEDE Server at the University of Texas at Austin, or sent by FedEx (redacted transcripts). The information about the school's grading and graduation policies/requirements, called the School Information Page (SIP), could be completed online or by hard copy.

### 5.3 Data Collection Procedures

From October 2012 through March 2013, materials were sent to 108 schools. This group included 26 schools that participated in the base year or first follow-up and 82 transfer schools that were first contacted regarding HSLs:09 during transcript data collection.

Research applications were completed for 5 districts (11 schools across the districts). Once research approval was granted from these districts, schools in these districts were contacted.

Student or parent consent to release transcripts was required by 17 schools. For each of these schools, RTI prepared and mailed consent forms to the students (or parents if the student was known to be under age 18 or if the school required parental consent). Consent forms were to be returned directly to RTI, where the consent forms would be uploaded to the secure study website for viewing by the school. Students (or parents if the student was known to be under age 18) were also given the option of providing consent via a secure website. A unique study ID and password were included in the materials mailed to the students (or parents if the student was known to be under age 18). The student could then login to the secure website and grant/deny consent for the release of his or her transcript. Students were also able to provide consent over the phone. The Institutional Contactor (IC) would then log into the secure study website and record whether consent for the release of the transcript was granted. Of the 26 sample members

who attended these schools, 5 students (19 percent) provided signed release forms or gave consent over the phone.

Approximately 1 week after the transcript request materials were sent to the school, a follow-up phone call was made by an IC. Follow-up e-mails were also sent by the IC asking the schools to send the requested materials as soon as possible. An automated e-mail was sent to each nonresponding school approximately 8 weeks after the initial request. Nonresponding schools contacted during the telephone prompting frequently requested that the materials be e-mailed to the school. During the telephone contacts, the ICs also identified any additional requirements the school had for releasing transcripts, such as student or parent consent.

Telephone and e-mail follow-up continued through early March 2013. Additional measures were implemented to ensure an adequate response rate. A follow-up letter was sent via FedEx to the remaining nonresponding schools approximately 6 weeks prior to the end of transcript data collection. ICs made follow-up phone calls within 1 or 2 days of the receipt of the letter. If an IC was not able to speak directly to the transcript coordinator or principal, an e-mail was sent to the transcript coordinator or principal requesting that the information be sent as soon as possible.

### **5.3.1 Transcripts of Transfer Students**

In addition to collecting data from base-year schools, transcript data were collected from the transfer schools of students who left their base-year high school. Transfer students were identified at several points in the HSLs:09 data collection process: the enrollment status update completed by the schools in the fall of 2010; information provided by schools, students, and parents during the first follow-up field test in 2011; and most recently, information received during the 2012 Update.

Once the schools were identified, processing transfer schools involved obtaining information about each school, assigning a school ID, and loading it into the HSLs:09 School Contacting System (SCS). To obtain school contact information for the transfer schools, databases such as the most recent Common Core of Data (CCD) and Private School Universe Survey (PSS) were searched. District and school websites were also used to obtain school contact information. Transcripts were requested from each school attended (thus, transcripts were requested for all students from the base-year school and from transfer schools).

### **5.3.2 Obtaining Consent for Collecting High School Transcripts**

Because the Department of Education, under the Family Educational Rights and Privacy Act (FERPA), has the right to obtain transcripts without prior consent for evaluation purposes, and because RTI informed parents, students, and school personnel of the transcript data collection as part of the base-year and first follow-up data collection/consent activities, the first approach to collecting transcripts was a direct mail request to each school. When ICs contacted schools to prompt for the submission of the transcripts and answer any questions, they also

recorded whether the school had additional consent requirements before the school would release student transcripts. Despite assurances that federal regulations permitted the release of transcripts without student or parent consent, 17 schools or the school's associated district required explicit consent from sample members or their parents/guardians. For sample members who attended these schools, RTI sent a letter and consent form to the students and their parent/guardian informing them that a signed consent form was required for the school to release the transcript to RTI. The letters explained that a parent signature was required if the sample member was under age 18 and a sample member's signature was required for students 18 years of age or older. As previously mentioned, of the 26 sample members who attended these schools, 5 students (19 percent) provided signed release forms or gave consent over the phone.

### 5.3.3 Consent Receipt and Prompting

Incoming consent forms were logged into the Data Receipt System (DRS). A quality control process was established to make certain that the forms contained valid information. During the field test transcript collection, no hardcopy forms were received. Students (or parents if the student was known to be under age 18) were also given the option of providing consent via a secure website. A unique study ID and password were included in the materials. The student/parent could log into the secure website and grant/deny consent for the release of the transcript.

A reminder letter was sent to students and parents to prompt for the return of the transcript explicit consent forms approximately 2 weeks after the initial letter was sent. ICs prompted the students and parents by phone and also sent a reminder e-mail to the student and to the parent if a valid e-mail address was available. Consent prompting was conducted from December 2012 through March 2013.

After explicit consent to release the transcript was received, an e-mail was sent and phone call was made to the school, asking the school to log into the school's secure study website to view the signed consent form or the electronic (time/date stamped) consent.

### 5.3.4 Course Catalog Data Collection

RTI began the collection of course catalogs in the 2010–11 school year as part of the first follow-up data collection activities. Course catalogs were requested for 4 school years covering 2008–09, 2009–10, 2010–11, and 2011–12 and could be submitted either electronically or in hard copy.

During the transcript collection activities, schools were prompted for catalogs that had not yet been collected. ICs combined prompts for catalogs with transcript-related school contacts when possible. If a school did not have a conventional catalog, then a course list, master teaching schedule, or any other information with course offerings that could be extracted was accepted. If information for the school years covering 2008–09, 2009–10, 2010–11, and 2011–12 was not

available, information from the most recent school year was requested. ICs followed up with schools to clarify information as needed.

### 5.3.5 Receipt Control

Incoming school information pages and transcripts were logged into the DRS and course catalogs were logged into the SCS. Data clerks entered information from the faxed School Information Pages (SIP) in the DRS. SIP data that were entered online were automatically imported into the DRS and SCS. An automated process was developed that checked for key responses on the SIP. If the school reported the grading scale and term system, the SIP passed quality control. Assigned ICs called and e-mailed schools to follow up if this key information was not reported by the school.

Transcripts that were uploaded via the study website or faxed were automatically imported into the DRS. Transcripts that were e-mailed were moved into the Enhanced Security Network (ESN) and were then imported into the DRS. Transcripts that were sent by FedEx faxed to the secure fax number and stored in the ESN. All hardcopy transcripts were shredded once it was confirmed that the transcripts were in the DRS.

Once the transcripts were in the DRS, the files were assigned to a school. If multiple transcripts were contained in a single file, as was normally the case, the file was split into separate files containing individual transcripts. Data clerks then reviewed the transcripts for legibility and completeness using a quality control checklist. Transcripts that did not pass quality control checks were routed to a supervisor for resolution. Electronic reports were produced and monitored to identify missing or unclear information at the transcript level. ICs followed up to obtain missing documents and to clarify information on the transcripts. Transcripts that passed quality control checks were routed for keying and coding.

## 5.4 Data Collection Results

A total of 26 of 26 base-year schools submitted transcripts, resulting in a 100 percent participation rate. Among the transfer schools, 48 of 82 schools submitted transcripts, giving an unweighted school participation rate of 58.5 percent. A total of 74 of 108 schools submitted transcripts, resulting in an unweighted school response rate of 68.5 percent.

Of the schools that did not provide transcripts, six transfer schools (5.6 percent) reported that there was no record of the sample member at the school. Seven transfer schools (6.5 percent) reported no coursetaking record because of the brevity of the student's enrollment. Three transfer schools (2.8 percent) refused to submit transcripts citing insufficient staff for transcript preparation. The remaining 18 transfer schools did not provide transcripts because of failure to obtain adequate consent for transcript release or because of reasons not specified.

Seventy-seven schools (71.3 percent) provided information on the SIP. As previously stated, the SIP asked for information about the school's grading and graduation

policies/requirements. RTI personnel received or were able to retrieve from school/district websites at least one course catalog from all but one school that submitted student transcripts.

Final response rates for the transcript data collection are shown in table 8. Among base-year schools, transcripts were received for 92 percent of the students. Transfer school transcripts were received for 59 percent of students. At least one transcript was collected for 698 of the 754 students in the sample (93 percent).

**Table 8. Transcripts received by school type**

School type	Number of transcripts requested	Number of transcripts received	Percent
Total	846	744	87.9
Base-year	754	690	91.5
Transfer	92	54	58.7

# Chapter 6.

## Transcript Keying and Coding: Procedures and Transcript Quality

### 6.1 Catalog and Transcript Keying and Coding

The field test was performed to test systems and procedures for collection of data from secondary school course catalogs and student transcripts. A keying and coding system (KCS) was designed and implemented for this task. The KCS included features for quality control and workflow management. Procedures associated with all of these activities were also tested during the field test.

Data gleaned from catalogs are used to produce course offering files for the base-year schools. The catalog data include detailed information on the courses offered at the school, including a course code, which indicates the subject of the course, along with the course name, number, department, program, credit offered, grade levels, terms, and additional course attributes. The additional attributes identified courses as career or vocational, offering dual (secondary/postsecondary) credit, International Baccalaureate or Advanced Placement, honors or advanced, college prep, or internships.

Catalog course coding included careful review of course descriptions to assign a Classification of Secondary School Course (CSSC) code (<http://nces.ed.gov/surveys/hst/courses.asp>) to each course. Coding was performed in the KCS by data collection staff (keyer/coders) trained to select the most appropriate code for each course. Keyer/coders used a keyword search feature of the KCS and an understanding of the structure and characteristics of the CSSC in selecting course codes.

Data collected from transcripts produce academic histories of sample members' secondary school attendance and coursetaking. These data are collected from all available student transcripts, including base-year transcripts and transcripts collected from transfer schools. Transcript data include sample member addresses, test results included on transcripts, years and academic terms attended at each school, and student course data. Course data include the school year, grade level, and terms when a course was taken, course grade and credit earned, and attributes noted on the transcript. Transcript course attributes replicate those in the catalog keying and coding, with the addition of a "repeated" course attribute.

Any courses shown on a transcript as taken at another school were entered and linked to the other school in the KCS. When a transfer school was named on a transcript, this school was identified from a list of public (Common Core of Data) and private (Private School Universe Survey) secondary schools and added to the KCS. If a postsecondary institution was identified

on a transcript, it was also added to the KCS, identified from a list of institutions from the Integrated Postsecondary Education Data System (<http://nces.ed.gov/ipeds/>).

Student transcript course data were matched to catalog course data to provide the most comprehensive data possible. In particular, by merging catalog and transcript data, the course subject code was added to the student course record. Catalogs also provided course attributes that may not have been listed in the more limited data present on transcripts, and such catalog course attributes were also merged into the student records.

### 6.1.1 Keying and Coding Procedures

The keying and coding process began with the school catalog. Then, when catalog keying and coding was complete, the same keyer/coder was assigned to key and code the transcripts received from the school for which the catalog had just been completed. This took advantage of the keyer/coder's familiarity with the school, gained through catalog keying and coding.

Transfer transcripts were keyed and coded in the KCS with a specific utility designed for course coding. Only courses appearing on transfer transcripts were coded, not the entire transfer school catalog. However, transfer school catalogs were requested and, when available, used as a reference for keying and coding of transfer courses.

Course data from the catalog course offerings file were matched to the student transcript files to add important course data, such as the subject code and course attributes found in the catalog. The catalog and transcript courses were matched using course ID or course name. In some cases, such as when school course numbering had changed or when abbreviations were used, the course records did not match. Unmatched transcript courses were compared to all courses in the course offerings file to link unmatched courses.

### 6.1.2 Keying and Coding Data Quality Control

A number of measures were implemented to encourage and assess data quality during keying and coding. These included:

- Keyer/coder training, designed to develop consistent and accurate keying and coding technique. The training familiarized staff with data elements and source documents, use of the KCS, and proper data entry techniques, including selection of CSSC codes.
- Keying and coding guidance and reference documents, updated during the course of data collection with best practices learned during keying and coding.
- A weekly Quality Circle (QC) meeting, during which keyer/coders received feedback and were able to ask questions of project staff. Notes from each QC meeting were made available, with selected outcomes added to guidance materials.
- A question/resolution system, within the KCS, that enabled keyer/coders to submit "problem sheets" to ask questions or request guidance from project staff. This system

was used to provide timely resolutions and to keep a record of the types of questions asked, which can be used to enhance main study guidance materials and training.

- Expert coding and rekeying, a process where project staff keyed and coded a sample of each keyer/coder's work and compared the results to develop performance feedback and provide a measure of inter-rater reliability.
- The KCS included alpha and numeric data entry restrictions and automated prompts for data fields that were empty or contained unexpected values or combinations.

## 6.2 Keying and Coding Results

Course catalogs were keyed and coded for 15 schools. A total of 690 transcripts were keyed and coded for 656 sample members. The keyed and coded transcripts included 638 transcripts from base-year schools and 52 transcripts from transfer schools.

Timing for the catalog keying and coding process was assessed using a sample of 430 courses. For this sample, the average time required to key and code a single course was 1.4 minutes. The number of courses per catalog ranged from 64 to 508, with an average of 191 courses per catalog. Based on a sample of 422 transcripts, the average time to key and code a transcript was approximately 19 minutes.

### 6.2.1 Keyer/Coder Feedback

At the conclusion of the field test, a debriefing meeting was held with keyer/coder staff to obtain information on the field test experience that could be used to prepare for the main study. (The debriefing document appears in section 5.5 of this report.) Keyer/coders indicated that the time required to key and code catalogs and transcripts was dependent not only on the number of courses per catalog or transcript, but also on the clarity of the source document layout or formatting and course descriptions. Although data on some documents were clear and easy to find, others required more time to locate or interpret.

Regarding course coding, keyer/coders reported that coding guidance, whether provided in guidance documents, via problem sheets, or at QC meetings, was very useful during the task of selecting course codes. Some difficulties were experienced because of the design of the CSSC, including inconsistent use of numbers to signify course levels (some use grade level, others use 1–4) and codes with missing or limited definitions that made differentiation difficult. Special education courses were described as difficult to code because the source description often fit better with non-special education codes and in some cases it was difficult to determine whether a course was special education.

Keyer/coders described challenges in using course attributes intended for courses offered in conjunction with postsecondary institutions. The field test course attributes sought to identify courses that offered both secondary and postsecondary credit or were associated with a career/technical program, and also to identify where such courses were taught. Catalogs were

found to offer varying detail on such courses, and these descriptions did not always correspond to the specified attributes.

### **6.2.2 Quality Control Results**

Expert coding was performed on a random sample of courses selected from each catalog. The expert coder, a member of the project team experienced in coding and use of the CSSC, reviewed course information and selected a code without seeing the code already selected by the keyer/coder. A percent agreement rate was calculated between the keyer/coder and expert coder. Percent agreement was calculated at three levels of specificity based on the design of CSSC codes. To test the expert coding system, nine catalogs were expert-coded during the field test.

Each CSSC code contains six digits. The first two digits identify, by subject, the general course category. The next two digits add a subject subcategory, and the final two digits provide the greatest specificity. Based on a sample of 180 courses, at the 2-digit level the keyer/coder and expert coder agreed on 94 percent of courses. At the 4-digit level, agreement was 88 percent, and at 6-digit (perfect agreement), it was 71 percent.

Rekeying was performed in the field test to assess the rekeying application and therefore was only tested on a small sample of transcripts. This application will be used in the main study keying/coding task to assess agreement between keyer/coders on the entry of keyed data from transcripts, such as grade levels, terms, grades, and credits earned. As with expert coding, a second user (either another keyer/coder or project staff) will enter transcript data independently, without seeing the entries of the first keyer/coder.

## **6.3 Keying and Coding Conclusions**

The field test experience will be used to make enhancements to the keying and coding systems and procedures for the main study high school transcript keying and coding operation. In particular, changes will be made to the course code used for catalog course coding, to the catalog course component of the KCS, and to the keyer/coder training.

For the main study, the course code will be changed from the CSSC to the Secondary School Course Classification System: School Codes for the Exchange of Data (SCED). The SCED classification system was developed to assist schools in maintaining, reporting, and communicating data on student coursetaking, and is being adopted by many state and local agencies. The course code descriptions in the SCED are more robust and will enable better differentiation between course subjects for more accurate and reliable coding. The SCED taxonomy uses course level or rigor, course credits, and course sequence to assign a 12-character course code. The HSLs:09 KCS will be modified to add these three elements, and the keyer/coder training will be updated to include instructions on identifying and assigning these elements.

Course attributes for combined secondary/postsecondary courses will be modified for the main study by using a tiered approach. An initial attribute will be used to establish w dual credit was offered for the course, while follow-up attributes will collect more information when it is available, such as where the course was offered and if postsecondary credits were offered.

## Chapter 7.

# Summary of Recommendations for the Main Study

This section of the Field Test Report summarizes the combined recommendations from the 2012 Update field test as well as the High School Transcript field test for main study implementation.

The field test effort demonstrated that the data collection procedures for the two components should prove suitable for the main study. Nevertheless, some modifications were recommended and planned for the main study implementation of the two components.

### 7.1 Recommendations for 2013 Update Questionnaire

In addition to the methodological recommendations for the collection of questionnaire and transcript data set out in sections 7.2 and 7.3 below, the Field Test Report (appendix A of this *Data File Documentation*) contains highly specific item-level recommendations regarding the student-parent Update instrument. Such recommendations include dropping certain items that were not successful and for which there are no prospects of repair, addition of explicit “don’t know” options for several items (chiefly, associated with financial aid), and addition of content that will facilitate more accurate standardization. More specifically, revisions are recommended as follows: financial aid questions should be retained without major modification despite high “don’t know” responses; it is recommended that the interview ask about AP, IB and all other college courses separately to help respondents parse their answers and provide more complete data for analysis; it is recommended that the item asking for unlisted forms of training be eliminated or (alternatively) retained with elimination of “other specify”; clarification or elimination may be desirable for the question asking about completion of other financial aid applications besides FAFSA; the definition of apprenticeship should be refined if the question remains; while the field test allowed respondents to choose reporting units for work; clarifying information should be added to allow for more accurate standardization; finally, to address the serious response inconsistency (parent vs. student) in the counselor’s involvement item, a less subjective question may be preferable.

In the main, response rates were approaching or at least 85 percent, although many students were unable to supply occupation code information for job expected in the coming November. Timing analyses showed that overall length was only slightly longer than target, supporting the recommendation that drastic cuts in items not be made.

### 7.2 Recommendations for 2013 Update Data Collection Methodology

The 2012 Update and the 2013 Update are designed to collect data when most students have graduated from high school. A June 15 start date was implemented in the 2012 Update field

test so that most students would have had their graduation by the time data collection began. However, many students had left home soon after graduation to attend summer classes in college or for summer or permanent employment. This created challenges in reaching sample members. For this reason, the 2013 Update will begin 2 weeks earlier, with a June 1 start date.

Correspondence will be sent to sample members a couple of months prior to data collection to let them know that they will be contacted for an interview starting in June 2013, and to obtain updated contact information. This pre-data collection contact will help ensure that the most current contact information for sample members is available leading up to the 2013 Update.

Introductory scripts used by telephone interviewers will be updated to more clearly reflect that the calls are for either the student sample member or the parent. Parents often deferred to the student to complete the interview in the field test or assumed that their participation was not needed if the student had already moved out of the home for college or work. This script will also mention the timing of the sampled student's most recent participation in HSLS:09 early in the call to provide legitimacy. Also, because the majority of phone numbers available for sample members are numbers for their parents' homes, computer-assisted telephone interview procedures will be in place to guide interviewers on how to appropriately ask parents for and record new contact information for student sample members. Successful contacts with student sample members and their parents will be an important component of the interviewer training for the main study.

Incentives were paid to the student in the field test regardless of whether it was the student or parent who responded to the questionnaire. For the main study, it is recommended that parents be asked whether they want the incentive check to be made out to them or to the student. Because either the student or parent can respond, mailings and e-mails to sample members will be staggered after the first mailing so that student sample members and their parents receive contact materials on different days.

Finally, the positive role of responsive design techniques in the field test argues for the continuation of this approach in the main study.

### **7.3 Recommendations for Transcript Data Collection Methodology**

The field test transcript collection was designed to test processes and procedures in preparation for the main study. Base-year schools were familiar with HSLS:09 and were more willing to provide student transcripts, especially if the staff who worked on HSLS:09 in the first follow-up or base year were still at the school at the time of the transcript collection. Transfer schools had more questions about the study and required more prompting for transcripts. The lower participation rate of the transfer schools in the field test is a potential concern for the main study, and requires extra effort to bring levels of cooperation closer to those of the base-year schools.

Information was sent to the schools to describe the study and the request for transcripts in particular. Content included the importance and use of transcript data, as well as Family Education Rights and Privacy Act (FERPA) regulations that afford NCES the authorization to collect transcripts. It was determined that schools do not require this level of information in hard copy. It is proposed that documents related to the importance and use of transcript data and FERPA information are posted on the study website and referred to in the letter sent to the school. Hardcopies of these documents would be made available upon request by school staff.

Catalogs were requested from all 4 years of the student's high school experience. It has been determined that almost universally, only the most recent course catalog is strictly required. Thus, focus should be on obtaining the most recent catalog possible for keying and coding. If older catalogs are available (many have already been collected) these can be used as reference points in the keying/coding process as needed. Since many schools do not retain catalogs from prior school years, under no circumstances should they be asked to reconstruct a record of past offerings. Emphasis should be on the current catalog.

While prompting transfer schools for transcripts, it was confirmed that many students transfer to multiple schools. Procedures have been established to request transcripts from multiple transfer schools when needed.

In terms of keying and coding operations, some changes will be required for the main study to properly reflect the decision (on conceptual grounds) to shift course taxonomies from the CSSC to the SCED (Secondary School Course Classification System: School Codes for the Exchange of Data). The SCED course descriptions are more robust and should foster more accurate and reliable coding. The KCS will be modified accordingly. Also course attributes for combined secondary/postsecondary courses will be improved for full-scale by using a tired approach. Finally, crosswalks will be constructed between SCED and CSSC.

## SECTION A: HIGH SCHOOL UPDATE

---

### **^Screen: Introduction to Section A**

Question wording: We will begin by getting an update on [your/your teenager's] high school enrollment.

Routing: Go to A01

---

### **^Screen: S3 A01**

Question wording: [Have/Has][you/your teenager] earned a high school credential such as a high school diploma, certificate of attendance, GED or other high school equivalency?

Variable: S3HSCRED

1=Yes

0=No

Routing: If yes, go to S3 A02. Otherwise, skip to S3 A04

Administered to: All respondents

---

### **^Screen: S3 A02**

Question wording: What type of high school credential [have/has] [you/he/she] earned?

Variable: S3HSCREDTYPE

1=High school diploma

2=GED or other high school equivalency

3=Certificate of attendance

Routing: Go to A03

Administered to: Respondents who have earned a high school credential

---

### **^Screen: S3 A03**

Question wording: In what month and year did [you/he/she] receive [your/his/her] [high school diploma/GED or other high school equivalency/certificate of attendance/high school credential]?

Variable: S3HSCREDMO

Item wording: Month:

-9=Select one

1=January

2=February

3=March

4=April

5=May

6=June

7=July

8=August

9=September

10=October

11=November

12=December

Variable: S3HSCREDYR

Item wording: Year:

-9=Select one  
2009=2009  
2010=2010  
2011=2011  
2012=2012  
2013=2013

Routing:

If high school credential is a diploma or certificate of attendance, then skip to S3 A09  
Otherwise, go to S3 A08

Administered to: Respondents who have earned a high school credential

---

**Screen: S3 A04**

Question wording: [At the end of the spring 2013 term, [were/was] [you/your teenager]/[Are/Is][you/your teenager]currently] attending high school, not attending high school, or being homeschooled?

If [you/he/she] [[are/is]/[were/was]] out for a high school break, illness, injury, or vacation, please consider [yourself/him/her] as attending high school.

Variable: S3ENROLLHS13

1=Attending high school  
2=Not attending high school  
3=Being homeschooled

Routing: If attending high school or being homeschooled, skip to S3 A06. Otherwise, go to S3 A05

Administered to: Respondents who have not earned a high school credential

---

**Screen: S3 A05**

Question wording: [Do/Does][you/he/she] plan to get a high school credential such as a high school diploma, certificate of attendance, GED or other high school equivalency?

Variable: S3HSPLAN

1=Yes  
0=No

Routing: If yes, go to S3 A06. Otherwise, skip to S3 A08

Administered to: Respondents who have not earned a high school credential and are not attending high school or being homeschooled

---

**Screen: S3 A06**

Question wording: What type of high school credential [do/does] [you/he/she] plan to earn?

Variable: S3HSCREDPLAN

1=High school diploma  
2=GED or other high school equivalency  
3=Certificate of attendance

Routing: Go to A07

Administered to: Respondents who have not earned a high school credential and are either 1) attending high school or homeschool, or 3) not attending, but planning to get a high school credential.

---

**Screen: S3 A07**

Question wording: About what month and year [do/does] [you/he/she] expect to [receive a high school diploma/receive a certificate of attendance/ take the examination for the GED or other high school equivalency/receive a high school diploma or certificate of attendance or to take the examination for the GED or other high school equivalency]?

Variable: S3HSCOMPMO

Item wording: Month

- 9=Select one
- 1=January
- 2=February
- 3=March
- 4=April
- 5=May
- 6=June
- 7=July
- 8=August
- 9=September
- 10=October
- 11=November
- 12=December

Variable: S3HSCOMPYR

Item wording: Year

- 9=Select one
- 2013=2013
- 2014=2014
- 2015=2015 or later

Variable: Not on data file as a stand-alone variable.

Item wording: Don't know

- 1=Yes
- 0=No

Routing: If attending high school or being homeschooled, skip to S3 A09. Otherwise, go to S3 A08.

Administered to: Respondents who have not earned a high school credential and are either 1) attending high school or homeschool, or 3) not attending, but planning to get a high school credential.

---

**Screen: S3 A08**

Question wording: In what month and year did [you/he/she] last attend high school?

Variable: S3LASTHSMO

Item wording: Month:

- 9=Select one
- 1=January
- 2=February
- 3=March
- 4=April
- 5=May
- 6=June
- 7=July
- 8=August
- 9=September
- 10=October

11=November

12=December

Variable: S3LASTHSYR

Item wording: Year:

-9=Select one

2009=2009

2010=2010

2011=2011

2012=2012

2013=2013

Routing: Go to A09

Administered to: Respondents who 1) have earned a GED (alternative completers) or 2) have not earned a high school credential and are not enrolled in high school

---

**^Screen: S3 A09**

Question wording: What is the name of the high school [from which [you/your teenager] received a diploma]/from which [you/your teenager] received a certificate of attendance/ [you/your teenager] last attended/[you/your teenager] [are/is] currently attending]?

Variable: S3LASTHS

1=[First follow-up high school(X2NCESID)]

2=[Other high school identified in first follow-up (S2OTHHSID1)]

3=[Other high school identified in first follow-up (S2OTHHSID2)]

4=[Base year high school (X1NCESID)]

5=A different high school

Routing: If a different high school or no option is selected, go to S3 A10. Otherwise, skip to BEGIN HIGH SCHOOL LOOP

Administered to: All respondents

---

**^Screen: S3 A10**

Question wording: What is the full name, city, and state of the high school [from which [you/he/she] received a diploma]/from which [you/he/she] received a certificate of attendance/[you/he/she] last attended/[you/he/she] [are/is] currently attending]? (Do not enter abbreviations.)

Variable: S3LASTHSID

Item wording: School's CCD or PSS ID

Variable: Not on data file

Item wording: School name:

Variable: Not on data file

Item wording: City:

Variable: Not on data file

Item wording: State (or Country):

Routing: Go to BEGIN HIGH SCHOOL LOOP

Administered to: Respondents who last attended a high school other than the base year school, the first follow-up school, or another school identified in the first follow-up

**Screen: BEGIN HIGH SCHOOL LOOP**

Question wording: [So far we know that [you/your teenager] [have/has] attended these high schools since [you/he/she] [were/was] a 9th-grader in the fall of 2009:

[Last high school attended (S3LASTHSID)]

[First follow-up high school (X2NCESID)]

[Other high school identified in first follow-up (S2OTHHSID1)]

[Other high school identified in first follow-up (S2OTHHSID2)]

[Base year high school (X1NCESID)]

[Have/Has] [you/your teenager] attended any other high school besides [[base year high school]/these] since [you/he/she] [were/was] a 9th-grader in the fall of 2009?

Variable: Not on data file

1=Yes

0=No

Routing: If yes, go to S3 A11. Otherwise, skip to S3 A12.

Administered to: All respondents

**Screen: S3 A11**

Question wording: What is the full name, city, and state of the other high school [you/he/she] attended?  
(Do not enter abbreviations.)

Variable: S3OTHHSID1 - S3OTHHSID2

Item wording: Schools' CCD or PSS IDs

Variable: Not on data file

Item wording: School name:

Variable: Not on data file

Item wording: City:

Variable: Not on data file

Item wording: State (or Country):

Routing: Go to REPEAT HIGH SCHOOL LOOP

Administered to: Respondents who have attended a high school other than the base year school, first follow-up school, or other school identified in first follow-up

**Screen: REPEAT HIGH SCHOOL LOOP**

Question wording: [So far we know that [you/your teenager] [have/has] attended these high schools since [you/he/she] [were/was] a 9th-grader in the fall of 2009:

[New high school identified in 2013 Update (S3OTHHSID1)]

[New high school identified in 2013 Update (S3OTHHSID2)]

[Last high school attended (S3LASTHSID)]

[First follow-up high school (X2NCESID)]

[Other high school identified in first follow-up (S2OTHHSID1)]

[Other high school identified in first follow-up (S2OTHHSID2)]

[Base year high school (X1NCESID)]

[Have/Has] [you/your teenager] attended any other high school besides these since [you/he/she] [were/was] a 9th grader in the fall of 2009?

Variable: Not on data file

1=Yes  
0=No

Routing: If yes, return to A11. Otherwise, go to S3 A12.

Administered to: Respondents who have attended a high school other than the base year school, first follow-up school, or other school identified in first follow-up

**Screen: S3 A12**

Question wording: [Did [you/he/she] take/[Have/Has][you/your teenager] taken] any high school courses for college credit [when [you/he/she] [were/was] in high school] including AP courses, IB courses, and other courses for college credit? [Include any courses that [you/he/she] [are/is] taking now.]

Variable: S3ANYCLGCRED

1=Yes  
0=No

Routing: If yes, go to S3 A13. Otherwise, skip to S3 A17 pre-routing.

Administered to: All respondents

**Screen: S3 A13**

Question wording: Which of the following types of courses for college credit [did [you/he/she] take/[have/has] [you/he/she] taken[ when [you/he/she] [were/was] in high school]?

Variable: S3AP

Item wording: Advanced Placement (AP) courses

1=Yes  
2=No  
3=Don't know

Variable: S3IB

Item wording: International Baccalaureate (IB) courses

1=Yes  
2=No  
3=Don't know

Variable: S3DUAL

Item wording: Any other course for college credit such as dual or concurrent enrollment courses

1=Yes  
2=No  
3=Don't know

Routing: If has taken AP course(s), go to S3 A14. Otherwise, if has taken IB course(s), skip to S3 A15. Otherwise, if has taken other course(s) for college credit, skip to S3 A16. Otherwise, skip to S3 A17 pre-routing.

Administered to: All respondents who have taken courses for college credit while in high school.

**Screen: S3 A14**

Question wording: In which of the following subjects [did [you/he/she] take/[have/has] [you/he/she] taken] AP courses?

Variable: S3APMATH

Item wording: Math

1=Yes

0=No

Variable: S3APSCIENCE

Item wording: Science

1=Yes

0=No

Variable: S3APOTHER

Item wording: Another subject

1=Yes

0=No

Routing: If has taken IB course(s), go to S3 A15. Otherwise, if has taken other course(s) for college credit, skip to S3 A16. Otherwise, skip to S3 A17 pre-routing.

Administered to: Respondents who have taken AP course(s)

**Screen: S3 A15**

Question wording: In which of the following subjects [did [you/he/she] take/[have/has] [you/he/she] taken] IB courses?

Variable: S3IBMATH

Item wording: Math

1=Yes

0=No

Variable: S3IBSCIENCE

Item wording: Science

1=Yes

0=No

Variable: S3IBOTHER

Item wording: Another subject

1=Yes

0=No

Routing: If has taken other course(s) for college credit, go to S3 A16. Otherwise, skip to S3 A17 pre-routing.

Administered to: Respondents who have taken IB course(s)

**Screen: S3 A16**

Question wording: In which of the following subjects [did [you/he/she] take/[have/has] [you/he/she] taken] courses for college credit other than AP and IB?

Variable: S3DUALMATH

Item wording: Math

1=Yes

0=No

Variable: S3DUALSCIENCE

Item wording: Science

1=Yes

0=No

Variable: S3DUALOTHER

Item wording: Another subject

1=Yes

0=No

Routing: Go to A17 pre-routing

## SECTION B: ACTIVITIES AS OF NOVEMBER 1, 2013

---

### **^Screen: Introduction to Section B**

Question wording: Next we will ask you about what [you/your teenager] [will/were/was] [ be] doing on or around November 1st of this year.

---

### **^Screen: S3 B01**

Question wording: Which of the following activities [will/were/was] [you/your teenager] [ be] doing on or around November 1st?

Variable: S3CLASSES

Item wording: Taking classes from a college, university, community college, trade school, or other occupational school (such as a cosmetology school or a school of culinary arts)

1=Yes

2=No

3=Don't know

Variable: S3APPRENTICE

Item wording: Participating in an apprenticeship program

1=Yes

2=No

3=Don't know

Variable: S3WORK

Item wording: Working for pay

1=Yes

2=No

3=Don't know

Variable: S3MILITARY

Item wording: Serving in the military including ROTC

1=Yes

2=No

3=Don't know

Variable: S3FAMILY

Item wording: Starting a family or taking care of [your/his/her] children

1=Yes

2=No

3=Don't know

Variable: S3HS

Item wording: Attending high school or homeschool

1=Yes

2=No

3=Don't know

Variable: S3GEDCOURSE

Item wording: Taking a course to prepare for the GED or other high school equivalency exam

1=Yes

2=No

3=Don't know

Routing: If yes to more than one item, go to S3 B02. Otherwise, if taking postsecondary classes, skip to S3 B03. Otherwise, if working or apprenticeship, skip to S3 B04. Otherwise, if serving in the military, skip to S3 B05. Otherwise, if attending high school or GED completion course (and not taking postsecondary classes), skip to Section E. Otherwise, skip to Section C.

Administered to: All respondents

---

**Screen: S3 B02**

Question wording: What [will/was][ be] [your/his/her] main focus?

Variable: S3FOCUS

- 1=Taking classes from a college or university, community college, trade school, or other occupational school (such as a cosmetology school or school of culinary arts)?
- 2=Participating in an apprenticeship program
- 3=Working for pay
- 4=Serving in the military
- 5=Starting a family or taking care of [your/his/her] children
- 6=Attending high school or homeschool
- 7=Taking a course to prepare for the GED or other high school equivalency exam
- 8=[You/Your teenager] [will/were/was][ be] equally focused on more than one of these

Routing: If taking postsecondary classes in S3 B01, go to S3 B03. Otherwise, if working or apprenticeship program in S3 B01, skip to S3 B04. Otherwise, if serving in military in S3 B01, skip to S3 B05. Otherwise, skip to Introduction to Section E.

Administered to: Respondents who are pursuing two or more activities in S3 B01

---

**^Screen: S3 B03**

Question wording: [Will/Were/Was] [you/your teenager][ be] enrolled in school full-time or part-time as of November 1st?

Variable: S3CLGFT

- 1=Full-time
- 2=Part-time
- 3=Don't know

Routing: If working or apprenticeship program in S3 B01, go to S3 B04. Otherwise, if serving in military in S3 B01, skip to S3 B05. Otherwise, if not taking postsecondary classes AND attending high school or GED completion course in S3 B01, skip to Section E. Otherwise, skip to Section C

Administered to: Respondents who are taking postsecondary classes as of November 1, 2013

---

**^Screen: S3 B04**

Question wording: As of November 1st, [will/were/was] [you/your teenager][ be] working full-time, that is 35 hours or more per week?

Variable: S3WORKFT

- 1=Yes
- 2=No
- 3=Don't know

Routing: If serving in the military in S3 B01, go to S3 B05. Otherwise, if not taking postsecondary classes AND attending high school or GED completion course in S3 B01, skip to Section E. Otherwise, skip to Section C

Administered to: Respondents who are working or apprenticing as of November 1, 2013

**Screen: S3 B05**

Question wording: In which branch of the military [will/were/was] [you/he/she][ be] serving as of November 1st?

Variable: S3MILBRANCH

- 1=Army
- 2=Navy
- 3=Air Force
- 4=Marine Corps
- 5=Coast Guard

Routing: If attending high school or GED completion course (and not taking postsecondary classes) in S3 B01, skip to Section E. Otherwise, go to Section C.

Administered to: Respondents who are serving in the military as of November 1, 2013

---

**SECTION C: APPLICATIONS & REGISTRATION AT POSTSECONDARY INSTITUTIONS**

---

**^Screen: Introduction to Section C**

Question wording: In this section of the survey, we will ask you about [your/your teenager's] [education this fall and [your/his/her]] applications to and registration at colleges and schools that provide occupational training. When answering these questions, please answer with November 1st in mind.

Routing:

If taking postsecondary classes in S3 B01, go to S3 C01  
Otherwise, skip to S3 C07

---

**^Screen: S3 C01**

Question wording: What is the name, city and state of the school or college [you/your teenager] [will/were/was][ be] attending as of November 1st?

(Please type in the full name. Do not use abbreviations.)

Variable: S3CLGID (Institution's IPEDS ID)

Item wording: Institution's IPEDS ID

Variable: Not on data file

Item wording: Institution name:

Variable: Not on data file

Item wording: City:

Variable: Not on data file

Item wording: State (or Country):

Routing: Go to C02

Administered to: Respondents who are taking postsecondary classes as of November 1, 2013

**^Screen: S3 C02**

Question wording: What type of program [will/were/was] [you/your teenager][ be] enrolled in?

Variable: S3PROGLEVEL

- 1=Bachelor's degree program (usually a 4-year degree)
- 2=Associate's degree program (usually a 2-year degree)
- 3=Certificate or diploma program from a school that provides occupational training (usually takes 2 years or less to complete, often leading to a license, such as cosmetology)
- 4=No specific program, but [you/he/she] [will/were/was] [ be] taking courses
- 5=Other
- 6=You don't know

Routing: If Bachelor's degree, go to S3 C03. Otherwise, if Associate's degree, skip to S3 C04. Otherwise, skip to S3 C05.

Administered to: Respondents who are taking postsecondary classes as of November 1, 2013

**Screen: S3 C03**

Question wording: Will [you/he/she] complete an Associate's degree program before transferring to a Bachelor's degree program?

Variable: S3AAB4BA

- 1=Yes
- 0=No

Routing: Skip to C05

Administered to: Respondents who reported enrollment in a Bachelor's degree program as of November 1, 2013

**Screen: S3 C04**

Question wording: Is this an Associate's degree program designed for transfer to a Bachelor's degree program?

Variable: S3BATTRANSFER

- 1=Yes
- 0=No

Routing: Go to C05

Administered to: Respondents who reported enrollment in an Associate's degree program as of November 1, 2013

**Screen: S3 C05**

Question wording: What field of study or program [will/were/was] [you/he/she] [ be] considering?

Variable: S3FIELD2 (Field of study's 2-digit CIP code)

Item wording: Field of study's 2-digit CIP code

Variable: S3FIELD6 (Field of study's 6-digit CIP code)

Item wording: Field of study's 6-digit CIP code

Variable: S3FIELD

Item wording: Field of study:

Variable: Not on data file as a stand-alone variable.

Item wording: Check here if you do not know.

1=Yes

0=No

Routing: Go to C06

Administered to: Respondents who are taking postsecondary classes as of November 1, 2013

---

**Screen: S3 C06**

Question wording: Where [will/were/was] [you/your teenager][ be] living on or around November 1st?

Variable: S3WHERELIVE

1=On campus or in college-owned housing (for example, a dorm or residence hall)

2=With parent(s), relative(s), or guardian(s)

3=Off campus (not college-owned housing)

Routing: Go to C07

Administered to: Respondents who are taking postsecondary classes as of November 1, 2013

---

**Screen: S3 C07**

Question wording: [Including [Nov 1 2013 postsecondary institution], how/How] many colleges or schools [have/has] [you/your teenager] applied to or registered at[, if any]?

Variable: S3CLGAPPNUM

Item wording: \_\_\_ colleges or schools (Please enter '0' if [you/he/she] did not apply or register.)/(Please include [Nov 1 2013 postsecondary institution] in the count.)

Routing: If 0, skip to Section D. Otherwise, if 1 and taking postsecondary classes in S3 B01, skip to S3 C13. Otherwise, if 1 and taking postsecondary classes in S3 B01, go to S3 C08. Otherwise, if 2 or more, go to S3 C08. Otherwise, if no response and taking postsecondary classes, skip to S3 C13. Otherwise, skip to Section D.

Administered to: All respondents except those who are pursuing a high school diploma or GED (and not taking postsecondary classes) as of November 1, 2013

---

**Screen: S3 C08**

Question wording: [[Not including [Nov 1 2013 postsecondary institution], think/Think] about the two schools [you/he/she] most seriously considered.] What is the name, city and state of [the school/the other school/one of the schools] [you/he/she] applied to or registered at?

Please type in the full name. Do not use abbreviations.)

Variable: S3CLGAPPID1

Item wording: Institution's IPEDS ID

Variable: Not on data file

Item wording: Institution name:

Variable: Not on data file

Item wording: City:

Variable: Not on data file

Item wording: State (or Country):

Routing: If applied to 1 school (and not taking classes at a postsecondary institution), skip to S3 C11. Otherwise, if applied to 2 schools including the November 1 postsecondary institution, skip to S3 C10. Otherwise, go to S3 C09.

Administered to: Respondents who applied to or registered at one or more postsecondary institutions (besides the one attending as of November 1, 2013 if applicable)

---

**Screen: S3 C09**

Question wording: What is the name, city and state of the other school [you/he/she] [applied to or registered at/most seriously considered]?

Variable: S3CLGAPPID2

Item wording: Institution's IPEDS ID

Variable: Not on data file

Item wording: Institution name:

Variable: Not on data file

Item wording: City:

Variable: Not on data file

Item wording: State (or Country):

Routing: Go to C10

Administered to: Respondents who applied to or registered at two or more postsecondary institutions (besides the one attending as of November 1, 2013 if applicable)

---

**Screen: S3 C10**

Question wording: Not considering the cost of the schools where [you/your teenager] applied, which of the following would be [your/his/her] first choice? Consider all schools regardless of [your/his/her] admission status.

Variable: S3CHOICEAPP

1=[November 1 2013 postsecondary institution]

2=[First postsecondary institution applied to (S3CLGAPPID1)]

3=[Second postsecondary institution applied to (S3CLGAPPID2)]

4=Don't know

Routing: Go to C11

Administered to: Respondents who applied to or registered at least two postsecondary institutions including the one attending as of November 1, 2013 if applicable.

---

**Screen: S3 C11**

Question wording: [Were/Was] [you/he/she] accepted, wait-listed or rejected at [first postsecondary institution applied to (S3CLGAPPID1)]? (For schools that admit anyone who registers, answer "accepted.")/

For each of the following schools, indicate if [you/he/she] [were/was] accepted, waitlisted or rejected. (For schools that admit anyone who registers, answer "accepted.")/

[Were/Was] [you/he/she] accepted, waitlisted or rejected at [second postsecondary institution applied to (S3CLGAPPID2)]? (For schools that admit anyone who registers, answer "accepted.")/

Variable: S3APPSTATUS1

Item wording: [First postsecondary institution applied to (S3CLGAPPID1)]

1=Accepted

2=Wait-listed

3=Rejected

Variable: S3APPSTATUS2

Item wording: [Second postsecondary institution applied to (S3CLGAPPID2)]

- 1=Accepted
- 2=Waitlisted
- 3=Rejected

Routing: If accepted by more than one school (including November 1 postsecondary institution, if applicable), go to S3 C12. Otherwise, if taking postsecondary classes in S3 B01, skip to S3 C13. Otherwise, skip to Section D.

Administered to: Respondents who applied to or registered at one or more postsecondary institutions (besides the one attending as of November 1, 2013 if applicable)

---

**Screen: S3 C12**

Question wording: Not considering the cost of those schools to which [you/your teenager] [were/was] accepted, which of the following schools was [your/his/her] first choice?

Variable: S3CHOICEACC

- 1=[November 1 2013 postsecondary institution]
- 2=[First postsecondary institution applied to (S3CLGAPPID1)]
- 3=[Second postsecondary institution applied to (S3CLGAPPID2)]
- 4=Don't know

Routing: If taking postsecondary classes in S3 B01, go to S3 C13. Otherwise, skip to Section D

Administered to: Respondents who were accepted by more than one postsecondary institution including the one attending as of November 1, 2013, if applicable

---

**Screen: S3 C13**

Question wording: How important to [you/your teenager] [were/was] each of the following characteristics when choosing to attend [November 1 2013 postsecondary institution]?

Variable: S3REPUTATION

Item wording: Academic quality or reputation

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3COSTATTEND

Item wording: Cost of attendance

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3DISTANCE

Item wording: Distance from home

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3JOBPLC

Item wording: A good reputation of placing students in jobs

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3GRADSCHPLC

Item wording: A good reputation of placing students in graduate or professional schools

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S34YRBAPLC

Item wording: A good reputation of placing students in 4-year Bachelor's degree programs

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3SPORTS

Item wording: Opportunity to play sports

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3RECOMMEND

Item wording: Recommended by family or friends or a family member went there

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3OFFERSFIELD

Item wording: Offers a particular program of study

- 1=Very important
- 2=Somewhat important

Item wording: Offers online courses

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Variable: S3FITIN

Item wording: Students there are like [you/him/her]

- 1=Very important
- 2=Somewhat important
- 3=Not at all important
- 4=Don't know

Routing: Go to Section D

Administered to: Respondents who are taking postsecondary classes as of November 1, 2013

---

## SECTION D: FINANCIAL AID AND COSTS

---

### **^Screen: Introduction to Section D**

Question wording: Now we will ask you about financial aid[ and enrollment costs].

Routing: Go to D01

---

### **^Screen: S3 D01**

Question wording: Did [you/your teenager] or another family member complete a FAFSA, that is the Free Application for Federal Student Aid, for [your/his/her] education?

Variable: S3APPFSA

- 1=Yes
- 2=No
- 3=You don't know what a FAFSA is
- 4=You don't know if [you/your teenager] or another family member completed a FAFSA

Routing: If no, go to S3 D02. Otherwise, if taking postsecondary classes in S3 B01, skip to S3 D04. Otherwise, if was accepted to at least one postsecondary institution, skip to S3 D08. Otherwise, skip to S3 D10.

Administered to: All respondents except those who are pursuing a high school diploma or GED (and not taking postsecondary classes) as of November 1, 2013

---

### **^Screen: S3 D02**

Question wording: What are the reasons [you/he/she] did not complete a FAFSA? Would you say [you/he/she] did not complete a FAFSA...

Variable: S3NODEBT

Item wording: because you do not or your family does not want to take on debt?

- 1=Yes
- 0=No

Variable: S3CANAFFORD

Item wording: because you or your family can afford school or college without financial aid?

- 1=Yes
- 0=No

Variable: S3INELIGIBLE

Item wording: because you or your family thought [you/your teenager] may be ineligible or may not qualify?

- 1=Yes
- 0=No

Variable: S3DKHOW

Item wording: because you or your family did not have enough information about how to complete a FAFSA?

1=Yes

0=No

Variable: S3FORMWORK

Item wording: because you or your family thought the FAFSA forms were too much work or too time-consuming?

1=Yes

0=No

Variable: S3DKCOULD

Item wording: because you or your family did not know you could complete a FAFSA?

1=Yes

0=No

Variable: S3NOPOSTSEC

Item wording: because [you/your teenager] [do/does] not plan to continue [your/his/her] education after high school?

1=Yes

0=No

Routing: If did not complete a FAFSA due to perceptions of ineligibility (S3INELIGBLE=1), go to S3 D03. Otherwise, if taking postsecondary classes in S3 B01, skip to S3 D04. Otherwise, if was accepted to at least one postsecondary institution, skip to S3 D08. Otherwise, skip to S3 D10.

Administered to: Respondents who did not complete a FAFSA

---

### Screen: S3 D03

Question wording: Why did you think [you/your teenager] would not qualify for FAFSA financial aid? Was it...

Variable: S3FAMNOTQUAL

Item wording: because another family member did not qualify?

1=Yes

0=No

Variable: S3CREDIT

Item wording: because you have concerns about a credit score?

1=Yes

0=No

Variable: S3HIGHINCOME

Item wording: because your family's income is too high?

1=Yes

0=No

Variable: S3LOWSCORES

Item wording: because [your/your teenager's] grades or test scores are too low?

1=Yes

0=No

Variable: S3PTNOTQUAL

Item wording: because [you/your teenager] [[are/is] attending/[were/was] attending/would have attended] school or college part-time?

1=Yes

0=No

Routing: If taking postsecondary classes in S3 B01, go to S3 D04. Otherwise, if was accepted to at least one postsecondary institution, skip to S3 D08. Otherwise, skip to S3 D10.

Administered to: Respondents who did not complete a FAFSA because they thought they were ineligible or might not qualify

---

**Screen: S3 D04**

Question wording: Before financial aid, about how much is the total cost to you and [your family/[your teenager]] of [part-time] enrollment at [Nov 1 2013 postsecondary institution] for the 2013-2014 school year? Include tuition and mandatory fees[, room and board/, off campus housing expenses], and miscellaneous expenses.

Variable: S3CLGCOST

Item wording: \$ \_\_\_ for the 2013-2014 school year

Variable: Not on data file as a stand-alone variable.

Item wording: Don't know

## SECTION F: LOCATING INFORMATION

---

### **^Screen: Introduction to Section F**

Question wording: In this last section, we would like to collect some contact information that will help us locate [you/you and [your teenager]/[your teenager]] in the future for HSLs:09. This information will be kept in secure data files separate from the rest of your answers.

Routing: If sample member is attending high school as of November 1 2013, go to S3 F01A. Otherwise, respondent is routed to screens that collect locating information before going to END.

---

### **Screen: F01A**

Question wording: What high school [will/were/was] [you/your teenager][ be] attending as of November 1st?

Variable: S3FALLHS

- 1=[New high school identified in 2013 Update (S3OTHHSID1)]
- 2=[New high school identified in 2013 Update (S3OTHHSID2)]
- 3=[Last high school attended (S3LASTHSID)]
- 4=[First follow-up high school (X2NCESID)]
- 5=[Other high school identified in first follow-up (S2OTHHSID1)]
- 6=[Base year high school (X1NCESID)]
- 7=Homeschool
- 8=A different school

Routing: If a different school, go to S3 F01B. Otherwise, respondent is routed to screens that collect locating information before going to END.

Administered to: Respondents attending high school as of November 1 2013

---

### **Screen: F01B**

Question wording: What is the full name, city, and state of the high school that [you/your teenager] [will/were/was][ be] attending as of November 1st? (Do not enter abbreviations.)

Variable: S3FALLHSID

Item wording: School's CCD or PSS ID

Variable: Not on data file

Item wording: School name:

Variable: Not on data file

Item wording: City:

Variable: Not on data file

Item wording: State (or Country):

Routing: Respondent is routed to screens that collect locating information before going to END.

Administered to: Respondents attending a high school not previously identified

---

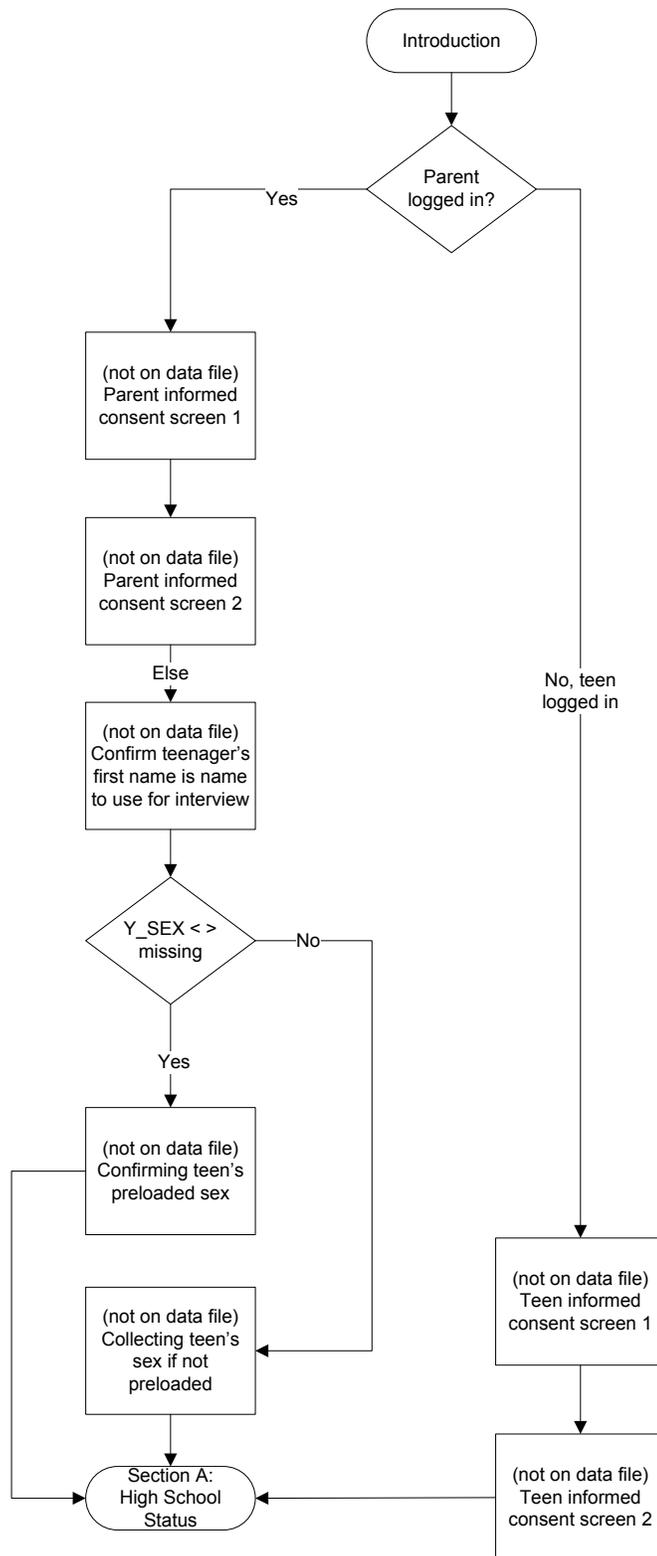

### **^Screen: END**

Question wording: Congratulations, you have completed the 2013 Update of HSLs:09!

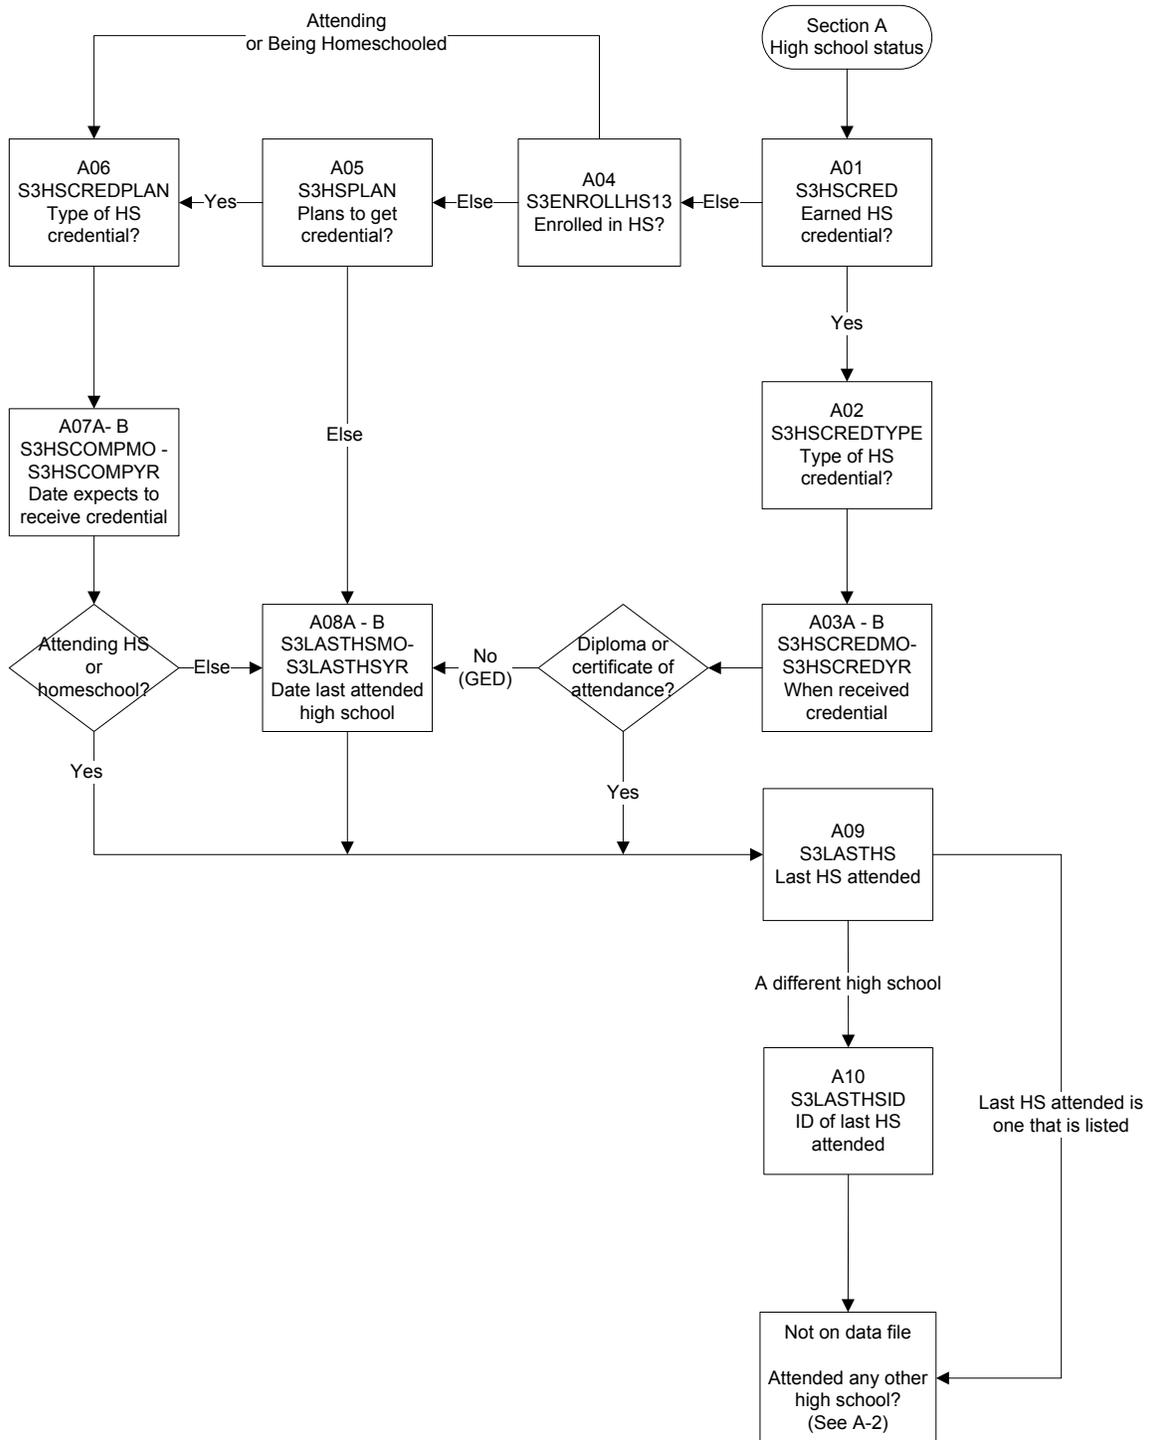

On behalf of the U.S. Department of Education, thank you for your time and cooperation. We greatly appreciate your participation in this study.

*This page intentionally left blank*

# Appendix C: Glossary of Terms

*This page intentionally left blank*

**American Indian or Alaska Native:** An American Indian or Alaska Native is a person who has origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment. The primary source of race/ethnicity categorization in HSLs:09 was respondent self-identification.

**Analytic weights:** Analytic weights are sometimes called nonresponse-adjusted weights, adjusted (base) weights, or final analytic weights. The analytic weights are constructed by adjusting the base weights for factors such as subsampling of sample units, one or more nonresponse mechanisms (e.g., parent refusal of student participation and student refusal), and calibration (i.e., benchmarked) to population counts. (See also *Base weights* and *Calibration weight adjustment*.)

**Asian:** An Asian is a person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. The primary source of race/ethnicity categorization in HSLs:09 was respondent self-identification.

**Balanced repeated replication (BRR):** BRR weights can be used in HSLs:09 for variance estimation. BRR weights are based on a set of procedures that use a balanced set of pseudo-replicates. The BRR variance estimation process involves modeling the design as if it were a two-primary sampling unit (PSU) per stratum design. Variances are then calculated using a random group type of variance estimation procedure, with a balanced set of replicates as the groups. Balancing is done by creating replicates using an orthogonal matrix. An alternative variance estimation method available from the HSLs:09 data set is the Taylor series linearization. (See also *Taylor series linearization*.)

**Base weights:** Base weights compensate for unequal probabilities of selection into the study sample. A base weight is calculated as the inverse probability of selection and includes all stages of sample design (e.g., two design stages are used for HSLs:09). Base weights are also called raw weights, design weights, unadjusted weights, or sampling weights throughout the survey literature. Estimates using base weights may be contrasted with the corresponding estimates using weights adjusted for nonresponse.). Base weights are calculated for all sample members, respondents and nonrespondents alike. However, the base weights do not appear on the HSLs:09 data files, although they are used to generate response rates reported in the Data File Documentation. (See also *Analytic weights*, *Nonresponse bias*, and *Nonresponse bias analysis*.)

**Bias:** Bias is the difference between the reported value and the true value. An estimate of bias is calculated as the difference between the expected value of a sample estimate (e.g., estimated mean) and the corresponding true value for the population. The true values are generally not known and must also be estimated from the data. *Response*

*bias* is the difference between respondent reports and their true behavior or characteristics. *Nonresponse bias* is defined as the (statistically significant) difference in an estimate calculated from the respondent and nonrespondent subsets of the sample. *Undercoverage bias*, a type of sampling bias, arises because some critical portion of the target population is omitted from the sampling frame. For example, if the set of schools from which a school sample is drawn is incomplete or inaccurate (owing, for example, to the birth of new schools subsequent to the time the set of schools was identified, school undercoverage may occur. (See also *Nonresponse bias* and *Nonresponse bias analysis*.)

**Black or African American:** A Black or African American person is one having origins in any of the black racial groups of Africa. The primary source of race/ethnicity categorization in HSLs:09 was respondent self-identification.

**Burden:** Formally, burden is the aggregate hours realistically required for data providers to participate in a data collection. Burden also has a subjective or psychological dimension: the degree to which providing information is regarded as onerous may depend on the salience to the respondent of the questions that are being posed and on other factors, such as competing time demands and complexity of the information being requested.

**Calibration weight adjustment:** This is a weight adjustment that forces survey estimates to match independent population totals for specified characteristics. Poststratification is a specific type of weight calibration that uses the cross-classification of a set of variables to form poststrata (adjustment cells). Calibration adjustments for HSLs:09 were created through a model that included individual variables and a set of interaction terms (Folsom and Singh 2000).

**Classification of Secondary School Courses (CSSC):** The CSSC was the basic scheme for course coding in the prior high school transcript studies. Although not used directly in HSLs:09, cross walks between the CSSC and the taxonomy that was used (SCED) were also generated. (See also: *School Codes for the Exchange of Data [SCED]*.)

**Cluster:** A cluster is a group of sample members (or units) that is selected as one group in an early design stage. Sample members (or subsequent clusters of sample members) are then randomly selected from within the clusters chosen in the previous stage. For example, HSLs:09 clusters are schools and the sample members within the clusters are students. Examples of clusters in other studies include school districts, counties, and residential blocks. (See also *Primary sampling unit*.)

**Cluster size:** The cluster size is the number of HSLs:09 sample members attending a particular study-eligible base year or first follow-up school.

**Codebook:** A codebook is a document that contains a detailed description of each variable measured in HSLs:09 or derived from HSLs:09 variables. The description includes the variable name, values used to define each variable, unweighted frequencies, and unweighted and weighted percentages.

**Coefficient of Variation (CV):** The CV is calculated as the ratio of the estimated population standard deviation over the estimated population quantity (e.g., mean). Both estimates are calculated using the final analysis weights and software that appropriately accounts for the complex, two-stage sample design of HSLs:09. This quantity differs from the *relative standard error (relSE)*, sometimes referred to as the (estimated) CV. The *relSE* is calculated as the estimated population standard error divided by the estimated population quantity.

**Cohort:** A cohort is a group of individuals who have a statistical factor in common such as, for example, year of birth, grade in school, year of retirement, or year of high school graduation. The HSLs:09 cohort consists of ninth-grade high school students as of the fall term of the 2009–10 school year. Since no freshening was instituted for 11th grade, the 9th-grade cohort is the sole cohort in HSLs:09, unlike prior multi-cohort studies such as *NELS:88* and *ELS:2002*.

**Common Core of Data (CCD):** The CCD consists of data annually collected from all public schools in the United States by NCES. Study-eligible public schools were identified from the CCD to form the public school portion of the sampling frame for the HSLs:09 base year.

**Composite variable:** A composite variable is one that is constructed through either the combination of two or more variables (poverty status, for example, combines household size with family income) or through a mathematical function or statistical transformation (e.g., conversion of raw test scores to quintiles). A composite variable is also referred to as a derived, created, or constructed variable.

**Computer-assisted telephone interviewing (CATI):** CATI is a mode of data collection administered in HSLs:09 where an electronic questionnaire is administered to a sample member through a telephone interview.

**Confidence interval:** A confidence interval is a sample-based estimate expressed as an interval or range of values that is expected to contain the true population value given a specified degree of confidence.

**Confidentiality protections:** NCES is required by law to protect individually identifiable data from unauthorized disclosure. To this end, HSLs:09 data have been subject to a disclosure risk analysis to determine which records require masking to produce the public-use data file from the restricted-use data file. Disclosure coarsening techniques (such as recoding of continuous variables into categorical, top and bottom

coding, and so on), suppression of variables, and data perturbation techniques (e.g., data swapping) have been used to provide disclosure protection to HSLs:09 data. (See also *Data swapping* and *Disclosure risk analysis*.)

**Construct:** A construct is an abstract image, idea, or theory, formed from a number of simpler observable elements (e.g., socioeconomic status, or science self-efficacy). Constructs help summarize phenomena that are hypothesized to be in some important way(s) related.

**Contextual data:** In HSLs:09, the primary unit of analysis is the student. Survey information collected from other study participants, referred to as contextual data, should be viewed as extensions of the student data. For example, responses provided in the school administrator, teacher, counselor, and parent questionnaires on the student's school learning environment or home situation are classified as contextual data.

**Cross-cohort (or intercohort) comparison and analysis:** The HSLs:09 base-year survey is not precisely comparable in timing or grade cohort definition to the prior studies, which involved spring data collections for 8th-, 10th-, or 12th-grade students. HSLs:09 cohort definition is based on a single grade (ninth grade) at a single point in time (autumn term of 2009) reflecting also requirements that base year schools encompass both 9<sup>th</sup> and 11<sup>th</sup> grade. Although the transcripts will capture four years of high school coursetaking, because HSLs:09 has no 12<sup>th</sup> grade freshening, HSLs:09 transcripts cannot be compared to the NELS:88, ELS:2002, and NAEP high school transcript studies, all of which are anchored in high school seniors. Some longitudinal intercohort comparison is possible at a higher level of generality, however—that is, not based on a specific comparison grade—that encompasses modeling the transition from high school to postsecondary education and the workforce that is the subject of all of the secondary longitudinal studies.

**Cross-sectional analysis:** A cross-sectional design represents events and statuses at a single point in time. For example, a cross-sectional survey may measure the cumulative educational attainment (achievements, attitudes, statuses) of students at a particular stage of schooling, such as the beginning of ninth grade. Cross-sectional analysis in HSLs:09 can only be conducted for the base year (either at the student level or the school level). In contrast, a longitudinal study (or repeated measurement of the same sample units) measures the change or growth in educational attainments that occurs over a particular period of schooling. (See also *Longitudinal or panel survey* and *Cross-cohort comparison and analysis*.)

**Data swapping:** Data swapping is defined in the *NCES Statistical Standards* (Seastrom 2014) as a perturbation disclosure limitation technique that results in a “confidentiality” edit. An example of a need for data swapping would be to assume that a data file has two variables which in combination constitute a disclosure risk, for example,

sex and age. If a sample case needs disclosure protection, it is paired with another sampled case so that each element of the pair has the same age, but different sexes. The data on these two records are then swapped. After the swapping, anyone thinking they have identified either one of the paired cases gets the data of the other case, so they have not made an accurate match and the data have been protected. (See also *Confidentiality protections*.)

**Design effect:** The design effect (*deff*) is a measure of sample efficiency and is the variance of an estimate accounting for the complex nature of a survey design divided by the variance of the estimate that would have occurred if a sample of the same size had been selected using simple random sampling. Historically, the *deff* was used to adjust a variance estimate calculated with software that could not properly account for the sample design. More recently, the *deff* calculated for a set of study characteristics is used to compare the sample efficiency across surveys. Sometimes it is more useful to work with standard errors than with variances. The root design effect (*deft*) expresses the relation between the actual standard error of an estimate and the standard error of the corresponding estimates from a simple random sample. (See also *Effective sample size*.)

**Differential item functioning (DIF):** DIF exists when examinees of equal ability differ on an item solely because of their membership in a particular group (e.g., if an item favors males over females, or one racial or ethnic group over another, and cannot be explained by relevant factors such as differential coursetaking). DIF for HSLs:09 mathematics assessment items was examined in the base-year and first follow-up field tests. Items with DIF problems were revised or deleted. In both rounds, a DIF analysis was also conducted with main study data, to confirm that there were no DIF problems (none were identified).

**Disability:** A disability is a physical or mental impairment that substantially limits one or more of the major life activities (Title 42 U.S.C. Section 12102).

**Disclosure risk analysis:** This involves investigation of study data to evaluate and minimize the risk of identification of individual sample units to preserve the confidentiality of the data. HSLs:09 data have been subjected to a disclosure risk analysis to protect confidential information about individual respondents. For a more detailed account of disclosure risk analysis, and of means of altering data (including masking, data perturbation, and data swapping) to prevent disclosure, see the current NCEs Statistical Standards document. (See also *Confidentiality protections*, *Data swapping*, and *Public-use data file*.)

**Domain:** A domain, also called a subpopulation, refers to a defined universe of knowledge, skills, abilities, attitudes, interests, or other human characteristics. For example, certain estimates in the Data File Documentation are reported for the public-school domain and for the two domains within sex.

**Education Longitudinal Study of 2002 (ELS:2002):** ELS:2002 is the immediate predecessor study to HSLS:09 within the series of NCES Secondary Longitudinal Studies. It began with spring high school sophomores in 2002, with follow-up studies in 2004 (with freshening to create a senior cohort), 2006, and 2012. In addition to interview data, postsecondary education transcripts were collected (and high school transcripts were collected) for the ELS:2002 cohorts. URL: <http://nces.ed.gov/surveys/els2002/>.

**Effective sample size:** Effective sample size is defined as the ratio of the (unweighted) sample size divided by the design effect. In essence, the effective sample size is the sample size under a simple random sample design that has the same level of precision as obtained from the complex sample design. (See also *Design effect*.)

**File:** This refers to a data file containing a set of related computerized records.

**High School and Beyond (HS&B):** HS&B is the second in the series of longitudinal high school cohort studies sponsored by NCES. The HS&B base-year study surveyed sophomore and senior students in 1980. The sophomore cohort was last interviewed in 1992 and their postsecondary transcripts collected in 1993. The senior cohort was last interviewed in 1986. URL: <http://nces.ed.gov/surveys/hsb/>.

**Hispanic or Latino:** A Hispanic or Latino/Latina is a person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture, origin, or ethnicity regardless of race. The primary source of race/ethnicity categorization in HSLS:09 was respondent self-identification. Race/ethnicity was obtained for sampling purposes from administrative records provided by the *School Coordinator*.

**Imputation:** Imputation involves substituting values for missing or inconsistent data in a data set. Prediction of a missing value is typically based on a procedure that uses a mathematical model in combination with available information. Model covariates are identified from a set of variables known to be statistically and substantively related to the variable requiring imputation and

**Individually identifiable data:** These are data from any record, response form, completed survey, or aggregation about an individual or individuals from which the identity of a particular individual (or set of individuals) may be revealed.

**Item nonresponse:** Item nonresponse is defined as a missing response to a particular question item on an instrument when a valid response was expected. For example, a participant did not wish to provide income information and therefore left the question item unanswered (blank). Item nonresponse is generally limited to the set of sample members who have been classified as respondents by providing, for example, responses to key questionnaire items required for analysis. (See also *Nonresponse bias analysis* and *Unit nonresponse*.)

**Locale codes:** In earlier NCES secondary longitudinal studies, locale codes have been referred to as metropolitan status or urbanicity codes (for example, urbanicity trichotomized into three values—urban, suburban, or rural). The former codes were metro-centric (that is, based on metropolitan statistical areas). The HSLs:09 locale codes, however, use NCES’s new urban-centric codes. The new urban-centric locale codes follow the same logic as the older locale codes, but incorporate an approach that prioritizes population size and proximity to an urbanized area in assigning locale. The highest level (four terms) of the new locale code system was used in HSLs:09 school sampling to create substrata (with geography as superstrata). The four major categories are city (large or mid-size city), suburban (urban fringe of large or mid-size city), town (large or small), and rural (outside or inside a Core-Based Statistical Area). Although HSLs:09 uses only the four major or highest categories, each of the four categories is further subdivided in the NCES geocode scheme (for example, “town” comprises three statuses in relation to an urbanized area: fringe, distant, or remote from an urbanized area).

**Longitudinal or panel study:** In a longitudinal design, similar measurements—of the same sample of individuals, institutions, households, or of some other defined unit—are taken at multiple time points. HSLs:09 employs a longitudinal design that follows the same individuals over time and permits the analysis of individual-level change. (See also *Cross-sectional analysis*.)

**Microdata (microrecords):** These are observations of individual sample members, such as those contained on the HSLs:09 public use and restricted use data files.

**Mode effects:** Mode of administration effects can sometimes present difficulties for surveys. Typically the HSLs:09 questionnaires were administered in two modes: self-administration (via web) and interviewer administration (via web-based computer-assisted telephone interview [CATI] or laptop-based computer-assisted personal interview [CAPI]). (Although the mode of administration differs, the instruments are identical.) The concern is that sometimes (and in particular when perceived social desirability of questionnaire responses is a salient consideration and the item is administered by an interviewer) respondents may respond differently to the different stimuli provided by differing administration modes. However, format differences also can lead to mode effects, as when a question benefits from visual cues that cannot be duplicated in a telephone interview. For this reason, every effort was made in HSLs:09 to adapt questions so that differences between modes would be minimized.

**National Center for Education Statistics, Institute of Education Sciences, U.S. Department of Education (NCES):** This governmental agency is the sponsor of such current studies as HSLs:09 and ELS:2002, and is also the sponsoring agency for

(among other studies) the National Assessment of Educational Progress, and the following completed secondary longitudinal studies: National Education Longitudinal Study of 1988, the High School and Beyond longitudinal study, and the National Longitudinal Study of the High School Class of 1972.

**National Education Longitudinal Study of 1988 (NELS:88):** NELS:88 was the third in the series of longitudinal high school cohort studies sponsored by NCES. The study represents three cohorts: the eighth-grade class of 1988, the sophomore class of 1990, and the senior class of 1992. The study collected questionnaire and test data in 1988, 1990, and 1992 on students' school experiences, and background information from school administrators, teachers, parents (in the base year and second follow-up only), and school records. Data on postsecondary and out-of-school experiences were collected in interviews conducted in 1994 and 2000 and through a postsecondary education transcripts study in 2000–01. URL: <http://nces.ed.gov/surveys/nels88/>.

**National Longitudinal Study of the High School Class of 1972 (NLS:72):** This project was the first in the series of longitudinal high school cohort studies sponsored by NCES. The final round of data collection took place in 1986. URL: <http://nces.ed.gov/surveys/nls72/>.

**National Science Foundation (NSF):** NSF has collaborated with NCES in support of HSLS:09, particularly in matters that reflect state-level samples and records systems.

**Native Hawaiian or Other Pacific Islander:** A Native Hawaiian or Other Pacific Islander is any person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. The primary source of race/ethnicity categorization in HSLS:09 was respondent self-identification.

**Ninth-grade cohort (HSLS:09):** To be eligible for HSLS:09, a student had to be a fall-term ninth-grader in a U.S. school with both grades 9 and 11. Given this definition, HSLS:09 does not represent all ninth-grade students, since schools with grade spans such as K–9, 6–9, 7–9, 8–9, and so on, were ineligible for the study.

**Nonresponse bias:** Nonresponse bias may occur as a result of not obtaining 100 percent response from the selected cases. More specifically, nonresponse bias occurs when the population parameter estimated from the respondent data deviates from the population parameter. The potential magnitude of nonresponse bias is estimated as the product of the nonresponse rate and the difference in values of a characteristic between respondents and nonrespondents. (See also *Nonresponse bias analysis*.)

**Nonresponse bias analysis:** Nonresponse bias analysis compares the characteristics of respondents and nonrespondents. Both unit nonresponse (school and student) and item nonresponse on questionnaires were subject to bias analyses in

HSLs:09. For example, certain key data items were obtained in the base year for both responding and nonresponding schools, so that a school nonresponse bias analysis could be conducted, and bias in school-level estimates quantified and tested.

**Nonsampling error:** This is an error in sample estimates that cannot be attributed to sampling fluctuations. Such errors may arise from many sources including unit or item nonresponse across subgroups or errors in the respondent data such as through a student's keying error.

**Occupational Information Network (O\*NET):** O\*NET is the primary industry and occupation coding scheme used in HSLs:09. The O\*NET database was developed for the U.S. Department of Labor and represents an extensive set of worker attributes and job characteristics. O\*NET provides a nested coding structure: 23 general-level categories expand to 96 mid-level categories that can be expanded further to 821 specific-level categories.

**Office of Management and Budget, U.S. Executive Branch (OMB):** OMB is a federal agency with the responsibility for reviewing all studies funded by executive branch agencies. OMB reviewed, commented on, and approved the HSLs:09 questionnaires, and all study components including the sample design.

**Population variance:** This is a measure of dispersion defined as the average of the squared deviations between the population values and the mean of those population values.

**Precision:** Precision is calculated in terms of the sampling error (or standard error) of an estimate. Theoretically, precision is the deviation among estimates for a set of samples.

**Primary sampling unit (PSU):** The PSU is the unit chosen at the first stage of a sample design and is typically reserved for clusters of units selected at a subsequent stage of sampling in a multistage design. The HSLs:09 PSU is the base-year school that represents a cluster of students used to select the second-stage sample. In other studies, geographical units such as a county or metropolitan statistical area (MSA) may serve as the PSU.

**Probability sample:** A probability sample is a subset of the target population selected by a random mechanism using a fixed and predetermined probability of selection for each unit (i.e., each population unit has a known, nonzero chance of being included).

**Proficiency score:** Proficiency scores (or criterion-referenced mastery scores) are based on clusters of items that are of similar content and difficulty. Mathematics proficiency scores are reported in HSLs:09 and reflect such skills as, for example, understanding proportions or demonstrating an understanding of linear functions.

**Public-use data file:** A public-use file includes data that have been coded, aggregated, or otherwise altered to mask individually identifiable information. This file is available to the public through NCES. Unique identifiers, geographic detail, and other variables that cannot be suitably altered are suppressed in public-use data files. Public-use edits are based on an assumption that the public may have access to both individual respondent records and secondary data sources that include data that could be used to identify respondents. For this reason, the editing process is relatively extensive. When determining an appropriate masking process, the public-use edit takes into account and guards against matches on common variables from all known files that could be matched to the public-use file. The analysis used to determine which records require masking is called a disclosure risk analysis. (See also *Restricted-use data file* and *Disclosure risk analysis*.)

**Questionnaire-incapable students:** It was determined that, as in past surveys, some students could not be validly assessed or surveyed (even with accommodations) owing to severe physical, mental, or emotional limitations, or because of language barriers. These students were classified as “questionnaire-incapable” students but they were not deemed ineligible for the study. Contextual information was collected for these students including responses from some but not all parents, school administrators, teachers, and counselors, and they were given positive weights as applicable (student, parent, teacher, etc.). These students’ status was reviewed in the first follow-up and those whose situation had changed (for example, a student had become proficient in English over the ensuing two and a half years) were invited to participate.

**Range check:** A range check is a determination of whether responses fall within a predetermined set of acceptable values.

**Record format:** This is the layout of the information contained in a data record and includes the name, type, and size of each field in the record.

**Relative bias:** Relative bias is the bias of the estimate divided by the estimate. This measure identifies the magnitude of the bias relative to the point estimate.

**Reliability:** Reliability is the consistency in results of a test or measurement including the tendency of the test or measurement to produce the same results when applied twice to some entity or attribute believed not to have changed in the interval between measurements.

**Response rate (weighted):** In general, *unit response rates* are calculated as the ratio of the weighted number of completed instruments to the weighted number of eligible (in-scope) sample units, using the sample base weight (the inverse of the probability of selection). In multistage samples such as HSLs:09, overall student-level response is the product of both stages (although for many purposes, the stages are reported separately). *Item response rates* are calculated as the weighted ratio of the

number of respondents for whom an in-scope response was obtained to the number of respondents who are asked to answer a given item. More detailed information can be found by consulting NCES Standard 1-3 in the NCES 2002 Statistical Standards document (Seastrom 2014). Bias analyses conducted when response rates are below targets help to assess any possible limitations to the generalizability of survey estimates. (See also *Nonresponse bias analysis*.)

**Responsive design:** Some responsive design features have been used in the HSLs:09. Responsive design is a concept introduced by Groves and Heeringa (2006) where survey design features that can affect cost and survey statistics are pre-identified prior to data collection. Indicators of these design features are developed and monitored at two or more points during data collection. Ideally, these indicators demonstrate potential error risks and the survey design is adapted to mitigate those emerging risks. The specific responsive design goal that HSLs:09 sought to realize was reduction of bias in survey estimates that stemmed from initial nonresponse to the survey. This was achieved by identifying the nonresponding cases that were most likely to contribute to bias, and working to increase response within this targeted subset of the sample.

**Restricted-use data file:** A restricted-use file includes individually identifiable information that is confidential and protected by law. The basic strategy for HSLs:09 public- versus restricted-use file construction was to include the variables with limited disclosure treatment on the restricted-use file, and to modify or suppress values for these same variables on the public-use version. Use of the restricted data requires the researcher to obtain a special license from NCES. (See also *Public-use data file* and *Disclosure risk analysis*.)

**RTI International (RTI):** RTI is a nonprofit university-affiliated research organization with headquarters in Research Triangle Park, North Carolina. RTI conducted the HSLs:09 base-year study and is currently conducting the first follow-up study on behalf of NCES. RTI International is a trade name of Research Triangle Institute. URL: <http://www.rti.org/>.

**Sampling error:** Sampling error is the difference between a value for an entire population and an estimate of that value derived from a probability sample (i.e., subset of the population).

**Sampling frame:** A sampling frame is a list of all of the sampling units for the target population associated with a particular stage of the sample design. The Common Core of Data and Private School Universe Survey were the basis of the HSLs:09 school (first-stage) sampling frame. The student sampling frame was equivalent to the ninth-grade enrollment lists (rosters) provided by the HSLs:09 sampled schools. The *sampling frame population* is the set of elements associated with this list. As with every survey, the sampling frame is constructed in an attempt to enumerate every member of the target

population. Differences between the sampling frame and target populations are linked to coverage errors. (See also *Bias*, *Coverage rate*, and *Target population*.)

**Sampling variance:** Sampling variance is the variation associated with the set of estimates generated from (theoretical) repeated implementation of the essential survey conditions (sample design, frame, sample size, instrument, data collection methodology, etc.). The square root of the sampling variance is the standard error. These statistics are estimated using the sample data from a single survey and the final analytic weights.

**School Codes for the Exchange of Data (SCED):** The SCED is part of NCES's Secondary School Course Classification System. Historically (NAEP, ELS:2002, NELS:88, HS&B) high school transcripts were coded using the Classification of Secondary School Courses (CSSC). HSLs:09, however, coded high school courses to the SCED taxonomy. For further information about SCED, see National Forum on Education Statistics. (2014). *Forum Guide to School Courses for the Exchange of Data (SCED) Classification System*. (NFES 2014-802): U.S. Department of Education. Washington, DC: National Center for Education Statistics.

**Selection probability:** The selection probability, also referred to as the inclusion probability, is the random chance that a particular sampling unit has of being selected into the sample. These values are greater than zero and, in general, less than or equal to one. Selection probabilities equal to zero are only (theoretically) associated with ineligible sampling frame units.

**Simple random sampling (SRS):** SRS uses equal probability sampling with no strata or clusters. The HSLs:09 sample is stratified and clustered. Standard statistical analysis software assumes SRS and independently distributed errors. For studies such as HSLs:09, special variance estimation software (such as SUDAAN, WesVar, AM, Stata, or R) is required to compute (Taylor Series) linearization or replication variance estimates. The HSLs:09 restricted-use data files contain linearization weights and balanced repeated replication weights ) are available on all files. (See also *Analytic weights* and *Balanced repeated replication*.)

**Socioeconomic status (SES):** A socioeconomic status variable has been created for subpopulation definition and as an independent or control variable. SES is a social status construct represented by an index in HSLs:09 that takes account of the student's home background as represented by parent's education, parents' occupations, and family income. Two SES measures are available on the data files, both in continuous form as well as weighted quintiles. The first HSLs:09 SES index is quite similar to measures employed in *NELS:88*, *ELS:2002*, and earlier NCES secondary longitudinal studies. A second version of the SES index was created for HSLs:09 that includes a covariate adjustment based on school locale (city, suburban, town, or rural locale). In this alternative version of the SES composite, locale is accorded a role as a factor that

differentially affects the impact of education, occupation, and income on relative social position.

**Standard deviation:** This is the square root of the population (unit) variance used in, for example, the calculation of the standardized theta score in the mathematics assessment.

**Standard error:** This is the square root of the population sampling variance. It is a measure of the dispersion of the sampling distribution of a statistic. Standard errors are used to establish confidence intervals for the statistics being analyzed and are constructed using the final analysis weights and software that accounts for the complex HSLs:09 sample design.

**Statistical significance:** Statistical significance is the finding (based on a derived probability, rather than a certitude) that, for example, two or more estimates are truly different from one another and not a merely apparent difference reflecting chance variation.

**STEM:** The acronym STEM stands for science, technology, engineering and mathematics. STEM coursetaking is a major focus of HSLs:09.

**Stratification:** Stratification is the division of a population into distinct, mutually exclusive and exhaustive subgroups (strata). Strata are generally defined to include relatively homogeneous units on characteristics that are of interest to the study. Stratification is used to reduce sampling error. In HSLs:09, the first-stage strata were formed and schools were selected independently within each stratum. Students were independently selected within strata defined by race/ethnicity.

**Target population:** Target population is defined as the elements identified for a particular study. The weighted results tabulated from the HSLs:09 data provide estimates for target populations and population domains. In HSLs:09, the base-year target population was fall-term 9th-graders in all regular public and private schools with 9th and 11th grades in the 50 states and the District of Columbia.

**Taylor series linearization:** The Taylor series variance estimation procedure is used to estimate the variance of linear statistics (e.g., estimated totals) and nonlinear statistics (e.g., proportions or ratios). For nonlinear statistics, the procedure takes the first-order Taylor series approximation of the nonlinear statistics and then substitutes the linear representation into the appropriate variance formula based on the sample design. Because HSLs:09 is a stratified multistage survey, the Taylor series procedure requires analytic strata and analytic primary sampling units, defined from the sampling strata and primary sampling units (HSLs:09 schools). (See also *Balanced repeated replication*.)

**Technical Review Panel (TRP):** A TRP is a specially appointed, independent group of substantive, methodological, and technical experts who offer advice to the study

contractor on issues of study design and content. TRP members are nominated by RTI and approved by NCES. Typically TRPs are convened prior to and subsequent to a field test.

**Unit nonresponse:** Unit nonresponse is the failure of a survey unit (e.g., at the institutional level, a school, or at the individual level, a respondent, such as a student or a teacher) to cooperate or complete a survey instrument. *Overall unit nonresponse* reflects a combination of unit nonresponse across two or more levels of data collection, where participation at the second stage of data collection is conditional upon participation in the first stage of data collection. In HSLs:09, overall nonresponse is the product of school-level nonresponse times student nonresponse. *Total item nonresponse* reflects a combination of the overall unit nonresponse and item nonresponse. (See also *Item nonresponse* and *Nonresponse bias*.)

**Validity:** Validity is the capacity of an item or instrument to measure what it was designed to measure, stated most often in terms of the correlation between scores in the instrument and measures of performance on some external criterion. It is the extent to which a test or set of operations measures what it is supposed to measure. Reliability, on the other hand, refers to consistency of measurement over time. (See also *Reliability*.)

**Variance estimation:** Variance estimation is the measure of the variability of a statistic and includes the standard error and error variance. Two procedures for estimating variances of survey statistics in HSLs:09 are the BRR (balanced repeated replication) and Taylor series. BRR (available on both the public-use and restricted-use files) is recommended for HSLs:09 data. (See also *Balanced repeated replication* and *Taylor series linearization*.)

**Weighted estimates:** Weighted estimates (are survey estimates generated from survey data that have been statistically weighted (multiplied) by factors reflecting the sample design. The general purpose of weighting is to compensate for unequal probabilities of selection into the sample and to adjust for the fact that not all schools or individuals selected into the sample actually participated. (See also *Analytic weights*.)

**White:** A White person is one having origins in any of the original peoples of Europe, the Middle East, or North Africa. The primary source of race/ethnicity categorization in HSLs:09 was respondent self-identification.

# Appendix E: Standard Errors and Design Effects

*This page intentionally left blank*

The estimated standard errors (SEs), design effects (*deff*), and root design effects (*deft*) are presented in the following tables by study instrument and survey item. The student variables from the 2013 questionnaire, or derived from that questionnaire, are displayed in tables E-1 through E-20. The student variables from the high school transcript, or derived from the high school transcript, are displayed in tables E-21 through E-40.

Design effects (*deff*) measure the relative efficiency of a sample design using particular items collected in the survey. These values are calculated as the ratio of two estimated variances,

$$deff = \frac{\hat{V}_d(\hat{\theta})}{\hat{V}_s(\hat{\theta})},$$

for an estimated HSLs:09 characteristic  $\hat{\theta}$ . The numerator value,  $\hat{V}_d(\hat{\theta})$ , is the estimated variance that properly accounts for the complex sample design and the variability associated with the analytic weights. The denominator value,  $\hat{V}_s(\hat{\theta})$ , is the estimated variance from a simple random sample (*srs*) design of the same size. Like *deff*, root design effect or *deft* also provides a measure of relative efficiency of a sample design but in terms of the standard errors:

$$deft = \sqrt{\frac{\hat{V}_d(\hat{\theta})}{\hat{V}_s(\hat{\theta})}},$$

where the components are the same as defined for *deff*.

# Appendix F: Unit and Item Nonresponse Bias Analyses

*This page intentionally left blank*

Tabular results for the unit and item nonresponse bias analyses (section 6.2) conducted with the High School Longitudinal Study of 2009 (HSLs:09) 2013 Update data are presented below. The unit bias analysis results are provided in tables F-1 through F-18. The appendix concludes with the item-level analysis in tables F-19 through F-68.

Unit nonresponse bias analyses were conducted for HSLs:09 2013 Update. The primary purpose of this task was first to test for detectable levels of nonresponse bias in the values known for respondents and nonrespondents, and then to determine whether those levels still exist after adjusting the analytic weights through a subsequent test.

The unit nonresponse bias tables are presented in this section for each HSLs:09 2013 Update analytic weight—W3STUDENT, W3W1STU, W3W1W2STU, W3W2STU, W3HSTRANS, W3STUDENTTR, W3W1STUTR, W3W1W2STUTR, and W32STUTR. Details of the analysis procedure along with the summary of the analysis tables are included in section 6.2.

Item nonresponse bias analysis, like the unit-level bias, is used to evaluate bias associated with nonresponse. The difference is that this analysis focuses on non-negligible patterns of item nonresponse among the (unit) respondents. All variable values collected in the student questionnaire or constructed as student-level transcript-related variables were evaluated to identify those with weighted item response rates less than 85 percent for this analysis. Details of the analysis procedure along with the summary of the analysis tables are included in section 6.2. Within the item nonresponse bias analysis, 800 bias tests were conducted on a total of 50 student using the student base weight, where 58.4 percent of the tests showed significant levels of bias.<sup>1</sup>

---

<sup>1</sup> All statistical tests were conducted at the 0.05 significance level.

† Not applicable.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

† Not applicable.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

† Not applicable.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).

<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.

<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.

<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).

<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.

<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

† Not applicable.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).

<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.

<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.

<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).

<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.

<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

† Not applicable.

# Rounds to zero.

\* Difference between means is significant at the 0.05 level.

<sup>1</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX

<sup>2</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

† Not applicable.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

† Not applicable.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).

<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.

<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.

<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).

<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.

<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

# Rounds to zero.

\* Bias is significant at the 0.05 level.

<sup>1</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>2</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>3</sup> Bias in the sample mean is estimated as the product of the base-weighted non-response rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight). The nonresponse rate is not incorporated in the statistical test of significance.<sup>4</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).<sup>5</sup> Composite sex variable used in nonresponse adjustment for which if X2SEX is known then the composite variable is equal to X2SEX. If X2SEX is unknown then the composite variable is equal to X1SEX.<sup>6</sup> Composite race variable used in nonresponse adjustment for which if X2RACE is known then the composite variable is equal to X2RACE. If X2RACE is unknown then frame race data is used to compute the composite race variable.

NOTE: Detail may not sum to totals because of rounding.

# Appendix G: Imputation Details

*This page intentionally left blank*

**Table G-1. Imputation variables<sup>1</sup>**

<b>Variable</b>	<b>Description</b>	<b>Values</b>
<i>S3HSCRED</i>	<i>Teenager has high school credential</i>	1 = Yes 0 = No
<i>S3HSCREDTYPE</i>	<i>Type of high school credential</i>	1 = High school diploma 2 = GED or other high school equivalency 3 = Certificate of attendance
<i>S2HSCRED</i>	<i>S2 A05 Teenager has earned a high school credential</i>	1 = Regular diploma 2 = GED/Alternative high school credential 3 = No
<i>S3HSCREDMO</i>	<i>S3 A03A Month received high school credential</i>	1 = January 2 = February 3 = March 4 = April 5 = May 6 = June 7 = July 8 = August 9 = September 10 = October 11 = November 12 = December
<i>S3HSCREDYR</i>	<i>S3 A03B Year received high school credential</i>	2009 – 2013
<i>S3LASTHSMO</i>	<i>Month dropout/alternative completer last attended high school</i>	1 = January 2 = February 3 = March 4 = April 5 = May 6 = June 7 = July 8 = August 9 = September 10 = October 11 = November 12 = December
<i>S3LASTHSYR</i>	<i>Year dropout/alternative completer last attended high school</i>	2009 – 2013
<i>X3LASTHSDATE</i>	<i>Date dropout/alternative completer last attended high school</i>	200909-201310

See notes at end of table.

**Table G-1. Imputation variables<sup>1</sup>—Continued**

<b>Variable</b>	<b>Description</b>	<b>Values</b>
S2LASTHSMO	Month teenager last attended high school	1 = January 2 = February 3 = March 4 = April 5 = May 6 = June 7 = July 8 = August 9 = September 10 = October 11 = November 12 = December
S2LASTHSYR	Year teenager last attended high school	2009 – 2012
S3ENROLLHS13	S3 A04 Teenager's high school enrollment status spring 2013 term/fall 2013 term	1 = Attending high school 2 = Not attending high school 3 = Being homeschooled
S3CNSLCLG	S3 A17A Has met with high school counselor about college admissions in 2012-2013 year	1 = Yes 2 = No 3 = Don't know (Valid response)
S3CLASSES	S3 B01A Taking postsecondary classes as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S2CLG2013	S2 C21A Expects to continue education after HS in fall 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3APPRENTICE	S3 B01B Apprenticing as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3WORK	S3 B01C Working for pay as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S2WORK2013	S2 C12B Expects to work in fall 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3MILITARY	S3 B01D Serving in the military as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3FAMILY	S3 B01E Starting family/taking care of children as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3HS	S3 B01F Attending high school or homeschool as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)

See notes at end of table.

**Table G-1. Imputation variables<sup>1</sup>—Continued**

<b>Variable</b>	<b>Description</b>	<b>Values</b>
S3GEDCOURSE	S3 B01G In a course to prepare for GED as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3WORKFT	S3 B04 Working full-time as of Nov 1 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3CURWORK	Currently working for pay	1 = Yes 0 = No
S3CLGFT	S3 B03 Attending college full-time or part-time as of Nov 1 2013	1 = Full-time 2 = Part-time 3 = Don't Know (Valid response)
S3PROGLEVEL	Level of program enrolled in as of Nov 1 2013	1 = Bachelor's degree program (usually a 4-year degree) 2=Associate's degree program (usually a 2-year degree) 3=Certificate or diploma program from a school that provides occupational training (usually takes 2 years or less to complete, often leading to a license, such as cosmetology) 4=No specific program, but [you/he/she] [will be/were] taking courses 5=Other 6=You don't know
S3AAB4BA	Will complete Associate's degree before transferring to Bachelor's program	1 = Yes 0 = No
S3CLGAPPNUM	How many postsecondary institutions applied to/registered at	0 - 69
S3NOPOSTSEC	Did not complete FAFSA because teen does not plan to continue education	1 = Yes 0 = No
S3DONOTWANT	Not attending postsecondary school as of Nov 1 2013 - does not want to	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3NOTADMITTED	Not attending postsecondary school as of Nov 1 2013 - did not get in	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3CANTAFFORD	Not attending postsecondary school as of Nov 1 2013 - can't afford	1 = Yes 2 = No 3 = Don't Know (Valid response)
S3NOCLGOTH	Not attending postsecondary school as of Nov 1 2013 - other reason	1 = Yes 2 = No 3 = Don't Know (Valid response)
X3SQDATE	Questionnaire Date	20130601 - 20131231

See notes at end of table.

**Table G-1. Imputation variables<sup>1</sup>—Continued**

<b>Variable</b>	<b>Description</b>	<b>Values</b>
X3RTYPE	Respondent type	1=Student 2=Parent
S2GRD1011	S2 A13 Grade level in 2010-2011 school year	1 = 9th grade 2 = 10th grade 3 = 11th grade 4 = 12th grade 5 = Ungraded program 6 = Not attending during 2010-2011 school year
S2GRD1112	S2 A14 Grade level in spring 2012 or last 2011-2012 attendance	1 = 9th grade 2 = 10th grade 3 = 11th grade 4 = 12th grade 5 = Ungraded program 6 = Not attending during 2011-2012 school year
S2REQSEL4YR	S2 C10D Will meet requirements for selective 4-year college by summer 2013	1 = Yes 2 = No 3 = Don't Know (Valid response)
X2UNIV2B	Sample member F1 status	1 = In school, in grade 11 2 = In school, not in grade 11 3 = In school, ungraded or unknown grade 4 = Home schooled 5 = Early graduate 6 = Left school 7 = Nonrespondent 8 = Questionnaire incapable 9 = Out of scope cases and deceased cases
X2DROPSTAT	X2 F1 dropout status	0 = Not dropout and not alternative completer 1 = Current dropout as of spring 2012 2 = Alternative completer 3 = Student/parent/prior school report of dropout episode 4 = Status unknown 9 = Out of scope or ineligible
X2TXMSEM	X2 Mathematics standard error of measurement	Continuous
X2TXMTH	X2 Mathematics theta score	Continuous
X1TXMTH	X1 Mathematics theta score	Continuous
X2SES	X2 Socio-economic status composite	Continuous
X1SES	X1 Socio-economic status composite	Continuous

# Appendix H: Weighting Equations

*This page intentionally left blank*

The creation of analytic weights for the analyses of the High School Longitudinal Study of 2009 (HSLs:09) 2013 Update and High School Transcript study is detailed below. The formation of each weight involved nonresponse adjustments, and calibration adjustments, each of which are defined in this appendix for every 2013 Update and High School Transcript analytic weight.

The nonresponse and calibration weight adjustments are defined in equation form for each weight — W3STUDENT, W3W1STU, W3W2STU, W3W1W2STU, W3HSTRANS, W3STUDENTTR, W3W1STUTR, W3W2STUTR, and W3W1W2STUTR.

In the text and equations that follow, a sample member for whom one or more high school transcripts were collected is referred to as a “transcript respondent” or as having “responded in the transcript collection.”

## H.1 Student 2013 Update Analytic Weight (W3STUDENT)

### *Base Weight*

The student base weight developed for the HSLs:09 base year also served as the 2013 Update base weight. Specifically, the HSLs:09 base student weight was calculated as

$$w_{1hij} = w_{3hi} d_{j|hi}, \quad (\text{H-1})$$

where  $w_{3hi}$  is the base year school analytic weight and  $d_{j|hi}$  is the conditional student-level base weight (inverse probability of selection in stratum  $j$  within sample school  $hi$ ). Please see the base year data file documentation (Ingels et al. 2011) for more information on the construction of the HSLs:09 base student weight.

### *Adjustments for Nonresponse for W3STUDENT*

The deceased students and the 2013 Update questionnaire incapable students and were not included in either nonresponse adjustment to create the 2013 Update student analytic weight.

*Triple nonrespondents.* The student weight adjusted for the first of the two nonresponse conditions was defined as

$$w_{2hij} = \begin{cases} w_{1hij} a_{1hij}, & \text{for students who responded or were questionnaire incapable} \\ & \text{in at least one of the base year, first follow-up,} \\ & \text{or 2013 Update} \\ 0, & \text{for students who did not respond or were not questionnaire} \\ & \text{incapable in any one of the base year, first follow-up,} \\ & \text{or 2013 Update} \end{cases} \quad (\text{H-2})$$

where  $a_{1hij}$  is the first nonresponse weight adjustment that accounts for nonresponse to HSLs:09 base year, first follow-up, and 2013 Update, and  $w_{1hij}$  is the base weight as described in expression (H-1). Summary statistics for the first nonresponse weight adjustment are the following: minimum = 1.00, median = 1.05, and maximum = 1.54.

*Other nonrespondents.* A second model was constructed to inflate  $w_{2hij}$  for the 2013 Update responding students, resulting in the nonresponse-adjusted student weight:

$$w_{3hij} = \begin{cases} w_{2hij} a_{2hij}, & \text{for 2013 Update responding students} \\ 0, & \text{for students who did not respond in the 2013 Update} \end{cases} \quad (\text{H-3})$$

where  $a_{2hij}$  is the second student nonresponse weight adjustment, and  $w_{2hij}$  is the 2013 Update student analytic weight adjusted for triple nonresponse, described in expression (H-2). The minimum, median, and maximum values for  $a_{2hij}$  are 1.00, 1.24, and 4.14 respectively.

### ***Weight Calibration to Produce the Final Analytic Weight W3STUDENT***

A final weight adjustment was applied to the weight in expression (H-3) to maintain consistency with the student population first defined in the HSLS:09 base year. The final 2013 Update student analytic weight (W3STUDENT) was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for 2013 Update responding students,} \\ w_{1hij} a_{3hij}, & \text{for 2013 Update questionnaire-incapable students,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in the 2013 Update} \end{cases} \quad (\text{H-4})$$

where  $a_{3hij}$  is the calibration adjustment determined through the exponential model,  $w_{3hij}$  is the weight adjusted for student nonresponse in the 2013 Update as described in expression (H-3), and  $w_{1hij}$  is the base weight as described in expression (H-1). The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model for the responding students,  $w_{3hi}$ , was trimmed prior to the calibration adjustment, to account for weights with an extremely high value. The minimum, median, and maximum values for  $a_{3hij}$  are 0.60, 1.20, and 5.22, respectively.

## **H.2 Base year to 2013 Update Student Longitudinal Analytic Weight (W3W1STU)**

### ***Adjustment for Nonresponse for W3W1STU***

The deceased students and 2013 Update questionnaire incapable students who are base-year respondents or questionnaire incapable were not included in either nonresponse adjustment used to construct the base year to 2013 Update student longitudinal analytic weight. The longitudinal student weight adjusted for nonresponse in the base year and/or 2013 Update was constructed as

$$w_{3hij} = \begin{cases} w_{2hij} a_{2hij}, & \text{for students who responded to the base year and 2013 update,} \\ & \text{or for questionnaire incapable base year students who responded} \\ & \text{in the 2013 Update} \\ 0, & \text{for students who did not respond in either the base year} \\ & \text{or 2013 Update} \end{cases} \quad (\text{H-5})$$

where  $a_{2hij}$  is the nonresponse adjustment, and  $w_{2hij}$  is the 2013 Update student analytic weight adjusted for triple nonresponse, described in section H.1 and expression (H-2). The minimum, median, and maximum values for  $a_{2hij}$  are 1.06, 1.32, and 6.61, respectively.

### ***Weight Calibration to Produce the Final Longitudinal Analytic Weight W3W1STU***

A calibration factor was applied to the nonresponse-adjusted weight given in expression (H-5) to produce the final base year to 2013 Update student longitudinal analytic weight. The base year to 2013 Update student longitudinal analytic weight (W3W1STU) was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded to the base year and 2013 Update,} \\ & \text{or for questionnaire incapable base year students who responded} \\ & \text{in the 2013 Update} \\ w_{1hij} a_{3hij}, & \text{for students who responded in the base year and were questionnaire} \\ & \text{incapable in the 2013 Update,} \\ & \text{or for students who were questionnaire incapable in the base year} \\ & \text{and 2013 Update,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in either the base year} \\ & \text{or 2013 Update} \end{cases} \quad (\text{H-6})$$

where  $a_{3hij}$  is the calibration adjustment determined through the exponential model,  $w_{3hij}$  is the student weight adjusted for nonresponse in the base year and/or 2013 Update, as described in expression (H-5), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model for the responding students,  $w_{3hi}$ , was trimmed prior to the calibration adjustment, to account for extreme weights. The minimum, median, and maximum values for  $a_{3hij}$  are 0.61, 1.20, and 5.25, respectively.

## **H.3 First follow-up to 2013 Update Student Longitudinal Analytic Weight (W3W2STU)**

### ***Adjustment for Nonresponse for W3W2STU***

The deceased students and 2013 Update questionnaire incapable students who are first follow-up respondents or questionnaire incapable were not included in either nonresponse adjustment used to construct the first follow-up to 2013 Update student longitudinal analytic weight. The longitudinal student weight adjusted for nonresponse in the first follow-up and/or 2013 Update was constructed as

$$w_{3hij} = \begin{cases} w_{2hij} a_{2hij}, & \text{for students who responded to the first follow-up and 2013 update,} \\ & \text{or for questionnaire incapable first follow-up students who responded} \\ & \text{in the 2013 Update} \\ 0, & \text{for students who did not respond in either the first follow-up} \\ & \text{or 2013 Update} \end{cases} \quad (\text{H-7})$$

where  $a_{2hij}$  is the nonresponse adjustment, and  $w_{2hij}$  is the 2013 Update student analytic weight adjusted for triple nonresponse, described in section H.1 and expression (H-2). The minimum, median, and maximum values for  $a_{2hij}$  are 1.00, 1.21, and 4.70, respectively.

### ***Weight Calibration to Produce the Final Longitudinal Analytic Weight W3W2STU***

A calibration factor was applied to the nonresponse-adjusted weight given in expression (H-7) to produce the final first follow-up to 2013 Update student longitudinal analytic weight. The student first follow-up to 2013 Update longitudinal analytic weight (W3W2STU) was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded to the first follow-up and 2013 Update,} \\ & \text{or for questionnaire incapable first follow-up students who responded} \\ & \text{in the 2013 Update} \\ w_{1hij} a_{3hij}, & \text{for students who responded in the first follow-up and were questionnaire} \\ & \text{incapable in the 2013 Update,} \\ & \text{or for students who were questionnaire incapable in the first follow-up} \\ & \text{and 2013 Update,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in either the first follow-up} \\ & \text{or 2013 Update} \end{cases} \quad (\text{H-8})$$

where  $a_{3hij}$  is the calibration adjustment determined through the exponential model,  $w_{3hij}$  is the student weight adjusted for nonresponse in the first follow-up and/or 2013 Update, as described in expression (H-7), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model for the responding students,  $w_{3hi}$ , was trimmed prior to the calibration adjustment, to account for extreme weights. The minimum, median, and maximum values for  $a_{3hij}$  are 0.59, 1.21, and 5.30, respectively.

## H.4 Base year to First Follow-up to 2013 Update Student Longitudinal Analytic Weight (W3W1W2STU)

### *Adjustment for Nonresponse for W3W1W2STU*

The deceased students and 2013 Update questionnaire incapable students who are base year respondents or questionnaire incapable and first follow-up respondents or questionnaire incapable were not included in either nonresponse adjustment used to construct W3W1W2STU. The longitudinal student weight adjusted for nonresponse in the base year, first follow-up, and/or 2013 Update was constructed as

$$w_{3hij} = \begin{cases} w_{2hij} a_{2hij}, & \text{for students who responded to the base year, first follow-up,} \\ & \text{and 2013 Update,} \\ & \text{or for questionnaire incapable base year students who responded} \\ & \text{in the first follow-up and 2013 Update,} \\ & \text{or for students who responded in the base year, were} \\ & \text{questionnaire incapable in the first follow-up, and responded} \\ & \text{in the 2013 Update,} \\ & \text{or for students who were questionnaire incapable in the base year} \\ & \text{and first follow-up, and responded in the 2013 Update} \\ 0, & \text{for students who did not respond in at least one of the} \\ & \text{base year, first follow-up, or 2013 Update} \end{cases} \quad (\text{H-9})$$

where  $a_{2hij}$  is the nonresponse adjustment, and  $w_{2hij}$  is the 2013 Update student analytic weight adjusted for triple nonresponse, described in section H.1 and expression (H-2). The minimum, median, and maximum values for  $a_{2hij}$  are 1.06, 1.43, and 5.43, respectively.

### *Weight Calibration to Produce the Final Longitudinal Analytic Weight W3W1W2STU*

A calibration factor was applied to the nonresponse-adjusted weight given in expression (H-9) to produce the final base year to first follow-up to 2013 Update student longitudinal analytic weight. The base year to first follow-up to 2013 Update student longitudinal analytic weight (W3W1W2STU) was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded to the base year, first follow-up,} \\ & \text{and 2013 Update,} \\ & \text{or for questionnaire incapable base year students who responded} \\ & \text{in the first follow-up and 2013 Update,} \\ & \text{or for students who responded in the base year, were questionnaire} \\ & \text{incapable in the first follow-up, and responded in the} \\ & \text{2013 Update,} \\ & \text{or for students who were questionnaire incapable in the base year} \\ & \text{and first follow-up, and responded in the 2013 Update} \\ w_{1hij} a_{3hij}, & \text{for students who responded in the base year and first follow-up,} \\ & \text{and were questionnaire incapable in the 2013 Update,} \\ & \text{or for students who were questionnaire incapable in the base year,} \\ & \text{responded in the first follow-up, and were questionnaire} \\ & \text{incapable in the 2013 Update,} \\ & \text{or for students who responded in the base year, and were} \\ & \text{questionnaire incapable in the first follow-up and 2013 Update,} \\ & \text{or for students who were questionnaire incapable in the base year,} \\ & \text{first follow-up, and 2013 Update,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in at least one of the} \\ & \text{base year, first follow-up, or 2013 Update} \end{cases} \quad (\text{H-10})$$

where  $a_{3hij}$  is the calibration adjustment determined through the exponential model,  $w_{3hij}$  is the student weight adjusted for nonresponse in the base year, first follow-up, and/or 2013 Update, as described in expression (H-9), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model for the responding students,  $w_{3hi}$ , was trimmed prior to the calibration adjustment, to account for extreme weights. The minimum, median, and maximum values for  $a_{3hij}$  are 0.60, 1.19, and 5.11, respectively.

## H.5 High School Transcript Analytic Weight (W3HSTRANS)

### *Adjustments for Nonresponse for W3HSTRANS*

The 2013 Update questionnaire incapable students and deceased students were not included in either nonresponse adjustment to create the high school transcript analytic weight.

*Triple nonrespondents.* The transcript weight adjusted for the first of the two nonresponse conditions was defined as

$$w_{2hij} = \begin{cases} w_{1hij} a_{1hij}, & \text{for students who responded or were questionnaire incapable} \\ & \text{in at least one of the base year, first follow-up,} \\ & \text{or 2013 Update} \\ 0, & \text{for students who did not respond or were not questionnaire} \\ & \text{incapable in any one of the base year, first follow-up,} \\ & \text{or 2013 Update} \end{cases} \quad (\text{H-11})$$

where  $a_{1hij}$  is the first nonresponse weight adjustment that accounts for nonresponse to HSLs:09 base year, first follow-up, and 2013 Update, and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. Summary statistics for the first nonresponse weight adjustment are the following: minimum = 1.00, median = 1.05, and maximum = 1.54.

*Other nonrespondents.* A second model was constructed to inflate  $w_{2hij}$  for the high school transcript collection responding students, resulting in the nonresponse-adjusted transcript weight:

$$w_{3hij} = \begin{cases} w_{2hij} a_{2hij}, & \text{for students who responded in the transcript collection} \\ 0, & \text{for students who did not respond in the transcript collection} \end{cases} \quad (\text{H-12})$$

where  $a_{2hij}$  is the second high school transcript nonresponse weight adjustment, and  $w_{2hij}$  is the high school transcript analytic weight adjusted for triple nonresponse, described in expression (H-11). The minimum, median, and maximum values for  $a_{2hij}$  are 1.00, 1.05, and 4.00 respectively.

### ***Weight Calibration to Produce the Final Analytic Weight W3HSTRANS***

A final weight adjustment was applied to the weight in expression (H-12) to maintain consistency with the student population first defined in the HSLs:09 base year. The final high school transcript analytic weight (W3HSTRANS) was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded in the transcript collection} \\ w_{1hij} a_{3hij}, & \text{for students who responded in the transcript collection} \\ & \text{and were 2013 Update questionnaire-incapable students,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in the transcript collection} \end{cases} \quad (\text{H-13})$$

where  $a_{3hij}$  is the calibration adjustment determined through the exponential model,  $w_{3hij}$  is the weight adjusted for student nonresponse in the high school transcript collection as described in expression (H-12), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model

for the responding students,  $w_{3hi}$ , was trimmed prior to the calibration adjustment, to account for weights with an extremely high value. The minimum, median, and maximum values for  $a_{3hij}$  are 0.54, 1.19, and 4.33, respectively.

## H.6 High School Transcript and 2013 Update Analytic Weight (W3STUDENTTR)

### *Adjustment for Nonresponse for W3STUDENTTR*

The deceased students and 2013 Update questionnaire incapable students who are high school transcript collection respondents were not included in any nonresponse adjustment used to construct the high school transcript and 2013 Update analytic weight. The analytic weight adjusted for nonresponse in the high school transcript collection and 2013 Update was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded in the transcript collection} \\ & \text{and 2013 Update,} \\ 0, & \text{for students who did not respond in either the transcript} \\ & \text{collection or 2013 Update} \end{cases} \quad (\text{H-14})$$

where  $a_{3hij}$  is the nonresponse adjustment,  $w_{3hij}$  is the high school transcript analytic weight adjusted for triple nonresponse and nonresponse in the high school transcript collection, described in section H.5 and expression (H-12). The minimum, median, and maximum values for  $a_{3hij}$  are 1.02, 1.15, and 3.15, respectively.

### *Weight Calibration to Produce the Final Analytic Weight W3STUDENTTR*

A calibration factor was applied to the nonresponse-adjusted weight given in expression (H-14) to produce the final high school transcript and 2013 Update analytic weight. The high school transcript and 2013 Update analytic weight (W3STUDENTTR) was constructed as

$$w_{5hij} = \begin{cases} w_{4hij} a_{4hij}, & \text{for students who responded in the transcript collection} \\ & \text{and 2013 Update,} \\ w_{1hij} a_{4hij}, & \text{for students who responded in the transcript collection} \\ & \text{and were questionnaire incapable in the 2013 Update,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in either the} \\ & \text{transcript collection or 2013 Update} \end{cases} \quad (\text{H-15})$$

where  $a_{4hij}$  is the calibration adjustment determined through the exponential model,  $w_{4hij}$  is the weight adjusted for nonresponse in the high school transcript collection and/or 2013 Update, as

described in expression (H-14), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model for the responding students,  $w_{4hi}$ , was trimmed prior to the calibration adjustment, to account for extreme weights. The minimum, median, and maximum values for  $a_{4hij}$  are 0.52, 1.20, and 4.90, respectively.

## H.7 High School Transcript and Base Year to 2013 Update Longitudinal Analytic Weight (W3W1STUTR)

### *Adjustment for Nonresponse for W3W1STUTR*

The deceased students and 2013 Update questionnaire incapable students who are high school transcript collection respondents and base-year respondents or questionnaire incapable were not included in any nonresponse adjustment used to construct the high school transcript and base year to 2013 Update longitudinal analytic weight. The analytic weight adjusted for nonresponse in the high school transcript collection, base year, and 2013 Update was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded in the transcript collection,} \\ & \text{the base year, and 2013 update,} \\ & \text{or for students who responded in the transcript collection,} \\ & \text{were questionnaire incapable in the base year,} \\ & \text{and responded in the 2013 Update} \\ 0, & \text{for students who did not respond in at least one of the} \\ & \text{transcript collection, the base year, or 2013 Update} \end{cases} \quad (\text{H-16})$$

where  $a_{3hij}$  is the nonresponse adjustment,  $w_{3hij}$  is the high school transcript analytic weight adjusted for triple nonresponse and nonresponse in the high school transcript collection, described in section H.5 and expression (H-12). The minimum, median, and maximum values for  $a_{3hij}$  are 1.02, 1.30, and 3.45, respectively.

### *Weight Calibration to Produce the Final Analytic Weight W3W1STUTR*

A calibration factor was applied to the nonresponse-adjusted weight given in expression (H-16) to produce the final high school transcript and base year to 2013 Update analytic weight. The high school transcript and base year to 2013 Update analytic weight (W3W1STUTR) was constructed as

$$w_{5hij} = \begin{cases} w_{4hij} a_{4hij}, & \text{for students who responded in the transcript collection,} \\ & \text{the base year, and 2013 Update,} \\ & \text{or for students who responded in the transcript collection,} \\ & \text{were questionnaire incapable in the base year,} \\ & \text{and responded in the 2013 Update} \\ w_{1hij} a_{4hij}, & \text{for students who responded in the transcript collection} \\ & \text{and the base year, and were questionnaire incapable} \\ & \text{in the 2013 Update,} \\ & \text{for students who responded in the transcript collection,} \\ & \text{and were questionnaire incapable in the base year and} \\ & \text{2013 Update,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in at least one of the} \\ & \text{transcript collection, the base year, or 2013 Update} \end{cases} \quad (\text{H-17})$$

where  $a_{4hij}$  is the calibration adjustment determined through the exponential model,  $w_{4hij}$  is the weight adjusted for nonresponse in the high school transcript collection, base year, and/or 2013 Update, as described in expression (H-16), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model for the responding students,  $w_{4hi}$ , was trimmed prior to the calibration adjustment, to account for extreme weights. The minimum, median, and maximum values for  $a_{4hij}$  are 0.53, 1.20, and 4.93, respectively.

## H.8 High School Transcript and First Follow-up to 2013 Update Longitudinal Analytic Weight (W3W2STUTR)

### *Adjustment for Nonresponse for W3W2STUTR*

The deceased students and 2013 Update questionnaire incapable students who are high school transcript collection respondents and first follow-up respondents or questionnaire incapable were not included in any nonresponse adjustment used to construct the high school transcript and first follow-up to 2013 Update longitudinal analytic weight. The analytic weight adjusted for nonresponse in the high school transcript collection, first follow-up, and 2013 Update was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded in the transcript collection,} \\ & \text{the first follow-up, and 2013 update,} \\ & \text{or for students who responded in the transcript collection,} \\ & \text{were questionnaire incapable in the first follow-up,} \\ & \text{and responded in the 2013 Update} \\ 0, & \text{for students who did not respond in at least one of the} \\ & \text{transcript collection, the first follow-up, or 2013 Update} \end{cases} \quad (\text{H-18})$$

where  $a_{3hij}$  is the nonresponse adjustment,  $w_{3hij}$  is the high school transcript analytic weight adjusted for triple nonresponse and nonresponse in the high school transcript collection, described in section H.5 and expression (H-12). The minimum, median, and maximum values for  $a_{3hij}$  are 1.02, 1.29, and 4.24, respectively.

#### ***Weight Calibration to Produce the Final Analytic Weight W3W2STUTR***

A calibration factor was applied to the nonresponse-adjusted weight given in expression (H-18) to produce the final high school transcript and first follow-up to 2013 Update analytic weight. The high school transcript and first follow-up to 2013 Update analytic weight (W3W2STUTR) was constructed as

$$w_{5hij} = \begin{cases} w_{4hij} a_{4hij}, & \text{for students who responded in the transcript collection,} \\ & \text{the first follow-up, and 2013 Update,} \\ & \text{or for students who responded in the transcript collection,} \\ & \text{were questionnaire incapable in the first follow-up,} \\ & \text{and responded in the 2013 Update} \\ w_{1hij} a_{4hij}, & \text{for students who responded in the transcript collection} \\ & \text{and the first follow-up, and were questionnaire incapable} \\ & \text{in the 2013 Update,} \\ & \text{for students who responded in the transcript collection,} \\ & \text{and were questionnaire incapable in the first follow-up and} \\ & \text{2013 Update,} \\ & \text{or for deceased students} \\ 0, & \text{for students who did not respond in at least one of the} \\ & \text{transcript collection, the first follow-up, or 2013 Update} \end{cases} \quad (\text{H-19})$$

where  $a_{4hij}$  is the calibration adjustment determined through the exponential model,  $w_{4hij}$  is the weight adjusted for nonresponse in the high school transcript collection, first follow-up, and/or 2013 Update, as described in expression (H-18), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The

weight input into the model for the responding students,  $w_{4hi}$ , was trimmed prior to the calibration adjustment, to account for extreme weights. The minimum, median, and maximum values for  $a_{4hij}$  are 0.53, 1.19, and 4.68, respectively.

## H.9 High School Transcript and Base Year to First Follow-up to 2013 Update Longitudinal Analytic Weight (W3W1W2STUTR)

### *Adjustment for Nonresponse for W3W1W2STUTR*

The deceased students and 2013 Update questionnaire incapable students who are high school transcript collection respondents, are base year respondents or questionnaire incapable, and first follow-up respondents or questionnaire incapable were not included in any nonresponse adjustment used to construct the high school transcript and base year to first follow-up to 2013 Update longitudinal analytic weight. The analytic weight adjusted for nonresponse in the high school transcript collection, base year, first follow-up, and 2013 Update was constructed as

$$w_{4hij} = \begin{cases} w_{3hij} a_{3hij}, & \text{for students who responded in the transcript collection,} \\ & \text{the base year, first follow-up, and 2013 Update,} \\ & \text{or for students who responded in the transcript collection,} \\ & \text{were questionnaire incapable in the base year,} \\ & \text{and responded in the first follow-up and 2013 Update,} \\ & \text{or for students who responded in the transcript collection} \\ & \text{and the base year, were questionnaire incapable in the} \\ & \text{first follow-up, and responded in the 2013 Update,} \\ & \text{or for students who responded in the transcript collection,} \\ & \text{were questionnaire incapable in the base year and} \\ & \text{first follow-up, and responded in the 2013 Update} \\ 0, & \text{for students who did not respond in at least one of the} \\ & \text{transcript collection, the base year, first follow-up,} \\ & \text{or 2013 Update} \end{cases} \quad (\text{H-20})$$

where  $a_{3hij}$  is the nonresponse adjustment,  $w_{3hij}$  is the high school transcript analytic weight adjusted for triple nonresponse and nonresponse in the high school transcript collection, described in section H.5 and expression (H-12). The minimum, median, and maximum values for  $a_{3hij}$  are 1.05, 1.40, and 3.74, respectively.

### *Weight Calibration to Produce the Final Analytic Weight W3W1W2STUTR*

A calibration factor was applied to the nonresponse-adjusted weight given in expression (H-20) to produce the final high school transcript and base year to first follow-up to 2013 Update analytic weight. The high school transcript and base year to first follow-up to 2013 Update analytic weight (W3W1W2STUTR) was constructed as

$$w_{5hij} = \left\{ \begin{array}{l} w_{4hij} a_{4hij}, \text{ for students who responded in the transcript collection,} \\ \text{the base year, first follow-up, and 2013 Update,} \\ \text{or for students who responded in the transcript collection,} \\ \text{were questionnaire incapable in the base year,} \\ \text{and responded in the first follow-up and 2013 Update,} \\ \text{or for students who responded in the transcript collection} \\ \text{and the base year, were questionnaire incapable in the} \\ \text{first follow-up, and responded in the 2013 Update,} \\ \text{or for students who responded in the transcript collection,} \\ \text{were questionnaire incapable in the base year and} \\ \text{first follow-up, and responded in the 2013 Update} \\ w_{1hij} a_{4hij}, \text{ for students who responded in the transcript collection,} \\ \text{the base year, and first follow-up, and were} \\ \text{questionnaire incapable in the 2013 Update,} \\ \text{or for students who responded in the transcript collection,} \\ \text{were questionnaire incapable in the base year,} \\ \text{responded in the first follow-up, and were questionnaire} \\ \text{incapable in the 2013 Update,} \\ \text{or for students who responded in the transcript collection} \\ \text{and the base year, and were questionnaire incapable} \\ \text{in the first follow-up and 2013 Update,} \\ \text{or for students who responded in the transcript collection,} \\ \text{were questionnaire incapable in the base year,} \\ \text{first follow-up, and 2013 Update,} \\ \text{or for deceased students} \\ 0, \text{ for students who did not respond in at least one of the} \\ \text{transcript collection, the base year, first follow-up,} \\ \text{or 2013 Update} \end{array} \right. \quad (\text{H-21})$$

where  $a_{4hij}$  is the calibration adjustment determined through the exponential model,  $w_{4hij}$  is the weight adjusted for nonresponse in the high school transcript collection, base year, first follow-up, and/or 2013 Update, as described in expression (H-20), and  $w_{1hij}$  is the base weight as described in expression (H-1) from section H.1. The deceased students were included in the calibration, with the base weight as the input weight, and subsequently their weights were changed to zero. The weight input into the model for the responding students,  $w_{4hi}$ , was trimmed prior to the calibration adjustment, to account for extreme weights. The minimum, median, and maximum values for  $a_{4hij}$  are 0.53, 1.21, and 4.82, respectively.

## Initial Transcript Request Letter

May 8, 2015

«sch\_tcontact\_name»

«sch\_entity\_name»

«sch\_address»

«sch\_citystzip»

Website: <https://surveys.nces.ed.gov/hsls/>

Study ID: «sch\_entity\_id»

Password: «password»

Dear «sch\_tcontact\_name»:

We are contacting you to request sample member transcripts for the US Department of Education's High School Longitudinal Study of 2009 (HSLs:09). This package includes information about the study and instructions for preparing and transmitting the transcripts.

We are requesting the following information:

- Completed School Information Page (SIP)
- Student Transcripts for Sampled Students  
«catalogfill»

HSLs:09 is sponsored by the National Center for Education Statistics (NCES) of the U.S. Department of Education, which has contracted with RTI International (RTI), an independent nonprofit research organization, to collect student transcripts for research purposes. Data will be used to provide information that will be used by Congress, researchers, and policymakers to improve the quality of education in America.

We have informed parents and students of the transcript collection each time we collected data for HSLs:09 since 2009. All correspondence to parents and students contained a reference to the transcript data collection scheduled for the 2013-2014 academic year. That correspondence includes all of our parent consent forms for study participation, the study brochures and web site, the student instructions during the in-school data collection, the panel maintenance postcards sent out each year, and the telephone interview lead letters.

To complete our request, please log in to the secure study website at <https://surveys.nces.ed.gov/hsls/> using the study ID and password printed on this letter. The list of students for whom transcripts are requested is posted on the site. Also available at the website are the School Information Page (SIP) and instructions for obtaining reimbursement for the requested transcripts, should you require it. We prefer that you complete the School Information Page online and upload transcripts via the secure study website. The attached transcript instructions provide additional ways of submitting the transcripts. You also have the option to print the School Information Page from the secure website and fax that information to us.

We would appreciate receiving the requested transcript data on or before «duedate». Please do not hesitate to call us if you feel you need to have a later delivery date. If you have any questions about the HSLs:09 transcript collection, please call our Help Desk toll-free at 1-866-253-1063 between 8:30 AM and 6:00 PM Eastern time, Monday through Friday. We can also be reached by e-mail at [hsls@rti.org](mailto:hsls@rti.org). Collection of transcript information is on behalf of the Secretary of Education under the *Family Educational Rights and Privacy Act* (FERPA). FERPA allows the release of records to the Secretary of Education or his agents without prior written consent for the evaluation of Federal- and State-supported education programs. For additional information on FERPA, please visit our study website at

<https://surveys.nces.ed.gov/hsls/> A disclosure notice that can be placed in each student's file is also available on the study website.

NCES is authorized by federal law (Public Law 107-279) to conduct HSLs:09. Responses and student record information may be used only for statistical purposes and will not be disclosed, or used, in identifiable form for any other purpose, except as required by law (ESRA 2002, 20 U.S.C., § 9573). Data will be combined to produce statistical reports for Congress and others. No individual data (e.g., names or addresses) will be reported.

A representative from RTI will contact you in a few days to confirm your receipt of this letter, answer any questions you may have and to identify the person at your school most qualified to provide the requested student transcripts.

Thank you for your cooperation and timely attention to this matter.

Sincerely,

Jeffrey Owings, Ph.D.

Associate Commissioner, Elementary/Secondary & Libraries Studies Division  
National Center for Education Statistics  
U.S. Department of Education

Please visit the study website for more information:

<https://surveys.nces.ed.gov/hsls/>

[To log in, enter the study ID below](#)

[and enter the password below.](#)

NCES is authorized to conduct HSLs:09 under the Education Sciences Reform Act of 2002 (Public Law 107-279, Section 153). According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number of this information collection is 1850-0852, and it is completely voluntary. Depending on the number of students per institution, and the method with which transcripts are provided, it is expected that the range will be 0.5 to 3 hours, with an average burden of 2 hours per institution. If you have any comments concerning the accuracy of the time estimate or suggestions for improving the interview, please write to: U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20006. OMB Expiration Date: 04/30/2016

## Transcript Instructions

# Transcript Instructions

There are 4 primary steps for providing data. You will need to access the secure study website at <https://surveys.nces.ed.gov/hsls>. Log in using the study ID and password printed at the bottom of the letter you received from RTI.

*NOTE: You will need your study ID and password each time you log in to the website.*

## 1 Complete the School Information page

On this page, you will need to provide or confirm selected information about your school including grading scale and term system. This page is accessible from the Dashboard on the website. If you prefer to provide the information on a paper form, please print a copy from the study website.

## 2 Complete the Transcript Data Submission page

Each student's name and study ID number will be listed on the transcript data transmission page. Please check the box next to each student whose transcript you are sending and select the mode of submission. If you are unable to provide a transcript, please enter the reason in the space provided—for example, "No record of student's attendance" or "Transcript cannot be located." Please print and retain a copy for your records.

*NOTE: You must complete the Transcript Data Submission webpage prior to sending transcript data, so that we may verify receipt of all transcript data submitted. Once you have sent the transcript data, click Submit. This page is accessible from the Dashboard.*

## 3 Transmit Transcript Data

A number of options are available for transmitting transcript data to RTI. Each is described below.

**Uploading to the Secure Study Website:** Uploading electronic transcript data directly to the secure website is the preferred method for sending transcript data.

**Faxing Hard Copy Transcripts:** If your school is unable to provide the transcript data electronically via any of the methods previously mentioned, you may fax transcripts to one of our secure fax numbers (877-254-1952 or 877-653-1239). First, send a test fax using the Student Transcript Fax Cover Page included in your school packet, with your name, telephone number, and fax number, to ensure that the transfer is working correctly. Please verify that the fax number matches one of our secure fax numbers. Once you have done this, please fax the completed Student Transcript Fax Cover Page that you received in your packet and your students' transcripts to the same number.

**Sending Transcript Data as an Encrypted Attachment by Electronic Mail:** If you choose to use electronic mail (e-mail) to submit student transcript data, the attachment containing the data will need to be encrypted, using software such as SecureZIP (select the option Use FIPS 140 Mode), to ensure they are transmitted securely. SecureZIP can be downloaded from the website:

<http://www.securezip.com>. Detailed instructions for downloading and using SecureZIP can be accessed from the link "E-mail transcript data as an encrypted attachment." If you choose to use encryption software other than SecureZIP, please contact the Help Desk to ensure that the software complies with our security standards.

Once the attachment is encrypted, send to [hsls@rti.org](mailto:hsls@rti.org) and include the file names and descriptions. If you need assistance with this process, please contact the Help Desk toll-free at 866-253-1063 or via e-mail at [hsls@rti.org](mailto:hsls@rti.org).

**Sending Transcript Data via the SPEEDE Server:** If you are a registered user of the SPEEDE server at the University of Texas at Austin and wish to use it to send your transcripts, please select School Code "RTIIES" with School Name "RTI Intl Educ Studies Div" as the transcript recipient.

**Sending Redacted Transcripts via FedEx:** If your school is unable to provide the transcript data via any of the other methods, you may send them via FedEx at no cost to you after redacting each student's personally identifiable information and writing his/her study ID on the transcript. Please refer to the website link "Sending redacted transcripts via FedEx" for instructions.

## **4 Provide Requested Course Catalogs or Course Descriptions**

Once transcript data are received, the individual courses reported in the transcript data will be coded using a common classification system, the National Center for Education Statistics' (NCES) Classification of Secondary School Courses (CSSC) or School Codes for the Exchange of Data (SCED). Course catalogs (also referred to as course descriptions) are used as a resource in this process. If we need a course catalog from your school, this will be listed in the initial letter.

**Fax Cover Page****Student Transcript Fax Cover Page**

School ID: «sch\_entity\_id»

Name of Sender: \_\_\_\_\_

School Name: \_\_\_\_\_

Date: \_\_\_\_\_

Telephone number: \_\_\_\_\_

Fax number: \_\_\_\_\_

Number of Pages: \_\_\_\_\_

Number of Student Transcripts: \_\_\_\_\_

**Instructions:**

1. Fax this document to 877-254-1952 or 877-653-1239 as a test page.
2. Check the confirmation page that prints from your fax machine and confirm that the fax was sent to the correct number.
3. Fax the completed Student Transcript Fax Cover Page and your students' transcripts to the same number.

If you need assistance, please contact our Help Desk at 1-866-253-1063 or e-mail us at [hsIs@rti.org](mailto:hsIs@rti.org).

## Instructions for Sending Redacted Transcript via FedEx

The following instructions for sending redacted transcripts via FedEx can be accessed on the secure study website once a user has logged into the website.

## Redacted Transcripts via FedEx

---

If your school is unable to provide the transcript data via any of the other methods, you may send them via FedEx (at no cost to you) after redacting each student's personally identifiable information (student name, address, DOB, SSN) and writing his/her HSLs study ID on the transcript. Please make certain you don't include HSLs:09 on any of the labels. You will find each student's HSLs study ID listed on the Transcript Data Transmission webpage beside the student's name.

Instructions for Completing the Fed Ex Shipping Label:

- Include the following number in the internal billing reference number field: 0212678.001.431.
- On the lower right hand side of the label is a section titled Payment. Please mark "Recipient" and add 4080-1226-0 in the FedEx Acct. No. field.
- Mark the service as Priority Overnight.

Send the student transcripts to:

RTI International

Attention: Data Capture (Project #: 0212678.001.431) 1000 Parliament Court, Suite 100 Durham, NC 27703

Phone: 919-541-8929

If you need assistance with this process, please contact our Help Desk toll-free at 1-866-253-1063 or via e-mail at [HSLs@rti.org](mailto:HSLs@rti.org).

## Family Educational Rights and Privacy Act Regulations (FERPA)

# Family Educational Rights and Privacy Act Regulations

34 CFR Part 99

## Subpart A—General

### Section

99.1 To which education agencies or institutions do these regulations apply?

99.2 What is the purpose of these regulations?

99.3 What definitions apply to these regulations?

99.4 What are the rights of parents?

99.5 What are the rights of students?

99.7 What must an educational agency or institution include in its annual notification?

99.8 What provisions apply to records of a law enforcement unit?

## Subpart B—What Are the Rights of Inspection and Review of Education Records?

### Section

99.10 What rights exist for a parent or eligible student to inspect and review education records?

99.11 May an educational agency or institution charge a fee for copies of education records?

99.12 What limitations exist on the right to inspect and review records?

## Subpart C – What Are the Procedures for Amending Education Records?

### Section

99.20 How can a parent or eligible student request amendment of the student's education records?

99.21 Under what conditions does a parent or eligible student have the right to a hearing?

99.22 What minimum requirements exist for the conduct of a hearing?

## Subpart D—May an Educational Agency or Institution Disclose Personally Identifiable Information From Education Records?

### Section

99.30 Under what conditions is prior consent required to disclose information?

99.31 Under what conditions is prior consent not required to disclose information?

99.32 What recordkeeping requirements exist concerning requests and disclosures?

99.33 What limitation apply to the redisclosure of information?

99.34 What conditions apply to disclosure of information to other education agencies or institutions?

99.35 What conditions apply to disclosure of information for Federal or State program purposes?

99.36 What conditions apply to disclosure of information in health and safety emergencies?

99.37 What conditions apply to disclosing directory information?

99.38 What conditions apply to disclosure of information as permitted by State stature adopted after November 19, 1974 concerning the juvenile justice system?

99.39 What definitions apply to the nonconsensual disclosure of records by postsecondary educational institutions in connection with disciplinary proceedings concerning crimes of violence or non-forcible sex offenses?

## Subpart E – What are the Enforcement Procedures?

### Section

99.60 What functions has the Secretary delegated to the Office and to the Office of Administrative Law Judges?

99.61 What responsibility does an educational agency or institution have concerning conflict with State or local laws?

99.62 What information must an educational agency or institution submit to the Office?

99.63 Where are complaints filed?

99.64 What is the complaint procedure?

99.65 What is the content of the notice of complaint issued by the Office?

99.66 What are the responsibilities of the Office in the enforcement process?

99.67 How does the Secretary enforce decisions?

AUTHORITY: 20 U.S.C. 1232g unless otherwise noted.

## PART 99 – FAMILY EDUCATIONAL RIGHTS AND PRIVACY

The authority citation for part continues to read as follows:

AUTHORITY: 20 U.S.C. 1232g, unless otherwise noted.

### Subpart A—General

*§ 99.1 To which educational agencies or institutions do these regulations apply?*

(a) Except as otherwise noted in § 99.10, this part applies to an educational agency or institution to which funds have been made available under any program administered by the Secretary, if—

(1) The educational institution provides educational services or instruction, or both, to students; or

(2) The educational agency is authorized to direct and control public elementary secondary, or postsecondary educational institutions.

(b) This part does not apply to an educational agency or institution solely because students attending that agency or institution receive non-monetary benefits under a program referenced in paragraph (a) of this section, if no funds under that program are made available to the agency or institution.

on the contested information in the record or stating why he or she disagrees with the decision of the agency or institution, or both.

(c) If an educational agency or institution places a statement in the education records of a student under paragraph (b)(2) of this section, the agency or institution shall:

(1) Maintain the statement with the contested part of the record for as long as the record is maintained; and

(2) Disclose the statement whenever it discloses the portion of the record to which the statement relates.

(Authority: 20 U.S.C 1232g(a)(2))

### *§99.22 What minimum requirements exist for the conduct of a hearing?*

The hearing require by § 99.21 must meet, at a minimum, the following requirements:

(a) The educational agency or institution shall hold the hearing within a reasonable time after it has received the request for the hearing from the parent or eligible student.

(b) The educational agency or institution shall give the parent or eligible student notice of the date, time, and place, reasonably in advance of the hearing.

(c) the hearing may be conducted by any individual, including an official of the educational agency or institution, who does not have a direct interest in the outcome of the hearing.

(d) The educational agency or institution shall give the parent or eligible student a full and fair opportunity to present evidence relevant of the issues raised under § 99.21. The parent or eligible student may, at their own expense, be assisted or represented by one or more individuals of his or her own choice, including an attorney.

(e) The educational agency or institution shall make its decision in writing within a reasonable period of time after the hearing.

(f) The decision must be based solely on the evidence presented at the hearing, and must include a summary of the evidence and the reasons for the decision.

(Authority: 20 U.S.C 1232g(a)(2))

### **Subpart D—May an Educational Agency or Institution Disclose Personally Identifiable Information From Education Records?**

#### *§ 99.30 Under what conditions is prior consent required to disclose information?*

(a) The parent or eligible student shall provide a signed and dated written consent before an educational agency or institution discloses personally identifiable information from the student's education records, except as provided in § 99.31.

(b) The written consent must:

(1) Specify the records that may be disclosed;

(2) State the purpose of the disclosure; and

(3) Identify the party or class of parties to whom the disclosure may be made.

(c) When a disclosure is made under paragraph

(a) of this section:

(1) If a parent or eligible student so requests, the educational agency or institution shall provide him or her with a copy of the records disclosed; and

(2) If the parent of a student who is not an

eligible student to requests, the agency or institution shall provide the student with a copy of the records disclosed.

(Authority: 20 U.S.C 1232g (b)(1) and (b)(2)(A))

**§ 99.31 Under what conditions is prior consent not required to disclose information?**

(a) An educational agency or institution may disclose personally identifiable information from an education record of a student without the consent required by § 99.30 if the disclosure meets one or more of the following conditions:

(1) The disclosure is to other school officials, including teachers, within the agency or institution who the agency or institution has determined to have legitimate educational interests.

(2) The disclosure is, subject to the requirements of § 99.34, to officials of another school, school system, or institution of postsecondary education where the student seeks or intends to enroll.

(3) The disclosure is, subject to the requirements of § 99.35, to authorized representatives of—

(i) The comptroller General of the United States;

(ii) The Attorney General of the United States;

(iii) The Secretary; or

(iv) State and local educational authorities.

(4)(i) The disclosure is in connection with financial aid for which the student has applied or which the student has received, if the information is necessary for such purposes as to:

(A) Determine eligibility for the aid;

(B) Determine the amount of the aid;

(C) Determine the conditions for the aid; or

(D) Enforce the terms and conditions of the aid.

(ii) As used in paragraph (a)(4)(i) of this section, “financial aid” means a payment of funds provided to an individual (or a payment in kind of tangible or intangible property to the individual) that is conditioned on the individual’s attendance at an educational agency or institution.

(Authority: 20 U.S.C 1232g(b)(1)(D))

(5)(i) The disclosure is to State and local official or authorities to whom this information is specifically—

(A) Allowed to be reported or disclosed pursuant to a State statute adopted before November 19, 1974, if the allowed reporting or disclosure concerns the juvenile justice system and the system’s ability to effectively serve the student whose records are released; or

(B) Allowed to be reported or disclosed pursuant to a State statute adopted after November 19, 1974, subject to the requirements of § 99.38.

(ii) Paragraph (a)(5)(1) of this section does not prevent a State from further limiting number or type of State or local officials to whom disclosure may be made under that paragraph.

(6)(i) The disclosure is to organizations conducting studies for, or on behalf of, educational agencies or institutions to:

(A) Develop, validate, or administer predictive tests;

(B) Administer student aid programs; or

(C) Improve instruction.

(iii) The agency or institution may disclose in

formation under paragraph (a)(6)(i) of this section if:

(A) The study is conducted in a manner that does not permit personal identification of parents and students by individuals other than representatives of the organization; and

(B) The information is destroyed when no longer needed for the purposes for which the study was conducted.

(iii) If this Office determines that a third party outside the educational agency or institution to whom information is disclosed under this paragraph (a)(6) violates paragraph (a)(6)(ii)(B) of this section, the educational agency or institution may not allow that third party access to personally identifiable information from education records for at least five years.

(iv) For the purposes of paragraph (a)(6) of this section, the term “organization” includes, but is not limited to, Federal, State, and local agencies, and independent organizations.

(7) The disclosure is to accrediting organization to carry out their accrediting functions.

(8) The disclosure is to parents, as defined in § 99.3, of a dependent student, as defined in section 152 of the Internal Revenue Code of 1986.

(9)(i) The disclosure is to comply with a judicial order or lawfully issued subpoena.

(ii) The educational agency or institution may disclose information under paragraph (a)(9)(i) of this section only if the agency or institution makes a reasonable effort to notify the parent or eligible student of the order or subpoena in advance of compliance, so that the parent or eligible student may seek protective action, unless the disclosure is in compliance with—

(A) A Federal grand jury subpoena and the court has order that the existence or the contents of the subpoena or the information furnished in response of the subpoena not be disclosed; or

(B) Any other subpoena issued for a law enforcement purpose and the court or other issuing agency has ordered that the existence or the contents of the subpoena or the information furnished in the response to the subpoena not be disclosed.

(iii)(A) If an educational agency or institution initiates legal action against a parent or student, the educational agency or institution may disclose to the court, without a court order or subpoena, the education records of the student that are relevant for the educational agency or institution to proceed with the legal action as plaintiff.

(B) If a parent or eligible student initiates legal action against an educational agency or institution, the educational agency or institution may disclose to the court, without a court order or subpoena, the student’s education records that are relevant for the educational agency or institution to defend itself.

(10) The disclosure is in connection with a health or safety emergency, under the conditions described in § 99.36.

(11) The disclosure is information the educational agency or institution has designated as “directory information,” under the condition described in § 99.37.

(12) The disclosure is to the parent of a student who is not an eligible student or to the student.

(13) The disclosure, subject to the requirements in § 99.39, is to a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense. the disclosure may only include the final results of the disciplinary proceeding conducted by the institution of postsecondary education with respect to that alleged crime or offense. The institution may disclose the final results of the disciplinary proceeding, regardless of whether the institution concluded a violation was committed.

(14)(i) The disclosure, subject to the requirements in § 99.39, is in connection with a disciplinary proceeding at an institution of

postsecondary education. The institution must not disclose the final results of the disciplinary proceeding unless it determines that—

(A) The student is an alleged perpetrator of a crime of violence or non-forcible sex offense: and

(B) With respect to the allegation made against him or her, the student has committed a violation of the institution's rules or policies.

(ii) The institution may not disclose the name of any other student, including a victim or witness, without the prior written consent of the other student.

(iii) This section applies only to the disciplinary proceedings in which the final results were reached on or after October 7, 1998.

(15)(i) The disclosure is to a parent of a student at an institution of postsecondary education regarding the student's violation of any Federal, State, or local law, or of any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance if—

(A) The institution determines that the student has committed a disciplinary violation with respect to that use or possession; and

(B) The student is under the age of 21 at the time of the disclosure to the parent.

(iii) Paragraph (a)(15) of this section does not supersede any provision of State law that prohibits an institution of postsecondary education from disclosing information.

(b) Paragraph (a) of this section does not forbid an educational agency or institution from disclosing, nor does it require an educational agency or institution to disclose, personally identifiable information from the education records of a student to any parties under paragraphs (a)(1) through (11), (13), (14), and (15) of this section.

(Authority: 20 U.S.C 1232g(a)(5)(A), (b)(1), (b)(2)(B), (b)(6), (h) and (i))

### § 99.32 What recordkeeping requirements exist concerning requests and disclosures?

(a)(1) An educational agency or institution shall maintain a record of each request for access to and each disclosure of personally identifiable information from the education records of each student.

(2) The agency or institution shall maintain the record with the education records of the student as long as the records are maintained.

(3) For each request or disclosure the record must include:

(i) The parties who have requested or received personally identifiable information from the education records; and

(ii) The legitimate interests the parties had in requesting or obtaining the information.

(b) If an educational agency or institution discloses personally identifiable information from an education record with the understanding authorized under § 99.33(b), the record of the disclosure required under this section must include:

(1) The names of the additional parties to which the receiving party may disclose the information on behalf of the educational agency or institution; and

(2) The legitimate interests under § 99.31 which each of the additional parties has in requesting or obtaining the information.

(c) The following parties may inspect the record relating to each student:

(1) The parent or eligible student.

(2) The school official or his or her assistants who are responsible for the custody of the records.

(3) Those parties authorized in § 99.31(a)(1) and (3) for the purposes of auditing the recordkeeping procedures of the educational agency or institution.

(d) Paragraph (a) of this section does not apply if the request was from, or the disclosure was to:

(1) The parent or eligible student;

(2) A school official under § 99.31 (a)(1);

(3) A party with written consent from the parent or eligible student;

(4) A party seeking directory information; or

(5) A party seeking or receiving the records as directed by a Federal grand jury or other law enforcement subpoena and the issuing court or other issuing agency has ordered that the existence or the contents of the subpoena or the information furnished in response to the subpoena not be disclosed.

(Approved by the Office of Management and Budget under control number 1880-0508)

(Authority: 20 U.S.C 1232g(b)(1) and (b)(4)(A))

### ***§ 99.33 What limitations apply to the redisclosure of information?***

(a)(1) An educational agency or institution may disclose personally identifiable information from an education record only on the condition that the party to whom the information is disclosed will not disclose the information to any other party without the prior consent of the parent or eligible student.

(2) The officers, employees, and agents of a party that receives information under paragraph (a)(1) of this section may use the information, but only for the purposes for which the disclosure was made.

(b) Paragraph (a) of this section does not prevent an educational agency or institution from disclosing personally identifiable information with the understanding that the party receiving the information may make further disclosure of the information on behalf of the educational agency or institution if:

(1) The disclosures meet the requirements of § 99.31; and

(2) The educational agency or institution has complied with the requirements of § 99.32(b).

(c) Paragraph (a) of this section does not apply to disclosures made to parents of dependent students under § 99.31(a)(8), to disclosures made pursuant to court orders, lawfully issued subpoenas, or litigation under § 99.31(a)(9), to disclosures of directory information under § 99.31(a)(11), to disclosures made to a parent or student under § 99.31(a) (12), to disclosures made in connection with a disciplinary proceedings under § 99.31(a) (14), or to disclosures made to parents under § 99.31(a)(15).

(d) Excerpt for disclosures under § 99.31(a) (9), (11) and (12), and educational agency or institution shall inform a party to whom disclosure is made of the requirements of this section.

(e) If this Office determines that a third party improperly rediscloses personally identifiable information from education records in violation of § 99.33(a) of this section, the educational agency or institution may not allow that third party access to personally identifiable information from education records for at least five years.

(Authority: 20 U.S.C 1232g(b)(4)(B))

**§ 99.34 What conditions apply to disclosure of information to other educational agencies or institutions?**

(a) An educational agency or institution that discloses an education record under § 99.31(a)(2) shall:

(1) Make a reasonable attempt to notify the parent or eligible student at the last known address of the parent or eligible student, unless:

(i) The disclosure is initiated by the parent or eligible student; or

(ii) The annual notification of the agency or institution under § 99.7 includes a notice that the agency or institution forwards education records to other agencies or institutions that have requested the records and in which the student seeks or intends to enroll:

(2) Give the parent or eligible student, upon request, a copy of the record that was disclosed; and

(3) Give the parent or eligible student, upon request, an opportunity for a hearing under Subpart C.

(b) An educational agency or institution may disclose an education record of a student in attendance to another educational agency or institution if:

(1) The student is enrolled in or receives services from the other agency or institution; and

(2) The disclosure meets the requirements of paragraph (a) of this section.

(Authority: 20 U.S.C 1232g(b)(1)(B))

**§ 99.35 What conditions apply to disclosure of information for Federal or State program purposes?**

(a) The officials listed in § 99.31(a)(3) may have access to education records in connection with an audit or evaluation of Federal or State supported education programs, or for the enforcement of or compliance with Federal legal requirements which relate to those programs.

(b) Information that is collected under paragraph (a) of this section must:

(1) Be protected in a manner that does not permit personal identification of individuals by anyone except the officials referred to in paragraph (a) of this section; and

(2) Be destroyed when no longer needed for the purposes listed in paragraph (a) of this section.

(c) Paragraph (b) of this section does not apply if:

(1) The parent or eligible student has given written consent for the disclosure under § 99.30; or

(2) The collection of personally identifiable information is specifically authorized by Federal law.

(Authority: 20 U.S.C 1232g(b)(3))

**§ 99.36 What conditions apply to disclosure of information in health and safety emergencies?**

(a) An educational agency or institution may disclose personally identifiable information from an education record to appropriate parties in connection with an emergency if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

(b) Nothing in the Act or this part shall prevent an educational agency or institution from—

(1) Including in the education records of a student appropriate information

**Disclosure Notice****DISCLOSURE NOTICE****DISCLOSURE NOTICE**

Student record data for this student have been provided to RTI International, a nonprofit research organization and agent for the U.S. Department of Education, National Center for Education Statistics (NCES). This disclosure statement fulfills the requirements of 34 CFR 99.32(a) pursuant to the *Family Educational Rights and Privacy Act* (FERPA) (20 U.S.C. 1232g).

The data were requested for the High School Longitudinal Study of 2009. NCES is authorized by federal law to conduct this voluntary study. Responses and student record information may be used only for statistical purposes and will not be disclosed, or used, in identifiable form for any other purpose, except as required by law (ESRA 2002, 20 U.S.C., § 9573). Data from these records will be combined with others into statistical summaries and tables. No individual data (e.g., names or addresses) will be reported.

Preparer's title \_\_\_\_\_

Preparer's e-mail address \_\_\_\_\_

Preparer's telephone number \_\_\_\_\_

Date prepared \_\_\_\_\_

Your answers to the items below will help us analyze the transcripts. We ask that you visit the secure study website (<https://surveys.nces.ed.gov/hsls/>), login with the study ID and password provided on the letter you received with this document, and complete this form online. If that is not possible, please complete this hardcopy form and fax to RTI at 877-254-1952 or 877-653-1239.

1. **Please specify below your school's grade scale (the percentage equivalent of each letter grade). Select Grade Scale 1, Grade Scale 2, or Other Grade Scale and then fill in the percentages your school uses.**

Grade Scale 1	Grade Scale 2	Other Grade Scale
A= ___% to ___%	A+= ___% to ___%	
B= ___% to ___%	A = ___% to ___%	
C= ___% to ___%	A- = ___% to ___%	
D= ___% to ___%	B+= ___% to ___%	
F= ___% to ___%	B = ___% to ___%	
pass/satisfactory = ___% to ___%	B- = ___% to ___%	
fail/unsatisfactory= ___% to ___%	C+= ___% to ___%	
	C = ___% to ___%	
	C- = ___% to ___%	
	D+= ___% to ___%	
	D = ___% to ___%	
	D- = ___% to ___%	
	F = ___% to ___%	
	pass/satisfactory = ___% to ___%	
	fail/unsatisfactory= ___% to ___%	

2. **If your school weights certain courses or programs (such as Advanced Placement or honors), please specify the system you use below.**

3. **Is any of the information below unavailable at your school and consequently not included on or with the transcripts you are providing? Check off each piece of information that is unavailable.** Please attempt to retrieve any information not routinely included on transcripts at your school from other sources, such as student records, and provide only the requested information by writing it on each student's transcript photocopy or printout or by sending copies of additional documents.

Student-level information:

- Student address
- Participation in specialized programs
- Date student left school (graduation date or final withdrawal date)
- Reason student left school (graduated, transferred, etc.)
- Type of diploma awarded (standard diploma, GED, certificate of attendance, etc.)
- Cumulative GPA
- Standardized test scores for the PSAT, SAT/ACT, AP, and/or SAT subject tests
- Date taken for the PSAT, SAT/ACT, AP, and/or SAT subject tests
- International Baccalaureate (IB) test scores and date taken

Coursetaking histories for grades 9 through 12\* including:

- Course title
- Course number
- School name where course was taken
- School year course was taken
- Grade level course was taken
- Term course was taken
- Number of credits earned for each course taken
- Raw course grade/Standardized letter grade received
- Classification of Secondary School Courses (CSCC) code
- School Codes for the Exchange of Data (SCED)

\*If coursetaking histories prior to 9th grade are available, we would be grateful for their inclusion as well. There is keen interest, in particular, in identifying students who have taken algebra or geometry prior to 9th grade.

4. **Please specify below how your school calculates Grade Point Average (GPA), including whether all courses are included in the calculation or only academic courses.**

5. **For 2012-2013, how many credits did a student in this school earn for a course that meets every day for a single class period throughout the school year (or is equivalent to such a course)?**  
\_\_\_\_\_ credits.

If this changed during the past four years, please also answer the question for each of the school years below:

2009-2010: \_\_\_\_\_ credits

2010-2011: \_\_\_\_\_ credits

2011-2012: \_\_\_\_\_ credits

6. **Please specify below what term system your school uses (e.g., year, semesters, quarters, trimesters, etc.).**

7. **Please send course catalogs, course descriptions, or equivalent documents for the school years listed below.** Place a checkmark next to the school year(s) for which you are sending a course catalog. If these catalogs are not available, please send master teaching schedules and/or course listings or similar documents. (If there are no catalogs listed below, please skip to item 9.)

«catfill09»

«catfill10»

«catfill11»

«catfill12»

8. **Have there been substantial changes in your course offerings between the 2009-2010 school year and the 2012-2013 school years? Please indicate yes or no, and, if yes, please explain.**

**9. Please indicate whether or not courses are available to your students in any of the ways listed below. If offered/available, also indicate whether your school’s course catalogs and transcripts include this information:**

		If available to your students		
	Available to your students? (Y/N)	Do your course catalogs include information identifying these courses? (Y/N)	Do your transcripts include information identifying these courses? (Y/N)	Notes/Comments Are there special symbols or abbreviations used to identify these courses in your course catalogs and on transcripts? If so, please list them below.
<b>Courses taught off-site at career/technical or vocational center<sup>1</sup></b>				
<b>Courses provided at or by a postsecondary institution - for high school credit only</b>				
<b>Courses provided at or by a postsecondary institution - for dual credit<sup>2</sup></b>				
<b>Courses that are part of a tech-prep program<sup>3</sup></b>				
<b>Courses that are part of a career academy<sup>4</sup></b>				
<b>Courses taught on-line or via distance education</b>				

If these courses are not included in your school’s standard course catalog, please send us course catalogs or lists (if available) that contain the courses (including the vocational center or other facility’s catalog if it has its own, as applicable). Please record how many of these catalogs (or lists) you are sending: \_\_\_\_\_.

<sup>1</sup> Typically provides career/technical instruction only; students attend part-time and receive their academic instruction at a home high school.

<sup>2</sup> A course taken which enables a student to earn both high school and college credit.

<sup>3</sup> A course that can be taken as part of a program of integrated academic and vocational high school study linked to a related postsecondary program (e.g., 2+2 program).

<sup>4</sup> A course taken as part of a school-within-a school program in which a curriculum that integrates academic and vocational courses is organized around broad career areas (e.g., health, transportation, information technology).

9. **Please place a checkmark next to the types of high school diplomas offered at your school (check all that apply) and indicate the total number of credits required for graduation for the different types.** If this information is in the course catalogs, please indicate which page the information is on: page\_\_\_\_\_.

Diploma Type	Offered?	# of Credits
Standard		
Regents (NY State Only)		
Honors		
Certificate of Merit		
Vocational		
Special Education		
Certificate of Attendance		
International Baccalaureate		
Other (specify)		

10. **Please provide below (or on additional pages) any information about the transcripts or course catalogs you are providing that would be helpful in processing them, including keys to abbreviations on the transcripts.**

Please call RTI toll-free at 1-866-253-1063 or email us at [hsls@rti.org](mailto:hsls@rti.org) if you have any questions/concerns. Thank you for your help. We appreciate your cooperation.

 «SchoolName»  
 «Address1»  
 «Address2»  
 «City», «State» «Zip»

Dear «RecipientName»:

Recently, we contacted you about the collection of high school transcripts as part of the High School Longitudinal Study of 2009 (HSLs:09). You may recall that HSLs:09 is sponsored by the National Center for Education Statistics (NCES) which contracted RTI International (RTI), a not-for-profit research organization, to collect the transcript data. The study focuses on understanding how high school experiences affect students' learning and their educational and career choices and explores students' transitions from high school to college, the labor force, and adult roles. Of special interest is coursetaking and career preparation in math and science. Transcript data provide important, critically valuable information about how a student's courses and grades influence subsequent postsecondary success in work or at college. At this time, we are contacting you to request transcripts for the students at your school who were selected to participate as fall 2009 9th graders. Enclosed in this package are instructions for preparing and transmitting the transcripts. You can access the list of sampled students on the secure study website (see below).

At your request, RTI mailed a letter to HSLs:09 sampled students (and their parents/guardians) who attended your school. The letter asked the students/parents to sign and return a permission form or logon to a secure website using a unique ID and password and grant permission for the release of the student transcript. You can access the list of sampled students on the secure study website (see below). Beside each student's name, you will be able to view the student or parent's permission to RTI for the release of the student transcript. We ask that you provide transcripts for these students electronically or via fax. We will also accept hard copy transcripts if sent via FedEx and as long as personally identifiable information has been redacted and the HSLs student ID is included on each student's transcript.

Collection of transcript information is on behalf of the Secretary of Education under the *Family Educational Rights and Privacy Act* (FERPA). FERPA allows the release of records to the Secretary of Education or his agents without prior written consent.

Responses and student record information may be used only for statistical purposes and will not be disclosed, or used, in identifiable form for any other purpose, except as required by law (ESRA 2002, 20 U.S.C., § 9573). Data will be combined to produce statistical reports for Congress and others. No individual data (e.g., names or addresses) will be reported.

If you have any questions about HSLs:09 transcript collection, please call Jane Griffin at RTI toll-free at 1-866-253-1063 between 8:30 AM and 6:00 PM Eastern time, Monday through Friday. We can also be reached via e-mail at [hsls@rti.org](mailto:hsls@rti.org).

Thank you for your cooperation and timely attention to this matter.

Sincerely,

Jeffrey Owings, Ph.D.  
 Associate Commissioner, Elementary/Secondary & Libraries Studies Division  
 National Center for Education Statistics  
 U.S. Department of Education

Please visit the study website for more information:

To log in, enter the Study ID below and enter the password below.

NCES is authorized to conduct HSLs:09 under the Education Sciences Reform Act of 2002 (Public Law 107-279, Section 153). According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number of this information collection is 1850-0852, and it is completely voluntary. Depending on the number of students per institution, and the method with which transcripts are provided, it is expected that the range will be 0.5 to 3 hours, with an average burden of 2 hours per institution. If you have any comments concerning the accuracy of the time estimate or suggestions for improving the interview, please write to: U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20006. OMB Expiration Date: 04/30/2016

Dear «RecipientName»:

We contacted you recently to obtain transcripts for students who attended «schoolname» and are sample members in the High School Longitudinal Study of 2009 (HSL:09) being conducted by RTI International for the U. S. Department of Education. We want to thank you for your efforts in providing those valuable data. We are contacting you again to seek additional transcripts for sample members we learned attended your school from another school's transcript. I am requesting transcripts for these {phase2\_num} students. *[If only 1 student, then we would say: I am requesting the transcript for one student.]*

Included with this letter are instructions for preparing and transmitting transcript data to RTI. You can find a list of your students for whom transcripts are requested, with their dates of birth, at the secure study website listed in the box below; to access the site, log in using the username and password printed at the bottom of this letter. Also available at the website are instructions for obtaining reimbursement for preparing the transcripts, should your school require it. I would appreciate your sending us the requested transcript data by «due\_date». Please call 1-866-253-1063 or e-mail [hsls@rti.org](mailto:hsls@rti.org) if you have any questions.

Thank you again for your assistance with the HSL:09 transcript collection.

Sincerely,

Dan Pratt  
HSL:09 Project Director

## School Transcript Reminder Letter

<Date>

«TranscriptCoordinatorName»

«SchoolName»

«Address1»

«Address2»

«City», «State» «Zip»

Dear «TranscriptCoordinatorName»:

I am writing to encourage participation of <schoolname> in the High School Longitudinal Study of 2009 (HSLs:09). The U.S. Department of Education's National Center for Education Statistics (NCES), is collecting the high school transcripts of sample members who are participating in HSLs:09. HSLs:09 follows a cohort of students who were 9th graders in high school in 2009-10 and surveys them later to find out about their education, work, and family experiences. Their transcript data will be linked with interview data and other administrative records to create a rich dataset for researchers in education.

HSLs:09 transcript data are collected in full compliance with the provisions of the *Family Educational Rights and Privacy Act* (FERPA) that allow the release of student records to the Secretary of Education or his agents without prior written consent from students. Let me assure you that very stringent measures are in place to safeguard the privacy of participants. Information on the many secure options available to you for providing transcript data may be found at the secure HSLs:09 website: <https://surveys.nces.ed.gov/hsls/>.

NCES has contracted with RTI International (RTI) to conduct this important study. Your cooperation with RTI is greatly appreciated. For further information or questions, please contact the Help Desk at 1-866-253-1063 or [hsls@rti.org](mailto:hsls@rti.org).

Please visit the study website for more information:

Elise Christopher, Ph.D.  
NCES Project Officer of HSLs:09  
National Center for Education Statistics

NCES is authorized to conduct HSLs:09 under the Education Sciences Reform Act of 2002 (Public Law 107-279, Section 153). According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number of this information collection is 1850-0852, and it is completely voluntary. Depending on the number of students per institution, and the method with which transcripts are provided, it is expected that the range will be 0.5 to 3 hours, with an average burden of 2 hours per institution. If you have any comments concerning the accuracy of the time estimate or suggestions for improving the interview, please write to: U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20006. OMB Expiration Date: 04/30/2016

## Student/Parent Transcript Explicit Consent Letter

 Study ID: «study\_id»  
 «study\_password»

Dear «studentName» and Parent/Guardian:

We are contacting you at this time to obtain permission to collect «studentName»'s high school transcript. «studentName» was selected to participate in the High School Longitudinal Study of 2009 (HSLs:09), a study that began with a sample of 9th graders in 2009 and included a follow-up in the spring of 2012. Students, parents, and schools participating in HSLs:09 have all been notified in our previous correspondence that we will be collecting transcripts. The information we will collect from the transcript includes dates of enrollment, reason for leaving school (graduated, transferred, etc.), grade point average, standardized test scores, type of diploma awarded and date awarded, and, for each course taken between grades 9 through 12, course number and title, number of credits earned, and grade assigned. We will also collect information about high-school-level courses that were taken prior to 9th grade. Transcripts will be collected under the guidelines of the *Family Educational Rights and Privacy Act*, and will remain confidential. Please note that if the school charges a fee for obtaining the transcript, HSLs:09 will pay the fee.

Youth age 18 or older: **If you give permission for your transcript to be obtained, please write down your name and then sign/date the block in option #1. If you do not give permission for your transcript to be obtained, please write down your name and sign/date the block in option #2.**

Parents of youth under age 18: **If you give permission for your son or daughter's transcript to be obtained, please write down his or her name and then sign/date the block in option #3. If you do not give permission for your son or daughter's transcript to be obtained, please write down your son or daughter's name and sign/date the block in option #4.**

HSLs:09 is sponsored by the National Center for Education Statistics (NCES) of the U.S. Department of Education and conducted by RTI International. The study focuses on understanding how high school experiences affect students' learning and their educational and career choices. The study also explores students' transitions from high school to college, the labor force, and adult roles. Of special interest is course taking and career preparation in math and science. Transcript data provide important information to researchers and policymakers about how a student's courses and grades make a difference in subsequent work success and college experiences.

Participation is voluntary. Any participant may withdraw from the study at any time. There is no penalty if you or your son or daughter decides not to participate or give permission to release high school transcripts. While there are no risks or direct benefits to taking part in the study, results of this study may help develop policies that benefit all children in the future.

NCES is authorized by federal law (Public Law 107-279) to conduct HSLs. RTI International, an independent nonprofit research organization based in North Carolina, is conducting the study for NCES. Responses and student record information may be used only for statistical purposes and will not be disclosed, or used, in identifiable form for any other purpose, except as required by law (ESRA 2002, 20 U.S.C., § 9573). Data will be combined to produce statistical reports for Congress and others. No individual data (e.g., names or addresses) will be reported.

If you have any questions about HSLs:09 or participation in the survey or transcript collection, please call Jane Griffin at RTI toll-free at 1-866-253-1063 between 8:30 AM and 5 PM Eastern time, Monday through Friday. If you have any questions about your rights as a study participant, you can call RTI's Office of Research Protection at 1-866-214-2043 (a toll-free number). Both can be reached at: Research Triangle Institute, P.O. Box 12194, Research Triangle Park, NC 27709.

We thank you in advance for your cooperation in this important research.

Sincerely,

Jeffrey Owings, Ph.D.  
 Associate Commissioner, Elementary/Secondary & Libraries Studies Division  
 National Center for Education Statistics

### High School Longitudinal Study of 2009 Permission Form to Obtain Transcript

The information RTI will collect from the transcript includes dates of enrollment, reason for leaving school (graduated, transferred, etc.), grade point average, standardized test scores, type of diploma awarded and date awarded, and, for each course taken between grades 9 through 12, course number and title, number of credits earned, and grade assigned. RTI will also collect information about high-school-level courses that were taken prior to 9th grade.

Please sign the form or go to <https://surveys.nces.ed.gov/hsls/> and click the radio button beside the line that indicates your decision regarding participation in this phase of the study. Please choose only one option and then review the student's name, address, and phone number at the bottom of the form and make corrections, if needed.

IF YOU CHOOSE TO GRANT PERMISSION USING THE HARD COPY FORM, PLEASE RETURN IT AS SOON AS POSSIBLE. WE HAVE ENCLOSED AN ENVELOPE ADDRESSED TO RTI.

#### **YOUTH AGE 18 OR OLDER:**

Option 1. As a youth age 18 or older, I, \_\_\_\_\_, give permission to the school to release my high school transcript to RTI as part of the High School Longitudinal Study of 2009.

\_\_\_\_\_  
(Signature of youth age 18 or older)

\_\_\_\_\_  
(Date of signature)

Option 2. As a youth age 18 or older, I, \_\_\_\_\_, do not give permission to the school to release my high school transcript to RTI as part of the High School Longitudinal Study of 2009.

\_\_\_\_\_  
(Signature of youth age 18 or older)

\_\_\_\_\_  
(Date of signature)

#### **PARENTS OF A YOUTH PARTICIPANT UNDER AGE 18:**

Option 3. As a parent of a youth participant under age 18, I give permission to the school to release the high school transcript of my son/daughter, \_\_\_\_\_, to RTI as part of the High School Longitudinal Study of 2009.

\_\_\_\_\_  
(Signature of parent or guardian)

\_\_\_\_\_  
(Date of signature)

Option 4. As a parent of a youth participant under age 18, I do not give permission to the school to release the high school transcript of my son/daughter, \_\_\_\_\_, to RTI as part of the High School Longitudinal Study of 2009.

\_\_\_\_\_  
(Signature of parent or guardian)

\_\_\_\_\_  
(Date of signature)

#### **PLEASE CORRECT THE INFORMATION BELOW, IF NEEDED:**

## Student/Parent Transcript Implied Consent Letter

«MailingDate»

«studentName» and Parent/Guardian  
«Address1»  
«Address2»  
«City», «State» «Zip»

Dear «studentName» and Parent/Guardian:

We are contacting you at this time to obtain permission to collect «studentName»'s high school transcript. «studentName» was selected to participate in the High School Longitudinal Study of 2009 (HSLs:09), a study that began with a sample of 9th graders in 2009 and included a follow-up in the spring of 2012. Students, parents, and schools participating in HSLs:09 have all been notified in our previous correspondence that we will be collecting transcripts

**If you will allow RTI to obtain the high school transcript, you do not need to return this form.** If for any reason you object to the high school transcript being obtained, you may simply deny permission. **If you wish to deny RTI permission to obtain the high school transcript, please fill out the form enclosed with this letter and return it to RTI in the enclosed envelope as soon as possible.** We are scheduled to begin transcript collection soon and will include the request for your transcript if we have not received a response from you in 3 weeks.

HSLs:09 is sponsored by the National Center for Education Statistics (NCES) of the U.S. Department of Education and conducted by RTI International. The study focuses on understanding how high school experiences affect students' learning and their educational and career choices and explores students' transitions from high school to college, the labor force, and adult roles. Of special interest is coursetaking and career preparation in math and science. Transcript data provides important information about how a student's courses and grades make a difference in the work success and college experiences of young people. The information we will collect from the transcript includes dates of enrollment, grade point average, standardized test scores, and, for each course taken between grades 9 through 12, course number and title, number of credits earned, and grade assigned. We will also collect information about high-school-level courses that were taken prior to 9th grade. Transcripts will be collected under the guidelines of the *Family Educational Rights and Privacy Act*, and will remain confidential. Please note that if the school charges a fee for obtaining the transcript, HSLs:09 will pay the fee.

Participation is voluntary. Any participant may withdraw from the study at any time. There is no penalty if you or your son or daughter decides not to participate or give permission to release high school transcripts. While there are no risks or direct benefits to taking part in the study, results of this study may help to formulate policies that benefit all children in the future.

NCES is authorized by federal law (Public Law 107-279) to conduct HSLs. RTI International, an independent nonprofit research organization based in North Carolina, is conducting the study for NCES. Responses and student record information may be used only for statistical purposes and will not be disclosed, or used, in identifiable form for any other purpose, except as required by law (ESRA 2002, 20 U.S.C., § 9573). Data will be combined to produce statistical reports for Congress and others. No individual data (e.g., names or addresses) will be reported.

If you have any questions about HSLs:09 or participation in the survey or transcript collection, please call <name> at RTI toll-free at 1-866-253-1063 between 8:30AM and 5 PM Eastern time, Monday through Friday. If you have any questions about your rights as a study participant, you can call RTI's Office of Research Protection at 1-866-214-2043 (a toll-free number). Both can be reached at: Research Triangle Institute, P.O. Box 12194, Research Triangle Park, NC 27709.

We thank you in advance for your cooperation in this important research.

Sincerely,

Jeffrey Owings, Ph.D.  
Associate Commissioner, Elementary/Secondary & Libraries Studies Division  
National Center for Education Statistics

NCES is authorized to conduct HSLs:09 under the Education Sciences Reform Act of 2002 (Public Law 107-279, Section 153). ### High School Longitudinal Study Transcript Permission Denial Form

The information RTI will collect from the transcript includes dates of enrollment, grade point average, standardized test scores, and, for each course taken between grades 9 through 12, course number and title, number of credits earned, and grade assigned. RTI will also collect information about high-school-level courses that were taken prior to 9th grade.

**IF YOU GRANT PERMISSION TO THE SCHOOL TO RELEASE THE HIGH SCHOOL TRANSCRIPT TO RTI, YOU DO NOT NEED TO RETURN THIS FORM.**

**IF YOU DO NOT GRANT PERMISSION TO THE SCHOOL TO RELEASE THE HIGH SCHOOL TRANSCRIPT TO RTI, PLEASE RETURN THIS FORM TO RTI IN THE ENCLOSED ENVELOPE AS SOON AS POSSIBLE.**

**Please sign only one option and only if you do not give permission. Then, review the student's name, address, and phone number at the bottom of the form and make corrections, if needed.**

**Parents of a participating youth under age 18:** if you wish to deny permission to the school to release the high school transcript to RTI, you should fill in your son/daughter's name and sign and date this form beside option #1 below.

**Youth age 18 or older:** if you wish to deny permission to the school to release the high school transcript to RTI, you should fill in your name and sign and date the form beside option #2 below.

#### **YOUTH AGE 18 OR OLDER:**

Option 1. As a youth age 18 or older, I, \_\_\_\_\_,  
DO NOT GIVE PERMISSION to the school to release my high school transcript to RTI as  
part of the High School Longitudinal Study.

\_\_\_\_\_  
(Signature of youth age 18 or older)

\_\_\_\_\_  
(Date of signature)

#### **PARENTS OF YOUTH PARTICIPANT UNDER AGE 18:**

Option 2. As a parent of a youth participant under age 18, I DO NOT GRANT PERMISSION to the  
school to release the high school transcript of my son/daughter,  
\_\_\_\_\_, to RTI as part of the High School Longitudinal Study.

\_\_\_\_\_  
(Signature of youth age 18 or older)

\_\_\_\_\_  
(Date of signature)

# Appendix L: Documentation for Composite Variables

*This page intentionally left blank*

A number of composite variables have been constructed in order to enhance substantive analysis. These constructed variables are listed below. Readers should note that not all of the composite variables are available on the public use file. Examples of restricted use composites unavailable on the public use file include (among many others) X3NCESID, X3STATE, and X3TXSATCOMP. In addition to the fact that some composite variables have been suppressed on the public use file, others have been coarsened through recoding (X3EARNPERHR1 is an example of such a recoded variable). The HSL:09 2013 Update and Transcript composites are listed immediately below.

### X3SQSTAT

Indicator for whether a complete 2013 update interview is available on the data file; X3SQSTAT also indicates the mode of the 2013 update interview. Cases coded as "Non-respondent (no 2013 update data)" include out of scope and deceased cases.

### X3SQDATE

Date respondent completed the questionnaire.

### X3SQDATENOV1

Indicator for whether the questionnaire date was before November 1, 2013, which is the timeframe when questions about the student's future applies to.

### X3RTYPE

The 2013 update questionnaire was administered to either the student or the parent. This composite indicates who completed the questionnaire.

### X3DROPOUTTIME

The timeframe when sample member dropped out or was an alternative completer.

### X3HSCREDTIME

When sample member expects to earn high school diploma or equivalent.

### X3DROPSTAT

Sample member status of dropout from high school.

### X3PROGLEVEL

Program level for sample member degree in college. Adjustments made on responses to S3AAB4BA (earning an Associate's degree before a Bachelor's degree) and S3BATTRANSFER (in a university transfer program).

### X3CLGANDWORK

Sample member status for attending college and working.

### X3NCESID

X3NCESID stores the 12-character NCES ID of the sample member's current or last attended school. The NCES ID is the school identifier used to link to the Common Core of Data (CCD) file and the Private School Survey (PSS) file.

### X3CONTROL

X3CONTROL identifies the sample member's current or last attended school as being a Public, Catholic, or Other Private School.

### X3LOCALE

X3LOCALE characterizes the locale (urbanicity) of the sample member's current or last attended school as either City, Suburb, Town, or Rural.

### X3REGION

X3REGION identifies the geographic region of the sample member's current or last attended school.

### X3CENDIV

X3CENDIV identifies the census geographic division of the sample member's current or last attended school.

### X3STATE

X3STATE is the FIPS code for the state of the sample member's current or last attended high school.

**X3HSCOMPSTAT**

HS completion status using 2013 update , transcript, and GED testing data.

**X3HSCOMPDATE**

High school completion date, including last attended date for dropouts. Date is provided in YYYYMM format and available where X3HSCOMPSTAT in (1,2,3). Dates are set to -7 when students are still enrolled (X3HSCOMPSTAT=4) and as -9 when the date is unknown. This composite variable uses BY, F1, and 2013 Update rounds of information as well as data from transcripts.

**X3EVERGED**

Indicates whether the sample member ever received a GED using F1 student interview, F1 parent interview, 2013 update interview, and GED Testing Service.

**X3GEDPASSED**

Status whether the sample member passed the GED, as provided by GED Testing Service.

**X3GEDDATE**

Date in YYYYMM format that the sample member passed the GED, as provided by GED Testing Service.

**X3GEDSTATE**

State code (FIPS) in which the sample member passed the GED, as provided by GED Testing Service.

**X3THIBIO**

Highest Biology courses taken prioritized by the following levels:

T3SSCED in (03051,03062) then X3THIBIO=1;

T3SSCED in (03053,03054,03055,03058,03059,03060,03061,03063,03097,03098,03099) then X3THIBIO = 2;

T3SSCED in (03052) then X3THIBIO = 3;

T3SSCED in (03053,03054,03055,03058,03059,03060,03061,03063,03097,03098,03099) and T3SSCED in (03052) then X3THIBIO = 4;

T3SSCED in (03056,03057) then X3THIBIO = 5;

### X3THICHEM

Highest Chemistry course taken prioritized by the following levels:

T3SSCED in (03101,03105) then X3THICHEM=1;

T3SSCED in (03103,03104,03108,03147,03148,03149) then X3THICHEM = 2;

T3SSCED in (03102) then X3THICHEM = 3;

T3SSCED in (03103,03104,03108,03147,03148,03149) and T3SSCED in (03102) then X3THICHEM = 4;

T3SSCED in (03106,03107) then X3THICHEM = 5;

### X3THIPHY

Highest Physics course taken prioritized by the following levels:

T3SSCED in (03151,03161) then X3THIPHY=1;

T3SSCED in (03153,03162,03197,03198,03199) then X3THIPHY = 2;

T3SSCED in (03152) then X3THIPHY = 3;

T3SSCED in (03153,03162,03197,03198,03199) and T3SSCED in (03152) then X3THIPHY = 4;

T3SSCED in (03155,03156,03157,03160,03163,03164,03165,03166) then X3THIPHY = 5;

### X3THIOTHSCI

Highest Other Science course taken prioritized by the following levels:

T3SSCED in (03001,03007,03008,03158,03159,03201,03202,03203,03204,03205,03209,03210,03211,03212,03213,03994,03995,03239,03996) then X3THIOTHSCI=1;

T3SSCED in (03002,03003,03004,03005,03006,03009,03047,03048,03049', '03997,03998,03999) then X3THIOTHSCI= 2;

T3SSCED in (03206,03207,03208) then X3THIOTHSCI= 5;

### X3TCREDENG

Total Carnegie credits in English Language and Literature, which is the first two digits of the course SCED code: 01.

**X3TGPAENG**

GPA in English Language and Literature, which is the first two digits of the course SCED code: 01.

**X3TCREDMAT**

Total Carnegie credits in Mathematics, which is the first two digits of the course SCED code: 02.

**X3TGPAMAT**

GPA in Mathematics, which is the first two digits of the course SCED code: 02.

**X3TCREDSKI**

Total Carnegie credits in Life and Physical Sciences, which is the first two digits of the course SCED code: 03.

**X3TGPASCI**

GPA in Life and Physical Sciences, which is the first two digits of the course SCED code: 03.

**X3TSTATGRXX**

At least one course available on transcript where the grade is unknown.

**X3TSTATYRXX**

At least one course available on transcript where the year is unknown.

**X3TSTATGR8B**

At least one course available on transcript from the eighth grade or before. This indicator is closely related to X3TSTATYR8B as most courses taken in the eighth grade and before would have been taken in the 2008/09 school year or before, however, some exceptions apply related to students who do not always follow a typical path.

**X3TSTATYR8B**

At least one course available on transcript from the 2008/09 school year. This indicator is closely related to X3TSTATGR8B as most courses taken in the eighth grade and before would

have been taken in the 2008/09 school year or before, however, some exceptions apply related to students who do not always follow a typical path.

#### X3TXSATCOMP

College entrance exam (i.e., SAT, ACT) composite score, standardized in terms of SAT.

#### X3TXSATMATH

College entrance exam (i.e., SAT, ACT) mathematics section score, standardized in terms of SAT.

#### X3TXSATREAD

College entrance exam (i.e., SAT, ACT) critical reading section score, standardized in terms of SAT.

#### X3TXACTCOMP

College entrance exam (i.e., SAT, ACT) composite score, standardized in terms of ACT.

#### X3TXPSATCOMP

Most recent PSAT composite test score. The valid range for this test score is 20 to 80.

#### X3TXPSATMATH

Most recent test score associated with the highest math component score. The valid range for this test score is 20 to 80.

#### X3TXPSATREAD

Most recent test score associated with the highest reading component score. The valid range for this test score is 20 to 80.

#### X3TXPSATWRIT

Most recent test score associated with the highest writing component score. The valid range for this test score is 20 to 80.

### X3TSTATGR09

At least one course available on transcript from the ninth grade. This indicator is closely related to X3TSTATYR09 as most courses taken in the ninth grade would have been taken in the 2009/10 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATGR10

At least one course available on transcript from the tenth grade. This indicator is closely related to X3TSTATYR10 as most courses taken in the tenth grade would have been taken in the 2010/11 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATGR11

At least one course available on transcript from the eleventh grade. This indicator is closely related to X3TSTATYR11 as most courses taken in the eleventh grade would have been taken in the 2011/12 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATGR12

At least one course available on transcript from the twelfth grade. This indicator is closely related to X3TSTATYR12 as most courses taken in the twelfth grade would have been taken in the 2012/13 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATYR09

At least one course available on transcript from the 2009/10 school year. This indicator is closely related to X3TSTATGR09 as most courses taken in the ninth grade would have been taken in the 2009/10 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATYR10

At least one course available on transcript from the 2010/11 school year. This indicator is closely related to X3TSTATGR10 as most courses taken in the tenth grade would have been taken in the 2010/11 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATYR11

At least one course available on transcript from the 2011/12 school year. This indicator is closely related to X3TSTATGR11 as most courses taken in the eleventh grade would have been taken in the 2011/12 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATYR12

At least one course available on transcript from the 2012/13 school year. This indicator is closely related to X3TSTATGR12 as most courses taken in the twelfth grade would have been taken in the 2012/13 school year, however, some exceptions apply related to students who do not always follow a typical path.

### X3TSTATYR13

At least one course available on transcript from the 2013/14 school year. This indicator represents courses taken outside the typical pattern as most students would have graduated from HS at the end of the 2012/13 school year.

### X3TCOVERAGE

Flag is set when there is credit in all four grade levels (9th-12th) or in the absence of grade level information the four academic years (2009-2012) that align with those grade levels. This composite does not account for students who graduate before their fourth year or leave high school and don't return.

### X3NUMHSATTND

Number of schools attended.

### X3TTRNRCVD

The number of transcripts received from high schools for the student.

### X3ATTENDCTE

A flag to indicate that the student attended a CTE center.

**X3TLASTHS**

The NCESID for the last school known as of the transcript data collection. Only sample schools and transfer schools apply (T3SSCHTYPE=1 or 2). The priority for assigning the last known school was S3LASTHSID, then the school where a diploma was indicated, and finally the school with the last course taken chronologically.

**X3TTRNLASTHS**

Indicator that a transcript was provided for the last known school as of the transcript component.

**X3ELLSTATUS**

English language learner status from the transcripts.

**X3TOUTCOME**

Transcript indicated outcome as provided by the high school.

**X3TCREDAPENG**

Total Carnegie credits in AP and IB English courses, which is the course SCED code(s): 01005, 01006, 01007.

**X3T1CREDALG1**

Indicates at least one Carnegie unit in Algebra 1, which is the course SCED code(s): 02052, 02054, 02069.

**X3T1CREDALG2**

Indicates at least one Carnegie unit in Algebra 2, which is the course SCED code(s): 02141, 02055, 02056, 02058.

**X3T1CREDINTM**

Indicates at least one Carnegie unit in Integrated Math, which is the course SCED code(s): 02104, 02108, 02057, 02061, 02101, 02102, 02109, 02111, 02112, 02113, 02149.

**X3T1CREDPREC**

Indicates at least one Carnegie unit in Analysis/Pre-Calculus, which is the course SCED code(s): 02110, 02132.

**X3TCREDAPMTH**

Total Carnegie credits in AP and IB Mathematics courses, which is the course SCED code(s): 02124, 02125, 02131, 02132, 02133, 02134, 02203.

**X3T1CREDCALC**

Indicates at least one Carnegie unit in Calculus, which is the course SCED code(s): 02121, 02122, 02123, 02126.

**X3T1CREDGEO**

Indicates at least one Carnegie unit in Geometry, which is the course SCED code(s): 02071, 02072, 02073, 02074, 02075, 02079, 02135.

**X3T1CREDSTAT**

Indicates at least one Carnegie unit in Statistics/Probability, which is the course SCED code(s): 02201, 02202, 02204, 02207, 02209.

**X3T1CREDTRIG**

Indicates at least one Carnegie unit in Trigonometry, which is the course SCED code(s): 02103, 02105, 02106, 02107.

**X3THIMATH**

Highest Mathematics course, which is the first two digits of the course SCED code: 02.

**X3THIMATH9**

Highest Mathematics course taken in Ninth grade, which is the first two digits of the course SCED code: 02.

**X3TGPAHIMTH**

GPA in highest Mathematics course, which corresponds to the value of X3THIMATH.

**X3TWHENALG1**

Indicates the grade level the student took Algebra I.

**X3TCREDAPSCI**

Total Carnegie credits in AP and IB Science courses, which is the course SCED code(s): 03056, 03057, 03106, 03107, 03155, 03156, 03157, 03160, 03163, 03164, 03165, 03166, 03206, 03207, 03208.

**X3T1CREDBIOL**

Indicates at least one Carnegie unit in Biology, which is the course SCED code(s): 03051, 03062, 03053, 03054, 03055, 03058, 03059, 03060, 03061, 03063, 03097, 03098, 03099, 03052, 03056, 03057.

**X3T1CREDCHEM**

Indicates at least one Carnegie unit in Chemistry, which is the course SCED code(s): 03101, 03105, 03103, 03104, 03108, 03147, 03148, 03149, 03102, 03106, 03107.

**X3T1CREDESCI**

Indicates at least one Carnegie unit in Geology/Earth Science, which is the course SCED code(s): 03001, 03007, 03008, 03158, 03159, 03201, 03202, 03203, 03204, 03205, 03210, 03211, 03212, 03213, 03994, 03995, 03239, 03996, 03002, 03003, 03004, 03005, 03006, 03009, 03047, 03048, 03049, 03209, 03997, 03998, 03999, 03207, 03208, 03206.

**X3T1CREDPHYS**

Indicates at least one Carnegie unit in Physics, which is the course SCED code(s): 03151, 03161, 03153, 03162, 03197, 03198, 03199, 03152, 03155, 03156, 03157, 03160, 03163, 03164, 03165, 03166.

**X3THISCI**

Highest Science course, which is the first two digits of the course SCED code: 03.

**X3THISCI9**

Highest Science course taken in Ninth grade, which is the first two digits of the course SCED code: 03.

### X3TGPAHISCI

GPA in highest Science course, which corresponds to the value of X3THISCI.

### X3TCREDAPSS

Total Carnegie credits in AP and IB Social Studies courses, which is the course SCED code(s): 04003, 04004, 04054, 04056, 04057, 04066, 04104, 04157, 04158, 04159, 04054, 04203, 04204, 04205, 04206, 04253, 04256, 04257, 04262, 04304, 04309.

### X3TCREDAPART

Total Carnegie credits in AP and IB Fine Arts courses, which is the course SCED code(s): 05012, 05062, 05114, 05115, 05153, 05171, 05172, 05173, 05174, 05175.

### X3TCREDAPLNG

Total Carnegie credits in AP and IB Foreign Language courses, which is the course SCED code(s): 06110, 06111, 06112, 06113, 06130, 06131, 06132, 06133, 06150, 06151, 06152, 06170, 06171, 06190, 06191, 06210, 06211, 06212, 06250, 06251, 06270, 06271, 06290, 06291, 06311, 06313, 06331, 06410, 06411, 06412, 06430, 06431, 06432, 06450, 06451, 06490, 06491, 06510, 06511, 06530, 06531, 06590, 06591, 06610, 06611, 06650, 06651, 06670, 06671, 06690, 06691, 06710, 06711, 06712, 06730, 06731, 06732, 06770, 06771, 06790, 06791, 06830, 06831, 06850, 06851, 06870, 06871.

### X3THILANG

Highest Foreign Language course, which is the first two digits of the course SCED code: 06.

### X3TCREDTOT

Total Carnegie credits.

### X3TCREDACAD

Total Carnegie credits in Academic courses, which is the first two digits of the course SCED code: 01, 02, 03, 04, 05, 06.

### X3TCREDCTE

Total Carnegie credits in CTE courses, which is the first two digits of the course SCED code: 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21 or the course SCED codes: 22151:22153, 22201:22249.

**X3TCREDNONA**

Total Carnegie credits in Nonacademic, Non-CTE courses, which is the first two digits of the course SCED code: 22 excluding course SCED codes: 22151:22153, 22201:22249.

**X3TCREDSTEM**

Total Carnegie credits in STEM courses, which is the first two digits of the course SCED code: 02, 03, 10, 21.

**X3TCREDAP**

Total Carnegie credits in AP courses.

**X3TCREDIB**

Total Carnegie credits in IB courses.

**X3TCREDAPIB**

Total Carnegie credits in AP and IB courses.

**X3TCRED9TH**

Total Carnegie credits in Ninth Grade, which is when T3SGRLEV = 4.

**X3TCRED10TH**

Total Carnegie credits in Tenth Grade, which is when T3SGRLEV = 5.

**X3TCRED11TH**

Total Carnegie credits in Eleventh Grade, which is when T3SGRLEV = 6.

**X3TCRED12TH**

Total Carnegie credits in Twelfth Grade, which is when T3SGRLEV = 7.

**X3TCREDPPSE**

Total Carnegie credits in Potential Postsecondary credit courses, which is credit type = 2 or 3.

**X3TCREDGEN**

Total Carnegie credits in General or Regular courses, which is when T3SRIG = G.

**X3TCREDADV**

Total Carnegie credits in Enriched or Advanced courses, which is when T3SRIG = E.

**X3TCREDHON**

Total Carnegie credits in Honors courses, which is when T3SRIG = H.

**X3TCREDCLG**

Total Carnegie credits in College courses, which is when T3SRIG = C.

**X3TCREDMTSC**

Total Carnegie credits in Math and Science, which is the first two digits of the course SCED code: 02, 03.

**X3TGPAACAD**

GPA in Academic courses, which is the first two digits of the course SCED code: 01, 02, 03, 04, 05, 06.

**X3TGPACTE**

GPA in CTE courses, which is the first two digits of the course SCED code: 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21 or the course SCED codes: 22151:22153, 22201:22249.

**X3TGAPANONA**

GPA in Nonacademic, Non-CTE courses, which is the first two digits of the course SCED code: 22 excluding course SCED codes: 22151:22153, 22201:22249.

**X3TGPASTEM**

GPA in STEM courses, which is the first two digits of the course SCED code: 02, 03, 10, 21.

**X3TGPAIB**

GPA in IB courses.

**X3TGPAAP**

GPA in AP courses.

**X3TGPA11TH**

GPA in Eleventh Grade, which is when T3SGRLEV = 6.

**X3TGPA9TH**

GPA in Ninth Grade, which is when T3SGRLEV = 4.

**X3TGPA10TH**

GPA in Tenth Grade, which is when T3SGRLEV = 5.

**X3TGPA12TH**

GPA in Twelfth Grade, which is when T3SGRLEV = 7.

**X3TGPATOT**

Overall GPA.

**X3TGPAWGT**

Overall GPA, honors-weighted.

**X3TGPAMTHAP**

GPA in AP and IB Mathematics courses, which is the course SCED code(s): 02124, 02125, 02131, 02132, 02133, 02134, 02203.

**X3TGPASCIAP**

GPA in AP and IB Science courses, which is the course SCED code(s): 03056, 03057, 03106, 03107, 03155, 03156, 03157, 03160, 03163, 03164, 03165, 03166, 03206, 03207, 03208.

**X3TAFGPATOT**

GPA in Academic courses, excluding failed courses.

**X3TCREDSPED**

Total Carnegie credits in Special Education courses, which is when T3SATTSE = 1.

**X3TAGPA10**

GPA in Tenth Grade Academic courses, which is when T3SGRLEV = 5 and the first two digits of the course SCED code: 01, 02, 03, 04, 05, 06.

**X3TAGPA11**

GPA in Eleventh Grade Academic courses, which is when T3SGRLEV = 6 and the first two digits of the course SCED code: 01, 02, 03, 04, 05, 06.

**X3TAGPA12**

GPA in Twelfth Grade Academic courses, which is when T3SGRLEV = 7 and the first two digits of the course SCED code: 01, 02, 03, 04, 05, 06.

**X3TAGPA09**

GPA in Ninth Grade Academic courses, which is when T3SGRLEV = 4 and the first two digits of the course SCED code: 01, 02, 03, 04, 05, 06.

**X3TAGPAWGT**

GPA in Academic courses, honors-weighted.

**X3TCRSES1**

The coursetaking completion flags (as well as the new basics variable X3TNEWBASIC) are based on credit counts without regard to the level of courses completed (except, where applicable, for the condition that at least two credits in a single foreign language must be earned). Only credits accrued in 9<sup>th</sup> through 12<sup>th</sup> grade (or ungraded) are included. For a cross-subject coursetaking composite that takes into account the level of courses completed, see academic track/concentrator (X3TACADTRCK).

Values indicate course taking patterns. Flag set when at least 4 standard credits earned in English, 3 standard credits earned in Social Studies, 2 standard credits earned in Science, and 2 standard credits earned in Math.

#### X3TCRSES2

The coursetaking completion flags (as well as the new basics variable X3TNEWBASIC) are based on credit counts without regard to the level of courses completed (except, where applicable, for the condition that at least two credits in a single foreign language must be earned). Only credits accrued in 9<sup>th</sup> through 12<sup>th</sup> grade (or ungraded) are included. For a cross-subject coursetaking composite that takes into account the level of courses completed, see academic track/concentrator (X3TACADTRCK).

Values indicate course taking patterns. Flag set when at least 4 standard credits earned in English, 3 standard credits earned in Social Studies, 3 standard credits earned in Science, and 3 standard credits earned in Math.

#### X3TCRSES3

The coursetaking completion flags (as well as the new basics variable X3TNEWBASIC) are based on credit counts without regard to the level of courses completed (except, where applicable, for the condition that at least two credits in a single foreign language must be earned). Only credits accrued in 9<sup>th</sup> through 12<sup>th</sup> grade (or ungraded) are included. For a cross-subject coursetaking composite that takes into account the level of courses completed, see academic track/concentrator (X3TACADTRCK).

Values indicate course taking patterns. Flag set when at least 4 standard credits earned in English, 3 standard credits earned in Social Studies, 3 standard credits earned in Science, 3 standard credits earned in Math, and .5 standard credits earned in computer science.

#### X3TCRSES4

The coursetaking completion flags (as well as the new basics variable X3TNEWBASIC) are based on credit counts without regard to the level of courses completed (except, where applicable, for the condition that at least two credits in a single foreign language must be earned). Only credits accrued in 9<sup>th</sup> through 12<sup>th</sup> grade (or ungraded) are included. For a cross-subject coursetaking composite that takes into account the level of courses completed, see academic track/concentrator (X3TACADTRCK).

Values indicate course taking patterns. Flag set when at least 4 standard credits earned in English, 3 standard credits earned in Social Studies, 3 standard credits earned in Science, 3

standard credits earned in Math, .5 standard credits earned in computer science, and 2 standard credits earned in a Foreign Language.

### X3TCRSES5

The coursetaking completion flags (as well as the new basics variable X3TNEWBASIC) are based on credit counts without regard to the level of courses completed (except, where applicable, for the condition that at least two credits in a single foreign language must be earned). Only credits accrued in 9<sup>th</sup> through 12<sup>th</sup> grade (or ungraded) are included. For a cross-subject coursetaking composite that takes into account the level of courses completed, see academic track/concentrator (X3TACADTRCK).

Values indicate course taking patterns. Flag set when at least 4 standard credits earned in English, 3 standard credits earned in Social Studies, 3 standard credits earned in Science, 3 standard credits earned in Math, and 2 standard credits earned in a Foreign Language.

### X3TCREDSOCST

Total Carnegie credits in Social Sciences and History, which is the first two digits of the course SCED code: 04.

### X3TGPAASOCST

GPA in Social Sciences and History, which is the first two digits of the course SCED code: 04.

### X3TCREDART

Total Carnegie credits in Fine and Performing Arts, which is the first two digits of the course SCED code: 05.

### X3TGPAART

GPA in Fine and Performing Arts, which is the first two digits of the course SCED code: 05.

### X3TCREDLANG

Total Carnegie credits in Foreign Language and Literature, which is the first two digits of the course SCED code: 06.

**X3TGPALANG**

GPA in Foreign Language and Literature, which is the first two digits of the course SCED code: 06.

**X3TCREDREL**

Total Carnegie credits in Religious Education and Theology, which is the first two digits of the course SCED code: 07.

**X3TGPAREL**

GPA in Religious Education and Theology, which is the first two digits of the course SCED code: 07.

**X3TCREDHELPE**

Total Carnegie credits in Physical, Health, and Safety Education, which is the first two digits of the course SCED code: 08.

**X3TGPAHELPE**

GPA in Physical, Health, and Safety Education, which is the first two digits of the course SCED code: 08.

**X3TCREDMILSCI**

Total Carnegie credits in Military Science, which is the first two digits of the course SCED code: 09.

**X3TGPAMILSCI**

GPA in Military Science, which is the first two digits of the course SCED code: 09.

**X3TCREDCOMPSCI**

Total Carnegie credits in Computer and Information Sciences, which is the first two digits of the course SCED code: 10.

**X3TGPACOMPSCI**

GPA in Computer and Information Sciences, which is the first two digits of the course SCED code: 10.

**X3TCREDCOM**

Total Carnegie credits in Communications and Audio/Video Technology, which is the first two digits of the course SCED code: 11.

**X3TGPACOM**

GPA in Communications and Audio/Video Technology, which is the first two digits of the course SCED code: 11.

**X3TCREDBUS**

Total Carnegie credits in Business and Marketing, which is the first two digits of the course SCED code: 12.

**X3TGPABUS**

GPA in Business and Marketing, which is the first two digits of the course SCED code: 12.

**X3TCREDMANU**

Total Carnegie credits in Manufacturing, which is the first two digits of the course SCED code: 13.

**X3TGPAMANU**

GPA in Manufacturing, which is the first two digits of the course SCED code: 13.

**X3TCREDHELSCI**

Total Carnegie credits in Health Care Sciences, which is the first two digits of the course SCED code: 14.

**X3TGPAHELSCI**

GPA in Health Care Sciences, which is the first two digits of the course SCED code: 14.

**X3TCREDPUBSER**

Total Carnegie credits in Public, Protective, and Government Service, which is the first two digits of the course SCED code: 15.

**X3TGPAPUBSER**

GPA in Public, Protective, and Government Service, which is the first two digits of the course SCED code: 15.

**X3TCREDTOUR**

Total Carnegie credits in Hospitality and Tourism, which is the first two digits of the course SCED code: 16.

**X3TGPATOUR**

GPA in Hospitality and Tourism, which is the first two digits of the course SCED code: 16.

**X3TCREDARCH**

Total Carnegie credits in Architecture and Construction, which is the first two digits of the course SCED code: 17.

**X3TGPAARCH**

GPA in Architecture and Construction, which is the first two digits of the course SCED code: 17.

**X3TCREDAG**

Total Carnegie credits in Agriculture, Food, and Natural Resources, which is the first two digits of the course SCED code: 18.

**X3TGPAAG**

GPA in Agriculture, Food, and Natural Resources, which is the first two digits of the course SCED code: 18.

**X3TCREDHUMSER**

Total Carnegie credits in Human Services, which is the first two digits of the course SCED code: 19.

**X3TGPAHUMSER**

GPA in Human Services, which is the first two digits of the course SCED code: 19.

**X3TCREDTRANS**

Total Carnegie credits in Transportation, Distribution, and Logistics, which is the first two digits of the course SCED code: 20.

**X3TGPATRANS**

GPA in Transportation, Distribution, and Logistics, which is the first two digits of the course SCED code: 20.

**X3TCREDENGIN**

Total Carnegie credits in Engineering and Technology, which is the first two digits of the course SCED code: 21.

**X3TGPAENGIN**

GPA in Engineering and Technology, which is the first two digits of the course SCED code: 21.

**X3TCREDMISC**

Total Carnegie credits in Miscellaneous, which is the first two digits of the course SCED code: 22.

**X3TGPAMISC**

GPA in Miscellaneous, which is the first two digits of the course SCED code: 22.

**X3EARNPERHR1**

Earnings per hour calculated for sample members current job.

**X3EARNPERHR2**

Earnings per hour calculated for sample members other job.

### X3HSCRED

Imputed version of S3HSCRED. X3HSCRED\_IM values of 1 indicate when X3HSCRED is imputed.

### X3HSCREDTYPE

Imputed version of S3HSCREDTYPE. X3HSCREDTY\_IM values of 1 indicate when X3HSCREDTYPE is imputed.

### X3CLASSES

Imputed version of S3CLASSES. X3CLASSES\_IM values of 1 indicate when X3CLASSES is imputed.

### X3WORK

Imputed version of S3WORK. X3WORK\_IM values of 1 indicate when X3WORK is imputed.

### X3LASTHSDATE

Imputed version of S3LASTHSDATE. X3LASTHSD\_IM values of 1 indicate when X3LASTHSDATE is imputed.

### X3TXAPARTHI

Advanced Placement Exam: Art History exam score as provided by College Board or the sample member's high school transcript.

### X3TXAPMUSIC

Advanced Placement Exam: Music theory exam score as provided by College Board or the sample member's high school transcript.

### X3TXAPART2D

Advanced Placement Exam: Studio art 2-D design exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPART3D**

Advanced Placement Exam: Studio art 3-D design exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPARTDR**

Advanced Placement Exam: Studio art drawing exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPENGLNG**

Advanced Placement Exam: English language and composition exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPENGLIT**

Advanced Placement Exam: English literature and composition exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPCMPGOV**

Advanced Placement Exam: Comparative government and politics exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPEURO**

Advanced Placement Exam: European history exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPHUGEO**

Advanced Placement Exam: Human geography exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPMACRO**

Advanced Placement Exam: Macroeconomics exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPMICRO**

Advanced Placement Exam: Microeconomics exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPPSYCH**

Advanced Placement Exam: Psychology exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPUSGOV**

Advanced Placement Exam: US government and politics exam score as provided by College Board or the sample member's high school transcript.

**X3TGPAPIB**

GPA in IB courses.

**X3TXAPUSHIST**

Advanced Placement Exam: US history exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPWOHIST**

Advanced Placement Exam: World history exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPMATCOM**

Advanced Placement Exam: Mathematics and computer science exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPCALCAB**

Advanced Placement Exam: Calculus AB exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPCALCBC**

Advanced Placement Exam: Calculus BC exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPCOMSCI**

Advanced Placement Exam: Computer science A exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPSTATS**

Advanced Placement Exam: Statistics exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPBIO**

Advanced Placement Exam: Biology exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPCHEM**

Advanced Placement Exam: Chemistry exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPENVSCI**

Advanced Placement Exam: Environmental science exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPPHYB**

Advanced Placement Exam: Physics B exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPPHYELE**

Advanced Placement Exam: Physics C - electricity and magnetism exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPPHYMEC**

Advanced Placement Exam: Physics C - mechanics exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPCHI**

Advanced Placement Exam: Chinese language and culture exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPFRE**

Advanced Placement Exam: French language and culture exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPGER**

Advanced Placement Exam: German language and culture exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPITL**

Advanced Placement Exam: Italian language and culture exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPJAP**

Advanced Placement Exam: Japanese language and culture exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPLAT**

Advanced Placement Exam: Latin exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPSPLANG**

Advanced Placement Exam: Spanish language and culture exam score as provided by College Board or the sample member's high school transcript.

**X3TXAPSPLIT**

Advanced Placement Exam: Spanish literature and culture exam score as provided by College Board or the sample member's high school transcript.

**X3TXSATLIT**

Literature SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATUSH**

U.S. History SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATWOH**

World History SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATMAT1**

Math Level 1 SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATMAT2**

Math Level 2 SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATBIO**

Biology/EM SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATCHE**

Chemistry SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATPHY**

Physics SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATFRE**

French SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATFREL**

French with Listening SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATGER**

German SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATGERL**

German with Listening SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATSPA**

Spanish SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATSPAL**

Spanish with Listening SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATHEB**

Modern Hebrew SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATITL**

Italian SAT subject test score as provided by College Board or the sample member transcript.

**X3TXSATLAT**

Latin SAT subject test score as provided by College Board or the sample member transcript.

### X3TXSATCHIL

Chinese with Listening SAT subject test score as provided by College Board or the sample member transcript.

### X3TXSATJAPL

Japanese with Listening SAT subject test score as provided by College Board or the sample member transcript.

### X3TXSATKORL

Korean with Listening SAT subject test score as provided by College Board or the sample member transcript.

### X3TACADTRCK

Takes into account both number of credits earned and specific levels attained for math, science, and social studies. Students are flagged as an academic concentrator if they earn at least four credits in English, three credits in math with one higher than algebra II, three credits in science with one higher than biology, three credits in social studies with one in U.S. or world history, and two in one foreign language. Only credits accrued in 9<sup>th</sup> through 12<sup>th</sup> grade (or ungraded) are included.

Values indicate whether the sample member is on an academic track that includes at least 4 English credits, 3 math credits (including Algebra II), 3 science credits (including biology), 3 social studies credits (including US or World History), and 2 credits in a particular foreign language.

### X3TOCCUCON

Indicates whether the sample member has at least 3 credits in a particular occupational concentrator. An occupational concentrator is defined as courses where the T3SSCED code value begins with the same first two digits and the values range from 10-21.

### X3TNEWBASIC

The new basics variable (X3TNEWBASIC) and similar composites (X3TCRSES1-5) are based on credit counts without regard to the level of courses completed (except for the condition that at least two credits in a single foreign language must be earned). Only credits accrued in 9<sup>th</sup> through 12<sup>th</sup> grade (or ungraded) are included. For a cross-subject coursetaking composite that takes into account the level of courses completed, see academic track/concentrator (X3TACADTRCK).

Values indicate whether the sample member is on:

- (1) a college-bound core curriculum that includes at least 4 English credits, 3 math credits, 3 science credits, 3 social studies credits, .5 computer science credits, and 2 credits in a particular foreign language;
- (2) a core curriculum that includes at least 4 English credits, 3 math credits, 3 science credits, 3 social studies credits, and .5 computer science credits;
- (3) a college bound core curriculum without computer sciences that includes at least 4 English credits, 3 math credits, 3 science credits, 3 social studies credits, and 2 credits in a particular foreign language;
- (4) a core curriculum without computer sciences track that includes at least 4 English credits, 3 math credits, 3 science credits, and 3 social studies credits;
- (5) a minimal core curriculum that includes at least 4 English credits, 2 math credits, 2 science credits, and 3 social studies credits; or
- (6) all other patterns.

#### X3MATCHATMPT

Indicates whether a match was attempted for at least one of the HSLs:09 extant data sources. The HSLs:09 extant data sources are: GED Testing Service (GED Testing Program data); College Board (SAT, AP test, and SAT subject test scores); and ACT (ACT scores).

#### X3UNIV1

Indicates simultaneously the base year, first follow-up, 2013 update, and transcript status of sample members. This variable has valid values that account for every pattern encountered by HSLs:2009 sample members.
