## Preface to Volume III

This set of volumes is intended to document the data collection of the 1990-91 Schools and Staffing Surveys (SASS) and is intended for several types of readers. The codebooks for each survey (Volumes II and III, for the Restricted-Use Version and the Public-Use Version, respectively) contain the variable names and position numbers for all survey and sampling variables. All data variables have been imputed to compensate for item nonresponse. The imputed values may be identified by checking the status on any given record of the variable's imputation flag (F\_varname). The imputation flags are listed at the end of each SASS component's codebook.

The major difference between the Restricted-Use codebooks and the Public-Use codebooks is that individually-identifying data have been recoded or altered in the Public-Use datafiles and hence, codebooks. On each individual's record, variables such as year of birth of the teacher or administrator were recalculated into age and assigned to an age range group. Another such variable is any salary or family income variable, all of which have been recoded into salary or income ranges. Characteristics of schools, such as the exact number of students in each minority group, have been recalculated as the percentage of minority students, and placed into a range. The control number on every record, with the exception of public districts, has been scrambled to prevent disclosure of aggregated data below the level of Census region. **Therefore, it is not possible to generate state estimates from the Public-Use files (with the exception of the Teacher Demand and Shortage file).** However, the administrator, school, and teacher records have all been scrambled in the same way, and it remains possible to link these 3 files together. That is, an administrator with one school number can be linked to the school with the same school number, and likewise the teachers can be linked to the school or its administrator. None of these records can be linked to the district, though. District policy items (Part B of the district questionnaire; see Appendix F) are found on the school file; what remains in the district file are the characteristics of that district: its number of students, teachers, new hires, and so forth.

However, there are a number of useful sections in Volume I (Survey Documentation) for the programmer or researcher. Copies of the questionnaires (with variable labels affixed as necessary) can be found in Appendix F. Appendix A is a set of definitions of terms used in the SASS surveys, such as *Local Education Agency*. Crosswalks between the 1987-88 and 1990-91 variables are in Appendix B. Appendix C contains a crosswalk between the field-of-study codes in 1987-88 and 1990-91. The SAS PROC CONTENTS is Appendix D. Appendix E is a number of cross-tabulated counts, both unweighted and weighted, for verification of programming results using the SASS datatapes. Those interested in the design and methodology of each SASS component may find the chapters on Sample Design and Implementation, Data Collection, Edit Procedures, and Imputation in Volume I to be useful. A Caution concerning the use of prior year estimates for trend comparisons (Section XIII) should be read by all researchers. The sections on confidentiality measures, created variables, and the User's Notes (sections XIV-XVI) may also answer some questions.

---

We are interested in your reaction to the information presented here about the Schools and Staffing Survey data collection system as well as the microdata files we release. We welcome your recommendations for improving our survey work and data products. If you have suggestions or comments or want more information, please contact:

SASS Datatapes  
Special Surveys and Analysis Branch  
Elementary and Secondary Education Statistics Division  
National Center for Education Statistics  
Office of Educational Research and Improvement  
555 New Jersey Avenue, NW  
Washington, DC 20208-5651

We are also interested in the research you do using the SASS data sets. We would be pleased to receive copies of reports, working papers, and published articles you write, which use data from the SASS. Send them to the address above.

### TABLE OF CONTENTS

#### VOLUME I

Preface . . . . .	iii
Acknowledgments . . . . .	iv
 I. Overview . . . . .	1
A. Purpose of the Survey . . . . .	2
B. Periodicity of the Survey . . . . .	3
C. Objectives and Policy Issues . . . . .	3
D. Target Population and Estimates . . . . .	5
E. Survey Content . . . . .	7
 II. Changes in SASS Design and Content from 1988 to 1991 . . . . .	9
A. Procedural Changes . . . . .	10
B. Design Changes . . . . .	10
C. Content Changes . . . . .	11
 III. Preparation for the 1991 SASS . . . . .	13
 IV. Sample Design and Implementation . . . . .	15
A. Sampling Frames . . . . .	16
1. Public Schools . . . . .	16
2. Bureau of Indian Affairs Schools . . . . .	17
3. Private Schools . . . . .	17
B. Sample Allocation . . . . .	18
1. Public Schools . . . . .	18
2. Bureau of Indian Affairs Schools . . . . .	20
3. Private Schools . . . . .	20
C. Overlapping 1988 and 1991 SASS Samples . . . . .	21
1. Public Schools . . . . .	21
2. Private Schools . . . . .	22
D. Sample Selection Procedures . . . . .	22
1. Public Schools . . . . .	22
2. Private Schools . . . . .	23
3. Public School Districts . . . . .	24
4. Teachers . . . . .	25
 V. Data Collection . . . . .	29

## I. Created Variables

## I. Created Variables

### A. Variables Added to the Datafile

Several analysis variables were added to the restricted-use datafiles and public-use datafiles (unless otherwise noted) for data users' convenience:

#### 1. School level (SCHLEVEL) - Administrator and School files

School level is defined as elementary, secondary, or combined, where a combined school has some elementary and also some secondary grades. There was a school level variable asked on the questionnaire, but school respondents classify their schools in different ways for the middle grades. Therefore, the following definition of school level was used to determine a consistent school level, and replaces the self-assigned school level:

1. Elementary if the school has only grades below 8th grade;
2. Secondary if the school has grades between 7th and 12th;
3. Combined if the school has any other combination of grades.

Two examples of a combined school level are 4-8 and 5-12. Secondary schools can have any combination of grades between 7th and 12th grade.

#### 2. Type of private school (TYPOLOGY) - Administrator and School files

There is a wide diversity among private schools, between types of religiously-oriented schools, non-sectarian and special-purpose schools. NCES has adopted a nine-level grouping of private schools, developed by McMillen and Benson (1991)<sup>3</sup>:

1. Catholic, Parochial
2. Catholic, Diocesan
3. Catholic, Private order
4. Other religious, Conservative Christian
5. Other religious, denomination-affiliated
6. Other religious, unaffiliated
7. Non-sectarian, regular program
8. Non-sectarian, special emphasis program
9. Non-sectarian, special education program

#### 3. 3-Level Affiliation (AFFIL) - Administrator and School files

These nine levels are also consolidated into the three major affiliation categories traditionally reported by NCES: Catholic, other Religious, and Non-sectarian. Typology levels

---

<sup>3</sup>McMillen, Marilyn M. and Peter F. Benson. (1991). *Diversity of Private Schools*. NCES Technical Report 92-082. Washington: Office of Educational Research and Improvement.

1-3 are the Catholic affiliations, 4-6 are Other religious affiliations, and 7-9 are Non-sectarian affiliations.

#### **4. Community type (LOCALE) - Restricted-use file (Administrator and School)**

The community type in which the school operates is based upon the Census definition of community size and its relation to urbanized or rural places (see Johnson, 1989)<sup>4</sup>. Although SASS collects a self-reported variable, it is subject to misclassification, because respondents tend to report the size of the immediate area without regard to its urban, suburban, or rural status. The self-reported community type has been replaced by one determined from the ZIP Code of the school, and matched to the Census community size for that ZIP Code. LOCALE is derived for the public schools by matching to the LOCALE code on the Common Core of Data School file, and is derived for the private schools by copying the algorithm from CCD and applying it to the ZIP codes of private schools.

1. Large city - central city of a standardized metropolitan area having a population greater than or equal to 400,000 or a population density greater than or equal to 6,000 people per square mile.
2. Mid-size city - central city of a standardized metropolitan area having a population less than 400,000 and a population density less than 6,000 people per square mile.
3. Urban fringe of large city - place within a metropolitan area of a large city and defined as urban by Census (i.e., within same county).
4. Urban fringe of mid-size city - place within a metropolitan area of a mid-size city and defined as urban.
5. Large town - a town not inside a metropolitan area, with a population greater than or equal to 25,000.
6. Small town - a town not within a metropolitan area and with a population less than 25,000 but greater than 2,500.
7. Rural - a place with fewer than 2,500 people or a place designated as rural by Census.

#### **5. Teaching Level (LEVEL) - Teacher file only**

1. *Elementary* - An elementary teacher was one who, when asked for grades taught, checked:

---

<sup>4</sup>Johnson, Frank. (1989). *Assigning Type of Locale Codes to the 1987-88 CCD Public School Universe*. NCES Technical Report CS 89-194. Washington: Office of Educational Research and Improvement.

- Only "ungraded" and was designated as an elementary teacher on the list of teachers provided by the school; or
  - 6th grade or lower, or "ungraded" and no grade higher than 6th; or
  - 6th grade or lower and 7th grade or higher, and reported a primary assignment of prekindergarten, kindergarten, or general elementary; or
  - 7th and 8th grades only, and reported a primary assignment of special education and was designated as an elementary teacher on the list of teachers provided by the school.
2. *Secondary* - A secondary teacher was one who, when asked for the grades taught, checked:
- "Ungraded" and was designated as a secondary teacher on the list of teachers provided by the school; or
  - 6th grade or lower and 7th grade or higher, and reported a primary assignment other than prekindergarten, kindergarten, or general elementary; or
  - 9th grade or higher, or 9th grade or higher and "ungraded"; or
  - 7th and 8th grades only, and reported a primary assignment other than prekindergarten, kindergarten, general elementary, or special education; or
  - 7th and 8th grades only, and reported a primary assignment of special education and was designated as a secondary teacher on the list of teachers provided by the school; or
  - 6th grade or lower and 7th grade or higher, or 7th and 8th grades only, and was not categorized above as either elementary or secondary.

## 6. Urbanicity Codes for School Districts - Restricted-use file (School)

As LOCALE codes have not been developed for districts, several other geographic identifiers are included on the restricted-use file only for research purposes. These identifiers are:

- a. **State and County FIPS code (STCNTY)** - The standardized FIPS code for a county, combined with the FIPS code for the State. This five-digit code can be looked up in the FIPS publication cited in the User's Notes (see Section XVI).

b. **CMSA code (CMSA)** - This four-digit code identifies the specific metropolitan statistical area as defined by OMB and can also be looked up in another FIPS guide. MSAs are areas with at least 50,000 people or with more than one city with population totaling at least 50,000. There is no code for non-MSA districts.

c. **Metropolitan status code (MSC88)** - This is a categorical variable, assigned to every district relative to its metropolitan status:

1. Urban area, primarily inside central city;
2. Urban area, primarily outside central city;
3. Non-urban area.

This variable is on the Common Core of Data file and assigned by NCES.

#### 7. Percent minority (PMINENR) - Administrator and School files

This variable is computed from the SASS student race/ethnicity counts. The sum of students of all racial/ethnic groups other than White is calculated as a percentage of students of all race/ethnicity groups, and categorized as follows:

1. Less than 20 percent.
2. 20 percent or greater.

### B. Analysis Variables Used in NCES Publications

#### 1. School size - Public-use school file

This variable is a categorization of the total enrollment for a school:

1. Less than 150 students;
2. Between 150 and 500 students;
3. From 500 to 750 students;
4. 750 students or greater.

While these categories do not suit all analyses, NCES uses them in comparing public and private schools -- private schools tend to have smaller enrollments on average than public schools. In addition, schools in more rural areas also tend to have fewer students, so that for comparisons including all states, smaller size categories make sense. There is less differentiation among the larger enrollment schools than among other schools in this particular set of enrollment groups.

**2. School's Urbanicity (LOCALE) - Public-use file version of community type**

This variable is a recoding of LOCALE:

1. Central city = LOCALE codes 1 or 2;
2. Urban fringe or Large town = LOCALE codes 3 through 5;
3. Small town = LOCALE codes 6;
4. Rural = LOCALE code 7.

Urban, suburban, small town and rural designations coded this way conform to Bureau of the Census' geographic definitions of urbanicity (and OMB's list of Metropolitan Statistical Areas). "Central city" is more specific than the "urban" category used in past SASS reports (data from 1987-88) and excludes some areas which are urban but not large enough to have a central city. Also, "urban fringe and large town" includes more than the old category "suburban," as large towns that qualify as part of an MSA but without a central city would change categories. Small towns are being kept separate from rural areas, as some users have requested this distinction.

**3. Highest degree earned (Administrators and Teachers) - Not on datafiles**

The highest degree earned is a recoding of the various academic degrees received variables into:

1. Less than or equal to a bachelor's degree (If TSCO45 not equal to 1 and TSCO52 not equal to 2 and TSCO55 not equal to 3 then HIDEGREE = Bachelor's or less);
2. Master's degree or above (If TSCO45 equals 1 or TSCO52 equals 2 or TSCO55 equals 3 then HIDEGREE = Master's or above).

**4. New Teacher or Experienced Teacher (TNEWID) - Public-use and Restricted-use Teacher files**

"New" teachers are defined as having taught for 3 years or less, either in the public or private schools. This variable is defined prior to obtaining the teacher data, by the school's principal. It can be found among the sampling variables towards the end of the Teacher file codebook.

## **II. User Notes**

## II. User Notes

### Subsetting a file

Each component within SASS is a distinct record on the datafile: districts, public administrators, private administrators, public schools, private schools, public teachers, and private teachers. The codebooks for each component cover both the public and private records; in addition, on the restricted-use school file and to a lesser extent, on the public-use file, the district records are combined with the school records. In order to do an analysis on any one component without extraneous "noise" from other components, the programmer or researcher has to subset the file by the variable SURVEY.

### FIPS codes

FIPS stands for **Federal Information Processing Standards**. FIPS publications are produced by the U.S. Department of Commerce's National Institute of Standards and Technology (NIST). These codes standardize numeric codes for geographic areas. The detailed names of counties and corresponding codes are published in FIPS Publication 6-4, "Counties and Equivalent Entities of the United States, Its Possessions, and Associated Areas," while the names and codes for Metropolitan Statistical Areas are contained in FIPS Publication 8-5, "Metropolitan Statistical Areas (including CMSAs, PMSAs, and NECMAs)." Copies of FIPS Publications 6-4 and 8-5 are available for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA. Write or call the NTIS Computer Products Office at 703/487-4650 for cost and ordering information. When ordering, refer to Federal Information Processing Standards Publication 6-4 (FIPSPUB6-4) or Federal Information Processing Standards Publication 8-5 (FIPSPUB8-5) and its title.

### Calculation of Average Years of Teaching Experience

Items 10 and 11 on the Teacher Questionnaire ask about the years of full- and part-time teaching experience that the teacher has in both public and private schools. Public school teachers are skipped out of the questions on private school experience if they've never taught in private schools. similarly, private school teachers are skipped out of the questions on public school experience if they've never taught in public schools. As a result of this skip pattern, public school teachers who have never taught in private schools will have a value of "missing" on the file for the variables FTPVT and PTPVT; private school teachers who have never taught in public schools will have a value of "missing" on the file for the variables FTPUB and PTPUB.

To calculate the average number of years that all public school teachers have taught in private schools, or the average number of years that all private school teachers have taught in public schools, you should recode these missing values to zeros. Otherwise, the average that you calculate will reflect the average number of years that public school teachers have taught in private schools only for those public school teachers who have ever taught in private schools, or the average number of years that private school teachers have taught in public schools only for those private school teachers who have ever taught in public schools.

---

This recoding will not be necessary if you are interested in the total years of teaching experience in both sectors because the missing values will be treated as zeroes in the sum (FTPUB + FTPVT) or (PTPUB + PTPVT) or (FTPUB + PTPUB + FTPVT + PTPVT).

**APPENDIX M. PUBLIC AND PRIVATE SCHOOL ADMINISTRATOR (SASS 2A AND 2B) CODEBOOK**

This codebook represents the School and Staffing Survey Administrator Questionnaire for both public and private administrators. In this codebook, data represented by "--" means "not applicable" for a particular variable to one of the surveys, either the Public Administrator questionnaire or the Private Administrator questionnaire.

 FINAL WEIGHT AND REPLICATE WEIGHTS

PAGE M-6  
 JANUARY 1994

Variable Name	Source Code			Description	Unweighted Frequencies	
	Public	Private	Location		Public	Private
ADMWGT		14-22		Final weight for each sample administrator. This weight is the inverse of the probability of selection adjusted for nonresponse, differences between the sample estimate and known universe totals, and for special circumstances arising in the field during data collection.  Minimum Value ..... 0.839678 0.986179 Maximum Value ..... 104.559 88.89375 Mean ..... 8.713296 8.66179 Standard Deviation ..... 8.989405 8.340138		
REPWGT1- REPWGT48		23-454		Replicate weights for balanced repeated replication (BRR) variance estimation. These weights may be input into variance estimation software which uses the BRR estimation method.

**APPENDIX N. PUBLIC AND PRIVATE SCHOOL TEACHER (SASS 4A AND 4B) CODEBOOK**

This codebook represents the School and Staffing Survey Teacher Questionnaire for both public and private teachers. In this codebook, data represented by "--" means "not applicable" to the question for a particular variable to one of the surveys, either the Public Teacher questionnaire or the Private Teacher questionnaire.

 FINAL WEIGHT AND REPLICATE WEIGHTS

PAGE N-6  
 JANUARY 1994

Variable Name	Source Code			Description	Unweighted Frequencies	
	Public	Private	Location		Public	Private
TCHWGT			17-25	Teacher final weight. This weight is the inverse of the probability of selection that has been adjusted for unusual circumstances affecting the probability of selection for nonresponse and for differences between the sample estimates and the known universe totals.		
				Minimum Value .....	1.012151	1.218602
				Maximum Value .....	1015.793	716.0157
				Mean .....	54.80115	53.64145
				Standard Deviation .....	65.8719	44.32476
REPWTG1- REPWTG48			26-457	Replicate weights for balanced repeated replication (BRR) variance estimation. These weights may be input into variance estimation software which uses the BRR estimation method.
