I. Introduction

DATA COLLECTION DESCRIPTION

United States Department of Education. National Center for Education Statistics

COMMON CORE OF DATA: NATIONAL PUBLIC EDUCATION FINANCIAL SURVEY, 1991

SUMMARY: The National Public Education Financial Survey is an annual state-level collection of revenues and expenditures for public education, grades prekindergarten through 12, beginning with fiscal year 1989. Revenues and expenditures are audited after the close of the fiscal year and are then submitted to the National Center for Education Statistics by each state education agency. Variables include local revenue sources such as property taxes, tuition, and fees; intermediate and state revenues; federal sources of income; and other sources of revenue. Expenditure categories reported on include instructional expenditures (salaries and benefits, supplies, and services), support services expenditures (for staff, students, and administration), noninstructional services (such as food service), direct program support, facilities acquisition, construction services, community services, direct cost programs, and exclusions from correct expenditures. The average daily attendance is also provided.

UNIVERSE: All public elementary and secondary education agencies in the 50 states, the District of Columbia, and outlying areas.

NOTE: The codebook is provided as Portable Document Format (PDF) file. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader. Information on how to obtain a copy of the Acrobat Reader is provided through the ICPSR Website on the Internet.

EXTENT OF COLLECTION: 1 data file + machine-readable documentation (PDF) + SAS data definition statements

DATA FORMAT: Logical Record Length with SAS data definition statement

Appendix C - GLOSSARY

CCD: the Common Core of Data, the National Center for Education Statistics' primary database on public elementary and secondary education in the United States. Data are collected annually from states' administrative records.

Community services: a functional category of expenditures (line item number 3300) for such services as swimming pools, day care centers, and programs for the elderly. Community services expenditures reported in this publication are funds for the use of these services by public education students.

Current expenditures: comprise the functional categories instruction (1000), support services (2000), and noninstructional services (3000). These are expenditures for the day-to-day operation of public elementary and secondary education, distinct from long-term expenditures and expenditures for other types of education. Property expenditures are excluded from current expenditure subtotals.

Debt service: a subfunction (5100) within the expenditure function "other uses" (5000). It includes only long-term debt service (obligations exceeding one year).

Direct program support: expenditures made by state education agencies for, or on behalf of local education agencies. The majority of these expenditures are for teachers' retirement funds; the rest include expenditures for textbooks, busing, and special programs such as education for disabled students. Although states often report these expenditures in the appropriate function, these expenditures are sometimes lumped together under the heading direct program support in which case, NCES distributes them into function and object after consultation with state officials.

Direct cost programs: a category of expenditures for programs not part of public elementary and secondary education. These programs include community colleges, adult education and non-public school support.

Employee benefits: one of six expenditure objects (line item 200). It is for expenditures made in addition to gross salary that are not paid directly to employees. It includes amounts paid by, or on behalf of, an LEA for fringe benefits such as group insurance, social security contributions, retirement contributions, tuition reimbursements, unemployment compensation, worker's compensation, and other employee benefits (e.g., unused sick leave).

Enterprise operations: a subfunction (3200) of the function noninstructional services (3000). Enterprise operations are activities that are financed, at least in part, by user charges, similar to a private business. These operations are sometimes subsidized by local education agencies.

Equipment: an object subcategory (730) within the function facilities acquisition and construction services (4000), it includes the initial purchase of property items such as books for a newly constructed school or addition. Replacement equipment is labeled property, and is reported by function.

Facilities acquisition and construction services: an expenditure function (4000) that includes the acquisition of land and buildings; building construction, remodeling, and additions; the initial installation or extension of service systems and other built-in equipment; and site improvement.

Federal revenues: are reported in four categories: 1) unrestricted and restricted Grants-in-Aid direct from the federal government, 2) unrestricted and restricted Grants-in-Aid direct through the state, 3) Grants-in-Aid through other intermediate agencies, and 4) other federal revenues (including payments in lieu of taxes).

Food services: a subfunction (3100) of the function noninstructional services (3000). Food services are activities that provide food to students and staff in a school or LEA. These services include preparing and serving regular and incidental meals or snacks in connection with school activities as well as delivery of food to schools.

Function: a category of expenditure, defining the activity supported by the service or commodity bought.

General administration: one of nine subfunctions (2300) within the expenditure function support services (2000). It includes expenditures for the board of education and administration of Local Education Agencies.

Instruction: activity between teachers and students. Instruction expenditures includes salaries and benefits for teachers and instructional aides, supplies, and purchased services such as instruction via television. Tuition expenditures to other LEAs are also included here.

Instructional staff support services: one of nine subfunctions (2200) within the expenditure function support services (2000). It includes instructional staff training, educational media (library and audiovisual), and other instructional staff support services.

Intermediate sources of revenue: are educational agencies with fund raising capabilities that operate between the state and local government levels. One example is New York's Board of Cooperative Educational Services (BOCES).

LEA: local education agency, also called school district or board of education.

Local revenues: funds produced within the boundaries of an LEA that are available for the use of the LEA. These revenues include money collected by other government units for use by the LEA. Local revenues include: property taxes, non-property taxes, parent government contributions, student fees, and other local sources.

NPEFS: the National Public Education Financial Survey, a component of the Common Core of Data (CCD) and the source of the data in this report.

Object: a category of expenditure, defining the service or commodity bought.

Operations and maintenance: one of nine subfunctions (2600) within the expenditure function support services (2000). It includes expenditures for the supervision of operations and maintenance, operation of buildings, the care and upkeep of grounds and equipment, vehicle operations (other than student transportation) and maintenance, and security.

Pupils in membership: the count of students on the current roll taken on the school day closest to October 1 by using either 1) the sum of original entries and reentries minus total withdrawals, or 2) the sum of the total present and the total absent.

Purchased services: one of six expenditure objects. It is for professional and technical services, and the renting of equipment.

Property: one of six expenditure objects (line item 700). Property includes expenditures for initial, additional, and replacement furniture and fixtures such as desks, file cabinets, computers, copying machines, printing equipment, and other equipment. Property expenditures are not included in current expenditure subtotals.

Revenue: revenues are categorized by source as follows: federal, state, intermediate government agencies, and local.

Salaries: one of six expenditure objects (line item 100). It includes the gross salaries of permanent and temporary staff on the payroll of LEAs including those substituting for permanent employees. Salaries for full- and part-time staff are included along with overtime and salaries for staff on sabbatical leave. Also included are supplemental amounts for additional duties such as coaching or supervising extracurricular activities, bus supervision, and summer school teaching.

School administration: one of nine subfunctions (2400) within the expenditure function support services (2000). It includes expenditures for the office of the principal, full-time department chairpersons, and graduation expenses.

State revenues: revenues received by the LEA from the state are reported in a single total. This total includes unrestricted grants-in-aid, restricted grants-in-aid, revenue in lieu of taxes, and payments for, or on behalf of, LEAs.

Student support services: one of nine subfunctions (2100) within the expenditure function support services (2000). It includes attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other student support services.

Student transportation: one of nine subfunctions (2700) within the expenditure function support services (2000). It includes expenses for the supervision, vehicle operation, monitoring, and vehicle servicing and maintenance associated with student transportation services.

Supplies: one of six expenditure objects (line item 600). Supplies are items that are consumed, worn out, or deteriorated through use, or items that lose their identity through fabrication or incorporation into different or more complex units or substances. These include expenditures for general supplies; paper and other materials required for printing and copying; and books, periodicals, and reference materials.

Support services: an expenditure function (2000) divided into nine subfunctions: student support services (2100), instructional staff support (2200), general administration support services (2300), school administration support services (2400), operations and maintenance (2600), student transportation support services (2700), and other support services (2500, 2800, 2900).
