Standards for Race and Ethnicity (1997)

All Federal statistical agencies, including the Census Bureau, must adhere to the 1997 OMB Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity.

• OMB standards specify five minimum categories for data on race and two categories for data on ethnicity:

  **RACE**: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, White

  **ETHNICITY**: Hispanic or Latino, Not Hispanic or Latino

• Race and ethnicity categories are socio-political constructs; should not be interpreted as scientific or anthropological in nature

• Respondents should be offered the option of reporting more than one race

• When race and ethnicity questions are collected separately, ethnicity should be collected first

• Individual responses are based upon self-identification

• When collecting race and ethnicity data via self-identification, a two separate questions format should be used
