Subject: Disabilities

Label: Disability: deaf or serious difficulty hearing

Name: DIS16A

Description: The student has serious difficulty hearing.

Source: NPSAS:12 Interview

Descriptive Statistics:

Value	Percentage	Value label
0	98.79	No
1	1.21	Yes

Weight used in frequency: (WTA000)

Notes: Based on student interview question: "Are you deaf or do you have serious difficulty hearing?" [N12ACS16A]

Note: N12ACS16A is based on item 16A from the ACS (American Community Survey) 2008 questionnaire. This question refers to the owner or renter of the property being surveyed and asks, "Is this person deaf or does he/she have serious difficulty hearing?" The response options were "Yes" or "No".

Applies to: All respondents.

Subject: Disabilities

Label: Disability: blind or serious difficulty seeing

Name: DIS16B

Description: The student has serious difficulty seeing.

Label: Attendance pattern

Name: ATTNSTAT

Description: Student's attendance pattern at all institutions attended during the 2011-12 academic year.

Source: NPSAS:12 Student Records, NPSAS:12 Interview, NSC, NSLDS

Descriptive Statistics:

Value	Percentage	Value label
1	34.45	Full-time/full year, 1 institution
2	3.99	Full-time/full year, 2 or more institutions
3	18.14	Full-time/part year
4	17.31	Part-time/full year, 1 institution
5	2.23	Part-time/full year, 2 or more institutions
6	23.88	Part-time/part year

Weight used in frequency: (WTA000)

Notes: Students were considered to have attended for a full year if they were enrolled 9 or more months during the NPSAS year. Months did not have to be contiguous nor at the same institution, and students did not have to be enrolled for a full month in order to be considered enrolled for that month.

Additional descriptions:

- Full-time/full year: Enrolled 9 or more months full time during the 2011-12 academic year; where additional months enrolled could be part time.

- Full-time/part year: Enrolled less than 9 months during the 2011-12 academic year; and enrolled full time in all of these months.

- Part-time/full year: Enrolled 9 or more months during the 2011-12 academic year; but less than 9 months were full time.

- Part-time/part year: Enrolled less than 9 months during the 2011-12 academic year; could be enrolled full time or part time, but not all of these months were full time.

Students who were first enrolled in November 2011 or later but who subsequently enrolled full time are classified as full time/part year because they were enrolled full time for less than 9 months during the 12 months of the NPSAS survey year. However, some of these students may have been enrolled continuously for 9 months or more if the enrollment period after June 2012 were included.

Descriptive Statistics:

Value	Percentage	Value label
0	66.42	Not enrolled
1	16.37	Full-time
2	17.21	Part-time

Weight used in frequency: (WTA000)

Notes: For students who attended only the NPSAS institution, these variables were based first on the enrollment status as reported by the NPSAS sample institution from student records; if the enrollment status was not available, they were based on the months enrolled as reported by the student in the student interview. If both student record and student interview data were not available, then National Student Clearinghouse (NSC) data were used. For students who attended more than one institution, multiple school enrollments were taken first from the student interview then the NSC data since student records only provide enrollment for the NPSAS sampled institution. The enrollment period dates and award amounts reported in federal student loan and Pell Grant records for the 2011-12 academic year were used to resolve discrepancies and supplement the primary sources.

Note: The attendance status categories were not the same in the student interview as in the student records, and the enrollment information was collected differently. In the student interview, respondents were asked to indicate which months they were enrolled, and then to summarize their attendance in these months as mostly full time, mostly part time, or an equal mix. These categories were assigned to all the months enrolled. Institutions were asked to indicate the name of the terms, and the beginning and ending dates of each term the student was enrolled, indicating full-time, half-time, or less-than-half-time attendance in each term. The latter two categories were combined as "part-time" to be equivalent to the student-reported categories.

The student interview has the following categories:

- full-time: mostly full-time enrollment
- part-time: mostly part-time enrollment
- mixed: equal mix of full-time and part-time enrollment
- enrolled but status unknown

Institutions were asked to report the following categories:

- full-time
- half-time
- less than half-time
- enrolled but status unknown

Description: Undergraduate student's degree program during the 2011-12 academic year.

Source: NPSAS:12 Interview, NPSAS:12 Student Records, FAFSA:12

Descriptive Statistics:

Value	Percentage	Value label
1	8.03	Certificate
2	42.27	Associate's degree
3	46.37	Bachelor's degree
4	3.33	Not in a degree program or others

Weight used in frequency: (WTA000)

Notes: First the degree program from all data sources was checked against the highest degree level offered at the institution. If the data sources conflict, then the degree program was chosen from the data source that was consistent with the highest degree offered at the institution. In addition, sources that indicated the student was in a degree program were chosen over sources that indicated the student was not in a degree program, which differs from prior NPSAS studies. For data sources that did not contradict, then UGDEG was based on the student interview. If the student interview was not available, then the student records were used. If both the student interview and student records were not available, then the federal financial aid application was used.

Applies to: All undergraduate respondents.

4	13.57	4th year undergraduate
5	2.13	5th year undergraduate
6	5.33	Unclassified undergraduates

Weight used in frequency: (WTA000)

Notes: This variable gives priority to the student-recorded class level. If not available, the order of priority was student interview, then the federal financial aid application, and then the National Student Loan Data System (NSLDS) federal loan records. There are frequently discrepancies in the class level reported in these sources. The variable UGLVL2 gives priority to the highest class level reported in NSLDS on a federal student loan taken out in 2011-12. UGLVL2 should be used for the analysis of student loans by class level. The unclassified undergraduates include graduate students taking undergraduate classes.

Notes: This variable gives priority to the highest class level reported in the National Student Loan Data System (NSLDS) on a federal student loan taken out in 2011-12, and should be used for the analysis of student loans by class

level. The alternative class level variable UGLVL1 gives priority to the class level reported in the student records, or, if not available, the order of priority was the student interview, then the federal financial aid application, and then NSLDS federal loan records. There are frequently discrepancies in class level reported by these sources. The unclassified undergraduates include graduate students taking undergraduate classes.

Weight used in frequency: (WTA000)

Notes: The 2010 calendar year income was used in federal need analysis to determine financial aid eligibility for the 2011-12 academic year.

Recodes total income (CINCOME) by dependency (DEPEND) into categorical income levels. DEPIN, INDEPIN, and CINCOME are the equivalent continuous income variables. DEPIN indicates the income of the parents of dependent students, and does not include the income or earnings of the student. INDEPIN also includes the income of the spouses of married students. The income of the parents of independent students was not available.

The quality of the income data in NPSAS is inconsistent. For students who filed a federal financial aid application, the income information for 2010 is very precise, and includes the Adjusted Gross Income as well as the total income. For students who had no financial aid application record, the income information is much less reliable and is based on the student interview and/or stochastic imputation. All interviewed students were asked to estimate their own income in ranges (No income, Less than \$1,000, \$1,000-\$2,499, \$2,500-\$4,999, \$5,000-\$9,999, \$10,000-\$14,999, \$15,000-\$19,999, \$20,000-\$29,999, \$30,000-\$49,999, \$50,000 and above), and if they were married, to estimate the spouse's income in ranges. Students under age 30 who were interviewed were also asked to estimate their parents' household income in ranges (under \$30,000, \$30,000-\$59,999, \$60,000-\$89,999, \$90,000-\$119,999, and \$120,000 and over). Rather than using the midpoint of the estimated income range, particular incomes within the range were imputed using stochastic imputation methods. If no income information was available from any source, stochastic imputation was used to estimate a value. More detail about the use of stochastic imputation is available in the NPSAS:12 Methodology Report.

Weight used in frequency: (WTA000)

Notes: Calculated separately for dependent students (PCTDEP) and independent students (PCTINDEP) and then combined into this variable. Each ranking thus compares the student only to other students of the same dependency status. Uses parents' income for dependent student and student's own income (including spouse's income if student is married) for independent students.

Default income groups divide students into four categories, each of which represents approximately 25 percent of the income distribution. For dependent undergraduates, the approximate income ranges for each group are as follows: lowest group, less than \$29,600; lower-middle group, \$29,600 to \$65,500; upper-middle group, \$65,501 to 106,400; and highest group, more than \$106,400. For independent students, the approximate income ranges for each group are as follows: lowest group, less than \$7,500; lower-middle group, \$7,500 to \$20,000; upper-middle group, \$20,001 to \$41,200; and highest group, more than \$41,200.

Notes: The 2010 calendar year income was used to determine federal financial aid eligibility for the 2011-12 academic year. Based on family size, total income and dependency. Refers to the family size and income of the parents of dependent students (DEPEND=1) or the student's own family if independent (DEPEND=2). Derived from total income in 2010 (CINCOME) and household size (HSIZE). A value of 100 or less means that the student's family is at or below the federal poverty level threshold for that family size. Maximum set at 1,000 (ten times poverty threshold). All values above 1,000 are recoded to 1,000. The threshold income dollar values by family size are indicated in the code below and use values for the 48 contiguous states and the District of Columbia regardless of the student's state of residence. Notes: Based primarily on National Student Loan Data System (NSLDS) loan history data. Includes a few Supplemental Loans for Students (SLS) before 1994. Perkins Loans may be understated, because Perkins Loans are not always reported to NSLDS. Excludes Direct PLUS Loans to parents of undergraduate students. Caution: The variable FEDCUM1 is not equivalent to BORFED1 in prior NPSAS studies. BORFED1 was primarily based on responses to the student interview. The interview questions were in the general form of: How much did you borrow? How much of that was in federal loans? The student-reported federal loan amounts frequently conflicted with the amounts calculated from the federal loan history records in the National Student Loan Data System (NSLDS). In NPSAS:12 the student interview only asked for an estimate of the total amount borrowed from any source (BORAMT1) and estimates of the federal loan portions (FEDCUM1) have been based primarily on the NSLDS reported totals. For comparisons with prior NPSAS studies, the cumulative federal loan totals based on NSLDS should be used. The equivalent variables for FEDCUM1 in NPSAS:2000 and NPSAS:96 is CUMUG1.

Source: NPSAS:12 Student Records, NPSAS:12 Interview, NSLDS

Descriptive Statistics:

Value	Percentage	Value label
1	59.07	No Direct Subsidized Loan
2	18.88	Less than maximum Direct Subsidized Loan
3	16.17	Usual maximum Direct Subsidized Loan
-3	5.88	{Skipped}

Weight used in frequency: (WTA000)

Notes: The normal maximum Direct Subsidized Loan amounts in 2011-12 were determined by the student's undergraduate class level as follows:

- First year: \$3,500
- Second year: \$4,500
- Third-fifth year: \$5,500

Under some circumstances students who are enrolled continuously in programs that are longer than the usual 9-10 months may qualify for more than the usual maximum amounts.

Respondents whose Direct Subsidized Loan amounts were higher than the limit for their class levels were skipped along with respondents who did not have a known class level.

NOTE: There are frequent discrepancies in the reporting of class levels among sources (National Student Loan Data System, student records, student interview, and CPS). In deriving these maximum Direct Subsidized Loan variables, UGLVL2 was used, which gives precedence to the highest class level indicated on a 2011-12 loan record in the National Student Loan Data System. Because of the frequent discrepancies in data from the multiple sources used in deriving variables for NPSAS, variables such as this should be used with caution because the components (class level, dependency, Direct Unsubsidized Loan amounts, and Direct Subsidized Loan amounts) are not always reported accurately or consistently in the various sources.

NOTICE OF REVISION: This variable was revised in May 2014.

4	1.93	Exceptional maximum
-3	5.88	{Skipped}

Weight used in frequency: (WTA000)

Notes: The normal maximum annual loan amounts in 2011-12 for undergraduates were determined by the student's undergraduate class level and dependency status as follows:

Dependent students:

- First year: \$5,500
- Second year: \$6,500
- Third-fifth year: \$7,500

Independent students:

- First year: \$9,500
- Second year: \$10,500
- Third-fifth year: \$12,500

There are exceptions to these limits. Dependent undergraduates with exceptional need whose parents were unable to qualify for a Direct PLUS loan to parents of undergraduate students (PLUSAMT) could qualify for an Direct Unsubsidized Loan at the independent student maximum. Undergraduates in programs of continuous study lasting longer than the usual 9-10 months of an academic year were eligible for larger amounts than the normal academic year maximum. Unclassified undergraduates were coded as zero. Respondents whose Direct Unsubsidized Loan amounts were higher than the limit for their class levels were skipped along with respondents who did not have a known class level.

NOTE: There are frequent discrepancies in the reporting of class levels among sources (National Student Loan Data System, student records, student interview, and CPS). In deriving these maximum Direct Subsidized and Unsubsidized Loan variables, UGLVL2 was used, which gives precedence to the highest class level indicated on a 2011-12 loan record in the National Student Loan Data System. Label: Direct Subsidized Loan individual maximum

Name: ESUBMX2

Description: Indicates whether undergraduates who took out Direct Subsidized Loans (also known as subsidized Stafford Loans) in 2011-12 took out their individual maximum subsidized amount, that is, the maximum they could borrow that was allowed for the program (based on their class level) and also taking into account their financial need after all aid except for any Direct Subsidized Loans.

Descriptive Statistics:

Value	Percentage	Value label
0	11.49	Less than individual subsidized maximum
1	20.28	Individual subsidized maximum

-3	68.22	{Skipped}
----	-------	-----------

Weight used in frequency: (WTA000)

Notes: The individual subsidized maximum is the lesser of the program subsidized maximum or the financial aid need after all aid except any Direct Subsidized Loans. This variable was created to compare with STSUBMX Direct Subsidized Loan program total. This variable includes a more precise estimate of the number of students who borrowed the largest amount possible under the Direct Subsidized Loans program, based upon their individual eligibility for need-based aid.

NOTICE OF REVISION: This variable was revised in May 2014.

Code: SAS Code:

Applies to: Undergraduate respondents who had been classified into one of the Direct Subsidized Loan maximum categories, had attended one institution, were not international students, and were enrolled at least half time.

Notes: Based primarily on National Student Loan Data System (NSLDS) loan history data. Includes a few Supplemental Loans for Students (SLS) before 1994. Perkins Loans may be understated, because Perkins Loans are not always reported to NSLDS. Excludes Direct PLUS Loans to parents of undergraduate students. Caution: The variable FEDCUM1 is not equivalent to BORFED1 in prior NPSAS studies. BORFED1 was primarily based on responses to the student interview. The interview questions were in the general form of: How much did you borrow? How much of that was in federal loans? The student-reported federal loan amounts frequently conflicted with the amounts calculated from the federal loan history records in the National Student Loan Data System (NSLDS). In NPSAS:12 the student interview only asked for an estimate of the total amount borrowed from any source (BORAMT1) and estimates of the federal loan portions (FEDCUM1) have been based primarily on the NSLDS reported totals. For comparisons with prior NPSAS studies, the cumulative federal loan totals based on NSLDS should be used. The equivalent variables for FEDCUM1 in NPSAS:2000 and NPSAS:96 is CUMUG1.

Notes: Based primarily on the total amount outstanding as reported in the National Student Loan Data System history files. This variable combines both loan principal and interest amounts for all loans still outstanding. Since loans accumulate interest over time, the amount owed may be greater than the original amount borrowed. A similar variable FEDOWE1 contains principal amount only, which can include capitalized interest for unsubsidized loans, but otherwise does not include interest.

Notes: Direct PLUS loans to parents are available to the parents of dependent students in addition to any federal Direct Loans for which students are eligible. Direct PLUS loans to parents are not based on need and may be used to cover the federal expected family contribution (EFC). Although there is no fixed limit to the amount of a Direct PLUS loan to parents, it may not exceed the student budget minus any other financial aid. Direct PLUS loans to parents are only available to parents who can meet certain credit-worthiness criteria; if they cannot do so, then the dependent student for whom the loan is intended may apply to receive a Direct Unsubsidized Loan up to the higher limit normally available only to independent students. For public institutions, amounts greater than \$40,000 were edited and set to \$40,000. For private institutions, amounts greater than \$60,000 were edited and set to \$60,000.

Note: Direct PLUS Loans to parents are separate from the Direct PLUS loans to graduate students.

Applies to: All undergraduate respondents.

1	59.07	No Direct Subsidized Loan
2	18.88	Less than maximum Direct Subsidized Loan
3	16.17	Usual maximum Direct Subsidized Loan
-3	5.88	{Skipped}

Weight used in frequency: (WTA000)

Notes: The normal maximum Direct Subsidized Loan amounts in 2011-12 were determined by the student's undergraduate class level as follows:

- First year: \$3,500
- Second year: \$4,500
- Third-fifth year: \$5,500

Under some circumstances students who are enrolled continuously in programs that are longer than the usual 9-10 months may qualify for more than the usual maximum amounts.

Respondents whose Direct Subsidized Loan amounts were higher than the limit for their class levels were skipped along with respondents who did not have a known class level.

NOTE: There are frequent discrepancies in the reporting of class levels among sources (National Student Loan Data System, student records, student interview, and CPS). In deriving these maximum Direct Subsidized Loan variables, UGLVL2 was used, which gives precedence to the highest class level indicated on a 2011-12 loan record in the National Student Loan Data System. Because of the frequent discrepancies in data from the multiple sources used in deriving variables for NPSAS, variables such as this should be used with caution because the components (class level, dependency, Direct Unsubsidized Loan amounts, and Direct Subsidized Loan amounts) are not always reported accurately or consistently in the various sources.

NOTICE OF REVISION: This variable was revised in May 2014.

4	1.93	Exceptional maximum
-3	5.88	{Skipped}

Weight used in frequency: (WTA000)

Notes: The normal maximum annual loan amounts in 2011-12 for undergraduates were determined by the student's undergraduate class level and dependency status as follows:

Dependent students:

- First year: \$5,500
- Second year: \$6,500
- Third-fifth year: \$7,500

Independent students:

- First year: \$9,500
- Second year: \$10,500
- Third-fifth year: \$12,500

There are exceptions to these limits. Dependent undergraduates with exceptional need whose parents were unable to qualify for a Direct PLUS loan to parents of undergraduate students (PLUSAMT) could qualify for an Direct Unsubsidized Loan at the independent student maximum. Undergraduates in programs of continuous study lasting longer than the usual 9-10 months of an academic year were eligible for larger amounts than the normal academic year maximum. Unclassified undergraduates were coded as zero. Respondents whose Direct Unsubsidized Loan amounts were higher than the limit for their class levels were skipped along with respondents who did not have a known class level.

NOTE: There are frequent discrepancies in the reporting of class levels among sources (National Student Loan Data System, student records, student interview, and CPS). The individual total maximum is the lesser of the program total or the net price after all aid except loans. The loan maximums were created with the same parameters as ETOTMX2. Notes: Direct PLUS loans to parents are available to the parents of dependent students in addition to any federal Direct Loans for which students are eligible. Direct PLUS loans to parents are not based on need and may be used to cover the federal expected family contribution (EFC). Although there is no fixed limit to the amount of a Direct PLUS loan to parents, it may not exceed the student budget minus any other financial aid. Direct PLUS loans to parents are only available to parents who can meet certain credit-worthiness criteria; if they cannot do so, then the dependent student for whom the loan is intended may apply to receive a Direct Unsubsidized Loan up to the higher limit normally available only to independent students. For public institutions, amounts greater than \$40,000 were edited and set to \$40,000. For private institutions, amounts greater than \$60,000 were edited and set to \$60,000.

Note: Direct PLUS Loans to parents are separate from the Direct PLUS loans to graduate students.

Notes: These are awarded on the basis of financial need. If a student qualifies for a subsidized loan, then the federal government pays the interest on the loan until the student begins repayment, and during authorized periods of deferment thereafter. The maximum Federal Direct Subsidized Loan for undergraduates was \$5,500 in the 2011-12 academic year. NOTE: The Federal Family Education Loan Program (FFEL) was discontinued effective July 1, 2010, so only Direct Loans are reflected in this variable.

Applies to: All respondents.

Notes: These are not awarded on the basis of need. Students who qualify for an unsubsidized loan are charged interest from the time the loan is disbursed until it is paid in full. Students can choose to pay the interest or allow it to accumulate. If the student allows the interest to accumulate, then the interest will be capitalized (i.e., added to the principal amount of the loan). The maximum Federal Direct Unsubsidized Loan for undergraduates was \$12,500 in the 2011-12 academic year. NOTE: The Federal Family Education Loan Program (FFEL) was discontinued effective July 1, 2010, so only Direct Loans are reflected in this variable.

Notes: For students who have federal need (SNEED1>0) and receive any type of financial aid (TOTALD>0), this variable indicates the amount of aid (including non-need-based aid, such as unsubsidized loans) that is greater than the student's federal need. Federal Direct Unsubsidized Loans (also known as unsubsidized Stafford Loans), federal Direct PLUS Loans to parents of undergraduate students, Direct PLUS Loans to graduate students, and merit-based scholarships may be awarded to students although they do not demonstrate need according to the federal need criteria. Weight used in frequency: (WTA000)

Notes: First based on the 2011-12 Pell grant record in the National Student Loan Data System (NSLDS) files. If it is not available from NSLDS, the primary EFC from the 2011-12 Free Application for Federal Student Aid was used. If EFC is not available from either of these sources, the EFC reported by the NPSAS institution was used (these are included as EFC1). If EFC is not available from any of these sources, EFC was imputed by regression using dependency, income, and number in college. EFC is nearly always imputed for students who received no federal aid and should therefore be used with caution in these cases. Even when a recorded EFC1 is available, differences in the timing of the sources (any time during the NPSAS year), changes in the student's dependency status and financial situation during the period of a year, and the potential use of professional judgment by financial aid officers to change aspects of the EFC make it impossible to determine a single definitive EFC value or dependency status valid during the entire year.

Applies to: All respondents.

If the student received any federal need-based aid (FEDNEED>0), then the total amount of EFCAID may not exceed the student's financial need (SNEED1). Other types of non-need-based aid such as Direct Unsubsidized Loans (STAFUNSB), Direct PLUS loans to parents of undergraduate students (PLUSAMT), Direct PLUS loans to graduate students (GPLUSAMT), and most other loans and non-federal work-study are not restricted by this formula and can be used to cover the EFC. Weight used in frequency: (WTA000)

Notes: Equal to the total student budget (BUDGETAJ) minus the federal expected family contribution (EFC). The fundamental rule in federal financial aid need analysis is that the student's need is determined by subtracting the EFC from the student budget. If SNEED1 is zero or negative, the student is not eligible for any need-based federal aid (FEDNEED). However, the student may still be eligible for federal non-need-based aid (primarily Direct Unsubsidized Loans, Direct PLUS Loans to graduate students, and Direct PLUS Loans to parents of undergraduate students). Similarly, a student without federal need may also receive any non-federal grants, loans, or any other aid as long as no federal need-based aid is accepted.

Notes on all need variables: For students who did not apply for federal financial aid (FEDAPP=0), both the student budget and the EFC were imputed and should be used with caution. Similarly, budgets for students attending less than full time were estimated by adjusting for attendance intensity (See BUDNONAJ for more information about the student budget). Students who attended more than one institution (STUDMULT>1) were skipped, because expenses at the institution other than NPSAS are not known, the average need at more than one institution is not meaningful, and the financial aid received cannot be allocated by institution. Negative values (indicating no need) were set to zero. Values less than \$10 (1-9) were set to a minimum of \$10.

Notes on NEED and NET PRICE: "Need" differs from "net price" (see NETCST1) in that the need variables always subtract the Expected Family Contribution (EFC) in the calculation. Net price calculations never subtract the EFC, but are simply the student budget ("price of education") or just tuition minus some specified combination of financial aid types or sources. Need may be negative if the student does not qualify for federal need-based aid or receives non-need-based aid (like Direct Unsubsidized Loans). For the neediest students with an EFC=0, the need and net price are always the same. For less needy students with an EFC greater than zero, the need will always be less than the net price.

Name: SNEED4

Description: The remaining need after all grants and federal need-based aid, calculated as the total student budget (BUDGETAJ) minus the Expected Family Contribution (EFC) and minus aid subject to the federal EFC limitation (EFCAID). If the student has federal need (SNEED1>0), the financial aid office assembles a package of available aid to meet the need. Packaging policies differ, but usually any outside (federal, state, private) grants and institutional merit-based grants (INSMERIT) are added in first, followed by federal campus-based aid (CAMPAMT) and Direct Subsidized Loans (STAFSUB). If there is still need, need-based grants from institutional funds (INGRTAMT) may be added, if available. All of these types of aid are included in the variable EFCAID. SNEED4 is therefore the need remaining after all available grants and federal subsidized loans and work-study funds.

Notes on NET PRICE variables: There are many alternative definitions of "price" and "net price" of education to students. In NPSAS, the total "price of attendance" refers to the entire student budget (BUDGETAJ), which includes room and board, books, and other living expenses in addition to tuition. Many of the "net price" variables are calculated as the student budget minus some specified combination of financial aid types or sources (NETCST1-NETCST4). "Need" (SNEED1-SNEED5) differs from "net price" in that the need variables always subtract the Expected Family Contribution (EFC) as well as financial aid in the calculation. Net price variables never include the EFC in the calculation. See BUDNONAJ for additional information on student budgets. See SNEED1 for additional information on student need.

NET PRICE variables:

[NETCST1] Student budget minus all aid

[NETCST2] Student budget minus federal grants

[NETCST3] Student budget minus all grants

[NETCST4] Student budget minus grants and half of loans

[NETCST16] Student budget minus federal and state grants

[NETCST17] Student budget minus all grants and loans

[NETCST18] Student budget minus all aid except work-study

[NETCST20] Student budget minus all grants and loans (including Direct PLUS Loans to parents of undergraduate students)

[NETCST40] Student budget minus state & institutional grants

[NETCST41] Student budget minus all aid except private loans.

Notes on NET TUITION variables: Sometimes "price" is used to refer to tuition and fees only (TUITION2), and "net price" is calculated as tuition and fees minus some combination of grant aid. In this case a better term is "net tuition." The variables NETCST9-NETCST15 show net tuition, that is, tuition and fees (TUITION2) minus grants. Since grants may cover living expenses as well as tuition, net tuition amounts may be negative; these were set to zero.

NET TUITION variables:

[NETCST9] Tuition and fees minus all grants

[NETCST10] Tuition and fees minus federal grants

[NETCST12] Tuition and fees minus state grants

[NETCST13] Tuition and fees minus institutional grants

[NETCST14] Tuition and fees minus all non-federal grants

[NETCST15] Tuition and fees minus state and institutional grants.

Weight used in frequency: (WTA000)

Notes: This variable is based on the higher of an estimate based on the student interview (N12UGOWE), the National Student Loan Data System (NSLDS) cumulative federal loan amount outstanding, principal and interest (FEDDUE1) plus private loans borrowed in 2011-12 (PRIVLOAN), or the amount borrowed in 2011-12 from any source (TOTLOAN). This variable combines both loan principal and interest amounts for all loans still outstanding. Since loans accumulate interest over time, the amount owed may be greater than the original amount borrowed. A similar variable OWEAMT1 contains principal amount only for federal loans, which can include capitalized interest for unsubsidized federal loans, but otherwise does not include interest. Interest and principal were not differentiated for private loans.

Notes: For definitions and detailed information on classification procedures, refer to the Carnegie Foundation website and the Technical Report on the 2000 edition: http://classifications.carnegiefoundation.org/downloads/2000_edition_data_printable.pdf.

Non-degree granting or other institutions that had not been assigned a Carnegie Classification were classified according to their highest degree offered (HLOFFER) and control (CONTROL). Categories 19 (unclassified for-profit degree-granting) and 20 (not degree-granting) were created for completeness, and are not part of the actual Carnegie Classification.

Additional notes:

1. Text of category definitions is subject to change in the published edition.
2. Some Classification categories are different from previous editions.
3. The 2000 "Doctoral/Research Universities" categories are not comparable with categories previously used to differentiate doctorate-granting institutions.
4. The 2000 "Baccalaureate Colleges" categories are not comparable with categories previously used to differentiate baccalaureate institutions.

Exclusively undergraduate institutions are further broken down by level (two-year and four-year). For institutions with both undergraduate and graduate/professional students, institutions were grouped according to the distribution of full-time equivalent students across the two levels. This classification indicated differences in educational mission and institutional climate and culture with implications for infrastructure, services, and resource allocation.

Classifications are time-specific snapshots of institutional attributes and behavior based on data from 2008 to 2010 and collectively they depict the most current landscape of U.S. colleges and universities. Notes: In this classification, a single graduate-level degree qualifies an institution for inclusion. The classification is a companion to the Undergraduate Instructional Program classification (CC2010P). For details of the 2010 Graduate Instructional Program Classification see the Carnegie Foundation website:

http://classifications.carnegiefoundation.org/descriptions/grad_program.php

The classification was based on the level of graduate degrees awarded (master's/professional or doctoral), the number of fields represented by the degrees awarded, and the mix or concentration of degrees by broad disciplinary domain.

The classification had two parts: one for institutions that do not award the doctorate, and one for doctoral-level institutions (based on the record of degree conferrals, not program offerings). Within each group, institutions were then classified with respect to the breadth of graduate offerings and the concentration of degrees in certain fields or combinations of fields.

Classifications are time-specific snapshots of institutional attributes and behavior based on data from 2008 to 2010 and collectively they depict the most current landscape of U.S. colleges and universities. Institutions might be classified differently using a different timeframe. Individual classifications were not updated with more recent data.

Notes: For details of the 2010 Undergraduate Instructional Program Classification see the Carnegie Foundation website:

http://classifications.carnegiefoundation.org/descriptions/ugrad_program.php

The instructional program classification is based on the level of undergraduate degrees awarded, the proportion of bachelor's degree majors in the arts and sciences and in professional fields, and the extent to which an institution awards graduate degrees in the same fields in which it awards undergraduate degrees.

Classifications are time-specific snapshots of institutional attributes and behavior based on data from 2008 to 2010 and collectively they depict the most current landscape of U.S. colleges and universities. Institutions might be classified differently using a different timeframe. Individual classifications were not updated with more recent data.

Notes: For details of the 2010 Size & Setting Classification see the Carnegie Foundation website:

http://classifications.carnegiefoundation.org/descriptions/size_setting.php

Four-year institutions were divided into four categories of full-time equivalent (FTE) enrollment and three categories of residential character. Neither characteristic (FTE or residential character) implied differences in the quality of undergraduate education, but an institution's location along the two continua generally corresponded to a distinctive mix of educational challenges and opportunities. Because few two-year institutions served a residential population, these institutions were classified solely based on FTE enrollment.

Classifications are time-specific snapshots of institutional attributes and behavior based on data from 2008 to 2010 and collectively they depict the most current landscape of U.S. colleges and universities. Institutions might be classified differently using a different timeframe. Individual classifications are not updated with more recent data.

Notes: For details of the 2010 Undergraduate Profile Classification see the Carnegie Foundation website:

http://classifications.carnegiefoundation.org/descriptions/undergraduate_profile.php

Some institutions serve a primarily full-time student population, while others serve large numbers of students who attend part-time due to substantial work and family commitments outside school. These differences have implications for the scheduling of classes, student services, extracurricular activities, time to degree, and other factors. Entrance examination scores describe--with limitations--the academic preparation of entering first-year students, which in turn corresponds to selectivity of undergraduate admissions.

Classifications are time-specific snapshots of institutional attributes and behavior based on data from 2008 to 2010 and collectively they depict the most current landscape of U.S. colleges and universities. Institutions might be classified differently using a different timeframe. Individual classifications were not updated with more recent data.

Additional category descriptions:

- 1) Degree-granting, graduate with no undergraduate degrees: offer only master's and doctor's degrees and do not offer a bachelor's degree or an associate's degree.
- 2) Degree-granting, primarily baccalaureate or above: offer bachelor's, master's, and doctor's degrees. The total number of awards at or above the bachelor's level divided by the total number of awards is > 50%.
- 3) Degree-granting, not primarily baccalaureate or above: offer bachelor's, master's, and doctor's degrees. The total number of awards at or above the bachelor's level awarded divided by the total number of awards is <= 50%.
- 4) Degree-granting, associate's and certificates: offer an associate's degree and may offer other postsecondary certificates, awards/diplomas of <1 academic year; at least 1 but <2 academic years; at least 2 but <4 academic years. Includes institutions that offer post-baccalaureate and post-master's certificates and the highest degree offered is an associate's degree.
- 5) Non-degree-granting, above the baccalaureate: do not offer degrees, but offer either post-baccalaureate or

post-master's certificates.

6) Non-degree-granting, subbaccalaureate: do not offer degrees or certificates above the baccalaureate level. They do offer postsecondary certificates, awards or diplomas of <1 academic year; at least 1 but <2 academic years; or at least 2 but <4 academic years.

Notes: For students who attended one institution (STUDMULT=1) only. The actual amount spent on books and supplies may vary substantially from the budgeted amount. For students who were not enrolled full time and full year, this variable was adjusted by their attendance status.

Applies to: Respondents who attended one institution (STUDMULT=1).

Subject: Institution: expenses

-3	8.25	{Skipped}

Minimum	Maximum	Average	Standard Deviation
1501.00	112008.00	9453.37	5518.29

Weight used in frequency: (WTA000)

Notes: For students who attended one institution (STUDMULT=1) only. Equal to the sum of books and supplies, room and board, transportation and personal expenses; also equal to total budget (BUDGETAJ) minus tuition and fees (TUITION2). Because of very incomplete reporting for these budget components, only the total is available as a variable. This variable was estimated for students based on the amounts reported for full-time, full-year aided students in student records or for Pell grant recipients in NSLDS. BUDNONAJ is first based on the total budget for Pell minus tuition and fees (TUITION2). If not available, student records were used. If the non-tuition expense items were available from institutional records, this variable was set to the sum of all non-tuition expense items; otherwise, it was set to the total budget from student records minus tuition and fees (TUITION2). Extremely high or low values within each dependency/marriage grouping were set to missing. If no student budget data was available or the value was set to missing, the non-tuition expenses were imputed based on the averages for students with the same dependency and residence status at the same or similar institutions. Institutions do not report budgets for unaided students, so all budgets for unaided students are imputed (less than one-third of the total).

For students who were not enrolled full-time and full-year, this variable was adjusted by their attendance status. After all edits are made to BUDNONAJ and BUDGETAJ, the variables are then compared to other variables that make up the student's financial aid package. If BUDGETAJ is less than the total aid amount (TOTAID) minus alternative loans (PRIVLOAN), then BUDNONAJ and BUDGETAJ are adjusted to match. Students who attended more than one institution (STUDMULT>1) were skipped, because non-tuition expenses at institution other than NPSAS is not known.

Applies to: Respondents who attended one institution (STUDMULT=1).

Notes: The urban-centric locale codes introduced in this file are assigned through a methodology developed by the U.S. Census Bureau's Population Division in 2005. The urban-centric locale codes apply current geographic concepts to the original NCES locale codes used on IPEDS files through 2004.

Additional category descriptions:

- 1) City Large: Census-defined territory inside an urbanized area and inside a principal city with population of 250,000 or more.
- 2) City Midsize: Census-defined territory inside an urbanized area and inside a principal city with population less than 250,000 and greater than or equal to 100,000.
- 3) City Small: Census-defined territory inside an urbanized area and inside a principal city with population less than 100,000.
- 4) Suburb Large: Census-defined territory outside a principal city and inside an urbanized area with population of 250,000 or more.
- 5) Suburb Midsize: Census-defined territory outside a principal city and inside an urbanized area with population less than 250,000 and greater than or equal to 100,000.
- 6) Suburb Small: Census-defined territory outside a principal city and inside an urbanized area with population less than 100,000.
- 7) Town Fringe: Census-defined territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.
- 8) Town Distant: Census-defined territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.
- 9) Town Remote: Census-defined territory inside an urban cluster that is more than 35 miles of an urbanized area.
- 10) Rural Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster.
- 11) Rural Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural.
- 12) Rural Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.

Note: American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the Virgin Islands, were not assigned a locale code because the geographic and governmental structures of these entities do not fit the definitional scheme used to derive the code.

Label: Selectivity (4-year institutions)

Name: SELECTV2

Description: Indicates the level of selectivity of the institution attended.

Source: IPEDS

Descriptive Statistics:

Value	Percentage	Value label
0	56.03	Not public or private nfp 4-year
1	10.80	Very selective
2	21.35	Moderately selective
3	4.70	Minimally selective
4	7.11	Open admission

Weight used in frequency: (WTA000)

Notes: The selectivity measure was developed for IPEDS, for public or private not-for-profit 4-year institutions using the following criteria:

- whether the institution was open admission (no minimal requirements)
- the number of applicants
- the number of students admitted
- the 25th and 75th percentiles of ACT and/or SAT scores
- whether or not test scores were required

Open admission 4-year institutions were formed into a separate category. For non-open admission institutions, an index was created from two variables:

- 1) the centile distribution of the percentage of students who were admitted (of those who applied); and
- 2) the centile distribution of the midpoint between the 25th and 75th percentile SAT/ACT combined scores reported by each institution (ACT scores were converted into SAT equivalents).

The two variables were given equal weight for those non-open admission institutions that had data for both, and the combined centile variable was divided into selectivity categories: very selective, moderately selective, and minimally selective, based on breaks in the distribution.

Institutions that did not have test score data were assigned to the selectivity categories using a combination of percent admitted and whether they required test scores; institutions that did not require test scores were assigned to the minimally selective category, while the remainder were assigned according to the range of centiles of percent admitted in which they fell.

Note: Selectivity only applies to public or private not-for-profit 4-year institutions. Other institutions were set to zero.

Applies to: All undergraduate respondents.

Descriptive Statistics:

Value	Percentage	Value label
1	48.71	Dependent student
2	51.29	Independent student

Weight used in frequency: (WTA000)

Notes: First students were classified according to the federal criteria for independence listed below. If not available, then dependency was based on the federal financial aid application. For federal financial aid purposes, all students are considered to be dependent unless they meet one of the following criteria for independence:

- Age 24 or older on December 31, 2011 (AGE>23)
- Married (SMARITAL>1)
- Have legal dependents other than a spouse (DEPANY=1)
- A veteran of the U.S. Armed Forces (MILTYPE=3)
- U.S. Armed Forces active duty (MILTYPE=1)
- Orphan, ward of court, emancipated minor, or in legal guardianship or foster care
- Homeless or at risk of homelessness

Some students under 24 who do not meet any of these conditions but are receiving no parental support could have been classified as independent by campus financial aid officers using their professional judgment; this reclassification is not reflected in this variable.

Applies to: All undergraduate respondents.

Subject: Student's family

Label: Dependency status

Name: DEPEND

Description: Student's dependency status during the 2011-12 academic year.

Source: FAFSA:12, NPSAS:12 Interview

Descriptive Statistics:

Value	Percentage	Value label
1	48.71	Dependent student
2	51.29	Independent student

Weight used in frequency: (WTA000)

Notes: First students were classified according to the federal criteria for independence listed below. If not available, then dependency was based on the federal financial aid application. For federal financial aid purposes, all students are considered to be dependent unless they meet one of the following criteria for independence:

- a. Age 24 or older on December 31, 2011 (AGE>23)
- b. Married (SMARITAL>1)
- c. Have legal dependents other than a spouse (DEPANY=1)
- d. A veteran of the U.S. Armed Forces (MILTYPE=3)
- e. U.S. Armed Forces active duty (MILTYPE=1)
- f. Orphan, ward of court, emancipated minor, or in legal guardianship or foster care
- g. Homeless or at risk of homelessness

Some students under 24 who do not meet any of these conditions but are receiving no parental support could have been classified as independent by campus financial aid officers using their professional judgment; this reclassification is not reflected in this variable.

Applies to: All undergraduate respondents.
