- IF (NumberOfChildren = 2 AND ChildNum = 2), GO TO BOX 1B.

INQ.005

We spoke with someone in your household before about an ongoing study that {{CHILD}} {and TWIN}} participated in a few years ago called the Early Childhood Longitudinal Study Kindergarten Cohort. The U.S. Department of Education's National Center for Education Statistics sponsors the study. Now that {{CHILD}} {and TWIN}} {is/are} older, I have some more questions for you that ask about {{CHILD}}'s {and TWIN}'s} school and home experiences. The information I collect in this interview will be extremely valuable in understanding the development of young children and how their early school experiences can be improved.

The information you provide will be kept confidential, and will be protected to the fullest extent allowable under the law.

PRESS ENTER TO CONTINUE.

CAPI INSTRUCTION: DISPLAY "and TWIN" IF THERE IS A TWIN.
DISPLAY "are" IF THERE IS A TWIN. OTHERWISE, DISPLAY "is."

What is {your/{NAME}'s} relationship to {CHILD}?

{CODE RELATIONSHIP OF HOUSEHOLD MEMBERS ONLY.}

HELP TEXT:

Mother/Female Guardian: The female primarily responsible for the child. Includes birth or biological mothers, adoptive, step, and foster mothers, as well as, legal female guardians.

Father/Male Guardian: The male primarily responsible for the child. Includes birth or biological fathers, adoptive, step, and foster fathers, as well as, legal male guardians.

Sister: Include biological (full, half), adoptive, step, and foster sisters.

Brother: Include biological (full, half), adoptive, step, and foster brothers.

Girlfriend or Partner of CHILD's Parent/Guardian: The female who has a "partner-like" relationship with one of the child's parents or guardians. "Living as married" is another way of describing the relationship.

Boyfriend or Partner of CHILD's Parent/Guardian: The male who has a "partner-like" relationship with one of the child's parents or guardians. "Living as married" is another way of describing the relationship.

Grandmother: The female parent of the child's biological or adoptive mother or father.

Grandfather: The male parent of the child's biological or adoptive mother or father.

Aunt: The sister of the child's biological or adoptive mother or father or the wife of the child's uncle.

Uncle: The brother of the child's biological or adoptive mother or father or the husband of the child's aunt.

Cousin: A child of the focal child's uncle, aunt, or cousin.

Other Relative: Refers to relationships that aren't specifically listed, such as great grandmother, niece, or nephew.

Other Non-relative: Refers to the relationship between two people when there is no family relationship through blood, marriage, adoption, or partnership (i.e., living together as married). It also refers to more ambiguous relationships that exist where there are two people living together as married and they have children. For example, the child's father and the father's girlfriend (who is not the child's mother) live together as married and the girlfriend's daughter lives with them. The relationship of the girlfriend's daughter to the child would be siblings if they were married, but since the father and the girlfriend are not married, she is an "other non-relative." If the "other non-relative" is coded, you will receive a list of other codes to use if they are more descriptive than "other non-relative."

Now I'd like to talk with you about {CHILD}'s activities with family members. In a typical **week**, how often do you or any other family members do the following things with {CHILD}?

PROBE: Would you say not at all, once or twice, 3-6 times, or every day?

HELP TEXT:

FAMILY MEMBER: A family member refers to any person who lives in the child's household and any relative of the child living outside the child's household.

Tell stories: Story-telling is different from reading. Stories include fairy tales, family stories, or any type of story that is not read.

Sing Songs with child: Include times that a family member sings to or with the child. This may include teaching the child songs, singing along with tapes or to the radio, or singing while playing musical instruments.

Help child with arts and crafts: Arts and crafts may include making seasonal decorations, making cutouts or drawing pictures, painting or finger-painting, whittling wood, etc. It also includes helping the child with arts and crafts projects assigned by school, but done at home.

Involve child in household chores: Chores not mentioned can also satisfy this item.

Play games or do puzzles: Includes indoor "quiet" games like board games or puzzles, or more active indoor games like Ping-Pong.

Talk about nature or do science projects: Talking about nature could include answering any questions the child may have about trees, weather, etc. or watching a television program or video about nature together and then discussing it. Science projects include any type of project designed to show the child how the world works, such as understanding how plants grow, studying rocks, using flashlights to create shadows, or mixing paints to create different colors.

Build something or play with construction toys: This would include activities that the child does with family members, such as making a tent, constructing a toy car, building a doghouse, and using Lincoln logs, Brio, or other construction toys or tools.

Play a sport or exercise together: This includes calisthenics, riding bicycles, rollerblading, individual or team sports, games like hide-and-go-seek, or other outdoor activities where activity or exercise is involved. Do not include times when the child does the sport or activity by him or herself.

Practice reading, writing, or working with numbers: This includes time family members spend on homework, reading a calendar, practicing in an exercise or workbook.

Read books: Include only times family members have read books to the child. Do not include times when the child reads or looks at books by him or herself.

CAPI INSTRUCTION:

HELP TEXT:

Learning disability: This is a disorder in one or more of the basic psychological processes involved in understanding or in using language (spoken or written) which shows up as difficulty to listen, think, speak, read, write, spell, or do mathematical calculations. In some cases the child can perform at grade level, but only with special help. Some names of learning disabilities are dyslexia (CODE UNDER DYSLEXIA), developmental aphasia, minimal brain dysfunction, and brain injury. The term does not include learning problems that are primarily the result of problems with seeing, hearing, or walking, mental retardation, emotional disturbance, or environmental, cultural, or economic disadvantage. A commonly used acronym is "LD."

Attention deficit disorder (ADD): A childhood syndrome characterized by short attention span that is inappropriate for his/her age group.

Attention deficit hyperactivity disorder (ADHD): The child displays signs of inattention, impulsivity, and hyperactivity that are inappropriate for his or her mental and chronological age. Adults in the child's environment, such as parents and teachers must report the signs. Inattention means difficulty concentrating, easily distracted, and not finishing things started. Impulsivity means often acts before thinking, shifts excessively from one activity to another, needs a lot of supervision. Hyperactivity means runs about or climbs on things excessively, has difficulty staying seated, always on the go, as if driven by a motor. Onset is typically before age seven and condition lasts at least six months.

Developmental delay: A condition in which a young child falls significantly behind his/her agemates in physical, mental, social/emotional, or speech development. It does not simply mean that the child talked somewhat later than some children talked or was smaller than average. Not to be confused with autism or pervasive developmental delay. If the child's social behavior and relationships with other people are generally consistent with his or her delayed cognitive development, then the classification of the

condition as developmental delay is probably appropriate. If this is not the case, see the definitions of autism and pervasive developmental disorder or delay.

Autism is a pervasive lack of responsiveness to other people that has its onset before 30 months of age. Other defining characteristics are that the impaired social development and delayed or deviant language development are not merely predictable from the child's cognitive retardation. Some autistic children are actually advanced in their reading skills, memory skills, or musical abilities. There is also an insistence on sameness, as shown by stereotyped play, abnormal preoccupations, or resistance to change.

Pervasive developmental disorder or delay is also characterized by gross and sustained impairment in social relationships, but typically has an onset **after** 30 months of age. Other characteristics are sudden excessive anxiety, inappropriate affect or emotions, resistance to change in the environment, oddities of motor movement, abnormalities of speech, hypersensitivity to sensory stimuli, and self-mutilation. This condition generally does **not** involve delusions, hallucinations, incoherence, or bizarre associations.

Dyslexia: A learning disability (see above definition) marked by impairment of the ability to recognize and comprehend the written word.

Mental Retardation: The child's mental and/or social/emotional development is significantly and noticeably behind what would ordinarily be expected for a child of his or her age. This is a more significant delay than a developmental delay.

CHQ.365 What was the diagnosis?

PROBE: What was the primary diagnosis?

HELP TEXT:

Panic Disorder: A disorder in which there is the sudden onset of several different physical signs, such as rapid heartrate, shaking, sweating, nausea, dizziness, and difficulty breathing. A panic disorder may make a child think that something horrible is about to happen.

Separation Anxiety Disorder: This is the fear a child has of being separated from his/her parents which is far more than would be expected for the child's developmental stage.

Agoraphobia: This is anxiety about being in places or situations from which escape might be difficult or embarrassing or in which help might not be available in the event of having an unexpected panic attack. Children usually avoid the situations or else they are endured with distress or anxiety about having a panic attack. This disorder is not due to any social phobia such as obsessive-compulsive disorder, or separation anxiety.

Social Phobia: A marked and persistent fear of social or performance situations in which the child is exposed to unfamiliar people or possible scrutiny. These situations provoke anxiety, which can take the form of panic, crying, and tantrums, freezing or shrinking from the situation. The avoidance or anxious

anticipation and distress caused by these situations interfere significantly with the child's routine, academic functioning or social activities.

Obsessive Compulsive Disorder: A child must have obsessions or compulsions or both to have this disorder, and these obsessions and/or compulsions must be disabling to the child. Obsessions are thoughts that aren't visible to others but cause the child distress. The thoughts occur over and over and the child spends so much time on them that they have a hard time taking care of themselves or relating to others. Compulsions are mental acts that a child feels driven to perform in response to an obsession.

Generalized Anxiety Disorder: Children who have this disorder worry all the time over nothing, themselves, other's safety, their health, and/or the world to a far greater extent than average. They often have many physical signs of anxiety such as headache, abdominal pain, cramps, diarrhea, vomiting, and dizziness.

Bipolar Disorder: A child with bipolar disorder displays signs of major mood changes, sometimes sad, as in depression, or the opposite, mania. All bipolar disorders are a combination of mania with or without depression. Some signs of mania include inflated self-esteem, decreased need for sleep, distractibility and increased activity. Some signs of depression are sleeping too much, poor appetite, severe worthlessness, hallucinations or strange beliefs about the past.

HELP TEXT:

Highest Grade or Year of School Completed: For grades 1-11, enter the exact grade level. If the person you are asking about completed elementary school, find out the last grade completed. If the respondent says the person finished 12th grade, ask whether the person received a diploma or got the equivalent of a high school diploma.

Completing a given grade in school should be counted as the number of years it normally takes to complete that grade level of education, regardless of how many years it actually took the person to finish. This means that for persons who skipped or repeated grades in elementary school, you will enter the highest grade completed regardless of the number of years they were in school. This rule is true for elementary school through high school and is especially relevant to college.

12th grade but no diploma: The person completed the 12th grade, but did not earn a high school diploma or GED.

High school diploma/equivalent: A certificate that verifies that a person has successfully completed the required courses of a high school curriculum. Includes either actually graduating from high school or having a GED. The GED is an exam certified equivalent of a high school diploma received when the person has not actually received a degree from attending high school, but has acquired his/her GED (high school equivalency based on passing the GED exam).

Vocational/technical program after high school but no voc/tech diploma: The person attended this type of program, but did not earn a degree/diploma/certificate of successful completion of the program. Vocational/trade school after high school refers to work or trade-related education received after completing high school, but does not include college. Examples include secretarial school, mechanical or computer training school, etc. Some community colleges offer vocational training, but this would be considered "1-2 years of college" or "associate's degree" and not vocational or trade school.

Vocational/technical program after high school: The person attended this type of program, but DID earn a degree/diploma/certificate of successful completion of the program. Vocational/trade school after high school refers to work or trade-related education received after completing high school, but does not include college. Examples include secretarial school, mechanical or computer training school, etc. Some community colleges offer vocational training, but this would be considered "1-2 years of college" or "associate's degree" and not vocational or trade school.

Some college but no degree: The person does not have a 4-year college (bachelor's) degree but has completed a class for credit at a college, university, or vocational/technical school.

Associate's degree: A 2-year college degree typically earned at a community college (rather than a trade school).

Bachelor's degree: A 4-year college degree earned at a university or 4-year college. It is sometimes called an "undergraduate degree."

Graduate or professional school but no degree: The person attended a graduate or professional school that advanced him/her toward a degree beyond a Bachelor's degree (for example, a Master's, Doctorate, or other professional degree). However, the person did not complete the program or earn the degree.

Master's (MA, MS): Studies beyond a bachelor's degree, but not a Ph.D. or Ed.D.

Doctorate Degree (Ph.D., EDD): Studies beyond a Master's degree that result in a doctorate degree.

Professional degree after bachelor's degree (Medicine/MD; Dentistry/DDS, Law/JD/LLB): Any other graduate degrees earned with academic studies beyond the bachelor's.
