

Forum Guide to Technology Management in Education

https://nces.ed.gov/forum/tec_intro.asp

This publication assists education agency staff in identifying best practices for selecting and implementing technology. It addresses the widespread use and integration of technology in modern education systems, including administration (such as human resources and finances), reporting, infrastructure, student information systems, classroom software, and apps.

Forum Guide to Planning for, Collecting, and Managing Data About Students Displaced by a Crisis

https://nces.ed.gov/forum/pub_2019163.asp

This publication provides timely and useful best practice information for collecting and managing data about students who have temporarily or permanently enrolled in another school or district because of a crisis. It highlights best practices that education agencies can adopt before, during, and after a crisis; and features case studies and real-world examples from agencies that have either experienced a crisis or received students who were displaced by a crisis.

Forum Guide to Personalized Learning Data

https://nces.ed.gov/forum/pub_2019160.asp

This publication is designed to assist education agencies as they consider whether and how to use personalized learning. It provides an overview of personalized learning and describes best practices used by education agencies to collect data for personalized learning; to use those data to meet goals; and to support the relationships, resources, and systems needed for the effective use of data in personalized learning.

Forum Guide to Early Warning Systems

https://nces.ed.gov/forum/pub_2019035.asp

This publication provides information and best practices to help education agencies plan, develop, implement, and use an early warning system in their agency to inform interventions that improve student outcomes. The document includes a review of early warning systems and their use in education agencies and explains the role of early warning indicators, quality data, and analytical models in early warning systems.

Forum Guide to Facility Information Management: A Resource for State and Local Education Agencies

https://nces.ed.gov/forum/pub_2018156.asp

This publication helps state and local education agencies plan, design, build, use, and improve their facility information systems. It includes a review of why school facilities data matter and recommends a five-step process that an education agency can undertake to develop a robust facility information system around goals, objectives, and indicators.

Forum Guide to Reporting Civil Rights Data

http://nces.ed.gov/forum/pub_2017168.asp

This publication includes an overview of the Civil Rights Data Collection (CRDC), a discussion of the challenges and opportunities in reporting civil rights data, an explanation of the CRDC reporting process, and six case studies that examine how specific education agencies report civil rights data.

Forum Guide to Collecting and Using Attendance Data

http://nces.ed.gov/forum/pub_2017007.asp

This publication is designed to help state and local education agency staff improve their attendance data practices—the collection, reporting, and use of attendance data to improve student and school outcomes. The guide offers best practice suggestions and features real-life examples of how attendance data have been used by education agencies.

Forum Guide to Data Visualization: A Resource for Education Agencies

http://nces.ed.gov/forum/pub_2017016.asp

This publication describes key data visualization principles and recommended practices that an education agency can implement to improve how education data are viewed, analyzed, communicated, and understood by a range of stakeholders. The Forum Data Visualization Online Course serves as an extension of the publication and is available on the Forum website at https://nces.ed.gov/forum/dv_course.asp.

Forum Guide to Collecting and Using Disaggregated Data on Racial/Ethnic Subgroups

http://nces.ed.gov/forum/pub_2017017.asp

This publication is intended to identify some of the overarching benefits and challenges involved in data disaggregation; recommend appropriate practices for disaggregating racial/ethnic data in districts and states; and describe real-world examples of large and small education agencies disaggregating racial/ethnic data successfully.
