1. What is the CIP?	111
2. Who creates the CIP?	111
3. What is different in CIP 2010?	111
4. How do I obtain electronic copies of the CIP?	111
5. How do I find a list of New CIP Codes?	112
6. How do I find a list of Deleted CIP Codes?	113
7. How do I find a list of Moved CIP Codes?	115
FAQs	117
General FAQs.....	117
1. How do I determine what series I should select for my program of study?.....	117
2. Some CIP codes include slashes, while others include "and." What is the difference between the two?.....	117
3. When is a CIP code reported under a "general" category vs. "other" category?	117
4. What are examples?	118
5. What is a see-also/cross-reference code?	118
6. Do degree levels apply to CIP codes?.....	118
7. What does it mean when a program is marked "Text Change?"	118
8. Are there any differences between the Canadian and U.S. versions of the CIP?	118
Coding FAQs.....	119
1. What determines if a CIP codes falls into Series 30 Multi/Interdisciplinary Studies vs. any other series?	119
2. Why are some medical sciences in Series 26, while others are in Series 51, and when should Series 60 be used?.....	119
3. When should programs be included in Series 14 Engineering vs. Series 15 Engineering Technologies and Engineering-Related Fields?	119
4. When should programs be reported under Series 23 English Language and Literature/Letters vs. Series 09 Communication, Journalism, and Related Programs?	119
5. When should programs be reported under 09.0100 vs. 09.0101 or 09.0102?.....	120
6. What is the difference between Series 05 and Series 16? Why do some of the programs in each series seem to overlap, and how do I choose the best code?	120
8. Where should degrees awarded in an undeclared major or General Studies be reported?	120
9. Where should degrees that are awarded in a student-designed majors or an individualized major be reported?.....	121
10. What is the difference between programs reported under Series 38 vs. Series 39?121	
11. Where should RN programs be coded vs. LPN programs?	121
12. What is the difference between 51.3808 Nursing Science vs. 51.3818 Nursing Practice?	121
13. How should double majors be coded?	121
14. Some program titles found in the Communications, Computer Sciences, and Visual and Performing Arts series share common words and seem to overlap. How can I decide where a particular program should be reported?	122
15. In series 15, what is the difference between Technology and Technician?.....	122
16. How is series 53 used?.....	122
17. When should instructional programs be coded under 10.0203 Recording Arts Technology/Technician vs. 50.0913 Music Technology?.....	122
18. When is it appropriate to use series 13 Education?	123
19. Why was series 60.02 Medical Residency Programs re-organized, and what are "general" and "subspecialty" certificates?	123
20. What are Series 28 and 29, and how are they used?	123

Getting Started

Select the feature you need help with from the table of contents on the left or find which feature to use based on what you want to do from the list below.

Each help topic contains screen shots and step-by-step instructions.

If you want to:	Use this feature:
See detailed information on one CIP code.	Quick CIP
See a list of CIP codes and titles organized by series.	Browse
See a side-by-side comparison of the last CIP version to the current CIP version.	Crosswalk
See code, title, definition, and examples for a group of codes based on criteria specified.	Search
Download documents about the 2010 CIP.	Resources
Obtain a report on CIP codes of interest to your institution.	CIP Wizard
Find a CIP code to use on the Completions Survey (IPEDS Keyholders & Coordinators).	CIP Selector
Find information about previous editions of the CIP.	Resources or Change Year

Home

The Home Page of the CIP user site provides easy access to all the features on the site.

The screenshot shows the IPEDS website interface. At the top left is the IPEDS logo. The main header reads "The Integrated Postsecondary Education Data System (IPEDS)" with the subtitle "Statistical data and Information on Postsecondary Institutions". Below this is the title "Classification of Instructional Programs (CIP)". A navigation bar contains links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. A secondary navigation bar shows "CIP 2010" with a "(change year)" link, and buttons for Browse, Search, Crosswalk, Resources, and a Quick CIP search box with a Go button. The main content area is divided into several sections: "What is the CIP?" with a descriptive paragraph; "Start Here" with a list of links (Browse all CIP codes, Search CIP codes, View Crosswalk 2000-2010, View NEW CIP codes, View DELETED CIP codes, View MOVED CIP codes); "CIP Wizard" with an icon of a wand and stars, and a description of its functionality; and "CIP Selector" with an icon of a cursor pointing to a document, and a description of its purpose for finding the best CIP code for a program.

From the **top navigation bar** the user can:

- Link back to the main IPEDS web site (Click on IPEDS LOGO)
- Links to CIP Home Page, CIP Wizard, CIP Selector, Help, and Contact NCES

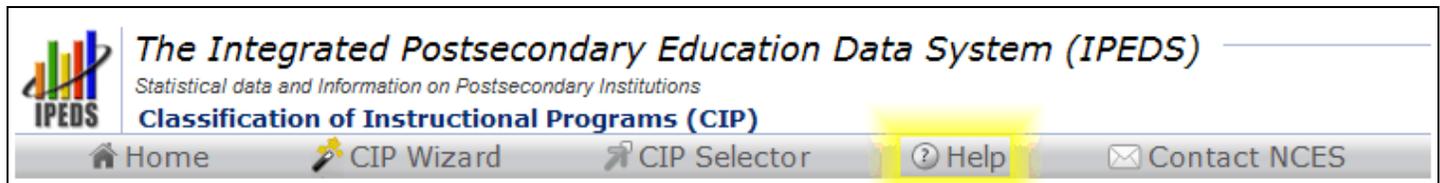

From the **secondary navigation bar**, the user can:

- View different versions of the CIP (Click on Change Year)
- Browse CIP 2010
- Search CIP 2010
- Crosswalk the current version of the CIP with previous version of the CIP
- Access Resources such as Word and Excel Versions of the CIP
- Look up a specific code using the Quick CIP

Quick links are also provided in the "Start Here" section that allow the user to:

- Browse all CIP codes
- Search CIP codes
- View a crosswalk of the 2000 CIP to the 2010 CIP
- View a list of NEW CIP codes
- View a list of DELETED CIP codes
- View a list of MOVED CIP codes

Browse

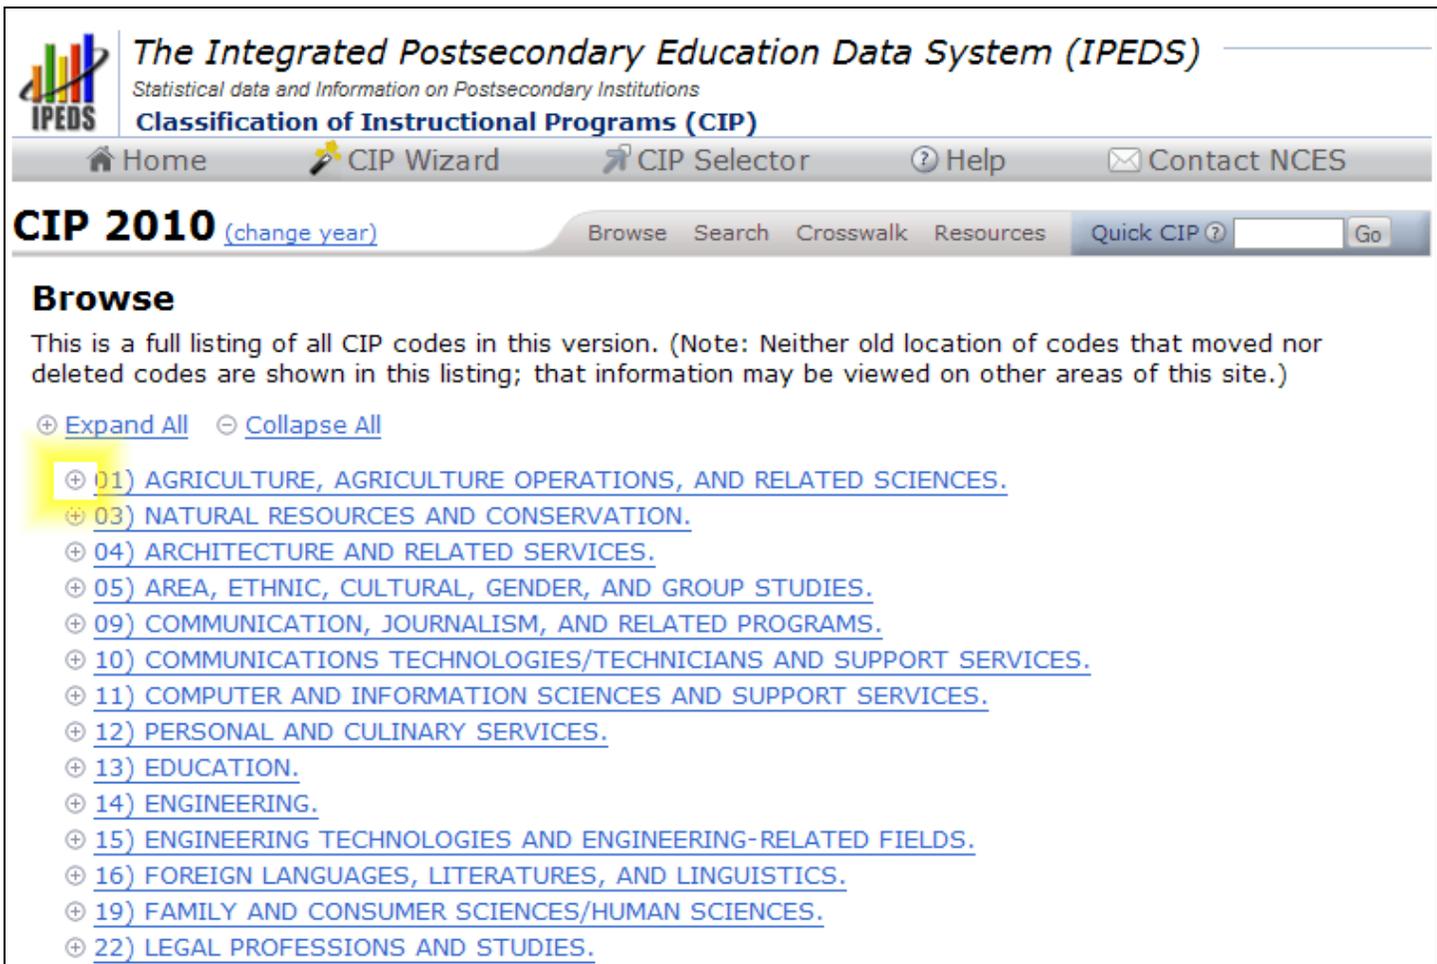

The Browse screen is a complete listing of all the codes that are in the current CIP version. It can be accessed from the navigation bar as shown below.

The screenshot shows the top navigation bar of the IPEDS website. The header includes the IPEDS logo and the text "The Integrated Postsecondary Education Data System (IPEDS) Statistical data and Information on Postsecondary Institutions Classification of Instructional Programs (CIP)". Below this is a navigation menu with links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. A secondary navigation bar contains "CIP 2010 (change year)" and a set of buttons: Browse, Search, Crosswalk, Resources, and Quick CIP (with a search input field and a Go button). The "Browse" button is highlighted with a yellow background.

The Browse screen allows the user to view the entire structure of the current CIP version. Although the web site includes all codes from both the previous and current versions of the CIP, the Browse screen only lists the codes in the current version.

The initial view of the Browse screen shows the most general categories within the CIP. These codes are assigned 2-digit series numbers.

The screenshot shows the "Browse" screen of the IPEDS website. The header and navigation bar are identical to the previous screenshot. Below the navigation bar, the page title is "CIP 2010 (change year)". The main content area is titled "Browse" and contains a paragraph: "This is a full listing of all CIP codes in this version. (Note: Neither old location of codes that moved nor deleted codes are shown in this listing; that information may be viewed on other areas of this site.)". Below this paragraph are two links: "Expand All" and "Collapse All". A list of 2-digit series codes follows, each preceded by a plus icon (⊕) and underlined. The first code, "01) AGRICULTURE, AGRICULTURE OPERATIONS, AND RELATED SCIENCES.", is highlighted with a yellow background.

Browse

This is a full listing of all CIP codes in this version. (Note: Neither old location of codes that moved nor deleted codes are shown in this listing; that information may be viewed on other areas of this site.)

Search

Search allows you to specify criteria to search for CIP codes of interest to you. Based on the criteria that you have specified, it returns a list of CIP codes.

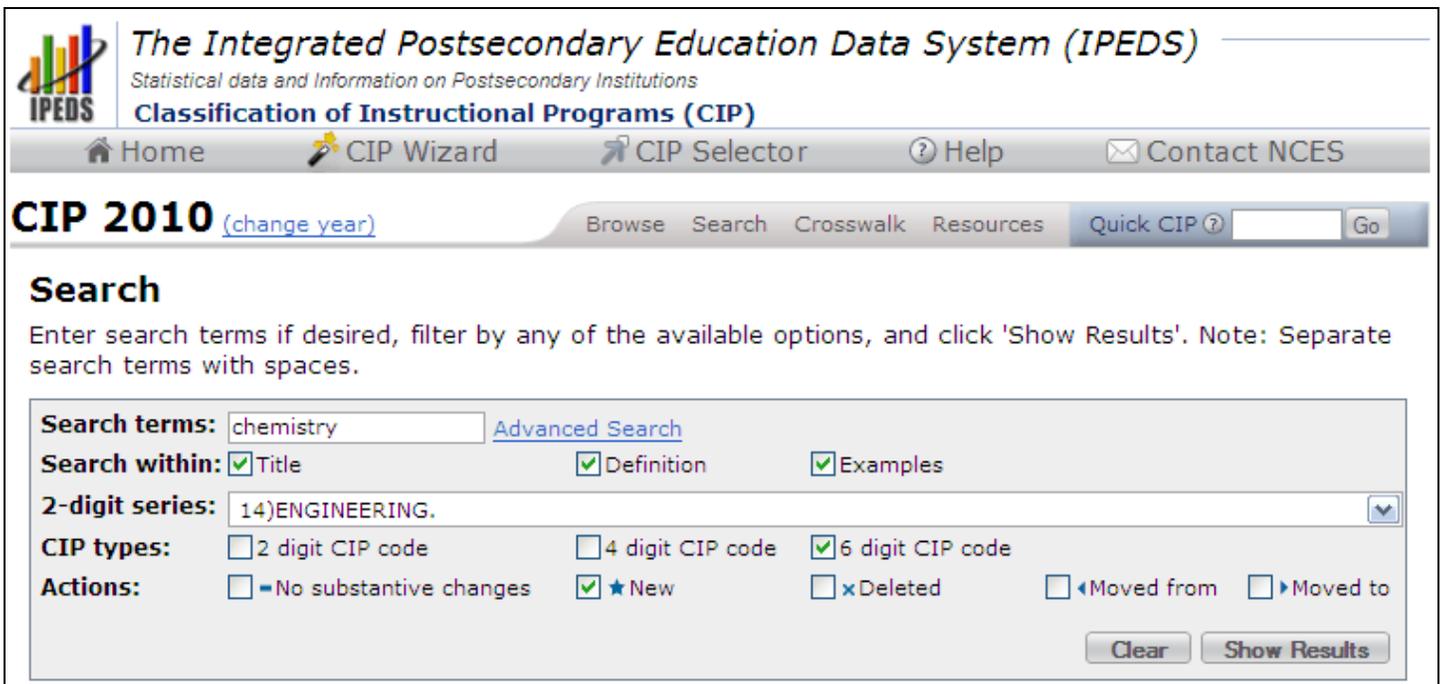

The screenshot shows the top navigation bar of the IPEDS website. The main title is "The Integrated Postsecondary Education Data System (IPEDS)" with the subtitle "Statistical data and Information on Postsecondary Institutions". Below this is "Classification of Instructional Programs (CIP)". The navigation menu includes "Home", "CIP Wizard", "CIP Selector", "Help", and "Contact NCES". A secondary menu shows "CIP 2010 (change year)", "Browse", "Search" (highlighted in yellow), "Crosswalk", "Resources", and a "Quick CIP" search box with a "Go" button.

The specified search options work together to provide the search results.

Search terms are optional, but if they are provided, they will search within the Title, Definition, and Examples as specified.

Results can be narrowed, or filtered, by selecting a 2-digit series, by limiting results to either 2-, 4-, or 6-digit codes, or by choosing only CIP Codes with a certain Action such as "New." These options are described in detail in later sections of the "Help."

In the example below, the user indicated that they want to search for the word "chemistry" within a CIP code's title, definition, and examples. The user specified that they want to search for only new 6-digit CIP codes that include "chemistry" in the title, definition, or examples, and limited their search to the 2-digit Series for Engineering (Series 14).

The screenshot shows the search results page. The top navigation bar is identical to the previous screenshot. Below the navigation bar, the "Search" section is active. It contains the following search criteria:

- Search terms:** chemistry
- Search within:** Title, Definition, Examples
- 2-digit series:** 14)ENGINEERING.
- CIP types:** 2 digit CIP code, 4 digit CIP code, 6 digit CIP code
- Actions:** No substantive changes, ★ New, × Deleted, ◀ Moved from, ▶ Moved to

Buttons for "Clear" and "Show Results" are located at the bottom right of the search criteria section.

The results of this search criteria are shown below.

	<p>Biochemical Engineering. A program that prepares individuals to apply mathematical and scientific principles to the study of biochemical processes in living organisms, properties of biological materials, and processes using biochemical agents such as cells, enzymes, and antibodies. Includes instruction in biology, chemistry, physics, biochemistry, thermodynamics, fluid dynamics, bioprocesses, and chemical engineering.</p> <p><i>Examples: [Biochemical Engineering], [Chemical and Biochemical Engineering]</i></p>	★	14.4301		
	<p>Biological/Biosystems Engineering. A program that prepares individuals to apply mathematical and scientific principles to the design, development and management of biological systems; and includes applications to biology, biochemistry, ecology, and microbiology. Includes instruction in organic chemistry; microbiology; biochemistry; chemical, biological, biochemical, and process engineering; thermodynamics; process control; kinetics and reactor design; electric circuits; biosystem modeling; and bioelectronics and instrumentation.</p> <p><i>Examples: [Biological Engineering], [Biosystems Engineering], [Biological Systems Engineering], [Biomass Engineering], [Biological/Biosystems Engineering]</i></p>	★	14.4501		

Default Options

By default, the search options are selected to return all CIP codes when you click "Show Results."

The screenshot shows the IPEDS website interface. At the top left is the IPEDS logo. The main header reads "The Integrated Postsecondary Education Data System (IPEDS)" with the subtitle "Statistical data and Information on Postsecondary Institutions" and "Classification of Instructional Programs (CIP)". A navigation bar includes links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. Below this is a "CIP 2010" section with a "(change year)" link and a search bar with "Quick CIP" and "Go" buttons. The "Search" section contains instructions: "Enter search terms if desired, filter by any of the available options, and click 'Show Results'. Note: Separate search terms with spaces." The search form includes: "Search terms:" with an input field and a link to "Advanced Search"; "Search within:" with checkboxes for Title, Definition, and Examples, all of which are checked; "2-digit series:" with a dropdown menu set to "All"; "CIP types:" with checkboxes for 2 digit CIP code, 4 digit CIP code, and 6 digit CIP code, all checked; and "Actions:" with checkboxes for No substantive changes, New, Deleted, Moved from, and Moved to, all checked. At the bottom right of the form are "Clear" and "Show Results" buttons.

Search Results

The search results screen lists the criteria used to define your search and your search results. The example shown used the default options and returned results for all CIP codes.

	Accounting and Business/Management. An integrated or combined program in accounting and business administration/management that prepares individuals to function as accountants and business managers. <i>See also: 52.0201 - Business Administration and Management, General., 52.0301 - Accounting.</i>	-	52.0305		

There are several key features to the search results page besides the Search Results Grid. These include a Summary of Search Criteria, the Actions Legend, and Print/Export.

Summary of Search Criteria

The Summary of Search Criteria lists all the options selected in the search box on the previous page.

Summary of Search Criteria
Search terms:
Search within: title, definition, examples
2-Digit CIP Series: All
CIP code types: 2 digit CIP code, 4 digit CIP code, 6 digit CIP code
Actions: No substantive changes, New, Moved from, Moved to, Deleted

Any search terms entered will be listed followed by the selected options for "Search within," "2-Digit CIP Series," "CIP Code Types," and "Actions." If your search results are unexpected, make sure to review the criteria used to create the results.

Actions Legend

The Actions Legend describes the symbols used in the Action column.

Actions Legend
★ New
✕ Deleted
▶ Moved To
◀ Moved From
▬ No Substantive Changes

New codes are indicated by the star icon (★) in the Action column. These codes did not exist in the previous CIP version.

Deleted codes are indicated by the "x" icon (✕) in the Action column. Codes deleted from the previous version are shown for reference. One or more codes may be listed as correct alternatives to use in the new version instead of the deleted code.

Moved CIP codes are in essence the same as the previous version but receive new code numbers because they are located in a different place in the new CIP. The "Moved From" and "Moved To" actions work together to illustrate the old and new locations of the CIP code. The "Moved From" CIP codes have the old code number and are indicated by a left arrow icon (◀). The "Moved To" CIP codes have the new code number and are indicated by a right arrow icon (▶).

Codes with no substantive changes relative to the previous CIP version are indicated by the hash mark icon (▬) in the Action column. These codes have the same CIP code number and usually have the same title but may have an accompanying change to title, definition, or both as indicated by a checkmark (✓) as shown.

Text Changed	Title & Definition	Action	CIP Code	Moved To / Report Under (2010)	Moved From (2000)
	Aerospace, Aeronautical and Astronautical Engineering. Instructional content is defined in code 14.0201.	▬	14.02		
✓	Agricultural Engineering. Instructional content is defined in code 14.0301.	▬	14.03		

Print/Export

The search results may be printed or exported as a CSV file.

2318 records found. Viewing page 1 of 116					Print	Export
Text Changed	Title & Definition	Action	CIP Code	Moved To / Report Under (2010)	Moved From (2000)	

The exported CSV file contains the columns: Text Changed, Title & Definition, Cross References, CIP Code, Action, Moved To/Report Under, Moved From.

	A	B	C	D	E	F	G
1	Text Changed	Title & Definition	Cross References	CIP Code	Action	Moved To/ Report Under	Moved From
2		Environmental Science. A program that focuses on the application of biological, chemical, and physical principles to the study of the physical environment and the solution of environmental problems, including subjects such as abating or controlling environmental pollution and degradation; the interaction between human society and the natural environment; and natural resources management. Includes instruction in biology, chemistry, physics, geosciences, climatology, statistics, and mathematical modeling. Examples: [Bioenvironmental Sciences]	14.1401 - Environmental/Environmental Health Engineering., 26.1305 - Environmental Biology., 26.1307 - Conservation Biology.	03.0104	No substantive changes		

These are the same as the columns shown on screen except that the Cross References column shows the See Also codes that were listed in the Title & Definition column on screen.

Search Results Grid

The number of records matching your search criteria is listed along with the number of pages of results to review. The search results can be sorted by any of the columns in the search results. By default, results are sorted by CIP Title.

2318 records found. Viewing page 1 of 116 Print Export

Text Changed	Title & Definition	Action	CIP Code	Moved To / Report Under (2010)	Moved From (2000)
	Accounting and Business/Management. An integrated or combined program in accounting and business administration/management that prepares individuals to function as accountants and business managers. <i>See also:</i> 52.0201 - Business Administration and Management, General, 52.0301 - Accounting.	-	52.0305		
	Accounting and Computer Science. Instructional content is defined in code 30.1601.	-	30.16		
	Accounting and Computer Science. A program that combines accounting with computer science and/or computer studies. <i>See also:</i> 11.0701 - Computer Science, 52.0301 - Accounting.	-	30.1601		

Text Changed Column

A checkmark will be present in the Text change column if either the title or the definition underwent a notable change relative to the previous version.

Title and Definition Column

The CIP Title is listed and links to the CIP detail page for that CIP code. The definition is listed. If provided, cross reference codes are listed as "See also" followed by the CIP code number and title. These are linked to the CIP detail pages of those CIP codes and should be reviewed to see if they better describe your program. Any illustrative examples specified for the CIP code are also listed. If search terms were provided, they will be shown in bold wherever found within the CIP title, definition, see also codes, or examples.

Action Column

The majority of the CIP codes will be designated as "No Substantive Changes" relative to the previous CIP version. Codes that were added to this version of the CIP are designated as "New." Codes that were removed from the previous version of the CIP are designated as "Deleted." Codes that were relocated will have two references: one in the former location (Moved From) and one in its current location (Moved To).

CIP Code Column

Deleted codes are shown in square brackets [], while Moved codes are shown in parentheses (), since these codes no longer exist in the current CIP.

Codes that were moved to a new location, that are new, or that do not have any substantive changes are shown in regular text.

Moved To/Report Under Column

For moved codes, the current location of a code is shown (Moved To). For deleted codes, one or more "Report Under" codes may be shown. If a Report Under code is provided, please use the one that best describes your program to replace the deleted code. Not all deleted codes will have report under codes specified. Use the other site features such as the Search or the CIP Selector to find a replacement code.

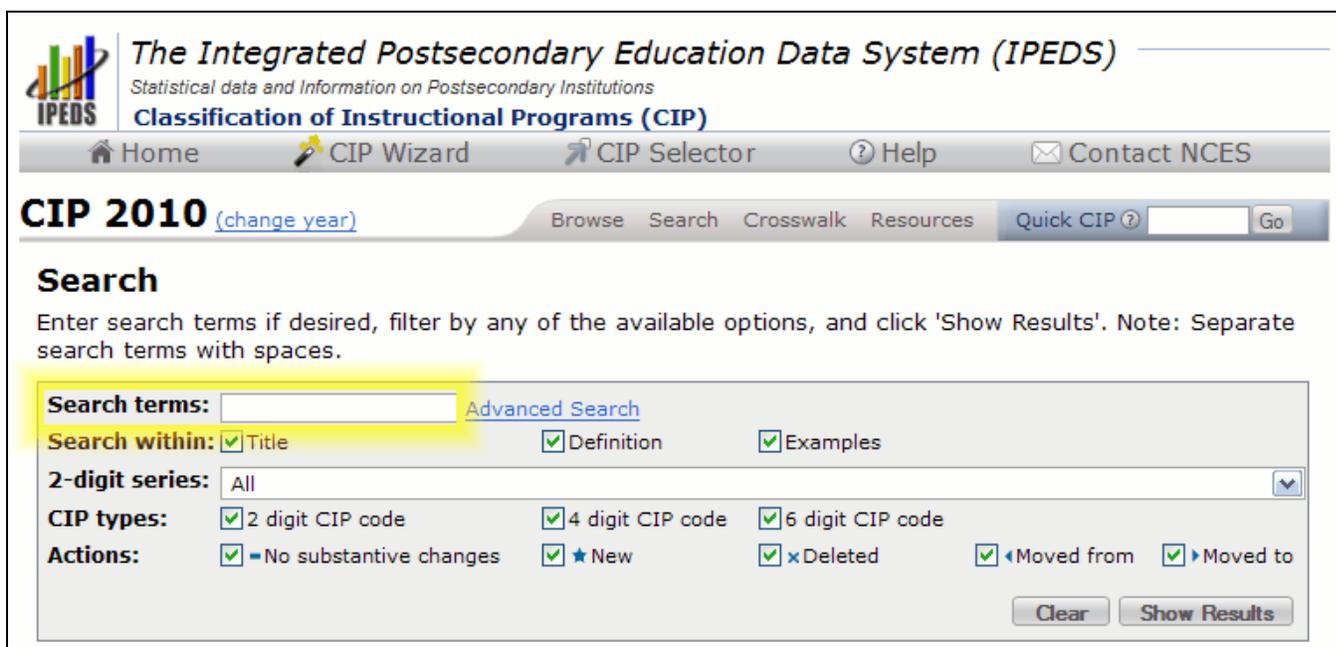

Moved From Column

For moved codes, the former location of the code is shown.

Using Search Terms – Simple Search

The Simple Search contains one “search terms” box. Enter one or more words separated by spaces or commas. Results will be returned that contain ALL of the words entered. If no results are returned, reduce the number of terms entered.

Search terms are optional. Clicking “Show Results” without specifying any search terms will return all CIP codes in the search results.

The screenshot shows the IPEDS website interface. At the top, there is a navigation bar with links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. Below this is a section for "CIP 2010" with a "change year" link and a "Quick CIP" search box. The main content area is titled "Search" and includes instructions: "Enter search terms if desired, filter by any of the available options, and click 'Show Results'. Note: Separate search terms with spaces." The search form contains the following fields and options:

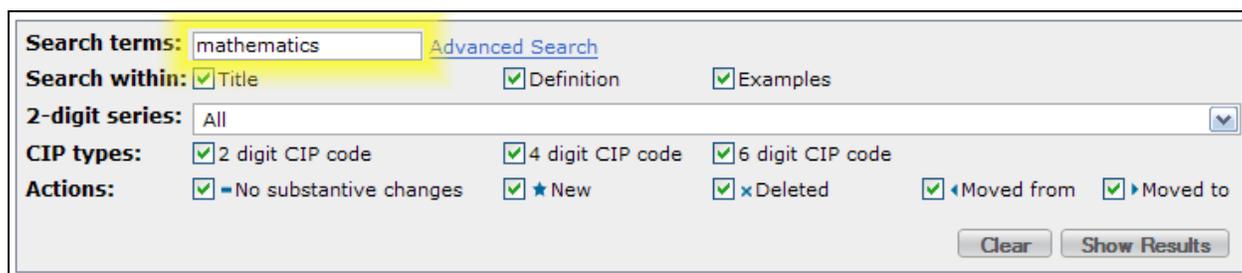

- Search terms:** A text input field, currently empty, highlighted in yellow. To its right is a link for "Advanced Search".
- Search within:** Three checkboxes are checked: "Title", "Definition", and "Examples".
- 2-digit series:** A dropdown menu set to "All".
- CIP types:** Three checkboxes are checked: "2 digit CIP code", "4 digit CIP code", and "6 digit CIP code".
- Actions:** Five checkboxes are checked: "No substantive changes", "New", "Deleted", "Moved from", and "Moved to".

At the bottom right of the search form are two buttons: "Clear" and "Show Results".

One search term

To find any CIP code containing a word within its Title, Definition, or Examples, enter the word and click “Show Results.”

Enter “mathematics” and click “Show Results.”

This screenshot shows the same search interface as above, but with the search terms field now containing the word "mathematics". The field is still highlighted in yellow. All other search criteria and options remain the same as in the previous screenshot.

The Summary of Search Criteria lists "mathematics" next to the Search terms. The search terms are in bold within the Title & Definition column.

Note that there are 45 records matching "mathematics."

None of the words:

Search within: Title Definition Examples

2-digit series:

CIP types: 2 digit CIP code 4 digit CIP code 6 digit CIP code

Actions: -No substantive changes ★ New x Deleted ◀ Moved from ▶ Moved to

There were 573 results returned that match either the word "business" or the word "management." Searching just for "business" results in 211 records, and searching just for "management" results in 445 records for a total of 656 records. To equal the 573 results returned in this example, we must subtract the number of records that match both words (83 from previous example).

Notice that these 573 results include results containing both of the words business and management, results containing the exact phrase "business management," results containing only the word "business", and results containing only the word "management."

	Accounting. A program that prepares individuals to practice the profession of accounting and to perform related business functions. Includes instruction in accounting principles and	-	52.0301		
	Actuarial Science. A program that focuses on the mathematical and statistical analysis of risk, and their applications to insurance and other business management problems. Includes instruction in forecasting theory, quantitative and non-quantitative risk measurement	-	52.1304		

None of the words

This option cannot be used alone. It must be used in conjunction with one of the other advanced search options: All of the words, Exact Phrase, or At least one of the words. If you receive too many search results using the other search options, you can narrow your results by also adding words to exclude by entering them into the "None of the words."

If, for example, you searched for CIP codes containing "All of the words: business, management" you would received 83 records which may be too many to easily find the desired program.

For our example, we see some results that contain the word "accounting" which has nothing to do with our desired search result, so we can search with "accounting" in the "None of the words box" to exclude results containing that word.

Using Search within

If search terms are specified, a search may be limited to return results based on search terms within only the CIP title, only the CIP definition, only the CIP illustrative examples, or any combination of those. *Note: If none are selected, the system will interpret it as having all of them selected; otherwise, there would be no matches..*

The same "Search within" options are available within the Simple Search and within the Advanced Search as shown.

Simple Search

Search terms: [Advanced Search](#)

Search within: Title Definition Examples

2-digit series: All

CIP types: 2 digit CIP code 4 digit CIP code 6 digit CIP code

Actions: No substantive changes ★ New × Deleted ◀ Moved from ▶ Moved to

Advanced Search

Search terms: [Simple Search](#)

All of the words:

Exact phrase:

At least one of the words:

None of the words:

Search within: Title Definition Examples

2-digit series: All

CIP types: 2 digit CIP code 4 digit CIP code 6 digit CIP code

Actions: No substantive changes ★ New × Deleted ◀ Moved from ▶ Moved to

Enter "business management" and make sure only the "Title" box is selected for "Search Within."

Search terms: [Advanced Search](#)

Search within: Title Definition Examples

2-digit series:

CIP types: 2 digit CIP code 4 digit CIP code 6 digit CIP code

Actions: =No substantive changes ★ New × Deleted ◀ Moved from ▶ Moved to

Instead of the 83 records returned in a previous example without a title-only search, there are 11 records returned. Every title contains both of the words "business" and "management."

Moved From/Moved To

To see only CIP codes that were moved, make sure the "Moved from" and "Moved to" boxes are the only boxes checked beside "Actions."

The screenshot shows a search interface with the following settings:

- Search terms:** [Empty text box] [Advanced Search](#)
- Search within:** Title Definition Examples
- 2-digit series:** All
- CIP types:** 2 digit CIP code 4 digit CIP code 6 digit CIP code
- Actions:** No substantive changes ★ New × Deleted ◀ Moved from ▶ Moved to

Buttons: Clear Show Results

Codes that were moved have a different CIP code number in this version than they did in the previous version. It is also possible that the CIP code underwent a change to its Title or Definition in addition to being moved. A checkmark will be in the Text Change column if this is the case.

Two records exist for moved codes: one showing where it appeared in the previous version and another showing how it appears in the current version.

CIP codes marked as "Moved from" show the code as it was in the previous version much like the deleted codes. The code number is listed in parentheses because that number no longer exists in the current version of the CIP. Refer to the Moved To/Report Under column for its code number in the current version of the CIP.

Codes marked as "Moved to" show the code in its new location. Like new codes, the code number assigned to this code did not exist in the previous version; however, the CIP code itself existed, just with a different code number.

Crosswalk

The crosswalk provides a side-by-side comparison of the previous and current CIP versions. It is consistently available via the navigation bar as shown.

The screenshot shows the top navigation bar of the IPEDS website. The logo on the left reads "The Integrated Postsecondary Education Data System (IPEDS) Statistical data and Information on Postsecondary Institutions Classification of Instructional Programs (CIP)". The navigation menu includes "Home", "CIP Wizard", "CIP Selector", "Help", and "Contact NCES". Below the menu, the "CIP 2010" link is followed by a "(change year)" link. A secondary navigation bar contains "Browse", "Search", "Crosswalk", and "Resources". The "Crosswalk" link is highlighted with a yellow box. To the right is a "Quick CIP" search box with a "Go" button.

After clicking "Crosswalk," users may select to view all codes, all codes in one 2-digit series from the previous version, or a single code. The results are shown on screen and can be printed or exported.

The screenshot shows the "Crosswalk" page on the IPEDS website. The navigation bar is identical to the previous screenshot, with "Crosswalk" selected. Below the navigation bar, the page title is "Crosswalk". The main content area contains the following text: "View the crosswalk for all codes, a single 2-digit series, or a single CIP code by making the appropriate selections and clicking 'Show Results'." Below this text is a form titled "CIP Code Crosswalk Search between CIP 2000 and CIP 2010". The form has three radio button options: "All codes" (selected), "2-digit series (CIP 2000):" with a dropdown menu showing "01) AGRICULTURE, AGRICULTURE OPERATIONS, AND RELATED SCIENCES.", and "Single code:" with a text input field and the instruction "(##. or ##.## or ##.####)". A "Show Results" button is located at the bottom right of the form.

All Codes

The default option on the Crosswalk page is "All Codes." Click "Show Results" to see to full Crosswalk on the screen. All codes in the previous version (CIP 2000) are mapped to the current version (CIP 2010).

Results Display

CIP code numbers and titles from the previous CIP version are shown on the left-hand side of the crosswalk. These code numbers determine how the crosswalk is sorted. The corresponding CIP code number and title in the current CIP version is shown on the right-hand side along with information about what happened to that code between the two versions including the action and whether the code's title or definition was changed.

New code

New codes are indicated by the star icon (★) in the Action column. These codes have no corresponding entry in the columns for the previous version.

Current Version

General information is provided for CIP 2010 including the Introduction, Acknowledgements, and Help file.

Online resources for the current CIP version are listed. Links to the Browse, Search, and Crosswalk features are repeated here. They are also available from the homepage and the navigation bar. Links to New, Moved, or Deleted codes are shown here as well as on the homepage.

Several Download files are also available for the current CIP version. These include the complete Crosswalk file and the complete 2010 CIP both in Excel and in Word.

The screenshot shows the IPEDS website interface. At the top left is the IPEDS logo. The main header reads "The Integrated Postsecondary Education Data System (IPEDS)" with the subtitle "Statistical data and Information on Postsecondary Institutions" and "Classification of Instructional Programs (CIP)". A navigation bar includes links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. Below this, the current selection is "CIP 2010" with a "(change year)" link. A secondary navigation bar contains "Browse", "Search", "Crosswalk", "Resources", and a "Quick CIP" search box with a "Go" button. The "Resources" section is highlighted in yellow and contains a link for "2000-2010 CIP Conversion". Below this, a text box states: "Information on the selected CIP version is available below. To access resources for other CIP versions created after CIP 2000, click the 'change year' link above." The page is organized into three sections: "General" with links for Introduction, Acknowledgements, and Help; "Online" with links for Browse all CIP codes, Search CIP codes, View Crosswalk 2000-2010, View NEW CIP codes, View DELETED CIP codes, and View MOVED CIP codes; and "Download" with links for Crosswalk 2000-2010, CIPCode 2010 (Excel), and CIPCode 2010 (Word).

This file contains the same information as is shown online by viewing the Crosswalk and selecting to "All Codes" and clicking "Show Results."

The left-hand columns list the CIP code number and title of that CIP code in the previous version. The CIP Code column for the previous version sorts the file. Blanks in these columns are placeholders for new codes in the current version.

The middle columns indicate what happened to the code during the conversion (No substantive changes, New, Deleted, Moved To) and whether or not the CIP Title or Definition Changed as indicated by a "yes" or "no" in the "Text change" column.

The right-hand columns show the corresponding CIP code number and title in the current CIP version. Deleted codes are listed with a title of "Deleted" and may also include additional information regarding where to report that code in the current version.

CIP (CSV)

The Crosswalk file (CIPCode 2010) contains the complete listing in CSV format. This information is similar to what is shown in the search results and on the CIP detail page.

	A	B	C	D	E	F	G	H
1	CIPFamily	CIPCode	Action	TextChange	CIPTitle	CIPDefinition	CrossReferences	Examples
2	01	01	No substantive changes	no	AGRICULTURE, AGRICULTURE OPERATIONS, AND RELATED SCIENCES.	Instructional programs that focus on agriculture and related sciences and that prepare individuals to apply specific knowledge, methods, and techniques to the management and performance of agricultural operations.		
3	01	01.00	No substantive changes	no	Agriculture, General.	Instructional content is defined in code 01.0000.		
4	01	01.0000	No substantive changes	no	Agriculture, General.	A program that focuses on the general principles and practice of agricultural research and production and that may prepare individuals to apply this knowledge to the solution of practical agricultural problems. Includes instruction in basic animal, plant, and soil science; animal husbandry and plant cultivation; soil conservation; and agricultural operations such as farming, ranching, and agricultural business.	14.0301 - Agricultural Engineering.	
5	01	01.01	No substantive changes	no	Agricultural Business and Management.	Instructional content for this group of programs is defined in codes 01.0101 - 01.0199.		
6	01	01.0101	No substantive changes	no	Agricultural Business and Management, General.	A general program that focuses on modern business and economic principles involved in the organization, operation, and management of agricultural enterprises.		
7	01	01.0102	No substantive changes	no	Agribusiness/Agricultural Business Operations.	A program that prepares individuals to manage agricultural businesses and agriculturally related operations within diversified corporations. Includes instruction in agriculture, agricultural specialization, business management, accounting, finance, marketing, planning, human resources management, and other managerial responsibilities.		Examples: - Agricultural Systems Management
8	01	01.0103	No substantive changes	no	Agricultural Economics.	A program that focuses on the application of economics to the analysis of resource allocation, productivity, investment, and trends in the agricultural sector, both domestically and internationally. Includes instruction in economics and related subfields as well as applicable agricultural fields.	03.0204 - Natural Resource Economics	Examples: - Agricultural Systems Management

The CIPFamily column was added for reference to the 2-digit series to which the code belongs. The CrossReferences column represents the information listed as "See also" in the search results and on the CIP detail page. These codes should be reviewed to see if they better represent your program. The Examples column shows the information listed as "Examples" in the search results and as "Illustrative Examples" on the CIP detail page. These are meant to provide additional information to aid in selecting the correct program code; however, these are not a comprehensive list of programs that would be reported for that CIP code.

CIP (Word)

The CIP file (CIPCode 2010) contains the complete listing in Word format. Click the link to open the file or to save it to your computer. CIP codes are listed in numeric order by CIP code number. This file includes references to deleted codes and former locations of moved codes as well as the new codes, new locations of moved codes, and codes that did not change substantively between versions.

National Center for Education Statistics **Classification of Instructional Programs - 2010**

01 AGRICULTURE, AGRICULTURE OPERATIONS, AND RELATED SCIENCES. (No substantive changes)
Instructional programs that focus on agriculture and related sciences and that prepare individuals to apply specific knowledge, methods, and techniques to the management and performance of agricultural operations.

01.00 Agriculture, General. (No substantive changes)
Instructional content is defined in code 01.0000.]

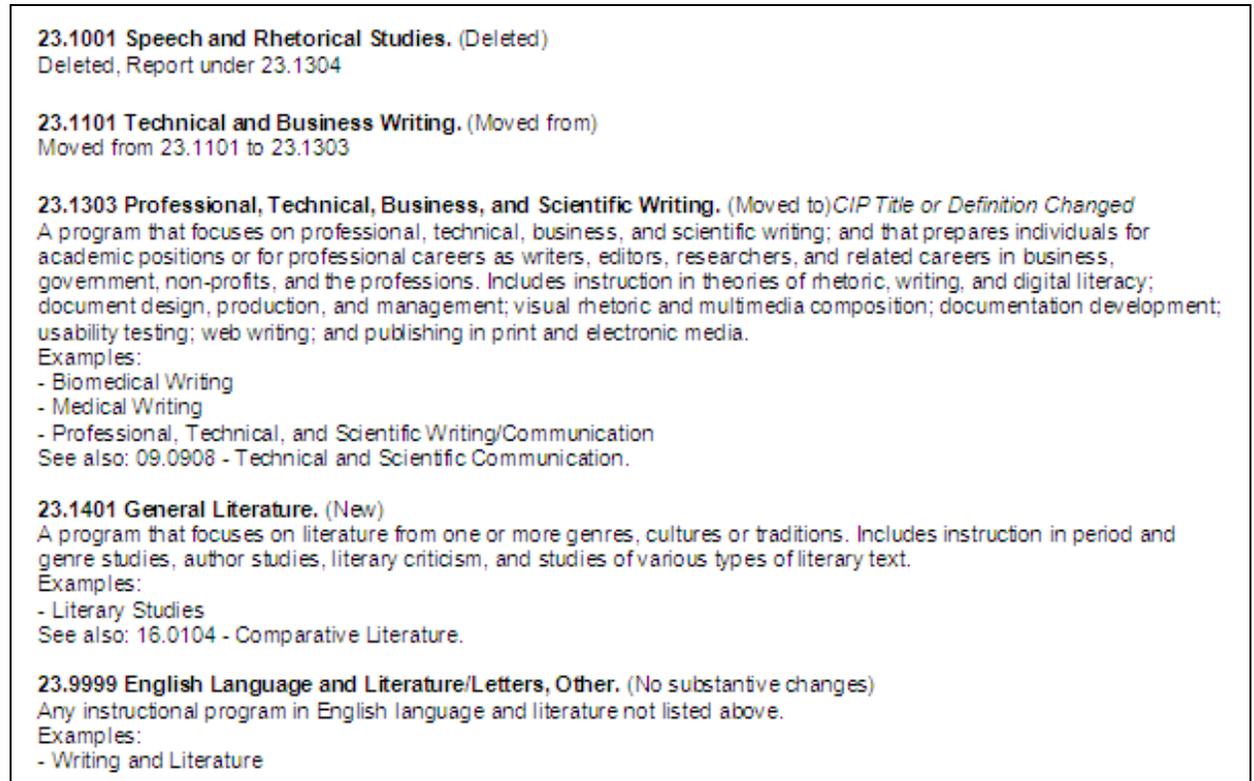

01.0000 Agriculture, General. (No substantive changes)
A program that focuses on the general principles and practice of agricultural research and production and that may prepare individuals to apply this knowledge to the solution of practical agricultural problems. Includes instruction in basic animal, plant, and soil science; animal husbandry and plant cultivation; soil conservation; and agricultural operations such as farming, ranching, and agricultural business.
See also: 14.0301 - Agricultural Engineering.

01.01 Agricultural Business and Management. (No substantive changes)
Instructional content for this group of programs is defined in codes 01.0101 - 01.0199.

01.0101 Agricultural Business and Management, General. (No substantive changes)
A general program that focuses on modern business and economic principles involved in the organization, operation, and management of agricultural enterprises.

01.0102 Agribusiness/Agricultural Business Operations. (No substantive changes)
A program that prepares individuals to manage agricultural businesses and agriculturally related operations within diversified corporations. Includes instruction in agriculture, agricultural specialization, business management, accounting, finance, marketing, planning, human resources management, and other managerial responsibilities.
Examples:
- Agricultural Systems Management

The following image illustrates how each type of code is represented in the Word document.

Deleted codes are indicated by (Deleted) following the CIP code and title from the previous version. If available, the code or codes to be used in the current version are listed.

New codes are indicated by (New) following the CIP code and title from the current version.

Codes that moved to a different code number between CIP versions are listed in two places. The code number and title used in the previous version is followed by (Moved From) and is listed along with the code number in the current version. For detailed information about the code, please reference the code number in the current version. The current code number and title of the moved code is followed by (Moved To) and the complete information about that code.

Codes that did not change at all between versions are indicated by (No substantive changes) following the CIP title.

Codes that had a change to the title or definition are indicated by the text "CIP Title or Definition Changed" following the CIP title and action, if applicable.

Archive & Historical

The CIP website begins with the CIP 2010. The Archive and Historical section lists links to online information about prior versions of the CIP. Download files are also available.

Quick CIP

The Quick CIP allows you to quickly view the details about one CIP code. It is consistently available via the navigation bar as shown.

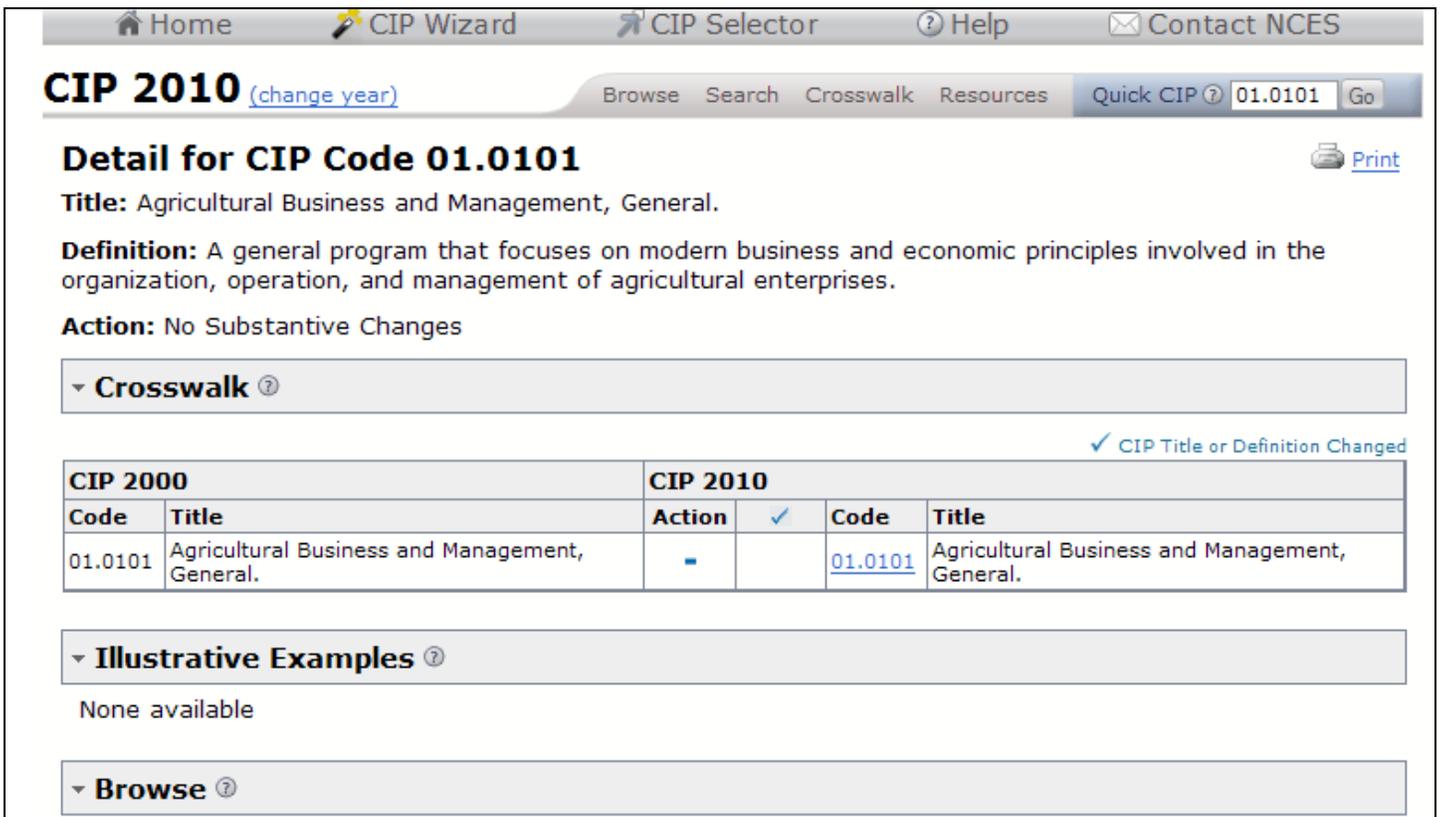

The screenshot shows the top navigation bar of the IPEDS website. The header includes the IPEDS logo and the text "The Integrated Postsecondary Education Data System (IPEDS) Statistical data and Information on Postsecondary Institutions Classification of Instructional Programs (CIP)". Below the header is a navigation menu with links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. A secondary navigation bar contains "CIP 2010 (change year)", "Browse", "Search", "Crosswalk", "Resources", and a "Quick CIP" search box with a "Go" button. The search box and "Go" button are highlighted in yellow.

CIP codes should be entered in the following formats for 2-, 4-, and 6-digit codes: 01, 01.01, and 01.0101.

This screenshot is similar to the previous one, but the "Quick CIP" search box now contains the code "01.0101". The "Go" button remains highlighted in yellow.

After entering a CIP code, click "Go" to view the detail page for that CIP code.

The screenshot displays the detail page for CIP Code 01.0101. The navigation bar at the top is identical to the previous screenshots, but the "Quick CIP" search box now contains "01.0101" and the "Go" button is no longer highlighted. The main content area features a "Detail for CIP Code 01.0101" section with a "Print" icon. Below this, the "Title" is "Agricultural Business and Management, General." and the "Definition" is "A general program that focuses on modern business and economic principles involved in the organization, operation, and management of agricultural enterprises." The "Action" is "No Substantive Changes". A "Crosswalk" section is expanded, showing a table with the following data:

CIP 2000		CIP 2010			
Code	Title	Action	✓	Code	Title
01.0101	Agricultural Business and Management, General.	-		01.0101	Agricultural Business and Management, General.

Below the table, there are sections for "Illustrative Examples" (None available) and "Browse". A blue checkmark and text "CIP Title or Definition Changed" are visible in the upper right of the crosswalk section.

CIP Detail

The CIP Detail page contains all the available information about any one CIP code in the selected version of the CIP. The CIP Detail page is directly accessible from the Quick CIP and is linked from the Search Results and the Crosswalk Results.

Detail for CIP Code 14.1201 [Print](#)

Title: Engineering Physics/Applied Physics.

Definition: A program focusing on the use of physics principles in the analysis and evaluation of engineering problems and other scientific applications. Includes instruction in high- and low-temperature phenomena, computational physics, superconductivity, applied thermodynamics, molecular and particle physics applications, and space science research.
 See also: [40.0801\) Physics, General.](#)

Action: No Substantive Changes

Text Change: CIP title or definition was updated

Crosswalk

A "Single Code" view of the Crosswalk is provided to show the CIP code and title from the previous version and the current version. See the "Crosswalk > Single Code" section for more information.

Change Year

By default, this web site shows the most current version of the CIP. At the time of release in June 2009, that version is CIP 2010. The web site will show subsequent versions of the CIP which may not be released for several years. Once additional versions beyond CIP 2010 are released, they can also be viewed from this site while maintaining the ability to view earlier versions such as CIP 2010.

The screenshot shows the top portion of the IPEDS website. The header includes the IPEDS logo, the title "The Integrated Postsecondary Education Data System (IPEDS)", and the subtitle "Statistical data and Information on Postsecondary Institutions". Below this is the "Classification of Instructional Programs (CIP)" section. A navigation bar contains links for "Home", "CIP Wizard", "CIP Selector", "Help", and "Contact NCES". At the bottom of the navigation bar, "CIP 2010" is displayed with a "(change year)" link next to it. To the right of "CIP 2010" are links for "Browse", "Search", "Crosswalk", and "Resources", followed by a "Quick CIP" search box with a "Go" button.

To see the other versions that can be viewed on this web site, click "change year" and then select the link for the desired CIP version. Regardless of the page from which this option was selected you will be taken to the home page for that version of the CIP.

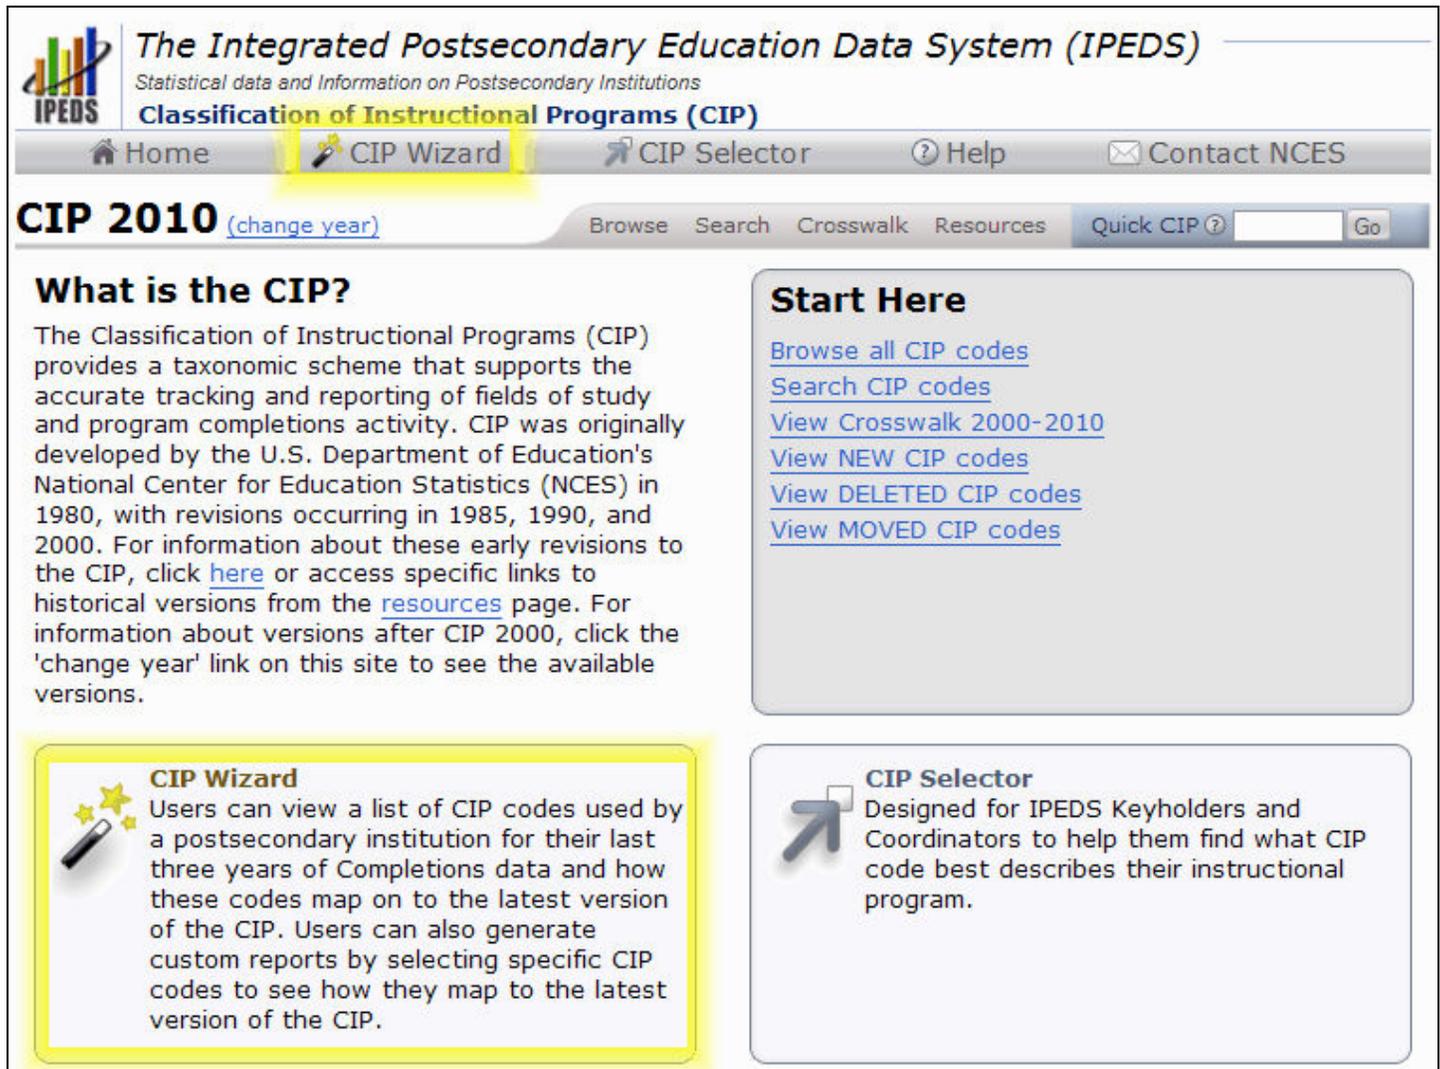

This screenshot shows the same IPEDS website header as the previous image, but with a dialog box open. The dialog box is titled "Change CIP year to:" and contains the text: "Selecting a different year will take you to the homepage for that CIP version." Below this text is a list of years, with "2010" highlighted in yellow. The background of the website is slightly blurred, showing the "Start Here" section with links like "Browse all CIP codes" and "Search CIP codes".

For information on versions of the CIP prior to CIP 2010, click the "Resources" link and scroll down to the "Archived and Historical" section for links to that data.

CIP Wizard

To easily find out what happened to only the CIP codes of interest to you, use the CIP Wizard. Users can view a list of CIP codes used by a postsecondary institution for their last three years of Completions data and how these codes map on to the latest version of the CIP. Users can also generate custom reports by selecting, uploading, or pasting specific CIP codes to see how they map to the latest version of the CIP.

The CIP Wizard can be accessed from the homepage of the CIP web site or via the navigation bar throughout the site as shown.

The screenshot shows the IPEDS website interface. At the top left is the IPEDS logo. The main header reads "The Integrated Postsecondary Education Data System (IPEDS)" with the subtitle "Statistical data and Information on Postsecondary Institutions". Below this is the "Classification of Instructional Programs (CIP)" section. A navigation bar contains links for Home, CIP Wizard (highlighted with a yellow box), CIP Selector, Help, and Contact NCES. Below the navigation bar, the page title is "CIP 2010" with a "(change year)" link. A secondary navigation bar includes "Browse", "Search", "Crosswalk", "Resources", and a "Quick CIP" search box with a "Go" button. The main content area is divided into two columns. The left column has a section titled "What is the CIP?" followed by a paragraph explaining the CIP's history and purpose. The right column has a "Start Here" section with several blue links: "Browse all CIP codes", "Search CIP codes", "View Crosswalk 2000-2010", "View NEW CIP codes", "View DELETED CIP codes", and "View MOVED CIP codes". At the bottom of the page, there are two callout boxes. The left box, titled "CIP Wizard" and highlighted with a yellow border, contains an icon of a wand and stars, and text describing the tool's function. The right box, titled "CIP Selector" and highlighted with a blue border, contains an icon of a cursor pointing to a document and text describing its purpose for keyholders and coordinators.

What is the CIP?
The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985, 1990, and 2000. For information about these early revisions to the CIP, click [here](#) or access specific links to historical versions from the [resources](#) page. For information about versions after CIP 2000, click the 'change year' link on this site to see the available versions.

CIP Wizard
Users can view a list of CIP codes used by a postsecondary institution for their last three years of Completions data and how these codes map on to the latest version of the CIP. Users can also generate custom reports by selecting specific CIP codes to see how they map to the latest version of the CIP.

CIP Selector
Designed for IPEDS Keyholders and Coordinators to help them find what CIP code best describes their instructional program.

Identify Institution

Begin by identifying your institution by UnitID or name. Non-institution personnel may select any school to begin.

By UNITID

You may enter a valid UNITID and click "Go" to begin.

CIP WIZARD

- Select University of Illinois University Administration Urbana, IL
- Select UTI of Illinois Inc Glendale Heights, IL

“Searching...” message

Entering text with a large number of matches, such as “college” or “university,” will result in a “Searching...” message while the results are being compiled. If the searching message appears, wait for your results to be returned. Continue typing to narrow the search or enter different text to begin a new search. As text is typed, there may be a delay in seeing it display on screen if the first several characters initiate a large search.

Institution:
college
Searching...

Search results do not match entered text

Occasionally, search results will be returned that do not match the entered text. Variations in institutions' names, abbreviations, and common misspellings are searched by the system, so these may still return results without any underlined text.

Institution:
Illinios
Select University of Illinois at Urbana-Champaign *Champaign, IL*

Institution:
International School of Health and Beauty
Select Superior Career Institute *Lauderdale Lakes, FL*

Choose Report

Two types of reports are available.

One option, "**Get My CIP Code Report**" generates a report based on the CIP codes your selected institution submitted for the last three IPEDS Completion Surveys.

The other option, "**Create Custom CIP Code Summary Report**" allows greater flexibility in which CIP codes are used to generate the report. A list of codes may be uploaded, pasted into the application, or selected from a list of codes. Additionally, codes matching those on the pre-defined list can be selected and modified.

Select the desired option and click "Next." To choose another institution, click "Wizard Home" in the navigation bar.

Wizard Home Help

Main Menu

Please select which type of report you would like to create and click 'Next.'

What would you like to do?

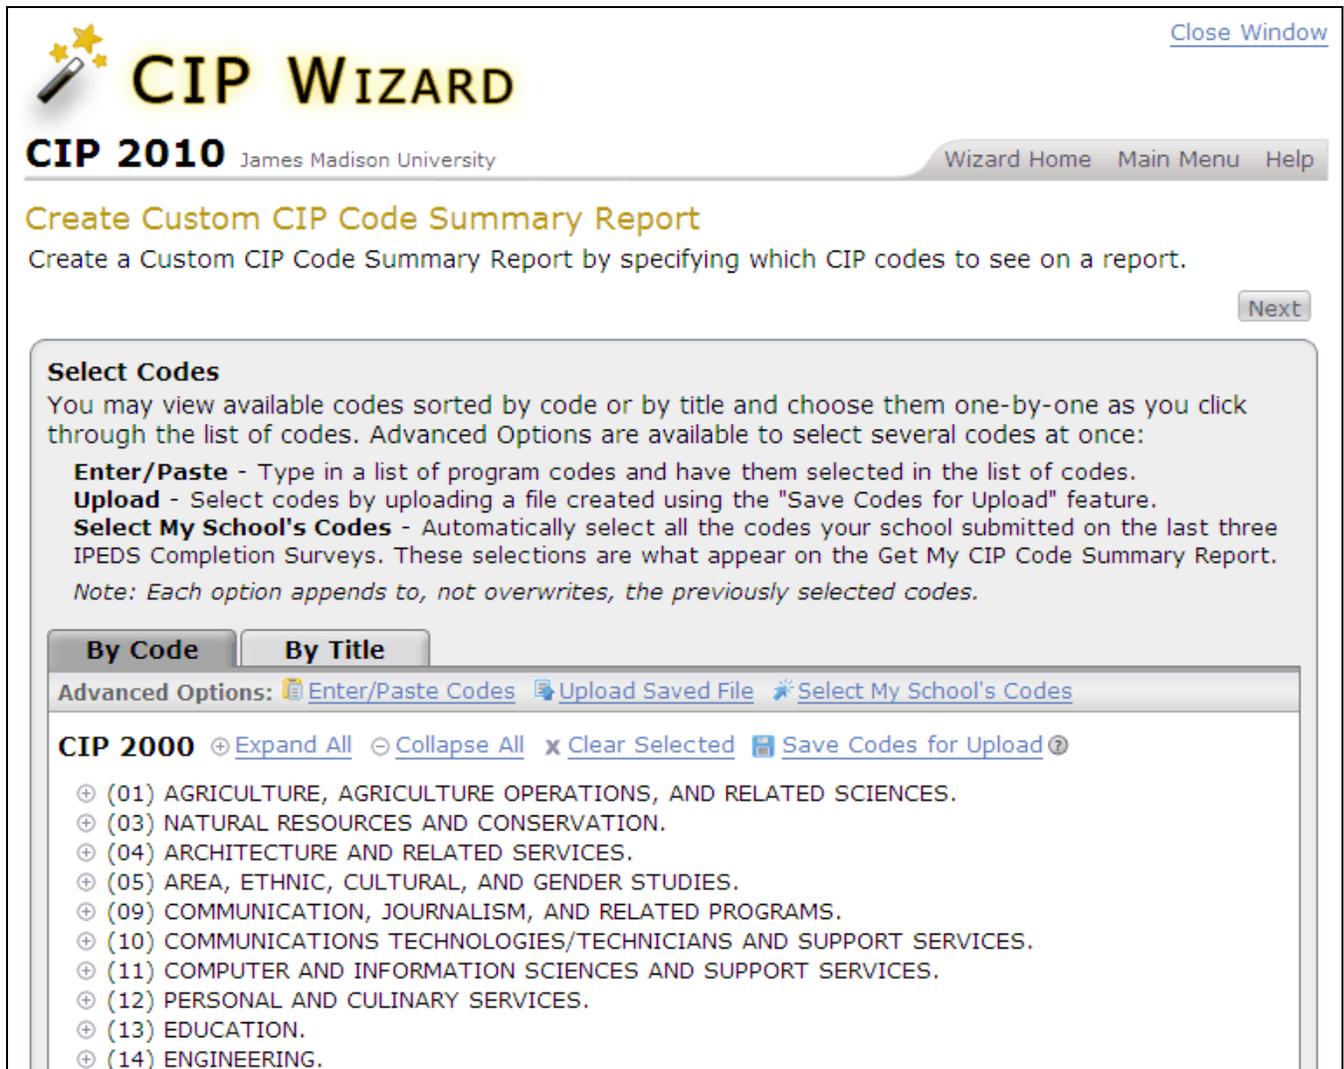

- Get My CIP Code Summary Report**
Select this option to view a report based on the CIP codes your institution submitted for the last three IPEDS Completion Surveys.
- Create Custom CIP Code Summary Report**
Select this option to specify which CIP codes to see on a report by uploading, pasting, or selecting codes one-by-one.

Next

Create Custom Report

To Create a Custom CIP Code Summary Report, you will specify which CIP Codes to include in the report. There are several ways to specify the CIP codes to be included: choose them one-by-one by clicking through the list, enter/paste a list of codes, upload a file with a list of codes, or choose to have the codes your institution submitted on the last 3 Completions surveys selected for you. You may use a combination of these methods to identify your list.

The initial view shows all the CIP Codes from the previous CIP version listed in order by code number. Click the "Title" tab to see an alphabetical listing of the codes. Since the CIP 2010 is the current CIP version, the CIP 2000 codes are listed below for selection.

The screenshot shows the 'CIP WIZARD' interface for James Madison University. The main heading is 'CIP 2010' with a 'Close Window' link in the top right. Navigation links include 'Wizard Home', 'Main Menu', and 'Help'. The current page is titled 'Create Custom CIP Code Summary Report' with a sub-heading 'Create a Custom CIP Code Summary Report by specifying which CIP codes to see on a report.' and a 'Next' button.

Select Codes
You may view available codes sorted by code or by title and choose them one-by-one as you click through the list of codes. Advanced Options are available to select several codes at once:

- Enter/Paste** - Type in a list of program codes and have them selected in the list of codes.
- Upload** - Select codes by uploading a file created using the "Save Codes for Upload" feature.
- Select My School's Codes** - Automatically select all the codes your school submitted on the last three IPEDS Completion Surveys. These selections are what appear on the Get My CIP Code Summary Report.

Note: Each option appends to, not overwrites, the previously selected codes.

Sorting tabs: **By Code** (selected) | **By Title**

Advanced Options: [Enter/Paste Codes](#) | [Upload Saved File](#) | [Select My School's Codes](#)

CIP 2000 [Expand All](#) | [Collapse All](#) | [Clear Selected](#) | [Save Codes for Upload](#)

- (01) AGRICULTURE, AGRICULTURE OPERATIONS, AND RELATED SCIENCES.
- (03) NATURAL RESOURCES AND CONSERVATION.
- (04) ARCHITECTURE AND RELATED SERVICES.

Enter/Paste

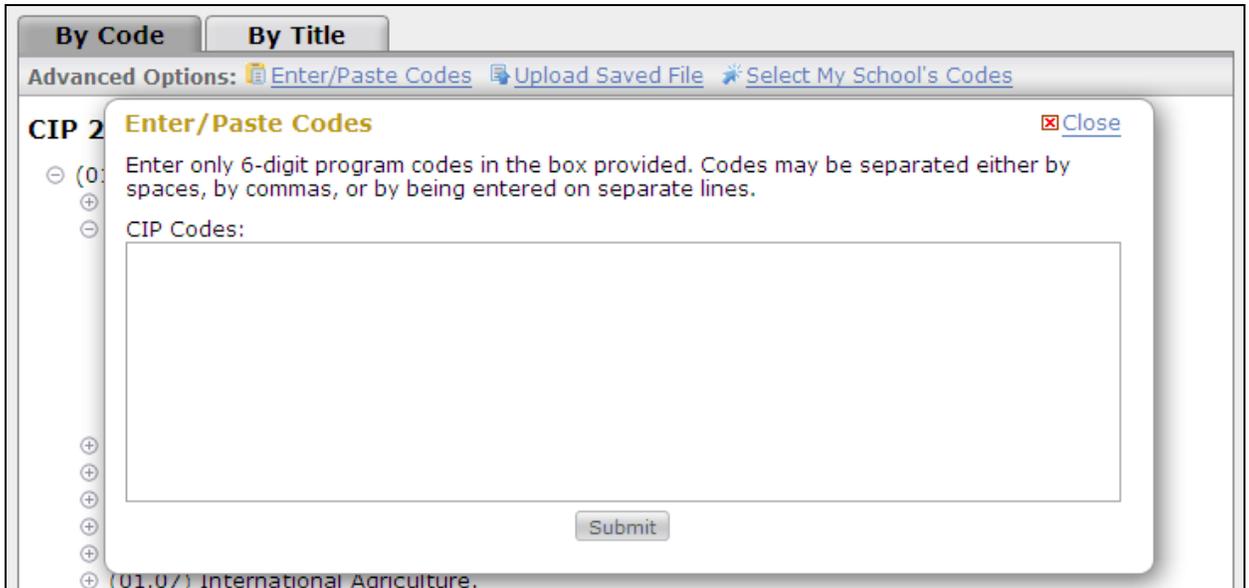

If you already have a list of 6-digit program codes in electronic format, you can paste them into the Enter/Paste box to select them at once instead of selecting them individually. You may also type them in if desired. Choose "Enter/Paste Codes" from the Advanced Options to begin.

By Code **By Title**

Advanced Options: [Enter/Paste Codes](#) [Upload Saved File](#) [Select My School's Codes](#)

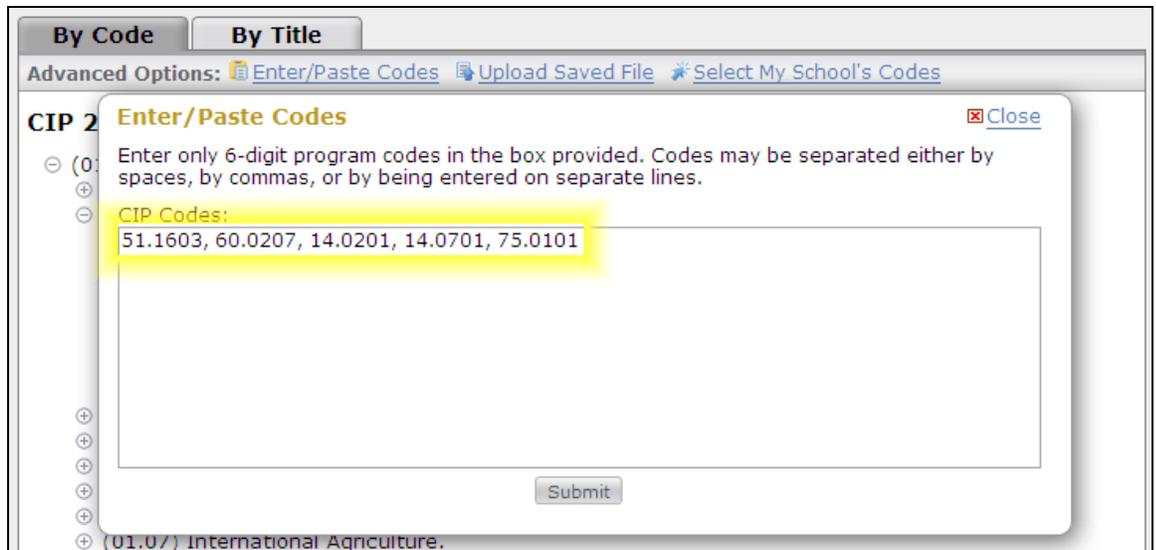

The "Enter/Paste Codes" window will open over your existing selections as shown.

Any 6-digit program code may be entered. Please enter the list of codes separated either by commas, by spaces, or by being entered on separate lines. Click "Submit," read the confirmation/error message, then close the window.

Acceptable formats

You may enter a list of 6-digit codes separated by commas.

You may enter a list of 6-digit codes separated by spaces.

The screenshot shows a web interface with two tabs: "By Code" and "By Title". Below the tabs is a header with "Advanced Options:" and three links: "Enter/Paste Codes", "Upload Saved File", and "Select My School's Codes". A dialog box titled "CIP 2 Enter/Paste Codes" is open, featuring a "Close" button in the top right. The dialog contains the instruction: "Enter only 6-digit program codes in the box provided. Codes may be separated either by spaces, by commas, or by being entered on separate lines." Below this is a text input field with the value "51.1603 60.0207 14.0201 14.0701 75.0101" highlighted in yellow. A "Submit" button is located at the bottom right of the dialog. On the left side of the dialog, there are expand/collapse icons and a partially visible list item: "(01.07) International Agriculture."

You may enter a list of 6-digit codes separated by line breaks.

This screenshot is identical to the one above, showing the "CIP 2 Enter/Paste Codes" dialog box. However, the text input field now contains the same five 6-digit codes, each on a separate line: "51.1603", "60.0207", "14.0201", "14.0701", and "75.0101". The entire input area is highlighted in yellow.

Confirmation/Error messages

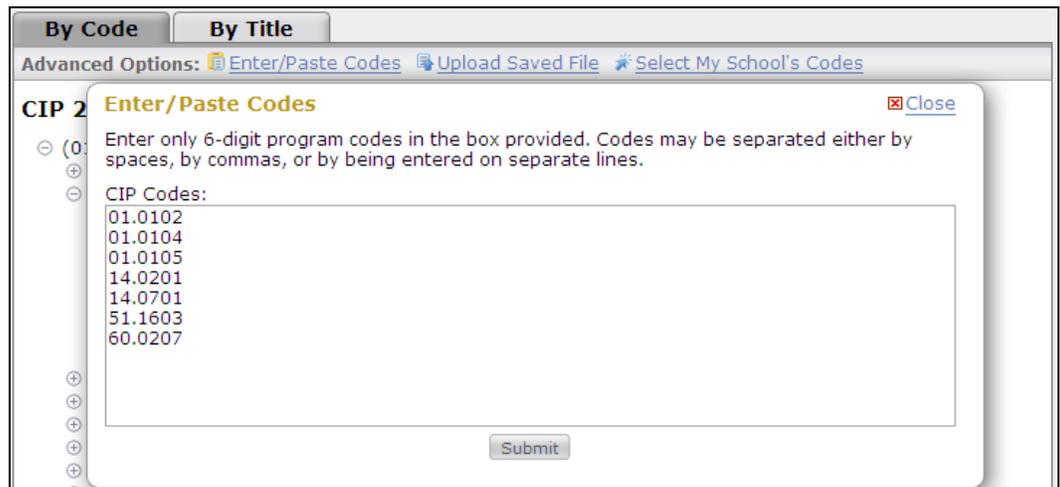

After entering codes and clicking "Submit," be sure to read the confirmation/error message provided to determine the appropriate action.

All codes found

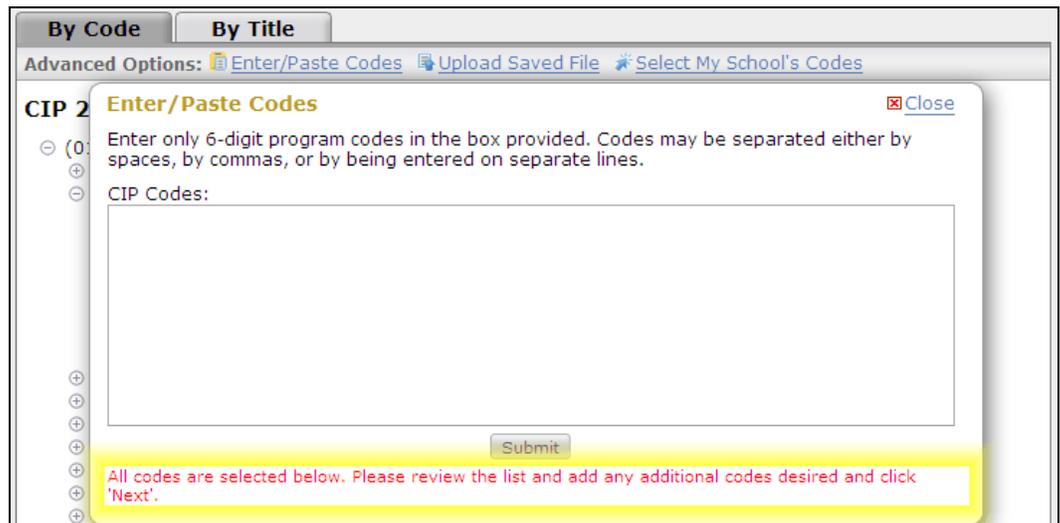

If every code is entered in the proper format and found in the previous version of the CIP, you will receive the following message:

"All codes are selected below. Please review the list and add any additional codes desired and click 'Next'."

Close the window, continue selecting additional codes if desired, and click "Next" to see the report.

The screenshot shows a dialog box titled "Enter/Paste Codes" with a "Close" button in the top right corner. The dialog contains the following text: "Enter only 6-digit program codes in the box provided. Codes may be separated either by spaces, by commas, or by being entered on separate lines." Below this is a text area labeled "CIP Codes:" containing the following list of codes: 01.0102, 01.0104, 01.0105, 14.0201, 14.0701, 51.1603, and 60.0207. A "Submit" button is located at the bottom right of the dialog.

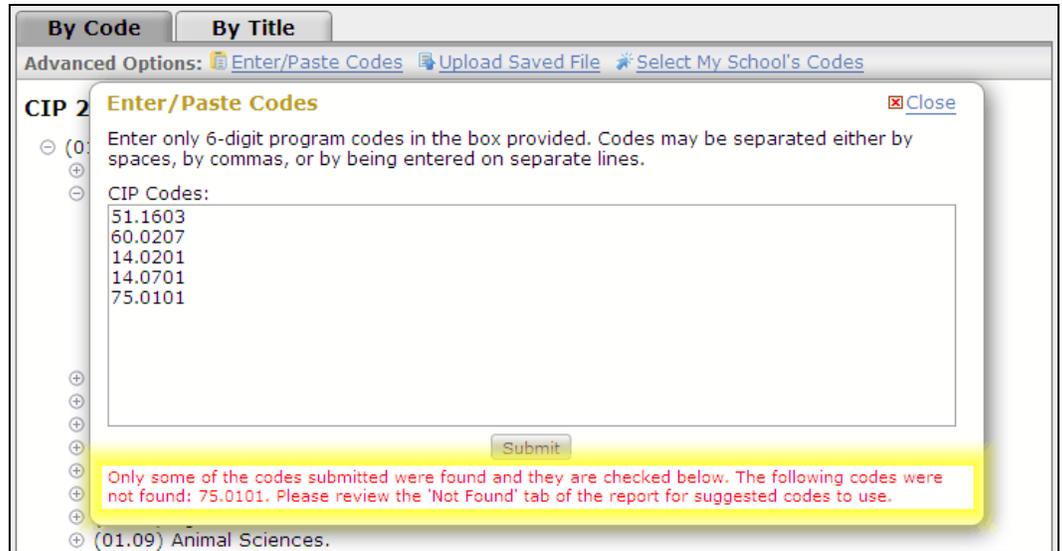

The screenshot shows the same "Enter/Paste Codes" dialog box, but the text area is empty. A yellow highlighted box at the bottom of the dialog contains the following message: "All codes are selected below. Please review the list and add any additional codes desired and click 'Next'." The "Submit" button is still visible at the bottom right.

Some codes found

If only some of the codes can be found in the previous version of the CIP, you will receive the following message:

"Only some of the codes submitted were found and they are checked below. The following codes were not found: [codes]. Please review the 'Not Found' tab of the report for suggested codes to use."

The entered list of codes contains one code that did not exist in the previous version. It will be shown on the report on the "Not Found" tab for further analysis. All other codes were found and checked in the list. Close the window and continue.

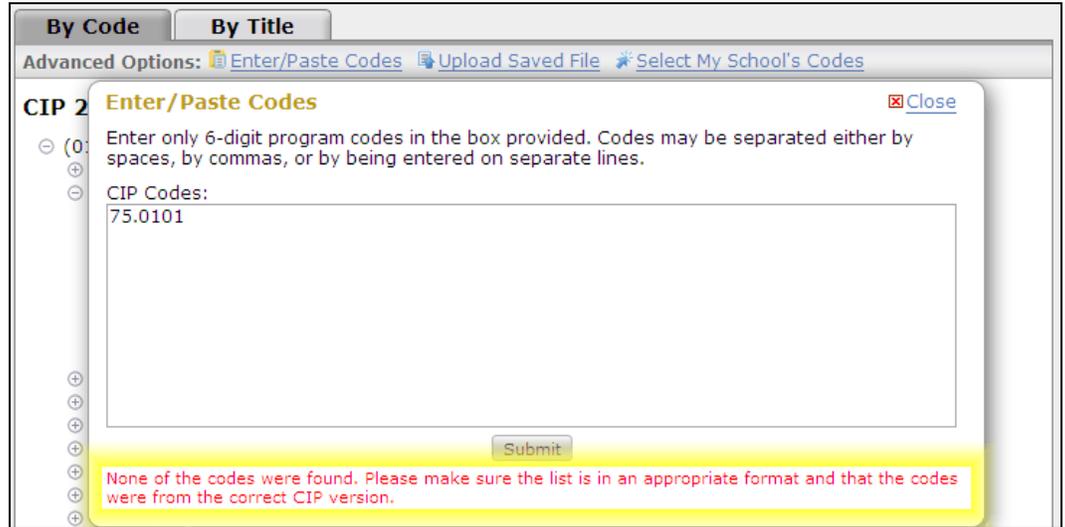

No codes found

If none of the codes are found in the previous version of the CIP, you will receive the following message:

"None of the codes were found. Please make sure the list is in an appropriate format and that the codes were from the correct CIP version."

In this case, the code will not be shown on the "Not Found" tab of the report because it was not entered along with any other valid codes.

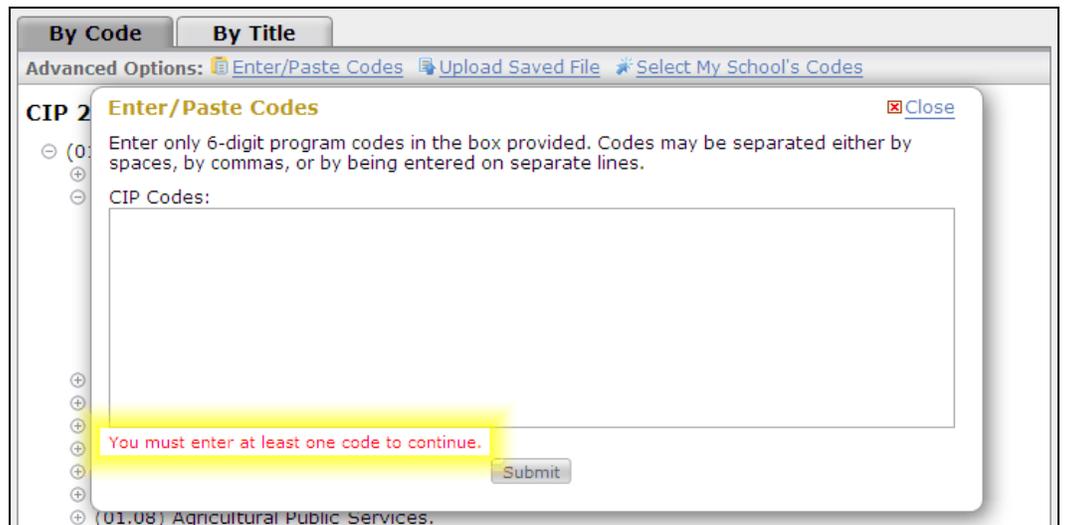

The screenshot shows a web interface with two tabs: "By Code" and "By Title". Below the tabs are "Advanced Options" with links for "Enter/Paste Codes", "Upload Saved File", and "Select My School's Codes". A dialog box titled "CIP 2 Enter/Paste Codes" is open, featuring a "Close" button in the top right. The dialog contains instructions: "Enter only 6-digit program codes in the box provided. Codes may be separated either by spaces, by commas, or by being entered on separate lines." Below this is a text input field labeled "CIP Codes:" containing the text "75.0101". A "Submit" button is located at the bottom center of the dialog. A red error message is displayed at the bottom of the dialog, highlighted in yellow: "None of the codes were found. Please make sure the list is in an appropriate format and that the codes were from the correct CIP version."

No codes entered

If no codes were entered, you will receive the following message:

"You must enter at least one code to continue."

If you opened the window by mistake, close it.

The screenshot shows the same web interface as the previous image. The "CIP 2 Enter/Paste Codes" dialog box is open, but the "CIP Codes:" input field is empty. A red error message is displayed at the bottom of the dialog, highlighted in yellow: "You must enter at least one code to continue." The "Submit" button is visible at the bottom center of the dialog. The bottom of the dialog shows a partially visible code "(01.08) Agricultural Public Services."

Formatting errors

Formatting errors may be responsible for receiving the message:

"None of the codes were found. Please make sure the list is in an appropriate format and that the codes were from the correct CIP version."

Entering 2- or 4-digit codes such as "01" and "01.01" would cause that error since only 6-digit codes may be entered.

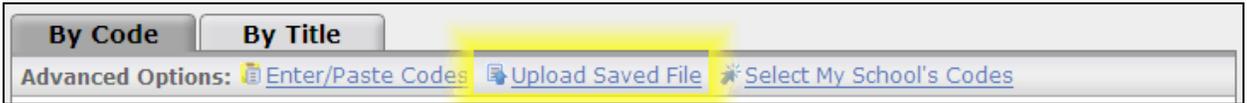

Any single code entered that did not exist in the previous CIP version would cause that error Code. In this example, 75.0101 was not a valid code in CIP 2000.

Mixing the types of separators between the codes will also cause the same error. Although codes 01.0101 and 01.0102 are valid, the fact that some codes were separated by line breaks and others were separated by commas cause the error. Either separate all codes by commas, all codes by spaces, or all codes by line breaks.

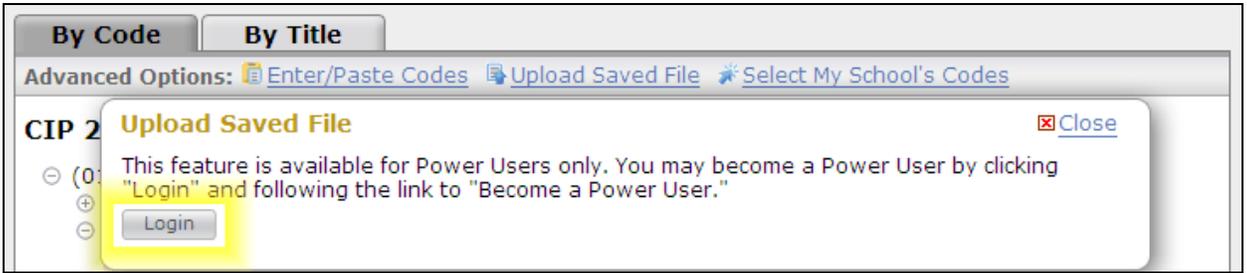

The screenshot shows a web application interface with a dialog box titled "CIP 2000 Enter/Paste Codes". The dialog box has a "Close" button in the top right corner. Below the title, there is a text input field containing the following text: "01", "01.01", "75.0101", and "01.0101, 01.0102". Below the input field is a "Submit" button. At the bottom of the dialog box, there is a red error message: "None of the codes were found. Please make sure the list is in an appropriate format and that the codes were from the correct CIP version." The background shows a navigation menu with "By Code" and "By Title" tabs, and "Advanced Options" including "Enter/Paste Codes", "Upload Saved File", and "Select My School's Codes".

Upload Saved File

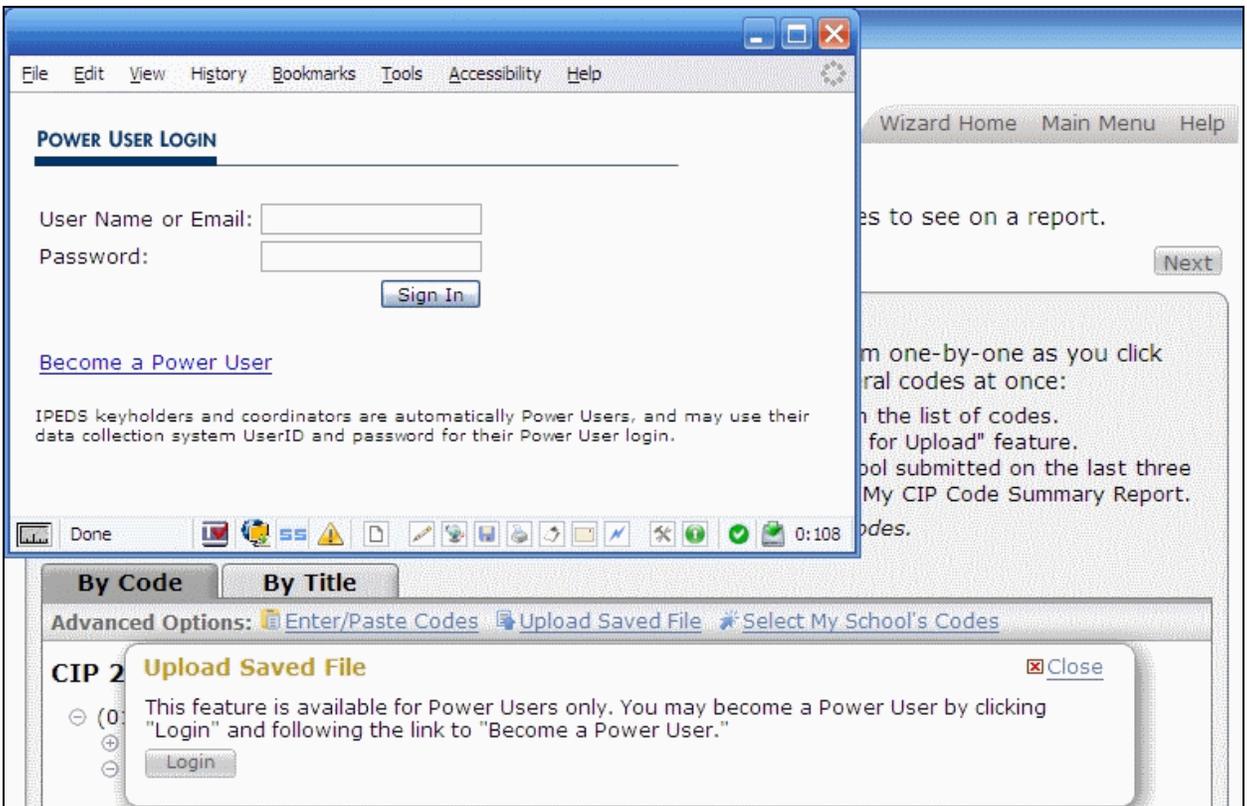

You may upload a file you previously saved within the CIP Wizard or another file created according to the specifications. Click "Upload Saved File" from the list of Advanced Options.

Click "Login" to continue. You must log in with a Power User account. If you do not already have a Power User account, you will be given the opportunity to create one.

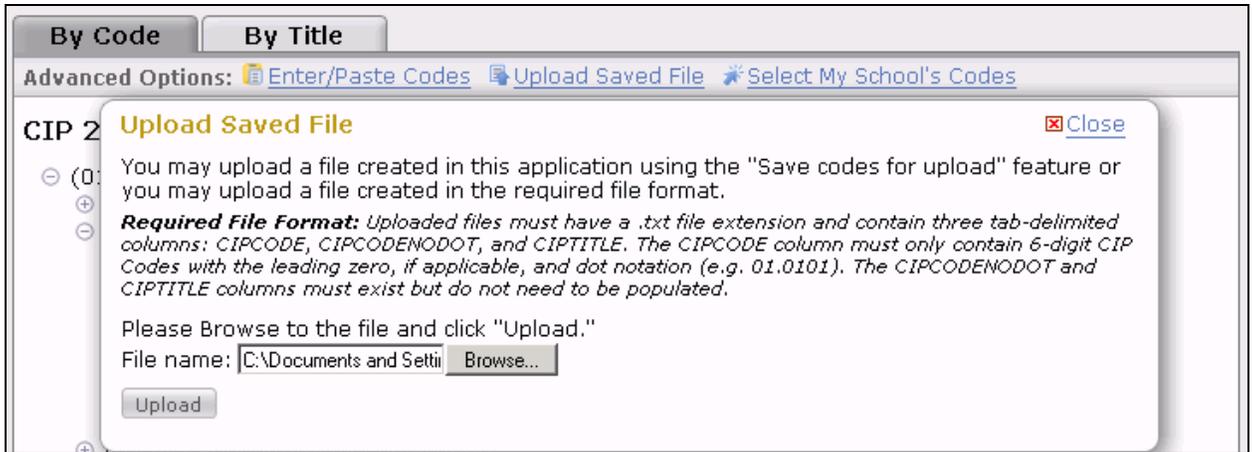

Enter your Power User account info and click "Sign In." If you do not have an account yet, click the "Become a Power User" link provided and follow the instructions.

After a successful login, instructions and a box in which to enter your file name will be provided.

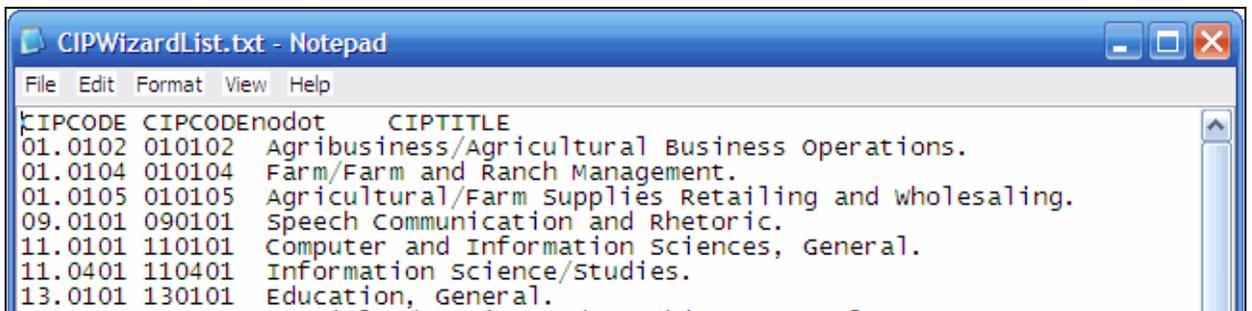

Any file created by the CIP Wizard using the "Save codes for upload" feature may be uploaded. Any file created in the required format may also be uploaded.

Click "Browse" to select your file and then click "Upload."

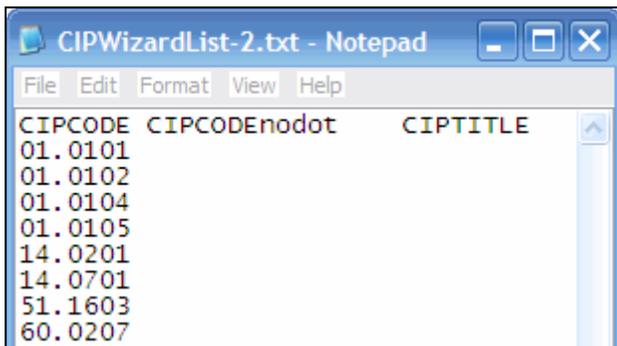

Uploaded files must have a .txt file extension and contain three tab-delimited columns: CIPCODE, CIPCODENODOT, and CIPTITLE. The CIPCODE column must only contain 6-digit CIP Codes with the leading zero, if applicable, and dot notation (e.g. 01.0101). The CIPCODENODOT and CIPTITLE columns must exist but do not need to be populated; however, the tab delimiter is necessary.

Sample file created by the CIP Wizard application that can be uploaded:

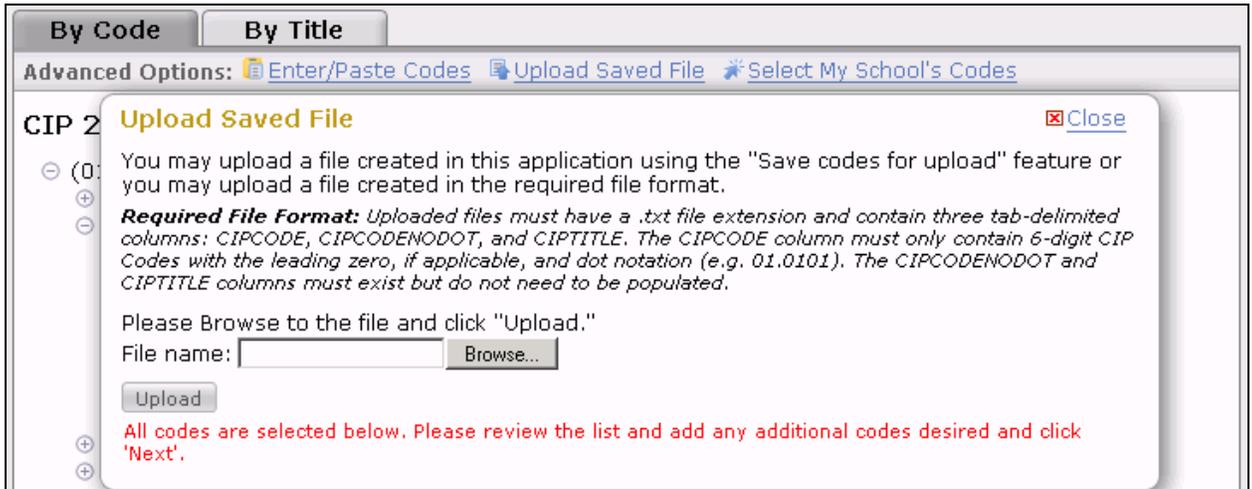

Sample file meeting minimum requirements that can be uploaded:

After a successful upload, you will receive the message:

All codes are selected below. Please review the list and add any additional codes desired and click "Next."

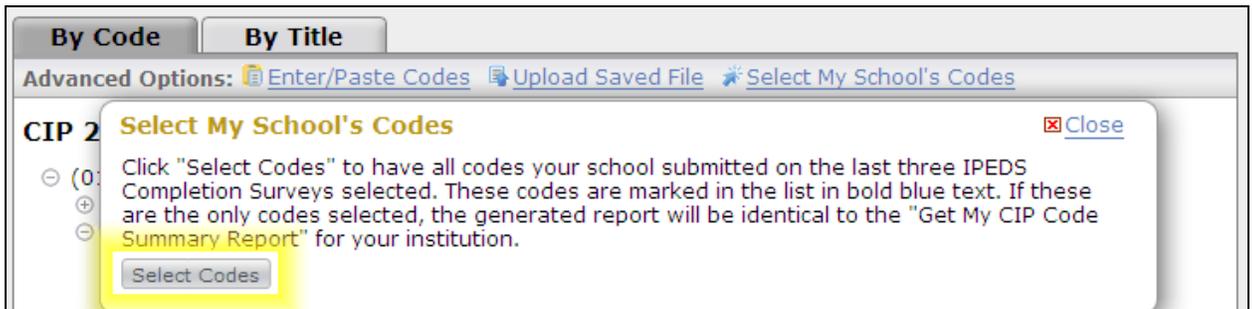

Select My School's Codes

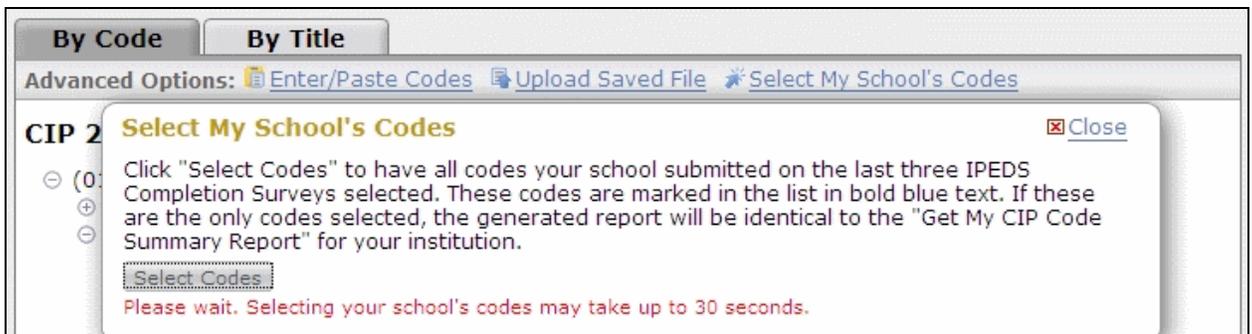

To select all the codes your selected institution submitted on the last three IPEDS Completion Surveys, click "Select My School's Codes" from the Advanced Options menu.

Then click "Select Codes."

It may take 30 seconds to select all the codes. Please wait.

These selected codes submitted by your institution on the last three IPEDS Completions surveys are marked in the list in bold blue text as shown. If these are the only codes selected, the generated report will be identical to the "Get My CIP Code Summary Report" for your institution. You may select additional codes or remove some of these codes from your list before viewing the report.

Save Codes for Upload

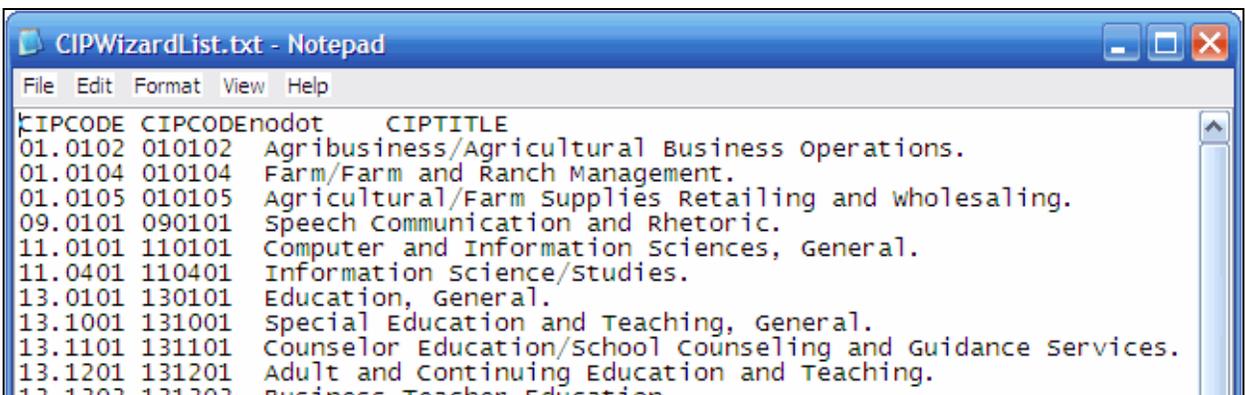

The selected codes may be saved for upload later. This is useful if you are still finalizing your list of codes and want to upload the list and continue refining it later. This is also useful to record your finalized selections in order to recreate the same report in the future. This option is also available from the report screens.

Click "Save Codes for Upload" below the Advanced Options to save a text (.txt) file to your computer of all selected CIP Codes that will be used to create your report.

This file was designed specifically for use within the CIP Wizard.

This file contains the required columns CIPCODE, CIPCODEnodot, and CIPTITLE.

Custom CIP Code Summary Report

Once you have selected all the CIP codes to be on the report, click "Next" to see the report.

In this example, assume we used Enter/Paste to select the following CIP Codes for the report: 01.0102, 1.0104, 01.0105, 14.0201, 14.0701, 51.1603, 23.1101, 26.0405, 21.0101, 29.0101, 60.0207, 13.0210, 41.3001, and 75.0101.

We received the following message: Only some of the codes submitted were found and they are checked below. The following codes were not found: 13.0210, 41.3001, 75.0101. Please review the 'Not Found' tab of the report for suggested codes to use.

We closed the window and clicked "Next."

Our selections resulted in the following report screen being shown. Please note the main sections of the report: Summary, Report/Data Downloads, and Tabs for No substantive changes, Moved, Deleted, Not Found, and Suggested New Codes.

Custom CIP Code Summary Report

The following report was generated based upon your selections. Please view each tab to see which codes had no substantive changes, moved, were deleted, were not found, or are new codes that may be of interest to you. The entire report may be downloaded in Word format. Additionally, the report data may be downloaded in Excel format.

Summary

You uploaded, entered, or selected 14 CIP Code(s) from CIP 2000. The following summary information is available:

- 5 - no substantive changes
- 3 - moved to a new location
- 3 - deleted
- 3 - not found

Additionally, 156 new code(s) may be of interest to you based upon your selection(s).

------------------------	-------	---------	-----------	---------------------

CIP Codes with no substantive changes.

Note: While these CIP codes have not been moved or deleted, some of them may have had some minor changes to their title or definition. A check mark indicates whether the CIP has had its title or definition changed.

- ✓ CIP Title or Definition Changed
 - (01.0102) Agribusiness/Agricultural Business Operations.
 - (01.0104) Farm/Farm and Ranch Management.
 - (01.0105) Agricultural/Farm Supplies Retailing and Wholesaling.
- ✓ (14.0201) Aerospace, Aeronautical and Astronautical/Space Engineering.
- (14.0701) Chemical Engineering.

Summary

Every page of the report shows the summary.

The total number of CIP codes you uploaded, entered, or selected on the previous page is listed. In this example, there were 14 codes.

That total number is broken out into categories that correspond to the Tabs on the online report: No substantive Changes, Moved, Deleted, and Not Found. The last sentence of the summary lists the number of new codes that are highlighted on the last Tab of the report called Suggested New Codes.

Summary

You uploaded, entered, or selected 14 CIP Code(s) from CIP 2000. The following summary information is available:

- 5 - no substantive changes
- 3 - moved to a new location
- 3 - deleted
- 3 - not found

Additionally, 156 new code(s) may be of interest to you based upon your selection(s).

(14.0701) Chemical Engineering.				

Moved

As indicated in the report summary, there are 3 CIP Codes that moved. These codes have new code numbers. The former code numbers and titles are listed on the left; the current code numbers and titles are listed on the right. Please update your records to use the new CIP Code numbers. If the CIP code also underwent a change to its Title or Definition, that code would have a checkmark in the checkmark column.

Not Found

As indicated in the report summary, there are 3 CIP Codes that were not found. This can only happen if the codes were uploaded in a manually created file or were entered/pasted.

The following codes were not found in the previous version of the CIP. Suggested codes are listed below where available. If you do not find the code you want in the list of suggestions, please use the tools provided on the CIP website to locate your code.

Note: The code may have been mistyped if you entered or uploaded codes. Please recheck your list. If you are certain your list is correct, please search for the code in other versions of the CIP. The CIP website begins with the CIP 2000-2010 conversion; the Resources page contains links to earlier versions.

Suggested New Codes

The total number of new programs added to this CIP version are listed. The codes you selected to be on the report were used to highlight the codes that may be most interesting to you.

Any new codes that are a 4-digit match to any codes you entered are listed first. It is possible that a program that more-specifically describes your program was added to the CIP. Please review the codes and make changes accordingly.

Any new codes that are only a 2-digit match to any codes you entered are listed next. It is possible that the 2-digit series had additional 4-digit series codes and subsequent 6-digit program codes added that may more accurately describe your program.

No Substantive Changes	Moved	Deleted	Not Found	Suggested New Codes
<p>There were 354 new programs added to the CIP. Based upon your selection(s), the following new codes may be of interest to you. Please review the new program codes listed below to see if any of them better describe the programs at your institution.</p>

Summary

The Summary section in the Word version of the Custom CIP Code Summary report includes the same information as the online version: the total number of CIP codes that were uploaded, entered, or selected on the "Create Custom CIP Code Summary Report" page. In the example, there were 14 codes.

That total number is broken out into categories that correspond to the Tabs on the online report: No substantive Changes, Moved, Deleted, and Not Found. The last sentence of the summary lists the number of new codes that are highlighted on the last Tab of the report called Suggested New Codes.

National Center for Education Statistics

Classification of Instructional Programs - 2010

Custom CIP Code Summary Report - James Madison University (232423)

SUMMARY

You uploaded, entered, or selected 14 CIP Code(s) from CIP 2000. The following summary information is available:

5 - no substantive changes

3 - moved to a new location

3 - deleted

3 - not found

Additionally, 156 new code(s) may be of interest to you based upon your selection(s).

No Substantive Changes

The information from the "No Substantive Changes" tab is shown in the Word document. Instead of checkmarks representing codes with a CIP Title or Definition that changed, an asterisk indicates this.

NO SUBSTANTIVE CHANGES

The following CIP Codes had no substantive changes.
Codes whose title or definition changed are marked (*).

(01.0102) Agribusiness/Agricultural Business Operations.

(01.0104) Farm/Farm and Ranch Management.

(01.0105) Agricultural/Farm Supplies Retailing and Wholesaling.

*(14.0201) Aerospace, Aeronautical and Astronautical/Space Engineering.

(14.0701) Chemical Engineering.

Moved

The information from the "Moved" tab is shown in the Word document. Both the old code (the code number from the previous version of the CIP) and the new number (the code number in the current version of the CIP) are listed. Instead of checkmarks representing codes with a CIP Title or Definition that changed, an asterisk indicates this.

MOVED

The following CIP Code(s) moved to a new code number.
Code(s) whose title or definition changed are marked (*).

Old code: *(23.1101) Technical and Business Writing.

New code: (23.1303) Professional, Technical, Business, and Scientific Writing.

Old code: *(26.0405) Neuroanatomy.

New code: (26.1502) Neuroanatomy.

Old code: (51.1603) Adult Health Nurse/Nursing.

New code: (51.3803) Adult Health Nurse/Nursing.

Deleted

The information from the "Deleted" tab is shown in the Word document. The Deleted code is shown with any Report Under codes that were specified.

DELETED

The following CIP Code(s) were deleted.

Deleted code: (21.0101) Technology Education/Industrial Arts.

Report under code(s):

Deleted code: (29.0101) Military Technologies.

Report under code(s):

(29.02) Intelligence, Command Control and Information Operations.

(29.03) Military Applied Sciences.

(29.04) Military Systems and Maintenance Technology.

Deleted code: (60.0207) Child/Pediatric Neurology.

Report under code(s):

(60.0404) Child Neurology.

Not Found

The information from the "Not Found" tab is shown in the Word document.

NOT FOUND

The following codes were not found in the previous version of the CIP. Please view the suggestions of which code to use in the current version of the CIP. If you cannot locate a code within the list of suggestions, please use the search provided on the CIP user website to locate your code.

Code not found: 13.0210

Suggested codes:

13.0201 Bilingual and Multilingual Education.

A program that focuses on the design and provision of teaching and other educational services to bilingual/bicultural children or adults, and/or the design and implementation of educational programs having the goal of producing bilingual/bicultural individuals. Includes preparation to serve as teachers and administrators in bilingual/bicultural education programs.

13.0202 Multicultural Education.

A program that focuses on the design, and implementation of instructional and advising services for culturally diverse learning populations. Includes instruction in cultural diversity, at-risk populations, multilingual and ESL education, program and curriculum design, instructional technology, information resources, LEP and minority education strategies, counseling and communicating with multicultural populations, law and regulations, and applications to specific cultural groups, educational services, and research issues.

13.0203 Indian/Native American Education.

A program that focuses on the design and implementation of instructional and advising services for American Indian, Alaska Native, and Hawaiian Native students at various learning levels and that prepares individuals to perform teaching and administrative functions in Tribal/First Nation schools. Includes instruction in the cultural traditions and social patterns, history and politics, learning styles and issues, curriculum design, LEP and minority education strategies, counseling techniques and social issues, rural education services, distance education, adult education techniques, school administration, applicable laws and regulations, and research issues.

13.0299 Bilingual, Multilingual, and Multicultural Education, Other.

Any instructional program in bilingual, multilingual, and multicultural Education not listed above.

Suggested New Codes

The information from the "No Substantive Changes" tab is shown in the Word document.

SUGGESTED NEW CODES

There were 354 new programs added to the CIP. Based upon your selection(s), the following new codes may be of interest to you. Please review the new program codes listed below to see if any of them better describe the programs at your institution.

The following new program codes occur within the same '4-digit' series codes as codes selected for this report.

14.0702 Chemical and Biomolecular Engineering.

14.0799 Chemical Engineering, Other.

The following new program codes occur within the same '2-digit' series codes as codes selected for this report.

01.0308 Agroecology and Sustainable Agriculture.

01.0309 Viticulture and Enology.

13.0607 Learning Sciences.

13.1017 Education/Teaching of Individuals in Elementary Special Education Programs.

13.1018 Education/Teaching of Individuals in Junior High/Middle School Special Education Programs.

13.1019 Education/Teaching of Individuals in Secondary Special Education Programs.

13.1337 Earth Science Teacher Education.

13.1338 Environmental Education.

14.0102 Pre-Engineering.

14.1003 Laser and Optical Engineering.

14.1004 Telecommunications Engineering.

14.1099 Electrical, Electronics and Communications Engineering, Other.

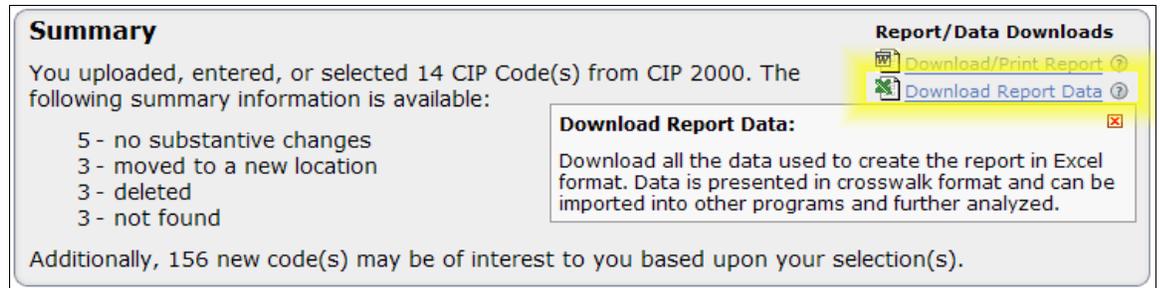

14.4001 Paper Science and Engineering.

Report Data – Excel format

All the data used to create the report can be downloaded in Excel format. The data is presented in crosswalk format and can be imported into other programs and further analyzed.

All sections, including the Summary and information from the No Substantive Changes, Moved, Deleted, Not Found, and Suggested new Codes sections are represented in the data.

This report is accessible from the "Download Report Data" link under Report/Data Downloads in the Summary box as shown.

The screenshot shows a 'Summary' box with the following content:

Summary
You uploaded, entered, or selected 14 CIP Code(s) from CIP 2000. The following summary information is available:

- 5 - no substantive changes
- 3 - moved to a new location
- 3 - deleted
- 3 - not found

Additionally, 156 new code(s) may be of interest to you based upon your selection(s).

Report/Data Downloads

- Download/Print Report
- Download Report Data

Download Report Data:
Download all the data used to create the report in Excel format. Data is presented in crosswalk format and can be imported into other programs and further analyzed.

The Excel file contains the following columns:

- CIPCode2000 – the CIP Code number from the 2000 CIP (e.g. 01.0102)
- CIPCode2000nodot – the CIP Code number from the 2000 CIP without the period (e.g. 010102)
- CIPTitle2000 – the CIP title from the 2000 CIP
- Action/ReportTab – the column indicating the action of the CIP (No substantive changes, New, Moved, Deleted), whether it was not found, or whether it was a suggested new code with either a 2- or 4-digit similarity
- CIPCode2010 – the CIP Code number from the 2010 CIP (e.g. 01.0102)
- CIPCode2010nodot – the CIP Code number from the 2010 CIP without the period (e.g. 010102)
- TextChange – a "yes" indicates that either the CIP title or definition was updated; a "no" indicates that neither the CIP title nor the definition was updated
- CIPTitle2010 – the CIP title from the 2010 CIP

Sample sections of the Excel file show how each type of data is represented.

No Substantive Changes

The information from the “No Substantive Changes” tab is shown in the Excel file. Updates to CIP title or definition are indicated by a “yes” in the Text Change column.

Save Codes for Upload

The codes used to create this report may be saved and uploaded later. This is useful if you realized that your report was not complete and you wish to revise your selections to create a new report. This is also useful to record your finalized code selections in order to recreate the same report in the future. This option is also available from the "Create Custom Report" screen.

This feature is accessible from the "Save Codes for Upload" link under Report/Data Downloads in the Summary box as shown.

Summary

You uploaded, entered, or selected 14 CIP Code(s) from CIP 2000. The following summary information is available:

- 5 - no substantive changes
- 3 - moved to a new location
- 3 - deleted
- 3 - not found

Additionally, 156 new code(s) may be of interest

Report/Data Downloads

My CIP Code Summary Report

The following report was generated based on the CIP codes your institution submitted for the last three IPEDS Completion Surveys. Please view each tab to see which codes had no substantive changes, moved, were deleted, or are new codes that may be of interest to you. The entire report may be downloaded in Word format. Additionally, the report data may be downloaded in Excel format.

Summary

Your institution submitted 59 unique CIP Code(s) from CIP 2000 on the last three IPEDS Completion Surveys. The following summary information is available:

- 54 - no substantive changes
- 5 - moved to a new location
- 0 - deleted

Additionally, 126 new code(s) may be of interest to you based upon the CIP Code(s) your institution submitted for the last three IPEDS Completion Surveys.

Suggested New Codes

CIP Codes with no substantive changes.

Note: While these CIP codes have not been moved or deleted, some of them may have had some minor changes to their title or definition. A check mark indicates whether the CIP has had its title or definition changed.

- ✓ CIP Title or Definition Changed
- ✓ (09.0101) Speech Communication and Rhetoric.
- ✓ (11.0101) Computer and Information Sciences, General.
- (11.0401) Information Science/Studies.
- (13.0101) Education, General.

CIP Selector

The CIP Selector was designed for IPEDS Keyholders and Coordinators to help them find what CIP code best describes their instructional program.

The CIP Selector asks a series of questions to determine which codes to suggest. Please answer each question until the "View Suggestions" button appears. Then click it to see the list of suggested codes meeting the criteria you specified.

Note: Not all CIP Series are included in the CIP Selector. The series which are included are the ones available to IPEDS Keyholders and Coordinators for the Completions Survey. Specifically Series 28, 32-37, 53 and 60 are not included in the CIP Selector.

Begin by answering, "Which of the following categories best describes your instructional program?" As you answer, additional questions follow until enough information has been gathered to make suggestions.

Suggested Codes

Based on the answers to your questions, the following codes are suggested. You may either print this list, modify your selections, or start over.

 [Print](#)  [Modify Selections](#)  [Start Over](#)

American Literature (Canadian). (23.1403)
A program that focuses on the literature and literary development, both formal and folkloric, of Canada from its origins to the present. Includes instruction in period and genre studies, author studies, literary criticism, and regional and oral traditions.

American Literature (United States). (23.1402)
A program that focuses on the literature and literary development, both formal and folkloric, of the United States from the Colonial Era to the present. Includes instruction in period and genre studies, author studies, literary criticism, and regional and oral traditions.

Children's and Adolescent Literature. (23.1405)
A program that focuses on the scholarly study of children's and adolescent literature and that may enhance the professional work of teachers, librarians, publishers, booksellers, and creative writers. Includes instruction in period and genre studies, author studies, literary criticism, studies of various types of literary text, book artists, and children's films.
Illustrative Examples:
Literature for Children and Young Adults

English Literature (British and Commonwealth). (23.1404)
A program that focuses on the literatures and literary developments of the English-speaking peoples of the British Isles and the British Commonwealth, from the origins of the English language to the present. Includes instruction in period and genre studies, author studies, country and regional specializations, literary criticism, and the study of folkloric traditions.

General Literature. (23.1401)
A program that focuses on literature from one or more genres, cultures or traditions. Includes instruction in period and genre studies, author studies, literary criticism, and studies of various types of literary text.
Illustrative Examples:
Literary Studies

Literature, Other. (23.1499)
Any instructional program in English language literature not listed above.

Answers to Commonly Asked Questions

1. What is the CIP?

The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity.

2. Who creates the CIP?

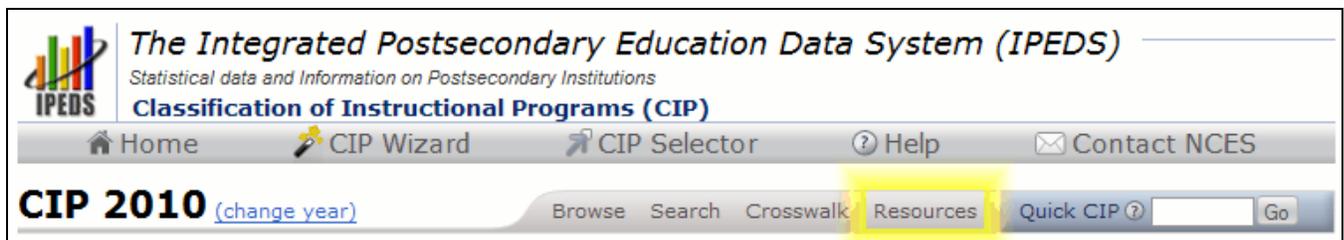

CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985, 1990, 2000, and 2010.

3. What is different in CIP 2010?

Of the 1,848 6-digit program codes, 310 are new, 13 were deleted, and 115 moved.

4. How do I obtain electronic copies of the CIP?

For links to downloadable documents for the current CIP version or downloadable documents for CIP 2000 and earlier versions, click "Resources."

The screenshot shows the top navigation bar of the IPEDS website. The header includes the IPEDS logo and the text "The Integrated Postsecondary Education Data System (IPEDS) Statistical data and Information on Postsecondary Institutions Classification of Instructional Programs (CIP)". Below this is a horizontal menu with links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. A secondary navigation bar contains "CIP 2010" with a "(change year)" link, and buttons for Browse, Search, Crosswalk, Resources (highlighted in yellow), and Quick CIP with a search box and Go button.

5. How do I find a list of New CIP Codes?

Lists of NEW CIP Codes are linked from the Home and the Resources pages as shown:

The screenshot shows the IPEDS website interface. At the top left is the IPEDS logo. The main header reads "The Integrated Postsecondary Education Data System (IPEDS)" with the subtitle "Statistical data and Information on Postsecondary Institutions" and "Classification of Instructional Programs (CIP)". A navigation bar includes links for Home, CIP Wizard, CIP Selector, Help, and Contact NCES. Below the navigation bar, the page title is "CIP 2010" with a "(change year)" link. A secondary navigation bar contains "Browse", "Search", "Crosswalk", "Resources", and a "Quick CIP" search box with a "Go" button. The main content area is divided into two columns. The left column is titled "What is the CIP?" and contains a paragraph explaining the CIP system. The right column is titled "Start Here" and contains a list of links: "Browse all CIP codes", "Search CIP codes", "View Crosswalk 2000-2010", "View NEW CIP codes" (highlighted in yellow), "View DELETED CIP codes", and "View MOVED CIP codes".

The screenshot shows the IPEDS website interface, similar to the first one. The main header and navigation bar are identical. The page title is "CIP 2010" with a "(change year)" link. The secondary navigation bar is also identical. The main content area is titled "Resources" and contains a section for "2000-2010 CIP Conversion". Below this section, there is a paragraph of text: "Information on the selected CIP version is available below. To access resources for other CIP versions created after CIP 2000, click the 'change year' link above." Underneath this text is a sub-section titled "Online" which contains a list of links: "Browse all CIP codes", "Search CIP codes", "View Crosswalk 2000-2010", "View NEW CIP codes" (highlighted in yellow), "View DELETED CIP codes", and "View MOVED CIP codes".

New CIP Codes can also be produced by using the search criteria as shown. This method allows for you to see the entire list or to refine it further using the other search criteria available.

FAQs

The FAQs include responses to frequently asked questions about the CIP. They are divided into two sections. The first section focuses on general questions about the 2010 CIP, while the second section focuses on coding questions.

General FAQs

1. How do I determine what series I should select for my program of study?

A general guideline for is to select the series which best describes the content of the program. In some cases, instructional programs may be found in one or more series. For example, a person can receive a degree in Statistics from a program that focuses on mathematical models; this program would be coded under code 27.0501 Statistics, General. On the other hand, a person can receive a degree in Statistics from a program which focuses on the applications of statistical methods to the description, analysis and forecasting of business data; this degree would be coded under code 52.1302 Business Statistics. Cross references are included throughout the CIP for codes that are related, to help the user select the code which best describes their instructional program.

2. Some CIP codes include slashes, while others include "and." What is the difference between the two?

CIP codes that include a slash in the title identify alternative or equivalent program titles. For example, 14.3201 Polymers/Plastics Engineering uses the slash, indicating that both terms are equivalent and can be used interchangeably. CIP codes with the word "and" in the title, identify programs that are so closely related that it does not make sense to separate them. For example, 45.0501 Demography and Population Studies includes "and," indicating that these are very closely related programs that are often found together in the same department. Programs in "Demography," "Population Studies," and "Demography and Population Studies" should all be reported here. It may also be the case that two closely related programs are linked together because by themselves there were not enough completions to justify two separate CIP codes.

Note that "and" is also used to indicate instructional programs that integrate two programs that stand alone elsewhere in the CIP; in all such instances, this will be clearly stated in the definition. For example, 26.1007 Pharmacology and Toxicology offer "an integrated, combined approach" to the study of pharmacology and toxicological issues, programs that are found separately as 26.1001 Pharmacology and 26.1004 Toxicology. In this case, only combined programs should be reported as 26.1007, while the separate programs should be reported under their respective codes.

3. When is a CIP code reported under a "general" category vs. "other" category?

Programs that are undifferentiated, non-specified, or generalized should be included in the "general" category at the beginning of a four-digit series, while programs that are specific, but do not fit into any of the CIP codes, should be included in the 99 "other" category at the end of a series. For example a degree in Psychology would be reported under 42.0101 Psychology, General, while a degree in Neuropsychology would be reported under 42.9999 Psychology, Other.

4. *What are examples?*

Examples were added to the 2010 CIP to help users decide where to report instructional programs that do not exactly match available CIP code titles. The examples listed are in no way intended to be an exhaustive list of programs that could be reported under a specific CIP code, but instead include some of the most common names of instructional programs for specific CIP codes that were found while conducting searches of course catalogs and postsecondary institutions websites.

5. *What is a see-also/cross-reference code?*

A cross-reference is also designed to assist the CIP user in selecting the appropriate code for their program of study. It references related CIP codes, which may be of interest to the CIP user. For example, 05.0211 Deaf Studies references 16.1601 American Sign Language.

6. *Do degree levels apply to CIP codes?*

CIP codes generally apply to all levels of certificates and degree. In some cases, however, degrees were specified in the examples for certain CIP codes in which federal agencies needed to be able to obtain data on the number of degrees awarded in a particular field of study. For example, see code 51.1201 Medicine, which lists Medicine (MD) as an example.

7. *What does it mean when a program is marked "Text Change?"*

This means that the title and/or definition have been changed in a substantive way that could possibly affect which instructional programs should be reported under this code. These changes include modifying or updating the title, adding and/or deleting text in the description, or updating the description to better reflect the current instructional field of study. Users are encouraged to familiarize themselves with text changes to assure that they report programs under the most appropriate codes.

Changes that are merely stylistic and do not change meaning have **NOT** been labeled as a "text change." Examples of these include deleting degree designations from the titles of certain professional programs; adding the words "residency program" to all titles in Series 60 Residency Programs; removing text that does not add clarity to descriptions (see Series 16); and making other minor changes that do not affect meaning. If there was any likelihood that a text change might affect reporting decisions, it was flagged as a "text change."

8. *Are there any differences between the Canadian and U.S. versions of the CIP?*

For the most part, these two versions are identical, and NCES and Statistics Canada worked together to ensure that the CIP meets the needs of both countries. However, in a few specific instances, the educational systems of each country are different enough to necessitate differences in each country's version of the CIP. Specifically:

- In Series 43.03, the U.S. version uses the term "Homeland Security" while the Canadian version uses "Public Safety."
- The Canadian version includes a small number of programs that are not found in the U.S.
- Additional examples have been added to the vocational and technical series in the Canadian version that correspond to the Red Seal trades in Canada.
- The Canadian version contains a French translation

Coding FAQs

1. *What determines if a CIP code falls into Series 30 Multi/Interdisciplinary Studies vs. any other series?*

In order to be included in Series 30, an instructional program needs to be interdisciplinary, meaning that the program crosses two or more two-digit CIP series. For example, 30.01 Biological and Physical Sciences, is intended for instructional programs which include instruction in both the biological sciences (series 26) and physical sciences (series 40). On the other hand, CIP code 45.1301 Sociology and Anthropology is included in Series 45, and not Series 30, since both Sociology and Anthropology are social sciences and are therefore in the same series.

2. *Why are some medical sciences in Series 26, while others are in Series 51, and when should Series 60 be used?*

Programs focusing on basic research in biomedical fields should be included in Series 26. Programs focusing on clinical sciences and research should be included in Series 51. Series 60 includes residency programs that prepare medical doctors, osteopaths, dentists, veterinarians, and podiatrists for certification in recognized specialties, but do not award academic degrees. For example, a program that focuses on the scientific study of the cardiovascular system and its disorders and diseases and prepares individuals for research careers should be reported in 26.0907 Cardiovascular Science. A program that prepares a medical doctor to do research and results in a degree other than an MD should be included in 51.1401 Medical Scientist. A residency program that prepares physicians to specialize in and manage cardiac conditions, but does not result in an academic degree, should be reported as 60.0504 Cardiovascular Disease. Please note that while Series 60 is included in the CIP, it is not reported on the IPEDS Completion Survey.

3. *When should programs be included in Series 14 Engineering vs. Series 15 Engineering Technologies and Engineering-Related Fields?*

Instructional programs generally lead to a bachelor's degree or higher in one of the engineering fields are generally reported under Series 14. Series 14 also includes Pre-Engineering programs designed as preparation for entry into baccalaureate-level engineering programs. Instructional programs that generally support the work of engineers and which include "technology" or "technician" in the title are generally reported under Series 15. Series 15 also includes engineering-related fields such as Engineering/Industrial Management.

4. *When should programs be reported under Series 23 English Language and Literature/Letters vs. Series 09 Communication, Journalism, and Related Programs?*

Programs reported under the 23 Series are generally taught in English Departments, while programs reported under Series 09 are generally taught in Schools of Communication or Communication Departments. The 23 series was reorganized to reflect the changing nature and structure of instructional programs offered by English Departments. Series 23 now consists of the following 4 digit series:

- English Language and Literature, General
- Rhetoric and Composition/Writing Studies
- Literature
- English Literature/Letters, Other

Programs that combine the study of rhetoric and composition should remain in series 23 and be reported as 23.1304 Rhetoric and Composition. Programs that emphasize speech communication should now be reported under code 09.0101 Speech Communication and Rhetoric. This decision was made after an exhaustive scan of postsecondary institutions course catalogs and websites, in which it became clear that stand-alone Speech programs were rarely offered in English Departments, but rather offered in Communication Departments.

5. When should programs be reported under 09.0100 vs. 09.0101 or 09.0102?

Generalized, undifferentiated communication programs should be reported under code 09.0100 Communication, General, while programs that focus on Speech Communication and Rhetoric, and that are taught in Communication Departments or Schools of Communication, should be reported under code 09.0101 Speech Communication and Rhetoric. Instructional programs which focus on Mass Communication or the Media should be reported under code 09.0102 Mass Communication/ Media Studies.

6. What is the difference between Series 05 and Series 16? Why do some of the programs in each series seem to overlap, and how do I choose the best code?

Programs that focus on Area, Ethnic, Cultural or Gender Studies should be reported under Series 05. Instructional programs that primarily focus on the study of foreign languages, along with their literature and/or linguistics, should be reported under Series 16. For example, instructional programs that focus on Russian Language and Literature should be reported under code 16.0402 Russian Language and Literature, while instructional programs that focus on Russian history, society, politics and culture should be reported under code 05.0110 Russian Studies.

Because institutions offer programs at different levels of specificity, it is necessary to provide CIP codes that represent the most general to the most specific types of programs; these programs are interrelated and will sometimes overlap. We encourage users to: (1) scan the content of the entire series to become familiar with the types of codes provided; and (2) search electronically for specific program titles found at their institution. This should ensure the most accurate reporting. For example, a CIP user would report a general "Asian Studies" program under 05.0103 Asian Studies/Civilization, but an "East Asian Studies" program under 05.0104 East Asian Studies, "Chinese Studies" under 05.0123 Chinese Studies, and so on. The same principle applies to the language programs in series 16.

7. What is the difference between "Comparative Literature" in Series 16 and "Literature" in Series 23?

Programs which focus on two or more literary traditions in their original language or translation should be coded under 16.0104 Comparative Literature, while programs that focus specifically on English language literature should be reported under one of the codes in series 23.14.

8. Where should degrees awarded in an undeclared major or General Studies be reported?

Degrees that are awarded without specifying a program of study should be coded under 24.0102 General Studies.

9. Where should degrees that are awarded in a student-designed majors or an individualized major be reported?

Student designed majors or individualized majors which are multidisciplinary in nature and which cross two or more two-digit CIP series, should be reported under 30.0000 Multi-/Interdisciplinary Studies, General. Student-designed majors or individualized majors, which focus on a single field of study should be reported under 24.0101 Liberal Arts and Sciences/Liberal Studies. For example a student designed degree in Mathematics and Music would be reported under code 30.0000 Multi-/Interdisciplinary Studies, General, while a student designed degree in Modern Thought would be reported under 24.0101 Liberal Arts and Sciences/Liberal Studies.

10. What is the difference between programs reported under Series 38 vs. Series 39?

Programs reported under Series 39 are intended for individuals that are preparing for religious vocations, while programs reported under Series 38 are programs that focus on the study of religion. For example, an individual who is studying to become a Rabbi would be reported under 39.0605 Rabbinical Studies, while an individual who is studying the history, culture and religion of the Jewish people would be reported under 38.0206 Jewish/Judaic Studies.

11. Where should RN programs be coded vs. LPN programs?

RN programs should be coded under 51.38 Registered Nursing, Nursing Administration, Nursing Research and Clinical Nursing, while LPNs should be reported under 51.39 Practical Nursing, Vocational Nursing and Nursing Assistants. Please note that in the 2010 CIP, the nursing series was split across two 4-digit series to make the distinction between instructional programs for registered nurses (Series 51.38) and instructional programs for non-registered nurses (Series 51.39).

12. What is the difference between 51.3808 Nursing Science vs. 51.3818 Nursing Practice?

Nursing Science prepares nurses to conduct nursing research following the standards of academic research methodologies. Nursing Practice prepares nurses to apply the results of research to clinical settings--to translate evidence into practice.

13. How should double majors be coded?

A double major is reported when a student has completed more than one program of study, but will be receiving only one degree. If the student receives a degree for each program, then each degree should be coded separately. For example if a student pursues a double major in Music and Mechanical Engineering and receives a B.A. in music and a B.S. in Mechanical Engineering, then each of these degrees should be coded separately. On the other hand, if a student pursues a double major in Political Science and History and is awarded a single degree in Political Science and History, then the individual school needs to decide whether to report it under the code for Political Science or History.

14. Some program titles found in the Communications, Computer Sciences, and Visual and Performing Arts series share common words and seem to overlap. How can I decide where a particular program should be reported?

Today, more than ever, the use of computers, digital technologies, and “new media” blurs the distinctions among many instructional programs across broad fields of study and results in some overlap in program features and coursework. At the same time, these programs have distinct emphases and are not truly interdisciplinary in nature. When making a decision about where to report a program, you should take into account the primary emphasis of the program, e.g., technical skills, artistic expression, or communication. For example, programs reported under 09.0702 Digital Communication and Media/Multimedia should focus on the communication process while programs in 50.0102 Digital Arts, General should focus on the expressive, artistic side. Similarly, 11.0803 Computer Graphics programs should focus on technical computer tools while programs reported under 50.0409 Graphic Design should focus on artistic skills.

15. In series 15, what is the difference between Technology and Technician?

The terms technology and technician can be used interchangeably. They are both included to reflect the fact that some states and institutions require that degrees be awarded with the specific title technician instead of the broader academic word technology. The CIP makes an effort to include such variations in order to facilitate keyword searches and improve the accuracy of data reporting.

16. How is series 53 used?

Series 53 is reserved for instructional programs offered at a postsecondary institution, which result in the completion of a high school or secondary school diploma or certificate. Because there are no subject concentrations or “majors” in most secondary level studies, the title of the instructional program corresponds to the title of the completion award. In the United States Series 53 can be used by postsecondary institutions to report data on early college programs in which a student will enter the institution after their sophomore or junior year of high school and will complete their high school education and associate’s degree or bachelor’s degree simultaneously. This also applies to postsecondary institutions that provide the opportunity for adult students to complete their high school or secondary school education and receive a GED or similar high school equivalency certificate or diploma. Please note that while Series 53 is included in the CIP, it is not reported on the IPEDS Completion Survey.

17. When should instructional programs be coded under 10.0203 Recording Arts Technology/Technician vs. 50.0913 Music Technology?

Instructional programs that focus on using technology to create music should be coded under 50.0913, while instructional programs that focus on applying technical skills to record or produce sound recordings should be coded under code 10.0203.

18. When is it appropriate to use series 13 Education?

Series 13 should be used for programs that prepare individuals for careers in education, including teachers at all levels, school and college administrators, support services for educational programs, and other careers related to teaching and learning theories and practices. These are distinguished from majors that provide content knowledge in a particular field, but themselves do not prepare individuals to teach (though such individuals may simultaneously take courses that prepare them to seek licensure as a teacher). For example, a program that prepares individuals to teach mathematics would be coded 13.1311 Mathematics Teacher Education; a program that focuses on mathematics content would be coded 27.0101 Mathematics, General.

19. Why was series 60.02 Medical Residency Programs re-organized, and what are "general" and "subspecialty" certificates?

Series 60.02 was split into two four-digit series to reflect the types of certification offered by the 24 medical specialty boards that are part of the American Board of Medical Specialties. Each of these boards offers one or more "general certificates" in a particular medical specialty; these are included in series 60.04 "Medical Residency Programs - General Certificates." In addition, many of these boards offer "subspecialty certificates" for physicians who take additional training beyond the first residency program; these are included in series 60.05 "Medical Residency Programs - Subspecialty Certificates." Please note that while Series 60 is included in the CIP, it is not reported on the IPEDS Completion Survey.

20. What are Series 28 and 29, and how are they used?

Both Series 28 and 29 are reserved specifically for instructional programs that are taught by the military or at military institutions and which have no civilian analogues. Series 28 has been expanded to include military sciences, operational studies, leadership, and strategic studies, in addition to Reserve Officer Training Corps (JROTC, ROTC) programs. Series 29 includes an expanded group of military technology and applied science programs. Please note that while Series 29 is included in the CIP, it is not reported on the IPEDS Completion Survey.
