

Memorandum for the NCES Review Tracking System (RTS)  
IPEDS Data Collection Cycle

**2021–22 IPEDS Data Collection: Winter Data Release – Provisional Level**

The provisional level data release of the components collected during the winter collection period of the 2021–22 Integrated Postsecondary Education Data System (IPEDS) does not contain substantive changes in file structure or file documentation compared to the previous year. The data are released to the public through the “Use the Data” portal (<https://nces.ed.gov/ipeds/use-the-data>) on the IPEDS website. The IPEDS Methodology has been reviewed and approved by the NCES Review Staff and is currently posted on the IPEDS website as a resource for data users.

IPEDS is an annual, large-scale, web-based survey that collects institution-level data from postsecondary institutions in the United States (50 states and the District of Columbia) and other U.S. jurisdictions.<sup>1</sup> For more information about the IPEDS Survey, its 12 components, and data release procedures, visit <https://nces.ed.gov/ipeds/use-the-data/survey-components>. This memorandum documents the IPEDS universe of reporting institutions and response to the winter collection period of the 2021–22 IPEDS, which was open from December 8, 2021 to February 9, 2022.

*2021–22 IPEDS Universe of Institutions*

The IPEDS universe is established during the fall collection period. During the 2021–22 collection year, there were 6,045 Title IV institutions, administrative offices,<sup>2</sup> and U.S. service academies<sup>3</sup> in the United States and other jurisdictions of the United States, such as Puerto Rico. For 2021–22, a total of 533 postsecondary institutions were reported exclusively by a parent institution and are not included in the universe counts. The four U.S. service academies that are not Title IV eligible are included in the IPEDS universe because they are federally funded and open to the public.<sup>3</sup>

NCES statistical standards require that the potential for nonresponse bias for all institutions be analyzed for sectors for which the response rate is less than 85 percent. Because response rates were nearly 100 percent for each survey component, no such analysis was necessary.

---

<sup>1</sup> The other U.S. jurisdictions surveyed in IPEDS are American Samoa, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, Guam, the Marshall Islands, Palau, Puerto Rico, and the U.S. Virgin Islands.

<sup>2</sup> Title IV institutions and administrative offices include 5,975 institutions and 70 administrative (central or system) offices. The central and system offices are required to complete the Institutional Characteristics component in the fall, the Human Resources component in the spring, and the Finance component in the spring (if they have their own separate budget).

<sup>3</sup> The four U.S. service academies that are not Title IV eligible are the U.S. Naval Academy, the U.S. Military Academy, the U.S. Coast Guard Academy, and the U.S. Air Force Academy. The U.S. Merchant Marine Academy is Title IV eligible. Data for all five institutions are included in the tables and counts of institutions unless otherwise indicated.

Table 1 provides an overview of the number of institutions responding to the components that comprise the fall and winter collection periods. This table is updated after each collection period’s data release. Appendix A provides a summary of responses for the previous collection year for comparison purposes. Appendix B shows a table of institutions with a Title IV status change.<sup>4</sup> Of the 136 institutions that were Title IV in 2020-21 but are no longer Title IV in 2021–22, ninety-nine were for-profit institutions.

— Data currently not available.

<sup>1</sup>Not required to respond to the survey component because the institutions were new, were closed, did not enroll students, or did not meet the criteria for the component (e.g., some components only apply to degree-granting institutions).

<sup>2</sup>Due to unit nonresponse, data were imputed for nonresponding institutions.

<sup>3</sup>Does not include the 70 administrative offices. An administrative office is a system or central office in a multi-campus environment.

NOTE: Title IV institutions are those with a written agreement with the U.S. Department of Education that allows the institution to participate in any of the Title IV federal student financial assistance programs. The four U.S. service academies that are not Title IV eligible are included in the Integrated Postsecondary Education Data System (IPEDS) universe because they are federally funded and open to the public and are included in this table. Definitions for terms used in this table may be found in the IPEDS online glossary located at <https://surveys.nces.ed.gov/ipeds/public/glossary>.

<sup>4</sup> An institution may be classified as changing Title IV status for the following reasons: it closed, it no longer provides federal funded financial assistance, it lost Title IV eligibility, it combined or merged with another institution, it is new, it began to provide federal funded financial assistance, or it regained Title IV eligibility.

<sup>1</sup> The four U.S. service academies that are not Title IV eligible are included in the Integrated Postsecondary Education Data System (IPEDS) universe because they are federally funded and open to the public and are included in this table.

<sup>2</sup>The net change indicated in this table is the result of changes to Title IV status (number that became Title IV since 2020–21 minus the number that were no longer Title IV as of 2021–22). Institutions that changed sector between 2020–21 and 2021–22 are not reflected in this column.

NOTE: Title IV institutions are those with a written agreement with the U.S. Department of Education that allows the institution to participate in any of the Title IV federal student financial assistance programs.
