₩IPEDS

Integrated Postsecondary Education Data System (IPEDS)

IPEDS Trend Generator User Guide

July 2018

550 12th Street, SW | Washington, DC 20202 | <u>nces.ed.gov/ipeds</u>

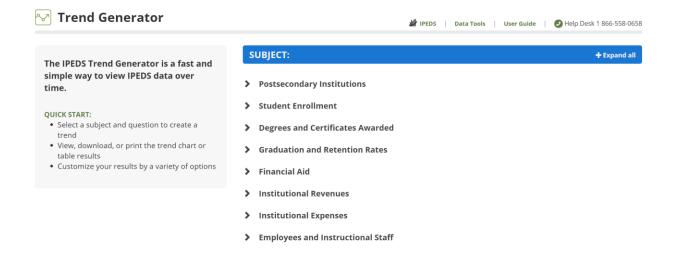

1 Introduction

Under the direction of the U.S. Department of Education's National Center for Education Statistics (NCES), the Integrated Postsecondary Education Data System (IPEDS) Trend Generator is a tool designed to provide users with a quick and easy way to view and analyze frequently accessed IPEDS data over time. From optimizing printed reports to effectively navigating and interpreting the available data, this user guide provides guidance for various features, functions, and capabilities.

All of the information in the Trend Generator is based on data collected by NCES through the IPEDS Data Collection System. For additional information about the IPEDS data collection, visit <u>https://nces.ed.gov/ipeds/report-your-data</u>.

1.1 Homepage

The homepage of the Trend Generator web application displays links to the IPEDS Use the Data portal (Data Tools), IPEDS website homepage, and IPEDS Trend Generator user guide.

1.2 Hints & Tips

> Institutional Revenues

> Institutional Expenses

> Employees and Instructional Staff

Below are some helpful hints and tips for using the IPEDS Trend Generator. Detailed tips relating to specific functions within the application can be found in the corresponding sections of this guide.

- For assistance with any questions or problems related to system usage, please contact the IPEDS Data Tools Help Desk, toll-free, at 1-866-558-0658 or at <u>ipedstools@rti.org</u>.
- Helpful links are available at the top of all webpages. See the highlighted area in the following image:

2 Using the Trend Generator

2.1 Select Question

On the main page, select a subject to view the available questions, then click on a question to continue.

Market Trend Generator

The IPEDS Trend Generator is a fast and simple way to view IPEDS data over time.

QUICK START:

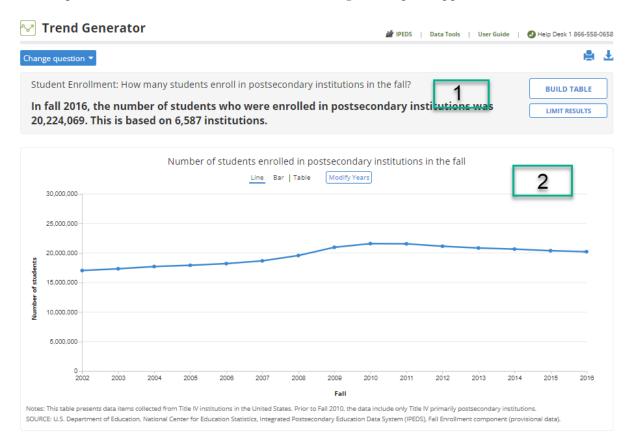

- Select a subject and question to create a trend
- View, download, or print the trend chart or table results
- Customize your results by a variety of options

SUBJECT: — Collapse all Select this question to see the number of students that have enrolled in postsecondary institutions in the United States in > Postsecondary Ins the fall of a given year. Data Student Enrollmer include students who have enrolled for credit in the fall of an How many student itutions annually? academic year. How many students enroll in postsecondary institutions in the fall? How many students are enrolled in postsecondary institutions as transfer-in students in the fall? How many students are enrolled in postsecondary institutions for the first time in the fall?

- > Degrees and Certificates Awarded
- > Graduation and Retention Rates
- > Financial Aid
- > Institutional Revenues
- > Institutional Expenses
- > Employees and Instructional Staff

2.2 View Answer

Once a question is selected, an Answer view consisting of two parts appears:

2.2.1 Answer Part 1: Latest Year Result

The first part of the answer page consists of an answer and the number of institutions used to determine the answer in the most recent year.

The most recent year's answer will remain visible on all views of the application, including the print view and Excel/CSV download options (for more instructions on download and printing features, see section 2.6 Print & Download).

2.2.2 Answer Part 2: Trend Result over Years

Go to section 2.5.1 Trending the Main Answer

2.2.3 Other Actions on the Answer Page

You can limit the result to view the answer for a subset of schools by clicking on the *Limit Result* button.

Student Enrollment: How many students enroll in postsecondary institutions in the fall? In fall 2016, the number of students who were enrolled in postsecondary institutions was 20,224,069. This is based on 6,587 institutions.	BUILD TABLE
For more instructions on limiting the results, go to section 2.3 Limit Result. In order to use the answer to build a table, click on <i>Build Table</i> button.	

BUILD TABLE

LIMIT RESULTS

Student Enrollment: How many students enroll in postsecondary institutions in the fall?

In fall 2016, the number of students who were enrolled in postsecondary institutions was 20,224,069. This is based on 6,587 institutions.

For detailed instructions, visit section <u>2.4 Build Table</u>.

2.3 Limit Result

To limit the results so that the answer, trend, and tables are only displayed for certain schools, click on *Limit Result*. This *Limit Result* option appears in the main answer section, on all pages of the application:

Student Enrollment: How many students enroll in postsecondary institutions in the fall?	BUILD TABLE
In fall 2016, the number of students who were enrolled in postsecondary institutions was 20,224,069. This is based on 6,587 institutions.	LIMIT RESULTS

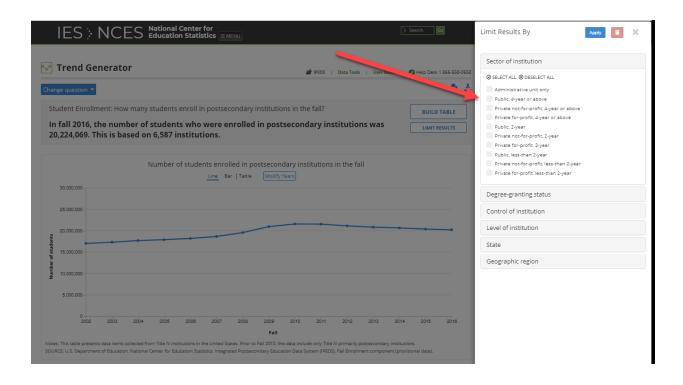

2.3.1 Where do the Limiting Variables Appear?

Clicking the *Limit Result* option will open a panel at the right side of the page with optional (limiting) variables, such as "Sector of institution", "State", and others in the below image.

Trend Generator	🏙 IPEDS Data Tools User Guide	Help Desk 1 866-558-0658	Sector of institution	
nge question 👻		e t	Degree-granting status	
			Control of institution	
tudent Enrollment: How many students enroll in posts		BUILD TABLE	Level of institution	
n fall 2016, the number of students who were 0,224,069. This is based on 6,587 institutions.	enrolled in postsecondary institutions was	LIMIT RESULTS	State	
,,			Geographic region	
Number of students en	rolled in postsecondary institutions in the fall			
30.000.000	Bar Table Modify Years			
25,000,000				
20,000,000				
15.000.000				
15,000,000				
15.000.000				
15,000,000				

2.3.2 Select a Limiting Variable

Click on a variable from the right-side menu (in the above image) to select it and view the available categories for that variable. By default, no categories are selected:

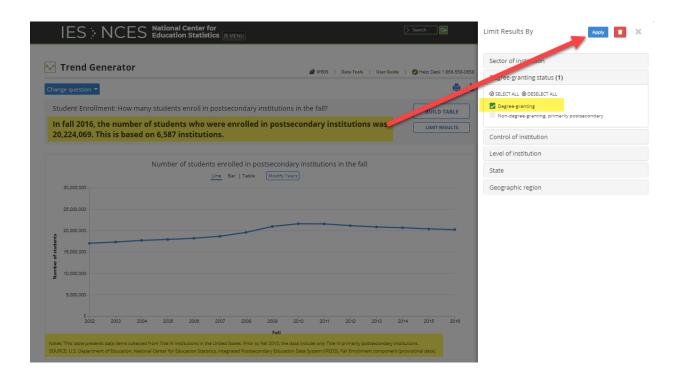

2.3.3 Use the Apply and Delete Buttons

In the previous picture, you can see two main buttons at the top the right-side menu:

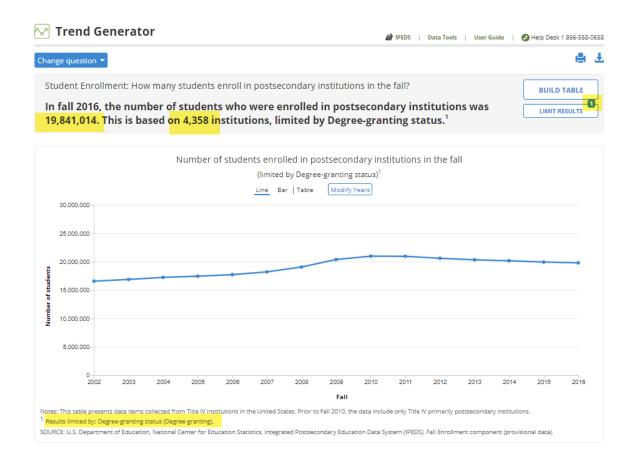

Apply	Allows the user to save the selected variables and categories and apply a limit to the number of institutions used to display the result.
	Allows the user to delete all the selected variables used to limit results and reset to the initial result.

2.3.4 How It Works

Select one or more categories, for one or more variables; then click *Apply* to view the answer.

Once the new categories are applied, new information will be appended to the modified answer and to the footnotes of the table/trends (see image below):

In sum, modifying (adding or removing) limiting variable(s) and their respective values (categories) affects all results through the application:

- changes the number of institution used to calculate the result
- alters the most recent year's answer for all institutions
- modifies the values for selected categories in a text-table
- limits the answer in a trend chart/table
- add new items to the footnotes, explaining which variable/categories are selected

2.4 Build Table

2.4.1 Navigate to the Build Table Page

To build a table from the answer provided, click Build Table in the main answer section.

2.5 Show Trends

Trends automatically appear on the main answer page (see section 2.5.1) or can be requested by clicking on trend-able values from a one/two-dimensional text-table (see detailed explanation in section 2.5.2).

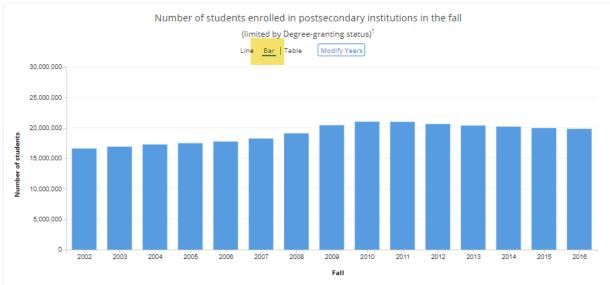

2.5.1 Trending the Main Answer

After selecting a new question, the application returns an answer composed of two parts. The first part contains the answer for the selected question. The second part presents answer's value over years. Trend values appear in a default line chart view. The application allows two additional view types for a trend, namely bar chart and text-table:

LINE CHART VIEW

BAR CHART VIEW

Notes: This table presents data items collected from Title IV institutions in the United States. Prior to Fall 2010, the data include only Title IV primarily postsecondary institutions. ¹ Results limited by: Degree-granting status (Degree-granting).

2002	16,611,711

Notes: This table presents data items collected from Title IV institutions in the United States. Prior to Fall 2010, the data include only Title IV primarily postsecondary institutions.

 1 Results limited by: Degree-granting status (Degree-granting).

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall Enrollment component (provisional data).

2.5.2 Trend from a Table

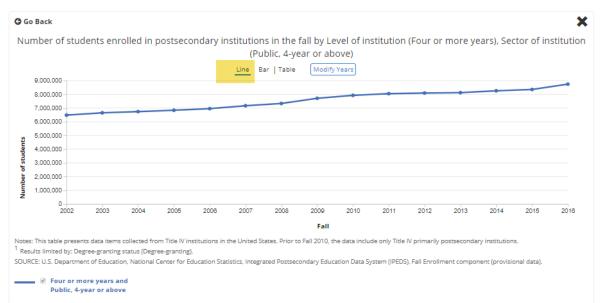

Once a table is created on the Build Table page (see section 2.4 Build Table), many of the columns, rows, or cells can be trended. When the mouse hovers over a column, row, or cell that allows trends, a highlighted area appears and will display a trend icon \mathbf{II} . This icon in a cell indicates a trend that can be generated for that field.

TRENDING BY CELL

Clicking on a table cell, generates a trend result for the value over years. See an example below:

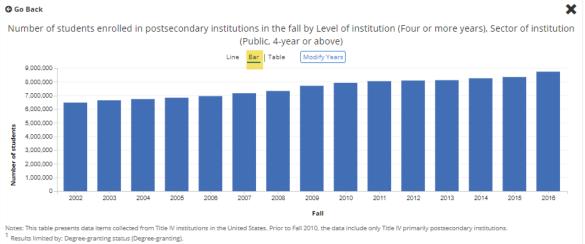

🕒 Go Ba	ck			×
Select v	variables from	n the row/column options below to bu	ild a text table and create new trends f	or table values over time.

otes: This table o	the values in this ro	w over time	data include only Title IV primarily post		

After clicking on a row (or a column) header, the application navigates to the next page and generates a trend in three view types: line, bar, and text-table.

Notes: This table presents data items collected from Title IV institutions in the United States. Prior to Fall 2010, the data include only Title IV primarily postsecondary institutions. ¹ Results limited by: Degree-granting status (Degree-granting).

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall Enrollment component (provisional data).

Public, 4-year or above

or above

21

	secondary institutions in the fall by Level of institutio Line Bar Table Modify Years	
qg		
Fall	Public, 4-year or above	Private not-for-profit, 4-year or ab
2002	6,481,613	3,218,
2003	6,649,441	3,297,
2004	6,736,536	3,369,
2005	6,837,605	3,411,
2006	6,955,013	3,473,
2007	7,166,661	3,537,
2008	7,331,809	3,626,
2009	7,709,197	3,730,
2010	7,924,771	3,822,
2011	8,047,729	3,887,
2012	8,092,683	3,915,
2013	8,120,417	3,941,
2013	8,120,417	3,941

Notice that the charts and text-table consist of two items. Each item (e.g. public, 4-year or above) represents a category of the "Level of student" row variable that the user trended over years.

2.5.3 Modifying Trend Chart Items

A chart can consist of up to 5 or 6 lines depending on the trended variable. While most variables will generate 5 lines, Race/ethnicity and Sector variables can include up to 6 lines at a time in a chart. At all times, the text-table view will present all the categories available in the trended table dimension (column or variable).

To illustrate, select the "Geographic region" as a row variable, and then click on the row value "<u>New</u> <u>England CT ME MA NH RI VT</u>" to create a trend for the number of students in the selected "Sector of institution" categories over time:

II Click on a column title, row title, or cell to trend value(s) over time (except for totals)

Number of students enrolled in postsecondary institutions in the fall, by geographic region and sector of institution: 2016 (based on 4358 institutions, limited by Degree-granting status).¹

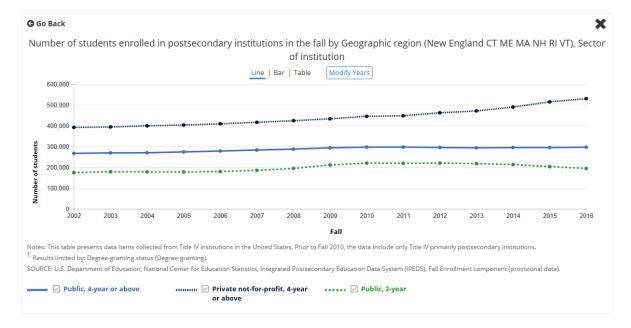

🔀 Swap	Sector of institution			
Geographic region	Total	Public, 4-year or above	ျ Private not-for-profit, 4-year or above	.ıl Public, 2-year

Notes: This table presents data items collected from Title IV institutions in the United States. Prior to Fall 2010, the data include only Title IV primarily postsecondary institutions

¹ Results limited by: Degree-granting status (Degree-granting).

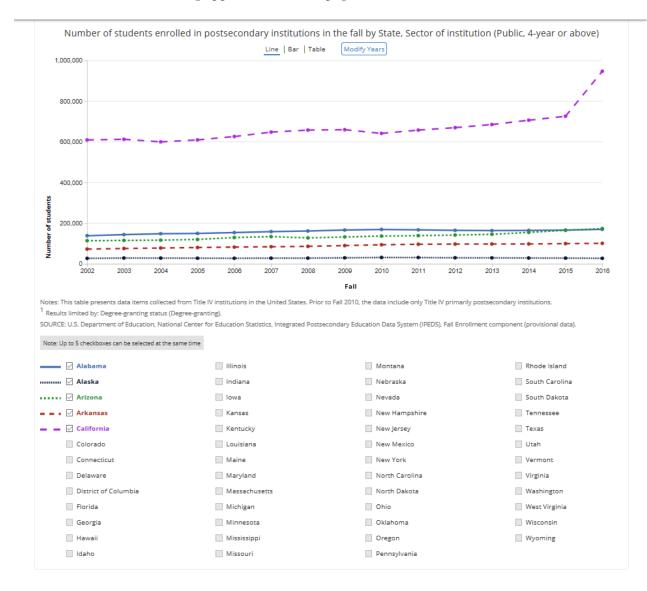

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall Enrollment component (provisional data).

A trend with three lines representing the column variable categories will appear on the chart:

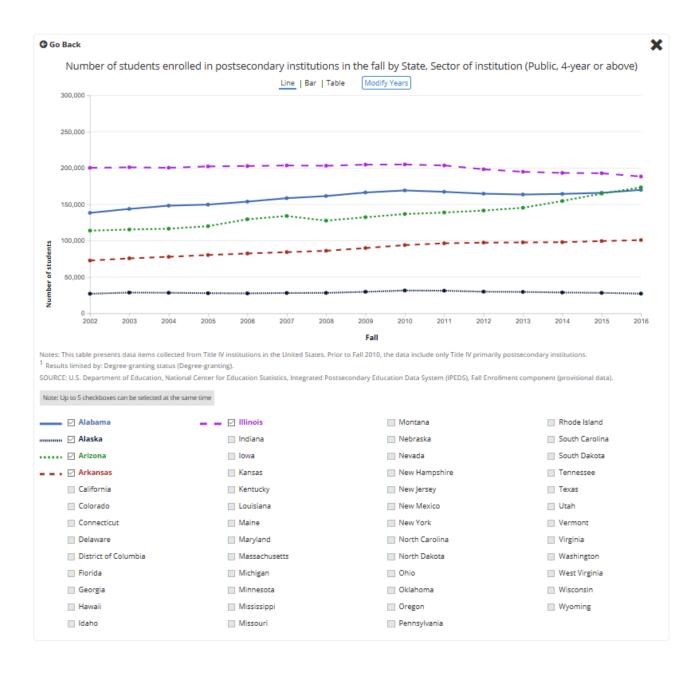

The user will have the option to modify categories on the chart, in order to conduct comparisons and visualize non-default items. For instance, if the user deselects the "public, 2-year" category in the legend below the chart, the line will disappear from the chart area.

In order to add a new category to a chart, the user must deselect an existing category to avoid the maximum limit (5-6 lines) on the chart. When the maximum limit is reached, the unchecked boxes in the legend will become disabled. To illustrate, a user may select "State" as row variable on the "Build Table" page, and then click on the column header "Public, 4-year or above". After the click event, a line chart with 5 lines trending appear on the next page:

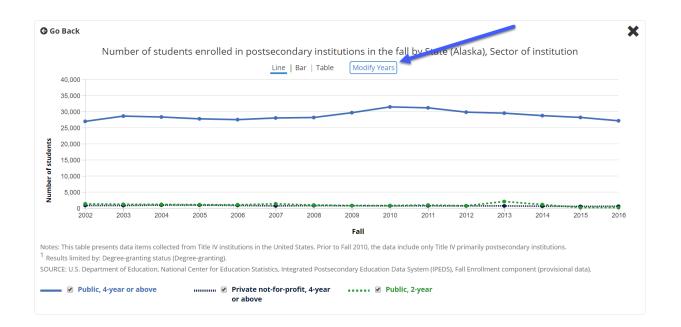

Notice that in the above chart, the legend has 5 checked items (highlighted). The remaining items are disabled, and no more states can be selected, unless one checked box is deselected. To illustrate, deselect "California" from the legend; notice that the remaining states will become enabled. Then select "Illinois." This action will re-increment the count of selected checkboxes to the maximum allowed 5; consequently, the unselected legend items will be disabled.

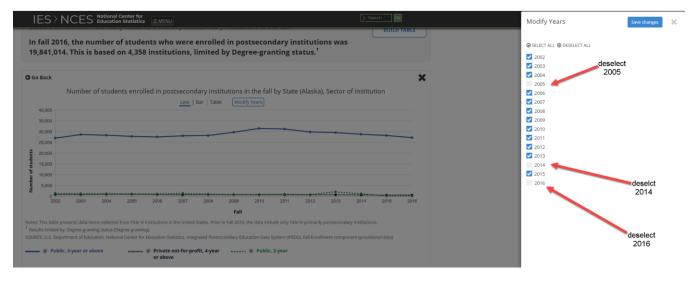

2.5.4 Modifying Trend Years

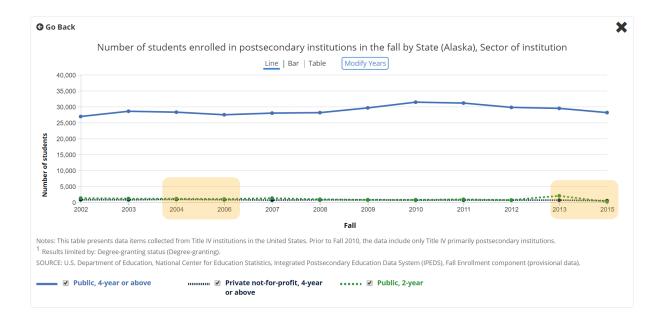

To change the years displayed for any trend screen (chart or table) click on the *Modify Year* button at the top of the chart/table.

Clicking Modify Years option will open a panel at the right of the page:

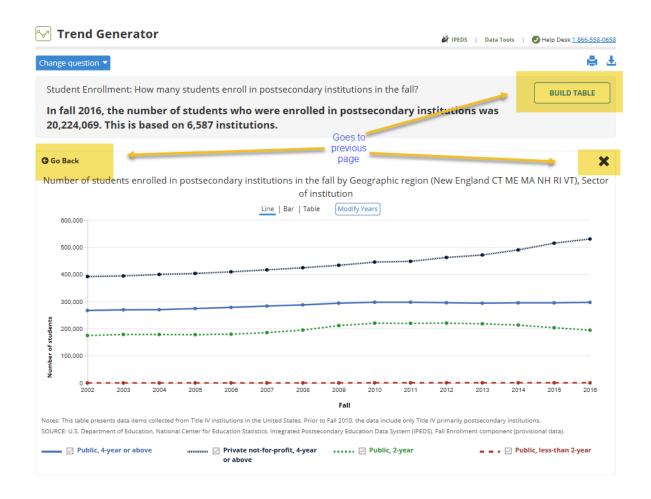

By default, all years are selected. Select/Deselect one or more years and click *Save Changes*. The changes will be displayed instantly in the chart and graph:

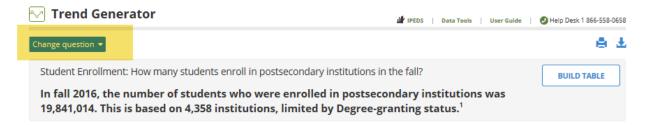

2.5.5 Returning to the Table View

In order to return to the previous page, the user has several options, by clicking on the buttons illustrated in the following picture with yellow highlights:

2.6 Change Subject or Question

In all the screens of the application, the user may change the subject and select a new question. Above the answer view, the list of subjects and questions will be available through the "change question" list menu:

Click on the "Change Question" area (highlighted above) to show a list of subjects and questions, then click on a subject to view list of question(s) under it:
