

The National Assessment of Educational Progress (NAEP) assesses reading on a 0-500 point scale. In 2003, New York City Public Schools was one of nine urban districts that voluntarily participated in the NAEP reading assessment on a trial basis.

Overall Reading Results for New York City

- In 2003, the average scale score for fourth-grade students in New York City was 210. This was not found to be significantly different¹ from the average score in 2002 (206).
- New York City's average score (210) in 2003 was higher than that of public schools in large central cities² (205), and lower than that of New York (222).
- The percentage of students in New York City who performed at or above the NAEP *Proficient* level was 22 percent in 2003. This percentage was not found to be significantly different from 2002 (19 percent).

Student Percentage at NAEP Achievement Levels

NOTE: The NAEP reading scale ranges from 0 to 500, with the achievement levels corresponding to the following points: *Below Basic*, 207 or lower; *Basic*, 208-237; *Proficient*, 238-267; *Advanced*, 268 or above.

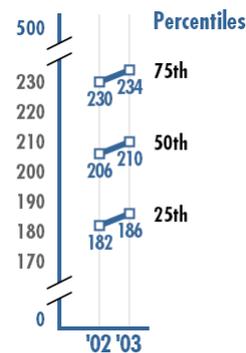

Performance of NAEP Reporting Groups in New York City

Reporting groups	Percentage of students ³	Average Score	Percentage of students at			
			Below <i>Basic</i>	<i>Basic</i>	<i>Proficient</i>	<i>Advanced</i>
Male	50	204	54	28	14	3
Female	50	216	40	34	20	6
White	14	231	23	33	31	14
Black	37	201	57	30	11	2
Hispanic	37	205	53	31	14	2
Asian/Pacific Islander	11	227	28	34	29	9
American Indian/Alaska Native	1	---	---	---	---	---
Free/reduced-price school lunch						
Eligible	89 ↑	206	51	31	15	3
Not eligible	9	241 ↑	14 ↓	33	35	19

Average Score Gaps Between Selected Groups

- In 2003, male students in New York City had an average score that was lower than that of female students (12 points). This performance gap was not significantly different from that of 2002 (14 points).
- In 2003, White students had an average score that was higher than that of Black students (30 points). This performance gap was not significantly different from that of 2002 (29 points).
- In 2003, White students had an average score that was higher than that of Hispanic students (26 points). This performance gap was not significantly different from that of 2002 (25 points).
- In 2003, students who were not eligible for free/reduced-price school lunch had an average score that was higher than that of students who were eligible (34 points). This performance gap was wider than that of 2002 (18 points).

Reading Scale Scores at Selected Percentiles

An examination of scores at different percentiles on the 0-500 NAEP reading scale at each grade indicates how well students at lower, middle, and higher levels of the distribution performed.

The estimate rounds to zero.

--- Reporting standards not met; sample size insufficient to permit a reliable estimate.

* Significantly different from 2003.

↑ Significantly higher than, ↓ lower than 2002.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples and changes in sample sizes. NAEP sample sizes have increased since 2002 compared to previous years, resulting in smaller detectable differences than in previous assessments.

² "Large central city" includes nationally representative public schools located in large central cities within metropolitan statistical areas as defined by the federal Office of Management and Budget. It is not synonymous with "inner city."

³ For comparison, minority students comprised 77 percent of students in large central city public schools and 41 percent in public schools nationally. Also, students eligible for free/reduced-price school lunch comprised 69 percent of students in large central city public schools and 44 percent in public schools nationally.

NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for Free/reduced-price lunch is not displayed. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
