

The National Assessment of Educational Progress (NAEP) assesses mathematics on a 0-500 point scale. In 2005, Atlanta City School District was one of ten urban districts that voluntarily participated in the NAEP mathematics assessment on a trial basis.

Overall Mathematics Results for Atlanta	Student Percentages at NAEP Achievement Levels																				
<ul style="list-style-type: none"> In 2005, the average scale score for eighth-grade students in Atlanta was 245. This was not significantly different from their average score in 2003 (244).¹ Atlanta's average score (245) in 2005 was lower than that of public schools in large central cities² (265). The percentage of students in Atlanta who performed at or above the NAEP <i>Proficient</i> level was 7 percent in 2005. This percentage was not significantly different from that in 2003 (6 percent). The percentage of students in Atlanta who performed at or above the NAEP <i>Basic</i> level was 31 percent in 2005. This percentage was not significantly different from that in 2003 (30 percent). 	<p>Atlanta (public)</p> <table border="1"> <tr> <td>2003</td> <td>70</td> <td>24</td> <td>5</td> <td>1</td> </tr> <tr> <td>2005</td> <td>69</td> <td>24</td> <td>5</td> <td>1</td> </tr> </table> <p>Large central city (public)</p> <table border="1"> <tr> <td>2005</td> <td>50</td> <td>34</td> <td>14</td> <td>3</td> </tr> </table> <p>Nation (public)</p> <table border="1"> <tr> <td>2005</td> <td>32</td> <td>39</td> <td>23</td> <td>6</td> </tr> </table> <p>Legend: Below Basic, Basic, Proficient, Advanced</p> <p>NOTE: The NAEP grade 8 mathematics achievement levels correspond to the following scale points: Below <i>Basic</i>, 261 or lower; <i>Basic</i>, 262–298; <i>Proficient</i>, 299–332; <i>Advanced</i>, 333 or above.</p>	2003	70	24	5	1	2005	69	24	5	1	2005	50	34	14	3	2005	32	39	23	6

Asian/Pacific Islander	#	‡	‡	‡	‡	‡	
American Indian/Alaska Native	#	‡	‡	‡	‡	‡	
Eligible for free/reduced-price school lunch	78	240	74	26	3	#	
Not eligible for free/reduced-price school lunch	19†	266	48	52	22	5	

Average Score Gaps Between Selected Groups	Mathematics Scale Scores at Selected Percentiles									
<ul style="list-style-type: none"> In 2005, male students in Atlanta had an average score that was not significantly different from that of female students. In 2003, there was no significant difference between the average score of male and female students. Data are not reported for White students in 2005, because reporting standards were not met. Therefore, the performance gap results are not reported. Data are not reported for White students in 2005, because reporting standards were not met. Therefore, the performance gap results are not reported. In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 26 points. In 2003, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 27 points. In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 47 points. In 2003, the score gap between students at the 75th percentile and students at the 25th percentile was 47 points. 	<p>Score 500</p> <p>Percentiles</p> <table border="1"> <tr> <td>75th</td> <td>2003: 267</td> <td>2005: 268</td> </tr> <tr> <td>50th</td> <td>2003: 244</td> <td>2005: 245</td> </tr> <tr> <td>25th</td> <td>2003: 220</td> <td>2005: 221</td> </tr> </table> <p>Year '03 '05</p> <p>Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.</p>	75th	2003: 267	2005: 268	50th	2003: 244	2005: 245	25th	2003: 220	2005: 221
75th	2003: 267	2005: 268								
50th	2003: 244	2005: 245								
25th	2003: 220	2005: 221								

The estimate rounds to zero. ‡ Reporting standards not met.
 * Significantly different from 2005. † Significantly higher than 2003. ‡ Significantly lower than 2003.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Atlanta were 1 percent and percentage rounds to zero in 2005, respectively. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
² "Large central city" includes public schools located in large central cities (population 250,000 or more) within metropolitan statistical areas as defined by the federal Office of Management and Budget. It is not synonymous with "inner city."
³ For comparison, non-White students comprised 77 percent of students in large central city public schools and 40 percent in public schools nationally. Also, students eligible for free/reduced-price school lunch comprised 62 percent of students in large central city public schools and 39 percent in public schools nationally.
 NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price school lunch and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/mathematics/tuda.asp> for additional results and detailed information.
