

2009 Science Assessment Content

Guided by a new framework, the NAEP science assessment was updated in 2009 to keep the content current with key developments in science, curriculum standards, assessments, and research. The 2009 framework organizes science content into three broad content areas.

Physical science includes concepts related to properties and changes of matter, forms of energy, energy transfer and conservation, position and motion of objects, and forces affecting motion.

Life science includes concepts related to organization and development, matter and energy transformations, interdependence, heredity and reproduction, and evolution and diversity.

Earth and space sciences includes concepts related to objects in the universe, the history of the Earth, properties of Earth materials, tectonics, energy in Earth systems, climate and weather, and biogeochemical cycles.

The 2009 science assessment was composed of 143 questions at grade 4, 162 at grade 8, and 179 at grade 12. Students responded to only a portion of the questions, which included both multiple-choice questions and questions that required a written response.

Scores at Selected Percentiles

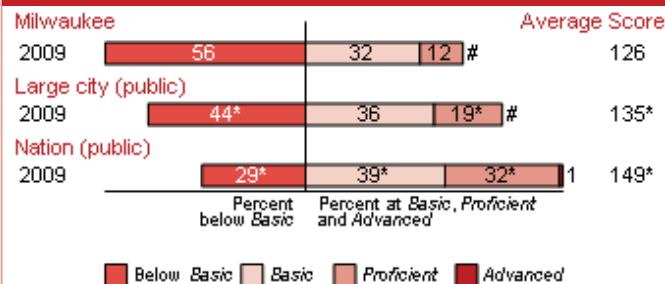

NOTE: Scores at selected percentiles on the NAEP science scale indicate how well students at lower, middle, and higher levels performed.

Overall Results

- In 2009, the average score of fourth-grade students in Milwaukee was 126. This was lower than the average score of 135 for public school students in large cities.
- The percentage of students in Milwaukee who performed at or above the NAEP *Proficient* level was 12 percent in 2009. This percentage was smaller than large cities (20 percent).
- The percentage of students in Milwaukee who performed at or above the NAEP *Basic* level was 44 percent in 2009. This percentage was smaller than large cities (56 percent).

Achievement-Level Percentages and Average Score Results

* Significantly different ($p < .05$) from Milwaukee. Significance tests were performed using unrounded numbers.
Rounds to zero.

NOTE: Detail may not sum to totals because of rounding. Large city (public) includes public schools located in the urbanized areas of cities with populations of 250,000 or more.

Results for Student Groups in 2009

Reporting Groups	Percent of students	Avg. score	Percentages at or above		Percent at Advanced
			Basic	Proficient	
Gender					
Male	51	126	44	12	#
Female	49	126	45	12	#
Race/Ethnicity					
White	12	158	81	39	1
Black	57	115	31	5	#
Hispanic	22	132	52	13	#
Asian/Pacific Islander	4	‡	‡	‡	‡
American Indian/Alaska Native	1	‡	‡	‡	‡
National School Lunch Program					
Eligible	78	120	37	7	#
Not eligible	22	148	71	31	1

Rounds to zero.

‡ Reporting standards not met.

NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for the National School Lunch Program, which provides free/reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed.

Score Gaps for Student Groups

- In 2009, male students in Milwaukee had an average score that was not significantly different from female students.
- In 2009, Black students had an average score that was 42 points lower than White students. This performance gap was not significantly different from large cities (40 points).
- In 2009, Hispanic students had an average score that was 25 points lower than White students. This performance gap was narrower than large cities (36 points).
- In 2009, students who were eligible for free/reduced-price school lunch, an indicator of low family income, had an average score that was 29 points lower than students who were not eligible for free/reduced-price school lunch. This performance gap was not significantly different from large cities (30 points).

NOTE: Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
