

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics and probability; and algebra and functions. The NAEP mathematics scale ranges from 0 to 500.

### Overall Mathematics Results for DoDDS

- In 2003, the average scale score for fourth-grade students in DoDDS was 237. This was higher<sup>1</sup> than the average score in 2000 (226), and was higher than the average score in 1996 (223).
- DoDEA/DoDDS' average score (237) in 2003 was higher than that of the nation's public schools (234).
- Of the 53 states and jurisdictions<sup>2</sup> that participated in the 2003 fourth-grade assessment, students' average scale scores in DoDDS were higher than those in 24 jurisdictions, not significantly different from those in 20 jurisdictions, and lower than those in 8 jurisdictions.
- The percentage of students in DoDEA/DoDDS who performed at or above the NAEP *Proficient* level was 31 percent in 2003. This percentage was greater than that in 2000 (21 percent), and was greater than that in 1996 (19 percent).

### Student Percentage at NAEP Achievement Levels

<sup>1</sup> Accommodations were not permitted for this assessment.

NOTE: The NAEP mathematics scale ranges from 0 to 500, with the achievement levels corresponding to the following points: *Below Basic*, 213 or lower; *Basic*, 214-248; *Proficient*, 249-281; *Advanced*, 282 or above.

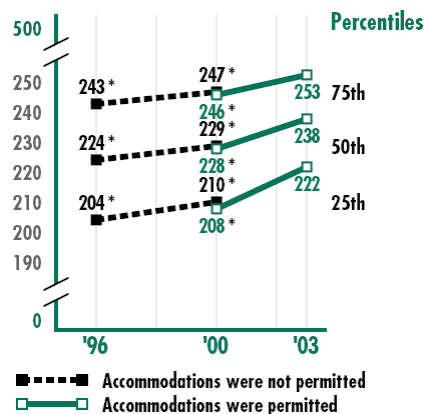

### Performance of NAEP Reporting Groups in DoDDS

Reporting groups	Percentage of students	Average Score	Percentage of students at			
			Below <i>Basic</i>	<i>Basic</i>	<i>Proficient</i>	<i>Advanced</i>
Male	51	239 ↑	14 ↓	52	31 ↑	3
Female	49	236 ↑	18 ↓	54	27 ↑	1
White	48	241 ↑	12 ↓	50	34 ↑	3
Black	22 ↑	227 ↑	25 ↓	60 ↑	15 ↑	#
Hispanic	11 ↑	233 ↑	21 ↓	54	24 ↑	1
Asian/Pacific Islander	10 ↑	240 ↑	14 ↓	48	35 ↑	2
American Indian/Alaska Native	1	---	---	---	---	---

### Average Score Gaps Between Selected Groups

- In 2003, male students in DoDEA/DoDDS had an average score that was higher than that of female students (3 points). This performance gap was not significantly different from that of 1996 (2 points).
- In 2003, White students had an average score that was higher than that of Black students (14 points). This performance gap was narrower than that of 1996 (22 points).
- In 2003, White students had an average score that was higher than that of Hispanic students (8 points). This performance gap was narrower than that of 1996 (16 points).
- Data for free/reduced-price school lunch were not available in DoDDS at grade 4 to compare gaps across assessment years.

### Mathematics Scale Scores at Selected Percentiles

An examination of scores at different percentiles on the 0–500 NAEP mathematics scale at each grade indicates how well students at lower, middle, and higher levels of the distribution performed.

# The estimate rounds to zero.

--- Reporting standards not met; sample size insufficient to permit a reliable estimate.

\* Significantly different from 2003.

↑ Significantly higher than, ↓ lower than 2000.

<sup>1</sup> Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples and changes in sample sizes. NAEP sample sizes have increased in 2003 compared to previous years, resulting in smaller detectable differences than in previous assessments.

<sup>2</sup> "Jurisdictions" includes participating states and other jurisdictions (such as the District of Columbia and the Department of Defense Dependents Schools).

NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for Free/reduced-price lunch is not displayed.

Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
