

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for District of Columbia

- In 2005, the average scale score for fourth-grade students in District of Columbia was 211. This was higher¹ than their average score in 2003 (205), and was higher than their average score in 1992 (193).
- District of Columbia's average score (211) in 2005 was lower than that of the Nation's public schools (237).
- Of the 52 states and other jurisdictions² that participated in the 2005 fourth-grade assessment, students' average scale scores in District of Columbia were lower than those in 51 jurisdictions.
- The percentage of students in District of Columbia who performed at or above the NAEP *Proficient* level was 10 percent in 2005. This percentage was greater than that in 2003 (7 percent), and was greater than that in 1992 (5 percent).
- The percentage of students in District of Columbia who performed at or above the NAEP *Basic* level was 45 percent in 2005. This percentage was greater than that in 2003 (36 percent), and was greater than that in 1992 (23 percent).

Student Percentage at NAEP Achievement Levels

¹ Accommodations were not permitted for this assessment.

NOTE: The NAEP mathematics achievement levels correspond to the following scale points: *Below Basic*, 213 or lower; *Basic*, 214–248; *Proficient*, 249–281; *Advanced*, 282 or above.

Performance of NAEP Reporting Groups in District of Columbia

Reporting groups	Percent of students	Average score	Percent below <i>Basic</i>	Percent of students at or above <i>Basic</i>	Percent of students at or above <i>Proficient</i>	Percent <i>Advanced</i>
Male	49	212↑	56↓	44↑	11↑	1
Female	51	211↑	55↓	45↑	9	1
White	4	266	1	99	78	23
Black	86	207↑	59↓	41↑	5	#
Hispanic	8	215↑	49↓	51↑	11	1
Asian/Pacific Islander	1	‡	‡	‡	‡	‡
American Indian/Alaska Native	#	‡	‡	‡	‡	‡
Eligible for free/reduced-price school lunch	76↑	206↑	62↓	38↑	5↑	#
Not eligible for free/reduced-price school lunch	22	229↑	32↓	68↑	27↑	5

Average Score Gaps Between Selected Groups

- In 2005, male students in District of Columbia had an average score that was not found to be significantly different from that of female students. In 1992, there was no significant difference between the average score of male and female students.
- In 2005, Black students had an average score that was lower than that of White students by 58 points. In 1992, the average score for Black students was lower than that of White students by 62 points.
- In 2005, Hispanic students had an average score that was lower than that of White students by 51 points. In 1992, the average score for Hispanic students was lower than that of White students by 56 points.
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 23 points. This performance gap was narrower than that of 1996 (35 points).
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 38 points. In 1992, the score gap between students at the 75th percentile and students at the 25th percentile was 41 points.

Mathematics Scale Scores at Selected Percentiles

Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels of the distribution performed.

The estimate rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2005.

↑ Significantly higher than 2003. ↓ Significantly lower than 2003.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates across years for students with disabilities (2% nationally in 2005) and English language learners (1% nationally in 2005) in the NAEP samples. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.

² "Other Jurisdictions" refers to the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price lunch and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
