

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

**Overall Mathematics Results for New Mexico**

- In 2005, the average scale score for fourth-grade students in New Mexico was 224. This was not significantly different from<sup>1</sup> their average score in 2003 (223), and was higher than their average score in 1992 (213).
- New Mexico's average score (224) in 2005 was lower than that of the Nation's public schools (237).
- Of the 52 states and other jurisdictions<sup>2</sup> that participated in the 2005 fourth-grade assessment, students' average scale scores in New Mexico were higher than those in 1 jurisdiction, not significantly different from those in 1 jurisdiction, and lower than those in 49 jurisdictions.
- The percentage of students in New Mexico who performed at or above the NAEP *Proficient* level was 19 percent in 2005. This percentage was not significantly different from that in 2003 (17 percent), and was greater than that in 1992 (11 percent).
- The percentage of students in New Mexico who performed at or above the NAEP *Basic* level was 65 percent in 2005. This percentage was not significantly different from that in 2003 (63 percent), and was greater than that in 1992 (50 percent).

**Student Percentage at NAEP Achievement Levels**

<sup>1</sup> Accommodations were not permitted for this assessment.

NOTE: The NAEP mathematics achievement levels correspond to the following scale points: Below Basic, 213 or lower; Basic, 214–248; Proficient, 249–281; Advanced, 282 or above.

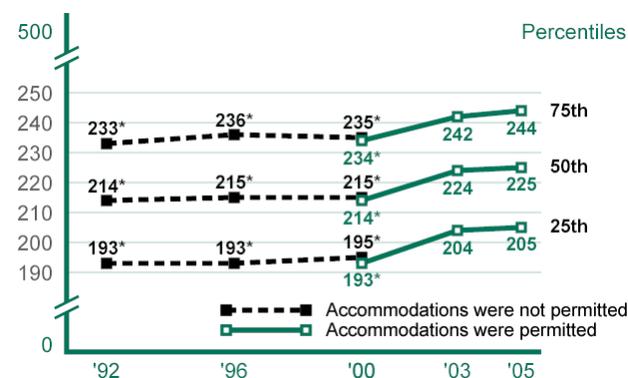

**Performance of NAEP Reporting Groups in New Mexico**

Reporting groups	Percent of students	Average score	Percent below Basic	Percent of students at or above Basic	Percent Proficient	Percent Advanced
Male	51	225	35	65	21	2
Female	49	223	36	64	17	1
White	30	238	17	83	34	4
Black	2	213	55	45	6	#
Hispanic	56	218	43	57	13	1
Asian/Pacific Islander	1	‡	‡	‡	‡	‡
American Indian/Alaska Native	10	217	44	56	9	#
Eligible for free/reduced-price school lunch	69	217	43	57	12	#
Not eligible for free/reduced-price school lunch	27	238	18	82	35	4

**Average Score Gaps Between Selected Groups**

- In 2005, male students in New Mexico had an average score that was not found to be significantly different from that of female students. In 1992, there was no significant difference between the average score of male and female students.
- In 2005, Black students had an average score that was lower than that of White students by 25 points. In 1992, the average score for Black students was lower than that of White students by 22 points.
- In 2005, Hispanic students had an average score that was lower than that of White students by 20 points. In 1992, the average score for Hispanic students was lower than that of White students by 21 points.
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 20 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 24 points.
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 38 points. In 1992, the score gap between students at the 75th percentile and students at the 25th percentile was 40 points.

**Mathematics Scale Scores at Selected Percentiles**

Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels of the distribution performed.

# The estimate rounds to zero.

‡ Reporting standards not met.

\* Significantly different from 2005.

↑ Significantly higher than 2003. ↓ Significantly lower than 2003.

<sup>1</sup> Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates across years for students with disabilities (2% nationally in 2005) and English language learners (1% nationally in 2005) in the NAEP samples. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.

<sup>2</sup> "Other Jurisdictions" refers to the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price lunch and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
