

The National Assessment of Educational Progress (NAEP) assesses science in two major dimensions: Fields of Science (Earth, Physical, and Life) and Knowing and Doing Science (Conceptual Understanding, Scientific Investigation, and Practical Reasoning). The NAEP science scale ranges from 0 to 300. Scales are created separately for each grade.

Overall Science Results for Utah

- In 2005, the average scale score for fourth-grade students in Utah was 155. This was not significantly different from their average score in 2000 (154).¹
- Utah's average score (155) in 2005 was higher than that of the nation's public schools (149).
- Of the 44 states and one jurisdiction that participated in the 2005 fourth-grade assessment, students' average scale score in Utah was higher than those in 25 jurisdictions, not significantly different from those in 11 jurisdictions, and lower than those in 8 jurisdictions.²
- The percentage of students in Utah who performed at or above the NAEP *Proficient* level was 33 percent in 2005. This percentage was not significantly different from that in 2000 (31 percent).
- The percentage of students in Utah who performed at or above the NAEP *Basic* level was 74 percent in 2005. This percentage was not significantly different from that in 2000 (73 percent).

Student Percentages at NAEP Achievement Levels

¹ Accommodations were not permitted for this assessment.
 NOTE: The NAEP grade 4 science achievement levels correspond to the following scale points: *Below Basic*, 137 or lower; *Basic*, 138–169; *Proficient*, 170–204; *Advanced*, 205 or above.

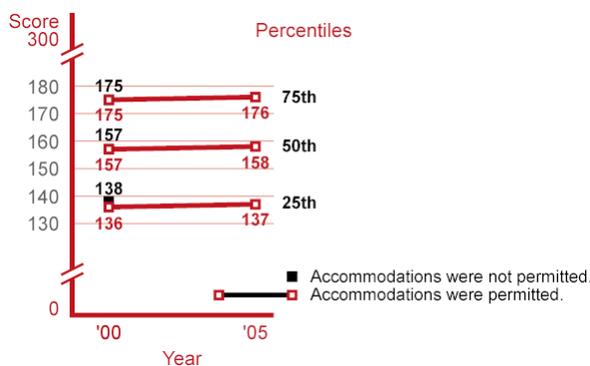

Performance of NAEP Reporting Groups in Utah: 2005

Reporting groups	Percent of students	Average score	Percent below Basic	Percent of students at or above Basic	Percent Proficient	Percent Advanced
Male	52	158	24	76	36	4
Female	48	153	28	72	29	2
White	82	160	20	80	37	3
Black	2	‡	‡	‡	‡	‡
Hispanic	12	133 [†]	55	45	10	#
Asian/Pacific Islander	3	147	37	63	21	2
American Indian/Alaska Native	1	‡	‡	‡	‡	‡
Eligible for free/reduced-price school lunch	37 [†]	144	41	59	19	1
Not eligible for free/reduced-price school lunch	59	163	17	83	41	4

Average Score Gaps Between Selected Groups

- In 2005, male students in Utah had an average score that was higher than that of female students by 5 points. In 2000, the average score for male students was higher than that of female students by 6 points.
- Data are not reported for Black students in 2005, because reporting standards were not met. Therefore, the performance gap results are not reported.
- In 2005, Hispanic students had an average score that was lower than that of White students by 26 points. This performance gap was narrower than that of 2000 (35 points).
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 19 points. In 2000, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 20 points.
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 39 points. In 2000, the score gap between students at the 75th percentile and students at the 25th percentile was 39 points.

Science Scale Scores at Selected Percentiles

Scores at selected percentiles on the NAEP science scale indicate how well students at lower, middle, and higher levels performed.

The estimate rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2005.

† Significantly higher than 2000. ‡ Significantly lower than 2000.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Utah were 2 percent and 1 percent in 2005, respectively. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.

² "Jurisdiction" refers to states and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price school lunch and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
