

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

**Overall Mathematics Results for the District of Columbia**

- In 2007, the average scale score for eighth-grade students in the District of Columbia was 248. This was higher than their average score in 2005 (245) and was higher than their average score in 1990 (231).<sup>1</sup>
- The District of Columbia's average score (248) in 2007 was lower than that of the nation's public schools (280).
- Of the 52 states and other jurisdictions that participated in the 2007 eighth-grade assessment, students' average scale score in District of Columbia was lower than those in 51 jurisdictions.<sup>2</sup>
- The percentage of students in the District of Columbia who performed at or above the NAEP *Proficient* level was 8 percent in 2007. This percentage was not significantly different from that in 2005 (7 percent) and was greater than that in 1990 (3 percent).
- The percentage of students in the District of Columbia who performed at or above the NAEP *Basic* level was 34 percent in 2007. This percentage was not significantly different from that in 2005 (31 percent) and was greater than that in 1990 (17 percent).

**Percentages at NAEP Achievement Levels and Average Score**

<sup>a</sup> Accommodations were not permitted for this assessment.  
NOTE: The NAEP grade 8 mathematics achievement levels correspond to the following scale points: Below Basic, 261 or lower; Basic, 262–298; Proficient, 299–332; Advanced, 333 or above.

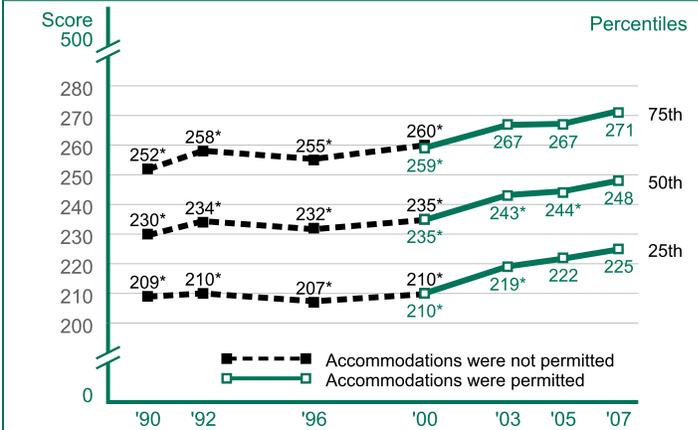

**Performance of NAEP Reporting Groups in the District of Columbia: 2007**

Reporting groups	Percent of students	Average score	Percent below Basic	Percent of students at or above Basic	Percent Proficient	Percent Advanced
Male	46	248	66	34	8	1
Female	54	248	66	34	8	1
White	3 ↓	‡	‡	‡	‡	‡
Black	88	245 ↑	69 ↓	31 ↑	6	#
Hispanic	9	251	62	38	9	1
Asian/Pacific Islander	1	‡	‡	‡	‡	‡
American Indian/Alaska Native	#	‡	‡	‡	‡	‡
Eligible for National School Lunch Program	65 ↓	243	72	28	4	#
Not eligible for National School Lunch Program	35 ↑	259	55	45	15	2 ↓

**Average Score Gaps Between Selected Groups**

- In 2007, male students in the District of Columbia had an average score that was not significantly different from that of female students. In 1990, there was no significant difference between the average score of male and female students.
- Data are not reported for White students in 2007, because reporting standards were not met. Therefore, the performance gap results with Black students are not reported.
- Data are not reported for White students in 2007, because reporting standards were not met. Therefore, the performance gap results with Hispanic students are not reported.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 16 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 19 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 47 points. In 1990, the score gap between students at the 75th percentile and students at the 25th percentile was 43 points.

**Mathematics Scores at Selected Percentiles**

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

# Rounds to zero. ‡ Reporting standards not met.  
\* Significantly different from 2007. ↑ Significantly higher than 2005. ↓ Significantly lower than 2005.  
<sup>1</sup> Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in District of Columbia were 9 percent and 1 percent in 2007, respectively. For more information on NAEP significance testing see <http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical>.  
<sup>2</sup> "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.  
NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
