

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for Oklahoma

- In 2007, the average scale score for eighth-grade students in Oklahoma was 275. This was higher than their average score in 2005 (271) and was higher than their average score in 1990 (263).¹
- Oklahoma's average score (275) in 2007 was lower than that of the nation's public schools (280).
- Of the 52 states and other jurisdictions that participated in the 2007 eighth-grade assessment, students' average scale score in Oklahoma was higher than those in 8 jurisdictions, not significantly different from those in 8 jurisdictions, and lower than those in 35 jurisdictions.²
- The percentage of students in Oklahoma who performed at or above the NAEP *Proficient* level was 21 percent in 2007. This percentage was not significantly different from that in 2005 (21 percent) and was greater than that in 1990 (13 percent).
- The percentage of students in Oklahoma who performed at or above the NAEP *Basic* level was 66 percent in 2007. This percentage was not significantly different from that in 2005 (63 percent) and was greater than that in 1990 (52 percent).

Percentages at NAEP Achievement Levels and Average Score

^a Accommodations were not permitted for this assessment.

NOTE: The NAEP grade 8 mathematics achievement levels correspond to the following scale points: *Below Basic*, 261 or lower; *Basic*, 262–298; *Proficient*, 299–332; *Advanced*, 333 or above.

Performance of NAEP Reporting Groups in Oklahoma: 2007

Reporting groups	Percent of students	Average score	Percent below <i>Basic</i>	Percent of students at or above		Percent <i>Advanced</i>
				<i>Basic</i>	<i>Proficient</i>	
Male	49	277 ↑	32	68	24	4
Female	51	273	35	65	18	2
White	59	280	26	74	25	4
Black	9	258 ↑	57	43	9	1
Hispanic	8	259	54	46	8	#
Asian/Pacific Islander	2	‡	‡	‡	‡	‡
American Indian/Alaska Native	21	269	40	60	17	2
Eligible for National School Lunch Program	51	264 ↑	46	54	13	1
Not eligible for National School Lunch Program	49	285	21	79	30	6

Average Score Gaps Between Selected Groups

- In 2007, male students in Oklahoma had an average score that was higher than that of female students by 4 points. In 1990, the average score for male students was higher than that of female students by 5 points.
- In 2007, Black students had an average score that was lower than that of White students by 22 points. This performance gap was narrower than that of 1990 (32 points).
- In 2007, Hispanic students had an average score that was lower than that of White students by 21 points. Data are not reported for Hispanic students in 1990, because reporting standards were not met.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 20 points. In 2000, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 19 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 42 points. In 1990, the score gap between students at the 75th percentile and students at the 25th percentile was 43 points.

Mathematics Scores at Selected Percentiles

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

Rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2007.

↑ Significantly higher than 2005. ↓ Significantly lower than 2005.

¹ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Oklahoma were 8 percent and 1 percent in 2007, respectively. For more information on NAEP significance testing see <http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical>.

² "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
