

### 2009 Science Assessment Content

Guided by a new framework, the NAEP science assessment was updated in 2009 to keep the content current with key developments in science, curriculum standards, assessments, and research. The 2009 framework organizes science content into three broad content areas.

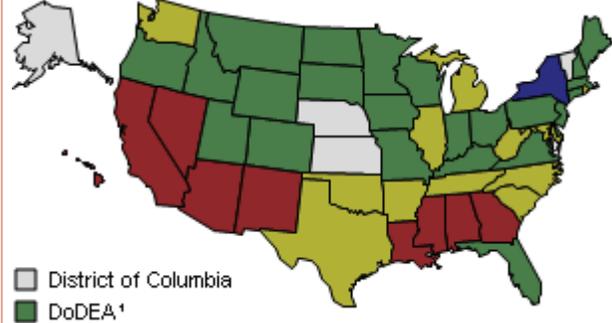

**Physical science** includes concepts related to properties and changes of matter, forms of energy, energy transfer and conservation, position and motion of objects, and forces affecting motion.

**Life science** includes concepts related to organization and development, matter and energy transformations, interdependence, heredity and reproduction, and evolution and diversity.

**Earth and space sciences** includes concepts related to objects in the universe, the history of the Earth, properties of Earth materials, tectonics, energy in Earth systems, climate and weather, and biogeochemical cycles.

The 2009 science assessment was composed of 143 questions at grade 4, 162 at grade 8, and 179 at grade 12. Students responded to only a portion of the questions, which included both multiple-choice questions and questions that required a written response.

### Compare the Average Score in 2009 to Other States/Jurisdictions

<sup>1</sup> Department of Defense Education Activity (overseas and domestic schools).

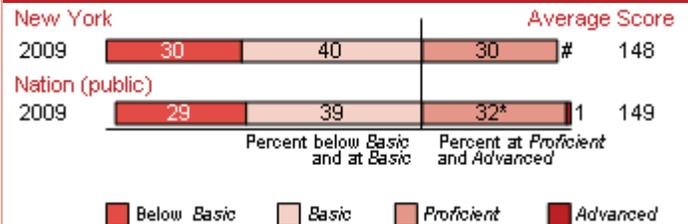

In 2009, the average score in **New York** was

- lower than those in 25 states/jurisdictions
- higher than those in 9 states/jurisdictions
- not significantly different from those in 12 states/jurisdictions
- 5 states/jurisdictions did not participate

### Overall Results

- In 2009, the average score of fourth-grade students in New York was 148. This was not significantly different from the average score of 149 for public school students in the nation.
- The percentage of students in New York who performed at or above the NAEP *Proficient* level was 30 percent in 2009. This percentage was smaller than the nation (32 percent).
- The percentage of students in New York who performed at or above the NAEP *Basic* level was 70 percent in 2009. This percentage was not significantly different from the nation (71 percent).

### Achievement-Level Percentages and Average Score Results

\* Significantly different ( $p < .05$ ) from New York. Significance tests were performed using unrounded numbers.

# Rounds to zero.

NOTE: Detail may not sum to totals because of rounding.

### Results for Student Groups in 2009

Reporting Groups	Percent of students	Avg. score	Percentages at or above		Percent at Advanced
			Basic	Proficient	
Gender					
Male	51	148	71	31	1
Female	49	147	70	29	#
Race/Ethnicity					
White	52	161	86	44	1
Black	19	127	45	9	#
Hispanic	20	130	51	13	#
Asian/Pacific Islander	9	156	80	38	1
American Indian/Alaska Native	#	‡	‡	‡	‡
National School Lunch Program					
Eligible	52	135	56	17	#
Not eligible	46	162	86	45	1

# Rounds to zero.

‡ Reporting standards not met.

NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for the National School Lunch Program, which provides free/reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed.

### Score Gaps for Student Groups

- In 2009, male students in New York had an average score that was not significantly different from female students.
- In 2009, Black students had an average score that was 34 points lower than White students. This performance gap was not significantly different from the nation (35 points).
- In 2009, Hispanic students had an average score that was 31 points lower than White students. This performance gap was not significantly different from the nation (32 points).
- In 2009, students who were eligible for free/reduced-price school lunch, an indicator of low family income, had an average score that was 27 points lower than students who were not eligible for free/reduced-price school lunch. This performance gap was not significantly different from the nation (29 points).

NOTE: Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
