NOTE: Item H1 allowed interviewers to: 1) correct the location and the number of days and hours for all arrangements, as well as correct the type of relative caregiver, whether an arrangement takes place before or after school, and whether a Head Start program is for a full or part day; 2) identify any duplicate arrangements so that one could be deleted; and 3) add arrangements that should have been reported earlier. If another arrangement was added, the CATI system cycled through the appropriate set of questions (e.g., relative, nonrelative, center) to collect relevant items.
