Criminal Incidents at Postsecondary Institutions

In 2019, about 27,300 criminal incidents on campuses at postsecondary institutions were reported to police and security agencies, representing a 4 percent decrease from 2018, when 28,600 criminal incidents were reported. The number of on-campus crimes reported per 10,000 full-time-equivalent students also decreased, from 19.5 in 2018 to 18.7 in 2019.

Since 1990, postsecondary institutions participating in Title IV federal student financial aid programs have been required to comply with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, known as the Clery Act. The Clery Act requires institutions to distribute timely warnings about crime occurrences to students and staff; to publicly report campus crime and safety policies; and to collect, report, and disseminate campus crime data. Since 1999, data on campus safety and security have been reported by institutions through the Campus Safety and Security Survey, sponsored by the Office of Postsecondary Education of the U.S. Department of Education. These data are reported for each calendar year and include on-campus criminal offenses and arrests involving students, faculty, staff, and the general public, as well as referrals for disciplinary action primarily dealing with persons associated formally with the institution (i.e., students, faculty, and other staff). Due to underreporting, figures for reported offenses, arrests, and disciplinary referrals likely do not capture all incidents that occurred. For example, according to reports in a student survey administered at several dozen large universities, officially reported sexual assaults represented only a minority of sexual assaults that occurred.¹

The Clery Act requires institutions to report data for seven types of crimes against persons and property on campuses of postsecondary institutions—murder, sex offenses (forcible and nonforcible), robbery, aggravated assault, burglary, motor vehicle theft, and arson. In calendar year 2019, a total of 27,300 criminal incidents of these types were reported to police and security agencies. This translates to 18.7 on-campus crimes reported per 10,000 full-time-equivalent (FTE) students.²

Among the various types of on-campus crimes reported in 2019, there were 11,800 forcible sex offenses, which constituted 43 percent of all criminal incidents. Other reported crimes included burglaries³ (9,000 incidents, or 33 percent of crimes) and motor vehicle thefts (3,100 incidents, or 11 percent of crimes). In addition, 2,200 aggravated assaults (8 percent of crimes) and 800 robberies⁴ (3 percent of crimes) were reported. These estimates translate to 8.0 forcible sex offenses, 6.1 burglaries, 2.1 motor vehicle thefts, 1.5 aggravated assaults, and 0.6 robberies per 10,000 FTE students.
Criminal Incidents at Postsecondary Institutions

Chapter: 3/Postsecondary Education
Section: Campus Crime and Safety

Figure 1. Number of on-campus crimes reported and number per 10,000 full-time-equivalent (FTE) students in degree-granting postsecondary institutions, by selected type of crime: 2009 through 2019

Between 2009 and 2019, the overall number of reported on-campus crimes decreased by 20 percent (from 34,100 to 27,300). Although the general trend was downward during this period, the number of reported on-campus crimes increased by 8 percent between 2014 and 2017 (from 26,800 to 29,000). When examined by the specific type of crime, the number of on-campus crimes reported in 2019 was lower than the number reported in 2009 for five categories: burglary, motor vehicle theft, aggravated assault, robbery, and arson. For forcible sex offenses, nonforcible sex offenses, murder, and negligent manslaughter, the number of on-campus crimes reported in 2019 was higher than in 2009. Specifically, five negligent manslaughter offenses were reported in 2019, while none were reported in 2009. Twenty murders were reported in 2019, while 16 were reported in 2009. Seventy-four nonforcible sex offenses were reported in 2019, while 65 were reported in 2009. The number of reported forcible sex offenses on campus increased by 363 percent, from 2,500 in 2009 to 11,800 in 2019. Readers should take note that reporting guidelines for forcible sex offenses changed in 2014, which likely contributed to the largest single-year percent increase in that year (36 percent, from 5,000 to 6,800). However, the number of reported forcible sex offenses on campus continued to increase steadily between 2014 and 2018, from 6,800 to 12,400 (an 83 percent increase, or an average increase of about 16 percent per year). In 2019, the number of reported forcible sex offenses was 5 percent lower than in 2018.
Over this same period in which the overall number of reported on-campus crimes was decreasing, the number of FTE students enrolled in postsecondary institutions was also decreasing. This has implications for the rate of crime, or the number of crimes per 10,000 FTE students. Specifically, although postsecondary enrollment also decreased between 2009 and 2019, the number of reported on-campus crimes decreased at a faster rate (see Digest of Education Statistics 2020 for details about college enrollment). As a result, the overall number of on-campus crimes per 10,000 students was lower in 2019 than in 2009. A closer examination of this period reveals that changes in the rate of on-campus crimes follow the patterns observed for the overall number of reported on-campus crimes.

The overall rate of on-campus crimes generally decreased from 2009 to 2019 (from 23.0 to 18.7 per 10,000 FTE students). However, increases occurred in certain years and for certain offenses, which caused the composition of offenses to change. First, despite the general downward trend over the period, the number of on-campus crimes reported per 10,000 students increased between 2014 and 2017 (from 18.1 to 19.9). Considering specific types of reported offenses, the rate per 10,000 students was lower in 2019 than in 2009 for robbery, aggravated assault, burglary, motor vehicle theft, and arson. In contrast, the rate was higher in 2019 than in 2009 for forcible and nonforcible sex offenses, murder, and negligent manslaughter. Specifically, the rate for forcible sex offenses increased from 1.7 per 10,000 students in 2009 to 8.0 per 10,000 students in 2019, surpassing burglary as the most common reported offense in 2018.

In 2019, the number of crimes reported on college campuses per 10,000 students differed by level and control of institution (ranging from 5.2 at 4-year private for-profit institutions to 27.0 at 4-year private nonprofit institutions), although to some extent this reflects the presence of student residence halls. Crimes involving students on campus after normal class hours, such as those occurring in residence halls, are included in campus crime reports, while crimes involving students off campus are not. In 2019, institutions with residence halls reported higher rates of on-campus crime than institutions without residence halls (23.9 vs. 5.6 per 10,000 FTE students). The rate for each individual type of crime was also higher for institutions with residence halls. For example, more forcible sex offenses were reported at institutions with residence halls than at institutions without them (10.7 vs. 1.3 per 10,000 students), and more burglaries were reported at institutions with residence halls than at institutions without residence halls (7.9 vs. 1.9 per 10,000 students).

NOTE: Data are for degree-granting institutions, which are institutions that grant associate’s or higher degrees and participate in Title IV federal financial aid programs. Some institutions that report Clery Act data—specifically, non-degree-granting institutions and institutions outside of the 50 states and the District of Columbia—are excluded from this figure. Arrests include incidents involving students, staff, and on-campus guests. Excludes off-campus arrests even if they involve college students or staff. Excludes cases in which an individual is both arrested and referred to college officials for disciplinary action for a single offense. Some data have been revised from previously published figures.

As part of the Clery Act, postsecondary institutions are also required to report the number of arrests made on campus for illegal weapons possession, drug law violations, and liquor law violations. The total number of these reported on-campus arrests decreased between 2009 and 2019 (from 50,100 to 27,700), a trend driven by the decrease in the number of arrests for liquor law violations. Between 2009 and 2019, the number of arrests for liquor law violations decreased from 33,100 to 12,500. The number of arrests for drug law violations decreased between 2012 and 2019 (from 21,200 to 14,100), after an increase between 2009 and 2012. However, the number of arrests for illegal weapons possession increased between 2009 and 2019 (from 1,080 to 1,150).

Similar patterns can be observed for the number of arrests per 10,000 FTE students, overall and by type of violation. The overall number of arrests per 10,000 students decreased between 2009 and 2019 (from 33.7 to 18.9). The number of arrests per 10,000 students for liquor law violations decreased from 22.3 in 2009 to 8.5 in 2019. The number of arrests per 10,000 students for drug law violations decreased from 14.2 in 2012 to 9.6 in 2019, after an increase between 2009 and 2012. The number of arrests per 10,000 students for illegal weapons possession increased from 0.7 in 2009 to 0.8 in 2019.

NOTE: Data are for degree-granting institutions, which are institutions that grant associate’s or higher degrees and participate in Title IV federal financial aid programs. Some institutions that report Clery Act data—specifically, non-degree-granting institutions and institutions outside of the 50 states and the District of Columbia—are excluded from this figure. Referrals include incidents involving students, staff, and on-campus guests. Excludes cases in which an individual is both arrested and referred to college officials for disciplinary action for a single offense. Some data have been revised from previously published figures.

In addition to reporting on-campus arrests for cases involving illegal weapons possession, drug law violations, and liquor law violations, institutions also report referrals for disciplinary action for these types of cases. Counts of disciplinary actions only include incidents for which there was a referral for institutional disciplinary action, but no arrest. In 2019, there were 187,300 referrals for disciplinary action for cases involving illegal weapons possession, drug law violations, and liquor law violations, combined. Most of the referrals (92 percent) involved violations in residence halls. The largest number of disciplinary referrals (140,000 referrals, or 75 percent of referrals) involved liquor law violations.

Changes over time in the number of disciplinary referrals varied by type of violation. The total number of disciplinary referrals increased from 221,000 in 2009 to 253,300 in 2014, before decreasing to a period low of 187,300 in 2019. A similar pattern was observed for the number of referrals for illegal weapons possession between 2009 and 2019, which increased from 1,300 in 2009 to 1,400 in 2014 and then decreased to 1,100 in 2019. The number of referrals for liquor law violations decreased from 183,400 in 2009 to 140,000 in 2019. The number of referrals for drug law violations was higher in 2019 than in 2009 (46,300 vs. 36,300), but there was no consistent pattern of change throughout the period.

Similar patterns can be observed for the number of disciplinary referrals per 10,000 FTE students, overall and by type of violation. Between 2009 and 2019, the total number of referrals per 10,000 students increased from 149.0 in 2009 to 170.7 in 2014, before decreasing to 127.9 in 2019. The number of referrals per 10,000 students for illegal weapons possession also increased from 0.9 in 2009 to 1.0 in 2014 and then decreased to 0.7 in 2019. The number of referrals per 10,000 students for liquor law violations decreased from 123.6 in 2009 to 95.5 in 2019. The number of referrals per 10,000 students for drug law violations was higher in 2019 than in 2009 (31.6 vs. 24.5), but there was no consistent pattern of change throughout the period.
Endnotes:
2 The base of 10,000 full-time-equivalent students includes students who are enrolled exclusively in distance learning courses and who may not be physically present on campus.
3 Unlawful entry of a structure to commit a felony or theft.
4 Taking or attempting to take anything of value using actual or threatened force or violence.
5 In years prior to 2014, schools only reported a total number of forcible sex offenses, with no breakouts for specific types of offenses. Beginning in 2014, schools were asked to report the numbers of two different types of forcible sex offenses, rape and fondling, and these were added together to reach the total number of reported forcible sex offenses. For instance, about 6,200 rapes and 5,600 fondling incidents were reported in 2019.
