Private School Enrollment

Private school enrollment in prekindergarten (preK) through grade 12 increased from 5.9 million students in 1995–96 to 6.3 million in 2001–02, and then declined to 5.4 million in 2013–14.

In school year 2013–14, some 5.4 million students (or 10 percent of all elementary and secondary students) were enrolled in private elementary and secondary schools. The percentage of all elementary and secondary students enrolled in private schools decreased from 12 percent in 1995–96 to 10 percent in 2013–14, and is projected to continue to decrease to 9 percent in 2025–26 (the last year for which projected data are available).

Figure 1. Actual and projected private school enrollment in prekindergarten (preK) through grade 12, by grade level:
School years 2003–04 through 2025–26

Private school enrollment in prekindergarten (preK) through grade 12 increased from 5.9 million in 1995–96 to 6.3 million in 2001–02, and then declined to 5.4 million in 2013–14. More recently, total private school enrollment decreased by 12 percent between 2003–04 and 2013–14; enrollment is projected to decrease by 6 percent to 5.1 million students in 2025–26.

Similar to overall private school enrollment, private school enrollment in preK through grade 8 increased from 4.8 million students in 1995–96 to 5.0 million in 2001–02 before decreasing to 4.1 million in 2013–14. Between 2003–04 and 2013–14, private school enrollment in preK through grade 8 decreased by 15 percent. Enrollment is expected to decrease by a further 3 percent to 3.9 million students in 2025–26. Private school enrollment in grades 9 through 12 increased from 1.2 million students in 1995–96 to a peak of 1.4 million in 2007–08; enrollment then fluctuated from 2007–08 to 2013–14. From 2013–14 to 2025–26, private school enrollment in grades 9 through 12 is expected to decrease by 13 percent, from 1.3 million to 1.1 million students.
In 2013–14, some 38 percent of all private school students were enrolled in Catholic schools. The number of private school students enrolled in Catholic schools decreased from 2.5 million in 2003–04 to 2.1 million in 2013–14. The decrease in the number of students enrolled in Catholic schools was primarily due to a decline in the number of students enrolled in Catholic parochial schools (1.2 million in 2003–04 compared to 740,000 in 2013–14). The numbers of students enrolled in conservative Christian (707,000) and affiliated religious (565,000) schools in 2013–14 were also lower than in 2003–04, while the number of students enrolled in unaffiliated religious schools (758,000) in 2013–14 was higher than in 2003–04. The number of students enrolled in nonsectarian schools (1.3 million) in 2013–14 was not measurably different from the number enrolled in 2003–04.
In 2013–14, the percentage of private elementary students enrolled in Catholic schools was 47 percent, which was higher than the percentage of students enrolled in nonsectarian (22 percent), unaffiliated religious (14 percent), affiliated religious (10 percent), and conservative Christian (6 percent) schools. Similarly, a higher percentage of private secondary students were enrolled in Catholic schools (71 percent) than in any other school orientation. In contrast to the large percentages of private school students enrolled in Catholic elementary and secondary schools, Catholic students made up a smaller percentage (10 percent) of private school students enrolled in combined elementary/secondary schools.
In 2013–14, higher percentages of private school students in cities and towns were enrolled in Catholic schools than in other religious or nonsectarian schools. For example, in towns, 48 percent of private school students were enrolled in Catholic schools, while 39 percent were enrolled in other religious schools and 13 percent were enrolled in nonsectarian schools. In contrast, a lower percentage of private school students in rural areas were enrolled in Catholic schools (14 percent) than nonsectarian (25 percent) or other religious (61 percent) schools. Additionally, while the percentage of private school students in suburbs enrolled in Catholic schools (38 percent) was higher than the percentage enrolled in nonsectarian schools (26 percent), it was not measurably different from the percentage enrolled in other religious schools.
There were also differences in private school enrollment by school orientation within racial/ethnic groups. Among Hispanic, Asian, and American Indian/Alaska Native students as well as students of Two or more races, higher percentages of private school students were enrolled in Catholic schools than other religious schools in 2013–14. For example, 57 percent of Hispanic private school students were enrolled in Catholic schools, while 26 percent were enrolled in other religious schools. In contrast, lower percentages of Black (36 percent) and Pacific Islander (39 percent) private school students were enrolled in Catholic schools in 2013–14 than in other religious schools (40 and 44 percent, respectively). In addition, for all racial/ethnic groups other than Asian, higher percentages of private school students were enrolled in Catholic schools than nonsectarian schools. For example, 40 percent of White private school students were enrolled in Catholic schools compared to 20 percent enrolled in nonsectarian schools. The percentage of Asian students enrolled in Catholic schools (35 percent) was not measurably different from the percentage enrolled in nonsectarian schools (33 percent).

Endnotes:
1 Prekindergarten students who are enrolled in private schools that do not offer kindergarten or higher grades are not included in this analysis.
2 Elementary schools have grade 6 or lower and no grade higher than 8. This category is not comparable to the preK through grade 8 category used elsewhere in this indicator.
3 Secondary schools have one or more of grades 7 through 12 and have no grade lower than grade 7. This category is not comparable to the grades 9 through 12 category used elsewhere in this indicator.
4 Combined schools include grades lower than 7 and higher than 8, as well as those that do not classify students by grade level.
5 Other religious schools include conservative Christian, affiliated religious, and unaffiliated religious schools.
