## **Acknowledgments**

The Baccalaureate and Beyond:93/94 (B&B:93/94) Methodology Report could not be completed without the assistance of staff from the National Center for Education Statistics and Office of Educational Research and Improvement. Paula R. Knepper, Project Officer and C. Dennis Carroll, Postsecondary Longitudinal Studies Program Director, in particular were extremely helpful in the preparation of the report and in providing support throughout the data collection. We would also like to thank Robert S. Burton and Peter S. Stowe of NCES, and Daniel Goldenberg of the Department's Planning and Evaluation Service for their review of this report and the many insights which they provided.

The success of the B&B:93/94 survey is largely attributable to the hard work and dedication of many staff at NORC. The authors would like to acknowledge the specific contributions of Kathy Salmon and Cheryl Gilbert (task leaders for field data collection) and Cathy Haggerty (task leader for phone center data collection), whose roles in the data collection led to a well orchestrated and highly successful survey.

The authors would like to thank Norman Bradburn and the members of the technical advisory board for their guidance in the development of the survey design and their assistance in developing the study instruments. Finally, we extend thanks to the willing participants in the B&B study who devoted their time and were forthcoming with the information that is the basis of this report.

## 1. An Overview of the Baccalaureate and Beyond Study

### 1.1 Purpose of the Study

The Baccalaureate and Beyond Longitudinal Study (B&B:93) tracks the experiences of a cohort of recent college graduates, those who received the baccalaureate degree during the 1992-93 academic year and were first interviewed as part of the National Postsecondary Student Aid Study (NPSAS). This group's experiences in the areas of academic enrollments, degree completions, employment, public service, and other adult decisions will be followed for about 12 years. Ultimately, B&B:93 will provide data to assess the outcomes of postsecondary education, graduate and professional program access, and rates of return on investment in education.

The U.S. Department of Education's National Center for Education Statistics (NCES) is authorized to conduct the B&B:93 study under Section 404(a) of the National Education Statistics Act of 1994, Title IV of the Improving America's Schools Act of 1994, P.L. 103-382, which states:

*"The duties of the Center are to collect, analyze, and disseminate statistics and other information related to education in the United States and in other nations, including (1) collecting, acquiring, compiling ..., and disseminating full and complete statistics on the condition and progress of education at the pre-school, elementary, secondary, and postsecondary levels in the United States, including data on ...*

- student achievement at all levels of education; ...*
- educational access to and opportunity for postsecondary education, including data on financial aid to postsecondary students;*
- teaching, including data on course-taking, instruction, the conditions of the education workplace, and the supply of, and demand for, teachers, which may include data on the proportions of women and men, cross-tabulated by race or ethnicity, teaching in subjects in which such individuals have been historically underrepresented;*
- the learning and teaching environment, including data on libraries;*
- the financing and management of education, including data on revenues and expenditures; and ...*

*(3) conducting longitudinal studies as well as regular and special surveys and data collections, necessary to report on the condition and progress of education; . . ."*

### 1.2 Analytic Objectives

As the 1992-93 cohort of college and university graduates advances through adulthood, the effects of postsecondary education will become increasingly important. The B&B:93 study will provide data to address issues in several major areas of educational policy: educational attainment; access to graduate and professional schools; the rate of return on educational investment; and patterns of preparation and engagement in teaching.

**Attainment and outcome assessment.** Degree completion, licensing, and certification are central to educational attainment and outcome assessment. Questions in this area include the following:

- Are bachelor's degree recipients able to enter the work force or graduate school soon after acquiring the degree or within the time periods they expect?
- Do bachelor's degree recipients enter jobs related to their major fields of undergraduate study?
- How long do bachelor's degree recipients take to complete the bachelor's degree? Does this vary by field of study, type of school, age of student, or time of first entry into a postsecondary program?
- How long does it take to obtain a job in an area related to the field of study? Does the required time differ by degree attained? Does it differ by field?

**Graduate and professional program access.** Entrance into graduate or professional school after completing the bachelor's degree raises many of the same questions as initial entry into the work force. In many fields, it is necessary to complete a graduate program to get a job in the field. In other fields, such as teaching, additional study may be required to continue working or to be promoted in the field, even though graduate education is not required for initial entry into the field. In most fields, graduate education enhances the ability to perform, even if it is not strictly required for entrance, continuation, or promotion. Therefore, it is important to determine whether persons who wish to continue their education beyond the baccalaureate degree have the opportunity to do so. Questions in this area include the following:

- Are people who want to enter graduate school immediately after completing the bachelor's degree able to do so? Why do some graduates delay entry into graduate or professional study? Do these persons persist in seeking to enter and do they succeed in entering later?
- Are those who want to enter graduate school after gaining some work experience able to do so when they planned, or are they further delayed? Do they carry out their original plan or later decide against graduate school? How long do they delay entry?
- What proportion of students who have no plans for graduate school at the time they complete the bachelor's degree later change their minds and attempt to enter graduate school? Do these persons have the access they would have had if they had attempted to enter graduate school immediately after completing the bachelor's degree? Are there additional difficulties associated with later decisions to enter graduate school?

**Rate of return.** Rate of return refers to the financial payoff or other value of the bachelor's degree relative to the expense in time and money of obtaining the degree. There are two perspectives for gauging the rate of return. From the perspective of the individual, the rate of return can be measured in terms of monetary reward and personal satisfaction. From the perspective of society, rate of return can be measured in terms of the contribution a student makes to the nation's productivity as well as through community involvement and public service. For example, societal returns to investments in postsecondary education include the work performed by bachelor's degree recipients in public service areas such as teaching, volunteer work, and other community service.

For both the individual and society, rate of return can also be gauged by the adequacy of the individual's preparation for entry into work and community service and by the individual's acquired ability to gain from and contribute to that experience. B&B:93 examines the rates of return from postsecondary education from the perspectives of both the individual and society. Specific questions include the following:

- What proportion of bachelor's degree recipients enter jobs related to their fields of study immediately after receiving the bachelor's degree? Are these persons able to work effectively and advance in their work without additional schooling or do they encounter obstacles which can only be overcome by seeking additional education?
- Do persons who complete graduate school have a better chance to obtain positions in their field than persons who do not complete graduate school? Is there a difference in starting salaries between those who have completed graduate school and those who have not? Is there a long term difference in salary?
- How many bachelor's degree recipients are eligible or qualified to enter public service professions such as teaching? How many enter full-time positions in public service fields for which they are qualified?
- Is the proportion of persons who enter public service fields higher or lower among persons seeking jobs immediately after completing the B.A. than among those who first attend graduate school?
- Do bachelor's degree recipients who enter public service positions advance in their jobs at the same rate as bachelor's degree recipients who enter non-public service jobs?

**Patterns of teaching.** Another important feature of the B&B:93 program is that the sample has been designed to facilitate the study of elementary and secondary school teaching careers. Data from B&B:93 will be used in the monitoring of supply and demand characteristics of the labor market, and career patterns of teachers, including movements into and away from this profession over time. Many of the same issues discussed earlier, concerning initial aspirations and expectations versus ultimate decisions, will be examined. Additional considerations include measuring quality, noting comparative values, and measuring monetary returns to teaching. Specific questions that the B&B:93 program will help address include:

- What is the proportion of new college graduates who enter the teaching profession as their first career versus those who are attracted to it later in life? What are the defining characteristics of these groups?
- What is the rate at which teachers change careers, and how does it compare to career-changing patterns of other professionals? How satisfied are teachers in their careers versus those who are employed in other occupations?
- What are the potential sources for new teachers, that is, where do those who enter teaching come from (and, of those who left it, where did they go)?
- How do teachers compare with non-teachers along the lines of gender, race-ethnicity, and socioeconomic backgrounds?

In summary, B&B:93 will contribute to a comprehensive statistical investigation of educational policy issues and help to fulfill NCES's mission, to report on the condition and progress of American education in all its aspects. In recognition of its broad mandate, NCES has expanded its data collection program to investigate educational experiences beyond the traditional span of postsecondary education. Baccalaureate and Beyond, with its wealth of data on the consequences of postsecondary education, will contribute to the study of education as a lifelong process.

### **1.3 Study Design**

The B&B:93/94 study is the first in a series of five follow-up interviews of persons who received a bachelor's degree in the 1992-1993 academic year. Baseline data for the B&B:93 cohort were collected as part of the National Postsecondary Student Aid Study (NPSAS:93). The first follow-up interview (B&B:93/94) collected information from respondents one year after they received their bachelor's degree. Subsequent interviews will take place at three year intervals. By the end of the 12-year period, most students who attend graduate or professional schools should have completed, or nearly completed, their education and be established in their careers.

Data collection for the first follow-up of Baccalaureate and Beyond took place in the summer and fall of 1994. The B&B:93 cohort comprised approximately 12,500 individuals who were determined, in NPSAS, to be potentially eligible for follow-up in 1994. Respondents were interviewed using Computer-Assisted-Telephone-Interviewing (CATI), as well as field interviewing when necessary. In addition, undergraduate transcripts from the respondents' degree-granting institutions were collected as part of the first follow-up study. Data collection activities took place as follows:

B&B:93/94 CATI data collection	June 15, 1994 - October 8, 1994
B&B:93/94 Field data collection	August 20, 1994 - December 31, 1994
B&B:93/94 Transcript data collection	August 15, 1994 - December 31, 1994

## **2. B&B:93 Sample Design**

The B&B:93 sample design represents all postsecondary students in the United States who completed a bachelor's degree in the academic year 1992-93 (AY 93). The B&B:93/94 sample was a subsample of the students selected for the 1993 National Postsecondary Student Aid Study sample, a nationally representative sample of all postsecondary students. The B&B:93/94 sample of baccalaureate degree graduates includes those students in the NPSAS:93 sample who were identified by the institution or during the student interview as potentially eligible for B&B:93/94. Cases were identified as potentially eligible for B&B:93/94 if there was information indicating that the respondent had received, or expected to receive a baccalaureate degree between July 1, 1992 and June 30, 1993. All NPSAS:93 sample persons who satisfied the subsample requirements were designated as potential eligibles for B&B:93/94 irrespective of whether these persons were respondents or nonrespondents in NPSAS:93.

### **2.1 Original NPSAS:93 Sample Design**

The NPSAS:93 survey employed a stratified multi-stage sample design with postsecondary institutions as the first-stage unit and students within schools as the second-stage unit. The institution sample was stratified by type of control (private vs. public), highest degree offered, size of enrollment in professional programs, graduate student enrollment, and the number of bachelor's degrees awarded in education. The target population for NPSAS:93 contained nearly all postsecondary institutions in the 50 states, the District of Columbia, and Puerto Rico. To be eligible for inclusion in the sample, an institution was required to satisfy **all** of the following conditions:

- Offer an education program designed for persons who have completed secondary education;
- Offer an academic, occupational, or vocational program of study;
- Offer access to persons other than those employed by the institution;
- Offer more than just correspondence courses;
- Offer at least one program requiring at least three months or 300 clock hours of instruction; and
- Be located in the 50 States, the District of Columbia, or Puerto Rico.

An institution was not eligible for inclusion in NPSAS if it served only secondary students, if it provided only avocational, recreational, or remedial courses, if it offered only in-house business courses, if it offered only seminars of less than three months duration (such as driver training schools, real estate courses, and tax preparation classes), or if it offered only correspondence courses. United States Service Academies were not eligible for NPSAS because of their unique funding base, and hence were not part of the B&B:93/94 sample.

A total of 1,386 postsecondary institutions were sampled for NPSAS:93; 143 were deemed ineligible based on the criteria outlined above. Of the 1,243 eligible institutions, 88 percent participated by submitting lists of students for selection into the NPSAS:93 sample.

Within participating institutions, students eligible for selection into the sample were those who were enrolled, or were receiving a baccalaureate degree during the 1992-93 academic year. To be eligible for NPSAS:93 students were required to meet the following conditions:

- (1) Attend a sampled institution between July 1, 1992 and June 30, 1993; **and**
- (2) Be enrolled in one or more of the following:
  - Course(s) for credit toward a degree or formal award; **or**
  - Degree or formal award program of at least three months duration; **or**
  - Occupational or vocational program of at least three months duration.

Students who took courses only for remedial or avocational purposes and did not receive credit, who only audited courses, or who took courses strictly for pleasure rather than as a part of an academic, occupational, or vocational program or course of study were not eligible for NPSAS. Furthermore, students enrolled in high school or solely in a GED program were ineligible for NPSAS:93, even if they satisfied the above conditions. A total of 82,016 students were selected for the NPSAS:93 sample, with a final eligible sample size of 79,269.

In addition, NPSAS:93 included all students who received a baccalaureate degree between July 1, 1992 and June 30, 1993. (Students who had completed degree requirements prior to July 1, 1992 but were awarded a degree after that date were also eligible.) Table 2.1 provides the NPSAS:93 student sample sizes by type and institutional sampling stratum. The baseline cohort for the B&B study is represented by the “Baccalaureate” column of the table.

## **2.2 B&B Student Sample**

In order to provide a base year sample for B&B:93/94, NCES introduced several design modifications in NPSAS:93. First, the number of sample institutions offering only four-year undergraduate programs or programs of less than four years was reduced relative to the number of sample institutions offering post-graduate programs. Second, the number of sample students in four-year institutions was increased by 20 percent. Finally, the sample sizes of graduate students and professional students were slightly reduced. These three changes in the NPSAS sample design reflect the goal of following a large sample of bachelor's degree recipients through post-bachelor's degree experiences.

Based on these changes in the NPSAS:93 sample design, approximately 16,300 potential baccalaureate degree recipients were identified. These students were identified using institutionally provided lists of students who filed for graduation in the 1992-93 academic year. Table 2.2 shows the NPSAS response rates for the B&B cohort.

Table 2.1.--NPSAS:93 student sample sizes<sup>a</sup>

Institutional Stratum	Baccalaureate		Other under- graduates	Grad. students	First prof. students	Total
	Business	Other

Private, for-profit	183	128	69.9

SOURCE: NCES, Baccalaureate and Beyond:93/94

All B&B eligible sample members who completed the NPSAS interview were retained for future follow-up. Of the 11,810 cases which were considered NPSAS completes, 11,254 were delivered with the first wave of data (designated as sample type 1 in table 2.3). The remaining 556 were identified later and were delivered as part of sample type 4. A subsample of approximately ten percent of the remaining eligible cases with at least some data (either partial CATI, Computer Assisted Data Entry (CADE) data from the institution, or parent data) were also identified and delivered as sample types 2 and 3. Additional sample members (who were not part of the NPSAS B&B cohort) were identified as AY92-93 bachelor's degree recipients upon review of the completed NPSAS interview. Altogether, four different types of sample members constituted the B&B:93 cohort, as shown in table 2.3.

Table 2.3.--B&B sample composition

Original NPSAS B&B cases:	Initial sample	Final sample
1. Student respondents	11,254	11,254
2. Student nonrespondents with parent data	372	300
3. Subsample of other student nonrespondents	230	164
Additional B&B cases identified during data processing:		
4. NPSAS student respondents identified as potentially eligible for B&B	875	760
Total	12,731	12,478

SOURCE: NCES, Baccalaureate and Beyond:93/94 and National Postsecondary Student Aid Study, 1993.

During the data collection period it became clear that many of the NPSAS nonrespondents and the cases identified late as potential B&B respondents (sample types 2, 3, and 4 in Table 2.3) were **not**, in fact, eligible for B&B. Because of the costs involved in contacting ineligible respondents, it was desirable to select only a subsample of these cases to be included in the final B&B sample. The subsample was selected from the group of nonrespondents in the sample who did not complete a full B&B interview in NPSAS:93 (sample types 2,3, and 4 in Table 2.3). All students who were respondents in NPSAS (sample type 1) were included in the final B&B sample.

The subsample selection was carried out by constructing a file of all B&B eligible nonrespondents in sample types 2, 3, and 4 as of November 1, 1994. Complete cases, cases with pending interviewer appointments, sample members determined ineligible, and cases finalized as non-interviews (primarily hostile refusal cases) were excluded from the subsampling file. This file was then sorted by institution stratum, student stratum, and student sample type in order to affect stratification in the selection process. A systematic sample of 200 persons, from approximately 450 in the file, were selected. The subsampling process decreased the B&B sample size to 12,478, as shown in Table 2.3 above.

### 2.3 B&B:93 Sample Eligibility

During data collection, for both the interview and transcript components, it was discovered that many of the respondents who had been designated by NPSAS as B&B sample members were not eligible to be included in the sample. Sample eligibility was determined in two ways: first, by confirming with respondents the date they received their baccalaureate degrees, and second, by examining the transcripts received from baccalaureate institutions. The final B&B:93 sample includes respondents identified as eligible in either portion of the study, as described in subsequent sections of this report. The sample which will be followed for future rounds and cross-component eligibility is discussed in the chapter describing the transcript component (see Table 6.3).

### **3. Data Collection: Telephone and Field Procedures**

**Overview.** An initial mailing containing a letter and informational leaflet was sent to all 12,731 B&B:93/94 sample members in the summer of 1994 -- Wave 1 cases in June, and Wave 2 cases in July -- inviting them to participate in the study.<sup>1</sup> The letter, included in Appendix A, provided a summary of the survey objectives, an introduction to NCES and NORC, and a promise of strict adherence to the privacy protection laws. The letter also provided a toll-free 800 number for sample members to obtain further information or to schedule an interview.

Telephone interviewing began approximately one week after the advance letter mailing. Interviewing commenced on June 15, 1994 for Wave 1, and August 5, 1994 for Wave 2. Telephone interviewing continued until October 8, 1994, a period of 16 weeks. Cases that were pending at the end of this time were sent to field interviewers and worked from October 8 through December 31, 1994, a field period of 12 weeks.<sup>2</sup>

Figure 3.1 summarizes the flow of cases through the major activities in the B&B:93/94 survey. As shown, case records for the sample were loaded into the CATI Telephone Number Management System (TNMS) and delivered to interviewers. Cases were delivered primarily during peak contacting periods which included Monday through Thursday evenings, Saturday morning and afternoon, and afternoon and evening hours on Sunday. A total of 7,456 cases (68 percent of 10,958 eligible cases) were completed in-house. An analysis of the case delivery management is presented in section 3.1; CATI production is described in section 3.2.

Respondents refusing to participate in the B&B:93/94 study presented a significant problem during data collection. A full 20 percent of the eligible sample refused to participate at some time during the interviewing effort. CATI refusal conversion specialists contacted these respondents in an effort to persuade them to participate. Respondents who continued to refuse participation were contacted by field interviewers for in-person follow-up. Section 3.3 presents an analysis of the problem and describes the refusal conversion process.

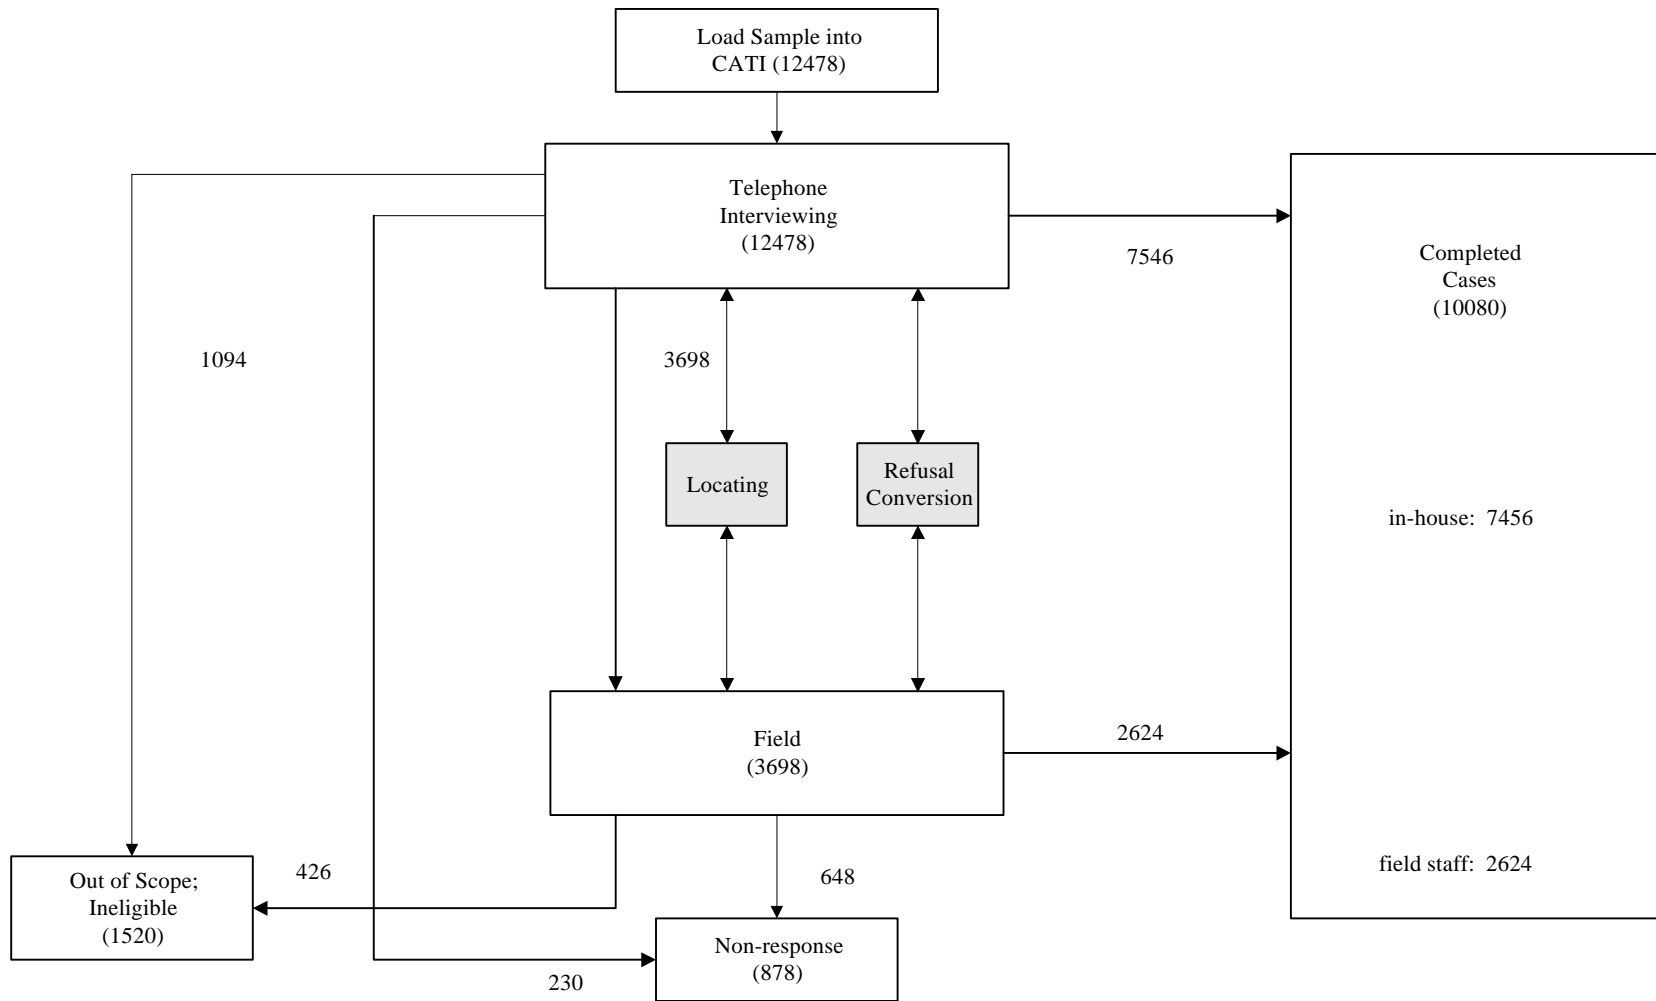

---

<sup>1</sup> Due to the different types of sample members in the B&B:93 student sample (see section 2.3), treatment of these cases occurred in two waves. Wave 1 cases, corresponding to student sample types 1 and 2, totaled 11,626 sample members; sample types 3 and 4 constituted the 1,105 sample members in Wave 2.

<sup>2</sup> In actuality, field work began on a small number of cases in August, when telephone center supervisors began transferring hard refusal and unlocatable cases to the field, once all telephone efforts had been exhausted. The total number of cases completed from August 20 to October 8, when telephone activities were halted, accounts for about five percent of all 10,080 cases completed.

**Figure 3.1**  
**Paths toward case completion**

Cases could be designated as locating or refusal problems, or both.

Cases were identified as locating problems during the first few weeks of production and set aside for specialist locators. Although approximately 34 percent of eligible cases were at some time unlocatable, the completion rate for this group was quite high -- 88 percent vs. 74 percent for the refusal group. More information about the locating effort is presented in Section 3.4.

After telephone interviewing was halted in early October, field interviewers were sent all remaining pending cases: 3,698 cases or about 30 percent of the net sample. Overall, the field staff completed 2,624 cases increasing the final response rate for B&B:93/94 to 92 percent. Field activities are described in Section 3.6.

### **3.1 Telephone Interviewing Case Management**

The CATI Telephone Number Management System (TNMS) is NORC's standard call scheduling and telephone number delivery system. The system is responsible for routing cases to interviewers at the most opportune times for telephone contact. Interviewers record call-outcomes for each case in the TNMS and the system chooses the next appropriate action depending on the last outcome, and history of outcomes, for the case.

The TNMS tracked the status of cases in B&B:93/94 using a location flag attached to each case. The case delivery module of the system delivered cases which were in the general interviewing location. Cases in all other locations (such as refusals or locating problems) were accessed directly and managed by the appropriate staff group. The location flag was automatically updated by the system depending on the outcome code provided by the interviewer. The TNMS used in B&B:93/94 contained six different locations:

1. General interviewing
2. Initial refusal
3. Locating problem
4. In the locating module
5. In the field
6. Refusal conversion active

Respondents who refused to complete the interview were coded as refusals by the interviewer and automatically routed to location two. A letter was sent to each respondent which attempted to address their specific concerns and, after a short cooling-down period, the case was routed to location six to be accessed and worked by a refusal convertor. (See Appendix B for a copy of the refusal conversion letters.) If the respondent could not be converted, the case was filed to location five and sent to the field. When a case was identified as a locating problem, it was filed to location three. Each night the system automatically scanned new cases put into location three and loaded them into the Case Management System (CMS) locating database. The cases moved to the CMS were then moved to location four in the TNMS and remained there until the locating information had been updated and the case could be activated for interviewing in the TNMS.

**Calling algorithms.** The calling times and case routing schedule set up for the B&B:93/94 sample assumed that the best times to reach B&B:93/94 sample members were Monday through Thursday evening and on Saturday and Sunday. The telephone center was in operation from 8:00 a.m. - 11:00 p.m.

on Monday through Friday, 8:00 a.m. - 6:00 p.m. on Saturday, and 11:00 a.m. -11:00 p.m. on Sunday.

Cases were delivered to interviewers by the TNMS eight times over a two-week period, or four times each week, before being filed to a queue for supervisor review. The calling algorithm for the week had a built-in preference for Saturday and Sunday; cases were delivered twice during the weekday evenings, once on Saturday, and once on Sunday. This pattern was repeated the second week and, if no contact had been made with the respondent, the case was reviewed by a supervisor and either sent to locating or sent back to the floor to be called during an off-cycle period.

The calling delivery cycle was stopped as soon as an appointment was set to call the respondent. From that point forward, appointments were determined when the respondent was called.

Figure 3.2 presents data on case completion by day of the week. Although the number of completed cases does not vary significantly in the remainder of the week, the graph does show that Sundays were not particularly effective days to call respondents. In fact, during the summer months, respondents were more likely to complete an interview on weekday evenings than on a weekend day.

Figure 3.2.--Daily CATI production

Completes per interviewer by day of week

SOURCE: NCES, Baccalaureate and Beyond:93/94

Project staff expected that many respondents would try to delay the interview because of their busy lifestyle. B&B:93/94 interviewers attempted to complete the interview when the respondent was contacted and attempted not to let the respondent delay the interview. However, appointments were very common and B&B interviewers tried to accommodate all requests for appointments made by respondents. To ensure that interviewers were available to keep scheduled appointments and not involved in other calls, cases that had requested appointments were delivered to telephone interviewers 20 minutes early.

### 3.2 CATI Production

Data collection began on June 15, 1994. Week-by-week production and cumulative completes are diagrammed in figure 3.3.<sup>3</sup> The graph shows that the first two weeks of data collection were the most successful, with the first week (actually, ten days) of production being the highest. Production for the majority of the following weeks averaged about 600 cases per week. Finally, in the last third of the data collection period, production decreased to about 200 cases per week, as the last and hardest cases were handled and more cases were sent to the field.

**Figure 3.3.--CATI production rates**

NOTE: Figures include out-of-scope and ineligible cases.

SOURCE: NCES, Baccalaureate and Beyond:93/94

The number of calls per completed case is the best estimate of the level of effort required in the interviewing task. The TNMS tracks every call, writing to a log file the outcome of the call and the date and time of the attempt. Estimates of the level of effort necessary to complete a telephone interview can be estimated from the data in the log file. The number of calls required to complete cases for the B&B:93/94 sample is presented in Table 3.1. These data are consistent with level of effort estimates for the B&B:93/94 sample and actual experience with similar samples.

---

<sup>3</sup> Out-of-scope and ineligible cases were also counted as completes during data collection. The telephone shop completed interviews with 7456 cases and determined 1094 cases to be ineligible/out-of-scope.

Table 3.1.--Average number of calls made in the TNMS to complete a case

Sample:	Number of cases	Average number of calls in the TNMS	Standard deviation around the mean
Completed cases *	8,563	13.4	2.5
All eligible cases	10,958	10.5	

\* Completed by phone shop, including identification of ineligible.

SOURCE: NCES, Baccalaureate and Beyond:93/94

### **3.3 Refusal Conversion**

A total of 2,175 respondents (19.8 percent of the total eligible sample) refused to complete the interview at some point in the interviewing process, a refusal rate about twice as high as originally expected. Early in the data collection period, a supervisor reviewed the call notes for each refusal in order to better understand the reasons respondents chose not to participate, and to tailor the approach to converting refusals. The supervisor found that the cases fell into several major categories, and generally followed the same distribution as for the field test. The review showed that previous experience with the NPSAS:93 survey was still a significant factor in whether or not a sample member chose to participate. Indeed, many sample members who refused either confused the B&B:93/94 study with NPSAS:93, or refused to participate based on their prior experience. Other major refusal reasons were typical of most surveys: no time or too busy; not interested in participating, interview length too long; or confidentiality issues.

A three-stage process to convert sample members who refused to participate was planned and executed. All cases were sent a letter addressing the specific reason the respondent refused. Samples of these letters are included in Appendix B. The letters were followed up by a phone call from a refusal converter at the central CATI site. Only one attempt was made by the phone center to convert refusals; continuing refusals were forwarded to the field to be contacted in person by a field interviewer.

Refusal conversion calls began about four weeks after the start of data collection. Several B&B:93/94 trained interviewers were selected to convert refusal cases. The interviewers were chosen for their calm and assertive style of interacting with respondents. The interviewers attended a briefing that included a review of the types of refusals and a general practice of gaining cooperation. The CATI refusal converters were able to convert and complete 25 percent of the refusal cases; another 49 percent were converted by field interviewers. In all, NORC interviewers were able to successfully complete interviews with 1,611 (74.1 percent) of the 2,175 initial refusals. Table 3.2 demonstrates the refusal problem and the overall conversion success rate.

Table 3.2.--Final completion status by initial refusal status

	Complete	Final	Unlocated	Other Non- response	Subtotal
Ever refused					
Phone	25.0% 543	7.5% 164	0.0% 0	0.2% 4	32.7% 711
Field	49.1% 1068	15.0% 327	1.5% 33	1.7% 36	67.3% 1464

Total	10080	639	95	144	10958

SOURCE: NCES, Baccalaureate and Beyond:93/94

### **3.4 Respondent Locating**

Cases were loaded into the TNMS with the "best" telephone number for reaching the respondent based on the prefield locating information. Interviewers were trained to follow all leads provided by this telephone number and to update the number when new information was discovered. However, if the interviewers were unable to locate a respondent, the case was moved to the Case Management System (CMS) for further locating attempts.

Prior to the start of data collection, B&B:93/94 staff identified the most effective locating resources for finding B&B:93/94 respondents. Those resources are listed below in the order in which they were used:

- Last known telephone number of the parent(s)
- Last known telephone number of a contact person
- Other NPSAS obtained locating leads (when available)
- Credit database (TRW and Equifax)
- Bachelor degree school alumni office

The B&B:93/94 main study employed a locating strategy which was used successfully in the field test. Central office telephone locators were teamed with locators in the field to expeditiously work cases which were not previously located. Matching the expertise of the central office locators with the regional knowledge of the field locators was expected to result in a more thoughtful, thorough, and cost efficient way to find respondents.

A locating supervisor coordinated the locating effort between the telephone and field locators for each team. Each week the supervisor reviewed the cases assigned to each of the teams, making suggestions for additional work or concurring with the nomination of the case for field work. Some cases remained unlocatable at the close of telephone operations; these were turned over to and worked by the field interviewers.

Using this strategy, central office locators were able to find and complete 47 percent of the 3717 locating problem cases. The field locators were slightly less successful, completing 41 percent of the unlocatable cases. (The bulk of locating problem cases were the more difficult to work and probably held hidden refusals, as evidenced by the higher final refusal status in the field.) Table 3.3 shows a breakdown of the locating problem cases and the level of effort expended in the CMS. Of the 3,717 cases with locating problems, 3,264 (87.8%) were successfully traced and interviewed.

Table 3.3.--Final completion status by locating problem cases

	Complete	Final refusal	Unlocated	Other Non-response	Subtotal
Locating needed:					
Phone	46.9% 1744	1.3% 49	0.0% 0	0.6% 22	48.8% 1815
Field	40.9% 1520	6.5% 242	1.9% 69	1.9% 69	51.2% 1902
Subtotal	87.8% 3264	7.8% 291	1.9% 69	1.8% 40	100% 3717
Locating unnecessary:

### 3.5 Maximum Calls

Another problem identified and tracked during data collection was the number of times a sample member was contacted by the telephone center. The limit of "maximum calls" was set at 14 contact attempts. A "call" was counted each time there was some contact with the respondent's household; this could be a contact with the respondent, a contact with someone else in the house, or an answering machine. Using these parameters, a total of 2,687 cases fell into the maximum calls problem category.

It was initially thought that these cases were actually hidden refusals and that the sample members were implicitly refusing to participate by avoiding any contact attempts. However, as table 3.4 shows, the completion rate for this group was almost as high as that for the entire sample. It is apparent that this type of problem case was better handled by the field interviewers; 57 percent of the maximum call cases

were interviewed by the field staff versus 33 percent completed by the telephone center. It would seem that a personal contact may have been necessary to gain cooperation from reluctant sample members.

Table 3.4.--Final completion status by "maximum call" status

	Complete	Final refusal	Unlocated	Other Non-response	Subtotal
14 or more calls made:					
Phone	32.8%	0.9%	0.0%	0.1%	33.8%
	880	25	0	3	908
Field	57.3%	6.7%	0.8%	1.5%	66.2%

### **3.6 Field Operations**

In early October, the telephone center ceased work on B&B:93/94 and all pending cases were transferred to NORC's field staff. All were cases the telephone center had been unable to complete because the respondent refused, was evasive, or had not yet been located. (Field staff actually began working a small number of cases in late August, as the telephone center began filtering hard refusal cases to the field.)

**Field manager and interviewer recruiting.** Seven field managers (FMs) were hired to supervise field interviewers (FIs). These FMs were the same FMs hired and trained to work on the field test. The field was set-up to use a team management approach. There were three teams each with two FMs; each manager was responsible for a specific geographic region of the United States. Field interviewers were recruited and hired as needed contingent upon the location of cases. A total of 150 FIs were hired for B&B:93/94.

**Field manager training.** The seven field managers received five hours of self-study and two-hour telephone training calls. The main focus of training for the FMs was how to use the CMS. (FMs used the CMS for reviewing cases nominated for field work as well as for entry of cost and production information). A Field Manager's manual was developed which described the role and expectations of the FMs as well as administrative specifications. The self-study time was largely devoted to review of all field interviewer materials, the FM manual and hands-on practice with the CMS. The telephone training calls were geared towards teaching the FMs the skills needed to adequately use the CMS, reviewing administrative procedures and answering questions.

**Field interviewer training.** The training program for field interviewers included three hours of self-study and a brief telephone review with their field manager. A self-study manual was developed which described the study, task-specific procedures, and the role and expectations of the field staff. A self-study exercise, designed for interviewers to assess their own knowledge of the information, was also enclosed with their manual. Once interviewers had carefully read through their manual and completed the self-study exercise, a telephone review was scheduled with their FM. The field managers reviewed procedures, answered questions, and assessed the interviewer's understanding of the procedures.

**Field production.** A total of 3,698 cases (29.6 percent of the total sample) were sent to the field. The cases sent to the field were the most difficult: 40 percent were refusals, and 60 percent were cases that had been contacted 14 times without completion or were cases that had not been located.

When the telephone center nominated a case for completion by the field, the case was reviewed by a team of telephone and field supervisors who discussed whether further efforts in the telephone center would be fruitful. If the case was sent to the field, a telephone center supervisor assigned the case to one of the three field teams based on the geographic location of the case, or if unknown the original address NORC had for the respondent at the start of data collection. Case materials were sent to the field manager, including a face sheet with locating and demographic information, a call history report with notes made by telephone shop interviewers and locators describing each contact made with the respondent/contact/locating resource, and a resource listing with all of the locating resources used and/or available for the case. The cases were then reviewed by the FMs before being assigned to a field interviewer. Hardcopy materials were used in two ways: by the FM for making case assignment decisions, and as a reference for the field interviewer assigned to work the case.

Figure 3.4 shows the weekly and cumulative production rates for the field data collection.<sup>4</sup> The field staff completed 3,050 (82.4 percent) of the total case workload, bringing the final B&B:93/94 response rate to 92 percent. As compared to CATI production rates, the field exhibited a slow initial completion rate (because of the small number of cases being worked), and then a steady weekly production of about 200 cases.

Figure 3.4.--Field production rates

SOURCE: NCES, Baccalaureate and Beyond:93/94

### 3.7 Quality Assurance

Extensive quality control procedures were instituted for the following data collection activities: interviewing, locating, and refusal conversion. These procedures are detailed below.

#### 3.7.1 Measures of Productivity

Daily automated production reports, which contained statistics on the number of cases completed and/or located and the inputs required to attain completion (e.g., effort, labor, and time) were used to measure and monitor CATI productivity. These data allowed the B&B staff to pinpoint productivity problems with both the interviewing and locating efforts, and to correct for any problems demanding attention.

#### 3.7.2 Interviewer Monitoring

In addition to monitoring system performance, the data collection staff are subject to quality monitoring. This check-and-balance process enables the supervisory staff to evaluate the extent to which data quality remains within statistical control, and to identify potential difficulties arising from interviewer

<sup>4</sup> These numbers include 426 out-of-scope and ineligible cases, in addition to the 2,624 completed interviews.

and locator training and performance, the individual survey questions, or other aspects of the data collection process.

The statistical quality control (SQC) monitoring procedure used in B&B extends traditional monitoring criteria, which focus specifically on interviewer performance, to an evaluation of the data collection process in entirety. The improved SQC monitoring system randomly selects active work stations and segments of time to be monitored, determines what behaviors will be monitored and precisely how they will be coded, and allows for real-time performance audits, thereby improving the timeliness and applicability of corrective feedback and enhancing data quality.

All in-use work stations were randomly selected at 15 minute intervals for monitoring by a supervisor according to pre-scheduled monitoring sessions. Using an on-line data capture program equipped with audio and visual capabilities, supervisors responded directly to ongoing interviews by entering evaluation data directly onto data capture screens. For assessment of locating skills, the monitor assigned performance ratings to various skills on a 0-5 scale where "0" indicates the skill was not observed, and ratings of 1-5 correspond to increasingly higher level of skill mastery and acceptability. The data capture screen also allowed supervisors to log question numbers associated with errors and general comments pertaining to these errors. Another data capture screen collected very general information and commentary on non-interviewing activities such as refusal conversion. Lastly, a summary screen allowed monitors to record observations of skill (or lack of skill) for the entire evaluation session using the 0-5 rating scale.

Consistent with the daily production reports generated for system monitoring, statistics were reported daily for interviewers' sessions. Daily statistics are presented in table 3.5. Control charts were utilized to track the average number of errors associated with each minute of observed interviewing. Error rates for project staff stayed within the predetermined limits set for the phone center. In addition, Pareto analysis was utilized to identify the most frequently observed errors encountered in a monitoring session. Taken together, these quality control measures ensured the integrity of the data garnered during data collection.

Quality control procedures were also established for field interviewing. The first two interviewer-administered completed questionnaires were directed to a FM for editing. These cases were edited, logged, and appropriate feedback given to the interviewer. Additionally, ten percent of these cases - whether administered over the phone or in person - were validated by FMs. When deemed necessary, the FM continued to edit additional cases to monitor data quality. The need for additional monitoring was based on the FM's subjective judgement of the FI's level of skill. As with the edited cases, validated cases were logged and reported weekly.

Table 3.5.--Total number of interviewing minutes monitored and error rates

Date	Total Errors	Minutes Monitored	Error Rate	Date	Total Errors	Minutes Monitored	Error Rate

## **4.0 Response Rates**

B&B:93/94 interviewers achieved a 92 percent response rate. Table 4.1 presents information on the final disposition for all cases that were initially included in the sample. In all, 12,478 of the cases that were identified as potential B&B sample cases during the NPSAS data collection were included in the B&B data collection<sup>5</sup>. Of these cases, 1520 were found to be ineligible or out of scope, primarily because their graduation date fell outside the July 1 - June 30 window. A total of 10,958 cases were considered to be eligible during the interviewing period of B&B:93/94, and interviews were completed with 10,080 (92%) of these respondents.

The majority of interviews were conducted by telephone interviewers located at a central facility, using a computer-assisted telephone interviewing system. Approximately 68 percent of eligible cases were completed in the telephone center; another 2 percent were designated as final non-respondents.

The remaining 3698 cases (30 percent) were sent to field interviewers who were geographically dispersed across the country. The majority of these cases had been contacted by telephone interviewers, but had not been completed because the respondent had refused. Others were referred because the telephone center had been unable to locate the respondent, or to speak personally to the respondent to complete the interview. Field interviewers completed an additional 2624 interviews, about 70 percent of those that were sent to the field, bringing the cumulative total of completed cases to 10,080.

An examination of the final dispositions shows that 92 percent of eligible respondents participated in the study, approximately 6 percent refused to take part, and another 1 percent did not participate for other reasons. Just under 1 percent of respondents could not be located.

Table 4.2 presents more detailed information on respondents and non-respondents by age, sex, and ethnic background. Table 4.2 contains information concerning the percentage each subgroup that completed the interview. Response rates were similar across almost all of these demographic subgroups. Ninety-nine percent of young respondents (those 22 and under) participated, while approximately 91 percent of those over 22 participated. Males and females participated at approximately equal rates. Response rates were approximately equal among whites, blacks, and American Indians -- 93 percent of eligible respondents in each group participated. Among Asians and Pacific Islanders, the completion rate was slightly lower, just under 90 percent.

The comparatively high rate of non-response that appears in Table 4.2 for those sample members in which age, sex, or race is missing results from the fact that many of these cases were non-respondents in NPSAS, as well as B&B:93/94.

---

<sup>5</sup> The 12,478 cases worked during B&B:93/94 represent a 98 percent sample of the total number of cases (12,768) referred as potentially eligible. A random selection procedure was used to exclude 290 cases to ensure that the study could be completed within budget.

## **5. Evaluation of Instrument**

### **5.1 Length of Interview**

The use of Computer-Assisted Telephone Interviewing yields many advantages, one of which is accurate evaluation of the length of time elapsed during the completion of each section of the interview. The CATI instrument used in this study included several "time stamps" which enable us to look carefully at the amount of time taken by the "average" respondent to complete each section. These data are presented in Table 5.1. The instruments used for data collection in the NPSAS:93 and B&B:93/94 studies are presented in Appendices C and D, respectively.

The average length of a completed interview was 32 minutes. Of this, approximately 2 minutes was spent updating information about the undergraduate career that was missing in the NPSAS file. Within the B&B interview, approximately 6 minutes was spent collecting information about post-baccalaureate education. Another 8 minutes was spent collecting information about the respondent's work since graduating from college, and approximately 3 minutes was spent gathering information about training experiences since college graduation. The demographics, civic participation, and educational loan sections of the interview comprised approximately 12 minutes.

A subsample of respondents were asked about their experiences teaching in elementary and secondary schools since receiving their baccalaureate degrees. Among those asked these questions, another 6.45 minutes was spent collecting these data. However, when averaged across all respondents, less than one minute was spent in collecting this information.

Table 5.1.--Interview administration time by section

(Average number of minutes respondents spent answering questions)

Section Name	Minutes
Introduction (update missing information)	2.28
Education section	5.82
Employment section	7.98
Teaching section	0.78
Training sections	3.33
Final sections: demographic, financial and tracing information	11.87
Total	32.01

## **5.2 Non-response by Item**

One of the goals of B&B was to reduce item non-response by using a variety of innovative techniques to build respondent rapport, including the use of conversational interviewing. Nevertheless, some items, particularly those requiring the recollection of specific numeric figures (i.e., test scores and dates; income figures) were answered by less than 90 percent of respondents who were asked. These items are displayed in table 5.2.<sup>6</sup>

Of the over 1,000 variables included in the final data set, 68 variables contain over 10 percent missing data, due to respondents declining to answer the question, or responding that they could not give an accurate answer. The first section of Table 5.2 contains items concerning graduate entrance examinations and professional licensing exams. The largest categories of non-response in this table are the “don’t know” responses to items concerning test scores and dates. It should be noted that “don’t know” can sometimes be a legitimate response to the test score item, since some respondents had taken a test but had not yet received word of their scores. In other instances, “don’t know” signifies that the respondent had difficulty recalling the information requested and could not provide a number. High levels of don’t know responses are also evident in the items regarding college grades.

Respondents also had difficulty recalling detailed information concerning undergraduate loans and loan payments when the respondent had more than three loans. Respondents were asked about each type of loan individually, and information on up to seven loans was collected. Item non-response appears to be a problem for information collected on loans four through seven. Note that relatively few respondents were asked about this number of loans.

As in other surveys, items that required respondents to reveal exact dollar amounts for income were not answered by some respondents. One item with high non-response, HSEHDIN, was only asked of respondents who said they were “head of the household” and were living with another adult, other than a spouse. The next three items that appear in the table, TOTINCS, ANNINCS, and TOTINCM were asked as a closed-ended categorical question when the respondent did not provide an answer to the original question. When these income questions are combined into a single categorical variable, non-response is under 15 percent.

Few of the remaining items have significant non-response. It is especially notable that the two primary sections of the survey, concerning post-baccalaureate education and employment, had very little missing data.

---

<sup>6</sup> This list does not include items that were pre-loaded using NPSAS data, or other items that were designed as components of composite variables.

### **5.3 Reinterviews**

A group of 100 respondents was recontacted several weeks after being interviewed. These respondents were asked a subset of items included in the initial interview to help assess the quality of those items. Since resources were limited, we focused on items from the education and employment sections that had been problematic in the field test, and were modified between the field test and the main survey.

Table 5.3 provides information on the discrepancies between responses to education items in the two interviews. Results indicate that the questions elicited similar information in both interviews. Ninety-two percent of respondents gave consistent responses when asked whether they had taken any courses for credit since graduating from college. Of the eight percent in which responses were inconsistent, most were cases in which a short enrollment spell was mentioned in the initial interview that was not reported in the reinterview.

As a followup to this question, respondents were asked to name the school they attended; all respondents except one provided consistent names across both interviews. Eighty-five percent of all cases had similar information concerning dates of attendance, and eighty-seven percent had consistent information concerning the usual time of attendance in the two interviews.

Table 5.4 presents information on the consistency of responses to employment items. Ninety-six percent of respondents gave consistent information across surveys when asked whether they had worked since graduation.<sup>7</sup> Almost three-quarters of respondents gave the same number in both surveys when asked about the number of jobs they held since graduation; twenty-six percent gave inconsistent responses. Upon closer scrutiny, many of the discrepancies resulted from jobs held around the time of graduation that were reported in one survey, but not the other. Respondents were asked about the number of jobs held since graduating; interviewers were instructed to include jobs that began before graduation if the job ended after graduation. Confusion over whether to include such jobs accounts for many of the inconsistencies noted in the reinterview.

Information about the beginning and ending dates of jobs and about unemployment status during the periods between jobs were used to construct month-by-month employment status variables for each respondent. In the table below, the average number of discrepancies across interviews in monthly employment status is presented for three periods: the period preceding graduation for most respondents, the summer following the modal graduation date, and the academic year following the modal graduation date. It appears that information was reliably captured for all months except for the summer months following graduation -- approximately 28 percent of cases contained inconsistent data concerning employment status in the summer months. These inconsistencies are due to several causes. For example, in some cases the beginning and ending dates of jobs are off by a month; in other cases a job held at the time of graduation is included in one interview and not another. Among respondents who were not working, there is some inconsistency in whether they are classified as unemployed or out of the labor force during this time.

---

<sup>7</sup> Jobs held between the original interview and the reinterview were excluded from all analyses.

Table 5.3.--Consistency between original interview data and reinterview data:  
education items

(Number of Respondents = 100)

Variable	Consistent in both	Inconsistent due to skip pattern	Inconsistent valid codes
<b>Post-baccalaureate education</b> Have you taken any courses, <u>for</u> <u>credit</u> , offered by a college, university, technical or vocational school, <u>since</u> graduation.	92%	0%	8%
<b>IPEDS code</b> What is the name and location of the school you attended?	91%	8%	1%
<b>Dates of attendance</b> Did you attend this school in 199(2,3,4)? IF NO, ENTER NOT ATTENDING FOR EACH MONTH. IF YES: in what months did you attend full time (ENTER THE MONTH) and in what months did you attend part time?	85%	8%	7%
<b>Usual time of attendance</b> When (do/did) you usually attend classes at this school? (Weekdays, Weeknights, or Weekends)	87%	8%	5%

## **6. B&B:93/94 Transcript Component**

In addition to data gathered from sample members, B&B:93/94 included a transcript component which attempted to capture student-level course-taking and grades for eligible sample members. Transcripts were requested for all sample members from the NPSAS schools from which they received their bachelor's degrees. Data were captured at both the school and student levels; school-level data such as school type, schedule, and grading systems were gathered first and used to guide the entry of student-level courses, credit hours, and grades.

### **6.1 Transcript Collection Procedures**

Data collection for the transcript component began in August, 1994, when a packet was mailed to all 715 NPSAS:93 sample schools from which B&B sample members graduated. The contents of this packet included:

- a B&B informational leaflet;
- letters from NCES, NORC, and the American Association of Collegiate Registrars and Admission Officers;
- a list of professional organization endorsements;
- instructions for sending transcripts;
- a student checklist with the names and other relevant information for each student for whom a transcript was requested;
- a request for reimbursement form and postage paid return envelope in which to send student transcripts.

In addition to student transcripts, schools were asked to provide a course catalog and information on their grading and credit-granting systems and school term. A transcript was requested for all 12,478 students in the B&B:93 sample, although not all transcripts were coded due to sample member ineligibility (see section 6.3 for more information on eligibility criteria).

Prompting of nonresponding schools began in September, 1994, by the telephone center. An attempt was made to address any concerns of the school staff regarding confidentiality or the release of transcripts. At this time, NORC prompters also tried to take any steps necessary to assist the registrar or other school official in gathering the needed information. The majority of schools (595) had sent their transcripts by the end of December 1994. Table 6.1 shows the completion rate for the transcript component. In all, 626 of the 635 (99 percent) eligible schools complied with our request for student transcripts, resulting in a transcript collection rate of 98 percent at the student level.

Table 6.1.--Completion rate for B&B:93/94 transcript component

Final Disposition	Schools	Students
Received	626 (98.6%)	10970 (97.8%)
Refused/final Nonresponse	9 (1.4%)	250 (2.2%)
Out-of-scope <sup>a</sup>	80	1258
Total	715 (100.0%)	12478 (100.0%)

<sup>a</sup> A school (and the sample members attached to it) was considered out-of-scope if it reported that it did not grant baccalaureate degrees. Further conditions for student ineligibility are listed in section 6.3.

SOURCE: NCES, Baccalaureate and Beyond:93/94

## 6.2 Transcript Processing Procedures

The design of the B&B:93/94 transcript processing system capitalized on the work done by previous NORC studies (i.e., HS&B, NELS2). The process flow and system however, were changed in four significant areas. First, since the sample of schools from which transcripts were collected was known, the system was designed around the school as the primary unit, rather than the student. Second, transcripts were entered after all school level information about schedule, grading, and credit-granting systems were collected and verified. The system enforced these parameters and ensured that the transcripts were internally consistent within the school. Third, the transcript coders worked with the full transcript when entering and coding courses. This allowed them to view each entry in context and make intelligent, informed decisions when difficult situations were encountered. Finally, the system was designed so that course-level information (in a unique school) was only entered once; subsequent duplicate course entries were selected by the coder from a dynamic school-level list of all courses entered from previous transcripts.

**School-level coding.** Receipt control and data entry of course catalogs, grading system descriptions, and school term information from the schools began in September 1994. The institutional information was checked for accuracy and completeness, and those schools with incomplete school information, missing grading systems, or missing catalogs were contacted to retrieve missing items.

The grading and credit-granting system used by each school was captured before transcript data were entered. The allowable grades, their quality points (the points per credit for the grade), and the grades counting toward credit were entered into the master grading system table. Each school unit in the database referenced a unique grading system, and only those grades allowed for the school were available to course coders. If new grades were found during course coding, entry was stopped until supervisors could ascertain the correct grading system for the school.

Each course was designated as being a quarter, semester, trimester, clock hour, examination, transfer, study abroad, or other term type. The term type designation, however, had no bearing on the normalized number of credits assigned to each course on the transcript. Instead, the actual minimum number of credits required for a baccalaureate degree was entered at the school level for each school in the sample. The number of credits received for each course was entered at the course level, and the normalized number of credits for each course calculated by multiplying by 120 over the total credits required for a degree.

**Student-level transcript coding.** After the school-based information was entered, the transcripts were processed; transcript data entry and course coding were combined into one procedure. All transcripts from a school were processed by the same coder. Before specific course information was entered, general student-level information from the transcript was entered. These data, such as major and minor field of study, grade point average, high school graduation date, and baccalaureate degree data were entered for all students.

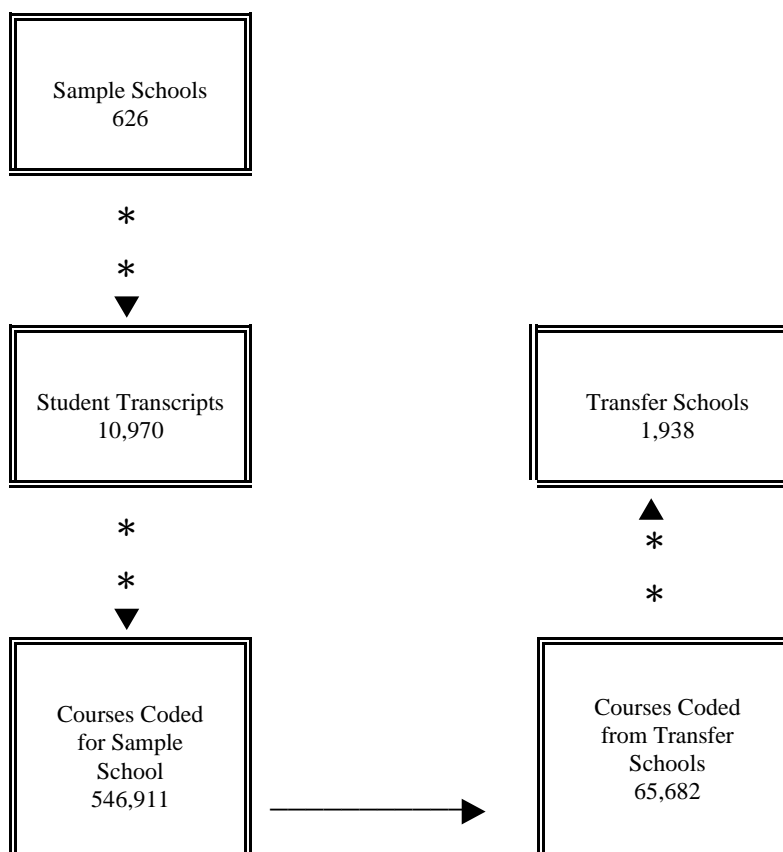

Transcripts are typically organized by courses taken per term. Keeping the course-term link is important for reporting intensity of enrollment. Terms are also important in determining the uniqueness of a course. Courses are unique by school, course abbreviation, and term. This allows for separate coding of special study courses that vary from term to term (i.e., "Special Studies: Babbage and the history of early Computers"; next term, same department "Special Studies: Advanced Fractal/Chaos Applications"). In order to maintain this link, transcript data were entered term-by-term. The coder chose the term description (e.g., Winter, '90) from the list set up for that school, and then proceeded to enter the courses within that term. Courses or blocks of courses which came from outside sources (e.g., transfer, foreign study, advanced placement credit) were entered by source, and the source noted in the term description field.

Within each school, all course abbreviations (i.e., ENGL 101), titles, usual credits, and course codes were stored as new courses were discovered, entered, and coded. When the coder entered the course abbreviation, any title previously stored was displayed. If the title matched the transcript, the coder accepted the entry and verified the number of credits. Note that the number of credits granted for a course was edited since it varied from student to student. For example, Independent Study courses may vary greatly in the number of credits earned. Also, some courses may have optional labs or discussion groups. After verifying the credits, the grade was selected. Only grades from the school's grading system list were allowed. Any disallowed grades were investigated and resolved by the transcript supervisor, usually by researching the course catalog or school institution data or by calling the registrar.

If the course didn't match a pre-existing entry, the coder searched the school-level table to see if other courses existed for the abbreviation. If a course did not exist in the table, the coder entered the full course title, the number of credits, and the grade. These procedures allowed for a robust, automated, school-level course database which greatly improved the quality, and increased speed and efficiency of transcript data entry. Figure 6.1 provides an illustration of the flow of materials in transcript data collection.

Although transcripts were requested from only the baccalaureate degree granting institutions, these transcripts often were sent to us with transcripts from previous transfer schools attached. A decision was made to code these transcripts. However, no attempt was made to collect additional information from these 1,938 schools. Because we lack the school-level information for these transcripts, this information is not the same quality as information coded from the baccalaureate transcripts.

### 6.3 B&B:93/94 Transcripts Eligibility Criteria

During the course of transcript collection, it was found that some NPSAS sample schools from which a sample member was reported to have received a bachelor's degree, actually did not offer that degree. In most cases this was confirmed by data on the school in the Integrated Postsecondary Education Data System (IPEDS) database. Students attached to these sample schools were considered out-of-scope for transcript processing. In other cases, the school did grant baccalaureate degrees but did not award a degree to the student. Again the student was considered out-of-scope. In most of these out-of-scope cases ineligibility was confirmed by the respondent questionnaire status. In all cases where the respondent was eligible in the B&B CATI (completed the questionnaire or non-response) and a transcript was received, the transcript was entered regardless of whether or not a bachelor's degree was awarded. The determination of transcript eligibility involved the interaction of both transcript status and questionnaire status. Table 6.2 shows the matrix of questionnaire dispositions and transcript dispositions.

Table 6.2.--Questionnaire-transcript status interaction

Transcript status	Questionnaire complete	Questionnaire non-response	Questionnaire ineligible
Transcript received:			
BA in range	Eligible; Code	Eligible; Code	Eligible; Code
BA not in range	Eligible; Code	Review for eligibility	Ineligible; Don't Code
BA not awarded	Eligible; Code	Review for eligibility	Ineligible; Don't Code
Transcript not received:			
No record of student at school	Transcript non-response	Review for eligibility	Ineligible
BA not awarded	Transcript ineligible	Review for eligibility	Ineligible
School refused	Transcript non-response	Transcript non-response	Transcript ineligible

SOURCE: NCES, Baccalaureate and Beyond:93/94

As shown above, the combination of questionnaire and transcript status resulted in various final outcomes, which then informed the decision whether or not to process the transcript or count the sample member as eligible. The final eligibility criteria are best defined as:

*A sample member is eligible for B&B:93/94 if he or she received a baccalaureate degree from the sample school between July 1, 1992 and June 30, 1993; OR*

*If he or she completed a B&B interview and satisfied one of the following criteria:*

- received a baccalaureate degree from another school during the reference period;*
- earned at least 75 percent of the credits needed for a baccalaureate degree from the NPSAS school;*
- the respondent interview data showed that he or she attended multiple schools.*

Table 6.3 provides information on the eligibility of cases in the interview and transcript components of the study. Any case that was found to be eligible in either component of the study will be retained for future rounds. (In the CATI study, eligibility was determined by respondents' self-reported graduation.) Excluded from future follow-up will be the 1178 cases that were found to be ineligible in both components of the study, as well as the 108 cases that were found to be ineligible in one component and were non-respondents in the other. Thus, 11,192 cases will be followed in subsequent

rounds of the study. It should be noted that regardless of eligibility prior, only those respondents who reported having completed their baccalaureate degree in the course of the interview were retained as interview completers.

Table 6.3.--Transcript and CATI eligibility

Dispositions	CATI eligible	CATI ineligible	CATI non-interview (Eligibility unknown)
Transcript eligible	9876	267	827
Transcript ineligible	44	1178	36
Transcript nonresponse (Eligibility unknown)	160	72	18

## 6.4 Quality Control

The transcripts data entry system was designed to minimize the majority of coding and entry errors which occur with tasks of this type. Based on the most up-to-date experiences with the NEL S Third Follow-up transcript component, a data entry program was designed to automate as many of the data entry steps as possible. As described in section 6.2, much of this automation occurred on the course level, where the bulk of data entry errors usually take place.

In addition to system design, the coding supervisors regularly undertook quality control checks of entered data, as well as monitoring individual coders. Analyses of interim data files created during production showed that the problematic areas for data entry occurred with transfer schools and transfer credits. While some transfer transcripts were entered, the quality of these data is not at the same level as data from the sample school transcript for several reasons: (1) transfer transcripts were not requested from the transfer school and therefore, were not systematically received; (2) full information about the transfer schools was not obtained (i.e., course catalogs, number of credits required for degree, type of credits granted, etc.).

## 7. Weights Development Documentation for B&B:93/94 Sample

B&B:93/94 final weights were calculated by adjusting the baseline National Postsecondary Student Aid Survey (NPSAS:93) weights. Adjustments were made for tighter B&B eligibility criteria applied in B&B:93/94 and for nonresponse in the B&B:93/94 survey. NPSAS:93 sample development and weights calculation documentation can be found in "Sampling Design and Weighting Report for the 1993 National Postsecondary Student Aid Study" published in February, 1995 (Whitmore, Traccarella, and Iannacchione, 1995). The B&B:93/94 weights adjustment started with the NPSAS:93 base weight calculated for all B&B eligible sample members ( $N_0$ ). A summary of the interim weight components and final B&B weight distribution can be summarized as follows:

### Variables defined in the weights development process:

$N_0$ :	NPSAS:93 base weight
$B_0$ :	NPSAS:93 base weight (with imputed values for 23 missing base weights and adjusted for new baccalaureate degree control totals)
$B_1$ :	B&B:93/94 final weight adjusted for nonresponse (non-respondents are assigned a value = 0)
B&BSTRAT:	Adjusted institution stratum for B&B weight
B&BTYPE:	Adjusted student type for B&B weight

A summary of the final distribution for  $N_0$ ,  $B_0$ , and  $B_1$  is as follows:

Table 7.1.-- Final distribution

Variable	Sum of weights <sup>1</sup>	Number of non-zero observations	Number of zero observations	Mean based on non-zero weight	Standard Deviation	Minimum	Maximum
$N_0$	1,025,292.00	11,169	23	91.80	77.51	1.00	2,225.00
$B_0$	1,184,758.02	11,192	0	105.86	86.15	1.52	2,446.50
$B_1$	1,184,758.04	10,080	1,112	117.54	95.57	1.56	3,149.07

<sup>1</sup>Small difference in sum of weights is due to rounding error.

## 7.1 Weights Development Procedure

### *Step 1. Calculate the final B&B:93/94 case disposition*

The final B&B:93/94 case disposition for weights development and further analysis was created by combining the final survey disposition (CATI) with the final disposition from the Transcript component. The final survey disposition reflects the final data collection disposition and includes complete cases, cases determined to be ineligible for B&B, and cases for which no response was attained. The final transcript component disposition was determined by our ability to collect and code the sample member's undergraduate transcript. Information from the transcript was used to determine whether sample members were eligible for B&B. The valid values from the transcript component disposition include complete (and eligible), ineligible, and not received. Refer to table 6.3 for the breakdown of transcript and CATI eligible cases.

The final disposition of all cases is presented in table 7.2.

Table 7.2.--Final dispositions

Final analysis disposition	Total
CATI complete and transcript complete	9,876
CATI complete no transcript	204
CATI non-respondent; transcript complete	1,094
Eligibility unknown CATI + transcript incomplete	18
Subtotal:	11,192
Determined ineligible in CATI or transcripts	1,286
Total	12,478

SOURCE: NCES, Baccalaureate and Beyond:93/94

***Step 2. Collapse institution stratum and student type cells.***

NPSAS:93 interviews were completed, and B&B eligible sample members were identified, from all 22 institution strata and all 5 student types defined in the NPSAS:93 sample universe. For the purpose of control total, and non-response, adjustments the B&B:93/94 sample were collapsed into 48 cells. These 48 cells include the 16 institution strata containing institutions which grant baccalaureate degrees, and within each stratum three student types (baccalaureate degree eligible--business majors (type 4), baccalaureate degree eligible--all other degrees (type 5), and all other students (types 1-3 collapsed into type 3). The following rules were used to collapse student type and institution stratum:

**Student Type:**

1. If student type =1 (other undergraduates) or  
=2 (graduates) or  
=3 (first professional students)  
Set B&BTYP =3 (other)
2. Else B&BTYP = student type

**Institution Stratum:**

1. If institution stratum (IS) = 17 (public, 2- year) or  
= 20 (public less-than-2-year)  
Set B&BSTRAT = 14 (Public, 4-year, bachelors, low ed)  
[IS 17 (10 cases)+IS 20 (0 cases)=10 cases recoded]
2. Else if institution stratum = 18 (private, not-for-profit, 2-year) or  
= 19 (private, for-profit, 2-year) or  
= 21 (private, not-for-profit, less-than-2-year) or  
= 22 (private, for-profit, less-than-2-year)  
Set B&BSTRAT = 16 (private, 4-year, bachelors, low ed)  
[IS 18 (1)+IS 19(2)+IS 21(2)+IS 22(4)=9 cases recoded]
3. Else set B&BSTRAT = institution stratum

After collapsing institution stratum and sample type, the distribution of B&BSTRAT and B&BTYPE for the 11,192 eligible B&B sample members is as follows:

Table 7.3.--Control totals by institution stratum

B&BSTRAT x B&BTYPE	Type 3 other under- graduates	Type 4 BA business majors	Type 5 BA other majors	Total
1. Public, 4-year, first-prof, high ed	27	39	378	444
2. Public, 4-year, first-prof, low ed	155	174	2,419	2,748
3. Private, 4-year, first-prof, high ed	38	59	759	856
4. Private, 4-year, first-prof, low ed	7	16	294	317
5. Public, 4-year, doctoral, high ed	17	42	379	438
6. Public, 4-year, doctoral, low ed	63	62	830	955
7. Private, 4-year, doctoral, high ed	9	20	126	155
8. Private, 4-year, doctoral, low ed	3	4	148	155
9. Public, 4-year, masters, high ed	31	27	328	386
10. Public, 4-year, masters, low ed	119	183	1,726	2,028
11. Private, 4-year, masters, high ed	5	14	155	174
12. Private, 4-year, masters, low ed	60	135	1,070	1,265
13. Public, 4-year, bachelors, high ed	2	16	109	127
14. Public, 4-year, bachelors, low ed	17	20	111	148
15. Private, 4-year, bachelors, high ed	7	9	109	125
16. Private, 4-year, bachelors, low ed	28	92	751	871
Total	588	912	9,692	11,192

SOURCE: NCES, Baccalaureate and Beyond:93/94

***Step 3. Impute baseline NPSAS:93 weights for 23 eligible B&B sample members and calculate updated baccalaureate degree control totals.***

The B&B:93/94 sample included 26 cases for which the NPSAS:93 baseline weight was equal to zero. In B&B:93/94, 23 of these cases were completed and 3 were determined to be ineligible. The NPSAS:93 baseline weight for the 23 eligible cases was imputed using the average of all non-zero baseline weights within the same institution at which the baccalaureate degree was attained. One of the cases with a missing weight happened to be the only representative in their institution. The baseline NPSAS:93 weight was imputed for this case by using the average across all non-zero weights within the same institution stratum and student type cell.

The baseline weights for all B&B eligible students were further adjusted for final degree totals. Control totals for baccalaureate degrees awarded were calculated based on the IPEDS completions file for academic year 1992-1993. The NPSAS institution sample frame was matched to the IPEDS file and the total number of baccalaureate degrees awarded was calculated by institution stratum. Table 7.4 summarizes the control totals for each B&B stratum.

An adjusted weight  $B_0$  was calculated for each case by multiplying the base weight by the ratio of the sum of degrees awarded to the sum of the base weights for the appropriate institution stratum. The adjusted total number of baccalaureate degrees for academic year 1992-1993 is 1,184,758 degrees. This weight will serve as the B&B base weight used in all future weight adjustments.

Table 7.4.--Estimates of baccalaureate degrees awarded by type of institution used to construct weights

Institution Stratum	Sum of the NPSAS:93 base weights (N <sub>i</sub> )	Number of baccalaureate degrees awarded in academic year 1992-1993
1. Public, 4-year, first-prof, high ed	41,359.00	47,950
2. Public, 4-year, first-prof, low ed	247,936.38	296,486
3. Private, 4-year, first-prof, high ed	88,913.14	104,533
4. Private, 4-year, first-prof, low ed	31,422.00	28,977
5. Public, 4-year, doctoral, high ed	38,872.41	56,165
6. Public, 4-year, doctoral, low ed	92,140.96	106,400
7. Private, 4-year, doctoral, high ed	23,681.00	15,856
8. Private, 4-year, doctoral, low ed	15,460.06	11,759
9. Public, 4-year, masters, high ed	32,575.69	42,165
10. Public, 4-year, masters, low ed	181,775.09	213,132
11. Private, 4-year, masters, high ed	7,236.00	7,636
12. Private, 4-year, masters, low ed	104,907.64	125,733
13. Public, 4-year, bachelors, high ed	3,783.26	5,750
14. Public, 4-year, bachelors, low ed	24,867.62	22,459
15. Private, 4-year, bachelors, high ed	10,182.00	9,395
16. Private, 4-year, bachelors, low ed	82,180.93	90,362
Total	1,027,293.18	1,184,758

SOURCE: NCES, Baccalaureate and Beyond:93/94

**Step 4. Adjust for non-response and calculate final B&B:93/94 weight**

Non-response adjustments for the weight variables were calculated using the following process:

1. Non-response adjustment cells were created by cross-classifying cases by two variables: institutional stratum and student type.
2. Each cell was checked to see that it met two conditions:
  - the cell contained at least 15 students
  - the weighted response rate for the cell was at least two-thirds (67%) of the overall weighted response rate.
3. Any cells that did not meet both conditions were combined into larger cells. This was done by combining student types 3 and 4 within the same institutional stratum. If this larger cell did not meet the criteria specified above, all student types from that institutional stratum were combined.
4. Once all cells were defined, the B&B weight variable was multiplied by the inverse of the weighted response rate for the cell.

In more formal terms, if we define the indicator  $I_{hbi} = 1$  if surveyed B&B sample member  $i$  in student stratum  $b$  and institutional stratum  $h$  responded to the survey, and let  $I_{hbi} = 0$  if the sample member did not respond to the survey, then the response rate for sample members in institutional stratum  $h$  and student stratum  $b$ ,  $R_{hb}$ , is

$$R_{hb} = \frac{\sum_{i=1}^{n_{hb}} B_{0,i} I_{hbi}}{\sum_{i=1}^{n_{hb}} B_{0,i}},$$

where  $n_{hb}$  is the number of sampled students in student stratum  $b$  and institutional stratum  $h$ . The final B&B:93/94 weight adjusted for nonresponse,  $B_1$ , is

$$B_1 = B_0 / R_{hb}.$$

Final response rates for each strata are presented in the following table.

Table 7.5.--Weighted (by B<sub>0</sub>) response rates by strata

BBSTRAT	BBTYPE	N	Response	Nonresponse	Rate
1	3	27	8154.94	682.86	0.92273

## **7.2 Design Effects**

The design effect is defined as the ratio of the variance, corrected for the sampling design, to the variance based on a simple random sample. Most complex multi-stage sampling designs result in a design effect greater than one, that is, the variance of an estimate is actually larger than the variance would be had the data been based on a simple random sample. To estimate the variance using information about the sample design, it is necessary to use statistical procedures such as Taylor Series approximations, Balanced Repeated Replication, or Jackknife Repeated Replication. For B&B:93/94, NORC used the Taylor Series procedure to calculate the standard errors.

The impact of departures from simple random sampling on the precision of sample estimates is often measured by the design effect (designated as DEFF), the ratio of the design-corrected variance to the variance based on SRS assumptions. The square root of the design effect (also called the root design effect, and designated as DEFT) is also useful. The following formulas defined the design effects and root design effect for this section:

$$\text{DEFF} = \frac{(\text{DESIGN-SE})^2}{(\text{SRS-SE})^2}$$

$$\text{DEFT} = \frac{(\text{DESIGN-SE})}{(\text{SRS-SE})}$$

where DESIGN-SE designates the standard error of an estimate calculated by taking into account the complex nature of the survey design, and SRS-SE designates the standard error of the same estimate calculated as if the survey design was a simple random sample.

Standard errors for thirty proportions based on B&B:93/94 data were calculated. Tables 7.7 through 7.15 present estimates of the design effects for these variables for various subgroups of the population. The design effects presented in the first table are based on the entire population; later tables present estimates for subgroups by sex, race, and type of school attended. For each variable and group, the table contains the percent estimate, the design-corrected standard error, the standard error for the same percent estimate based on SRS assumptions, the unweighted n on which the estimate is based, the design effect and the root design effect.

Researchers who use the Data Analysis System prepared for use with B&B:93/94 will find that the program automatically produces design-corrected standard errors. Researchers using the restricted use files are cautioned to use a package (such as SUDAAN or OSIRIS) which can produce the design-corrected standard errors, or to adjust the standard errors produced by typical packages by multiplying them by the mean root design effect for that subgroup.

Table 7.6.--Design effects for all respondents - B&B:93/94

	Percent estimate	Design SE	SRS SE	N	DEFT	DEFF
Received other degree before BA	28.69	0.80	0.45	10,080	1.78	3.15
Took state/profl licensing exams	13.03	0.49	0.34	10,027	1.46	2.12
Applied for aid (of those applying for post-BA entrance)	51.33	1.26	0.89	3,150	1.41	2.00
Attended school since graduation	27.31	0.61	0.44	10,070	1.37	1.89
Received aid (of those who attended school since receiving BA)	61.44	1.49	1.21	1,613	1.23	1.51
Had prior related job experience	47.28	0.69	0.50	9,963	1.38	1.90
Employed since BA	94.88	0.29	0.22	9,966	1.31	1.73
Degree is required for job	55.89	0.75	0.54	8,389	1.38	1.91
Received other similar job offers	29.29	0.65	0.50	8,448	1.31	1.72

HS_GRAD_YR                 When did you get your high school diploma or certificate?    SAMPLE: ASK IF MISSING FROM NPSAS
AQ number: 147

ITERS:                      RANGE: 1/12, 10/92
                             QXQ: Certificate refers to GED - General Education
                             Development Certification.
                             Persons without a high school diploma may take an
                             examination to obtain a GED, allowing them to
                             pursue postsecondary education (without actually
                             having their high school diploma). This may also
                             be accomplished by similar types of certificates
                             that vary state.

=====

DATE_BEGAN_COLL            After high school, when did you first enroll in a course offered by a college or    SAMPLE: ASK IF MISSING FROM NPSAS
AQ number: 149            other postsecondary institution?

ITERS:                      RANGE: 1/12, 10/93
                             QXQ: "Enroll in a course" means when did R begin the
                             course and not when did the course actually begin
                             meeting. If R began a course in October and the
                             course began meeting in September, enter October
                             for the month of enrollment.

                             Any courses after high school is post-secondary
                             education.

                             INSTRUCTIONS: Date entered must be less than
                                           DATE_RECVD_BA

```

=====
UNDERGRAD_MAJOR      What was your major at "SAMPLE SCHOOL"?
AQ number: 150      (INTERVIEWER: PRESS ENTER AND RECORD VERBATIM. DO NOT USE ABBREVIATIONS.)

SAMPLE: ASK IF MISSING FROM NPSAS

SKIP: IF UNDERGRAD_MAJOR = (dk,ref) THEN GOTO
      GPA_SCALE

ITERS:      RANGE:
            QXQ: Major: Principal field of academic study chosen by
                  student in a college (for example, biology,
                  physics, sociology, English literature.)

                  If R has a double major, enter the first major
                  mentioned her. Do not put both majors in the
                  verbatim and code only one. Once the first major
                  is coded, the program will allow you to then enter
                  the second major and code it. Both majors of a
                  double major must be coded.

GRECONFIRM AQ number 195 Have you ever taken the regular Graduate Record Exam (GRE)?

SAMPLE:

1 YES  
2 NO

SKIP: IF NO, REF or DK THEN GOTO  
ANY\_EXAMS\_TAKEN

ITERS:

RANGE:

QXQ: The advanced GREs are tests of particular subjects  
(such as history, English literature, and geology)  
while the regular GRE is a general exam testing  
verbal, analytical, and quantitative knowledge.

INSTRUCTIONS:

=====

GREScore AQ Number 196 When did you last take the test?...What was your score on the quantitative  
section?...on the verbal section?...on the analytical section?  
(INTERVIEWER: DO NOT ADD THE SCORES. INSERT A TOTAL SCORE ONLY IF R REPORTS A  
TOTAL SCORE INSTEAD OF SECTION SCORES)

SAMPLE:

SECTION DATE SCORE  
QUANTITATIVE / (0/800)  
VERBAL (0/800)  
ANALYTICAL (0/800)  
OR TOTAL SCORE (0/2400)

SKIP:

ITERS:

RANGE: 0/800, 2400, 1/12, 70/94

QXQ: If R reports a total score instead of section  
scores, record that score on the last line and  
enter DK for the section scores.

INSTRUCTIONS: ALLOW FOR THREE SCORES AND ONE  
DATE TO BE RECORDED

=====

ANY\_EXAMS\_TAKEN AQ Number: 198 Have you taken any other graduate admissions or national professional licensing  
exams?

=====

EXTRASCHL AQ NUMBER 309   Have you attended another college, university, vocational or technical school
                           since graduating from "SAMPLE SCHOOL"?

SAMPLE:

1      YES
2      NO

SKIP: IF EXTRASCHL = 1 continue loop.  IF
      EXTRASCHL = 2 then goto HIGHESTDEGREE

ITERS: 2         RANGE:
                  QXQ: No Q x Q needed.

INSTRUCTIONS:

=====

HIGHESTDEGREE    Now, thinking about the future, what is the highest degree you expect to receive?
AQ number: 312

SAMPLE:

1 BACHELOR'S DEGREE
2 POST-BACCALAUREATE CERTIFICATE
3 MASTER'S DEGREE (MA, MS, MBA, ETC.)
4 FIRST PROFESSIONAL DEGREE (M.D., J.D., D.D.S., O.D.)
5 DOCTORAL DEGREE (PH.D, ED.D, D.P.H., ETC.)
6 OTHER

SKIP: IF HIGESTDEGREE = 1 THEN GOTO CHANGJOB

ITERS:          RANGE:
                  QXQ: Code highest degree if more than one degree
                       exists.

INSTRUCTIONS:

The key word here is "expect."  If R hopes to get
a Doctoral Degree but realistically only expects
to get a Masters's Degree, "MASTERS'S DEGREE"
should be coded.

Certificate: document certifying that a person
may officially practice in certain professions.
(example: a certified public accountant (CPA).)

Examples of Masters's Degrees:
Master of Arts (MA)
Master of Science (MS)
Master of Business Administration (MBA)
Master of Fine Arts (MFA)

Examples of Doctoral Degrees:
Doctor of Philosophy (PH.D)
Doctor of Education (ED.D)

First Professional Degrees:
MUST BE ONE OF THE FOLLOWING:
Chiropractic (DC or DCM)
Dentistry (DDS or DMD)
Medicine (MD)
Law (LLB, JD)
Optometry (OD)
Osteopathic Medicine (DO)
Pharmacy (D.Pharm)

```

Podiatry (Pod.D. or DP)  
Veterinary Medicine (DVM)  
Theology (M.Div or MHL or BD)

NOTE: Professional degrees do not include degrees  
in cosmetology, truck driving, radio or  
refrigerator repair, et cetera.

=====

ENROLLEXP2 AQ number: 313	Two years from now, do you plan to be enrolled in school working on that degree?	SAMPLE:
	1 YES 2 NO 3 WILL HAVE COMPLETED DEGREE	SKIP: IF ENROLLEXP2 = 2, 3, REF, DK THEN GOTO CHANGJOB
ITERS:	RANGE: QXQ: No Q x Q needed.	INSTRUCTIONS:

=====

                    QXQ: No Q x Q needed.
                    INSTRUCTIONS: Dates cannot be later than
                    today's date
=====

JOB#WEEKSEEK        When did you end this job search or are you still looking?  SAMPLE:
AQ number: 323      (INT: IF R STILL LOOKING CODE 96/96)

ITERS:              RANGE: 1/12, 91/94, 96
                    QXQ: Looking for work includes:
                    - sending out resumes/filling out job
                    applications
                    - using the campus job placement office
                    - reviewing and responding to want ads
                    - attending recruiting fairs
                    - job networking
                    - using an employment agency
=====

JOBEXPERIENCE       Other than internships required for your degree, did you have any work experience  SAMPLE:
AQ number: 326      related to your degree field before graduating from college?

                    1 YES
                    2 NO
                    RANGE:
ITERS:              QXQ: Internship: a supervised practical training
                    providing work experience and credits toward a
                    degree program.
                    INSTRUCTIONS:

=====

EMPLOOP            Now I want to talk about your job history since graduation. Have you worked at any  SAMPLE:
AQ number: 327      jobs for pay since graduation?

                    1 YES
                    2 NO
                    RANGE:
ITERS:              QXQ: No Q x Q needed.
                    INSTRUCTIONS:
                    SKIP: IF EMPLOOP = 2 THEN GOTO WORKLOOK

```

```

=====
JOBNUMBER  AQ number: 328      How many jobs have you held since graduation? (THE JOB DOES NOT HAVE TO BEGIN
                                AFTER GRADUATION.  ANY JOB WORKED AFTER GRADUATION SHOULD BE COUNTED)

                                SAMPLE:

                                SKIP:

ITERS:      RANGE: 1/10
            QXQ: Include both full and part-time jobs. If R was
                  employed by a temporary work agency and worked
                  several different assignments, consider the temp
                  agency to be the employer. The key distinction is
                  who is paying R. If the agency pays R, the agency
                  is the employer.

                                INSTRUCTIONS:

=====

JOBNAME  AQ Number: 330      What are the names of these employers in the order you began working for them
                                beginning with the first employer after graduation? (INTERVIEWER: PROBE: Have you
                                worked for anyone else since graduation?) READ THE RESPONSE LIST BACK TO THE
                                RESPONDENT AND CONFIRM THAT THE ORDER OF JOBS IS COMPLETE AND CORRECT. ALTER LIST
                                IF NEEDED.

                                SAMPLE:

                                SKIP:

ITERS:      RANGE:
            QXQ: If a job began before graduation and continued
                  after graduation, include that job.
                  Spell out the complete name of the employer; do
                  not use abbreviations.

                                INSTRUCTIONS:

=====

STARTDATE  AQ number: 332      When did your job with JOBNAME start?

                                SAMPLE:

                                SKIP:

ITERS: 10    RANGE: 1/12, 30/94
            QXQ: If R was employed for any portion of a month (even
                  just one day), R is considered to be employed for
                  that month by the employer.

                                INSTRUCTIONS: NUMBER OF LOOPS SHOULD MATCH
                                                RESPONSE TO JOBNUMBER. Dates
                                                entered cannot be later than
                                                today's date.

=====

ENDDATE  AQ number: 334      When did this job end?
                                (CODE 96/96 IF STILL EMPLOYED AT THIS JOB)

                                SAMPLE:

                                SKIP:

ITERS: 10    RANGE: 1/12, 92/94, 96
            QXQ: If R was employed for any portion of a month (even
                  just one day), R is considered to be employed for
                  that month by the employer.

                                INSTRUCTIONS:

=====

FULL_PART_TIME
AQ number: 336      During this time, (are/were) you primarily employed full or part-time?

                                SAMPLE:

                                SKIP:

ITERS: 10    RANGE:
            QXQ: Full-time employment = 35 or more hours per week
                  at a given job.
                  Part-time employment = fewer than 35 hours per
                  week at a given job.

                                INSTRUCTIONS: ask only if employed in
                                                empstatmonth(n); loop back to
                                                empstatmonth(n) for
                                                next month (date of graduation +
                                                1)

=====

WORKLOOK  AQ number: 338      Were you looking for work between GRADUATION DATE/ENDDATE and STARTDATE/CURRENT
                                DATE?

                                SAMPLE:

                                SKIP: IF WORKLOOK = 3 THEN GOTO TO NEXT LOOP

ITERS: 10    RANGE:
            QXQ: Looking for work includes:
                  - Sending out resumes/filling out job
                    applications
                  - Using the campus job placement office
                  - Reviewing and responding to want ads
                  - Attending recruiting fairs
                  - Job networking
                  - Using an employment agency

                                INSTRUCTIONS:

```

```

=====
UNEMPLOYSPELL  AQ number: 339  During that time, were you receiving unemployment benefits?  SAMPLE:

1      YES  SKIP:
2      NO
RANGE:
QXQ: Unemployment benefits: payments received from the government while you are out of work and looking for a job, including money from state employment insurance funds and railroad unemployment benefits.  INSTRUCTIONS:

=====
UNEMPLREASONMONTH(N)  What was your main reason for not working, during this period?  SAMPLE: ASK IF WORKLOOK = 2
AQ number: 340  IF NECESSARY, PROBE FOR MAIN REASON

1 WAITING FOR NEW JOB TO START  SKIP: GOTO EXPECTBEGINJOB
2 GOING TO SCHOOL FULL TIME
3 DIDN'T WANT TO WORK
4 FAMILY RESPONSIBILITIES
5 PHYSICALLY UNABLE TO WORK
6 LAID OFF
7 RETIRED
8 TRAVEL
9 OTHER
RANGE:
QXQ: If R gives more than one reason, probe R for MAIN reason and record that reason. If R insists on both reasons being the main reason, select OTHER and record both reasons there.  INSTRUCTIONS: ASK ONLY IF UNEMPLOYED OR OUT OF LABOR FORCE IN EMPSTATMONTH(N)

=====
EXPECTBEGINJOB  When do you expect to begin working at a full-time job? (IF NECESSARY: What is your best guess?)  SAMPLE: Ask if unemployed, out of labor force, or employed part-time at last month-by month employment questions
AQ number: 427  INTERVIEWER: CODE 88/88 IF RESPONDENT SAYS "NEVER")

ITERS:  RANGE: 1/12, 94/99, 88  SKIP:
QXQ: Full-time job = working 35 or more hours per week.  INSTRUCTIONS: DATE MUST BE LATER THAN TODAY'S DATE.

=====
APRILJOBLIST  AQ Number: 442  During April 1994, which of the following was your main employer? (MAIN = employer that you worked the most number of hours.)  SAMPLE:

INSERT ALL JOBS WORKED DURING APRIL 1994 FROM JOBLIST PLUS  SKIP: IF APRILJOBLIST = REF THEN GOTO PJOBLIST
91. INSERT NEW JOB
RANGE:
QXQ: No QXQ needed.  INSTRUCTIONS:

=====
APRILJOBSTART  When did you start working at "APRILJOBEMPLOYER"?  SAMPLE:

AQ number: 444

ITERS:  RANGE: 0/12, 10/94  SKIP:
QXQ: If R was employed for any portion of a month (even just one day), R is considered employed for that month.  INSTRUCTIONS: PRELOAD FROM EMPLOYMENT LOOP

=====
APRILJOBEND  When did you stop working at "APRILJOBEMPLOYER", or are you still there?  SAMPLE:
AQ number: 446  (INTERVIEWER: IF STILL EMPLOYED AT FIRST JOB, CODE 96/96)

ITERS:  RANGE: 1/12, 94, 96  SKIP:
QXQ: If R was employed for any portion of a month (even just one day), R is considered employed for that month.  INSTRUCTIONS: PRELOAD FROM EMPLOYMENT LOOP

```

```

=====
APRILJOBCONFIRM  AQ Number:  During April, 1994, your main employer was JOBNAME. That job began on STARTDATE  SAMPLE:
448               and continued until ENDDATE. Is that correct?

                1      YES
                2      NO
                RANGE:
                QXQ: "Main employer" means the employer you worked the
                most hours for during April, 1994. If you worked
                for two employers during April, 1994, for the same
                number of hours, the employer who provided you
                with the most income during that month is you
                "main employer."
                INSTRUCTIONS: INSERT NAME AND WORK DATES FOR
                                ONE JOB HELD DURING APRIL 1994.

=====
APRILJOBEMPLOYER  During April of this year, where were you employed? What was the name of your  SAMPLE:
AQ number: 449    main employer?
                DO NOT USE ABBREVIATIONS

                RANGE:
                QXQ: Employed means holding a job and working for pay.
                INSTRUCTIONS:

                If R has more than one April job, probe for full
                time employer. If more than one full time job,
                pick the job with most hours worked in April. If
                the number of hours is equal, select the job with
                the highest salary.

                If R was on Workmen's Compensation during April,
                he is considered employed for April.

=====

OTHER_DEGREE(N)      (Now I am going to ask you about the 4 most recent degrees and licenses you have earned) What kind of degree, license or certificate was the first/next one?
AQ number: 161      (Please start with the most recent).

1 ASSOCIATE'S DEGREE
2 BACHELOR'S DEGREE
3 POST-BACCALAUREATE CERTIFICATE
4 MASTER'S DEGREE (MA, MS, MBA, ETC.)
5 DOCTORAL DEGREE (PH.D., ED.D. D.P.H., ETC.)
6 FIRST PROFESSIONAL DEGREE (M.D., J.D., D.D.S., O.D.)
7 OTHER CERTIFICATE/LICENSE
RANGE:
QXQ: Code highest degree if more than one degree exists

Associate's degree: degree signifying the completion of 2 year program offered by college.

License: official or legal permission to do something specific, (example: hairdressing, practical nursing, flying.)

Certificate: document certifying that a person may officially practice in certain professions. (example: a certified public accountant (CPA).)

Examples of Masters's Degrees:
Master of Arts (MA)
Master of Science (MS)
Master of Business Administration (MBA)
Master of Fine Arts (MFA)

Examples of Doctoral Degrees:
Doctor of Philosophy (PH.D)
Doctor of Education (ED.D)

First Professional Degrees:
MUST BE ONE OF THE FOLLOWING:
Chiropractic (DC or DCM)
Dentistry (DDS or DMD)
Medicine (MD)
Law (LLB, JD)
Optometry (OD)
Osteopathic Medicine (DO)
Pharmacy (D.Pharm)
Podiatry (Pod.D. or DP)
Veterinary Medicine (DVM)
Theology (M.Div or MHL or BD)

NOTE: Professional degrees do not include degrees in cosmetology, truck driving, radio or refrigerator repair, et cetera.

=====
TUITION_APP(N)      Now I'd like you to think about the period from July 1, 1993 through June 30,
AQ number: 304      1994.
                   During that period, how much were your total tuition and fees prior to any
                   discounts or waivers at "PBASCHOOL(N)"?

ITER: 3              RANGE: 1/25000
                   QXQ: Record the amount of tuition that the school
                   normally charges during the reference period and
                   not the amount R is paying if that amount is
                   different. If the school normally charges
                   $15,000, but the R is paying $10,000 because R has
                   a $5,000 tuition waiver, code $15,000. The amount
                   normally paid during the time period should be
                   picked up, even if it covers courses beginning
                   before or ending after the time period.

ITER: 3              RANGE: 1/25000
                   QXQ: Record the amount of tuition that the school
                   normally charges during the reference period and
                   not the amount R is paying if that amount is
                   different. If the school normally charges
                   $15,000, but the R is paying $10,000 because R has
                   a $5,000 tuition waiver, code $15,000. The amount
                   normally paid during the time period should be
                   picked up, even if it covers courses beginning
                   before or ending after the time period.

PBASCHL_ROOM(N)     Other than tuition, what were your total costs of attending "PBASCHOOL(N)" during
AQ number: 305     this same period (July 1, 1993 - June 30, 1994). Total costs include lab fees,
                   books, transportation, living expenses and other expenses relating to attending
                   that school.

ITER: 3              RANGE: 1/99000
                   QXQ: All costs related to attending school should be
                   included.

PBASCHL_AID$(N)     Did you receive any financial assistance between July 1, 1993 and June 30, 1994
AQ number: 306     other than family assistance?

ITER: 3              1      YES
                   2      NO
                   RANGE:
                   QXQ: Financial assistance includes:
                   Tuition waivers
                   Stipends
                   Scholarships

```

```

=====
JOBNUMBER  AQ number: 328      How many jobs have you held since graduation? (THE JOB DOES NOT HAVE TO BEGIN
                                AFTER GRADUATION.  ANY JOB WORKED AFTER GRADUATION SHOULD BE COUNTED)

                                SAMPLE:

                                SKIP:

ITERS:      RANGE: 1/10
            QXQ: Include both full and part-time jobs. If R was
                  employed by a temporary work agency and worked
                  several different assignments, consider the temp
                  agency to be the employer. The key distinction is
                  who is paying R. If the agency pays R, the agency
                  is the employer.

                                INSTRUCTIONS:

=====

JOBNAME  AQ Number: 330      What are the names of these employers in the order you began working for them
                                beginning with the first employer after graduation? (INTERVIEWER: PROBE: Have you
                                worked for anyone else since graduation?) READ THE RESPONSE LIST BACK TO THE
                                RESPONDENT AND CONFIRM THAT THE ORDER OF JOBS IS COMPLETE AND CORRECT. ALTER LIST
                                IF NEEDED.

                                SAMPLE:

                                SKIP:

ITERS:      RANGE:
            QXQ: If a job began before graduation and continued
                  after graduation, include that job.
                  Spell out the complete name of the employer; do
                  not use abbreviations.

                                INSTRUCTIONS:

=====

STARTDATE  AQ number: 332      When did your job with JOBNAME start?

                                SAMPLE:

                                SKIP:

ITERS: 10    RANGE: 1/12, 30/94
            QXQ: If R was employed for any portion of a month (even
                  just one day), R is considered to be employed for
                  that month by the employer.

                                INSTRUCTIONS: NUMBER OF LOOPS SHOULD MATCH
                                                RESPONSE TO JOBNUMBER. Dates
                                                entered cannot be later than
                                                today's date.

=====

ENDDATE  AQ number: 334      When did this job end?
                                (CODE 96/96 IF STILL EMPLOYED AT THIS JOB)

                                SAMPLE:

                                SKIP:

ITERS: 10    RANGE: 1/12, 92/94, 96
            QXQ: If R was employed for any portion of a month (even
                  just one day), R is considered to be employed for
                  that month by the employer.

                                INSTRUCTIONS:

=====

FULL_PART_TIME
AQ number: 336      During this time, (are/were) you primarily employed full or part-time?

                                SAMPLE:

                                SKIP:

ITERS: 10    RANGE:
            QXQ: Full-time employment = 35 or more hours per week
                  at a given job.
                  Part-time employment = fewer than 35 hours per
                  week at a given job.

                                INSTRUCTIONS: ask only if employed in
                                                empstatmonth(n); loop back to
                                                empstatmonth(n) for
                                                next month (date of graduation +
                                                1)

=====

WORKLOOK  AQ number: 338      Were you looking for work between GRADUATION DATE/ENDDATE and STARTDATE/CURRENT
                                DATE?

                                SAMPLE:

                                SKIP: IF WORKLOOK = 3 THEN GOTO TO NEXT LOOP

ITERS: 10    RANGE:
            QXQ: Looking for work includes:
                  - Sending out resumes/filling out job
                    applications
                  - Using the campus job placement office
                  - Reviewing and responding to want ads
                  - Attending recruiting fairs
                  - Job networking
                  - Using an employment agency

                                INSTRUCTIONS:

```

```

=====
UNEMPLOYSPELL  AQ number: 339  During that time, were you receiving unemployment benefits?  SAMPLE:

1      YES  SKIP:
2      NO
RANGE:
QXQ: Unemployment benefits: payments received from the government while you are out of work and looking for a job, including money from state employment insurance funds and railroad unemployment benefits.  INSTRUCTIONS:

=====

UNEMPLREASONMONTH(N)  What was your main reason for not working, during this period?  SAMPLE: ASK IF WORKLOOK = 2
AQ number: 340  IF NECESSARY, PROBE FOR MAIN REASON

1 WAITING FOR NEW JOB TO START  SKIP: GOTO EXPECTBEGINJOB
2 GOING TO SCHOOL FULL TIME
3 DIDN'T WANT TO WORK
4 FAMILY RESPONSIBILITIES
5 PHYSICALLY UNABLE TO WORK
6 LAID OFF
7 RETIRED
8 TRAVEL
9 OTHER
RANGE:
QXQ: If R gives more than one reason, probe R for MAIN reason and record that reason. If R insists on both reasons being the main reason, select OTHER and record both reasons there.  INSTRUCTIONS: ASK ONLY IF UNEMPLOYED OR OUT OF LABOR FORCE IN EMPSTATMONTH(N)

=====

EXPECTBEGINJOB  When do you expect to begin working at a full-time job? (IF NECESSARY: What is your best guess?)  SAMPLE: Ask if unemployed, out of labor force, or employed part-time at last month-by month employment questions
AQ number: 427  INTERVIEWER: CODE 88/88 IF RESPONDENT SAYS "NEVER")

ITERS:  RANGE: 1/12, 94/99, 88  SKIP:
QXQ: Full-time job = working 35 or more hours per week.  INSTRUCTIONS: DATE MUST BE LATER THAN TODAY'S DATE.

=====

APRILJOBLIST  AQ Number: 442  During April 1994, which of the following was your main employer? (MAIN = employer that you worked the most number of hours.)  SAMPLE:

INSERT ALL JOBS WORKED DURING APRIL 1994 FROM JOBLIST PLUS  SKIP: IF APRILJOBLIST = REF THEN GOTO PJOBLIST
91. INSERT NEW JOB
RANGE:
QXQ: No QXQ needed.  INSTRUCTIONS:

=====

APRILJOBSTART  When did you start working at "APRILJOBEMPLOYER"?  SAMPLE:

AQ number: 444

ITERS:  RANGE: 0/12, 10/94  SKIP:
QXQ: If R was employed for any portion of a month (even just one day), R is considered employed for that month.  INSTRUCTIONS: PRELOAD FROM EMPLOYMENT LOOP

=====

APRILJOBEND  When did you stop working at "APRILJOBEMPLOYER", or are you still there?  SAMPLE:
AQ number: 446  (INTERVIEWER: IF STILL EMPLOYED AT FIRST JOB, CODE 96/96)

ITERS:  RANGE: 1/12, 94, 96  SKIP:
QXQ: If R was employed for any portion of a month (even just one day), R is considered employed for that month.  INSTRUCTIONS: PRELOAD FROM EMPLOYMENT LOOP

```

```

=====
APRILJOBCONFIRM  AQ Number:  During April, 1994, your main employer was JOBNAME. That job began on STARTDATE  SAMPLE:
448               and continued until ENDDATE. Is that correct?

                1      YES
                2      NO
                RANGE:
                QXQ: "Main employer" means the employer you worked the
                most hours for during April, 1994. If you worked
                for two employers during April, 1994, for the same
                number of hours, the employer who provided you
                with the most income during that month is you
                "main employer."
                INSTRUCTIONS: INSERT NAME AND WORK DATES FOR
                                ONE JOB HELD DURING APRIL 1994.

=====
APRILJOBEMPLOYER  During April of this year, where were you employed? What was the name of your  SAMPLE:
AQ number: 449    main employer?
                DO NOT USE ABBREVIATIONS

                RANGE:
                QXQ: Employed means holding a job and working for pay.
                INSTRUCTIONS:

                If R has more than one April job, probe for full
                time employer. If more than one full time job,
                pick the job with most hours worked in April. If
                the number of hours is equal, select the job with
                the highest salary.

                If R was on Workmen's Compensation during April,
                he is considered employed for April.

=====
APRILJOB OCCUPATIONV  What is your occupation? (IF NECESSARY: Can you describe your job? What type of  SAMPLE:
AQ number: 452    work (do you/did you) do at "APRILJOBEMPLOYER"?
                (INTERVIEWER: PROBE ABBREVIATIONS AND CODE OCCUPATION)

                RANGE:
                QXQ: Spell out the complete job title; do not use
                abbreviations.
                INSTRUCTIONS:

=====
APRILJOBINDUSTRYV  And what type of business or industry (is/was) that? (For example, a grocery  SAMPLE:
AQ number: 456    store, restaurant, retail shoe store, automobile factory, state government
                agency)
                INTERVIEWER: CODE INDUSTRY

                RANGE:
                QXQ: Spell out the type of business or industry; do not
                use abbreviations.
                INSTRUCTIONS:
