National Postsecondary Student Aid Study:
Student Financial Aid Estimates for 1999–2000

U.S. Department of Education

Rod Paige
Secretary

National Center for Education Statistics

Gary Phillips
Acting Commissioner

The Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing and reporting data related to education in the United States and other nations. It fulfils a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, usefully, and high quality data to the U.S. Department of Education, the Congress, the state, other education policymaker, practitioners, data users and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

Research Triangle Institute (RTI) in North Carolina and MPR Associates, Inc., under contract with the National Center for Education Statistics (NCES), conducted the 1999–2000 National Postsecondary Student Aid Study (NPSAS:2000). John Riccobono of RTI provided project direction and management. Lutz Berkner at MPR directed the development of the financial aid variables in this report. A cadre of other staff too numerous to list worked long hours to produce the NPSAS:2000.

More than 1,000 individuals at the postsecondary institutions and 80 field data collectors assisted in the data collection activities at 999 institutions. These institutional coordinators, financial aid administrators, and their staff were helpful, diligent, and productive. Without their assistance, NPSAS:2000 would not exist.

The following NCES reviewers provided helpful comments and suggestions for this report: C. Dennis Carroll, Arnold A. Goldstein, Lisa Hudson, Paula R. Knepper, and Karen O’Conor. Others from the Department include Dan Madzellan and David Bergeron (Office of Postsecondary Education), Dan Goldenberg (Office of Policy and Planning), Cliff Adelman and Jon Oberg (Office of Educational Research and Improvement). Frank Balz (National Association of Independent Colleges and Universities), Kent A. Phillippe (American Association of Community Colleges), Melanie Corrigan and Jacqueline King (American Council on Education) and Peter Syverson (Council of Graduate Schools), Sue Clery (JBL Associates), Alisa Cunningham (Institute for Higher Education Policy) also reviewed the final draft of the report and provided helpful suggestions.

Andrew G. Malizio, Program Director for Postsecondary Longitudinal Studies and Sample Surveys, served as the NCES project officer who managed the study under the overall supervision of C. Dennis Carroll, Associate Commissioner, Postsecondary Education Studies. Dennis Carroll developed the software system used to produce the estimates in this publication.

The NPSAS:2000 received support and advice from a varied constituency over the duration of the study, including more than 65 members of the Technical Review Panel. NCES is indebted to all these individuals who assisted NCES and RTI in the planning, design, and implementation of the study.

INTRODUCTION

The National Postsecondary Student Aid Study (NPSAS) is a comprehensive survey that examines how students and their families pay for postsecondary education. The study includes nationally representative samples of undergraduate, graduate, and first-professional students; students attending less-than-2-year, 2-year, 4-year, and doctorate-granting institutions; students who receive financial aid and those who do not receive aid.

This report has been prepared to provide some key estimates as policymakers, researchers, and analysts begin working on research for the next reauthorization of the Higher Education Act. It is based on information from about 50,000 undergraduates, 11,000 graduate students and 1,000 first-professional students enrolled at approximately 1,000 postsecondary institutions during the 1999–2000 academic year. The sample represents about 16.5 million undergraduates, 2.3 million graduate, and 330,000 first-professional students enrolled at any time between July 1, 1999 and June 30, 2000. Considerably more detail on how students finance their postsecondary education and student background characteristics will be published in subsequent reports.

Estimates in this report focus primarily on percentages of students receiving specified types of financial aid, and average amounts of specific types of financial aid received. Unless otherwise noted, all average amounts of financial aid described in the report Highlights and presented in the tables reflect the weighted means and are based only on the recipients of the specified types of aid. Further, the estimates in this report are subject to sampling and nonsampling errors. Additional information, including NPSAS:2000 data sources and a description of the variables, is presented in the Technical Appendix.

HIGHLIGHTS

The estimates in this report are based on information from 50,000 undergraduates, 11,000 graduate students and 1,000 first-professional students enrolled at approximately 1,000 postsecondary institutions at any time during the 1999–2000 academic year. Unless otherwise noted, all average amounts of aid described here and presented in the tables reflect the weighted means and are based only on the amounts received by recipients of the specified aid. Highlights are presented separately for undergraduates and graduate and first-professional students.

Among the 16.5 million undergraduates (including full-time and part-time students) enrolled during 1999–2000:

- Fifty-five percent of undergraduates (about 9.2 million) received some type of financial aid, averaging \$6,265 (table 1, 2). Overall, about two out of five undergraduates (39 percent) received some type of federal aid, averaging about \$5,230 (table 3, 4).
- Percentages of undergraduates receiving federal aid varied depending on family income and type of institution. Among dependent students, percentages receiving federal aid ranged from 70 percent of undergraduates from families with incomes of less than \$20,000 to about 25 percent of undergraduates from families with incomes of \$100,000 or more. Among independent students, 67 percent of those with incomes less than \$10,000 received some federal financial aid (table 3).
- Percentages of undergraduates receiving federal aid ranged from 21 percent at public 2-year institutions to 80 percent at private for-profit institutions (table 3).
- Forty-seven percent of undergraduates at private not-for-profit 4-year institutions received some institutional aid, averaging about \$6,760 (table 3, 4).
- About one of every eight dependent undergraduates (13 percent) came from families with income less than \$20,000 (table 6). Among Title IV aid recipients who were dependent on their parents for financial support, 21 percent had incomes less than \$20,000 (table 6). Three of every eight independent undergraduates (38 percent) who received Title IV aid had family incomes less than \$10,000 (table 7).
- Among students enrolled full time for the full year at one institution, about 30 percent received a federal Pell grant, averaging \$2,281 (table 8, 9).
- Nearly one of every four undergraduates (23 percent) received a federally subsidized Stafford loan, averaging about \$3,214 (table 8, 9).
- Among the Title IV loan recipients enrolled in private not-for-profit, doctorate-granting institutions, the average loan amount was \$5,161. At private not-for-profit non-doctorate-granting 4-year institutions, the average received was \$5,095 (table 9).
- Among the Title IV loan recipients enrolled in public doctorate-granting institutions, the average student loan amount was \$4,743. At public non-doctorate-granting 4-year institutions, the average received was \$4,225 (table 9).

- Fifty-four percent of students enrolled in private for-profit less-than-2-year institutions received a Title IV loan; the average received was \$4,878 (table 8, 9).
- Among full-time, full-year students, about 39 percent at public 2-year, 56 percent of those at public 4-year institutions and 67 percent of those at private not-for-profit 4-year institutions received some Title IV financial aid (table 10).
- Among aided undergraduates, 40 percent received grants only; 13 percent received loans only; 26 percent received grants and loans; 8 percent received grants, loans, and work-study; and the remaining 13 percent received other combinations of aid (table 12B).

Among the 2.7 million graduate and first-professional students (including full-time and part-time students) enrolled during 1999–2000:

- About six of every ten graduate/first-professional students received some financial aid averaging \$13,255. Eight of every 10 full-time/full-year students (82 percent) received some type of financial aid, averaging almost \$19,600. First-professional students received an average of about \$21,500 (table 13, 14).
- Overall, 29 percent of graduate and first-professional students received Stafford loans, averaging nearly \$12,850. Average amounts borrowed varied considerably by degree program. For example, about 73 percent of first-professional students took out loans, compared to 26 percent for master's students and 21 percent for doctoral students (table 13, 14).
- Overall, 27 percent received some institutional aid, averaging about \$9,840; but this varied considerably depending on the type of program. For example, 22 percent of students in master's degree programs compared to 58 percent of students in doctoral degree programs received some institutional aid (table 13, 14).
- About one in four master's degree students received employer aid, averaging about \$3,840. About 11 percent of doctoral students and 5 percent of first-professional students received employer aid (table 13, 14).

REPORTS IN PROGRESS

Additional information on NPSAS will be published in future reports, including the following:

Methodology Report for the National Postsecondary Student Aid Study: 1999–2000

Describes the sampling, student eligibility, data collection procedures, variables in the Data Analysis System, weighting, and variance estimation procedures for the study.

Bias Analysis Report for the National Postsecondary Student Aid Study: 1999–2000

Describes the methods used to analyze and reduce the bias in survey estimates due to institution and student nonresponse, and contains tables displaying estimates of bias before and after weighting for selected variables.

Profile of Undergraduates in U.S. Postsecondary Education Institutions: 1999–2000

Describes the characteristics of undergraduates enrolled during 1999–2000, including age, race/ethnicity, gender, income, financial aid receipt, community service, veteran status, and more. Includes an essay on the diversity of undergraduate students.

Student Financing of Undergraduate Education: 1999–2000

Focuses on how undergraduate students enrolled during 1999–2000 financed their education, with detailed tables on the distribution and average amounts of grants, loans, and work-study funds received by students from federal, state, institutional, and private sources. These are shown by selected student characteristics, such as age, gender, race/ethnicity, income, and attendance status for the various types of institutions. Information includes tuition, total student budgets, and the net price of attendance by type of institution. Includes an essay on students who borrow at the federal loan limits.

Student Financing of Graduate and First-Professional Education: 1999–2000

Describes the characteristics of graduate and first-professional students enrolled during 1999–2000, including age, race, gender, income, financial aid receipt, community service, veteran status, and more. Also describes those graduate and first-professional students who received financial aid, including grants, loans and work-study from federal, state, institutional, or other sources, by selected student characteristics. Includes an essay on graduate students with assistantships.

TABLES

Table 1.—Percentage of undergraduates receiving selected types of aid: 1999–2000

	Any aid	Grants	Loans	Work-study	Other
Total	55.3	44.4	28.8	5.4	6.9
Dependency and 1998 income level					
Dependent	58.9	46.1	34.9	8.9	7.8
Less than \$20,000	77.4	75.0	35.8	12.2	5.1

NOTE: The loans in columns 3, 4, and 5 refer to student loans. Students whose parents received PLUS loans are included only in the "other" column. For example, if students received Pell grants, Stafford loans, and their parent received a PLUS loan, they are included only in the "Other" column. Estimates by tuition and fees categories, institution type, and attendance pattern exclude students who attended multiple institutions.

NOTE: "Any aid" includes all types of financial aid except aid from parents, friends, and relatives. Students can receive more than one type of aid. Although assistantships may include federal, state, or institutional dollars, all assistantships are counted both as "institutional aid" and as assistantships. NCES defines first-professional programs to include the following fields of study: dentistry, medicine, optometry, osteopathic medicine, veterinary medicine, pharmacy, podiatric medicine, chiropractic, law, and theological professions. Private master's and doctoral program are private not-for-profit. All for-profit programs are included under "other program". Estimates by type of graduate program, institution control, and attendance pattern exclude students who attended multiple institutions.

TECHNICAL APPENDIX

A stratified sample of 1,083 postsecondary institutions was selected from all Title IV-participating institutions listed in the 1998-99 Integrated Postsecondary Education Data System (IPEDS) Institutional Characteristics (IC) database. Readers interested in learning more about the Department of Education's Title IV aid programs can find it by pointing their Web browser to: <http://www.ed.gov/offices/OSFAP/Students/student.html>.

Specifically, to be eligible for NPSAS:2000 an institution was required, during the 1999–2000 academic year, to:

- offer an educational program designed for persons who have completed secondary education; and
- offer more than just correspondence courses; and
- offer at least one academic, occupational, or vocational program off study lasting at least 3 months or 300 clock hours; and
- offer courses that were open to more than the employees or members of the company or group (e.g., union) that administers the institution; and
- be located in the 50 states, the District of Columbia, or Puerto Rico;
- be other than a U.S. Service Academy; and
- have a Title-IV program participation agreement with the Department of Education.

The postsecondary students eligible for NPSAS:2000 were those who attended a NPSAS-eligible institution sometime between July 1, 1999 and June 30, 2000 and who were:

- enrolled in *either* (a) an academic program; (b) at least one course for credit that could be applied toward fulfilling the requirements for an academic degree; *or* (c) an occupational or vocational program that required at least 3 months or 300 clock hours of instruction to receive a degree, certificate, or other formal award;
- not concurrently enrolled in high school; and
- not enrolled *solely* in a GED or other high school completion program.

Institutions were selected with probabilities proportional to a composite measure of size based on expected enrollment in the seven student-level sampling strata: baccalaureate students majoring in business; other baccalaureate students; other undergraduate students; master's students, doctoral students; other graduate students; and first-professional students. A total of 287 institutions had such large expected enrollment that they were selected with certainty, and the remaining 796 sample institutions were selected with probabilities proportional to size from the 22 institutional sampling strata. Out of the 1,072 NPSAS-eligible institutions, 999 sent enrollment lists/files. Table A-1 shows: the number of institutions sampled; the number eligible, and the number providing lists for sampling by sector.

Table A-2 shows the numbers of institutions that provided student level data from institutional records for at least one student sampled at that institution and the response rates by institutional strata. Rates for obtaining institutional record data among all eligible sample

students are shown in Table A-3. Table A-4 shows student interview response rates, overall and by institutional sector. Student response, or participation rates for the overall study are presented in Table A-5 and are based on the numbers of students with completed institutional records data and/or student interview data. Additional information on the sampling procedures and response rates will be available in the NPSAS:2000 Methodology Report. Finally, Table A-6 shows standard errors for estimates in Table 1.

DATA SOURCES for NPSAS:2000 Information for NPSAS:2000 came from several sources, including:

- **CADE** (Computer Assisted Data Entry) Data from institutional financial aid and registrar records entered at the institution by field collectors or institutional personnel in 1999–2000.
- **Student CATI** (Computer Assisted Telephone Interview) Data collected in telephone interviews of the sampled students in 1999–2000.
- **CPS:2000** (Central Processing System) U. S. Department of Education database of federal financial aid applications for the 1999–2000 academic year.
- **NSLDS** (National Student Loan Data System) U. S. Department of Education database of federal Title IV loans and Pell Grants.
- **IPEDS-IC** (Integrated Postsecondary Education Data System-Institutional Characteristics) U. S. Department of Education, National Center for Education Statistics, database of descriptive information about individual postsecondary institutions.
- **Testing Organizations (ETS/ACT)** Educational Testing Service and American College Testing program provide SAT/ACT information on sampled students who took the SAT/ACT college entrance examination since 1995.
- **Derived**--Composite variables created by combining data from more than one source or from more than one other variable.

DATA LIMITATIONS AND ACCURACY OF ESTIMATES

Students who attended more than one institution (about 6 percent of undergraduates and nearly 4 percent of graduate students) are coded in a separate category ("multiple institutions") for institution type, institution control, and attendance pattern. Although included in the "totals" in this report, due to confounding tuition and fees and attendance patterns, students who attended multiple institutions were excluded in the estimates by institution type, tuition and fees categories, and attendance pattern in this report.

The estimates in this report are subject to sampling and nonsampling errors. Nonsampling errors are due to a number of sources, including but not limited to, nonresponse, inaccurate coding, misspecification of composite variables, and inaccurate imputations. Sampling errors exist in all sample-based data sets, including NPSAS. Estimates calculated from a sample will differ from estimates calculated from other samples even if all the samples used the same sample design and methods. For similar reasons, estimates of average aid amounts based on

the NPSAS sample will probably differ from specific program amounts reported by the Department's program offices.

The standard error is a measure of the precision of the estimate. In this tabulation, each estimate's standard error was calculated using Taylor series procedures and can be produced using the NPSAS:2000 Data Analysis System software. Standard errors for Table 1 are reported in Table A-6. All differences reported in the Highlights were significant at the .05 level, using the Bonferroni procedure when appropriate.

CAUTIONS WHEN COMPARING NPSAS:2000 ESTIMATES TO PRIOR NPSAS ESTIMATES

Comparison of results with prior rounds of NPSAS requires compensation for three changes in the design of the survey over time. For NPSAS:2000, the survey was restricted for the first time to institutions participating in Title IV student aid programs. According to the Data Analysis System (DAS) for NPSAS:96, only about 1 percent of the sampled undergraduates were attending an institution not eligible to participate in the Department's Title IV aid programs. When students attending non-Title IV-eligible institutions were excluded from the NPSAS:96 sample, the percentage of undergraduates who received financial aid increased by less than 0.3 percent. This small change primarily affects comparisons of students enrolled in less-than-2-year and private for-profit institutions. When using the DAS from prior NPSAS studies for comparisons to NPSAS:2000, analysts may want to filter cases in the prior studies (e.g, NPSAS:96 or NPSAS:93) based on the variable that identifies whether the student was sampled from an institution that was eligible to participate in Title IV aid programs (T4ELIG).

Another design change was made beginning with NPSAS:90 to improve full-year estimates. NPSAS:87 sampled students enrolled in the fall (October). However, NPSAS:90 sampled students who were enrolled at four discrete points in time: summer (August), fall (October), winter (February), and spring (June). In NPSAS:93, NPSAS:96, and NPSAS:2000, institutions were asked to provide one list (if possible), that represented students enrolled at any time during the respective financial aid award year. In NPSAS:87 and NPSAS:90, those students who were initially sampled in the fall could have been enrolled for the full academic year.

The 1990, 1993, 1996, and 2000 NPSAS samples also included some students from Puerto Rico. Puerto Rico was not included in the NPSAS:87 sample. The final restricted data files and the 2000 NPSAS Data Analysis System software will allow users to produce estimates comparable to 1987 by selecting only students who were enrolled in the fall and excluding those sampled from Puerto Rico (see the variable description for COMPTO87 in the Data Analysis System). These estimates will reflect full-year amounts of aid for students who were enrolled in the fall. Such estimates, however, will not reflect total expenditures as reported by the Department's specific Title IV program offices. This difference will be explained more fully in the forthcoming methodology report.

The estimates for average amounts in this report are only for aid recipients who received the specified type of aid. Further, average aid amounts for specific groups where most students do not receive aid are not reflective of the amount of support these students receive overall, and the type of support (e.g., whether it is grants, subsidized loans, unsubsidized loans, work-study, or some combination) is likely to differ. For example, among Title IV aid recipients, dependent undergraduates with family incomes of \$100,000 or more, 24.2 percent received Title IV aid (including PLUS loans); average amount among recipients in this group was \$6,676 (including PLUS loans). But 69.9 percent of dependent undergraduates with parent income of less than \$20,000 received Title IV aid; average amount was \$4,875 (table 8, 9).

Further, NCES recommends that readers not try to produce their own estimates such as the percentage of all students receiving aid or the numbers of undergraduates enrolled in the fall who received any aid, federal aid, state aid, etc., by combining estimates in this tabulation with the Center's Integrated Postsecondary Education Data System (IPEDS) fall 1999 enrollment numbers. The IPEDS enrollment data are for fall enrollment only and include some students not eligible for NPSAS (e.g., those enrolled in U.S. Service Academies, those taking college courses while enrolled in high school). Additional information on the NPSAS:2000 sample will be described in the forthcoming methodology report.

ADDITIONAL NOTES ON THE ACCURACY OF THE ESTIMATES

Unit nonresponse can cause bias in survey estimates. Weight adjustments are typically used to reduce bias due to unit nonresponse. RTI incorporated all potentially biased variables that were known for most respondents and nonrespondents into the nonresponse adjustment models to maximize the bias reduction. Three stages of CATI nonresponse adjustment also were used to adjust for the bias resulting from three different types of nonresponse: adjustment for inability to locate; adjustment for refusal among located students; and adjustment for other nonresponse among located students who did not refuse. Poststratification to control totals also was used to adjust for the potential for bias resulting from frame errors. Control totals included weighted totals (using the study weight) for six variables (age, gender, applied for federal aid, received federal aid, received state aid, and received institution aid) crossed with type of institution. These variables were known for most respondents and nonrespondents. Additional details regarding the weighting process will be described in the forthcoming Methodology Report.

RTI conducted a bias analysis to determine if any variables were significantly biased due to nonresponse. Several variables were found to be biased before weighting. The weighting procedures appear to have reduced the bias for these variables. However one variable that was known for respondents and nonrespondents (fall attendance status) was still slightly biased. The poststratification adjustments were re-computed adding as additional control totals the weighted totals for this variable crossed with type of institution. Therefore, when the weighting was completed, no variables available for most respondents and nonrespondents had significant bias. Additional information on the nonresponse bias analysis will be described in the forthcoming Bias Analysis Report.

COMPUTATION OF STANDARD ERRORS

To facilitate computation of standard errors for nonlinear statistics using the first-order Taylor series approximation, RTI defined analysis strata and analysis replicates (or PSUs). Each non-certainty sample institution was defined to be an analysis replicate, except when it contained fewer than four responding students. It was then combined with another comparable institution to form an analysis replicate. Each certainty institution was divided into two, three, or four random samples, each of which was defined to be an analysis replicate, except when that resulted in a replicate containing fewer than four responding students. The sample replicates (non-certainty institutions and samples of students from certainty institutions) were then assigned to analysis strata by pairing the replicates within institutional sampling strata, where possible. When a sampling stratum had an odd number of replicates from non-certainty institutions, then one analysis stratum contained three replicates rather than two. Some certainty institutions contained three or four replicates which formed an analysis stratum.

All estimates in this tabulation were produced using software developed by NCES. The software includes more than 200 variables and allows users to produce tables or correlation matrices for use in regression analyses. Users can specify row and column variables to produce estimated means, percentages, standard errors, and weighted sample sizes. Estimates can be produced for specific subgroups—for example, aided, full-time, dependent students. To download the software containing the NCES 2000 NPSAS Data Analysis System readers can connect directly to the NCES Data Analysis Systems Web Site at <http://nces.ed.gov/das> or contact the NCES Postsecondary Studies Division, 1990 K Street, NW, Washington, DC 20006; or call (202) 502-7334. The software for NPSAS:2000 should be available on CD-ROM by late September 2001.

Table A-1.—Overall institutional eligibility and enrollment list participation rates

Type of institution ¹	Institutions sampled ²	Eligible Institutions ²	Institutions providing lists ⁴		
			Number	Unweighted percent	Weighted percent

Private not-for-profit, 4-year non-doctorate granting	173	171	153	89.5	81.6
Private not-for-profit, 4-year doctorate granting	168	168	156	92.9	96.5
Private for-profit, less-than-2-year	77	75	67	89.3	88.4
Private for-profit, 2-year or more	50	50	48	96.0	94.8

¹Institution classifications were verified by participating institutions to correct classification errors on the sampling frame.

²During institution contacting, it was discovered that part of one school had recently split off and formed a separate institution. Both institutions are included.

³Among the 11 institutions considered ineligible: 2 closed after the sampling frame was defined; 2 were duplicates with other selected institutions; and the remaining 7 failed to meet one or more of the criteria for institutional NPSAS eligibility.

⁴Percents are based on the eligible institutions within the row under consideration.

STAFSUB	Stafford subsidized amount (FFEL+Direct) 1999–2000
STAFUNSB	Stafford unsubsidized amount (FFEL+Direct) 1999–2000
PERKAMT	Perkins amount 1999–2000
INSTAMT	Institutional total aid 1999–2000
ASTAMT	Total assistantships 1999–2000
EMPLYAMT	Total employer aid 1999–2000

ROW VARIABLES USED IN TABLES 13-14

AIDCTRL	Institution control 1999–2000
GRADDEG	Type of graduate program 1999–2000
PGMSEC	Graduate program and institution type 1999–2000
INCOME	1998 income level

+++++

DESCRIPTION OF VARIABLES USED IN THIS REPORT

Readers interested in learning more about the Department of Education’s Title IV aid programs can find it by pointing their Web browser to:
<http://www.ed.gov/offices/OSFAP/Students/student.html>

Students who attended more than one institution (about 6 percent of undergraduates and nearly 4 percent of graduate students) are coded in a separate category (“multiple institutions”) for institution type, institution control, and attendance pattern. Although included in the “totals” in this report, due to confounding tuition and fees and attendance patterns, students who attended multiple institution were excluded in the estimates by institution type, tuition and fees categories, and attendance pattern.

AIDCTRL Institution control (with multiple) 1999–2000

Control of the NPSAS sample institution attended during 1999–2000, indicating those who also attended other institutions. Students who attended more than one institution (about 6 percent of undergraduates and nearly 4 percent of graduate students) are coded in a separate category, but were not reported in the estimates for institution control in this report. For students who attended more than one institution during 1999–2000, the NPSAS sample institution may not represent where all or part of the financial aid was actually received.

Sources: Derived

AIDPACK Aid package by type of aid 1999–2000

Indicates package by type of aid (grants, loans, work-study, other) received during 1999–2000. For students with any aid (TOTAID >0), indicates combinations of aid from grants (TOTGRT), student loans (TOTLOAN), work-study (TOTWKST), and other types of aid (TOTOTHR, which includes parent PLUS loans).

See individual variable descriptions for further details.

Sources: Derived

AIDSECT Institution type (with multiple) 1999–2000

Indicates the level and control of the institution attended. For students who attended only one institution (STUDMULT=1), this is the same as the NPSAS sample institution type (SECTOR9). Students who attended more than one institution (about 6 percent of undergraduates and nearly 4 percent of graduate students) are coded in a separate category, but were not reported in the estimates for institution type in this report. For students who attended more than one institution during 1999–2000, the NPSAS sample institution may not represent where all or part of the financial aid was actually received.

See individual variable descriptions for further details.

Sources: Derived

ASTAMT Assistantship amount total 1999–2000

Indicates total amount of assistantship funds received during 1999–2000. The sum of amounts from all research assistantships (RESAMT), teaching assistantships (TEACHAMT), and any other type of graduate assistantship (GRADAST). Classified as "other" type of institutional aid in the award grid (see TOTAID). Assistantships are often treated as employee salaries rather than financial aid by institutions and may not be recorded in the financial aid records. For nonrespondents to the telephone interviews, assistantships are substantially underreported in CADE, so the CATIWT should be used for reliable estimates of these variables.

See individual variable descriptions for further details.

Sources: Student CATI, CADE

ATTNSTAT Attendance pattern 1999–2000

Indicates a student's attendance pattern at all institutions attended during 1999–2000. Students are considered to have enrolled for a full year if they were enrolled 9 or more months during the NPSAS year. Months did not have to be contiguous, and students did not have to be enrolled for a full month in order to be considered enrolled for that month. Specific categories of ATTNSTAT: Full-time/full-year, 1 institution: Enrolled 9 or more months full time during 1999–2000. (Additional months enrolled could be part time) Full-time/part-year, 1 institution: Enrolled less than 9 months during 1999–2000 and attending full time in all of these months. Part-time/full-year, 1 institution: Enrolled 9 or more months during 1999–2000, but less than 9 months were full time. Part-time/part-year, 1 institution: Enrolled less than 9 months during 1999–2000 and all or some of these months were part time. Multiple institutions: Student attended more than one institution in 1999–2000. Sources: CADE, student CATI

DEPEND Dependency status 1999–2000

Student dependency status for federal financial aid. Students under age 24 are generally considered to be dependent on their parents for financial support. Students were considered to be independent in 1999–2000 if they met any of the following criteria:

- 1) Age twenty-four or older as of 12/31/1999
- 2) A veteran of the U.S. Armed Forces
- 3) Enrolled in a graduate or professional program beyond a bachelor's degree
- 4) Married
- 5) Orphan or ward of the court
- 6) Have legal dependents other than a spouse

Students under 24 who do not meet any of these conditions but are receiving no parental support may be classified as independent by campus financial aid officers using their professional judgment.

Sources: CPS:2000, CADE, derived from Student CATI, imputation

EMPLYAMT Employer aid 1999–2000

Indicates total amount of aid received from employers during 1999–2000. Includes tuition waivers for employees and dependents of postsecondary institutions and employer-paid tuition reimbursements. Employer paid tuition reimbursements are usually paid directly to the student, and not through the financial aid office, so they are substantially underreported by institutions in CADE. For a more reliable estimate use the CATI weight.

Sources: Student CATI, CADE

GRADDEG Type of graduate program 1999–2000

Indicates the general type of graduate degree program in which the student was enrolled in 1999–2000. For a detailed list of the degree programs see DEGPGM. NCES defines first-professional programs to include the following ten fields of study: dentistry, medicine, optometry, osteopathic medicine, pharmacy, podiatric medicine, veterinary medicine, chiropractic, law, and theological professions.

Sources: Student CATI, CADE

INCOME Dependency and 1998 income level

Indicates total income in 1998 (categorical). Recodes total income (CINCOME) by dependency (DEPEND) into categorical income levels. Calendar year income in 1998 was used for the federal need analysis to determine financial aid eligibility in 1999–2000. DEPINC, INDEPINC, and CINCOME are continuous income variables.

See individual variable descriptions for further details.

Sources: CPS:2000, Student CATI, imputation

INGRTAMT Institutional grants total 1999–2000

Indicates the total amount of institutional grant aid received in 1999–2000. Includes all grants and scholarships, tuition waivers, and graduate fellowships received during the NPSAS year. See grid under TOTAID for more information.

Sources: CADE, student CATI

INSTAMT Institutional aid total 1999–2000

Indicates the total institutional aid amount received during 1999–2000. Equal to the sum of institutional grants and fellowships (INGRTAMT), institutional loans (INLNAMT), institution-sponsored work-study (INSTWRK), and all other institutional amounts including assistantships (INOTHAMT).

See grid under TOTAID for more information.

Sources: CADE, student CATI

PELLAMT Pell Grant total amount 1999–2000

Indicates the federal Pell grant amount received at all institutions attended during 1999–2000. Pell grants are awarded to undergraduates who have not yet received a Bachelor's or first professional degree. They are intended as a financial base, to which other financial aid awards can be added. The amount of a Pell grant depends on the Expected Family Contribution (EFC), price of attendance, and attendance status (full time or part time, full year or part year). In 1999–2000 the maximum Pell grant amount was \$3,125.

Sources: NSLDS, CADE

PERKAMT Perkins loan amount 1999–2000

Indicates the federal Perkins loan amount received during 1999–2000. The Perkins loan is a campus-based (administered by each institution) low-interest loan for students who show exceptional financial need. Priority is given to Pell grant recipients. For undergraduates, total annual awards cannot exceed \$3,000, and the maximum amount that can be borrowed is \$15,000. Perkins loans are underreported in NSLDS, so CADE institution reported Perkins loans are also included in this variable.

Sources: NSLDS, CADE

PGMSEC Graduate program and institution type 1999–2000

Indicates the type of NPSAS sample institution (SECTOR9) and the type of degree program in which graduate/first-professional students were enrolled (GRADDEG). Graduate students sampled at less-than-4-year institutions (where they were taking undergraduate courses) are classified as "other."

Sources: Derived

STAFFAMT Stafford loan total (sub+unsub) 1999–2000

Indicates the total amount of Stafford loans (Direct, Federal Family Education Loan (FFEL), subsidized, and unsubsidized) received during 1999–2000, including loans borrowed to attend schools other than the NPSAS sample school. All of the federal loan variables in NPSAS:2000 include the loans borrowed at all institutions attended.

NOTE: There are four categories of Federal Stafford Loans. Under the DIRECT loan program, the federal government makes loans directly to students and parents through schools. Under the FFEL Program, private lenders such as banks, credit unions, and savings and loan associations usually make the loans. Although the source of funds is different, both programs provide the same types of loans. A SUBSIDIZED loan is awarded on the basis of financial need. If a student qualifies for a subsidized loan, the federal government pays the interest on the loan until the student begins repayment, and during authorized periods of deferment thereafter. An UNSUBSIDIZED loan is not awarded on the basis of need. Students who qualify for an unsubsidized loan are charged interest from the time the loan is disbursed until it is paid in full. Students can choose to pay the interest or allow it to accumulate. If the student allows the interest to accumulate, it will be capitalized (added to the principal amount of the loan). Annual loan limits for Stafford loans vary by class level and dependency status.

Sources: NSLDS, CADE

STAFSUB Stafford subsidized loan 1999–2000

Indicates the amount of subsidized Stafford (FFEL or Direct) loans received during 1999–2000. For more information about loans see STAFFAMT.

Sources: NSLDS, CADE

STAFUNSB Stafford unsubsidized loan 1999–2000

Indicates the amount of unsubsidized Stafford (FFEL or Direct) loans received during 1999–2000.

For more information about loans see STAFFAMT.

Sources: NSLDS, CADE

STATEAMT State aid total 1999–2000

Indicates the amount of state aid received during 1999–2000. Equal to the sum of state grants (STGTAMT), state loans (STLNAMT), state-sponsored work-study (STWKAMT), and all other state financial aid (STOTHAMT). State grants include the LEAP portions funded by the federal government.

See grid under TOTAID for more information.

Sources: CADE

STGTAMT State grants total 1999–2000

Total amount of state grants, scholarships, and fellowships, (including the federal portion of Leveraging Education Assistance Program [LEAP] funds to states) received in 1999–2000.

See grid under TOTAID for more information.

Sources: CADE

T4LNAMT1 Federal Title IV loans (except PLUS) 1999–2000

Sum of all federal Title IV student loans except PLUS loans to parents. Includes Stafford subsidized and unsubsidized loans and Perkins loans.

Sources: NSLDS, CADE

TFEDLN Total federal loans (except PLUS) 1999–2000

Indicates the total amount of federal loans, excluding PLUS loans to parents. Includes Perkins (PERKAMT), Stafford (STAFFAMT), and federal loans through the Public Health Service received during 1999–2000.

See grid under TOTAID for more information.

Sources: NSLDS, CADE

TFEDAID Total federal aid 1999–2000

Indicates the total amount of federal financial aid, excluding veterans benefits (included in OTHRSCR). Equal to the sum of federal loans (TFEDLN), federal grant (TFEDGRT), federal work-study (TFEDWRK), and other federal financial aid (TFEDOTHR, primarily PLUS loans) received during 1999–2000.

See grid under TOTAID for more information.

Sources: NSLDS, CADE

TFEDGRT Total federal grants 1999–2000

Indicates the total amount of federal grants received in 1999–2000. Primarily Pell Grants (PELLAMT) and Supplemental Educational Opportunity Grants (SEOGAMT), but also Robert Byrd Scholarships and any other federal grants, fellowships, or traineeships received during 1999–2000. Does not include federal veteran's benefits or military aid (VADODAMT).

See grid under TOTAID for more information.

Sources: NSLDS, CADE

TFEDWRK Federal College Work-study 1999–2000

Indicates the total amount of federal work-study received during 1999–2000. Includes the institutional matching funds. Usually this represents the amount awarded, which may be more than the amount actually earned during the year.

See grid under TOTAID for more information.

Sources: CADE

TITIVAMT Total federal Title IV aid 1999–2000

Indicates the total amount of federal Title IV financial aid awards received during 1999–2000.

Equal to the sum of Perkins loans (PERKAMT), Stafford loans (STAFFAMT), PLUS loans (PLUSAMT), Pell grants (PELLAMT), Supplemental Educational Opportunity Grants-SEOG (SEOGAMT), and college work-study(TFEDWRK).

Sources: Derived

TOTAID Total aid amount 1999–2000

Indicates the total amount of all financial aid received during 1999–2000. TOTAID is related to other award variables by type and source of aid according to this grid:

	federal		state		inst		other		type totals
Grant:	TFEDGRT	+	STGTAMT	+	INGRTAMT	+	OTHGTAMT	=	TOTGRT
Loans:	TFEDLN	+	STLNAMT	+	INLNAMT	+	OTHLNAMT	=	TOTLOAN
Work :	TFEDWRK	+	STWKAMT	+	INSTCWS	+	OTHWKAMT	=	TOTWKST
Other:	TFEDOTHR	+	STOTHAMT	+	INOTHAMT	+	OTHROTHR	=	TOTOTHR
Source:	TFEDAID	+	STATEAMT	+	INSTAMT	+	OTHRSCR	=	TOTAID

PLUS loans are included in TFEDOTHR and TOTOTHR rather than in TFEDLN and TOTLOAN. Veteran's and military benefits (VADODAMT) are included in OTHROTHR ("other" financial aid), and not as part of any federal aid.

Assistantships are classified as "other" type and "institutional" source (INOTHAMT).

There are two totals of "other" amounts, other by type and other by source:

TOTOTHR is the total of all amounts that were not classified by type as grants, loans, or work-study. This includes PLUS loans (PLUSAMT), veterans benefits and military aid (VADODAMT) and vocational rehabilitation and job training grants (VOHELP).

OTHRSCR is the total of all amounts that were not classified by source as federal, state, or institutional, including employer aid (EMPLYAMT), private aid (PRIVAID), and federal veteran's benefits (VADODAMT).

Sources: Derived.

TOTGRT Total grants and scholarships 1999–2000

Indicates the total amount of all grants and scholarships: federal, state, institutional, and other received during 1999–2000. Equal to sum of all federal grants (TFEDGRT), state grants (STGTAMT), institutional grants (INGTAMT), and "other" grants that were not classified as federal, state or institutional (OTHGTAMT). Includes employer tuition reimbursements (EMPLYAMT) and grants from private sources (PRIVAMT).

See grid under TOTAID for more information.

Sources: CADE, NSLDS, student CATI

TOTLOAN Total student loans (except PLUS) 1999–2000

Indicates the total amount of all loans to students: federal, state, institutional, and private sector received during 1999–2000. Equal to the sum of federal loan amount (TFEDLN), state loan amount (STLNAMT), institution loan amount (INLNAMT), and other loan amounts (OTHLNAMT) which include private commercial loans (PRIVLOAN). Does not include PLUS loans (PLUSAMT).

See grid under TOTAID for more information.

Sources: NSLDS, CADE, student CATI

TOTOTHR Other type of aid (includes PLUS) 1999–2000

Indicates the total amount of aid received during 1999–2000 that was not classified as grants, student loans, or work-study. Equal to the sum of other federal amounts (TFEDOTHR), other state amounts (STOTHAMT), other institutional amounts (INOTHAMT), and other types of aid from other sources (OTHRSCR). Includes PLUS loans (in TFEDOTHR), teaching and research assistantships (in INOTHAMT), vocational rehabilitation and job training grants (usually in STOTHAMT), and veterans benefits and military tuition aid (in OTHRSCR).

See grid under TOTAID for more information.

Sources: Derived

TOTWKST Total work-study amount 1999–2000

Indicates the total amount of all work study awards received during 1999–2000. Equal to the sum of federal work-study amount (TFEDWRK), state work-study amount (STWKAMT), institution work-study amount (INSTWRK), and other unclassified work-study amount (OTHWKAMT). Usually reflects the amount awarded, which may be more than the amount actually earned. Research and teaching assistantships are included in INOTHAMT ("other" institutional aid amounts).

See grid under TOTAID for more details.

Sources: CADE

TUITION2 Tuition and fees 1999–2000

Tuition and fees charged at the sampled NPSAS institution for students who attended only one institution during 1999–2000. Based primarily on information from the registrar's office.

Excludes about 6 percent of undergraduates and nearly 4 percent of graduate students who attended more than one institution because the tuition that the student was charged at the other institution(s) was not known.

Sources: CADE, IPEDS-IC, Derived

Analysis Weights

Additional information on the weight components will be described in the forthcoming Methodology Report. The weight components for the student weights for this analysis are the following:

- (1) Institution Sampling Weight (WT1)
- (2) Adjustment for Institution Multiplicity (WT2)
- (3) Institution Poststratification Adjustment (WT3)
- (4) Adjustment for Institution Nonresponse (WT4)
- (5) Student Sampling Weight (WT5)
- (6) Student Subsampling Weight (WT6)
- (7) Adjustment for Students Never Sent to CATI (WT7)
- (8) Adjustment for Student Multiplicity (WT8)
- (9) Adjustment for Unknown Eligibility Status (WT9)
- (10) Weight Trimming Adjustment (WT10)
- (11) Adjustment for Study Nonresponse (WT11)
- (12) Poststratification Adjustment for Study Respondents (WT12)
- (13) Adjustment for Not Locating Students (WT13)
- (14) Adjustment for CATI Refusals (WT14)
- (15) Adjustment for Other CATI Nonresponse (WT15)
- (16) Poststratification Adjustment for CATI Respondents (WT16)

Properly combined, these components result in two analysis weights: CATIWT and STUDYWT. Except for employer aid and assistantships for graduate students, all estimates in this report were produced using the STUDYWT. The appropriate weight for analysis depends on the particular variables of interest to the analyst, as described below:

CATIWT is the analysis weight for computer-assisted telephone interview (CATI) respondents. Use this weight when producing estimates where the items of interest are based entirely on telephone interview data (or require interview data to be reliable). These would include estimates such as: the percentage employed or percentage who did any community service or other items where the primary source of the information is the telephone interview (Student CATI).

STUDYWT is the analysis weight for all students in the study, including those without a telephone interview. Use this weight when the primary source of the data is from the institution (CADE), the Central Processing System (CPS) or the National Student Loan Data System (NSLDS). For example, when producing percentages and average amounts of financial aid by institution type or family income level, the STUDYWT should be used.

For further information on these and other variables in the NPSAS:2000 data set, see the full Data Analysis System at <http://nces.ed.gov/das>, or the forthcoming NPSAS:2000 Methodology Report.
