

CHAPTER 4

Federal Programs for Education and Related Activities

This chapter provides a summary of federal legislation and funds for education to describe the scope and variety of federal education programs. Data in this chapter reflect outlays and obligations of federal agencies. These tabulations differ from federal receipts reported in other chapters because of numerous variations in the data collection systems. Federal dollars are not necessarily spent by recipient institutions in the same year they are appropriated. In some cases, institutions cannot identify the source of federal revenues because they flow through state agencies. Some types of revenues, such as tuition and fees, are reported as revenues from students even though they may be supported by federal student aid programs. Some institutions that receive federal education funds are not included in regular surveys conducted by the National Center for Education Statistics (NCES). Thus, the federal programs data tabulated in this chapter are not comparable with figures reported in other chapters. Readers should be careful about comparing data on obligations shown in some tables with data on outlays and appropriations appearing in others.

Federal on-budget funding for education showed sizable growth between fiscal years (FYs) 1965 and 2005, after adjustment for inflation (table 356). Large increases occurred between 1965 and 1975. After a slight decrease from 1975 to 1980, there was a further decrease from 1980 to 1985 (16 percent). Thereafter, federal on-budget funding for education generally increased. After adjustment for inflation, federal on-budget funding for education increased by 14 percent from 1985 to 1990, by 20 percent from 1990 to 1995, by 10 percent from 1995 to 2000, and by 47 percent from 2000 to 2005.

Between 1990 and 1995, after adjustment for inflation, federal funds increased for each of the four major categories reported: elementary and secondary education (by 32 percent), postsecondary education (by 12 percent), other education (by 21 percent), and research at educational institutions (by 7 percent) (table 356 and figure 18). During the 1995 to 2000 period, federal funding increased for three of these categories: elementary and secondary education (by 19 percent), other education (by 6 percent), and research at educational institutions (by 26 percent). During the same period, however, funding for postsecondary education decreased by 22 percent. From 2000 to 2005, funding once again increased across all four categories, with a 39 percent

increase for elementary and secondary education, a 117 percent increase for postsecondary education, a 17 percent increase for other education, and a 25 percent increase for research at educational institutions.

Off-budget support (federal support for education not tied to appropriations) and nonfederal funds generated by federal legislation (e.g., private loans, grants, and aid) showed an increase in constant dollars between FY 1980 and FY 2005 (431 percent), but there were fluctuations throughout the period (table 356). Changes in interest rates and program legislation, which affect the number and volume of student loans, may play a role in these fluctuations. Between FY 1990 and FY 2005, these same funds showed an increase of 262 percent.

According to FY 2005 estimates, \$71.0 billion (about 50 percent of the \$141.8 billion spent by the federal government on education) came from the U.S. Department of Education (figure 19 and table 357). Large amounts of money also came from the U.S. Department of Health and Human Services (\$25.9 billion), the U.S. Department of Agriculture (\$13.8 billion), the U.S. Department of Labor (\$5.8 billion), the U.S. Department of Defense (\$5.5 billion), the U.S. Department of Energy (\$4.1 billion), and the National Science Foundation (\$4.1 billion).

For FY 2005, estimates show federal program funds for elementary and secondary education at \$68.0 billion, for postsecondary education at \$36.4 billion, for research at universities and related institutions at \$30.2 billion, and for other programs at \$7.2 billion (table 358).

About 61 percent of total federal education support, excluding estimated federal tax expenditures, went to educational institutions in FY 2005 (table 359). Another 21 percent was used for student support. Banks and other lending agencies received 7 percent, and multiple recipients, including libraries, museums, and federal institutions, received 11 percent.

Of the \$71.0 billion spent by the U.S. Department of Education in FY 2005, about 41 percent (\$29.2 billion) went to local education agencies (school districts) and 11 percent (\$7.5 billion) to state education agencies (table 360 and figure 20). About 19 percent (\$13.2 billion) went to postsecondary institutions and another 19 percent (\$13.8 billion) to postsecondary students. Smaller percentages (totaling \$7.4 billion) went to federal agencies, multiple recipients, and other recipients.

¹On-budget support includes federal funds for education programs tied to appropriations.

²Losses of tax revenue attributable to provisions of the federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

³Other education includes libraries, museums, cultural activities, and miscellaneous research.

⁴The William D. Ford Direct Program (commonly referred to as the Direct Loan Program), provides students with the same benefits they are currently eligible to receive under the Federal Family Education Loan (FFEL) program, but provides loans to students through federal capital rather than through private lenders.

⁵Formerly the Guaranteed Student Loan program. New student loans guaranteed by the federal government and disbursed to borrowers.

⁶Student loans created from institutional matching funds (since 1993 one-third of federal capital contributions). Excludes repayments of outstanding loans.

⁷Student loans created from institutional matching funds (one-ninth of the federal contribution). This was a demonstration project that involved only 10 institutions and had unsubsidized interest rates. Program repealed in fiscal year 1992.

⁸Formerly the State Student Incentive Grant program. Provides dollar-for-dollar required state matching contributions. Starting in fiscal year 2000, under \$30.0 million was dollar-for-dollar required state matching contributions, and over \$30.0 million, the state matching was two-to-one.

⁹Institutions award grants to undergraduate students, and the federal share of such grants may not exceed 75 percent of the total grant.

¹⁰Employer contributions to student earnings are generally one-third of federal allocation.
