

U.S. DEPARTMENT OF EDUCATION  
NCES 2009-020

The collage features several educational data visualizations:

- Figure 11. Enrollment:** A bar chart showing enrollment in millions for various countries, including Australia, Austria, and the Czech Republic.
- Figure 23. Labor force status of 2006-07 high school dropouts:** A pie chart showing the distribution of labor force status for high school dropouts, with a segment labeled 43.8.
- Figure 21. Labor force participation rate of persons 20 to 24:** A bar chart showing the labor force participation rate for different age groups, with a segment labeled 20 to 24.
- Table 98. Public charter schools:** A table showing the number of public charter schools by state, with a total of 15.
- Table 170. T:** A table showing the number of students in various categories, with a total of 15.

The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

# FOREWORD

The 2008 edition of the *Digest of Education Statistics* is the 44th in a series of publications initiated in 1962. The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the *Digest*, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the *Digest* contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The *Digest* contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Educational Technology. Preceding these chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the *Digest* tables; the second, Definitions, is included to help readers understand terms used in the *Digest*; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics.

In addition to updating many of the statistics that have appeared in previous years, this edition contains new material, including

- number and percentage of public school students eligible for free or reduced-price lunch (table 42);
- percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics (table 46);
- percentage distribution of quality ratings of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics (table 47);
- children's specific language, literacy, mathematics, color knowledge, and fine motor skills at about 4 years of age, by age of child and selected characteristics (table 114);
- average National Assessment of Educational Progress (NAEP) reading scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics (table 123);
- average NAEP writing scale score and percentage of students attaining NAEP writing achievement levels, by selected student characteristics and grade level (table 125);
- average NAEP mathematics scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics (table 136);
- average NAEP mathematics scale score of 8th-graders and percentage reporting various attitudes toward mathematics work, by frequency of attitude and selected student and school characteristics (table 137);
- average NAEP science scale score of 12th-graders and percentage reporting various attitudes toward science, by selected student and school characteristics (table 140);
- percentage of elementary and secondary school students who do homework outside of school, whose parents check that homework is done, and whose parents help with homework, by frequency and selected student and school characteristics (table 156);
- total full-year enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction (table 222);
- degrees in Arabic, Chinese, Korean, and Russian conferred by degree-granting institutions, by level of degree (table 309);
- full-time, first-time degree/certificate seeking undergraduate students enrolled in degree-granting institutions, by participation and average amount awarded in financial aid programs, and type and control of institution (table 336); and
- percentage of 18- to 25-year-olds reporting substance abuse during the past 30 days and the past year, by drug used and selected characteristics (table 396).

Updates to tables from the next *Digest of Education Statistics* will appear on the NCES website prior to printing the full edition. The *Digest* can be accessed from <http://nces.ed.gov/programs/digest>.

## List of Figures

Figure	Page
1. The structure of education in the United States . . . . .	11
2. Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2007–08. . . . .	12
3. Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2008 . . . . .	13
4. Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2008 . . . . .	13
5. Highest level of education attained by persons 25 years old and over: March 2008. . . . .	14
6. Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public schools: 1960–61 through 2006–07 . . . . .	57
7. Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2007 . .	58
8. Percentage change in public elementary and secondary enrollment, by state: Fall 2000 to fall 2006 .	58
9. Percentage of revenue for public elementary and secondary schools, by source of funds: 1970–71 through 2005–06 . . . . .	59
10. Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970–71 through 2005–06 . . . . .	59
11. Enrollment, degrees conferred, and expenditures in degree-granting institutions: 1960–61 through 2006–07. . . . .	272
12. Percentage change in total enrollment in degree-granting institutions, by state: Fall 2000 through fall 2006. . . . .	273
13. Enrollment in degree-granting institutions, by age: Fall 1970 through fall 2017. . . . .	273
14. Full-time-equivalent (FTE) students per staff member in public and private degree-granting institutions, by type of staff: 1976 and 2007 . . . . .	274
15. Trends in bachelor's degrees conferred by degree-granting institutions in selected fields of study: 1996–97, 2001–02, and 2006–07. . . . .	274
16. Percentage distribution of total revenues of public degree-granting institutions, by source of funds: 2005–06. . . . .	275
17. Percentage distribution of total revenues of private not-for-profit degree-granting institutions, by source of funds: 2005–06 . . . . .	275
18. Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2008 . . . . .	535
19. Percentage of federal on-budget funds for education, by agency: Fiscal year 2007 . . . . .	536
20. Department of Education outlays, by type of recipient: Fiscal year 2008 . . . . .	536
21. Labor force participation rate of persons 20 to 64 years old, by age group and highest level of education: 2007. . . . .	554
22. Unemployment rates of persons 25 years old and over, by highest level of education: 2007. . . . .	555
23. Labor force status of 2006–07 high school dropouts and completers not enrolled in college: October 2007. . . . .	555
24. Median annual earnings of persons 25 years old and over, by highest level of education and sex: 2007	556
25. Average salaries of bachelor's degree recipients 1 year after graduation, by field: 1991, 1994, and 2001	556
26. Percentage change in enrollment, by selected areas of the world and level of education: 1990 to 2005	579
27. Bachelor's degree recipients as a percentage of the population of the typical ages of graduation, by country: 2005 . . . . .	580
28. Public direct expenditures for education as a percentage of the gross domestic product (GDP), by country: 2005 . . . . .	580
29. Percentage of all public schools and instructional rooms with internet access: Various years, fall 1994 through fall 2005 . . . . .	612

## List of Tables

### Chapter 1. All Levels of Education

#### *Enrollment, Teachers, and Schools*

Table	Page
1. Projected number of participants in educational institutions, by level and control of institution: Fall 2008 . . . . .	15
2. Enrollment in educational institutions, by level and control of institution: Selected years, fall 1980 through fall 2008 . . . . .	15
3. Enrollment in educational institutions, by level and control of institution: Selected years, 1869–70 through fall 2017 . . . . .	16
4. Number of teachers in elementary and secondary schools, and instructional staff in postsecondary degree-granting institutions, by control of institution: Selected years, fall 1970 through fall 2017 . . . . .	18
5. Number of educational institutions, by level and control of institution: Selected years, 1980–81 through 2006–07 . . . . .	19

#### *Enrollment Rates*

6. Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age: Selected years, 1980 through 2007 . . . . .	20
7. Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2007 . . . . .	22

#### *Educational Attainment*

8. Percentage of persons age 25 and over and 25 to 29, by race/ethnicity, years of school completed, and sex: Selected years, 1910 through 2008. . . . .	24
9. Number of persons age 18 and over, by highest level of education attained, age, sex, and race/ethnicity: 2008 . . . . .	26
10. Persons age 18 and over who hold at least a bachelor's degree in specific fields of study, by sex, race/ethnicity, and age: 2001 . . . . .	27
11. Educational attainment of persons 18 years old and over, by state: 2000 and 2006 . . . . .	28
12. Educational attainment of persons 25 years old and over, by race/ethnicity and state: 2006 . . . . .	29
13. Educational attainment of persons 25 years old and over for the 25 largest states, by sex: 2006. . . . .	31
14. Educational attainment of persons 25 years old and over for the 15 largest metropolitan areas, by sex: 2008 . . . . .	31

#### *Population*

15. Estimates of resident population, by age group: 1970 through 2008. . . . .	32
16. Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2008. . . . .	33
17. Estimated total and school-age resident populations, by state: Selected years, 1970 through 2007 . . . . .	34

#### *Characteristics of Families With Children*

18. Number and percentage of family households, by family status and presence of own children under 18: Selected years, 1970 through 2007 . . . . .	35
19. Characteristics of family households with own children under 18, by race/ethnicity and family structure: 2007. . . . .	36

20.	Household income, population poverty rates, and poverty status of 5- to 17-year-olds, by state: 1990, 2000, and 2005–07 . . . . .	37
21.	Poverty status of all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1959 through 2007 . . . . .	39

### ***Opinions on and Parent Involvement in Education***

22.	Average grade that the public would give the public schools in their community and in the nation at large: 1974 through 2008. . . . .	42
23.	Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 1999, 2003, and 2007 . . . . .	43
24.	Percentage of kindergartners through fifth-graders whose parents were involved in education-related activities, by selected child, parent, and school characteristics: 1999 and 2003 . . . . .	44

### ***Finances***

25.	Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2007–08 . . . . .	45
26.	Expenditures of educational institutions, by level and control of institution: Selected years, 1899–1900 through 2007–08. . . . .	46
27.	Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970–71 through 2005–06 . . . . .	47
28.	Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2005–06 . . . . .	48
29.	Direct general expenditures per capita of state and local governments for all functions and for education, by level of education and state: 2005–06 . . . . .	49
30.	Gross domestic product, state and local expenditures, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2007 . . . . .	50
31.	Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2007 . . . . .	51

## **Chapter 2. Elementary and Secondary Education**

### ***Enrollment***

32.	Historical summary of public elementary and secondary school statistics: Selected years, 1869–70 through 2005–06. . . . .	60
33.	Enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 1990 through fall 2008 . . . . .	62
34.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2006 . . . . .	64
35.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2005 . . . . .	66
36.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2004 . . . . .	68
37.	Enrollment in public elementary and secondary schools, by grade: Selected years, fall 1980 through fall 2006 . . . . .	70
38.	Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: 1999 and 2003 . . . . .	71
39.	Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999 and 2003 . . . . .	72

40. Average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2005–06 . . . . .	73
41. Percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and state or jurisdiction: Fall 1996 and fall 2006 . . . . .	74
42. Number and percentage of public school students eligible for free or reduced-price lunch, by state: 2000–01, 2004–05, 2005–06, and 2006–07 . . . . .	75
43. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level of program, control of program, and attendance status: Selected years, 1965 through 2007 . . . . .	76
44. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005 . . . . .	77
45. Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Various years, 1991 through 2005 . . . . .	78
46. Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003–04 and 2005–06 . . . . .	79
47. Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005–06 . . . . .	80
48. Children of prekindergarten through second-grade age, by enrollment status, selected maternal characteristics, and household income: 1995, 2001, and 2005 . . . . .	81
49. Percentage of 3- to 5-year-olds not yet enrolled in kindergarten who have participated in home literacy activities with a family member, by type of activity and selected child and family characteristics: 1993, 2001, and 2005 . . . . .	82
50. Children 3 to 21 years old served in federally supported programs for the disabled, by type of disability: Selected years, 1976–77 through 2006–07 . . . . .	83
51. Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act, Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2006 . . . . .	84
52. Number and percentage of children served under Individuals with Disabilities Education Act, Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2006–07 . . . . .	85
53. Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006 . . . . .	86
54. Percentage of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006 . . . . .	87
55. Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889–90 through fall 2008 . . . . .	88
56. Enrollment in foreign language courses compared with enrollment in grades 9 through 12 in public secondary schools: Selected years, fall 1948 through fall 2000 . . . . .	89
57. Number and percentage of schools with students enrolled in distance education courses and enrollment in distance education courses, by instructional level and district characteristics: 2002–03 . . . . .	90

### ***Private Elementary and Secondary Schools***

58. Private elementary and secondary enrollment, teachers, and schools, by orientation of school and selected school characteristics: Fall 2005 . . . . .	91
59. Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: 1999–2000 and 2003–04 . . . . .	92
60. Private elementary and secondary school full-time-equivalent staff and student to full-time-equivalent staff ratios, by orientation of school, school level, and type of staff: 2003–04 . . . . .	93
61. Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919–20 through 2007–08 . . . . .	95
62. Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Selected years, 1997 through 2005 . . . . .	96

**Teachers and Other Staff**

63.	Public elementary and secondary pupil/teacher ratios, by enrollment size, type, and level of school: Fall 1987 through fall 2006. . . . .	97
64.	Public and private elementary and secondary teachers, enrollment, and pupil/teacher ratios: Selected years, fall 1955 through fall 2017 . . . . .	98
65.	Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2006 . . . . .	99
66.	Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 2000 through fall 2006 . . . . .	100
67.	Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2003–04. . . . .	101
68.	Highest degree earned and years of full-time teaching experience for teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 and 2003–04 . . . . .	102
69.	Selected characteristics of public school teachers: Selected years, spring 1961 through spring 2001 . . . . .	104
70.	Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2003–04. . . . .	105
71.	Teachers' perceptions about serious problems in their schools, by control and level of school: Selected years, 1987–88 through 2003–04 . . . . .	106
72.	Teachers' perceptions about teaching and school conditions, by control and level of school: 1993–94, 1999–2000, and 2003–04 . . . . .	107
73.	Mobility of public and private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2004–05 . . . . .	108
74.	Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of full-time teaching: Selected years, 1990–91 through 2003–04. . . . .	109
75.	Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2003–04 . . . . .	111
76.	Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, and 2003–04 . . . . .	113
77.	Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, and 2003–04 . . . . .	114
78.	Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959–60 through 2006–07 . . . . .	115
79.	Estimated average annual salary of teachers in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2006–07 . . . . .	116
80.	Staff employed in public elementary and secondary school systems, by functional area: Selected years, 1949–50 through fall 2006. . . . .	117
81.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2006 . . . . .	118
82.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2005 . . . . .	119
83.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2004 . . . . .	120
84.	Staff and teachers in public elementary and secondary school systems, by state or jurisdiction: Fall 2000 through fall 2006 . . . . .	121
85.	Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Fall 1999 through fall 2006 . . . . .	122
86.	Principals in public and private elementary and secondary schools, by selected characteristics: 1993–94, 1999–2000, and 2003–04 . . . . .	123

***Schools and School Districts***

87.	Number of public school districts and public and private elementary and secondary schools: Selected years, 1869–70 through 2006–07 . . . . .	124
88.	Number and enrollment of regular public school districts, by enrollment size of district: Selected years, 1979–80 through 2006–07 . . . . .	125
89.	Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2005–06 and 2006–07 . . . . .	126
90.	Public elementary and secondary students, schools, pupil/teacher ratios, and finances, by type of locale: 2005–06 and 2006–07 . . . . .	127
91.	Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: 1990, 2000, 2004–05, and 2006 . . . . .	129
92.	Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2005–06 and fiscal year 2008 . . . . .	140
93.	Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2006: Fall 2006, 2005–06, and fiscal year 2008 . . . . .	151
94.	Public elementary and secondary schools, by type of school: Selected years, 1967–68 through 2006–07 . . . . .	154
95.	Number and percentage distribution of public elementary and secondary schools and enrollment, by type and enrollment size of school: 2004–05, 2005–06, and 2006–07 . . . . .	155
96.	Average enrollment and percentage distribution of public elementary and secondary schools, by type and size: Selected years, 1982–83 through 2006–07 . . . . .	156
97.	Public elementary and secondary school students, by racial/ethnic enrollment concentration of school: Fall 1995, fall 2000, and fall 2006 . . . . .	157
98.	Public elementary and secondary schools, by type and state or jurisdiction: 1990–91, 2000–01, and 2006–07 . . . . .	158
99.	Public elementary schools, by grade span, average school size, and state or jurisdiction: 2006–07 . . . . .	159
100.	Public secondary schools, by grade span, average school size, and state or jurisdiction: 2006–07 . . . . .	160
101.	Number and enrollment of traditional public and public charter elementary and secondary schools and percentages of students, teachers, and schools, by selected characteristics: 2003–04. . . . .	161
102.	Percentage of public schools with permanent and portable (temporary) buildings and with environmental factors that interfere with instruction in classrooms, by selected school characteristics, type of factor, and extent of interference: 2005 . . . . .	163
103.	Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005 . . . . .	163

***High School Completers and Dropouts***

104.	High school graduates, by sex and control of school: Selected years, 1869–70 through 2008–09 . . . . .	164
105.	Public high school graduates, by state or jurisdiction: Selected years, 1980–81 through 2006–07. . . . .	165
106.	Averaged freshman graduation rates for public secondary schools, by state or jurisdiction: Selected years, 1990–91 through 2005–06 . . . . .	166
107.	Public high school graduates and dropouts, by race/ethnicity and state or jurisdiction: 2005–06 . . . . .	167
108.	General Educational Development (GED) test takers and test passers, by age: 1971 through 2006 . . . . .	168
109.	Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2007 . . . . .	169
110.	Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and educational attainment: 1970 through 2007. . . . .	170
111.	Number of 14- through 21-year-old students served under Individuals with Disabilities Education Act, Part B, who exited school, by exit reason, age, and type of disability: United States and other jurisdictions, 2004–05 and 2005–06 . . . . .	171

**Educational Achievement**

112.	Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001–02 . . . . .	172
113.	Percentage of children demonstrating specific mental skills, physical skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04 . . . . .	173
114.	Children's specific language, literacy, mathematics, color knowledge, and fine motor skills at about 4 years of age, by age of child and selected characteristics: 2005–06 . . . . .	174
115.	Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2004 . . . .	175
116.	Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2004 . . . . .	176
117.	Average reading scale score, by age and selected student and school characteristics: Selected years, 1971 through 2004 . . . . .	177
118.	Average reading scale score, by sex, grade, race/ethnicity, and percentile: Selected years, 1992 through 2007 . . . . .	178
119.	Average reading scale score, by age and amount of time spent on reading and homework: Selected years, 1984 through 2004 . . . . .	179
120.	Percentage of students at or above selected reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2004 . . . . .	180
121.	Average reading scale score and percentage of 4th-graders in public schools attaining reading achievement levels, by race/ethnicity and state or jurisdiction: Selected years, 1992 through 2007 . . . . .	182
122.	Average reading scale score and percentage of 8th-graders in public schools attaining reading achievement levels, by locale and state or jurisdiction: Selected years, 1998 through 2007 . . . . .	184
123.	Average reading scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics: Selected years, 1992 through 2007 . . . . .	186
124.	Average reading scale scores of 4th- and 8th-graders, by selected student and parent characteristics and school type: Various years, 2000 through 2005 . . . . .	187
125.	Average writing scale score and percentage of students attaining writing achievement levels, by selected student characteristics and grade level: 2002 and 2007 . . . . .	188
126.	Percentage of students attaining U.S. history achievement levels, by grade level and selected student characteristics: 2001 and 2006 . . . . .	189
127.	Average U.S. history scale score, by grade level and selected student characteristics, and percentage distribution of 12th-graders, by selected student characteristics: 1994, 2001, and 2006 . . . . .	190
128.	Average civics scale score and percentage of students attaining civics achievement levels, by grade level and selected student characteristics: 1998 and 2006 . . . . .	191
129.	Average economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected student and school characteristics: 2006 . . . . .	192
130.	Percentage of students attaining geography achievement levels, by grade level and selected student characteristics: 2001 . . . . .	193
131.	Average mathematics scale score, by age and selected student and school characteristics: Selected years, 1973 through 2004 . . . . .	194
132.	Percentage of students at or above selected mathematics proficiency levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2004 . . . . .	195
133.	Mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2004 . . . . .	197
134.	Average mathematics scale score, percentage attaining mathematics achievement levels, and selected statistics on mathematics education of 4th-graders in public schools, by state or jurisdiction: Selected years, 1992 through 2007 . . . . .	198

135.	Average mathematics scale score and percentage attaining mathematics achievement levels of 8th-graders in public schools, by level of parental education and state or jurisdiction: Selected years, 1990 through 2007 . . . . .	199
136.	Average mathematics scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics: Selected years, 1990 through 2007 . . . . .	201
137.	Average mathematics scale score of 8th-graders and percentage reporting various attitudes toward mathematics work, by frequency of attitude and selected student and school characteristics: 2007 . . . . .	202
138.	Average science scale scores and percentage of 4th-, 8th-, and 12th-graders attaining science achievement levels, by selected student characteristics and percentile: 1996, 2000, and 2005 . .	203
139.	Average science scale score for 8th-graders in public schools, by selected student characteristics and state or jurisdiction: 1996, 2000, and 2005 . . . . .	204
140.	Average science scale score of 12th-graders and percentage reporting various attitudes toward science, by selected student and school characteristics: 2005 . . . . .	206
141.	SAT mean scores of college-bound seniors, by race/ethnicity: Selected years, 1986–87 through 2007–08 . . . . .	207
142.	SAT mean scores of college-bound seniors, by sex: 1966–67 through 2007–08 . . . . .	208
143.	SAT mean scores of college-bound seniors, by selected student characteristics: Selected years, 1995–96 through 2007–08 . . . . .	209
144.	SAT mean scores of college-bound seniors and percentage of graduates taking SAT, by state or jurisdiction: Selected years, 1987–88 through 2007–08 . . . . .	211
145.	ACT score averages and standard deviations, by sex and race/ethnicity, and percentage of ACT test takers, by selected composite score ranges and planned fields of study: Selected years, 1995 through 2008 . . . . .	212
146.	Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 1996, 1999, and 2003 . . . . .	213

### ***Coursetaking***

147.	Average number of Carnegie units earned by public high school graduates in various subject fields, by selected student characteristics: Selected years, 1982 through 2005 . . . . .	214
148.	Average number of Carnegie units earned by public high school graduates in career/technical education courses, by selected student characteristics: Selected years, 1982 through 2005 . . .	217
149.	Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2005 . . . . .	220
150.	Percentage distribution of public and private high school graduates, by highest level of mathematics and science course completed and selected student characteristics: 2003–04 . . .	221
151.	Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2005	222
152.	Public high schools that offered and students enrolled in dual credit, Advanced Placement, and International Baccalaureate courses, by school characteristics: 2003 . . . . .	223

### ***Student Activities and Behavior***

153.	Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004 . . . . .	224
154.	Percentage of high school sophomores who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1990 and 2002 . . . . .	225
155.	Percentage distribution of 4th-graders, by time spent on homework and television viewing each day and selected student and school characteristics: Selected years, 1992 through 2000 . . . . .	226
156.	Percentage of elementary and secondary school students who do homework outside of school, whose parents check that homework is done, and whose parents help with homework, by frequency and selected student and school characteristics: 2003 and 2007 . . . . .	227

157.	Tenth-graders' attendance patterns, by selected student and school characteristics: 1990 and 2002 . . . . .	229
158.	Percentage of public schools reporting crime incidents, and number and rate of incidents, by school characteristics and type of incident: 1999–2000 and 2005–06 . . . . .	230
159.	Percentage of schools with various security measures, by school control and selected characteristics: 2003–04 . . . . .	234
160.	Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006 . . . . .	235
161.	Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006 . . . . .	237
162.	Percentage of students in grades 9 through 12 who reported experience with drugs and violence on school property, by race/ethnicity, grade, and sex: Selected years, 1997 through 2007 . . . . .	238
163.	Percentage of 12- to 17-year-olds reporting substance abuse during the past 30 days and the past year, by drug used, sex, and race/ethnicity: Selected years, 1982 through 2006 . . . . .	239
164.	Percentage of high school seniors reporting drug use, by type of drug and reporting period: Selected years, 1975 through 2007 . . . . .	240

### ***State Regulations***

165.	Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 1997 through 2008 . . . . .	241
166.	Minimum length of school year and policy on textbook selection, by state: 2000, 2004, and 2006 . . . . .	242
167.	State requirements for a standard high school diploma: 2006 . . . . .	243
168.	States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006–07 . . . . .	244
169.	States using minimum-competency testing, by grade levels assessed, expected uses of standards, and state or jurisdiction: 2001–02 . . . . .	245
170.	States requiring testing for initial certification of elementary and secondary teachers, by skills or knowledge assessment and state: 2007 and 2008 . . . . .	246

### ***Revenues and Expenditures***

171.	Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919–20 through 2005–06 . . . . .	247
172.	Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2005–06 . . . . .	248
173.	Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2004–05 . . . . .	249
174.	Summary of expenditures for public elementary and secondary education, by purpose: Selected years, 1919–20 through 2005–06 . . . . .	250
175.	Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2005–06 . . . . .	251
176.	Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2005–06 . . . . .	252
177.	Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2005–06 . . . . .	254
178.	Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2004–05 . . . . .	256
179.	Total expenditures for public elementary and secondary education, by function and subfunction: Selected years, 1990–91 through 2005–06 . . . . .	258
180.	Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2004–05 and 2005–06 . . . . .	260
181.	Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919–20 through 2005–06 . . . . .	261

182.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2005–06 . . . . .	262
183.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2004–05 . . . . .	263
184.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2005–06 . . . . .	264
185.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1959–60 through 2005–06 . . . . .	266

### Chapter 3. Postsecondary Education

#### Enrollment

186.	Enrollment, staff, and degrees conferred in postsecondary institutions participating in Title IV programs, by type and control of institution, sex of student, type of staff, and type of degree: Fall 2005, fall 2006, and 2006–07. . . . .	276
187.	Historical summary of faculty, students, degrees, and finances in degree-granting institutions: Selected years, 1869–70 through 2006–07 . . . . .	277
188.	Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2007 . . . . .	278
189.	Total fall enrollment in degree-granting institutions, by control and type of institution: 1963 through 2007 . . . . .	279
190.	Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2017 . . . . .	280
191.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, age, and attendance status of student: 2007. . . . .	281
192.	Total fall enrollment in degree-granting institutions, by control and type of institution, age, and attendance status of student: 2007 . . . . .	282
193.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2007 . . . . .	283
194.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2006 . . . . .	284
195.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2005 . . . . .	285
196.	Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: Selected years, 1970 through 2006 . . . . .	286
197.	Fall enrollment and number of degree-granting institutions, by control and affiliation of institution: Selected years, 1980 through 2006 . . . . .	287
198.	Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: 1955 through 2007 . . . . .	289
199.	Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex, control of institution, and state or jurisdiction: Selected years, 2000 through 2006 . . . . .	290
200.	Recent high school completers and their enrollment in college, by sex: 1960 through 2007. . . . .	291
201.	Recent high school completers and their enrollment in college, by race/ethnicity: 1960 through 2007 . . . . .	292
202.	Graduation rates of previous year's 12th-graders and college attendance rates of those who graduated, by selected high school characteristics: 1999–2000 and 2003–04 . . . . .	294
203.	Estimated rate of 2005–06 high school graduates attending degree-granting institutions, by state: 2006 . . . . .	295
204.	Enrollment rates of 18- to 24-year-olds in degree-granting institutions, by type of institution and sex and race/ethnicity of student: 1967 through 2007 . . . . .	296

205.	Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2007 . . . . .	297
206.	Total graduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 through 2007 . . . . .	298
207.	Total first-professional fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 through 2007 . . . . .	299
208.	Total fall enrollment in degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2006 . . . . .	300
209.	Total fall enrollment in public degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2006 . . . . .	301
210.	Total fall enrollment in private degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2006 . . . . .	302
211.	Total fall enrollment in all degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006 . . . . .	303
212.	Total fall enrollment in public degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006 . . . . .	304
213.	Total fall enrollment in private degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006 . . . . .	305
214.	Total fall enrollment in private not-for-profit degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006 . . . . .	306
215.	Total fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2005 and 2006 . . . . .	307
216.	Total fall enrollment in degree-granting institutions, by level of enrollment and state or jurisdiction: 2004, 2005, and 2006 . . . . .	308
217.	Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2006 . . . . .	309
218.	Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2005 . . . . .	310
219.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution: 1967 through 2007 . . . . .	311
220.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2000, 2005, and 2006 . . . . .	312
221.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and state or jurisdiction: Selected years, 1980 through 2006 . . . . .	313
222.	Total full-year enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2005–06 and 2006–07 . . . . .	314
223.	Residence and migration of all freshmen students in degree-granting institutions, by state or jurisdiction: Fall 2006 . . . . .	315
224.	Residence and migration of all freshmen students in degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2006 . . . . .	316
225.	Residence and migration of all freshmen students in 4-year degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2006 . . . . .	317
226.	Total fall enrollment in degree-granting institutions, by race/ethnicity, sex, attendance status, and level of student: Selected years, 1976 through 2007 . . . . .	318
227.	Total fall enrollment in degree-granting institutions, by race/ethnicity of student and type and control of institution: Selected years, 1976 through 2007 . . . . .	321
228.	Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2007 . . . . .	323
229.	Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2006 . . . . .	325
230.	Total number of degree-granting institutions and fall enrollment in these institutions, by type and control of institution and percentage of minority enrollment: 2007 . . . . .	327

231.	Number and percentage of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2003–04 .....	329
232.	Enrollment in postsecondary education, by student level, type of institution, age, and major field of study: 2003–04 .....	330
233.	Graduate enrollment in science and engineering programs in degree-granting institutions, by discipline division: Fall 1994 through fall 2006 .....	332
234.	Number of degree-granting institutions and enrollment in these institutions, by size, type, and control of institution: Fall 2006 .....	333
235.	Selected statistics for degree-granting institutions enrolling more than 15,000 students in 2006: Selected years, 1990 through 2007 .....	334
236.	Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2006 .....	344
237.	Enrollment and degrees conferred in degree-granting women's colleges, by selected characteristics and institution: Fall 2006 and 2006–07 .....	345
238.	Enrollment and degrees conferred in degree-granting institutions that serve large proportions of undergraduate Hispanic students, by selected characteristics and institution: Fall 2006 and 2006–07 .....	346
239.	Enrollment and degrees conferred in degree-granting tribally controlled institutions, by institution: Fall 2000 through fall 2006, and 2005–06 and 2006–07 .....	353
240.	Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2005, 2005–06, 2006, and 2006–07 .....	354
241.	Selected statistics on degree-granting historically Black colleges and universities, by control and type of institution: Selected years, 1990 through 2007 .....	356
242.	Fall enrollment in degree-granting historically Black colleges and universities, by type and control of institution: 1976 through 2006 .....	357

### **Staff**

243.	Employees in degree-granting institutions, by sex, employment status, control and type of institution, and primary occupation: Selected years, fall 1987 through fall 2007 .....	358
244.	Total and full-time-equivalent staff in degree-granting institutions, by employment status, control of institution, and occupation: Fall 1976, fall 1997, and fall 2007 .....	359
245.	Employees in degree-granting institutions, by employment status, sex, control and type of institution, and primary occupation: Fall 2007 .....	360
246.	Employees in degree-granting institutions, by race/ethnicity, sex, employment status, control and type of institution, and primary occupation: Fall 2007 .....	362
247.	Number of full-time-equivalent (FTE) staff and faculty, and FTE staff and faculty/FTE student ratios in degree-granting institutions, by control and type of institution and state or jurisdiction: Fall 2005 .....	363
248.	Number of instructional faculty in degree-granting institutions, by employment status and control and type of institution: Selected years, fall 1970 through fall 2005 .....	365
249.	Full-time instructional faculty in degree-granting institutions, by race/ethnicity, sex, and academic rank: Fall 2003, fall 2005, and fall 2007 .....	366
250.	Percentage distribution of full-time faculty and instructional staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 .....	367
251.	Percentage distribution of part-time faculty and instructional staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 .....	369
252.	Full-time and part-time faculty and instructional staff in degree-granting institutions, by type and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003 .....	371
253.	Full-time and part-time faculty and instructional staff in degree-granting institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003 .....	373
254.	Full-time and part-time faculty and instructional staff in degree-granting institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003 .....	375

255.	Full-time and part-time faculty and instructional staff in degree-granting institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003 . . . . .	377
256.	Average base salary of full-time faculty and instructional staff in degree-granting institutions, by type and control of institution and field of instruction: Selected years, 1987–88 through 2003–04 . . . . .	379
257.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by academic rank, control and type of institution, and sex: Selected years, 1970–71 through 2007–08 . . . . .	380
258.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by sex, academic rank, and control and type of institution: Selected years, 1999–2000 through 2007–08 . . . . .	383
259.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by control and type of institution and state or jurisdiction: 2006–07 . . . . .	384
260.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by control and type of institution and state or jurisdiction: 2005–06 . . . . .	385
261.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2006–07 . . . . .	386
262.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2005–06 . . . . .	387
263.	Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting institutions, by type of benefit and control of institution: Selected years, 1977–78 through 2006–07 . . . . .	388
264.	Percentage of full-time instructional staff with tenure for degree-granting institutions with a tenure system, by academic rank, sex, and control and type of institution: Selected years, 1993–94 through 2005–06 . . . . .	390

### ***Institutions***

265.	Degree-granting institutions, by control and type of institution: Selected years, 1949–50 through 2007–08 . . . . .	391
266.	Degree-granting institutions and branches, by type and control of institution and state or jurisdiction: 2007–08 . . . . .	392
267.	Degree-granting institutions that have closed their doors, by control and type of institution: 1969–70 through 2007–08 . . . . .	394

### ***Degrees***

268.	Degrees conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1869–70 through 2017–18 . . . . .	395
269.	Associate's degrees conferred by degree-granting institutions, by discipline division: 1995–96 through 2006–07 . . . . .	396
270.	Associate's degrees and other subbaccalaureate awards conferred by degree-granting institutions, by length of curriculum, sex of student, and discipline division: 2006–07 . . . . .	397
271.	Bachelor's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2006–07 . . . . .	398
272.	Master's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2006–07 . . . . .	399
273.	Doctor's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2006–07 . . . . .	400
274.	Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by field of study and year: Selected years, 1970–71 through 2006–07 . . . . .	401
275.	Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by sex of student and discipline division: 2006–07 . . . . .	402
276.	Degrees conferred by degree-granting institutions, by control of institution and level of degree: 1969–70 through 2006–07 . . . . .	417

277.	Degrees conferred by degree-granting institutions, by control of institution, level of degree, and field of study: 2006–07 . . . . .	418
278.	Number of degree-granting institutions conferring degrees, by control, level of degree, and field of study: 2006–07 . . . . .	419
279.	Number of institutions and first-professional degrees conferred by degree-granting institutions in dentistry, medicine, and law, by sex of student: Selected years, 1949–50 through 2006–07 . . . .	420
280.	First-professional degrees conferred by degree-granting institutions, by sex of student, control of institution, and field of study: Selected years, 1985–86 through 2006–07 . . . . .	421
281.	Associate's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07 . . . . .	422
282.	Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 . . . . .	423
283.	Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06 . . . . .	424
284.	Bachelor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07 . . . . .	425
285.	Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 . . . . .	426
286.	Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06 . . . . .	427
287.	Master's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07 . . . . .	428
288.	Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 . . . . .	429
289.	Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06 . . . . .	430
290.	Doctor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07 . . . . .	431
291.	Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 . . . . .	432
292.	Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06 . . . . .	433
293.	First-professional degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07 . . . . .	434
294.	First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 . . . . .	435
295.	First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06 . . . . .	435
296.	Degrees in agriculture and natural resources conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07 . . . . .	436
297.	Degrees in architecture and related services conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07 . . . . .	437
298.	Degrees in the biological and biomedical sciences conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1951–52 through 2006–07 . . . . .	438
299.	Degrees in biology, microbiology, and zoology conferred by degree-granting institutions, by level of degree: 1970–71 through 2006–07 . . . . .	439
300.	Degrees in business conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1955–56 through 2006–07 . . . . .	440
301.	Degrees in communication, journalism, and related programs and in communications technologies conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07 . . . . .	441

302.	Degrees in computer and information sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07 . . . . .	442
303.	Degrees in education conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07 . . . . .	443
304.	Degrees in engineering and engineering technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07 . . . . .	444
305.	Degrees in chemical, civil, electrical, and mechanical engineering conferred by degree-granting institutions, by level of degree: 1970–71 through 2006–07 . . . . .	445
306.	Degrees in English language and literature/letters conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07 . . . . .	446
307.	Degrees in modern foreign languages and literatures conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07 . . . . .	447
308.	Degrees in French, German, Italian, and Spanish conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2006–07 . . . . .	448
309.	Degrees in Arabic, Chinese, Korean, and Russian conferred by degree-granting institutions, by level of degree: 1969–70 through 2006–07 . . . . .	449
310.	Degrees in the health professions and related sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07 . . . . .	450
311.	Degrees in mathematics and statistics conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07 . . . . .	451
312.	Degrees in the physical sciences and science technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1959–60 through 2006–07 . . . . .	452
313.	Degrees in chemistry, geology and earth science, and physics conferred by degree-granting institutions, by level of degree: 1970–71 through 2006–07 . . . . .	453
314.	Degrees in psychology conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07 . . . . .	454
315.	Degrees in public administration and social services conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07 . . . . .	455
316.	Degrees in the social sciences and history conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07 . . . . .	456
317.	Degrees in economics, history, political science and government, and sociology conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2006–07 . . . . .	457
318.	Degrees in visual and performing arts conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07 . . . . .	458
319.	Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2004–05 and 2005–06 . . . . .	459
320.	Degrees conferred by degree-granting institutions, by control, level of degree, and state or jurisdiction: 2006–07 . . . . .	460
321.	Bachelor's and master's degrees conferred by degree-granting institutions, by field of study and state or jurisdiction: 2006–07 . . . . .	461
322.	Degrees conferred by degree-granting institutions, by level of degree and state or jurisdiction: 2005–06 and 2006–07 . . . . .	463
323.	Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees: 1997–98 through 2006–07 . . . . .	464

### **Outcomes**

324.	Percentage distribution of 1990 high school sophomores, by highest level of education completed through 2000 and selected student characteristics: 2000 . . . . .	465
325.	Mean number of semester credits completed by bachelor's degree recipients, by course area and major: 1976, 1984, and 1992–93 . . . . .	466

326.	Number and percentage of degree-granting institutions with first-year undergraduates using various selection criteria for admission, by type and control of institution: Selected years, 2000–01 through 2007–08 . . . . .	467
327.	Number of applications, admissions, and enrollees; their distribution across institutions accepting various percentages of applications; and SAT and ACT scores of applicants, by type and control of institution: 2007–08 . . . . .	468
328.	Percentage of degree-granting institutions offering remedial services, by type and control of institution: 1989–90 through 2007–08 . . . . .	469
329.	Percentage distribution of enrollment and completion status of first-time postsecondary students starting during the 1995–96 academic year, by type of institution and other student characteristics: 2001 . . . . .	470
330.	Average scores on Graduate Record Examination (GRE) general and subject tests: 1965 through 2007 . . . . .	472

### ***Student Charges and Student Financial Assistance***

331.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution: 1964–65 through 2007–08 . . . .	474
332.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution and state or jurisdiction: 2006–07 and 2007–08 . . . . .	477
333.	Undergraduate tuition and fees and room and board rates for full-time students in degree-granting institutions, by percentile of charges and control and type of institution: 2000–01 through 2007–08 . . . . .	478
334.	Average graduate and first-professional tuition and required fees in degree-granting institutions, by first-professional field of study and control of institution: 1987–88 through 2007–08 . . . . .	479
335.	Percentage of undergraduates receiving aid, by type and source of aid and selected student characteristics: 2003–04 . . . . .	480
336.	Full-time, first-time degree/certificate seeking undergraduate students enrolled in degree-granting institutions, by participation and average amount awarded in financial aid programs, and type and control of institution: 2000–01 through 2005–06 . . . . .	481
337.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2003–04 . . . . .	482
338.	Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2003–04 . . . . .	483
339.	Amount borrowed, aid status, and sources of aid for full-time and part-time undergraduates, by control and type of institution: 2003–04 . . . . .	484
340.	Percentage of full-time, full-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . .	485
341.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . .	486
342.	Percentage of part-time or part-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . .	488
343.	Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and type of institution: 2003–04 . . . . .	489
344.	Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . .	490
345.	Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . .	491
346.	Percentage of full-time, full-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . .	492
347.	Percentage of part-time or part-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2003–04 . . . . .	493

**Revenue**

348.	Current-fund revenue of degree-granting institutions, by source of funds: Selected years, 1919–20 through 1995–96 . . . . .	494
349.	Current-fund revenue of public degree-granting institutions, by source of funds: Selected years, 1980–81 through 2000–01 . . . . .	495
350.	Revenues of public degree-granting institutions, by source of revenue and type of institution: 2003–04, 2004–05, and 2005–06 . . . . .	496
351.	Revenues of public degree-granting institutions, by source of revenue and state or jurisdiction: 2005–06 . . . . .	498
352.	Appropriations from state and local governments for public degree-granting institutions, by state or jurisdiction: Selected years, 1990–91 through 2005–06 . . . . .	499
353.	Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 1997–98 through 2005–06 . . . . .	500
354.	Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 2005–06 . . . . .	502
355.	Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 1999–2000 through 2005–06 . . . . .	503
356.	Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 2004–05 and 2005–06 . . . . .	504
357.	Current-fund revenue received from the federal government by the 120 degree-granting institutions receiving the largest amounts, by control and rank order: 2005–06 . . . . .	505
358.	Voluntary support for degree-granting institutions, by source and purpose of support: Selected years, 1959–60 through 2006–07 . . . . .	506
359.	Endowment funds of the 120 colleges and universities with the largest endowments, by rank order: 2006 and 2007 . . . . .	507

**Expenditures**

360.	Current-fund expenditures and current-fund expenditures per full-time-equivalent student in degree-granting institutions, by type and control of institution: Selected years, 1970–71 through 2000–01 . . . . .	508
361.	Current-fund expenditures and educational and general expenditures of institutions of higher education, by purpose and per student: Selected years, 1929–30 through 1995–96 . . . . .	509
362.	Expenditures of public degree-granting institutions, by purpose of expenditure and type of institution: 2003–04, 2004–05, and 2005–06 . . . . .	510
363.	Expenditures of public degree-granting institutions, by type of institution, purpose of expenditure, and state or jurisdiction: 2003–04, 2004–05, and 2005–06 . . . . .	512
364.	Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 1996–97 through 2005–06 . . . . .	513
365.	Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 2005–06 . . . . .	515
366.	Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 1998–99 through 2005–06 . . . . .	516
367.	Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 2004–05 and 2005–06 . . . . .	518
368.	Total expenditures of private not-for-profit and for-profit degree-granting institutions, by level and state or jurisdiction: 1998–99 through 2005–06 . . . . .	519

**Adult Education**

369.	Participants in adult basic and secondary education programs, by type of program and state or jurisdiction: Selected fiscal years, 1990 through 2005 . . . . .	520
370.	Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: Various years, 1995 through 2005 . . . . .	521
371.	Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005 . . . . .	524

**Vocational Education**

372.	Number of non-degree-granting Title IV institutions offering postsecondary education, by control and state or jurisdiction: Selected years, 2000–01 through 2007–08 . . . . .	526
------	---	-----

**Chapter 4. Federal Programs for Education and Related Activities**

373.	Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2008 . . . . .	537
374.	Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2007 . . . .	539
375.	Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2008 . . . . .	540
376.	Estimated federal support for education, by type of ultimate recipient and agency: Fiscal year 2007	547
377.	U.S. Department of Education outlays, by type of recipient and level of education: Selected fiscal years, 1980 through 2008 . . . . .	548
378.	U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2007 . . . . .	549
379.	Appropriations for Title I, No Child Left Behind Act of 2001, by program and state or jurisdiction: Fiscal years 2007 and 2008 . . . . .	550
380.	Federal obligations for research, development, and R&D plant, by performers, fields of science, and category of obligation: Fiscal years 1999 through 2007 . . . . .	551

**Chapter 5. Outcomes of Education****Educational Characteristics of the Workforce**

381.	Labor force participation rates and employment to population ratios of persons 16 to 64 years old, by highest level of education, age, sex, and race/ethnicity: 2007 . . . . .	557
382.	Unemployment rate of persons 16 years old and over, by age, sex, race/ethnicity, and educational attainment: 2005, 2006, and 2007 . . . . .	558
383.	Occupation of employed persons 25 years old and over, by educational attainment and sex: 2007	559
384.	Median annual income of year-round, full-time workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2007 . . . . .	560
385.	Distribution of earnings and median earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2007 . . . . .	563
386.	Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003 . . . . .	565
387.	Percentage of 12th-graders working different numbers of hours per week, by selected student characteristics and school locale type: 1992 and 2004 . . . . .	566

**Recent High School and College Graduates**

388.	College enrollment and labor force status of 2005, 2006, and 2007 high school completers, by sex and race/ethnicity: 2005, 2006, and 2007 . . . . .	567
389.	Labor force status of high school dropouts, by sex and race/ethnicity: Selected years, 1980 through 2007 . . . . .	569
390.	Current postsecondary education and employment status, wages earned, and living arrangements of special education students out of secondary school up to 4 years, by type of disability: 2005 . . . . .	570
391.	Full-time employment status of bachelor's degree recipients 1 year after graduation, by field of study: Selected years, 1976 through 2001. . . . .	570
392.	Percentage distribution of 1999–2000 bachelor's degree recipients 1 year after graduation, by field of study, time to completion, enrollment status, employment status, occupational area, job characteristics, and annual salaries: 2001 . . . . .	571
393.	Enrollment in postbaccalaureate certificate or advanced degree programs and highest degree attained by 1992–93 bachelor's degree recipients, by education characteristics: 2003. . . . .	572
394.	Average annual salary of bachelor's degree recipients employed full time 1 year after graduation, by field of study: Selected years, 1976 through 2001 . . . . .	573
395.	Percentage of 18- to 25-year-olds reporting substance abuse during the past 30 days and the past year, by drug used: Selected years, 1982 through 2006 . . . . .	574
396.	Percentage of 18- to 25-year-olds reporting substance abuse during the past 30 days and the past year, by drug used and selected characteristics: 2000 and 2006 . . . . .	575
397.	Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were “very important,” by sex: Selected years, 1972 through 2004 . . . . .	576

**Chapter 6. International Comparisons of Education****Population, Enrollment, and Teachers**

398.	Selected population and finance statistics, school enrollment, and teachers, by major areas of the world: Selected years, 1980 through 2005 . . . . .	581
399.	Selected population and enrollment statistics for countries with populations over 10 million, by continent: Selected years, 1990 through 2006. . . . .	582
400.	School-age populations as a percentage of total population, by age group and country: Selected years, 1985 through 2005 . . . . .	584
401.	Percentage of population enrolled in secondary and postsecondary education, by age group and country: Selected years, 1985 through 2005 . . . . .	585
402.	Pupils per teacher in public and private elementary and secondary schools, by level of education and country: Selected years, 1985 through 2006 . . . . .	586

**Achievement, Instruction, and Student Activities**

403.	Average mathematics literacy, reading literacy, and science literacy scores of 15-year-olds, by sex and country: 2006 . . . . .	587
404.	Mean scores and percentage distribution of 15-year-olds scoring at each mathematics literacy proficiency level, by country: 2006 . . . . .	588
405.	Mean scores and percentage distribution of 15-year-olds scoring at each scientific literacy proficiency level, by country: 2006 . . . . .	589
406.	Average fourth-grade mathematics scores, by content areas, index of time students spend doing mathematics homework in a normal school week, and country: 2003. . . . .	590
407.	Average eighth-grade mathematics scores, by content areas, index of time students spend doing mathematics homework in a normal school week, and country: 2003. . . . .	591
408.	Percentage of lesson time spent on various mathematics activities, yearly mathematics instructional time, and mathematics instructional time as a percentage of total instructional time in eighth grade, by country: 2003 . . . . .	593

409.	Average size and scores of eighth-grade mathematics classes and Index of Teachers' Emphasis on Mathematics Homework (EMH), by country: 2003 . . . . .	595
410.	Eighth-grade students' perceptions about mathematics and hours spent on leisure activities, by country: 2003 . . . . .	597
411.	Average mathematics scores at the end of secondary school, by sex, average time spent studying mathematics out of school, and country: 1995 . . . . .	598
412.	Average fourth-grade science scores in content areas and average time spent teaching science in school, by country: 2003 . . . . .	599
413.	Average eighth-grade science scores in content areas and average time spent studying out of school, by country: 2003 . . . . .	600
414.	Instructional practices and time spent teaching science in eighth grade, by country: 2003 . . . . .	602

### ***Postsecondary Degrees***

415.	Number of bachelor's degree recipients per 100 persons of the typical age of graduation, by sex and country: 2002 through 2005 . . . . .	604
416.	Percentage of bachelor's degrees awarded in mathematics and science, by field and country: Selected years, 1985 through 2005 . . . . .	605
417.	Percentage of graduate degrees awarded in mathematics and science, by field and country: Selected years, 1985 through 2005 . . . . .	606

### ***Finances***

418.	Public and private education expenditures per student, by level of education and country: Selected years, 2000 through 2005 . . . . .	607
419.	Total public direct expenditures on education as a percentage of the gross domestic product, by level and country: Selected years, 1985 through 2005 . . . . .	608

### ***Foreign Students in the United States***

420.	Foreign students enrolled in institutions of higher education in the United States and other jurisdictions, by continent, region, and selected countries of origin: Selected years, 1980–81 through 2006–07 . . . . .	609
------	---	-----

## **Chapter 7. Libraries and Educational Technology**

### ***Libraries***

421.	Selected statistics on school libraries/media centers, by control and level of school: 1999–2000 and 2003–04 . . . . .	613
422.	Selected statistics on public school libraries/media centers, by level and enrollment size of school: 2003–04 . . . . .	614
423.	Selected statistics on public school libraries/media centers, by state: 2003–04 . . . . .	615
424.	Collections, staff, and operating expenditures of degree-granting institution libraries: Selected years, 1976–77 through 2005–06 . . . . .	616
425.	Collections, staff, and operating expenditures of the 60 largest college and university libraries: 2005–06 . . . . .	617
426.	Public libraries, books and serial volumes, library visits, circulation, and reference transactions, by state: Fiscal year 2005 . . . . .	618

### ***Computers and Technology***

427.	Public schools and instructional rooms with internet access, by selected school characteristics: Selected years, 1994 through 2005 . . . . .	619
428.	Use of the Internet by persons 3 years old and over, by type of use and selected characteristics of students and other users: 2003 . . . . .	621

429.	Number and percentage of home computer users, by type of application and selected characteristics: 1997 and 2003 .....	623
430.	Number and percentage of student home computer users, by type of application and selected characteristics: 2003 .....	624
431.	Student use of computers, by level of enrollment, age, and student and school characteristics: 1993, 1997, and 2003 .....	625
432.	Percentage of workers, 18 years old and over, using computers on the job, by type of computer application and selected characteristics: 1993, 1997, and 2003 .....	627

## **Appendix A. Guide to Sources**

A-5.	Sampling errors (95 percent confidence level) for the difference in two percentages estimated from the Gallup Poll: 1992, 1993, and 1996 through 2008 .....	667
A-6.	Maximum differences required for significance (90 percent confidence level) between sample subgroups from the "Status of the American Public School Teacher" survey: 2000–01 .....	667

# INTRODUCTION

In fall 2008, about 74.1 million people were enrolled in American schools and colleges (table 1). About 4.6 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.2 million. All data for 2008 in this Introduction are projected. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

## Elementary/Secondary Education

### Enrollment

A pattern of annual increases in total public elementary and secondary school enrollment began in 1985 (table 3). Between 1985 and 2008, public school enrollment rose 26 percent, from 39.4 million to 49.8 million (table 2). Private school enrollment grew more slowly than public school enrollment during this period, rising 9 percent, from 5.6 million to 6.1 million. As a result, the percentage of elementary and secondary students enrolled in private schools declined from 12.4 percent in 1985 to 10.8 percent in 2008.

In public schools between 1985 and 2008, there was a 29 percent increase in elementary enrollment (prekindergarten through grade 8), compared with a 20 percent increase in secondary enrollment. Part of the relatively fast growth in public elementary school enrollment resulted from the expansion of prekindergarten programs (table 37). Between 1985 and 2006, enrollment in prekindergarten increased 611 percent, while enrollment in other elementary grades increased 23 percent. The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.1 million in 2006, and the number enrolled in kindergarten through grade 8 increased from 26.9 million to 33.1 million. Public secondary school enrollment declined 8 percent from 1985 to 1990, but then started increasing. For most of the period after 1992, secondary enrollment increased more rapidly than elementary enrollment, leading to relatively large secondary enrollment gains in recent years. For example, between 1998 and 2008, public secondary school enrollment rose 13 percent, compared with 5 percent for public elementary school enrollment. Overall, public school enrollment rose 7 percent between 1998 and 2008.

Since the enrollment rates of kindergarten, elementary, and secondary school-age children changed by less than 2

percentage points between 1985 and 2007 (table 7), increases in public and private elementary and secondary school enrollment have been driven primarily by increases in the number of children in these age groups. The enrollment rate of prekindergarten age children (ages 3 and 4) rose between 1985 and 2007, which was reflected by an increase in prekindergarten enrollment.

The National Center for Education Statistics (NCES) forecasts record levels of total elementary and secondary enrollment through at least 2017, reflecting expected increases in the school-age population. For public schools, the projected fall 2008 enrollment is expected to be a new record, and new records are expected every year through 2017, the last year for which NCES enrollment projections have been developed (table 3). Public elementary school enrollment (prekindergarten through grade 8) is projected to increase by 10 percent between 2008 and 2017. Public secondary school enrollment (grades 9 through 12) is expected to increase 5 percent between 2008 and 2017. Overall, total public school enrollment is expected to increase 9 percent between 2008 and 2017.

### Teachers

A projected 3.7 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in fall 2008 (table 4). This number has risen 15 percent since 1998. The 2008 projected number of FTE teachers includes 3.2 million public school teachers and 0.5 million private school teachers.

The number of public school teachers has risen faster than the number of public school students over the past 10 years, resulting in declines in the pupil/teacher ratio (table 64). In the fall of 2008, there were a projected 15.3 public school pupils per teacher, compared with 16.4 public school pupils per teacher 10 years earlier.

The average salary for public school teachers in 2006–07 was \$50,816, about 3 percent higher than in 1996–97, after adjustment for inflation (table 78). The salaries of public school teachers have generally maintained pace with inflation since 1990–91.

### Student Performance

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state

NAEP provide current information about student performance in a variety of subjects, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the *Digest*, while the information in this Introduction includes only results from the national main and state NAEP.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and nonpublic schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

### *Reading*

Reported on a scale of 0 to 500, national average reading scores of 4th- and 8th-graders were higher in 2007 than in 1992, by 4 and 3 points, respectively (table 123). These 2007 scores were also higher than the 2005 scores. The reading score of 12th-graders was 6 points lower in 2005 (the most recent assessment year for grade 12) than in 1992. In the most recent assessment, females at each grade level outscored their male counterparts. For example, 12th-grade females scored 13 points higher than males in 2005. Average scores were higher in 2007 than in 1992 for White, Black, Hispanic, and Asian/Pacific Islander 4th-graders (ranging from 6 to 16 points) and for White, Black, and Hispanic 8th-graders (ranging from 5 to 7 points), while scores were lower in 2005 than in 1992 for White, Black, and Hispanic 12th-graders (ranging from 5 to 7 points).

The 2007 main NAEP reading assessment of states found that the average reading proficiency of public school 4th- and 8th-graders varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 220, with average scores in participating jurisdictions ranging from 197 in the District of Columbia to 236 in Massachusetts (table 121). For 8th-graders in public schools, the U.S. average score was 261, with average scores in participating jurisdictions ranging from 241 in the District of Columbia to 273 in the Department of Defense schools, Massachusetts, and Vermont (table 122).

### *Mathematics*

From 1990 to 2007, average NAEP mathematics scores increased 27 points for 4th-graders and 19 points for 8th-graders (table 136). (NAEP mathematics scores are reported on a scale of 0 to 500.) Increases in scores were seen for both males and females and for most racial/ethnic groups. Both male and female 4th- and 8th-graders scored higher in 2007 than in any of the previous assessments. In 2007, at each grade, males

outscored females by 2 points; these score gaps were not measurably different from the gaps in either 2005 or 1990. At grade 4, average scores in 2007 for White, Black, Hispanic, and Asian/Pacific Islander students were higher than the scores in any of the previous assessments. Although the score for American Indian/Alaska Native 4th-graders increased over time, there was no measurable difference between their 2005 and 2007 scores. At grade 8, average scores in 2007 for White, Black, and Hispanic students were higher than in any of the previous assessments. The average score for 8th-grade Asian/Pacific Islander students was higher in 2007 than in 1990, but not measurably different from their 2005 score. No measurable differences were detected in the scores for American Indian/Alaska Native 8th-graders over the assessment years.

The 2007 main NAEP assessment of states found that the average mathematics proficiency of public school 4th- and 8th-graders varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 239, with average scores in participating jurisdictions ranging from 214 in the District of Columbia to 252 in Massachusetts (table 134). For 8th-graders in public schools, the U.S. average score was 280, with average scores in participating jurisdictions ranging from 248 in the District of Columbia to 298 in Massachusetts (table 135).

### *Science*

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996, using a separate scale of 0 to 300 for each grade. The national average 4th-grade science score increased from 147 in 1996 to 151 in 2005; there was no measurable change in the 8th-grade score; and the 12th-grade score decreased from 150 in 1996 to 147 in 2005 (table 138). Certain subgroups outperformed others in science in 2005. For example, males outperformed females at all three grades. Male 4th-graders had a higher average score in 2005 than in 1996, and both male and female 12th-graders had lower scores in 2005 than in 1996. White students scored higher, on average, than Black and Hispanic students at all three grades in 2005. At grade 4, average scores were higher for White, Black, Hispanic, and Asian/Pacific Islander students in 2005 than in 1996. At grade 8, the average score for Black students was higher in 2005 than in 1996, but the scores did not measurably change for other racial/ethnic groups. At grade 12, there were no measurable changes in average scores for any racial/ethnic group when comparing results from 2005 with those from 1996.

### *International Comparisons*

On the 2003 Trends in International Mathematics and Science Study (TIMSS), the average mathematics score of U.S. 4th-graders exceeded the international average for the 25 participating educational systems (table 406). (Most participating educational systems represent countries; however, some represent subnational entities with separate educational systems.)

U.S. 4th-graders outscored students in 13 educational systems, but were outperformed by students in 11 educational systems. Also on the 2003 TIMSS, U.S. 8th-graders exceeded the international average score for the 45 educational systems participating at the 8th-grade level (table 407). U.S. 8th-graders outscored students in 25 educational systems, and were outperformed by students in 9 educational systems.

On the 2006 Program for International Student Assessment (PISA), the average score of U.S. 15-year-olds in mathematics literacy was 474, which was lower than the Organization for Economic Cooperation and Development (OECD) average of 498 (table 403). (Possible scores on PISA assessments range from 0 to 1,000.) The average mathematics literacy score in the United States was lower than the average score in 23 of the other 29 OECD countries for which comparable PISA results were reported, higher than the average score in 4 of the other OECD countries, and not measurably different from the average score in 2 of the OECD countries. In science literacy, the average score of 15-year-olds in the United States was lower than the average score in 16 of the other 29 OECD countries, higher than the average score in 5 of the other OECD countries, and not measurably different from the average score in 8 of the OECD countries.

## High School Graduates and Dropouts

About 3,328,000 high school students are expected to graduate during the 2008–09 school year (table 104), including 3,011,000 public school graduates and 317,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The number of high school graduates projected for 2008–09 is lower than the record-high projection of 3,346,000 graduates for 2007–08, but exceeds the high point during the baby boom era in 1976–77, when 3,152,000 students earned diplomas. In 2005–06, an estimated 73.4 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 106).

The number of General Educational Development (GED) credentials issued rose from 330,000 in 1977 to 487,000 in 2000 (table 108). A record number of 648,000 GED credentials were issued in 2001. In that year, candidates who had already taken any of the five tests in the GED test battery had to complete the entire battery before the end of the year or else take all five tests over again. The reason is that a new GED test series was introduced in 2002. In the same year, data collection procedures changed, with data from the states on the number of credentials issued being replaced by test data from individual test-takers. In 2006, 464,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.<sup>1</sup>

The percentage of dropouts among 16- to 24-year-olds has shown some decreases over the past 20 years. This percent-

age, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1987 and 2007, the status dropout rate declined from 12.6 percent to 8.7 percent (table 109). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates (8.4 and 21.4 percent, respectively) remained higher than the rate for Whites (5.3 percent) in 2007. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

## Educational Technology

The number of computers in public schools has increased. In 2005, the average public school contained 154 instructional computers, compared with 90 in 1998 (table 427). One important technological advance that has come to classrooms following the introduction of computers has been connections to the Internet. The percentage of instructional rooms with access to the Internet increased from 51 percent in 1998 to 94 percent in 2005 (figure 29). Nearly all schools had access to the Internet in 2005 (table 427).

## Postsecondary Education

### College Enrollment

College enrollment was a projected 18.2 million in fall 2008, higher than in any previous year except 2007 (table 3). College enrollment is expected to continue setting new records throughout the fall 2009 through fall 2017 period. Between fall 2007 and fall 2017, enrollment is expected to increase by 10 percent. Despite decreases in the traditional college-age population during the late 1980s and early 1990s, total enrollment increased during this period (tables 7, 15, 188, and 204). The traditional college-age population (18 to 24 years old) rose 16 percent between 1997 and 2007, which was reflected by an increase of 26 percent in college enrollment. Between 1997 and 2007, the number of full-time students increased by 34 percent compared to a 15 percent increase in part-time students (table 188). During the same time period, the number of males enrolled increased 22 percent, while the number of females enrolled increased 29 percent.

### Faculty

In fall 2007, degree-granting institutions—defined as postsecondary institutions that grant an associate's or higher degree and are eligible for Title IV federal financial aid programs—employed 1.4 million faculty members, including 0.7 million full-time and 0.7 million part-time faculty (table 245). In addition, degree-granting institutions employed 0.3 million graduate assistants.

<sup>1</sup> Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

## Postsecondary Degrees

During the 2008–09 academic year, postsecondary degrees are projected to number 731,000 associate’s degrees; 1,603,000 bachelor’s degrees; 649,000 master’s degrees; 93,300 first-professional degrees; and 61,700 doctor’s degrees (table 268). Between 1996–97 and 2006–07, the number of degrees conferred rose at all levels. The number of associate’s degrees was 27 percent higher in 2006–07 than in 1996–97, the number of bachelor’s degrees was 30 percent higher, the number of master’s degrees was 44 percent higher, the number of first-professional degrees was 14 percent higher, and the number of doctor’s degrees was 32 percent higher.

Between 1996–97 and 2006–07, the number of bachelor’s degrees awarded to males increased 25 percent, while the number awarded to females increased 34 percent. As a result, females earned 57 percent of all bachelor’s degrees in 2006–07, compared with 56 percent in 1996–97. Between 1996–97 and 2006–07, the number of White students earning bachelor’s degrees increased 22 percent, compared with larger increases of 55 percent for Black students, 84 percent for Hispanic students, 53 percent for Asian/Pacific Islander students, and 54 percent for American Indian/Alaska Native students (table 284). In 2006–07, White students earned 72 percent of all bachelor’s degrees awarded (vs. 77 percent in 1996–97), Black students earned 10 percent (vs. 8 percent in 1996–97), Hispanic students earned 8 percent (vs. 5 percent in 1996–97), and Asian/Pacific Islander students earned 7 percent (vs. 6 percent in 1996–97). American Indian/Alaska Native students earned about 1 percent of the degrees in both years.

## Undergraduate Prices

For the 2007–08 academic year, annual prices for undergraduate tuition, room, and board were estimated to be \$11,578 at public institutions and \$29,915 at private institutions (table 331). Between 1997–98 and 2007–08, prices for undergraduate tuition, room, and board at public institutions rose 30 percent, and prices at private institutions rose 23 percent, after adjustment for inflation.

## Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 1998 and 2008, the percentage of the adult population 25 years of age and over who had completed high school rose from 83 percent to 87 percent, and the percentage of adults with a bachelor’s degree increased from 24 percent to 29 percent (table 8). High school completers include those people who graduated from high school with a diploma, as well as those who completed high school through equivalency programs. The percentage of young adults (25- to 29-year-olds) who had completed high school in 2008 was about the same as it was in 1998 (88 percent in both years). The percentage of young adults who had completed a bachelor’s degree increased from 27 percent in 1998 to 31 percent in 2008.

## Education Expenditures

Expenditures for public and private education, from pre-kindergarten through graduate school (excluding postsecondary schools not awarding associate’s or higher degrees), are estimated at \$1,017 billion for 2007–08 (table 25). Expenditures of elementary and secondary schools are expected to total \$631 billion, while those of degree-granting postsecondary institutions are expected to total \$386 billion. Total expenditures for education are expected to amount to 7.4 percent of the gross domestic product in 2007–08, about 0.5 percentage points higher than in 1997–98.

## Interpreting Statistics

Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Standard errors are available for sample survey data appearing in this report. In most cases, standard errors for all items appear in the printed table. In some cases, only standard errors for key items appear in the printed table. Standard errors that do not appear in the tables are available from NCES upon request. Although some of the surveys conducted by NCES are census or universe surveys (which attempt to collect information from all potential respondents), all surveys are subject to design, reporting, and processing errors and errors due to nonresponse. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, data processing, coding, and so forth mean that the results from the different sources may not be strictly comparable. More information on survey methodologies can be found in Appendix A: Guide to Sources.

Estimates presented in the text and figures are rounded from original estimates, not from a series of roundings. Percentages in the text are rounded to whole numbers, while ratios and percentage distributions are normally presented to one decimal place, where applicable.

Unless otherwise noted, all data in this report are for the 50 states and the District of Columbia. Unless otherwise noted, all financial data are in current dollars, meaning not adjusted for changes in the purchasing power of the dollar due to inflation. Price indexes for inflation adjustments can be found in table 31.

Common data elements are collected in different ways in different surveys. Since the *Digest* relies on a number of data sources, there are discrepancies in definitions and data across tables in the volume. For example, several different surveys collect data on public school enrollment, and while similar, the estimates are not identical. The definitions of racial/ethnic groups also differ across surveys, particularly with respect to whether Hispanic origin is considered an ethnic group regardless of race, or counted separately as a racial/ethnic group. Individual tables note the definitions used in the given studies.

All statements cited in the text about differences between two or more groups or changes over time were tested for statistical significance and are statistically significant at the .05 level. Various test procedures were used, depending on the nature of the statement tested. The most commonly used test procedures were *t* tests, equivalence tests, and linear trend tests. Equivalence tests were used to determine whether two statistics are substantively equivalent or substantively different. This was accomplished by using a hypothesis test to determine whether the confidence interval of the difference between

sample estimates is substantively significant (i.e., greater or less than a preset substantively important difference). In most cases involving percentages, a difference of 3.0 was used to determine substantive equivalence or difference. In some comparisons involving only very small percentages, a lower difference was used. In cases involving only relatively large values, a larger difference was used, such as \$1,000 in the case of annual salaries. Linear trend tests were conducted by evaluating the significance of the slope of a simple regression of the data over time, and a *t* test comparing the end points.

# GUIDE TO TABULAR PRESENTATION

This section is intended to assist the reader in following the basic structure of the *Digest* tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 states and the District of Columbia. Changes in survey instruments sometimes mean that data for specific categories are not available in a consistent manner over the entire reporting period. Because of these survey limitations, data for these specific categories may be noted as included with other categories where applicable.

## Table Components

**Title** Describes the table content concisely. (Tables may not include data for all years implied in table titles. When this is the case, the title will include the term “Selected years.”)

**Unit indicator** Informs the reader of the measurement unit in the table—“In thousands,” “In millions of dollars,” etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

**Spanner** Describes a group of two or more columns.

**Column head** Describes a specific column.

**Stub** Describes a row or a group of rows. Each stub row is followed by a number of dots (leaders).

**Field** The area of the table which contains the data elements.

## Example of Table Structure

<b>Table Number and Title</b>		Table 0. Projected number of participants in educational institutions, by level and control of institution: Fall 2006				
<b>Unit Indicator</b>		[In millions]				
<b>Column Heads</b>	Participants	All levels (elementary, secondary, and postsecondary degree-granting)	Elementary and secondary schools			<b>Spanner</b>
			Total	Public	Private	
<b>Column Numbers</b>	1	2	3	4	5	
<b>Stub</b>	Total .....	82.2	62.0	55.0	6.8	<b>Field</b>
	Enrollment .....	72.7	55.1	48.9	6.1	
	Teachers and faculty .....	4.5	3.6	3.2	0.5	
	Other professional, administrative, and support staff .....	5.0	3.2	2.9	0.3 <sup>1</sup>	
<b>Footnote</b>		<sup>1</sup> Reference (numbered) notes refer to specific parts of the table.				
<b>Note</b>		NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.				
<b>Source</b>		SOURCE: U.S. Department of Education, National Center for Education Statistics, <i>Projections of Education Statistics to 2015</i> ; and unpublished projections and estimates. (This table was prepared September 2006.)				

**Special notes** Symbols used to indicate why data do not appear in designated cell.

— Not available.

† Not applicable.

# Rounds to zero.

! Interpret data with caution.

‡ Reporting standards not met.

**Footnote** Describes a unique circumstance relating to a specific item within the table. Following are two typical examples:

**Estimated** Based on available information from a subset of the population of interest.

**Projected** Calculated from a forecasting model based on historical information.

**Note** Furnishes general information that relates to the entire table.

**Source** The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

## Descriptive Terms

**Measures of central tendency** A number that is used to represent the “typical value” of a group of numbers. It is regarded as a measure of “location” or “central tendency” of a group of numbers.

**Arithmetic mean (average)** is the most commonly used average. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the “mean” or “average.”

**Median** is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

**Average per capita**, or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population.

**Index number** A value that provides a means of measuring, summarizing, and communicating the nature of changes that

occur from time to time or from place to place. An index is used to express changes in prices over periods of time, but may also be used to express differences between related subjects at a single point in time.

The *Digest* most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base-year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

$$\frac{\text{Price of a set of one or more items for related year}}{\text{Price of the same set of items for base year}} \times 100$$

When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

**Current and constant dollars** are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

**Current dollar** figures reflect actual prices or costs prevailing during the specified year(s).

**Constant dollar** figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base-year price index (for example, the Consumer Price Index for 1999) by the price index for the year of data to be adjusted and multiplying by the price of item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year—in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

In the 2008 edition of the *Digest*, the following 26 tables include finance data that are adjusted to school year 2006–07 dollars: tables 26, 32, 74, 78, 79, 86, 171, 174, 175, 181, 184, 185, 256, 257, 263, 331, 334, 350, 353, 355, 360, 361, 362, 364, 366, and 424. Data adjusted to calendar year 2007 dollars appear in tables 20, 384, 394, and 418. Table 373 includes adjustments to fiscal year (FY) 2008 dollars.

## CHAPTER 1

# All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American educational system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, population, and opinions about schools. Economic indicators and price indexes have been added to facilitate analyses.

The U.S. system of education can be described as having three levels of formal education (elementary, secondary, and postsecondary) (figure 1). Students ordinarily spend from 6 to 8 years in the elementary grades, which may be preceded by 1 to 3 years in nursery school and kindergarten. The elementary school program is followed by a 4- to 6-year program in secondary school. Students normally complete the entire program through grade 12 by age 18.

High school graduates who decide to continue their education may enter a technical or vocational institution, a 2-year community or junior college, or a 4-year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal vocational programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A technical or vocational institution offers postsecondary technical training leading to a specific career.

An associate's degree requires at least 2 years of college-level coursework, and a bachelor's degree normally requires 4 years of college-level coursework. At least 1 year of coursework beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have

been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

## Enrollment and Attainment

Enrollment in elementary and secondary schools grew rapidly during the 1950s and 1960s, reaching a peak in 1971 (table 3 and figure 2). This enrollment rise was caused by what is known as the "baby boom," a dramatic increase in births following World War II. From 1971 to 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and has continued to reach a new record level in each subsequent year.

School enrollment rates among 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds remained relatively steady between 1985 and 2007 (table 7). Since the enrollment rates of elementary and secondary school-age children changed by less than 2 percentage points between 1985 and 2007, increases in public and private elementary and secondary school enrollment have been driven primarily by increases in the number of children in these age groups. Increases in the enrollment rate of prekindergarten age children (ages 3 and 4) between 1985 and 2007 have also contributed to overall enrollment increases.

Public school enrollment in prekindergarten through grade 8 rose from 29.9 million in fall 1990 to 34.2 million in 2003 (table 3). After a decrease of less than 1 percent between fall 2003 and fall 2004, elementary enrollment increased to a projected total of 34.9 million for fall 2008. Public elementary enrollment is projected to continue this pattern of annual increases through 2017 (the last year for which NCES has projected school enrollment). Public school enrollment in the upper grades rose from 11.3 million in 1990 to 15.1 million in 2006, with a projected enrollment of 14.9 million for 2008. Public secondary enrollment is projected to show a decrease of 3 percent between 2006 and 2011, and then increase again through 2017. Public secondary school enrollment in 2017 is expected to be about 5 per-

cent higher than in 2008. Total public elementary and secondary enrollment is projected to set new records every year from 2008 to 2017.

College enrollment reached 14.5 million in fall 1992 and decreased to 14.3 million in fall 1995 (table 3). Total college enrollment increased 28 percent between 1995 and 2007, and a further increase of 10 percent is expected between fall 2007 and fall 2017. The percentage of 18- and 19-year-olds enrolled in school rose from 61 to 67 percent between 1996 and 2006. About 36 percent of 20- to 24-year-olds were enrolled in school in 2007.

### Enrollment in Private Institutions

The percentage of students in private elementary and secondary schools declined from 11.7 percent in 1995 to 11.0 percent in 2005 (table 3). The percentage of college students who attended private colleges and universities rose from 22.2 to 25.5 percent between 1995 and 2005, and then continued to increase to 26.1 percent in 2007. In 2008, a projected 6.1 million students were enrolled in private schools at the elementary and secondary levels and 4.6 million students were in private (not-for-profit and for-profit) degree-granting institutions.

### Educational Attainment of Adults

The percentages of adults 25 years old and over completing high school and higher education have been rising. In 2008, 87 percent of the population 25 years old and over had completed at least high school and 29 percent had completed a bachelor's or higher degree (table 8 and figure 3). These percentages are higher than in 1998, when 83 percent had completed at least high school and 24 percent had completed

a bachelor's or higher degree. In 2008, about 8 percent of people 25 years old or over held a master's degree as their highest degree, 2 percent held a professional degree (e.g., medicine or law), and 1 percent held a doctor's degree (table 9 and figure 5).

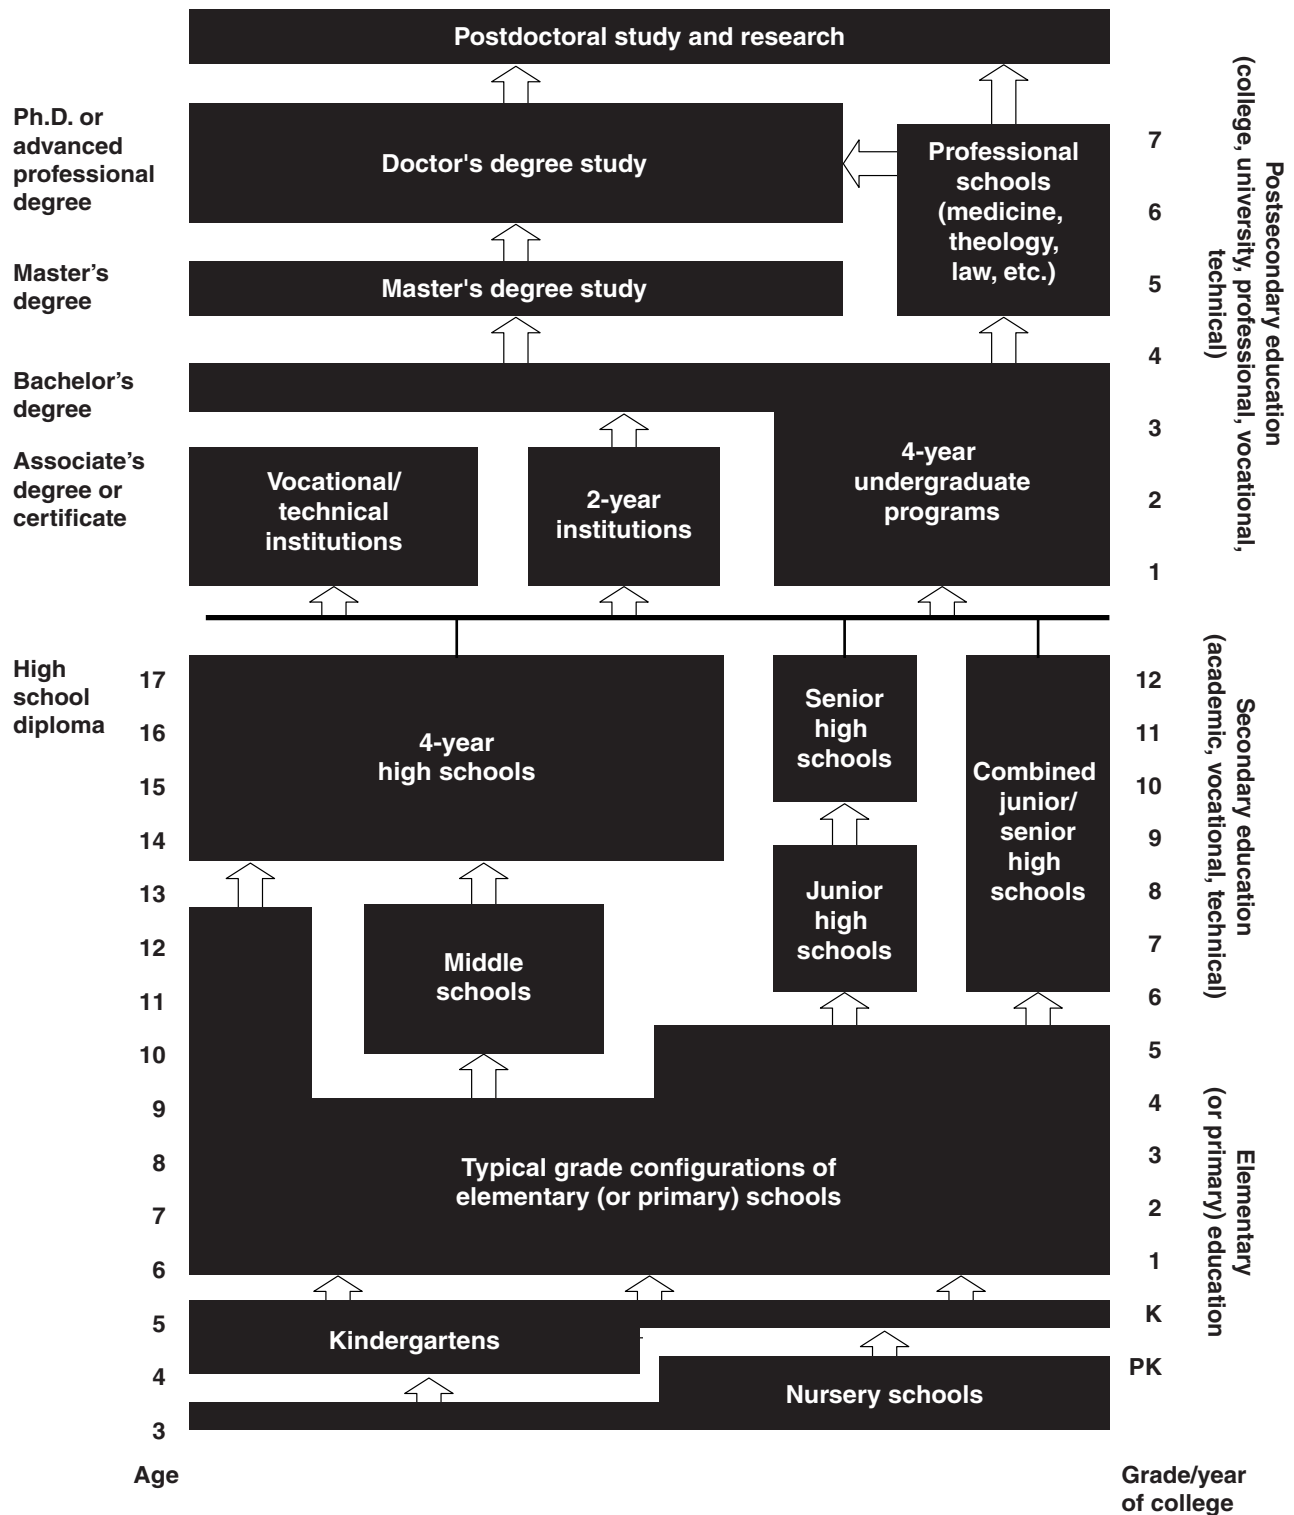

### Teachers and Faculty

An estimated 3.7 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2008 (table 4). This number has risen about 15 percent since 1998. The number of FTE public school teachers in 2008 was about 3.2 million, and the number of FTE private school teachers was about 0.5 million. FTE faculty at postsecondary degree-granting institutions totaled an estimated 0.9 million in 2008, including 0.6 million at public institutions and 0.3 million at private institutions (table 1).

### Expenditures

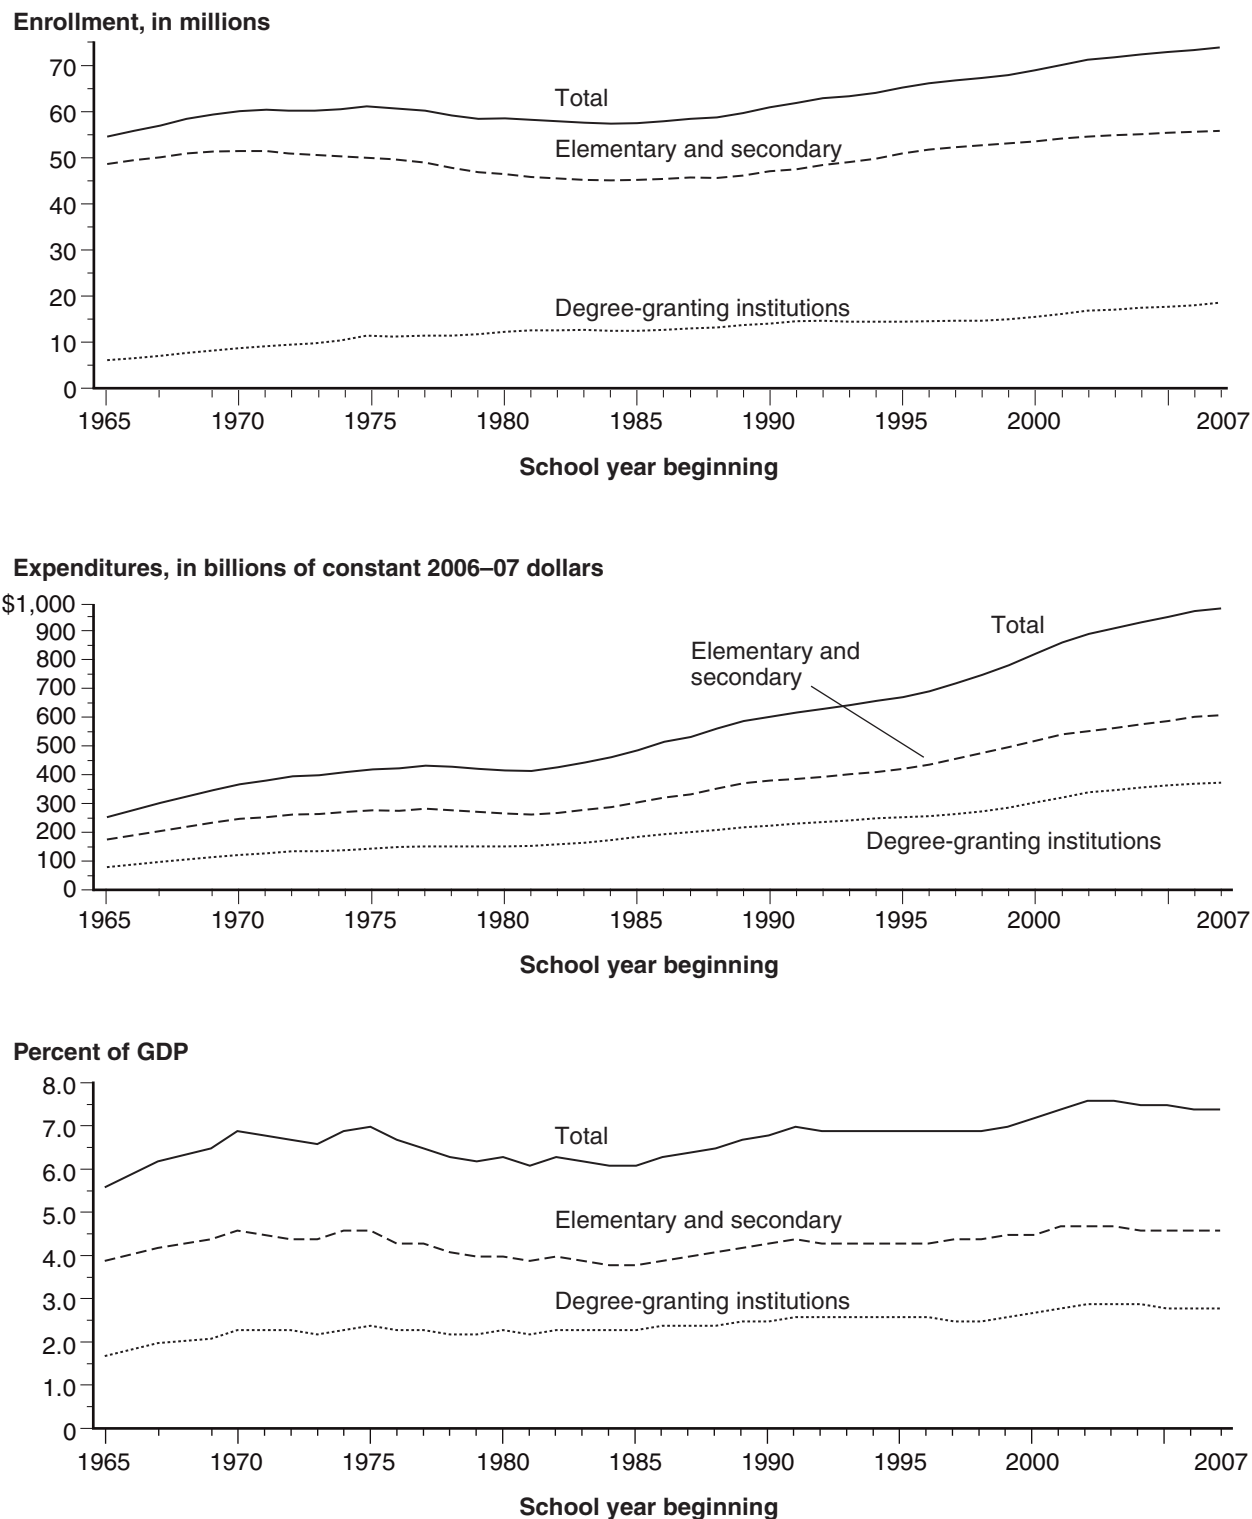

Expenditures of educational institutions rose to an estimated \$1,017 billion for the 2007–08 school year (table 26). Elementary and secondary schools spent about 62 percent of this total, and colleges and universities accounted for the remaining 38 percent. After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 36 percent between 1997–98 and 2007–08. Expenditures of elementary and secondary schools rose by an estimated 33 percent during this period, while total expenditures of colleges and universities rose by 41 percent. In 2007–08, expenditures of educational institutions were an estimated 7.4 percent of the gross domestic product (table 25).

Figure 1. The structure of education in the United States

NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels. <sup>1</sup>Private elementary and secondary education data are projected.

<sup>2</sup>Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.5 million in 2007. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.

<sup>3</sup>Estimated.

<sup>4</sup>Data are actual.

NOTE: Degree-granting enrollment projections are based on the middle alternative projections published by the National Center for Education Statistics. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few

higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Private school enrollment data for fall 1999 are based on improved methodology for apportioning the grade-unclassified students.

—Not available.

<sup>1</sup>Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.

<sup>2</sup>Data for 1869–70 through 1949–50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.

<sup>3</sup>Estimated.

<sup>4</sup>Projected.

<sup>5</sup>Data for elementary and secondary are projected; data for degree-granting institutions are actual.

NOTE: Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes homeschooled children and students in subcollegiate departments of colleges and in federal schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.5 million in 2007. Excludes preprimary pupils in private schools that do not offer kindergarten or above. Postsecondary data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in

Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.

<sup>2</sup>Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.

<sup>3</sup>Estimated.

<sup>4</sup>Inclusion of institutions is not consistent with surveys for 1987 and later years.

<sup>5</sup>Projected.

<sup>6</sup>Data for elementary and secondary are projected; data for degree-granting institutions are actual.

NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions instructional staff.

—Not available.

†Not applicable.

<sup>1</sup>Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.

<sup>2</sup>Data for 1980–81 and 1990–91 include schools with first or higher grades. Data for 1995–96 and later years include schools with kindergarten or higher grades.

<sup>3</sup>Included in other private school categories.

NOTE: Postsecondary data for 1980–81 and 1990–91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few

higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

NOTE: Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Beginning in 1994, preprimary enrollment was collected using new pro-

cedures and may not be comparable to figures for earlier years. Total includes persons from other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.

†Not applicable.

<sup>†</sup>Preprimary enrollment collected using new procedures. Data may not be comparable to figures for earlier years.

NOTE: Data for 1940 are for April. Data for all other years are as of October. Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night.

Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Standard errors appear in parentheses.

#Rounds to zero.

<sup>1</sup>Includes persons of Hispanic ethnicity for years prior to 1980.<sup>2</sup>Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma, as well as those who completed high school through equivalency programs, such as a GED program.<sup>3</sup>Data for years prior to 1993 are for persons with 4 or more years of college.<sup>4</sup>Estimates based on Census Bureau reverse projection of 1940 census data on education by age.

NOTE: Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, U.S. Census of Population, 1960, Volume 1, part 1; 1960 Census Monograph, Education of the American Population, by John K. Folger and Charles B. Nam; and Current Population Reports, Series P-20; various years; and Current Population Survey (CPS), March 1970 through March 2008. (This table was prepared September 2008.)

‡Reporting standards not met.

NOTE: Total includes other racial/ethnic groups not shown separately. Although cells with fewer than 75,000 weighted persons are subject to relatively wide sampling variation, they are included in the table to permit various types of aggregations; see Guide to

Sources or <http://www.census.gov/apss/techdoc/cps/cps-main.html> for information on calculating standard errors. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

<sup>1</sup>Included under Asian.<sup>2</sup>Data on persons of more than one race group were collected beginning in 2000. Direct comparability of the data (other than Hispanic) prior to 2000 with the data for 2000 and later years is limited by the extent to which people reporting more than one race in later years had been reported in specific race groups in earlier years.NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Estimates as of July 1. SOURCE: U.S. Department of Commerce, Census Bureau, Population Estimates, retrieved August 12, 2008, from <http://www.census.gov/popest/national/asrh/2007-nat-res.html>. (This table was prepared August 2008.)

<sup>1</sup>As of April 1.

<sup>2</sup>Estimates as of July 1.

NOTE: Resident population includes civilian population and armed forces personnel residing within the United States and within each state; it excludes armed forces personnel residing overseas. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Race of family is defined as race of head of household. "All races" includes other race/ethnicity categories not separately shown.

<sup>2</sup>Includes Black persons of Hispanic ethnicity.

NOTE: Own children are never-married sons and daughters, including stepchildren and adopted children, of the householder or married couple. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

‡Reporting standards not met.

<sup>1</sup>Adjusted by the Consumer Price Index research series using current methods (CPI-U-RS).

<sup>2</sup>Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption.

<sup>3</sup>Based on 1989 incomes collected in the 1990 census. Data may differ from figures derived from the Current Population Survey.

<sup>4</sup>Based on 1999 incomes collected in the 2000 census. Data may differ from figures derived from the Current Population Survey.

NOTE: Standard errors appear in parentheses. Standard errors in columns 12 and 13 cannot be shown with greater precision due to data source limitations.

‡Not applicable.

§Reporting standards not met.

<sup>1</sup>Included in "Other" in 1999 and 2003 data.<sup>2</sup>Includes all other races or more than one race.

NOTE: Includes children enrolled in kindergarten through grade 12 and ungraded students. Excludes homeschooled children. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own and

their spouse's, or other household adults', activities. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

<sup>1</sup>In 1999, one item was used to ask parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.

NOTE: The respondent was the parent most knowledgeable about the child's education. The responding parent reported on their own and their spouse's, or other household adults', activities. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.

<sup>1</sup>Estimated.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years are for total expenditures. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes

more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>2</sup>Estimated.

<sup>3</sup>Data include current-fund expenditures and additions to plant value.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Public and private degree-granting institutions data for 1929–30 through 1995–96 are for current-fund expenditures, except where noted. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years are for total expenditures. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is

very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

<sup>1</sup>Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.<sup>2</sup>Includes assistance and subsidies to individuals, private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Standard errors that are not shown are available upon request.

<sup>1</sup>Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years that ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.

<sup>2</sup>Constant dollars based on a chain-price index, which uses the geometric mean of output weights of adjacent time periods compiled over a time series. Chain-price indexes reflect changes in prices, while implicit price deflators reflect both changes in prices and in the composition of output.

<sup>3</sup>Population of the United States including armed forces overseas. Includes Alaska and Hawaii beginning in 1960.

<sup>4</sup>Resident population of the United States. Includes Alaska and Hawaii beginning in 1958. Data for 1990 and later years include revisions based on the 2000 census.

NOTE: Gross domestic product (GDP) data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

## CHAPTER 2

# Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

### Enrollments

Public elementary and secondary school enrollment increased by 3 percent from 2001 to 2006, but enrollment at the elementary and secondary levels increased at different rates (table 37 and figure 6). Between 2001 and 2006, public elementary enrollment rose by 1 percent, while secondary enrollment increased by 10 percent. Enrollments in private elementary and secondary schools decreased by an estimated 4 percent between 2001 and 2006 (table 3).

In 2007, two-thirds of 3- to 5-year-olds were enrolled in preprimary education (nursery school and kindergarten), similar to the proportion in 2000 (table 43 and figure 7). However, the percentage of children in full-day programs increased from 2000 to 2007. In 2007, about 57 percent of the children enrolled in preprimary education attended preprimary school all day, compared with 53 percent in 2000.

A higher percentage of 4-year-old children (57 percent) were primarily cared for in center-based programs during the day in 2005–06 than were cared for in home-based settings by their parents (20 percent), in home-based settings by relatives (13 percent), or in home-based settings by nonrelatives (8 percent) (table 46). There were differences in the average quality of care children received in these settings. A higher percentage of children in Head Start and other center-based programs (35 percent) received high-quality care than those in home-based relative and nonrelative care (9 percent), according to the ratings of trained observers (table 47).

From 2001–02 to 2006–07, some increases occurred in the numbers and percentages of children being served in programs for those with disabilities. During the 2001–02 school year, 13 percent of students were served in these programs, compared with 14 percent in 2006–07 (table 50). Some of the change since 2001–02 may be attributed to the increasing percentage of children identified as having other

health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes), which rose from 0.7 to 1.2 percent of enrollment; autism, which rose from 0.2 to 0.5 percent of enrollment; and developmental delay, which rose from 0.5 to 0.7 percent of enrollment.

### Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers generally increased. As a result, the public school pupil/teacher ratio declined from 22.3 in 1970 to 17.9 in 1985 (table 64 and figure 6).<sup>1</sup> After 1985, the number of pupils per teacher continued to decline, reaching 17.2 in 1989. After a period of relative stability during the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 16.0 in 2000. Some decreases have continued since then, and the public school pupil/teacher ratio was 15.5 in 2006. The projected pupil/teacher ratio for private schools for 2006 was 13.5.<sup>1</sup>

The average class size in 2003–04 was 20.4 pupils for public elementary schools and 24.7 for public secondary schools (table 67).

In 2003–04, some 75 percent of public school teachers were female, 41 percent were under 40, and 48 percent had a master's or higher degree (table 68). Compared to public school teachers, a lower percentage of private school teachers (35 percent) had a master's or higher degree. Seventy-six percent of private school teachers were female.

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2003–04, some 15 percent of the public school principals were under age 40 and 98 percent of the public school principals had a master's or higher degree (table 86). A lower percentage of principals than of teachers were female. About 48 percent of public school principals were female, compared to 75 percent of teachers.

<sup>1</sup> The pupil/teacher ratio is based on all teachers—including teachers for students with disabilities and other special teachers—and all students enrolled in the fall of the school year. Unlike the pupil/teacher ratio, the average class size excludes students and teachers in classes that are exclusively for special education students. Class size averages are based on surveys of teachers reporting on the counts of students in their classes.

The numbers of both teaching and nonteaching staff employed by public schools grew during the 1970s, while the number of students declined (tables 80 and 3). Between 1970 and 1980, the percentage of staff who were teachers declined from 60 percent to 52 percent. From 1980 to 2006, the number of teachers and other staff grew at more similar rates (46 and 50 percent, respectively) than in the 1970s. As a result, the proportion of teachers among total staff was 1 percentage point lower in 2006 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. Two staff categories increased over 100 percent between 1980 and 2006—instructional aides, which rose 117 percent, and instructional coordinators, which rose 218 percent. Taken together, the percentage of staff with some instructional responsibilities (teachers and instructional aides) increased between 1980 and 2006, from 60 to 63 percent. In 2006, there were 8 pupils per staff member (total staff), compared with 10 pupils per staff member in 1980. In 2003, the number of pupils per staff member at private schools was 7 (table 60).

## Schools

During most of the last century, the trend to consolidate small schools brought declines in the total number of public schools in the United States. In 1929–30, there were approximately 248,000 public schools, compared with about 99,000 in 2006–07 (table 87). But this number has been increasing in recent years; between 1996–97 and 2006–07, there was an increase of approximately 10,600 schools.

The shift in structure of public school systems toward middle schools (grade spans beginning with 4, 5, or 6 and ending with 6, 7, or 8) since the early 1970s has continued (table 94). The number of all elementary schools (beginning in grade 6 or below, with no grade higher than grade 8) rose by 12 percent to 68,990 between 1996–97 and 2006–07, and the subset of middle schools rose by 22 percent during the same time period. Meanwhile, the number of junior high schools (grades 7 and 8 or 7 to 9) declined by 16 percent. The average number of students in elementary schools declined from 478 students in 1996–97 to 473 students in 2006–07 (table 96). The average enrollment size of secondary schools increased from 703 in 1995–96 to 722 in 2003–04, but then decreased to an average of 711 students in 2006–07. The average size of regular secondary schools, which exclude alternative, special education, and vocational education schools, rose from 777 to 811 between 1996–97 and 2006–07.

## High School Graduates and Dropouts

About 3,328,000 high school students are expected to graduate during the 2008–09 school year (table 104), including 3,011,000 public school graduates and 317,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2008–09 projection of high school graduates is lower than the record-high projection of 3,346,000 graduates for

2007–08, but exceeds the high point during the baby boom era in 1976–77, when 3,152,000 students earned diplomas. In 2005–06, an estimated 73.4 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 106).

The number of General Educational Development (GED) credentials issued rose from 330,000 in 1977 to 487,000 in 2000 (table 108). A record number of 648,000 GED credentials were issued in 2001. In that year, candidates who had already taken any of the five tests in the GED test battery had to complete the entire battery before the end of the year or else take all five tests over again. The reason is that a new GED test series was introduced in 2002. In the same year, data collection procedures changed, with data from the states on the number of credentials issued being replaced by test data from individual test-takers. In 2006, some 464,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.<sup>2</sup>

The percentage of dropouts among 16- to 24-year-olds has shown some decreases over the past 20 years. This percentage, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1987 and 2007, the status dropout rate declined from 12.6 percent to 8.7 percent (table 109). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates (8.4 and 21.4 percent, respectively) remained higher than the rate for Whites (5.3 percent) in 2007. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

## Achievement

Much of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and nonpublic schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

<sup>2</sup> Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. Since 2002, a combined sample of public schools has been selected for both state and national NAEP.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are administered nationally and report student performance at ages 9, 13, and 17 in reading and mathematics. Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

Long-term trend data have shown improvements in achievement in a number of areas. The average reading score at age 9 was higher in 2004 than in any previous assessment year (table 117). The average score at age 13 was higher in 2004 than in 1971, but not measurably different from the average score in 1999. Between 1999 and 2004, average reading scores at age 17 showed no measurable changes. The average score for 17-year-olds in 2004 was similar to that in 1971.

Significant gaps in performance continue to exist between racial/ethnic subgroups. For Black 9-, 13-, and 17-year-olds, average reading scores in 2004 were higher than in 1971 (table 117). At age 9, Black students scored higher on average in 2004 than in any previous administration year. For White students, the average scores for 9- and 13-year-olds were also higher in 2004 than in 1971. Separate data for Hispanics were not gathered in 1971, but as with the other racial/ethnic groups, the average reading score for Hispanic students at age 9 was higher in 2004 than in any other assessment year. The average score for Hispanic students at age 13 increased between 1975 and 2004. The scores for 17-year-old Hispanic students also increased between 1975 and 2004, but no measurable changes were seen between 1999 and 2004.

Female students scored higher on average in reading assessments than their male counterparts in 2004. The gender score gap at age 9 decreased from 1971 to 2004. In contrast, there has been no measurable change in the gender score gap at age 13 between 2004 and any previous assessment year. For 17-year-olds, the gender score gap in 2004 was larger than the gaps in 1980 and 1988, but showed no measurable difference from the gaps in other assessment years.

On the main NAEP reading assessment, public school fourth-graders scored higher in 2007 than in all previous assessment years. The average reading score was up 2 points since 2005 (based on unrounded scores) and up 5 points compared to the first main NAEP reading assessment in 1992 (table 121).

The 2007 main NAEP reading assessment of states found that reading proficiency varied among public school fourth-graders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 121). The U.S. average score was 220. The scores for the participating jurisdictions ranged from 197 in the District of Columbia to 236 in Massachusetts.

Mathematics achievement results from the long-term trend NAEP indicate a significant improvement for ages 9 and 13 between 1973 and 2004, but not for age 17 (table 131). The average score at age 9 in 2004 (241) was higher than in any previous year—up 9 points from 1999 and 22 points from 1973. The average score at age 13 in 2004 was higher than in any other assessment year. The 5-point increase between 1999 and 2004 resulted in an average score in 2004 that was 15 points higher than the average score in 1973. The average score at age 17 was not measurably different from the average score in 1973 or 1999. The apparent difference in average mathematics scores at age 9 between male and female students in 2004 was not statistically significant. Males had higher average scores than females at ages 13 and 17. The gender score gaps for 13- and 17-year-olds were measurably different between 1973 and 2004.

On the main NAEP mathematics assessment, the average score for public school eighth-graders in 2007 was 18 points higher than in 1990, the first assessment year. The average score in 2007 was higher than the score in any previous assessment (table 135).

The 2007 main NAEP assessment of states found that mathematics proficiency varied among public school eighth-graders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 135). The main NAEP results are reported in the *Digest* in terms of both average scale scores and achievement levels. The achievement levels define what students who are performing at *Basic*, *Proficient*, and *Advanced* levels of achievement should know and be able to do. The *Basic* level denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade. The *Proficient* level represents solid academic performance for each grade assessed; students reaching this level have demonstrated competency over challenging subject matter, including subject-matter knowledge, application of such knowledge to real-world situations, and analytical skills appropriate to the subject matter. The *Advanced* level signifies superior performance. Overall, 70 percent of these eighth-grade students performed at or above the Basic level in mathematics, and 31 percent performed at or above the Proficient level. The percentage of students performing at least at the Basic level in math ranged from 34 percent in the District of Columbia to 86 percent in North Dakota.

From 1996 to 2005, the national average 4th-grade science score increased from 147 to 151; there was no measurable change in the 8th-grade score; and the 12th-grade score decreased from 150 to 147 (table 138). Certain subgroups outperformed others in science in 2005. For example, males outperformed females at all three grades. White students scored higher, on average, than Black and Hispanic students at all three grades in 2005. At 4th grade, average scores increased for White, Black, Hispanic, and Asian/Pacific Islander students between 1996 and 2005. At 8th grade, the average score for Black students increased, but no measurable increases occurred for other racial/ethnic groups. At 12th grade, there were no measurable changes in average scores for any racial/ethnic group when comparing results from 2005 with those from 1996. Asian/Pacific Islander 4th-graders' 2000 results are not included because reporting standards were not met.

In addition to student performance data available through NAEP, the *Digest* presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of mental skills have been demonstrated at relatively early ages (table 113). In 2003–04, about 64 percent of 2-year-olds demonstrated skill in expressive vocabulary, which measured toddlers' skill in being able to communicate using gestures, words, and sentences. A higher percentage of females (69 percent) demonstrated expressive vocabulary than males (59 percent). Also, a higher percentage of White 2-year-olds (71 percent) demonstrated expressive vocabulary than Black, Hispanic, or American Indian/Alaska Native 2-year-olds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status (SES) who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low-SES families (52 percent). Similar patterns of differences were observed among minority and economically disadvantaged children at about 4 years of age (table 114). There was little difference between the average literacy scores for female (13.7) and male (12.7) 48- to 57-month-olds. White (14.2) and Asian (17.5) 48- to 57-month-old children had higher literacy scores than Black (12.0), Hispanic (10.7), and American Indian/Alaska Native (9.6) children. Also, high-SES children (18.0) had higher average literacy scores than low-SES children (9.2). These same patterns were observed among 48- to 57-month-old children with respect to average mathematics scores.

The SAT (formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test) is not designed as an indicator of student achievement, but rather as an aid for predicting how well students will do in college. Between 1997–98 and 2004–05, the mathematics SAT average score increased by 8 points, but it declined by 5 points between 2004–05 and 2007–08 (table 142). The critical reading average score was 3 points lower in 2007–08 than in 1997–98.

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2005. The average number of mathematics courses (Carnegie units) completed in high school rose

from 2.6 in 1982 to 3.7 in 2005, and the number of science courses rose from 2.2 to 3.3 (table 147). The average number of courses in career/technical areas completed by all high school graduates was lower in 2005 (4.0 units) than in 1982 (4.6 units). As a result of the increased academic course load, the percentage of students completing the 1983 National Commission on Excellence recommendations for college-bound students (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, 2 units of foreign language, and .5 units of computer science) rose from 2 percent in 1982 to 36 percent in 2005 (table 151).

## School Violence

In 2005–06, about 86 percent of public schools had a criminal incident, which is defined as a serious violent crime or a less serious crime such as a fight without weapons, theft, or vandalism (table 158). The percentage of schools having a criminal incident in 2005–06 was about the same as the percentage of schools having an incident in 1999–2000. In 2005–06, some 78 percent of schools reported a violent incident; 46 percent of schools reported a theft/larceny; and 68 percent reported other types of incidents. Overall, there were 5 crime incidents reported per 100 students.

## Revenues and Expenditures

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 171 and figure 9). However, this pattern changed in the late 1980s, when the local share began to increase at the same time the state share decreased. Between 1986–87 and 1993–94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993–94 and 2000–01, the state share rose again to 49.7 percent, the highest share since 1986–87, but declined every school year afterward until 2005–06, when the state share was 46.5 percent. Between 1995–96 and 2005–06, the federal share of revenues rose to 9.1 percent. The local share declined from 45.9 percent in 1995–96 to 42.8 in 2002–03, and then increased to 44.4 percent in 2005–06.

After adjustment for inflation, current expenditures per student in fall enrollment in public schools rose during the 1980s, remained stable during the first part of the 1990s, and rose again after 1992–93 (table 181 and figure 10). There was an increase of 37 percent from 1980–81 to 1990–91; an increase of less than 1 percent from 1990–91 to 1994–95 (which resulted from small decreases at the beginning of this period, followed by small increases after 1992–93); and an increase of 25 percent from 1994–95 to 2005–06. In 2005–06, current expenditures per student in fall enrollment were \$9,154 in unadjusted dollars. In 2005–06, some 55 percent of students in public schools were transported at public expense at a cost of \$746 per pupil, also in unadjusted dollars (table 175).

—Not available.

<sup>1</sup>Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.

<sup>2</sup>Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment.

<sup>3</sup>Data for 1870–71.

<sup>4</sup>Estimated by the National Center for Education Statistics.

<sup>5</sup>Prior to 1919–20, data are for the number of different persons employed rather than number of positions.

<sup>6</sup>Prior to 1919–20, includes interest on school debt.

<sup>7</sup>Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959–60 and later years are not entirely comparable with prior years.

<sup>8</sup>Beginning in 1969–70, includes capital outlay by state and local school building authorities.

<sup>9</sup>Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."

<sup>10</sup>Excludes community colleges and adult education.

<sup>11</sup>Prior to 1959–60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959–60 and later years are estimated by the National Education Association.

<sup>12</sup>Excludes current expenditures not allocable to pupil costs.

<sup>13</sup>"ADA" means average daily attendance in elementary and secondary schools.

<sup>14</sup>Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.

<sup>15</sup>Per-day rates derived by dividing annual rates by average length of term.

<sup>16</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals because of rounding.

NOTE: Because of changes in reporting practices and imputation of data for nonrespondents since 1992, prekindergarten enrollment data for 1992 and later years are not comparable to prekindergarten enrollment data for prior years. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

<sup>1</sup>Refers to all students in public and private schools and homeschooled students.

<sup>2</sup>Students whose grade-equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003.

<sup>3</sup>Urbanicity is based on a U.S. Census Bureau classification of places. Urban is a place with at least 50,000 people. Rural is a place not classified as urban.

NOTE: The number and percentage of homeschoolers exclude students who were enrolled in school for more than 25 hours a week and students who were only homeschooled due to a temporary illness. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Homeschooling in the United States: 2003*, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003) of the National Household Education Surveys Program. (This table was prepared September 2006.)

**Table 39. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999 and 2003**

—Not available.

†Not applicable.

<sup>1</sup>Data collected using new procedures. May not be comparable with figures prior to 1994.<sup>2</sup>Enrollment data include only those students in preprimary programs.

NOTE: Data are based on sample surveys of the civilian noninstitutional population. Although cells with fewer than 75,000 children are subject to wide sampling variation, they

are included in the table to permit various types of aggregations. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Preprimary Enrollment*, 1965, 1970, and 1975. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1980 through 2007. (This table was prepared August 2008.)

**Table 44. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005**

Selected child and family characteristic	Number of children, ages 0 to 5 (in thousands)	Percent in center-based programs	Average hours per week in nonparental care <sup>1</sup>	Percentage distribution, by type of primary care arrangement								
				Parental care only	Nonparental care						Relative	Multiple arrangements <sup>2</sup>
					Center-based care		Nonrelative care					
					Head Start	Other center-based	Family child care (in another home)	Sitter (in child's home)

†Not applicable.

#Rounds to zero.

<sup>1</sup>Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.<sup>2</sup>Children who spend equal hours per week in multiple nonparental care arrangements.<sup>3</sup>Excludes children living apart from their parents.<sup>4</sup>Excludes children living in households with no mother or female guardian present.<sup>5</sup>Poverty status was determined by household income and number of persons in household.

NOTE: A child's "primary arrangement" was defined as the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

#Rounds to zero.

†Reporting standards not met.

<sup>1</sup>Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.

<sup>2</sup>Care provided in the child's home or in another private home by a relative (excluding parents) or by a person unrelated to the child.

<sup>3</sup>Quality rating based on the Family Day Care Rating Scale (FDCRS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.

<sup>4</sup>Quality rating based on the Early Childhood Environment Rating Scale (ECERS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.

<sup>5</sup>Care provided in places such as early learning centers, nursery schools, and preschools, not classified as Head Start.

<sup>6</sup>Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

<sup>7</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W33P0. Estimates pertain to children assessed between 44 months and 65 months of age. Rating is for child's primary type of care arrangement, which was the type of nonparental care in which the child spent the most hours. Children who were primarily cared for by parents or in multiple arrangements are not included in this table. Ratings of care arrangement quality using both the FDCRS and ECERS scales were based on interviewer observations of children's interactions with adults and peers, children's exposure to materials and activities, the extent to which and the manner in which routine care needs were met, and the furnishings and displays in the classroom. The FDCRS and ECERS metrics are designed to be equivalent. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Standard errors appear in parentheses.

<sup>1</sup>In 1993, respondents were asked about reading frequency in one of two versions. The percentages presented in the table are for all of the respondents who answered three or more times on either version of the questions.

<sup>2</sup>Refers to visiting a library at least once in the past month.

<sup>3</sup>Excludes children living in households with no mother or female guardian present.

<sup>4</sup>Poverty status was determined by household income and number of persons in household.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

#Rounds to zero.

<sup>1</sup>Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

<sup>2</sup>Includes preschool children ages 3–5 served under Chapter 1 and IDEA, Part B. Prior to 1987–88, these students were included in the counts by disability condition. Beginning in 1987–88, states were no longer required to report preschool children (ages 0–5) by disability condition. Beginning in 2000–01, preschool children were again identified by disability condition.

<sup>3</sup>Based on the total enrollment in public schools, prekindergarten through 12th grade.

NOTE: Includes students served under Chapter 1 of the Elementary and Secondary Education Act and under the Individuals with Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act. Prior to October 1994, children and youth with disabilities were served under Chapter 1 as well as IDEA, Part B. In October 1994, funding for children and youth with

disabilities was consolidated under IDEA, Part B. Data reported in this table for years prior to 1994–95 include children ages 0–21 served under Chapter 1. Counts are based on reports from the 50 states and the District of Columbia only (i.e., table excludes data for other jurisdictions). Increases since 1987–88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3- to 5-year-old disabled children. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

<sup>1</sup>Percentage of students with disabilities is based on the total enrollment in public schools, pre-kindergarten through 12th grade.

NOTE: Prior to 1994, children and youth with disabilities were served under the Individuals with Disabilities Education Act (IDEA), Part B, and Chapter 1 of the Elementary and Secondary Education Act. In October 1994, funding for children and youth with disabilities was consolidated under IDEA, Part B. Data reported in this table for years prior to 1994 include children served under Chapter 1. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, Office of Special Education and Rehabilitative Services, *Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act*, selected years, 1992 through 2006, and Individuals with Disabilities Education Act (IDEA) database, retrieved April 17, 2008, from <http://www.ideadata.org/PartBdata.asp>. National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2006–07. (This table was prepared October 2008.)

#Rounds to zero.

!Interpret data with caution.

<sup>1</sup>Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.<sup>2</sup>Data for 2006 are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

<sup>1</sup>Includes a relatively small number of secondary ungraded students.

<sup>2</sup>Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year.

<sup>3</sup>Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables, which are based on the enrollment of persons in the given age group only.

<sup>4</sup>Data are for 1927–28.

<sup>5</sup>Data are for 1940–41.

<sup>6</sup>Estimated.

<sup>7</sup>Projected.

NOTE: Allocation of ungraded students to secondary levels based on proportions derived from prior years. Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

<sup>1</sup>Estimated.

<sup>2</sup>Includes enrollment in ancient Greek (not shown separately). Fewer than 1,000 students were enrolled in this language in each of the years shown.

<sup>3</sup>Until 1990, student enrollment in Japanese courses was included in the Other modern foreign languages category.

<sup>4</sup>Includes students enrolled in unspecified modern foreign languages. Since 1990, enrollment in Japanese courses is reported as a separate category.

NOTE: Percent change computed from unrounded numbers.

†Not applicable.

#Rounds to zero.

!Interpret data with caution.

<sup>1</sup>Enrollment is based on students regularly enrolled in the districts. Enrollments include duplicated counts of students, since districts were instructed to count a student enrolled in each course in which he or she was enrolled.

<sup>2</sup>Combined or ungraded schools are those in which the grades offered in the school span both elementary and secondary grades or that are not divided into grade levels.

NOTE: Percentages are based on unrounded numbers. Percentages are based on the estimated 89,310 public schools in the nation in 2002–03. For the FRSS study sample, there were 3 cases for which district enrollment size was missing and 112 cases for which poverty concentration was missing. Detail may not sum to totals because of rounding or missing data.

<sup>1</sup>Not applicable.

<sup>2</sup>Reporting standards not met.

<sup>3</sup>Only includes kindergarten students who attend schools that offer first or higher grade.

<sup>4</sup>Tuition weighted by the number of students enrolled in schools.

NOTE: Excludes schools not offering first or higher grade. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools have grades lower than 7 and higher than 8.

Excludes prekindergarten students. Includes schools reporting tuition of 0. Detail may not sum to totals because of rounding and cell suppression. Standard errors appear in parentheses.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Includes schools beginning with grade 6 or below and with no grade higher than 8.

<sup>2</sup>Schools with no grade lower than 7.

<sup>3</sup>Schools with grades lower than 7 and higher than 8.

<sup>4</sup>Includes student support services professional staff, such as school psychologists, social workers, occupational therapists, and speech therapists.

<sup>5</sup>Includes health and other noninstructional aides, and other employees not identified by function.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Excludes all prekindergarten students from calculations, but includes kindergarten students attending schools that offer first or higher grade. Includes only schools that offer first or higher grade. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

<sup>1</sup>Total enrollment is for kindergarten through grade 12, elementary enrollment is for kindergarten through grade 8, and secondary enrollment is for grades 9 through 12.

<sup>2</sup>From 1919–20 through fall 1960, includes part-time teachers. From 1969–70 through 1993–94, excludes part-time teachers. Beginning in 1994–95, reported in full-time equivalents (FTE).

<sup>3</sup>Includes middle schools.

<sup>4</sup>Includes estimates for the nonreporting schools.

<sup>5</sup>Excludes the Archdiocese of New Orleans.

NOTE: Data collected by the National Catholic Educational Association and data collected by the National Center for Education Statistics are not directly comparable because survey procedures and definitions differ. Some data have been revised from previously published figures.

†Not applicable.

!Interpret data with caution.

‡Reporting standards not met.

<sup>1</sup>Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.

NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of

students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), various years, 1997–98 through 2005–06. (This table was prepared June 2008.)

—Not available.

NOTE: Pupil/teacher ratios are based on data reported by types of schools rather than by instructional programs within schools. Only includes schools that reported both enrollment and teacher data. Ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states.

<sup>1</sup>Estimated.

<sup>2</sup>Projected.

NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported by states and

differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Teachers with less than a bachelor's degree are not shown separately.<sup>2</sup>Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught.<sup>3</sup>Includes certificate of advanced graduate studies.

NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, cell suppression, and omitted categories (less than bachelor's).

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public Teacher Questionnaire," 2003–04. (This table was prepared July 2006.)

**Table 68. Highest degree earned and years of full-time teaching experience for teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 and 2003–04**

Selected characteristic	Number of teachers, 1999–2000 (in thousands)		Number of teachers, 2003–04 (in thousands)		Percent of teachers, by highest degree earned, 2003–04						Percent of teachers, by years of full-time teaching experience, 2003–04

—Not available.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Includes certificate of advanced graduate studies.

<sup>2</sup>Data are only roughly comparable to 2003–04, because the new category of more than one race was introduced in 2003–04.

<sup>3</sup>Includes Pacific Islander.

<sup>4</sup>Included under other elementary.

<sup>5</sup>Included under other secondary.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.

<sup>1</sup>Figures for curriculum specialist or professional diploma based on 6 years of college study are not included.

<sup>2</sup>Measured in semester hours.

<sup>3</sup>Includes extra pay for extra duties.

NOTE: Data are based on sample surveys of public school teachers. See Guide to Sources for information on interpreting data from this survey. Data differ from figures appearing in other tables because of varying survey processing procedures and time period coverages. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Includes teachers with levels of education below the bachelor's degree (not shown separately).

<sup>2</sup>Includes certificate of advanced graduate studies.

<sup>3</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Includes additional compensation for extracurricular instruction or other additional activities, and bonuses and state supplements.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff,

and support staff). Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, missing values in cells with too few cases to report, and survey item nonresponse.

†Not applicable.

‡Reporting standards not met.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Questionnaire," 1993–94, 1999–2000, and 2003–04; and "Public Charter School Teacher Questionnaire," 1999–2000. (This table was prepared July 2006.)

**Table 77. Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, and 2003–04**

<sup>1</sup>Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.

<sup>2</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

#Rounds to zero.

<sup>1</sup>Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

SOURCE: National Education Association, *Estimates of School Statistics*, 1969–70 through 2006–07. (This table was prepared July 2008.)

**Table 80. Staff employed in public elementary and secondary school systems, by functional area: Selected years, 1949–50 through fall 2006**

—Not available.

<sup>1</sup>Includes school district administrative support staff, school and library support staff, student support staff, and other support services staff.

<sup>2</sup>Because of classification revisions, categories other than teachers, principals, librarians, and guidance counselors are only roughly comparable to figures for years after 1980.

<sup>3</sup>Data included in column 8.

NOTE: Data for 1949–50 through 1969–70 are cumulative for the entire school year, rather than counts as of the fall of the year. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*, various years; *Statistics of Public Elementary and Secondary Schools*, various years; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2006–07. (This table was prepared August 2008.)

‡Reporting standards not met.

<sup>1</sup>Total differs from data appearing in other tables because of varying survey processing procedures and time period coverages.<sup>2</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. Excludes principals reporting a salary of \$0.<sup>3</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced studies.<sup>4</sup>Data include Pacific Islander.<sup>5</sup>A city consists of a territory inside an urbanized area and inside a principal city.<sup>6</sup>A suburb is a territory outside a principal city and inside an urbanized area. An urbanized area includes a central place and densely populated surrounding area with at least 50,000 people.<sup>7</sup>A town is a territory within an urban cluster. An urban cluster is a central place with a densely populated adjacent territory including at least 2,500 people.<sup>8</sup>A rural area is a Census-defined rural territory that is outside of an urbanized area and urban clusters.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Standard errors appear in parentheses.

—Not available.

<sup>1</sup>Includes operating and nonoperating districts.

<sup>2</sup>Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.

<sup>3</sup>Data for most years prior to 1976–77 are partly estimated. Prior to 1995–96, excludes schools with highest grade of kindergarten.

<sup>4</sup>Includes regular schools and special schools not classified by grade span.

<sup>5</sup>Includes elementary, secondary, and combined elementary/secondary schools.

<sup>6</sup>These data cannot be compared directly with the data for years after 1980–81.

<sup>7</sup>Because of expanded survey coverage, data are not directly comparable with figures after 1983–84.

†Not applicable.

NOTE: Size not reported includes school districts reporting enrollment of zero. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment totals differ from

other tables because this table represents data reported by school districts rather than states or schools. Detail may not sum to totals because of rounding.

<sup>1</sup>Regular school districts include both independent districts and those that are a dependent segment of a local government. Includes nonoperating agencies. Components of supervisory unions operate schools, but share superintendent services with other districts.

<sup>2</sup>New York City counted as one school district.

NOTE: DoD = Department of Defense.

<sup>1</sup>Located inside an urbanized area and inside a principal city with a population of at least 250,000.

<sup>2</sup>Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.

<sup>3</sup>Located inside an urbanized area and inside a principal city with a population less than 100,000.

<sup>4</sup>Located inside an urbanized area and outside a principal city with a population of 250,000 or more.

<sup>5</sup>Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.

<sup>6</sup>Located inside an urbanized area and outside a principal city with a population less than 100,000.

<sup>7</sup>Located inside an urban cluster that is 10 miles or less from an urbanized area.

<sup>8</sup>Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.

<sup>9</sup>Located inside an urban cluster that is more than 35 miles from an urbanized area.

<sup>10</sup>Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.

<sup>11</sup>Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

<sup>12</sup>Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.

<sup>13</sup>Average for schools reporting enrollment. Enrollment data were available for 94,164 out of 98,793 institutions in 2006–07.

<sup>14</sup>Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.

<sup>15</sup>Includes tuition and fee revenues from other in-state school systems, which are excluded from state data reported through the "National Public Education Financial Survey."

<sup>16</sup>Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.

NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.

<sup>1</sup>Alabama, Alaska, Arizona, Florida, Illinois, Maryland, New Jersey, New York, Tennessee, and Vermont reported data on an alternative July through June cycle, rather than the specified October through September cycle.<sup>2</sup>Includes regular diplomas only.<sup>3</sup>Data for total staff are imputed.

NOTE: Total enrollment, staff, and teacher data in this table reflect totals reported by school districts and may differ from data derived from summing school-level data to school district aggregates. SB = school board. ISD = independent school district. CISD = consolidated independent school district. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

<sup>†</sup>Not applicable.

<sup>1</sup>Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2005, see <http://www.census.gov/hhes/www/poverty/threshld/thresh05.html>.

<sup>2</sup>Current expenditure per pupil based on fall enrollment collected through the "School District Finance Survey (Form F-33)," 2005–06.

<sup>3</sup>Fiscal year 2008 Department of Education funds available for spending by school districts beginning with the 2008–09 school year divided by number of poverty children in 2005.

<sup>4</sup>Includes other expenditures not shown separately.

<sup>5</sup>Data included under Modesto City Elementary.

NOTE: Detail may not sum to totals because of rounding. SB = school board. ISD = independent school district. CISD = consolidated independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2005–06, and "Local Education Agency Universe Survey," 2006–07; and unpublished Department of Education budget data. (This table was prepared September 2008.)

**Table 93. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2006: Fall 2006, 2005–06, and fiscal year 2008**

<sup>1</sup>Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2005, see <http://www.census.gov/hhes/www/poverty/threshld/thresh05.html>.<sup>2</sup>Fiscal year 2008 Department of Education funds available for spending by school districts in the 2008–09 school year.<sup>3</sup>Federal revenue per student is based on fall enrollment collected through the "School District Finance Survey (Form F-33)."

NOTE: Detail may not sum to totals because of rounding. SB = school board. ISD = independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2005–06, and "Local Education Agency Universe Survey," 2006–07; and unpublished Department of Education budget data. (This table was prepared September 2008.)

<sup>1</sup>Totals differ from those reported in other tables because this table represents data reported by schools rather than by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.

<sup>2</sup>Includes special education, alternative, and other schools not reported by grade span.

<sup>3</sup>Includes schools beginning with grade 6 or below and with no grade higher than 8.

<sup>4</sup>Includes schools with no grade lower than 7.

<sup>5</sup>Includes schools beginning with grade 6 or below and ending with grade 9 or above.

<sup>6</sup>Excludes special education schools, vocational schools, and alternative schools.

<sup>7</sup>Data have been revised from previously published figures.

<sup>8</sup>Data are for schools reporting their enrollment size. Enrollment data were available for 93,303 out of 96,513 schools in 2004–05, 93,845 out of 97,382 schools in 2005–06, and 94,164 out of 98,793 in 2006–07.

NOTE: Detail may not sum to totals because of rounding.

†Not applicable.

NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race cate-

gories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1995-96, 2000-01, and 2006-07. (This table was prepared September 2008.)

—Not available.

<sup>1</sup>Includes graduates of public and private schools.

<sup>2</sup>Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates from high schools that failed to report to the Office of Education.

<sup>3</sup>For most years, private school data have been estimated based on periodic private school surveys.

<sup>4</sup>The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.

<sup>5</sup>Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

<sup>6</sup>Private school data are projected.

<sup>7</sup>Projected.

NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

<sup>1</sup>Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

<sup>2</sup>U.S. total includes estimates for nonreporting states.

<sup>3</sup>Projected high school graduates from NCES 2008-078, *Projections of Education Statistics to 2017*.

<sup>4</sup>Estimated high school graduates from NCES 2006-606rev, *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*.

NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2006–07; and *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04; and Projections of Education Statistics to 2017*. (This table was prepared January 2009.)

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Data differ slightly from figures reported in other tables due to varying reporting practices for racial/ethnic survey data.

<sup>2</sup>High school graduate counts include estimates for nonreporting states, based on 2005 12th-grade enrollment racial/ethnic distribution reported by state. Event dropout rate totals are totals for reporting states only.

<sup>3</sup>Projected high school graduates from NCES 2008-078, *Projections of Education Statistics to 2017*.

NOTE: Includes only graduates for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of school between one October and the next. DoD = Department of Defense.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2005–06 and 2006–07, and "State-Level Public School Dropouts," 2005–06; and unpublished tabulations. (This table was prepared January 2009.)

—Not available.

<sup>1</sup>People who did not report their age were excluded from this calculation. Age data for 1988 and prior years are for all test takers and may not be comparable to data for later years.

<sup>2</sup>All people taking the GED tests (one or more subtests).

<sup>3</sup>People completing the entire GED battery of five tests.

<sup>4</sup>Data for 2002 and later years are for people passing the GED tests (i.e., earning both a passing total score on the test battery and a passing score on each individual test). Data for 2001 and prior years are for high school equivalency credentials issued by the states to GED test passers. In order to receive high school equivalency credentials in some states,

GED test passers must meet additional state requirements (e.g., complete an approved course in civics or government).

<sup>5</sup>Includes other jurisdictions, such as Puerto Rico, Guam, and American Samoa.

NOTE: Data are for the United States only and exclude other jurisdictions, except where noted. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: American Council on Education, General Educational Development Testing Service, the GED annual *Statistical Report*, 1971 through 1992; *Who Took the GED?* 1993 through 2001; *Who Passed the GED Tests?* 2002 through 2005; and *2006 GED Testing Program Statistical Report*. (This table was prepared July 2008.)

—Not available.

†Not applicable.

<sup>1</sup>Includes other racial/ethnic categories not separately shown.

<sup>2</sup>Based on the April 1960 decennial census.

<sup>3</sup>White and Black include persons of Hispanic ethnicity.

<sup>4</sup>Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

<sup>5</sup>White and Black exclude persons identifying themselves as more than one race.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Includes persons employed, but not currently working.

<sup>2</sup>Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers.

Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

<sup>1</sup>Students may exit special education services due to maximum age beginning at age 18 depending on state law or practice or order of any court.

<sup>2</sup>"Dropped out" is defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit through any of the other bases described. Beginning in 2004–05, includes students previously categorized as "moved, not known to continue."

<sup>3</sup>"Transferred to regular education" was previously labeled "no longer receives special education."

<sup>4</sup>Data have been revised from previously reported figures.

<sup>5</sup>Includes deaf and hard of hearing.

†Not applicable.

<sup>1</sup>Ability to explore objects, for example, reaching for and holding objects. The child may have no specific purpose except to play or discover.

<sup>2</sup>Ability to explore objects with a purpose, such as to explore a bell to understand the source of the sound.

<sup>3</sup>Measures proficiency in communication through diverse nonverbal sounds and gestures, such as vowel and vowel-consonant sounds.

<sup>4</sup>Measures proficiency in engaging in early problem solving, such as using a tool to reach an out-of-reach toy or locating a hidden toy.

<sup>5</sup>Measures proficiency in early communication skills, such as saying simple words like "mama" and "dada."

<sup>6</sup>Measures proficiency in being able to use visual tracking to guide hand movements to pick up a small object.

<sup>7</sup>Measures proficiency in ability to maintain control of the muscles used in sitting with and without support.

<sup>8</sup>Measures proficiency in ability to engage in various prewalking types of mobility, with and without support, such as shifting weight from one foot to the other.

<sup>9</sup>Measures proficiency in ability to walk with help and to stand independently.

<sup>10</sup>Measures proficiency in being able to walk independently.

<sup>11</sup>Measures proficiency in ability to maintain balance while shifting position.

<sup>12</sup>The type of nonparental care in which the child spent the most hours.

<sup>13</sup>Care provided in the child's home or in another private home by a relative (excluding parents).

<sup>14</sup>Care provided in the child's home or in another private home by a person unrelated to the child.

<sup>15</sup>Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.

<sup>16</sup>Children who spent an equal amount of time in each of two or more arrangements.

<sup>17</sup>Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

<sup>18</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: This table is based on a survey that sampled children born in 2001 and was designed to collect information about them for the first time when the children were about 9 months of age (i.e., 8 to 10 months). As shown in the table, some children were older than this, although only 6.5 percent were over 13 months of age. Estimates weighted by WTC0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort 9-month–Preschool Restricted-Use Data File and Electronic Codebook. (This table was prepared February 2008.)

†Not applicable.

<sup>1</sup>Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 22 and 25 months of age.<sup>2</sup>Based on assessments collected using the Bayley Short Form Research Edition (BSF-R), a shortened field method of administering the Bayley Scales of Infant Development-II (BSID-II) (Bayley 1993). The scores are fully equated with the BSID-II. The proficiency probabilities indicate mastery of a specific skill or ability within mental or physical domains.<sup>3</sup>Secure attachment was measured by trained observers using Toddler Attachment Sort-45 Item (TAS-45) assessment. The formation of secure attachments in early childhood is an indicator that the child is able to use the parent as a secure base from which to explore novel stimuli in the environment freely and acquire a sense of self-confidence and adaptability to new and challenging situations. Other possible scale classifications in this metric were avoidant, ambivalent, and disorganized/disoriented.<sup>4</sup>Ability to recognize and understand spoken words or to indicate a named object by pointing.<sup>5</sup>Verbal expressiveness using gestures, words, and sentences.<sup>6</sup>Ability to understand actions depicted by a story, in pictures, or by verbal instructions.<sup>7</sup>Ability to match objects by their properties (e.g., color) or differentiate one object from another.<sup>8</sup>Knowledge of counting words, knowledge of ordinality, and understanding of simple quantities.<sup>9</sup>Ability to walk independently.<sup>10</sup>Ability to maintain balance when changing position.<sup>11</sup>Ability to use fine motor control with hands, such as grasping a pencil or holding a piece of paper while scribbling.<sup>12</sup>Ability to walk up and down stairs, with and without alternating feet.<sup>13</sup>Ability to maintain balance when changing position or when in motion, such as jumping.<sup>14</sup>Ability to anticipate, regulate, and execute motor movements, such as being able to attempt to replicate the motions of others.<sup>15</sup>The type of nonparental care in which the child spent the most hours.<sup>16</sup>Care provided in the child's home or in another private home by a relative (excluding parents).<sup>17</sup>Care provided in the child's home or in another private home by a person unrelated to the child.<sup>18</sup>Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.<sup>19</sup>Children who spent an equal amount of time in each of two or more arrangements.<sup>20</sup>Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.<sup>21</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W2R0. Estimates pertain to children assessed between 22 months and 25 months of age. Children younger than 22 months (less than 1 percent of the survey population) and children older than 25 months (approximately 9 percent of the survey population) are excluded from this table. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Ability to recognize and understand spoken words or to indicate a named object by pointing. Potential score ranges from 0 to 15.

<sup>2</sup>Verbal expressiveness using gestures, words, and sentences. Potential score ranges from 0 to 5.

<sup>3</sup>Includes letter recognition, in both receptive and expressive modes; letter sounds; and early reading knowledge and skills. Potential score ranges from 0 to 37.

<sup>4</sup>Ability to identify a letter by either its name or the sounds it makes. Average score can be interpreted as the percentage of children who were proficient at recognizing the letters of the alphabet. Potential score ranges from 0 to 100.

<sup>5</sup>Measures understanding of the sounds and structure of spoken language, including rhyming, blending, segmenting, deleting, and substituting words, syllables, and sounds. Potential score ranges from 0 to 8.

<sup>6</sup>Understanding of what print represents and how it works. Potential score ranges from 0 to 8.

<sup>7</sup>Includes number sense, geometry, counting, operations, and patterns. Potential score ranges from 0 to 44.

<sup>8</sup>Ability to recognize single-digit numbers and basic geometric shapes. Average score can be interpreted as the percentage of children who were proficient. Potential score ranges from 0 to 100.

<sup>9</sup>Percentage of children who scored 10 on a test with a potential score range of 0 to 10. These children were able to name the colors of five pictured objects (2 points per correct answer).

<sup>10</sup>Measures the ability to use fine motor skills in drawing basic forms and shapes. Potential score ranges from 0 to 7.

<sup>11</sup>The type of nonparental care in which the child spent the most hours.

<sup>12</sup>Care provided in the child's home or in another private home by a relative (excluding parents).

<sup>13</sup>Care provided in the child's home or in another private home by a person unrelated to the child.

<sup>14</sup>Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.

<sup>15</sup>Children who spent an equal amount of time in each of two or more arrangements.

<sup>16</sup>Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

<sup>17</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W3R0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

<sup>1</sup>Status during kindergarten year.<sup>2</sup>Family risk factors included living below the federal poverty level, primary home language was not English, mother's highest education was less than a high school diploma/GED, and living in a single-parent household. Values range from 0 to 4.

NOTE: Detail may not sum to totals because of rounding. Estimates reflect the sample of children assessed in English in all assessment years. ECLS-K was not administered in 2000–01, when most of the children in the sample were in second grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth

grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade). Reading scale ranges from 0 to 186. Data were calculated using C1\_6FC0 weight and therefore differ from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

<sup>1</sup>Status during kindergarten year.

<sup>2</sup>Family risk factors included living below the federal poverty level, primary home language was not English, mother's highest education was less than a high school diploma/GED, and living in a single-parent household. Values range from 0 to 4.

NOTE: Detail may not sum to totals because of rounding. Estimates reflect the sample of children assessed in English in all assessment years. ECLS-K was not administered in 2000–01, when most of the children in the sample were in second grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth

grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade). Mathematics scale ranges from 0 to 153. Science scale ranges from 0 to 92. Data were calculated using C1\_6FC0 weight and therefore differ from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.

†Not applicable.

<sup>1</sup>Data for 1971 include persons of Hispanic ethnicity.

<sup>2</sup>Test scores of Hispanics were not tabulated separately.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, sci-

ence, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity, except where noted. Some data have been revised from previously published figures. Standard errors appear in parentheses.

‡Reporting standards not met.

<sup>1</sup>Accommodations were not permitted for this assessment.

<sup>2</sup>The percentile represents a specific point on the percentage distribution of all students ranked by their reading score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

NOTE: Scale ranges from 0 to 500. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

‡Reporting standards not met.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about litera-

ture, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Data for 1971 include persons of Hispanic ethnicity.

<sup>2</sup>Test scores of Hispanics were not tabulated separately.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, sci-

ence, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity, except where noted. Standard errors appear in parentheses.

—Not available.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Scale ranges from 0 to 500.<sup>2</sup>Race/ethnicity based on school records.<sup>3</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.<sup>4</sup>Proficient represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.<sup>5</sup>Advanced signifies superior performance.<sup>6</sup>Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.<sup>7</sup>Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.<sup>8</sup>Did not satisfy one or more of the guidelines for school participation in 1994. Data are subject to appreciable nonresponse bias.<sup>9</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: The reading data include students for whom accommodations were permitted except for the 1992 and 1994 data. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998, 2002, 2003, 2005, and 2007 Reading Assessments, retrieved May 16, 2008, from the NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/ndep/>). (This table was prepared May 2008.)

‡Reporting standards not met.

<sup>1</sup>Scale ranges from 0 to 500.

<sup>2</sup>Central city is a large or mid-size central city of a Metropolitan Statistical Area (MSA). Urban fringe/ large town includes places that are within an MSA of a central city but not primarily within its central city, as well as towns that are incorporated places not within an MSA and have a population greater than or equal to 25,000. Rural/ small town includes places that are defined as rural by the U.S. Census Bureau and have a population less than 2,500 and/or a population density of less than 1,000 per square mile, as well as towns that are incorporated places not within an MSA and have a population less than 25,000 but greater than or equal to 2,500.

<sup>3</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.

<sup>4</sup>Proficient represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>5</sup>Advanced signifies superior performance.<sup>6</sup>Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.<sup>7</sup>Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.<sup>8</sup>Did not satisfy one or more of the guidelines for school participation in 2003. Data are subject to appreciable nonresponse bias.

<sup>9</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: The reading data include students for whom accommodations were permitted. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1998, 2002, 2003, 2005, and 2007 Reading Assessments, retrieved May 19, 2008, from the NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/nde/>). (This table was prepared May 2008.)

<sup>1</sup>Accommodations were not permitted for this assessment.

NOTE: Scale ranges from 0 to 500. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Some

data have been revised from previously published figures. Standard errors appear in parentheses.

—Not available.

†Not applicable.

#Rounds to zero.

†Reporting standards not met.

<sup>1</sup>Scale ranges from 1 to 300 for all three grades, but scores cannot be compared across grades. For example, a score of 156 at grade 8 does not denote higher performance than a score of 153 at grade 12.

<sup>2</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>3</sup>Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>4</sup>Advanced signifies superior performance for a given grade.

NOTE: Includes public and private schools. Excludes persons unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' writing proficiency). In 2002, the NAEP national samples of 4th- and 8th-graders were obtained by aggregating the samples from each state, rather than by independently selecting national samples for grades 4 and 8. As a consequence, the size of the national samples increased for these grade levels, and smaller differences were found to be statistically significant than would have been detected in previous assessments. Grade 4 was not included in the 2007 survey. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

‡Reporting standards not met.

<sup>1</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>2</sup>Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>3</sup>Advanced signifies superior performance for a given grade.

NOTE: Includes public and private schools. Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' U.S. history proficiency). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses. Some data have been revised from previously published figures.

#Rounds to zero.

‡Reporting standards not met.

<sup>1</sup>Scale ranges from 0 to 300.

<sup>2</sup>*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>3</sup>*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>4</sup>*Advanced* signifies superior performance for a given grade.

<sup>5</sup>Advanced economics includes Advanced Placement, International Baccalaureate, and honors courses.

NOTE: Includes public and private schools. Excludes persons unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' economics proficiency). Detail may not sum to totals due to rounding. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

—Not available.

†Not applicable.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Scale ranges from 0 to 500. A score of 150 implies the knowledge of some basic addition and subtraction facts, and most students at this level can add two-digit numbers without regrouping. They recognize simple situations in which addition and subtraction apply. A score of 200 implies considerable understanding of two-digit numbers and knowledge of some basic multiplication and division facts. A score of 250 implies an initial understanding of the four basic operations. Students at this level can also compare information from graphs and charts and are developing an ability to analyze simple logical relations. A score of 300 implies an ability to compute decimals, simple fractions, and percents. Students

at this level can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. A score of 350 implies an ability to apply a range of reasoning skills to solve multistep problems. Students at this level can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Some data have been revised from previously published figures. Standard errors appear in parentheses.

—Not available.

†Not applicable.

#Rounds to zero.

‡Reporting standards not met.

<sup>1</sup>Virtually no students were able to perform multistep problems and algebra.

<sup>2</sup>Virtually all students knew simple arithmetic facts.

<sup>3</sup>Scale score of 150 or above.

<sup>4</sup>Scale score of 200 or above.

<sup>5</sup>Scale score of 250 or above.

<sup>6</sup>Scale score of 300 or above.

<sup>7</sup>Scale score of 350 or above.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

†Not applicable.

#Rounds to zero.

‡Reporting standards not met.

<sup>1</sup>Includes Asians/Pacific Islanders and American Indians/Alaska Natives.

NOTE: Score level 200 indicates ability to perform simple additive reasoning and problem solving. Score level 250 indicates ability to perform simple multiplicative reasoning and two-step problem solving. Score level 300 indicates ability to perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Score level 350 indicates ability to perform reasoning and problem solving involving geom-

etry, algebra, and beginning statistics and probability. Scale ranges from 0 to 500. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Scale ranges from 0 to 500.

<sup>2</sup>Basic denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 4th-grade level.

<sup>3</sup>Proficient represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>4</sup>Advanced signifies superior performance.

<sup>5</sup>Percentage of students who report spending 30 minutes, 45 minutes, 1 hour, and over 1 hour on mathematics homework each day.

<sup>6</sup>Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

<sup>7</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic

and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

<sup>8</sup>Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.

NOTE: With the exception of 1992, includes students for whom accommodations were permitted. Excludes students unable to be tested (even with accommodations) due to limited proficiency in English or due to a disability. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Scale ranges from 0 to 500.

<sup>2</sup>Excludes students who responded "I don't know" to the question about educational level of parents.

<sup>3</sup>*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 8th-grade level.

<sup>4</sup>*Proficient* represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>5</sup>*Advanced* signifies superior performance.

<sup>6</sup>Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

<sup>7</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

<sup>8</sup>Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Data for 2000, 2003, 2005, and 2007 include students for whom accommodations were permitted. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

<sup>1</sup>Scale ranges from 0 to 500.

NOTE: Includes public and private schools. Includes students for whom accommodations were permitted. Excludes students unable to be tested (even with accommodations) due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted on the 1996 science assessment.<sup>2</sup>The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.<sup>3</sup>*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.<sup>4</sup>*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.<sup>5</sup>*Advanced* signifies superior performance.

NOTE: The NAEP science scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Accommodations were not permitted for this assessment.

<sup>2</sup>Did not satisfy one or more of the guidelines for school participation in 1996. Data are subject to appreciable nonresponse bias.

<sup>3</sup>Significantly different from 2005 when only one jurisdiction or the nation is being examined.

<sup>4</sup>Did not satisfy one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

<sup>5</sup>Before 2005, Department of Defense domestic and overseas schools were separate jurisdictions in NAEP. Data for 1996 and 2000 were recalculated for comparability.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability (if sample not tested with accommodations or if the accommodations provided in 2000 and 2005 were not sufficient to enable the test to properly reflect the students' science proficiency). Scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Some data have been revised from previously published figures.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section. The writing section was introduced in March 2005.

<sup>1</sup>Data for 1966–67 to 1985–86 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1986–87 to 1994–95, individual student scores were converted to the recentered scale and then the mean was recomputed. For 1995–96 to 1998–99, nearly all students received scores on the recentered scale; any score on the original scale was converted to the recentered scale prior to recomputing the mean. From 1999–2000 on, all scores have been reported on the recentered scale.

<sup>2</sup>Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

NOTE: Data for 1966–67 through 1970–71 are estimates derived from the test scores of all participants. Data for 1971–72 and later are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section. †Not applicable.

#Rounds to zero.

‡Reporting standards not met.

<sup>1</sup>Prior to 2006, the critical reading section was known as the verbal section.

<sup>2</sup>Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

<sup>3</sup>Beginning in 2005–06, the College Board has reported third, fourth, and fifth quintiles as the bottom three quintiles instead of reporting them separately as in previous years.

<sup>4</sup>Data may not be comparable over time because of additions to the list of majors and changes in subspecialties within majors.

<sup>5</sup>Home economics was changed to Family and consumer sciences/human sciences as of 2006–07.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. Detail may not sum to totals because of rounding and survey item nonresponse.

<sup>1</sup>Participation rate is based on the projection of high school graduates by the Western Interstate Commission for Higher Education (WICHE), and the number of seniors who took the SAT in each state.

<sup>2</sup>Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

<sup>3</sup>Participation rate is based on self-reported 12th-grade enrollment from D.C.'s public and nonpublic schools because WICHE estimated fewer graduating seniors than actual SAT test takers.

<sup>4</sup>Beginning with the spring SAT administration in 2006, all Maine high school juniors, including all students in their third year of high school, are required to take SAT tests in critical reading, writing, and mathematics.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section.

<sup>1</sup>Includes general labor market preparation, consumer and homemaking education, and occupational education in agriculture, business, marketing, health, occupational home economics, trade and industry, and technical courses.

<sup>2</sup>Includes general skills, personal health and physical education, religion, military sciences, special education, and other courses not included in other subject fields.

<sup>3</sup>Though shown separately here, computer-related courses are also included in the mathematics and career/technical categories.

<sup>4</sup>Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any occupational education field.

<sup>5</sup>Includes students who complete at least 3 Carnegie units in an occupational education field, but less than 12 Carnegie units in academic courses.

<sup>6</sup>Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in an occupational education field.

<sup>7</sup>Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in an occupational education field.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. SOURCE: U.S. Department of Education, National Center for Education Statistics, High School and Beyond Longitudinal Study of 1980 Sophomores (HS&B-So:80/82), "High School Transcript Study"; and 1987, 1990, 1994, 1998, 2000, and 2005 High School Transcript Study (HSTS). (This table was prepared January 2007.)

**Table 148. Average number of Carnegie units earned by public high school graduates in career/technical education courses, by selected student characteristics: Selected years, 1982 through 2005**

Graduation year and selected student characteristic	Total	General labor market preparation	Consumer and homemaking education	Occupational education field									
				Total <sup>1</sup>	Agriculture	Business	Marketing	Health	Occupational home economics	Trade and industrial	Technical/communications	Other

#Rounds to zero.

<sup>1</sup>Includes unclassified courses not shown separately.

<sup>2</sup>Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any occupational education field.

<sup>3</sup>Includes students who complete at least 3 Carnegie units in an occupational education field, but less than 12 Carnegie units in academic courses.

<sup>4</sup>Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in an occupational education field.

<sup>5</sup>Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in an occupational education field.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

<sup>1</sup>These data only report the percentage of students who earned the indicated credit (0.5 = one semester; 1.0 = one academic year) in each course while in high school and do not count those students who took these courses prior to entering high school.

<sup>2</sup>Excludes pre-algebra.

<sup>3</sup>Includes algebra/trigonometry and algebra/geometry.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria.

Some data have been revised from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

<sup>1</sup>Level 1 = no math; Level 2 = basic math/prealgebra; Level 3 = core secondary through algebra II; Level 4 = trigonometry, statistics, precalculus; and Level 5 = calculus.<sup>2</sup>Level 1 = no science; Level 2 = primary physical science; Level 3 = secondary physical science and basic biology; Level 4 = general biology; Level 5 = chemistry I or physics I; Level 6 = chemistry I and physics I; Level 7 = chemistry II or physics II or advanced biology; Level 8 = both Levels 6 and 7.<sup>3</sup>Race categories exclude persons of Hispanic ethnicity.<sup>4</sup>The first language students learned to speak when they were children.<sup>5</sup>Transfer students were classified as "mixed" if their base-year school and their transfer school were in different categories (e.g., a Catholic school student who transferred to a public school or a student who transferred from an urban to a rural school).<sup>6</sup>Region is defined by the U.S. Census Bureau based on the state in which the school is located.

NOTE: Highest mathematics and science courses taken are based on a taxonomy of course types for which the student received a nonzero credit while in high school. Detail may not sum to totals because of rounding. The academic year extended from September 1, 2003, to August 31, 2004. Standard errors appear in parentheses.

†Not applicable.

#Rounds to zero.

!Interpret data with caution.

‡Reporting standards not met.

<sup>1</sup>Enrollments may include duplicated counts of students in each type of course, since schools were instructed to count a student enrolled in multiple courses of a particular type for each course in which he or she was enrolled.

<sup>2</sup>Excludes schools not reporting minority enrollment.

NOTE: Data were collected during the 2002–03 12-month school year. Dual credit courses are those in which high school students can earn both high school and postsecondary credits for the same course. Percentages are based on unrounded numbers. Detail may not sum to totals because of rounding or missing data. Standard errors appear in parentheses.

<sup>1</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quartile; the "middle" SES group is the middle two quartiles; and the "high" SES group is the upper quartile.

<sup>2</sup>Question does not specify where computer is used.

NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

<sup>1</sup>Interscholastic refers to competition between teams from different schools. Intramural refers to competition between teams or students within the same school. Data on these categories are available only for 2002.

<sup>2</sup>Composite test performance quartile on mathematics, reading, science, and social studies in 1990 and composite test performance quartile on mathematics, reading, and science in 2002.

<sup>3</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

— Not available.

†Not applicable.

‡Reporting standards not met.

!Interpret data with caution.

<sup>1</sup>Refers to one or more parent or other household adult. Only includes students who had homework outside of school.

NOTE: Includes children enrolled in kindergarten through grade 12 and ungraded students. Data based on responses of the parent most knowledgeable about the student's education. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Totals include data for other racial/ethnic groups not separately shown.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Survey Program (PFI-NHES:2003 and 2007). (This table was prepared June 2008.)

<sup>1</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quarter; the "middle" SES group is the middle two quarters; and the "high" SES group is the upper quarter.

NOTE: Race categories exclude persons of Hispanic ethnicity. Data for 2002 for persons reporting more than one race are not shown separately, but are included in totals. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

#Rounds to zero.

!Interpret data with caution.

‡Reporting standards not met.

<sup>1</sup>Excludes the 2 percent of schools for which race/ethnicity data were missing. For this reason, the detailed results do not sum to the totals.<sup>2</sup>Violent incidents include serious violent incidents (i.e., rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon) plus physical attack or fight without a weapon and threat of physical attack without a weapon.<sup>3</sup>Serious violent incidents include rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.<sup>4</sup>Rape was defined for respondents as “forced sexual intercourse (vaginal, anal, or oral penetration). This includes penetration from a foreign object.”<sup>5</sup>Sexual battery was defined for respondents as an “incident that includes threatened rape, fondling, indecent liberties, child molestation, or sodomy.”<sup>6</sup>Physical attack or fight was defined for respondents as an “actual and intentional touching or striking of another person against his or her will, or the intentional causing of bodily harm to an individual.”<sup>7</sup>Weapon was defined for respondents as “any instrument or object used with the intent to threaten, injure, or kill. Includes look-alikes if they are used to threaten others.”<sup>8</sup>Robbery was defined for respondents as “the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theft/larceny is that robbery involves a threat or battery.”<sup>9</sup>Theft/larceny (taking things over \$10 without personal confrontation) was defined for respondents as “the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. Included are pocket picking, steal-

ing purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts.”

<sup>10</sup>Other incidents include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; and vandalism.<sup>11</sup>Firearm/explosive device was defined as “any weapon that is designed to (or may readily be converted to) expel a projectile by the action of an explosive. This includes guns, bombs, grenades, mines, rockets, missiles, pipe bombs, or similar devices designed to explode and capable of causing bodily harm or property damage.”<sup>12</sup>Vandalism was defined for respondents as “the willful damage or destruction of school property including bombing, arson, graffiti, and other acts that cause property damage. Includes damage caused by computer hacking.”

NOTE: Either the school principal or the person most knowledgeable about discipline issues at school completed the SSOCs questionnaire. If the respondent did not provide a value for the total number of specified incidents at the school, the value was imputed to equal the number of specified incidents reported to police. Values associated with violent incidents, serious violent incidents, total incidents, and other incidents were obtained by adding the post-imputed values that comprise each of the preceding composite variables. All public schools include primary schools, middle schools, high schools, and combined schools. The population counts on SSOCs 2000 and 2006 exclude all schools in outlying U.S. territories; nonregular schools such as special education, vocational, alternative/other, and ungraded schools; and schools with a high grade of kindergarten or lower. “At school/at your school” was defined for respondents as including activities happening in school buildings, on school grounds, on school buses, and at places that are holding school-sponsored events or activities. Respondents were instructed to, unless the survey specified otherwise, only respond for those times that were during normal school hours or when school activities/events were in session. Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met.

<sup>1</sup>Access to buildings is controlled during school hours (e.g., by locked or monitored doors).

<sup>2</sup>Access to grounds is controlled during school hours (e.g., by locked or monitored gates).

<sup>3</sup>All students must pass through a metal detector each day.

<sup>4</sup>All or most students are required to stay on school grounds during lunch.

<sup>5</sup>Elementary schools have grade 6 or below, with no grade higher than 8; secondary schools have no grade lower than 7; and combined schools have grades lower than 7 and higher than 8.

NOTE: Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

#Rounds to zero.

!Interpret data with caution.

<sup>1</sup>A student is counted only once, even if suspended more than once during the same school year.

<sup>2</sup>Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

#Rounds to zero.

‡Reporting standards not met.

<sup>1</sup>Includes other illegal drug use not shown separately.

NOTE: Marijuana includes hashish usage for 1996 and later years. Due to changes in the survey instrument and administration and to improve comparability with new data, estimates for 1982 through 1993 have been adjusted and may differ from those reported in

previous years. Data for 1999 have been revised from previously published figures. Data for 1999 and later years were gathered using Computer Assisted Interviewing (CAI) and may not be directly comparable to previous years. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

†Not applicable.

<sup>1</sup>Survey question changed in 1993; later data are not comparable to figures for earlier years.

<sup>2</sup>Other illicit drugs include any use of LSD or other hallucinogens, crack or other cocaine, or heroin, or any use of other narcotics, amphetamines, barbiturates, or tranquilizers not under a doctor's orders.

NOTE: Standard errors appear in parentheses. Standard errors were calculated from formulas to perform trend analysis over an interval greater than 1 year (for example, a comparison between 1975 and 1990). A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of nonprescription stimulants. This slightly reduced the positive responses for some types of drug abuse.

X State has policy.

—Not available.

<sup>1</sup>Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first.<sup>2</sup>Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal with or without meeting conditions for a diploma or equivalency.<sup>3</sup>State requires districts with full-day programs to offer half-day programs.<sup>4</sup>Districts may apply for exemptions from the requirement.<sup>5</sup>Parent/guardian may request a waiver to delay entry to a later age per state law/regulation.<sup>6</sup>Under 21 or until child graduates from high school.<sup>7</sup>Full-day requirement becomes effective upon each district's confirming vote and upon specific funding appropriation by the General Assembly.<sup>8</sup>State did not participate in the 2006 online survey.<sup>9</sup>Attendance is compulsory until age 18 for Manatee County students, unless they earn a high school diploma prior to reaching their 18th birthday.<sup>10</sup>To be determined by rules and regulations adopted by the state board.<sup>11</sup>Must be 5 before October 1, and not 20 before start of school year.<sup>12</sup>State requires a "program," not necessarily a traditional kindergarten program.<sup>13</sup>Compulsory attendance age becomes 18 effective July 1, 2009.<sup>14</sup>Abbott districts only (31). These are districts covered by New Jersey Supreme Court rulings requiring the state to implement comprehensive programs and reforms to improve the education of students in the poorest schools.<sup>15</sup>School-age unless otherwise provided by law.<sup>16</sup>New York City and Buffalo require school attendance until age 17 unless employed.<sup>17</sup>Must not be 21 by September 1.<sup>18</sup>Children from birth through age 2 are eligible for additional services. Eligibility for special education services ceases upon completion of a secondary education program; no age limit.<sup>19</sup>Beginning in 2011–12, with the option for districts to transfer intradistrict, interdistrict, or to a licensed child care provider.<sup>20</sup>Compulsory leaving age becomes 18 effective July 1, 2009; compulsory entry age becomes 5 effective July 1, 2010.<sup>21</sup>Student may complete school year if 21st birthday occurs while attending school.<sup>22</sup>Districts are required to provide full-day kindergarten for low-income students.

NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children.

†Not applicable.

X Denotes that the state has a policy. A blank denotes that the state does not have a policy.

<sup>1</sup>1994 data.

<sup>2</sup>No statewide policy; varies by district.

<sup>3</sup>1996 data.

<sup>4</sup>1998 data.

<sup>5</sup>Has state standards, but no policy of state recommendation or selection.

NOTE: Some states allow for different types of school calendars by setting instruction time in both days and hours, while others use only days or only hours. For states in which the number of days or hours varies by grade, the relevant grade(s) appear in parentheses.

X State has a test.

<sup>1</sup>Off-the-shelf/norm-referenced tests (NRTs) are commercially developed tests that have not been modified to reflect state content standards.

<sup>2</sup>Custom-developed criterion-referenced tests (CRTs) are explicitly designed to measure state content standards.

<sup>3</sup>Augmented or hybrid tests incorporate elements of both NRTs and CRTs. These tests include NRTs that have been augmented or modified to reflect state standards.

NOTE: ES = elementary school, MS = middle school, and HS = high school.

X State has program.

<sup>1</sup>Testing program is for instructional purposes.

<sup>2</sup>Testing program is for the purpose of student accountability.

<sup>3</sup>Testing program is for school accountability.

<sup>4</sup>Inclusion is voluntary for students, schools, or school districts for one or more grades.

<sup>5</sup>Endorsed diploma.

<sup>6</sup>Honors diploma.

<sup>7</sup>A sample of students is tested for one or more grades.

<sup>8</sup>High school skills guarantee.

#Rounds to zero.

<sup>1</sup>Includes a relatively small amount from nongovernmental private sources (gifts and tuition and transportation fees from patrons). These sources accounted for 2.2 percent of total revenues in 2005–06.

<sup>2</sup>Revised from previously published figures.

NOTE: Beginning in 1980–81, revenues for state education agencies are excluded. Beginning in 1988–89, data reflect new survey collection procedures and may not be entirely comparable with figures for earlier years. With the exception of federal revenue per student,

data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States, 1919–20 through 1955–56; Statistics of State School Systems, 1957–58 through 1969–70; Revenues and Expenditures for Public Elementary and Secondary Education, 1970–71 through 1986–87; and Common Core of Data (CCD), "National Public Education Financial Survey," 1987–88 through 2005–06.* (This table was prepared April 2008.)

—Not available.

<sup>1</sup>Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services.

<sup>2</sup>Includes expenditures for summer schools, adult education, community colleges, and community services.

<sup>3</sup>Prior to 1969–70, excludes capital outlay by state and local school housing authorities.

<sup>4</sup>Plant operation also includes plant maintenance.

<sup>5</sup>Data not comparable to figures prior to 1989–90.

<sup>6</sup>Data have been revised from previously published figures.

NOTE: Beginning in 1959–60, includes Alaska and Hawaii. Beginning in 1989–90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989–90, extensive changes were made in the data collection procedures. Detail may not sum to totals because of rounding.

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>2</sup>Excludes capital outlay for years through 1979–80, and 1989–90 to the latest year. From 1980–81 to 1988–89 total transportation figures include capital outlay.

<sup>3</sup>Estimate based on data appearing in January issues of *School Bus Fleet*.

<sup>4</sup>Estimate based on data reported by *School Transportation News*.

NOTE: Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1929–30 through 1975–76; Revenues and Expenditures for Public Elementary and Secondary Education, 1977–78 and 1979–80; Common Core of Data (CCD), "National Public Education Financial Survey," 1987–88 through 2005–06; Bobit Publishing Co., School Bus Fleet, "School Transportation: 2000–2001 School Year"; School Transportation News, "K–12 Enrollment/Transportation Data," 2001–02 through 2006–07; and unpublished data. (This table was prepared August 2008.)*

**Table 176. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2005–06**

<sup>1</sup>Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

<sup>2</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

<sup>3</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

<sup>4</sup>Includes expenditures for health, attendance, and speech pathology services.

<sup>5</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2005–06. (This table was prepared April 2008.)

—Not available.

<sup>1</sup>Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

<sup>2</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

<sup>3</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

<sup>4</sup>Includes expenditures for health, attendance, and speech pathology services.

<sup>5</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Data have been revised from previously published figures.<sup>2</sup>Includes estimated data for subfunctions of food services and enterprise operations.<sup>3</sup>Includes expenditures for guidance, health, attendance, and speech pathology services.<sup>4</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.<sup>5</sup>Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.<sup>6</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Includes very small amounts for direct program support made by state education agencies for local school districts.<sup>7</sup>Includes expenditures for property, and for buildings and alterations completed by school district staff or contractors.

NOTE: Excludes expenditures for state education agencies. Data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Data for 1919–20 to 1953–54 are based on school-year enrollment.

<sup>2</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>3</sup>Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per student at public schools.

<sup>4</sup>Estimated.

NOTE: Beginning in 1980–81, state administration expenditures are excluded from both "total" and "current" expenditures. Current expenditures include instruction, student support

services, food services, and enterprise operations. Total expenditures include current expenditures, capital outlay, and interest on debt. Beginning in 1988–89, extensive changes were made in the data collection procedures. Some data have been revised from previously published figures.

<sup>1</sup>Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public schools.

<sup>2</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

<sup>3</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

<sup>4</sup>Includes expenditures for health, attendance, and speech pathology services.

<sup>5</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than \$0.50. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public schools.

<sup>2</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

<sup>3</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

<sup>4</sup>Includes expenditures for health, attendance, and speech pathology services.

<sup>5</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than \$0.50. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2004–05. (This table was prepared April 2008.)

**Table 184. Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2005–06**

<sup>1</sup>Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Expenditures for state administration are excluded in all years except 1969–70 and 1979–80. Beginning in 1989–90, survey was expanded and coverage of state expenditures

for public school districts was improved. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1969–70; Revenues and Expenditures for Public Elementary and Secondary Schools, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2005–06.* (This table was prepared April 2008.)

<sup>1</sup>Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.<sup>2</sup>Estimated by the National Center for Education Statistics.

NOTE: State administration expenditures are excluded in all years except 1959–60, 1969–70, and 1979–80. Beginning in 1989–90, extensive changes were made in the data

collection procedures. There are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1959–60 and 1969–70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2005–06.* (This table was prepared April 2008.)

## CHAPTER 3

# Postsecondary Education

Postsecondary education includes an array of diverse educational experiences offered by American colleges and universities, and technical and vocational institutions. For example, a community college may offer vocational training or the first 2 years of training at the college level. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs that are designed to prepare students for specific careers. Community groups, religious organizations, libraries, and businesses provide other types of educational opportunities for adults.

This chapter provides an overview of the latest statistics on postsecondary education, which includes academic, vocational, and continuing professional education programs after high school. However, to maintain comparability over time, most of the data in the *Digest* are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in the Title IV federal financial aid programs.<sup>1</sup> Degree-granting institutions include almost all 2- and 4-year colleges and universities; they exclude institutions offering only vocational programs of less than 2 years' duration and continuing education programs. The degree-granting institution classification is very similar to the higher education institution classification that the National Center for Education Statistics (NCES) used prior to 1996–97.<sup>2</sup> This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for

college graduates is shown in chapter 5. Chapter 7 contains data on college libraries and use of computers by young adults. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes.

## Enrollment

Enrollment in degree-granting institutions increased by 14 percent between 1987 and 1997 (table 188 and figure 11). Between 1997 and 2007, enrollment increased at a faster rate (26 percent), from 14.5 million to 18.2 million. Much of the growth between 1997 and 2007 was in full-time enrollment; the number of full-time students rose 34 percent, while the number of part-time students rose 15 percent. During the same time period, the number of females rose 29 percent, compared to an increase of 22 percent in the number of males. Enrollment increases can be affected both by population growth and by rising rates of enrollment. Between 1997 and 2007, the number of 18- to 24-year-olds increased from 25.5 million to 29.5 million, an increase of 16 percent (table 15), and the percentage of 18- to 24-year-olds enrolled in college remained relatively stable (37 percent in 1997 and 39 percent in 2007) (table 204). In addition to the enrollment in accredited 2-year colleges, 4-year colleges, and universities, about 447,000 students attended non-degree-granting, Title IV eligible, postsecondary institutions in fall 2006 (table 186).

The number of young students has been growing more rapidly than the number of older students, but this pattern is expected to shift (table 190 and figure 13). Between 1995 and 2006, the enrollment of students under age 25 increased by 33 percent. Enrollment of people 25 and over rose by 13 percent during the same period. From 2006 to 2017, NCES projects a rise of 10 percent in enrollments of people under 25, and a rise of 19 percent in enrollments of people 25 and over.

Enrollment trends have differed at the undergraduate, graduate, and first-professional levels. Undergraduate enrollment generally increased during the 1970s, but dipped from 10.8 million to 10.6 million between 1983 and 1985 (table 205). From 1985 to 1992, undergraduate enrollment increased each year, rising 18 percent before declining 2 percent and stabilizing between 1993 and 1996. Undergraduate enrollment rose 25 percent between 1997 and 2007. Graduate enrollment had been steady at about 1.3 million in the late 1970s and early 1980s, but rose about 67 percent between 1985 and 2007

<sup>1</sup> Title IV programs, which are administered by the U.S. Department of Education, provide financial aid to postsecondary students.

<sup>2</sup> Included among degree-granting institutions are some institutions (primarily 2-year colleges) that were not previously designated as higher education institutions. Excluded from degree-granting institutions are a few institutions that were previously designated as higher education institutions even though they did not award an associate's or higher degree. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. Institutions of higher education offered courses that led to an associate's or higher degree, or were accepted for credit towards a degree.

(table 206). After rising 60 percent between 1970 and 1980, enrollment in first-professional programs stabilized in the 1980s (table 207). First-professional enrollment began rising again in the 1990s and showed an increase of 18 percent between 1997 and 2007.

Since 1984, the number of females in graduate schools has exceeded the number of males (table 206). Between 1997 and 2007, the number of male full-time graduate students increased by 32 percent, compared to a 63 percent increase for female graduate students. Among part-time graduate students, the number of males increased by 10 percent and the number of females increased by 23 percent.

The percentage of American college students who are minorities has been increasing. In 1976, 15 percent were minorities, compared with 32 percent in 2007 (table 226). Much of the change from 1976 to 2007 can be attributed to rising numbers of Hispanic and Asian or Pacific Islander students. During that time period, the percentage of Asian or Pacific Islander students rose from 2 percent to 7 percent and the Hispanic percentage rose from 4 percent to 11 percent. The percentage of Black students was 9 percent at the beginning of the time period and it fluctuated during the early part of the period before rising to 13 percent in 2007. Nonresident aliens for whom race/ethnicity is not reported made up 3 percent of the total enrollment in 2007.

Despite the sizable numbers of small degree-granting colleges, most students attend the larger colleges and universities. In fall 2006, 41 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 4 percent of college students (table 234). While 12 percent of the campuses enrolled 10,000 or more students, they accounted for 55 percent of total college enrollment.

In 2006, the five colleges with the highest enrollment were University of Phoenix Online Campus, with 165,373 students; Ohio State University, with 51,818 students; Miami-Dade College, with 51,329 students; Arizona State University at the Tempe Campus, with 51,234 students; and the University of Florida, with 50,912 students (table 236).

## Faculty, Staff, and Salaries

Approximately 3.6 million people were employed in colleges and universities in the fall of 2007, including 2.6 million professional and 0.9 million nonprofessional staff (table 245). In the fall of 2007, there were 1.4 million faculty members in degree-granting institutions, including 0.7 million full-time and 0.7 million part-time faculty. The proportion of executive, administrative, and managerial staff was 6 percent in 2007, compared to 5 percent in 1976 (table 244). The proportion of other non-teaching professional staff rose from 10 percent in 1976 to 20 percent in 2007, while the proportion of nonprofessional staff (including technical and paraprofessional, clerical and secretarial, skilled crafts, and service and maintenance staff) declined from 42 percent to 26 percent. The full-time-equivalent (FTE) student/FTE staff ratio at colleges and universities was lower in 2007 (5.0) than in 1976 (5.4). The FTE student/FTE faculty ratio declined from 16.6 in 1976 to 14.9 in 2007.

Colleges differ in their practices of employing part-time and full-time staff. In fall 2007, 48 percent of the employees at public 2-year colleges were employed full time, compared with 68 percent at public 4-year colleges and universities, 67 percent at private 4-year colleges and universities, and 66 percent at private 2-year colleges (table 245). A higher percentage of the faculty at public 4-year colleges and universities were employed full time (68 percent) than at private 4-year colleges and universities (48 percent), private 2-year colleges (46 percent), or public 2-year colleges (31 percent). In general, the number of full-time staff has been growing at a slower rate than the number of part-time staff (table 243). Between 1997 and 2007, the number of full-time staff increased by 25 percent compared to an increase of 39 percent in the number of part-time staff. Most of the increase in the part-time staff was due to the increase in the number of part-time faculty (59 percent) and instruction and research assistants (48 percent) during this time period.

In fall 2007, minorities made up 17 percent of U.S. faculty (based on a total faculty count excluding persons whose race/ethnicity was unknown) (table 246). Seven percent of the faculty were Black, 6 percent were Asian/Pacific Islander, 4 percent were Hispanic, and 1 percent were American Indian/Alaska Native. About four-fifths of the faculty were White, with 43 percent being White males and 36 percent being White females. Minorities made up about 18 percent of executive, administrative, and managerial staff in 2007 and about 33 percent of nonprofessional staff. The proportions of minority staff at public 4-year colleges (23 percent), private 4-year colleges (22 percent), and public 2-year colleges (22 percent) were similar, with the proportion at private 2-year colleges (27 percent) being slightly higher.

On average, full-time instructional faculty and staff spent 58 percent of their time teaching in 2003 (table 250). Research and scholarship accounted for 20 percent of their time, and 22 percent was spent on other activities (administration, professional growth, etc.).

Faculty salaries generally lost purchasing power from 1972–73 to 1980–81, when average salaries for faculty on 9-month contracts declined 17 percent after adjustment for inflation (table 257). During the 1980s, average salaries rose and recouped most of the losses. Between 1997–98 and 2007–08, there was a further increase in average faculty salaries, resulting in an average of about 4 percent higher than the 1972–73 average, after adjustment for inflation. The average salary in current dollars for males in 2007–08 (\$76,935) was higher than the average for females (\$63,347). Between 1997–98 and 2007–08, the average salary for males increased by 5 percent and the average salary for females increased by 6 percent, after adjustment for inflation.

The percentage of faculty with tenure has declined in recent years. About 50 percent of full-time instructional faculty had tenure in 2005–06, compared with 56 percent in 1993–94 (table 264). A difference existed between the percentage of males and females with tenure. Fifty-five percent of males compared to 41 percent of females had tenure in 2005–06. About 52 percent of the instructional faculty at public institutions had tenure, compared to 45 percent of faculty at private not-for-profit institutions.

## Degrees

During the 2007–08 academic year, 4,352 accredited institutions offered degrees at the associate’s degree level or above (table 266). These included 2,675 4-year institutions and 1,677 2-year institutions. Institutions awarding various degrees in 2006–07 numbered 2,725 for associate’s degrees, 2,256 for bachelor’s degrees, 1,695 for master’s degrees, and 648 for doctor’s degrees (table 278).

Growing numbers of people are completing college degrees. Between 1996–97 and 2006–07, the number of associate’s, bachelor’s, master’s, first-professional, and doctor’s degrees rose (table 268). During this period, associate’s degrees increased 27 percent, bachelor’s degrees increased 30 percent, master’s degrees increased 44 percent, first-professional degrees increased 14 percent, and doctor’s degrees increased 32 percent. Since the mid-1980s, more females than males have earned associate’s, bachelor’s, and master’s degrees. In 2006–07, the number of females earning doctor’s degrees exceeded the number of males. Also, the number of females receiving all types of degrees has increased at a faster rate than the number for males. Between 1996–97 and 2006–07, the number of bachelor’s degrees awarded to males increased by 25 percent, while the number awarded to females increased by 34 percent. The number of males earning doctor’s degrees was about 11 percent higher in 2006–07 than in 1996–97, while the number of females earning doctor’s degrees rose by 62 percent.

Of the 1,524,000 bachelor’s degrees conferred in 2006–07, the largest numbers of degrees were conferred in the fields of business (328,000), social sciences and history (164,000), education (106,000), and health sciences (102,000) (table 271). At the master’s degree level, the largest numbers of degrees were in the fields of education (177,000) and business (150,000) (table 272). The fields with the largest number of degrees at the doctor’s degree level were health professions and related clinical sciences (8,400), education (8,300), engineering (8,100), biological and biomedical sciences (6,400), psychology (5,200), and physical sciences (4,800) (table 273).

In recent years, the numbers of bachelor’s degrees conferred have followed patterns that differed significantly by field of study. While the number of degrees increased 30 percent overall between 1996–97 and 2006–07, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 271). The number of bachelor’s degrees conferred in the combined fields of engineering and engineering technologies declined 1 percent between 1996–97 and 2001–02, but then rose 10 percent between 2001–02 and 2006–07 (table 271 and figure 15). The number of engineering and engineering technologies degrees conferred in 2006–07 was about 8 percent higher than the number conferred in 1996–97. The number of degrees in the health professions declined by 17 percent between 1996–97 and 2001–02, but then rose 40 percent between 2001–02 and 2006–07. Similarly, the number of degrees in biological sciences decreased 7 percent between 1996–97 and 2001–02, but then increased 26 percent between

2001–02 and 2006–07; and the number in the physical sciences declined by 9 percent between 1996–97 and 2001–02, but increased 18 percent between 2001–02 and 2006–07. Some technical fields experienced a contrasting pattern. After an increase of 98 percent between 1996–97 and 2001–02, the number of degrees in computer and information sciences decreased 16 percent between 2001–02 and 2006–07. Other fields with sizable numbers of degrees (over 5,000) that showed increases of over 30 percent between 2001–02 and 2006–07 included security and protective services (54 percent); parks, recreation, and leisure studies (45 percent); and transportation and materials moving (41 percent).

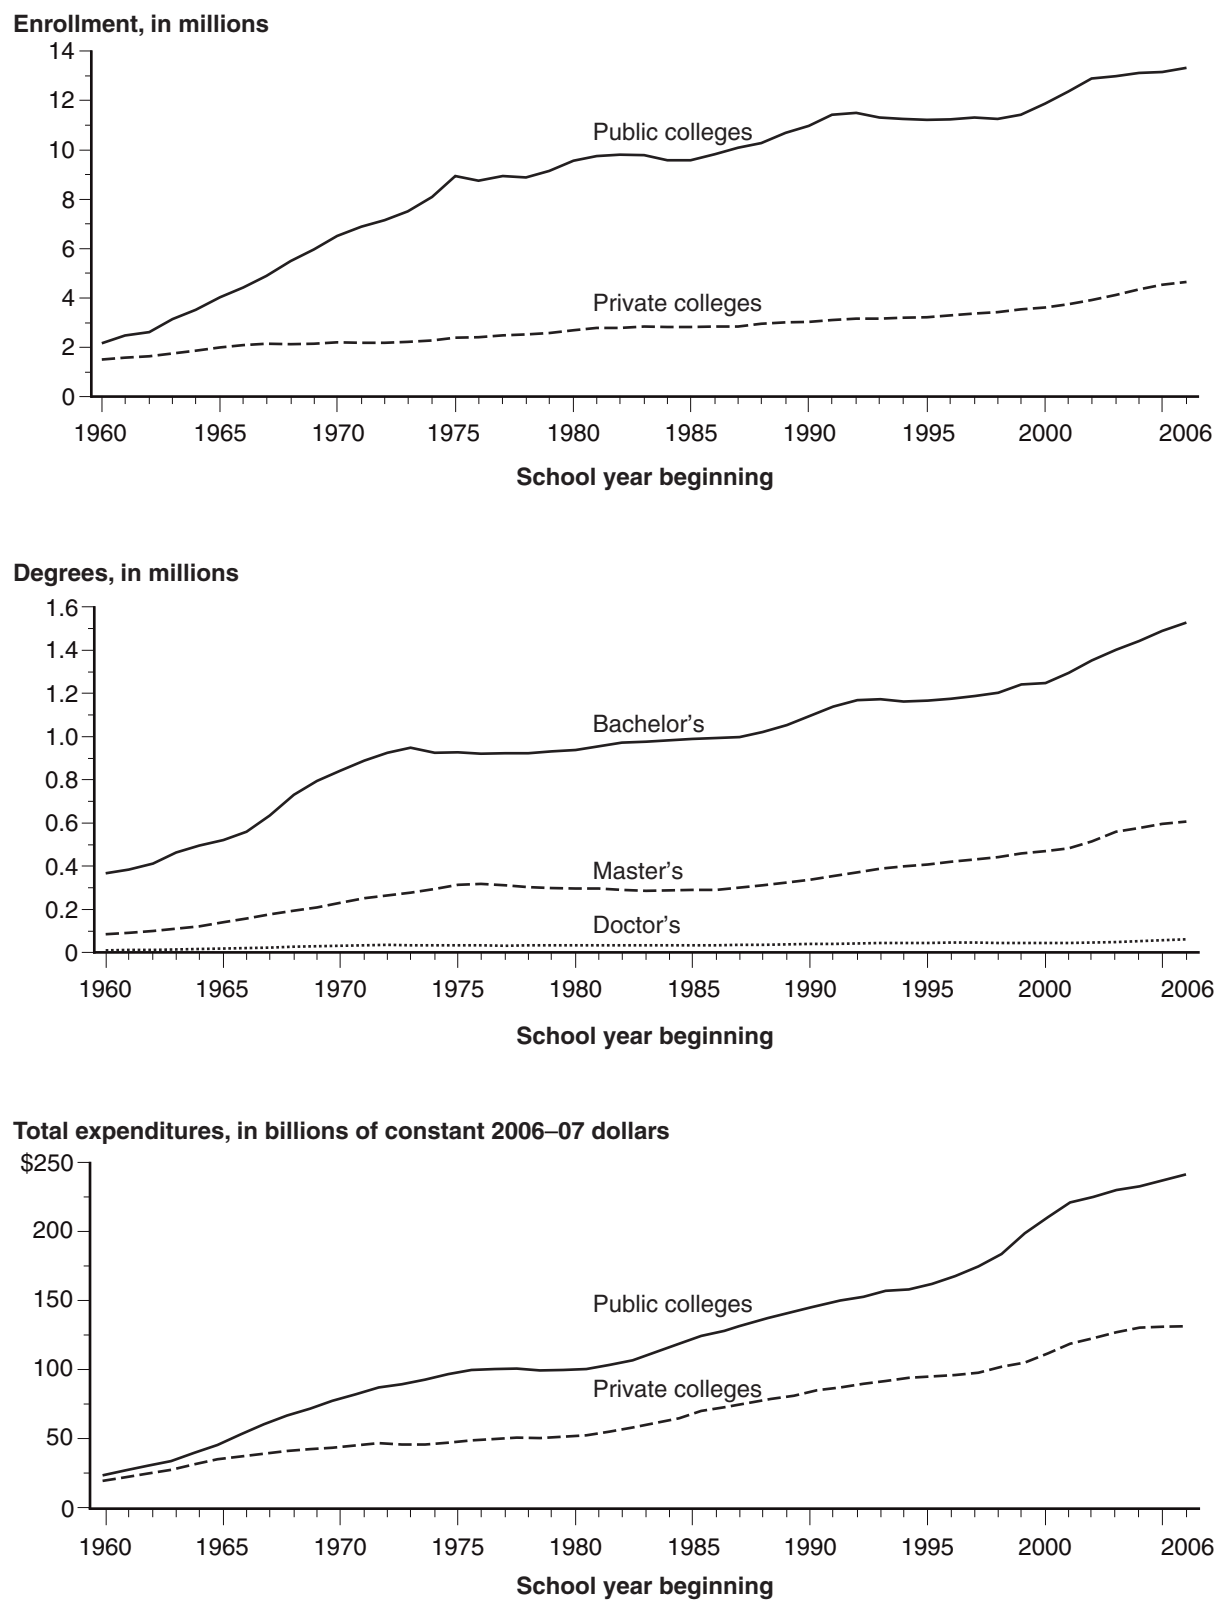

Fifty-eight percent of the students who enrolled in a 4-year college or university as first-time freshmen in 1995–96 had completed a bachelor’s degree by 2001 (table 329). About 7 percent of students had completed a certificate or associate’s degree, 14 percent were still enrolled without having received a degree, and 21 percent were no longer working toward a bachelor’s degree.

## Finances

For the 2007–08 academic year, annual prices for undergraduate tuition, room, and board were estimated to be \$11,164 at public institutions and \$28,846 at private institutions (table 331). Between 1997–98 and 2007–08, prices for undergraduate tuition, room, and board at public institutions rose by 30 percent, and prices at private institutions rose by 23 percent, after adjustment for inflation.

In 2005–06, average total expenditures per full-time-equivalent (FTE) student at public degree-granting colleges were \$24,126 (table 362). This total reflects an increase of about 2 percent between 2003–04 and 2005–06, after adjustment for inflation. In 2005–06, public 4-year colleges had average total expenditures per FTE student of \$32,483, compared to \$11,053 at public 2-year colleges. At private not-for-profit colleges, total expenditures per FTE student rose 15 percent between 1996–97 and 2005–06, after adjustment for inflation (table 364). In 2005–06, total expenditures per FTE student at private not-for-profit colleges were \$40,156, with an average of \$40,394 at 4-year colleges and \$18,240 at 2-year colleges. The expenditures per FTE student at for-profit institutions were \$11,336 in 2005–06, which was about 3 percent lower than in 1998–99, after adjustment for inflation (table 366). The difference between average expenditures per FTE student at for-profit 4-year colleges (\$10,897) and for-profit 2-year colleges (\$12,558) was relatively small compared to the differences at 2-year versus 4-year public and private not-for-profit colleges.

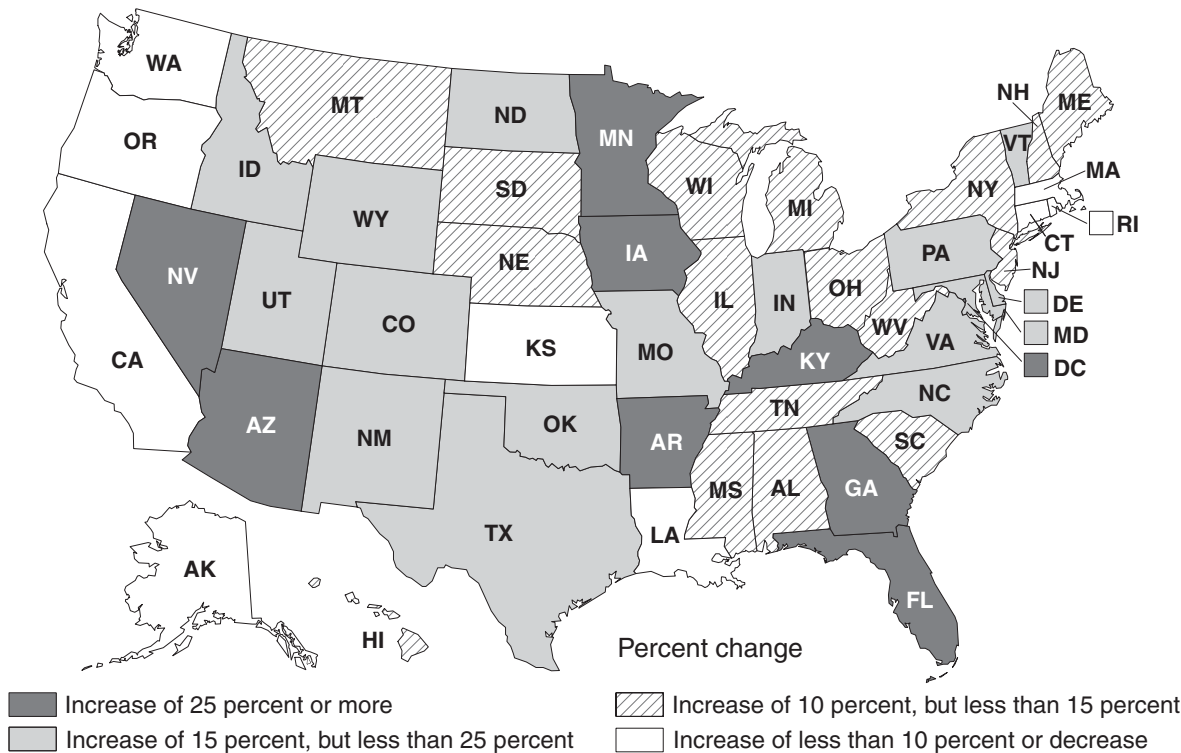

As of June 30, 2007, the market value of the endowment funds of the 120 colleges and universities with the largest endowment amounts was \$322 billion, reflecting an increase of 18 percent compared to 2006, after adjustment for inflation (tables 31 and 359). The five colleges with the largest endowments in 2007 were Harvard University, Yale University, Stanford University, Princeton University, and University of Texas System.

†Not applicable.

<sup>1</sup>Includes degree-granting and non-degree-granting institutions.

<sup>2</sup>Data are for degree-granting institutions, which grant associate's or higher degrees and participate in Title IV federal financial aid programs.

<sup>3</sup>Data are for institutions that did not offer accredited 4-year or 2-year degree programs, but were participating in Title IV federal financial aid programs. Includes some schools with nonaccredited degree programs.

—Not available.

<sup>1</sup>Prior to 1979–80, excludes branch campuses.<sup>2</sup>Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year.<sup>3</sup>Estimated.<sup>4</sup>Estimated number of senior instructional staff. Excludes graduate assistants.<sup>5</sup>Because of revised survey procedures, data may not be directly comparable with figures prior to 1989–90. Estimated number of senior instructional staff. Excludes graduate assistants.<sup>6</sup>Data for 1869–70 to 1949–50 are for resident degree-credit students who enrolled at any time during the academic year.<sup>7</sup>From 1869–70 to 1959–60, first-professional degrees are included under bachelor's degrees.<sup>8</sup>Figures for years prior to 1969–70 are not precisely comparable with later data.<sup>9</sup>Includes unexpended plant funds.<sup>10</sup>Book value. Includes other nonexpendable funds.

NOTE: Data through 1989–90 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Degree-credit enrollment only.

<sup>2</sup>Includes part-time resident students and all extension students.

<sup>3</sup>Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

<sup>4</sup>Because of imputation techniques, data are not consistent with figures for other years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is

very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States; Opening Fall Enrollment in Higher Education*, 1963 through 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1966 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86-99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

—Not available.

<sup>1</sup>Data for 2-year branch campuses of 4-year institutions are included with the 4-year institutions.<sup>2</sup>Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.<sup>3</sup>Because of imputation techniques, data are not consistent with figures for other years. NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes

more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Opening Fall Enrollment in Higher Education*, 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1966 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

**Table 190. Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2017**

NOTE: Distributions by age are estimates based on samples of the civilian noninstitutional population from the U.S. Census Bureau's Current Population Survey. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90-99), and Spring 2001 through Spring 2007; and *Projections of Education Statistics to 2017*. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1970 through 2007. (This table was prepared August 2008.)

**Table 191. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, age, and attendance status of student: 2007**

<sup>1</sup>Large increase in private 2-year institutions in 1980 is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology. NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very

Table 197. Fall enrollment and number of degree-granting institutions, by control and affiliation of institution: Selected years, 1980 through 2006

Control and affiliation	Total enrollment						Enrollment, fall 2006					Number of institutions <sup>1</sup>

—Not available.

<sup>1</sup>Counts of institutions in this table may be lower than reported in other tables, because counts in this table include only institutions reporting separate enrollment data.

<sup>2</sup>Included under "Other public."

<sup>3</sup>Religious affiliation as reported by institution.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-

granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" and "Institutional Characteristics" surveys, 1980; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90-95), "Institutional Characteristics Survey" (IPEDS-IC:90-95), and Spring 2003 through Spring 2007. (This table was prepared June 2008.)

—Not available.

<sup>1</sup>Excludes first-time freshmen in occupational programs not creditable towards a bachelor's degree.<sup>2</sup>Data for 2-year branches of 4-year college systems are aggregated with the 4-year institutions.<sup>3</sup>Because of imputation techniques, data are not consistent with figures for other years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Beginning in fall 2000, data are for first-time degree/certificate-seeking undergraduates. Alaska and Hawaii are included in all years.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States: Opening Fall Enrollment in Higher Education*, 1963 through 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1966 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86-99), and Spring 2001 through Spring 2008. (This table was prepared November 2008.)

<sup>1</sup>Individuals ages 16 to 24 who graduated from high school or completed a GED during the preceding 12 months.

<sup>2</sup>Enrollment in college as of October of each year for individuals ages 16 to 24 who completed high school during the preceding 12 months.

NOTE: Data are based on sample surveys of the civilian population. High school completion data in this table differ from figures appearing in other tables because of varying survey pro-

cedures and coverage. High school completers include GED recipients. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2007. (This table was prepared July 2008.)

**Table 201. Recent high school completers and their enrollment in college, by race/ethnicity: 1960 through 2007**

[Numbers in thousands]

Year	Number of high school completers <sup>1</sup>				Enrolled in college <sup>2</sup>								
	Total	White	Black <sup>3</sup>	Hispanic <sup>3</sup>	Total		White		Black <sup>3</sup>		Hispanic <sup>3</sup>

—Not available.

†Not applicable.

<sup>1</sup>Individuals ages 16 to 24 who graduated from high school or completed a GED during the preceding 12 months.

<sup>2</sup>Enrollment in college as of October of each year for individuals ages 16 to 24 who completed high school during the preceding 12 months.

<sup>3</sup>Due to the small sample size, data are subject to relatively large sampling errors. A 3-year moving average is an arithmetic average of the year indicated, the year immediately preceding, and the year immediately following. Moving averages are used to produce more stable estimates.

<sup>4</sup>White and Black data exclude persons identifying themselves as more than one race.

NOTE: High school completion data in this table differ from figures appearing in other tables because of varying survey procedures and coverage. High school completers include GED recipients. Race categories exclude persons of Hispanic ethnicity. Total includes persons of other racial/ethnic groups not separately shown. Standard errors appear in parentheses.

<sup>1</sup>Includes only students who were enrolled in 12th grade in fall of the school year and graduated with a diploma by the end of the following summer.  
NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Includes all schools, including combined schools, with students enrolled in the 12th grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.

†Not applicable.

<sup>1</sup>Includes students who were enrolled in college, but did not report high school completion.<sup>2</sup>White and Black data include persons of Hispanic ethnicity.<sup>3</sup>White and Black data exclude persons identifying themselves as multiracial.

NOTE: Data are based on sample surveys of the civilian noninstitutional population. Percents based on 18- to 24-year-old high school completers for 1992 and later years use a slightly different definition of completion and may not be precisely comparable

with figures for other years. All college students are counted as high school completers. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2007. (This table was prepared August 2008.)

**Table 205. Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2007**

NOTE: Data include unclassified undergraduate students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for

details.) Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1967 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86-99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1969 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86-99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

<sup>1</sup>Data for 2000 and later years reflect substantial changes in survey coverage.  
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2007. (This table was prepared May 2008.)

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2007. (This table was prepared May 2008.)

**Table 211. Total fall enrollment in all degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006**

State or jurisdiction	Fall 2005					Fall 2006

<sup>1</sup>Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology in 1980 and 1981.

<sup>2</sup>Because of imputation techniques, data are not consistent with figures for other years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures.

<sup>1</sup>Data for 2000 and later years reflect substantial change in survey coverage.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-

year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" 1980 survey; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2007. (This table was prepared June 2008.)

<sup>1</sup>Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.

<sup>2</sup>Includes students coming to U.S. colleges from foreign countries and other jurisdictions.

<sup>3</sup>Students whose residence is in the same state as the service academy.

<sup>4</sup>Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

†Not applicable.

<sup>1</sup>Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.

<sup>2</sup>Includes students coming to U.S. colleges from foreign countries and other jurisdictions.

<sup>3</sup>Students whose residence is in the same state as the service academy.

<sup>4</sup>Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students who graduated from high school in the previous 12 months and were enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, 2006 Integrated Postsecondary Education Data System (IPEDS), Spring 2007. (This table was prepared June 2008.)
