A detailed listing of the weighting classes, or cells, are contained in this appendix. Presented first are the public school, principal, and school library level adjustments. Refer to chapter 9 on weighting for a more general description of the weighting procedure.

## BIE-Funded, Public Charter, and Other Public Schools, Principals, and Libraries Nonresponse Adjustment Cells and BIE-Funded, Charter, and Other Public School Teachers List (TLF) Nonresponse Adjustment Cells

Note: For many public school adjustments, certain states are used in combination with region. These states were chosen based on their sample size and potential ability to serve in defining weighting classes. Other states not specifically broken out from their respective regions did not have enough sample to avoid collapsing according to the collapsing rules defined in chapter 9.

# Appendix T. Frame and Created Variables

Variables were classified as frame variables if they were drawn from or based on the Schools and Staffing Survey (SASS) sampling frame, which was created from the Common Core of Data (CCD) for public and BIE-funded schools and the Private School Universe Survey (PSS) for private schools. Frame variables may or may not have been used for sampling. Selected variables from these sources were included on the restricted-use data files if they provided potentially valuable information to the user that was not available on the survey.

Created variables are based on survey variables, frame variables, other created variables, or a combination of these. These variables are frequently used in National Center for Education Statistics (NCES) publications and have been added to the data files to facilitate data analysis.

The frame and created variables included on the 2007–08 SASS data files are listed below along with a brief description. The code used to produce the created variables is also detailed.

| Variable name | Description and specifications |
| --- | --- |
| AG_MSC | 2000 Decennial Census Metro Status Code; classification of the district's service area relative to a Core Based Statistical Area. Micropolitan areas are new, smaller designated metropolitan areas with populations as low as 10,000 residents. For more information on Core Based Statistical Areas see http://www.census.gov/population/www/estimates/aboutmetro.html. Origin: MSC05 from 2005–06 CCD. Categories include: <br> 1 = Primarily serves a principal city of a CBSA; <br> 2 = Serves a CBSA but not primarily its principal city; <br> 3 = Does not serve a CBSA. |
| AG_NOSC2 | Total number of schools in district, after frame school collapsing procedure. |
| AG_NOSCH | Number of schools in the district as assigned by CCD. Origin: SCH05 on 2005–06 CCD. |
| AG_ZIP | Five-digit zip code for the school district. Origin: AG_ZIP on the SASS sampling frame. |
| AGCBSA | 2000 Decennial Census Core Based Statistical Area code associated with the district's address. For more information on Core Based Statistical Areas see http://www.census.gov/population/www/estimates/aboutmetro.html. Origin: CBSA05 from 2005–06 CCD. A value in this field indicates that the district's address is associated with a recognized population nucleus and adjacent communities that have a high degree of integration with that nucleus. These areas are designated by the U.S. Government as a metropolitan or micropolitan statistical area. Micropolitan areas are new, smaller designated metropolitan areas with populations as low as 10,000 residents. If the district is not in any type of metropolitan/micropolitan statistical area, then the field is zero. |

|---|---|
| CCDIDLEA | Seven-digit NCES identification code for the district. Origin: CCDIDLEA on SASS sampling frame. Digit 1–2: FIPS state code. Digit 3–7: District code. For a complete list of FIPS codes, reference http://www.itl.nist.gov/fipspubs/fip5-2.htm. Note that this variable has been altered for cases in New England and Nebraska, and some charter schools, where the CCD definition of a school district did not match the SASS definition of a school district. For these cases, district-level data were collected from an entity other than the CCD district. |
| CHARFLAG | Flag that indicates whether or not a school is a charter school. A charter school is a public school that, in accordance with an enabling state statute, has been granted a charter exempting it from selected state or local rules and regulations. A charter school may be a newly created school or it may previously have been a public or private school. For cases where the school was a non-interview, sample file or other information was used to impute (if available). Copied from s0230 on the SASS public school and BIE-funded school files. | CHARTYPE | Flag indicating whether a charter school is independent or is governed by a public school district. An independent charter school is operated by a state education agency (SEA), a chartering organization, or by a public school district that includes only charter schools. A charter school governed by a regular public school district operates within a school district that also includes traditional public schools. For cases where the school was a non-interview, sample file or other information was used to impute (if available). It is based upon the location of the school buildings of the district, and in some cases may not reflect the entire attendance area or residences of enrolled students. Micropolitan areas are new, smaller designated metropolitan areas with populations as low as 10,000 residents. For more information on Core Based Statistical Areas see http://www.census.gov/population/www/estimates/aboutmetro.html or chapter 12 of the *Documentation for the 2007–08 Schools and Staffing Survey* (NCES 2010-332). **RECSRCE**     Source of school record. For more information on the California, Pennsylvania, and Career Technical Center additions to the SASS sampling frame, refer to chapter 4 in the *Documentation for the 2007–08 Schools and Staffing Survey* (NCES 2010-332). Origin: RECSRCE from SASS sampling frame. Categories include:
1 = 2005–06 School CCD file;
2 = 2005–06 LEA CCD file;
3 = California sub-district addition to the SASS sampling frame;
4 = Pennsylvania Intermediate Unit addition to the SASS sampling frame;
5 = Career Technical Center addition to the SASS sampling frame;
6 = Other state addition to the SASS sampling frame.

**REGION**     Census Region where district is located. Origin: REGION from the SASS sampling frame. Categories include:
1 = Northeast: Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;
2 = Midwest: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;
3 = South: Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;
4 = West: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

**RELIG**     Three-level private school typology. Categories include:
1 = Catholic;
2 = Other religious;
3 = Nonsectarian.
Coded as follows:
if TYPOLOGY in (1, 2, 3) then RELIG = 1; if TYPOLOGY in (4, 5, 6) then RELIG = 2; if TYPOLOGY gt 6 then RELIG = 3; For cases where the school was a non-interview, sample file or other information was used to impute (if available).

**SC_NCSID**     NCES school identification number. Origin: NCESSCH from the 2005–06 CCD and PPIN on the 2005–06 PSS. For public and BIE schools: Digit 1–2: FIPS state code. Digit 3–7: District code. Digit 8–12: School code. For a complete list of FIPS codes, reference http://www.itl.nist.gov/fipspubs/fip5-2.htm. Note that this variable has been altered for cases in New England and Nebraska, and some charter schools, where the CCD definition of a school district did not match the SASS definition of a school district. For these cases, district level data were collected from an entity other than the CCD district. Digits 1–7 were edited to refer to the entity interviewed in SASS.

| Variable name | Description and specifications |
|---|---|
| SC_ORGID | Original NCES school ID for select Nebraska, New England, and charter schools. For some Nebraska, New England, and charter schools, associated district-level data were collected from an entity other than the district identified on CCD. Digits 1–7 refer to the district as identified by the CCD rather than the entity interviewed in SASS. A valid skip (-8) is applied if no changes were made to the NCES ID. Origin: SC_ORGID on the SASS sampling frame. Digit 1–2: FIPS state code. Digit 3–7: District code. Digit 8–12: School code. |
| SC_ZIP | Five-digit zip code for the physical location of the school. Origin: SC_ZIP on SASS sampling frame. |
| SCDISTFL | Identifies single-school districts that received the Public School Questionnaire (With District Items) - SASS 3Y. Origin: SCDISTFL from SASS sampling frame. <br> Categories include: <br> 1 = Single-school district; <br> 2 = Not a single-school district. |
| SCH_ISR | Interview status of school where principal/teacher/library was selected for sample. <br> Categories include: <br> 1 = Interview; <br> 2 = Non-interview. |

Schools with only ungraded classes were included with combined schools. For cases where the school was a non-interview, sample file or other information was used to impute (if available). <br> Coded as follows: <br> SCHLEVE2 = 1 if the lowest grade is any of grades K–4 and the highest grade is any of grades 1–8; <br> SCHLEVE2 = 2 if the lowest grade is any of grades 5–8 and the highest grade is any of grades 5–8; <br> SCHLEVE2 = 3 if the lowest grade is any of grades 7–12 and the highest grade is any of grades 9–12; <br> SCHLEVE2 = 4 for all other cases (e.g., all ungraded, K–12, 5–12, etc.). <br><br> Public and BIE Code: <br> if s0037 = 1 then LOWEST = 12; <br> if s0036 = 1 then LOWEST = 11; <br> if s0035 = 1 then LOWEST = 10; <br> if s0034 = 1 then LOWEST = 9; <br> if s0033 = 1 then LOWEST = 8; <br> if s0032 = 1 then LOWEST = 7; <br> if s0031 = 1 then LOWEST = 6; <br> if s0030 = 1 then LOWEST = 5; <br> if s0029 = 1 then LOWEST = 4; <br> if s0028 = 1 then LOWEST = 3; <br> if s0027 = 1 then LOWEST = 2; <br> if s0026 = 1 then LOWEST = 1; <br> if s0025 = 1 then LOWEST = 0; <br> if s0025 = 1 then HIGHEST = 0; <br> if s0026 = 1 then HIGHEST = 1; <br> if s0027 = 1 then HIGHEST = 2; <br> if s0028 = 1 then HIGHEST = 3; <br> if s0029 = 1 then HIGHEST = 4; <br> if s0030 = 1 then HIGHEST = 5; <br> if s0031 = 1 then HIGHEST = 6; |

| TLEV2_03 | TLEV2_03 divides teachers into elementary or secondary based on a combination of the grades taught, main teaching assignment, and the structure of their classes. Those with only ungraded classes become elementary level teachers if their main assignment is Early childhood/Pre-K or Elementary, or they teach either special education in a self-contained classroom or an elementary enrichment class. All other teachers with ungraded classes are classified as secondary level. Among teachers with regularly graded classes, elementary level teachers generally teach any of grades Pre-K–5; report an Early childhood/Pre-K, Elementary, Self-contained special education, or Elementary enrichment main assignment; or the majority of grades taught are K–6. In general, secondary level teachers instruct any of grades 7–12 but usually no grade lower than 5th. | TOTYREXP | Teacher's adjusted years of teaching experience. Experience is calculated as the sum of years taught full or part-time in public and private schools. Teaching experience may overlap by sector (public and private) or status (full- or part-time). To adjust for this, TOTYREXP cannot sum to more than the number of years that have elapsed between the year the teacher began teaching (T0037) and the survey year 2008. Teachers who began teaching in the 2007–08 school year are assigned one year of experience. # Appendix U. Crosswalk Among Items in the 1987–88, 1990–91, 1993–94, 1999–2000, 2003–04, and 2007–08 SASS

Crosswalks linking items across questionnaires in each Schools and Staffing Survey (SASS) administration are presented in this appendix. The SASS variable crosswalks are presented in the following order:

Within each questionnaire crosswalk, variables are listed in 2007–08 item order. If there is a blank in the variable's name for 1987–88, 1990–91, 1993–94, 1999–2000, or 2003–04, then that particular 2007–08 item did not have an equivalent item in earlier years. Variables from 1987–88, 1990–91, 1993–94, 1999–2000, and 2003–04 are categorized for how closely they "match" the corresponding variable in the 2007–08 questionnaire:

- **Exact.** The question wording and format are exactly the same.
- **Near.** The question content is the same, but there have been minor changes to the question wording or format.
- **Content.** The general content of or subject addressed by the item is the same, but the question wording or format has been changed significantly.
- **No match.** The question has no match.

In addition, there are four crosswalks that compare similarities and differences across the 2007–08 SASS questionnaires given to each type of respondent (i.e., public school district, principal, school, or teacher). The first crosswalk presents items from the District Questionnaire that are

also included on the Public School Questionnaire (With District Items) or the Private School Questionnaire (pages U-151 through U-153). The second crosswalk compares items found on the Principal and Private School Principal Questionnaires (pages U-154 through U-159), the third crosswalk compares items that are found on the three school questionnaires: School Questionnaire, Public School Questionnaire (With District Items), and Private School Questionnaire (pages U-160 through U-176), and the fourth crosswalk compares items found on the Teacher and Private School Teacher Questionnaires (pages U-177 through U-187). Comparisons are categorized on how well the item matches across surveys on the same scale as described above. Items that are found on only one questionnaire within a respondent set are noted as being "Unique." For example, an item that appears on the Private School Teacher Questionnaire but not on the Teacher Questionnaire is marked as being unique for private school teachers.
