

Supplemental Tables to the NCES Report

Arts Education in Public Elementary and
Secondary Schools: 1999–2000 and 2009–10
(NCES 2012-014)

Description

These tables supplement the publication Arts Education in Public Elementary and Secondary schools: 1999–2000 and 2009–10 (NCES 2012-014).

The data are from a total of seven surveys that were administered during the 2009–10 school year. At the elementary school level, the study includes a survey of school principals and three teacher-level surveys, one each for self-contained classroom teachers, music specialists, and visual arts specialists. At the secondary school level, the study includes a survey of school principals and two teacher-level surveys, one each for music specialists and visual arts specialists. Where applicable, the tables present comparisons with data that were collected in the 1999–2000 school year.

List of Tables

Table		Page
Detailed Tables for Elementary Schools and Teachers: 2009–10 Survey Data		
Elementary Schools		
1	Percent and standard error for public elementary schools reporting instruction designated specifically for various arts subjects, by school characteristics: School year 2009–10	3
2	Among public elementary schools that offered instruction in various arts subjects, percentage distribution and standard error reporting selected program characteristics for the subjects: School year 2009–10	4
3	Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that they offered instruction at least once a week, by school characteristics: School year 2009–10	5
4	Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that a typical student received instruction in the subjects throughout the entire school year, by school characteristics: School year 2009–10	6
5	Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that dedicated rooms with special equipment were the primary space used for teaching the arts subjects, by school characteristics: School year 2009–10	7
6	Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that arts specialists were employed to provide instruction in the arts subjects, by school characteristics: School year 2009–10	8
7	Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that their district had a written curriculum guide that teachers were expected to follow, by school characteristics: School year 2009–10	9
8	Among public elementary schools that offered instruction in various arts subjects, average number and standard error for minutes per class period for various arts subjects, by school characteristics: School year 2009–10	10

Table	Page
9 Percent and standard error for public elementary schools reporting various types of music instruction or classes during regular school hours, and of those schools, percent and standard error reporting the percent of students enrolled in the music subjects: School year 2008–09.....	11
10 Percent and standard error for public elementary schools reporting that they offered various kinds of music instruction or classes during regular school hours, by school characteristics: School year 2008–09.....	12
11 Among public elementary schools that offered various kinds of music instruction, percent and standard error reporting that 75 percent or more of the students were enrolled in the program, by the earliest grade at which the instruction was offered and school characteristics: School year 2008–09	13
12 Percent and standard error for public elementary schools reporting various ways in which dance or drama/theatre was taught or incorporated into other subject or curriculum areas, by school characteristics: School year 2009–10	14
13 Percent and standard error for public elementary schools reporting that they sponsored various supplemental arts education programs, by school characteristics: School year 2008–09.....	16
14 Among public elementary schools that sponsored various supplemental arts education programs, percent and standard error reporting various funding sources for the program, by school characteristics: School year 2008–09	17
15 Percent and standard error for public elementary schools reporting that they provided or sponsored curriculum-guided instructional activities in the arts outside of regular school hours, by school characteristics: School year 2009–10	20
16 Average number and standard error for the student arts events in public elementary schools and events attended by school principals, by school characteristics: School year 2008–09.....	21
17 Percent and standard error for public elementary schools reporting a district-level arts coordinator, various ways that arts programs and instruction were assessed, and the inclusion of arts education in mission statements or school improvement plans, by school characteristics: School year 2009–10.....	22

Table	Page
18 Among public elementary schools that reported having an arts specialist, percent and standard error reporting that arts specialists contributed to various arts-related management decisions, by school characteristics: School year 2009–10	23
19 Percent and standard error for public elementary schools reporting that they were currently undergoing various arts initiatives, by school characteristics: School year 2009–10.....	24
20 Among public elementary schools that offered instruction in the arts, percentage distribution and standard error reporting the extent to which support for arts instruction was adequate: School year 2009–10	25
21 Among public elementary schools that offered instruction in the arts, percentage distribution and standard error reporting that the support for arts instruction was somewhat or very adequate, by school characteristics: School year 2009–10	26
22 Percent and standard error for public elementary schools reporting that they received monetary and non-monetary support from outside sources for various arts subjects, by school characteristics: School year 2008–09.....	28
23 Percent and standard error for public elementary schools reporting partnerships or collaborations with various outside artists or entities to help meet the school’s arts education goals, by school characteristics: School year 2008–09	32
24 Percent and standard error for public elementary schools reporting that the school or district offered professional development programs for teachers in various arts subjects, by school characteristics: School year 2009–10	33

Elementary Teachers

25 Percent and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting their teaching status in relation to arts education instruction, by school characteristics: School year 2009–10	38
26 Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting the number of years of teaching experience, by school characteristics: School year 2009–10	39

Table	Page
27	Percent and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting that they held a bachelor's or master's degree, by school characteristics: School year 2009–10 41
28	Percent and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting that they held a regular, standard, or professional teaching certificate, by school characteristics: School year 2009–10 42
29	Percent and standard error for public elementary school music and visual arts specialists reporting major or minor fields of study for degrees and teaching certificates held: School year 2009–10 43
30	Percent and standard error for public elementary school music and visual arts specialists reporting that they held an undergraduate or graduate degree or teaching certificate in the arts subject they taught, by school characteristics: School year 2009–10 44
31	Percent and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting that they participated in various professional development activities, and of those teachers, percentage distribution and standard error for the number of hours spent and the extent to which participation improved teaching: School year 2009–10 45
32	Percent and standard error for public elementary school music specialists reporting that they participated in various professional development activities, by school characteristics: School year 2009–10 47
33	Percent and standard error for public elementary school visual arts specialists reporting that they participated in various professional development activities, by school characteristics: School year 2009–10 49
34	Percent and standard error for public elementary school classroom teachers reporting that they participated in various professional development activities, by school characteristics: School year 2009–10 50
35	Among public elementary school music specialists who participated in various professional development activities, percent and standard error reporting that they spent more than 8 hours in the activity, by school characteristics: School year 2009–10 51
36	Among public elementary school visual arts specialists who participated in various professional development activities, percent and standard error reporting that they spent more than 8 hours in the activity, by school characteristics: School year 2009–10 53

Table	Page
37 Among public elementary school classroom teachers who participated in various professional development activities, percent and standard error reporting that they spent more than 8 hours in the activity, by school characteristics: School year 2009–10	55
38 Among public elementary school music specialists who participated in professional development activities, percent and standard error reporting that participation in the activity improved their teaching to a moderate or great extent, by school characteristics: School year 2009–10	56
39 Among public elementary school visual arts specialists who participated in professional development activities, percent and standard error reporting that participation in the activity improved their teaching to a moderate or great extent, by school characteristics: School year 2009–10	58
40 Among public elementary school classroom teachers who participated in professional development activities, percent and standard error reporting that participation in the activity improved their teaching to a moderate or great extent, by school characteristics: School year 2009–10	59
41 Average number and standard error for the number of classes, class size, and number of hours per week spent teaching during regular school hours, reported by public elementary school music and visual arts specialists for their most recent full week of teaching, by teaching status and school characteristics: School year 2009–10	61
42 Percentage distribution and standard error for public elementary school music and visual arts specialists reporting various indicators of teaching load, by teaching status: School year 2009–10	64
43 Percent and standard error for public elementary school music and visual arts specialists reporting that they taught at more than one school, by teaching status and school characteristics: School year 2009–10	65
44 Percent and standard error for public elementary school music and visual arts specialists reporting more than 4 hours of designated planning time per week when students were in attendance, by teaching status and school characteristics: School year 2009–10	66
45 Percent and standard error for public elementary school music and visual arts specialists reporting that they taught on a block schedule, by teaching status and school characteristics: School year 2009–10	67

Table	Page
46 Percent and standard error for public elementary school music specialists reporting that they taught a curriculum-based or co-curricular music class outside of school hours, by teaching status and school characteristics: School year 2009–10	68
47 Average class size and standard error for classes taught by public elementary school classroom teachers, and percent and standard error reporting more than 4 hours of designated planning or preparation time per week and the ways in which students were occupied during that time, by school characteristics: School year 2009–10	69
48 Percentage distribution and standard error for public elementary school music and visual arts specialists reporting the extent to which they believed that various types of support for teaching their arts subject were adequate: School year 2009–10	70
49 Percent and standard error for public elementary school music specialists reporting that they believed various types of support for teaching music were moderately or completely adequate, by school characteristics: School year 2009–10	71
50 Percent and standard error for public elementary school visual arts specialists reporting that they believed various types of support for teaching visual arts were moderately or completely adequate, by school characteristics: School year 2009–10	73
51 Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting how frequently they participated in activities related to teaching: School year 2009–10	75
52 Percent and standard error for public elementary school music specialists reporting that they participated in various activities related to teaching, by school characteristics: School year 2009–10	77
53 Percent and standard error for public elementary school visual arts specialists reporting that they participated in various activities related to teaching, by school characteristics: School year 2009–10	79
54 Percent and standard error for public elementary school classroom teachers reporting that they participated in various activities related to teaching, by school characteristics: School year 2009–10	81

Table	Page
55 Percent and standard error for public elementary school classroom teachers reporting that arts instruction was included in their classroom program and of those teachers, percent and standard error reporting various ways of teaching arts subject areas, by school characteristics: School year 2009–10	83
56 Among public elementary school classroom teachers who included arts instruction in any aspect of their classroom program, percent and standard error reporting that they taught various arts areas as separate subjects to their students, and of those teachers, percent and standard error reporting the type of curriculum used, by school characteristics: School year 2009–10	85
57 Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting the extent to which they agreed with statements about arts instruction at their currently assigned school: School year 2009–10.....	87
58 Percent and standard error for public elementary school music and visual arts specialists reporting that they somewhat or strongly agreed with statements about arts instruction at their currently assigned school, by school characteristics: School year 2009–10	88
59 Percent and standard error for public elementary school classroom teachers reporting that they somewhat or strongly agreed with statements about arts instruction at their currently assigned school, by school characteristics: School year 2009–10	89
60 Percent and standard error for public elementary school music and visual arts specialists describing the arts instructional program at their currently assigned school, by school characteristics: School year 2009–10.....	90
61 Percentage distribution and standard error for public elementary school music and visual arts specialists reporting how much emphasis they gave to various goals or objectives of student learning: School year 2009–10	91
62 Percent and standard error for public elementary school music specialists reporting that they gave moderate or major emphasis to various goals or objectives of student learning, by school characteristics: School year 2009–10	92
63 Percent and standard error for public elementary school visual arts specialists reporting that they gave moderate or major emphasis to various goals or objectives of student learning, by school characteristics: School year 2009–10	94

Table	Page
64 Among public elementary school music specialists, visual arts specialists, and classroom teachers who reported the use of any formal assessments to determine student progress and achievement in the arts, percentage distribution and standard error reporting the extent to which they used various types of assessments: School year 2009–10	96
65 Among public elementary school music specialists, visual arts specialists, and classroom teachers who reported the use of any formal assessments to determine student progress and achievement in the arts, percent and standard error reporting that they used the assessment to a moderate or great extent, by school characteristics: School year 2009–10	97
66 Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting the extent to which they participated in various activities related to their arts subject outside of their school duties: School year 2009–10	100
67 Percent and standard error for public elementary school music specialists reporting that they participated to a moderate or great extent in various activities related to music outside of their school duties, by school characteristics: School year 2009–10	101
68 Percent and standard error for public elementary school visual arts specialists reporting that they participated to a moderate or great extent in various activities related to visual arts outside of their school duties, by school characteristics: School year 2009–10	103
69 Percent and standard error for public elementary school classroom teachers reporting that they participated to a moderate or great extent in various activities related to the arts outside of their school duties, by school characteristics: School year 2009–10	105

Detailed Tables for Secondary Schools and Teachers: 2009–10 Survey Data

Table	Page
Secondary Schools	
70 Percent and standard error for public secondary schools reporting whether various arts subjects were taught at the school, by school characteristics: School year 2008–09	111
71 Among public secondary schools that offered instruction in various arts subjects, percentage distribution and standard error for reporting the number of different types of arts courses taught, by school characteristics: School year 2008–09	112
72 Among public secondary schools that offered instruction in various arts subjects, number and standard error for total course enrollments in various arts subjects, and of those enrollments, percent and standard error accounted for by the various arts subject areas, by school characteristics: School year 2008–09	114
73 Among public secondary schools that offered instruction in various arts subjects, number and standard error for teachers on staff reported as arts instructors who taught various arts subjects, and of those teachers, percent and standard error for those who were arts specialists and other arts instructors, by teaching status and school characteristics: School year 2008–09	115
74 Among public secondary schools that offered instruction in various arts subjects, percentage distribution and standard error for reporting the primary space used for instruction and district curriculum guides for the arts subjects: School year 2009–10	119
75 Among public secondary schools that offered instruction in various arts subjects, percent and standard error reporting that dedicated rooms with special equipment were the primary space used for teaching the arts subjects, by school characteristics: School year 2009–10	120
76 Among public secondary schools that offered instruction in various arts subjects, percent and standard error reporting that their district had a written curriculum guide that teachers were expected to follow, by school characteristics: School year 2009–10	121
77 Percent and standard error for public secondary schools reporting that students took arts classes that were taught at another location, and of those schools, percent and standard error reporting the class location, by school characteristics: School year 2008–09	122

Table	Page
78	Percent and standard error for public secondary schools that offered instruction in creative writing, and of those schools, percent and standard error for reporting various ways that creative writing was taught or included in the school curriculum, by school characteristics: School year 2009–10 123
79	Percent and standard error for public secondary schools reporting that they sponsored various supplemental arts education programs, by school characteristics: School year 2008–09 124
80	Among public secondary schools that sponsored various supplemental arts education programs, percent and standard error reporting various funding sources for the programs, by school characteristics: School year 2008–09 125
81	Percent and standard error for public secondary schools reporting that they provided or sponsored curriculum-guided instructional activities in the arts outside of regular school hours, by school characteristics: School year 2009–10 128
82	Average number and standard error for student arts events in public secondary schools and events attended by school principals, by school characteristics: School year 2008–09 129
83	Percent and standard error for public secondary schools reporting a district-level arts coordinator, various ways that arts programs and instruction were assessed, and the inclusion of arts education in mission statements or school improvement plans, by school characteristics: School year 2009–10 130
84	Percent and standard error for public secondary schools reporting that arts specialists contributed to various arts-related management decisions, by school characteristics: School year 2009–10 131
85	Percent and standard error for public secondary schools reporting arts coursework requirements for graduation and the inclusion of grades in arts classes in the calculation of grade point averages, by school characteristics: School year 2009–10 132
86	Percent and standard error for public secondary schools reporting that they were currently undergoing various arts initiatives, by school characteristics: School year 2009–10 133
87	Among public secondary schools that reported instruction in the arts during regular school hours, percentage distribution and standard error for reporting the extent to which the support for arts education was adequate: School year 2009–10 134

Table	Page
88 Among public secondary schools that reported instruction in the arts during regular school hours, percent and standard error for reporting that the support for arts instruction was somewhat or very adequate, by school characteristics: School year 2009–10	135
89 Percent and standard error for public secondary schools reporting that they received monetary and non-monetary support from outside sources for various arts subjects, by school characteristics: School year 2008–09	136
90 Percent and standard error for public secondary schools reporting partnerships or collaborations with various outside artists or entities to help meet the school’s arts education goals, by school characteristics: School year 2008–09	140
91 Percent and standard error for public secondary schools reporting that the school or district offered professional development programs for teachers in various arts subjects, by school characteristics: School year 2009–10	141

Secondary School Teachers

92 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting their teaching status in relation to arts education instruction, by school characteristics: School year 2009–10	146
93 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting the number of years of teaching experience, by school characteristics: School year 2009–10	147
94 Percent and standard error for public secondary school music and visual arts specialists reporting that they held a bachelor’s or master’s degree, by school characteristics: School year 2009–10	148
95 Percent and standard error for public secondary school music and visual arts specialists reporting that they held a regular, standard, or professional teaching certificate, by school characteristics: School year 2009–10	149
96 Percent and standard error for secondary school music and visual arts specialists reporting major or minor fields of study for degrees and teaching certificates held: School year 2009–10	150
97 Percent and standard error for secondary school music and visual arts specialists reporting that they held an undergraduate or graduate degree or teaching certificate in the arts subject they taught, by school characteristics: School year 2009–10	151

Table	Page
98 Percent and standard error for public secondary school music and visual arts specialists reporting that they participated in various professional development activities, and of those teachers, percentage distribution and standard error for the number of hours spent and the extent to which participation improved teaching: School year 2009–10	152
99 Percent and standard error for public secondary school music specialists reporting that they participated in various professional development activities, by school characteristics: School year 2009–10	154
100 Percent and standard error for public secondary school visual arts specialists reporting that they participated in various professional development activities, by school characteristics: School year 2009–10	156
101 Among public secondary school music specialists who participated in various professional development activities, percent and standard error reporting that they spent more than 8 hours in the activity, by school characteristics: School year 2009–10	158
102 Among public secondary school visual arts specialists who participated in various professional development activities, percent and standard error reporting that they spent more than 8 hours in the activity, by school characteristics: School year 2009–10	160
103 Among public secondary school music specialists who participated in various professional development activities, percent and standard error reporting that participation in the activity improved their teaching to a moderate or great extent, by school characteristics: School year 2009–10	162
104 Among public secondary school visual arts specialists who participated in various professional development activities, percent and standard error reporting that participation in the activity improved their teaching to a moderate or great extent, by school characteristics: School year 2009–10	164
105 Average number and standard error for the number of classes, class size, and number of hours per week spent teaching reported during regular school hours, by public secondary school music and visual arts specialists for their most recent full week of teaching, by teaching status and school characteristics: School year 2009–10	166
106 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting various indicators of teaching load, by teaching status: School year 2009–10	169

Table	Page
107 Percent and standard error for public secondary school music and visual arts specialists reporting that they taught at more than one school, by teaching status and school characteristics: School year 2009–10.....	170
108 Percent and standard error for public secondary school music and visual arts specialists reporting more than 4 hours of designated planning time per week when students were in attendance, by teaching status and school characteristics: School year 2009–10	171
109 Percent and standard error for public secondary school music and visual arts specialists reporting that they taught on a block schedule, by teaching status and school characteristics: School year 2009–10	172
110 Percent and standard error for public secondary school music and visual arts specialists reporting that they taught a curriculum-based or co-curricular class in their arts subject outside of school hours, by teaching status and school characteristics: School year 2009–10	173
111 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting the extent to which they believed that various types of support for teaching their arts subject were adequate: School year 2009–10.....	174
112 Percent and standard error for public secondary school music specialists reporting that they believed various types of support for teaching music were moderately or completely adequate, by school characteristics: School year 2009–10	175
113 Percent and standard error for public secondary school visual arts specialists reporting that they believed various types of support for teaching visual arts were moderately or completely adequate, by school characteristics: School year 2009–10	177
114 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting how frequently they participated in activities related to teaching: School year 2009–10.....	179
115 Percent and standard error for public secondary school music specialists reporting that they participated in various activities related to teaching, by school characteristics: School year 2009–10	180
116 Percent and standard error for public secondary school visual arts specialists reporting that they participated in various activities related to teaching, by school characteristics: School year 2009–10	181

Table	Page
117 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting the extent to which they agreed with statements about arts instruction at their currently assigned school: School year 2009–10.....	182
118 Percent and standard error for public secondary school music and visual arts specialists reporting that they somewhat or strongly agreed with statements about arts instruction at their currently assigned school, by school characteristics: School year 2009–10	183
119 Percent and standard error for public secondary school music and visual arts specialists describing their instructional program at their currently assigned school, by school characteristics: School year 2009–10.....	184
120 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting how much emphasis they gave to various goals or objectives of student learning: School year 2009–10.....	186
121 Percent and standard error for public secondary school music specialists reporting that they gave moderate or major emphasis to various goals or objectives of student learning, by school characteristics: School year 2009–10	187
122 Percent and standard error for public secondary school visual arts specialists reporting that they gave moderate or major emphasis to various goals or objectives of student learning, by school characteristics: School year 2009–10	189
123 Among public secondary school music and visual arts specialists who reported that they used various types of assessments to determine student progress and achievement in the arts, percentage distribution and standard error for reporting the extent to which they used various types of assessments: School year 2009–10.....	191
124 Among public secondary school music and visual arts specialists who reported that they used various types of assessments to determine student progress and achievement in the arts, percent and standard error reporting that they used the assessment to a moderate or great extent, by school characteristics: School year 2009–10.....	192
125 Percentage distribution and standard error for public secondary school music and visual arts specialists reporting the extent to which they participated in various activities related to their arts subject outside of their school duties: School year 2009–10	194

Table	Page
126 Percent and standard error for public secondary school music specialists reporting that they participated to a moderate or great extent in various activities related to music outside of their school duties, by school characteristics: School year 2009–10	195
127 Percent and standard error for public secondary school visual arts specialists reporting that they participated to a moderate or great extent in various activities related to visual arts outside of their school duties, by school characteristics: School year 2009–10	197
Detailed Tables for Elementary Schools and Teachers and Secondary Schools: 1999–2000 Survey Data	
128 Percent and standard error for public elementary schools reporting instruction designated specifically for various arts subjects, by school characteristics: School year 1999–2000.....	204
129 Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting selected program characteristics for the subjects: School year 1999–2000	205
130 Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that they offered instruction at least once a week, by school characteristics: School year 1999–2000	206
131 Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that a typical student received instruction in the subjects throughout the entire school year, by school characteristics: School year 1999–2000	207
132 Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that dedicated rooms with special equipment were the primary space used for teaching the arts subjects, by school characteristics: School year 1999–2000	208
133 Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that arts specialists were employed to provide instruction in the arts subjects, by school characteristics: School year 1999–2000	209
134 Among public elementary schools that offered instruction in various arts subjects, percent and standard error reporting that their district had a curriculum guide that teachers were expected to follow, by school characteristics: School year 1999–2000	210

Table	Page
135 Among public elementary schools that offered instruction in various arts subjects, average number and standard error for minutes per class period for various arts subjects, by school characteristics: School year 1999–2000	211
136 Percent and standard error for public elementary schools reporting types of music instruction or classes offered at the school during regular school hours, and of those schools, percent and standard error reporting the percent of students enrolled in those music subjects: School year 1998–99	212
137 Percent and standard error for public elementary schools reporting that they offered various kinds of music instruction or classes during regular school hours, by school characteristics: School year 1998–99	213
138 Among public elementary schools that offered various kinds of music instruction, percent and standard error reporting that 75 percent or more of the students were enrolled in the program, by the earliest grade at which the instruction was offered and school characteristics: School year 1998–99	214
139 Percent and standard error for public elementary schools reporting various ways in which dance or drama/theatre was taught or incorporated into other curriculum areas, by school characteristics: School year 1999–2000	215
140 Percent and standard error for public elementary schools reporting that they sponsored various supplemental arts education programs, by school characteristics: School year 1998–99	217
141 Percent and standard error for public elementary schools reporting a district-level arts coordinator, various ways that arts programs and instruction were assessed, and the inclusion of arts education in mission statement or school improvement plans, by school characteristics: School year 1999–2000	218
142 Among public elementary schools that offered instructions in the arts, percent and standard error reporting that arts specialists contributed to various arts-related management decisions, by school characteristics: School year 1999–2000	219
143 Percentage distribution and standard error for public elementary school music and visual arts specialists reporting selected background characteristics related to teaching: School year 1999–2000	220
144 Percentage distribution and standard error for public elementary school classroom teachers reporting selected background characteristics related to teaching: School year 1999–2000	221

Table	Page
145 Percent and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting the type of degree and teaching certificate held: School year 1999–2000.....	222
146 Percent and standard error for public elementary school music specialists and visual arts specialists reporting major and minor fields of study for degrees and teaching certificates held: School year 1999–2000	223
147 Percentage and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting that they participated in various professional development activities, and of those teachers, percentage distribution and standard error for the number of hours spent and the extent to which participation improved teaching: School year 1999–2000	224
148 Percentage distribution and standard error for public elementary school music and visual arts specialists reporting the extent to which they believed various types of support for teaching their arts subject were adequate: School year 1999–2000.....	226
149 Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting how frequently they participated in activities related to teaching: School year 1999–2000	227
150 Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting the extent to which they agreed with statements about arts instruction at their currently assigned school: School year 1999–2000.....	229
151 Percentage distribution and standard error for public elementary school music and visual arts specialists reporting how much emphasis they gave to various goals or objectives of student learning: School year 1999–2000	230
152 Among public elementary school music specialists, visual arts specialists, and classroom teachers reporting the use of any formal assessments to determine student progress and achievement in the arts, percentage distribution and standard error for reporting the extent to which they used various types of assessments: School year 1999–2000	231
153 Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting the extent to which they participated in various activities related to their arts subject outside of their school duties: School year 1999–2000.....	232

Table	Page
154 Percent and standard error for public secondary schools reporting whether various arts subjects were taught at the school, by school characteristics: School year 1999–2000.....	233
155 Among public secondary schools that offered instruction in various arts subjects, percentage distribution and standard error for reporting the number of different types of arts courses taught, by school characteristics: School year 1998–99	234
156 Among public secondary schools that offered instruction in various arts subjects, number, percent, and standard error for the teachers on staff that taught various arts subjects, by teaching status and school characteristics: School year 1998–99	236
157 Among public secondary schools that offered instruction in various arts subjects, percentage distribution and standard error for reporting the primary space used for instruction and the availability of a district curriculum guide that teachers were expected to follow for arts subjects: School year 1999–2000.....	238
158 Among public secondary schools that offered instruction in various arts subjects, percent and standard error reporting that dedicated rooms with special equipment were used for teaching the arts subjects, by school characteristics: School year 1999–2000	239
159 Among public secondary schools that offered instruction in various arts subjects, percent and standard error reporting that their district had a written curriculum guide that teachers were expected to follow for the arts subjects, by school characteristics: School year 1999–2000	240
160 Among public secondary schools that offered instruction in various arts subjects, percent and standard error for schools reporting that students took arts classes that were taught at another location, and of those schools, percent and standard error reporting the location at which classes were offered, by school characteristics: School year 1998–99	241
161 Percent and standard error for public secondary schools that offered instruction in creative writing, and of those schools, percent and standard error for reporting various ways that creative writing was taught or included in the school curriculum, by school characteristics: School year 1999–2000	242
162 Percent and standard error for public secondary schools reporting that they sponsored various supplemental arts education programs, by school characteristics: School year 1998–199	243

Table	Page
163 Among public secondary schools that offered instruction in the arts, percent and standard error for reporting a district-level arts coordinator, various ways that arts programs and instruction were assessed at the school, and the inclusion of arts education in mission statements or school improvement plans, by school characteristics: School year 1999–2000	244
164 Among public secondary schools that offered instruction in the arts, percent and standard error for reporting that arts specialists contributed to various arts-related management decisions, by school characteristics: School year 1999–2000	245
165 Percent and standard error for public secondary schools reporting arts coursework requirements for graduation and the inclusion of grades in arts classes in the calculation of grade point averages, by school characteristics: School year 1999–2000	246

Detailed Tables for Elementary Schools and Teachers
2009–10 Survey Data

Elementary Schools

Table 1. Percent and standard error for public elementary schools reporting instruction designated specifically for various arts subjects, by school characteristics: School year 2009–10

School characteristic	Music		Visual arts		Dance		Drama/theatre	
	Percent	Standard error	Percent	Standard error	Percent	Standard error	Percent	Standard error
All public elementary schools	94	(0.9)	83	(1.3)	3	(0.7)	4	(0.5)

‡ Not applicable.

Rounds to zero.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents are based on the 94 percent of public elementary schools that reported instruction designated specifically for music during regular school hours in the 2009–10 school year.

² Percents are based on the 83 percent of public elementary schools that reported instruction designated specifically for visual arts during regular school hours in the 2009–10 school year.

³ Percents are based on the 3 percent of public elementary schools that reported instruction designated specifically for dance during regular school hours in the 2009–10 school year.

⁴ Percents are based on the 4 percent of public elementary schools that reported instruction designated specifically for drama/theatre during regular school hours in the 2009–10 school year.

NOTE: Respondents could report more than one type of arts instructors. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

‡ Reporting standards not met.

¹ Percents are based on the 94 percent of public elementary schools that reported instruction designated specifically for music during regular school hours in the 2009–10 school year.

² Percents are based on the 83 percent of public elementary schools that reported instruction designated specifically for visual arts during regular school hours in the 2009–10 school year.

³ Percents are based on the 3 percent of public elementary schools that reported instruction designated specifically for dance during regular school hours in the 2009–10 school year.

⁴ Percents are based on the 4 percent of public elementary schools that reported instruction designated specifically for drama/theatre during regular school hours in the 2009–10 school year.

⁵ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

76 percent or more	56	(3.5)	55	(3.7)	83	(2.4)	70	(2.7)

¹ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Percents are based on the 96 percent of public elementary schools that reported instruction in the arts during regular school hours in the 2009–10 school year. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

² Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline. Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

NOTE: Percents are based on the percentage of teachers who participated in each professional development activity (52 percent for applied study in art studio, 56 percent for developing knowledge about visual arts, 69 percent for connecting visual arts learning with other subject areas, 46 percent for research on arts and student learning, 62 percent for integrating educational technology into visual arts instruction, 70 percent for student assessment, and 41 percent for a subject area that is unrelated to visual arts). Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

† Not applicable.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Percents are based on the percentage of teachers who participated in each professional development activity (22 percent for applied study in one of the arts or arts education, 18 percent for developing knowledge about the arts, 35 percent for connecting arts learning with other subject areas, 20 percent for research on the arts and student learning, 78 percent for incorporating state or district standards into instruction, 83 percent for student assessment, and 84 percent for integrating educational technologies into instruction). Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

¹ Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

§ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Percents are based on the percentage of teachers who participated in each professional development activity (22 percent for applied study in one of the arts or arts education, 18 percent for developing knowledge about the arts, 35 percent for connecting arts learning with other subject areas, 20 percent for research on the arts and student learning, 78 percent for incorporating state or district standards into instruction, 83 percent for student assessment, and 84 percent for integrating educational technologies into instruction). Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

¹ Respondents were asked to report the total number of different groups or sections taught during their most recent full week of teaching. For example, if a music specialist taught chorus to 3 different groups or sections of first-graders and 2 groups or sections of second-graders, the teacher was instructed to report 5 sections or classes of chorus. If the teacher taught chorus to the same group of students multiple times a week, he/she was asked to count this class only once.

² Respondents were asked to report the total number of students in the different classes taught. For example, if a music specialist taught 5 different groups or sections of chorus, each with 20 students enrolled, the teacher was instructed to report a total enrollment of 100 for chorus. Class size was computed by summing the weighted student enrollment in all classes taught by the arts specialists (including classes taught at the sampled school and other schools at which they taught) and dividing by the weighted number of classes taught.

³ Other races/ethnicities include Hispanic, Asian/Pacific Islanders, and American Indian/Alaska Native students.

NOTE: Averages were computed across all records in the survey and based on data that were weighted to national estimates. For example, the average number of classes taught by music teachers was computed by summing the weighted number of classes taught by all music teachers and dividing by the weighted number of music teachers in the study. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

‡ Reporting standards not met.

¹ Block schedule refers to a type of academic scheduling in which each student has fewer classes per day for a longer period of time; for example, block scheduling allows for class periods of an hour or more so that teachers can accomplish more in a class session.

NOTE: Detail may not sum to totals because of rounding. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

¹ The questionnaire wording was “materials/supplies for music instruction (e.g., sheet music, subscriptions, CDs/CD-ROMs, textbooks, DVDs, software).”

² The questionnaire wording was “instruments typically used by students in the music classroom (e.g., rhythm band sets, recorders, autoharps, Orff instruments, drums and ethnic percussion, guitar/ukulele).”

³ The questionnaire wording was “equipment typically used by teachers in the music classroom (e.g., piano/digital keyboard, stereo system with a CD player, mp3 player and sound dock, LCD projector).”

⁴ The questionnaire wording was “electronic equipment used in the study or creation of music (e.g., SMART Boards, computers, MIDI keyboards, sequencers).”

⁵ The questionnaire wording was “instruments available for students wishing to participate in the school string/orchestra or band program.” Percents are based on the 67 percent of music specialists at public elementary schools with string/orchestra or band programs during the 2009–10 school year.

⁶ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

¹ Percents are based on the 92 percent of classroom teachers at public elementary schools with music or visual arts specialists during the 2009–10 school year.

NOTE: Detail may not sum to totals because of rounding. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline. Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

‡ Not applicable.

Rounds to zero.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents are based on the 88 percent of public elementary school classroom teachers who reported that they included arts instruction in any aspect of their classroom program.

² Percents are based on the percentage of public elementary classroom teachers who reported that they taught various arts areas as separate subjects (6 percent for music, 14 percent for visual arts, 3 percent for dance, and 8 percent for drama/theatre).

³ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

Table 57. Percentage distribution and standard error for public elementary school music specialists, visual arts specialists, and classroom teachers reporting the extent to which they agreed with statements about arts instruction at their currently assigned school: School year 2009–10

Statement	Strongly disagree		Disagree		Agree		Strongly agree	
	Percent	Standard error	Percent	Standard error	Percent	Standard error	Percent	Standard error
Music specialist								
Parents support me in my efforts to educate their children	5	(0.8)	7	(0.7)	46	(1.7)	42	(1.7)
The administration supports me in my work	6	(0.9)	9	(1.0)	30	(1.6)	54	(1.8)
Students are motivated to do well in music class	4	(0.7)	7	(0.9)	39	(1.5)	50	(1.7)
Community organizations/groups support my efforts to educate students	8	(0.9)	16	(1.4)	45	(1.8)	31	(1.7)
Visual arts specialist								
Parents support me in my efforts to educate their children	6	(0.8)	9	(1.0)	46	(1.7)	39	(1.6)
The administration supports me in my work	6	(0.9)	6	(0.7)	32	(1.6)	55	(1.7)
Students are motivated to do well in visual arts class	4	(0.8)	4	(0.8)	34	(1.6)	57	(1.8)
Community organizations/groups support my efforts to educate students	10	(1.1)	15	(1.2)	45	(1.7)	30	(1.8)
Classroom teacher								
I consider instruction in the arts an important part of the school's curriculum	6	(1.0)	5	(0.9)	23	(1.5)	66	(1.8)
Students look forward to instruction or activities that involve the arts ...	4	(0.8)	2	(0.6)	15	(1.4)	78	(1.7)
Arts specialists should be responsible for arts instruction	5	(1.0)	13	(1.1)	39	(2.0)	43	(2.3)

NOTE: Detail may not sum to totals because of rounding. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline. Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

‡ Reporting standards not met.

NOTE: Percents are based on the percentage of teachers who used any formal assessments to determine student progress and achievement in the arts (95 percent of elementary music specialists, 93 percent of elementary visual arts specialists, and 60 percent of elementary classroom teachers). Detail may not sum to totals because of rounding. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline. Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

‡ Reporting standards not met.

¹ Percents are based on the 91 percent of public secondary schools that offered music during regular school hours in the 2008–09 school year.

² Percents are based on the 89 percent of public secondary schools that offered visual arts during regular school hours in the 2008–09 school year.

³ Percents are based on the 12 percent of public secondary schools that offered dance during regular school hours in the 2008–09 school year.

⁴ Percents are based on the 45 percent of public secondary schools that offered drama/theatre during regular school hours in the 2008–09 school year.

⁵ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Detail may not sum to totals because of rounding. Respondents were asked to report course information for the 2008–09 school year. The 2009–10 survey asked about course offerings in the previous school year and schools were instructed to count different sections of the same course as one course.

† Not applicable.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents are based on the 91 percent of public secondary schools that offered music during regular school hours in the 2008–09 school year.

² Percents are based on the 89 percent of public secondary schools that offered visual arts during regular school hours in the 2008–09 school year.

³ Percents are based on the 12 percent of public secondary schools that offered dance during regular school hours in the 2008–09 school year.

⁴ Percents are based on the 45 percent of public secondary schools that offered drama/theatre during regular school hours in the 2008–09 school year.

⁵ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: The 2009–10 survey asked secondary school principals about their 2008–09 staff who provided instruction in the arts. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents for each subject area are based on the percentage of public secondary schools that offered music (90 percent), visual arts (91 percent), dance (16 percent), and drama/theatre (46 percent) during regular school hours in the 2009–10 school year. The 2009–10 survey asked about the primary space used for instruction and district curriculum guides during the current school year.

NOTE: Detail may not sum to totals because of rounding.

† Not applicable.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents for each subject area are based on the percentage of public secondary schools that offered music (90 percent), visual arts (91 percent), dance (16 percent), and drama/theatre (46 percent) during regular school hours in the 2009–10 school year. The 2009–10 survey asked about the primary space used for instruction during the current school year.

² Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: The questionnaire wording was “Which of the following statements **best** describes the space used for teaching the subject at your school this school year?”

SOURCE: U.S. Department of Education, National Center for Education Statistics, Fast Response Survey System, “Secondary School Arts Education Survey: Fall 2009,” FRSS 101, 2009–10.

76 percent or more	40	(5.4)	37	(5.8)	52	(9.6)

¹ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Percents are based on the percentage of teachers who participated in each professional development activity (50 percent for applied study in art studio, 51 percent for developing knowledge about visual arts, 57 percent for connecting visual arts learning with other subject areas, 43 percent for research on arts and student learning, 60 percent for integrating educational technologies into visual arts instruction, 78 percent for incorporating state or district standards into instruction, 77 percent for student assessment, and 36 percent for a subject area that is unrelated to visual arts). Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

¹ Respondents were asked to report the total number of different groups or sections taught during their most recent full week of teaching. For example, if a visual arts specialist taught graphic design as a separate course to 3 different groups of students, the teacher was instructed to report 3 sections of graphic design. If the teacher taught of graphic design to the same group of students multiple times a week, he/she was asked to count this class only once.

² Respondents were asked to report the total number of students in the different classes taught. For example, if a visual arts specialist taught 3 different groups or sections of graphic design, each with 20 students enrolled, the teacher was instructed to report a total enrollment of 60 for graphic design.

³ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Averages were computed across all records in the survey and based on data that were weighted to national estimates. For example, the average number of classes taught by music teachers was computed by summing the weighted number of classes taught by all music teachers and dividing by the weighted number of music teachers in the study. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

† Not applicable.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Block schedule refers to a type of academic scheduling in which each student has fewer classes per day for a longer period of time; for example, block scheduling allows for class periods of an hour or more so that teachers can accomplish more in a class session.

NOTE: Detail may not sum to totals because of rounding. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

† Not applicable.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

NOTE: Percents are based on the percentage of teachers who used any formal assessments to determine student progress and achievement in the arts (98 percent of secondary music specialists and 99 percent of secondary visual arts specialists). Detail may not sum to totals because of rounding. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

No	19	(1.7)	22	(2.0)	51	(4.7)	64	(4.8)

‡ Not applicable.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents are based on the 94 percent of public elementary schools that reported instruction in music during regular school hours in the 1999–2000 school year.

² Percents are based on the 87 percent of public elementary schools that reported instruction in visual arts during regular school hours in the 1999–2000 school year.

³ Percents are based on the 20 percent of public elementary schools that reported instruction in dance during regular school hours in the 1999–2000 school year.

⁴ Percents are based on the 20 percent of public elementary schools that reported instruction in drama/theatre during regular school hours in the 1999–2000 school year.

⁵ Detail may not sum to totals because of rounding.

⁶ Schools could employ more than one type of instructor to teach arts subjects. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline.

NOTE: The data presented in this table may differ from previously published information because missing data from the 1999–2000 surveys were imputed for analysis in this report.

† Not applicable.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents are based on the 89 percent of classroom teachers who reported that their school had a music or visual arts specialist.

NOTE: Detail may not sum to totals because of rounding. The data presented in this table may differ from previously published information because missing data from the 1999–2000 surveys were imputed for analysis in this report. Arts specialists are education professionals with a teaching certificate in an arts discipline—such as music, visual arts, dance, or drama/theatre—who provide separate instruction in that discipline. Classroom teachers are teachers of self-contained classrooms; these teachers could teach arts areas as separate subjects or incorporate arts areas into other subjects.

! Interpret data with caution; the coefficient of variation is greater than or equal to 30 percent.

‡ Reporting standards not met.

¹ Percents are based on the 93 percent of public secondary schools that reported instruction in music during regular school hours in the 1998–99 school year.

² Percents are based on the 90 percent of public secondary schools that reported instruction in visual arts during regular school hours in the 1998–99 school year.

³ Percents are based on the 14 percent of public secondary schools that reported instruction in dance during regular school hours in the 1998–99 school year.

⁴ Percents are based on the 48 percent of public secondary schools that reported instruction in drama/theatre during regular school hours in the 1998–99 school year.

⁵ Other races/ethnicities include Hispanic, Asian/Pacific Islander, and American Indian/Alaska Native students.

NOTE: Detail may not sum to totals because of rounding. The 1999–2000 survey asked about the number of courses offered in the previous school year. The data presented in this table may differ from previously published information because missing data from the 1999–2000 surveys were imputed for analysis in this report.
