The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

1 Operational and student membership status of public elementary and secondary
2 Number of operating public elementary and secondary schools, by school type, charter, magnet, Title I, and Title I schoolwide status, and state or jurisdiction: School year 2010-117

3 Number of students in membership in operating public elementary and secondary schools, by school type, charter, magnet, Title I, and Title I schoolwide status, and state or jurisdiction: School year 2010-119

4 Number of regular public elementary and secondary schools with membership and pupil/teacher ratio, by instructional level and state or jurisdiction:
School year 2010-11
5 Average student membership size of regular public elementary and secondary schools with membership, by instructional level, membership size of largest and smallest school, and state or jurisdiction: School year 2010-1113

6 Number of city, suburban, town, and rural regular public elementary and secondary schools with membership and percentage distribution of students in membership, by state or jurisdiction: School year 2010-1115

7 Number and percent of students in city, suburban, town, and rural regular public elementary and secondary schools with membership who are eligible for free or reducedprice lunch, by state or jurisdiction: School year 2010-11

## Introduction

This report presents findings on the numbers and types of public elementary and secondary schools in the United States and other jurisdictions ${ }^{1}$ in the 2010-11 school year, using data from the Public Elementary/Secondary School Universe Survey of the Common Core of Data (CCD) survey system. The CCD is an annual collection of data that are reported by state education agencies (SEAs) to the National Center for Education Statistics through the U.S. Department of Education's EDFacts collection system.

The purpose of this report is to introduce new data through the presentation of tables containing descriptive information; therefore, the selected findings chosen for this report demonstrate the range of information available when using the CCD. The selected findings do not represent a complete review of all observed differences in the data and are not meant to emphasize any particular issue. This revised report includes updates to the tables and findings that reflect the 2010-11 provisional version 2a of the School universe file.

The Public Elementary/Secondary School Universe Survey can be used to report the numbers and types of schools. The information includes a school's status (new, continuing, closed, etc.), and whether it is a charter school, magnet school, and/or Title I school. The survey can also be used to report the numbers of students and the school's "locale type," that is, whether it is in a city, suburban, town, or rural area.

SEAs follow standard definitions for the data items they report to the CCD via the EDFacts collection system. In some cases, SEAs may be unable to report a data item or may not be able to follow the definition exactly. Examples of situations that could lead to missing data would be a state that collected only limited information about charter schools, or a state that did not have a way of identifying magnet schools. Fifty states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and the Bureau of Indian Education (BIE) reported 2010-11 CCD data through the EDFacts collection system; the Commonwealth of the Northern Mariana Islands and Guam reported directly to the CCD. The Department of Defense schools (also known as the Department of Defense Education Activity, or DoDEA) and American Samoa did not report data for the 2010-11 school year; the numbers and statuses of schools in these jurisdictions were carried over from prior year files and all the other data items were left as missing.

Not all schools report students. This is because the CCD allows a student to be reported in membership for only one school. ${ }^{2}$ Some schools, particularly vocational schools, provide education to students who are included in the membership of other schools. States identified the schools that provide services but do not count students in membership as "shared time" schools.

While tables include data for all of the CCD respondents, "United States" and "reporting states" totals in the tables are limited to the 50 states and the District of Columbia. They do not include data from the BIE, Department of Defense dependents schools (overseas and domestic), Puerto

[^0]Rico, or the other jurisdictions of American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, or the U.S. Virgin Islands.

Appendix A: Methodology and Technical Notes provides more information about the survey content and methodology. Appendix B: Common Core of Data Glossary provides definitions for data items found in this report. More information about the CCD surveys and products is available at http://nces.ed.gov/ccd.

## Selected Findings: 2010-11 School Year

- There were 98,817 operating public elementary/secondary schools in the 2010-11 school year (table 1). In this school year, 1,929 schools were closed and 1,665 new schools were opened. Most operating schools were regular schools $(88,929)$ that were responsible for instruction in the standard curriculum as well as other areas. An additional total of 2,206 schools focused primarily on special education services; 1,485 schools were identified as vocational schools; and 6,197 were identified as alternative education schools.
- By 2010-2011, charter schools had been established in 40 states and the District of Columbia, and 31 states and the District of Columbia had designated magnet schools (table 2). Charter schools enrolled about 1.8 million students, and magnet schools enrolled about 2.1 million students in 2010-11 (table 3).
- Across all regular public schools that had membership, the overall pupil/teacher ratio ${ }^{3}$ in 2010-11 was 15.7 (table 4), compared to 16.1 in 2009-10 (Chen 2011). In the 2010-11 school year, the ratio ranged from 10.9 in Vermont to 23.8 in Utah. The pupil/teacher ratio differed across school instructional levels: it was 15.6 in primary; 15.4 in middle; and 16.1 in high schools.
- School size differed by instructional level in 2010-11. On average, primary schools had 453 students in membership, middle schools had 576 students, and high schools had 847 students (table 5).
- More schools $(29,202)$ were in rural locations than in any other locale in 2010-11. An additional 22,492 were in cities; 24,461 schools were in suburban areas; and 11,849 were in towns (table 6). In contrast, the largest percentage of students attended suburban schools ( 34 percent), followed by schools in cities ( 29 percent), rural areas ( 25 percent), and towns ( 12 percent). These distributions were similar to those in 2009-10 (Chen 2011).
- Eligibility for free or reduced-price lunch under the National School Lunch Program is sometimes used as a proxy measure of poverty. Across the reporting states and the District of Columbia, on average, 48 percent of students were eligible for free or reducedprice lunch in 2010-11 (table 7), compared to the 47 percent reported in 2009-10 (Chen 2011). In 2010-11, the percentage of eligibility ranged from a low of 25 percent in New Hampshire to a high of 73 percent in District of Columbia. By locale, 60 percent of students in city schools were eligible for free or reduced-price lunch, compared to 52 percent in towns, 44 percent in rural areas, and 40 percent in suburban areas.

Tables

Table 1. Operational and student membership status of public elementary and secondary schools in the United States, by school type: School year 2010-11

| Operational and student membership status ${ }^{1}$ | All schools | School type |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Regular | Special education | Vocational education | Alternative education |
| Operating schools ${ }^{2}$ | 98,817 | 88,929 | 2,206 | 1,485 | 6,197 |
| Continuing | 96,797 | 87,379 | 2,047 | 1,426 | 5,945 |
| Added ${ }^{3}$ | 80 | 42 | 17 | 5 | 16 |
| Reopened | 190 | 61 | 69 | 37 | 23 |
| Changed agency ${ }^{4}$ | 85 | 69 | 5 | 2 | 9 |
| New ${ }^{5}$ | 1,665 | 1,378 | 68 | 15 | 204 |
| Non-operating | 2,861 | 2,002 | 82 | 17 | 760 |
| Inactive ${ }^{6}$ | 564 | 200 | 10 | 6 | 348 |
| Closed | 1,929 | 1,486 | 72 | 7 | 364 |
| Future ${ }^{7}$ | 368 | 316 | 0 | 4 | 48 |
| Student membership status of operating schools |  |  |  |  |  |
| With membership | 95,111 | 88,019 | 1,725 | 388 | 4,979 |
| Without membership, providing instruction (shared time) ${ }^{8,9}$ | 1,483 | 73 | 154 | 919 | 337 |
| Without membership (not shared time) ${ }^{9}$ | 2,223 | 837 | 327 | 178 | 881 |

${ }^{1}$ Membership is the count of students enrolled on October 1 of the reported school year.
${ }^{2}$ Operating schools include all those providing services during the reported school year.
${ }^{3}$ Added schools are reported for the first time although they have been operating for more than 1 year.
${ }^{4}$ Schools that changed agency are affiliated with a different local education agency than that reported in the previous year.
${ }^{5}$ New schools opened for the first time within the school year reported.
${ }^{6}$ Inactive schools are closed temporarily and expected to reopen within 3 years.
${ }^{7}$ Future schools are expected to open within 2 years.
${ }^{8}$ Shared time schools provide instruction on a regular basis to students whose membership is reported for some other school.
${ }^{9}$ Includes schools for which membership is 0 , missing, or not applicable.
NOTE: Table includes the 50 states and the District of Columbia. Charter status is independent of school type; charter schools are included in the school type totals.

Table 2. Number of operating public elementary and secondary schools, by school type, charter, magnet, Title I, and Title I schoolwide status, and state or jurisdiction: School year 2010-11—Continued

| State or jurisdiction | Total number of operating schools ${ }^{1}$ | School type |  |  |  |  | Charter | Magnet ${ }^{2}$ | Title ${ }^{3}$ | Title I schoolwide ${ }^{3}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Regular | Special education | Vocational education |  | Alternative education |  |  |  |  |
| Department of Defense dependents schools, Bureau of Indian Education, and other jurisdictions |  |  |  |  |  |  |  |  |  |  |
| Department of Defense (DoDEA) | 191 | 191 | 0 | 0 | 0 | 0 | 0 | 0 | - | - |
| Bureau of Indian Education | 173 | 173 | 0 | 0 | 0 | 0 | $\dagger$ | - | 173 | 173 |
| American Samoa | 28 | 27 | 0 | 1 |  | 0 | - | - | - | - |
| Guam | 40 | 40 | 0 | 0 | 0 | 0 | - | - | $\dagger$ | $\dagger$ |
| Commonwealth of the |  |  |  |  |  |  |  |  |  |  |
| Northern Mariana Islands | 30 | 30 | 0 | 0 | 0 | 0 | $\dagger$ | $\dagger$ | 0 | $\dagger$ |
| Puerto Rico | 1,473 | 1,411 | 24 | 30 |  | 8 | $\dagger$ | $\dagger$ | 1,456 | 1,371 |
| U.S. Virgin Islands | 32 | 31 | 0 |  | 1 | 0 | $\dagger$ | 1 | - | - |

— Not available.
$\dagger$ Not applicable. Some states/jurisdictions do not have charter school authorization and some states/jurisdictions do not designate magnet $\ddagger$ Reporting standards not met. Data missing for more than 80 percent of schools in the state or jurisdiction.
${ }^{1}$ Total number of operating schools excludes schools also reported by the Bureau of Indian Education (BIE). The number of operating schools shared with the BIE include two in Arizona, one in Michigan, and eight in North Dakota.
${ }^{2}$ Arizona, Massachusetts, New Jersey, and New Mexico have magnet schools but were not able to provide data that indicate school's magnet status. Total includes suppressed data due to unmet reporting standards.
${ }^{3}$ Schools eligible for Title I schoolwide programs are also included in the count of all Title I eligible schools. A Title I eligible school is one in which the percentage of children from low-income families is at least 35 percent of children from low-income families served by the LEA as a whole. A schoolwide Title I eligible school has a percentage of low-income students that is at least 40 percent. For the complete definitions, see Appendix B: Common Core of Data Glossary.
${ }^{4}$ A reporting states total is shown if data for any item in the table were not available for some, but not more than 15 percent, of all schools in the United States.
NOTE:Every school is assigned a school type based on its instructional emphasis; numbers and types of schools may differ from those published by states. See Appendix B: Common Core of Data Glossary. A school may also be included under the Charter, Magnet, and/or Title I statuses, which are independent of one another and of school type.

Table 3. Number of students in membership in operating public elementary and secondary schools, by school type, charter, magnet, Title I, and Title I schoolwide status, and state or jurisdiction: School year 2010-11-Continued

| State or jurisdiction | School type |  |  |  |  | Charter | Magnet ${ }^{2}$ | Title $\left.\right\|^{3} \begin{array}{r}\text { Title } \\ \text { schoolwide }\end{array}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total number of students ${ }^{1}$ | Regular | Special education | Vocational education | Alternative education |  |  |  |  |
| Department of Defense dependents schools, Bureau of Indian Education, and other jurisdictions |  |  |  |  |  |  |  |  |  |
| Department of Defense (DoDEA) |  |  | $\dagger$ | $\dagger$ | $\dagger$ | $\dagger$ | $\dagger$ | - | - |
| Bureau of Indian Education | 41,853 | 41,853 | $\dagger$ | $\dagger$ | $\dagger$ | $\dagger$ | - | 41,853 | 41,853 |
| American Samoa | - | - | $\dagger$ | - | $\dagger$ | - | - | - | - |
| Guam | 31,618 | 31,618 | $\dagger$ | $\dagger$ | $\dagger$ | - | - | $\dagger$ | $\dagger$ |
| Commonwealth of the |  |  |  |  |  |  |  |  |  |
| Northern Mariana Islands | 11,105 | 11,105 | $\dagger$ | $\dagger$ | $\dagger$ | $\dagger$ | $\dagger$ | $\dagger$ | $\dagger$ |
| Puerto Rico | 473,410 | 453,795 | 2,316 | 16,950 | 349 | $\dagger$ | $\dagger$ | 471,910 | 442,844 |
| U.S. Virgin Islands | 15,495 | 15,495 | $\dagger$ | 0 | $\dagger$ | † | 1,399 | - | - |

$\dagger$ Not applicable. Membership reported as not applicable or some states do not have charter school authorization and some states do not designate magnet schools.
$\ddagger$ Reporting standards not met. Data missing for more than 80 percent of schools in the state or jurisdiction.
${ }^{1}$ Membership is the count of students enrolled on October 1 of the reported school year. Individual state total number of students is included only if the state or jurisdiction reports data for regular, special education, vocational education, and alternative education school types.
${ }^{2}$ Total includes suppressed data due to unmet reporting standards.
${ }^{3}$ Schools eligible for Title I schoolwide programs are also included in the count of all Title I eligible schools.
${ }^{4}$ A reporting states total is shown if data for any item in the table were not available for some, but not more than 15 percent, of all schools in the United States.
NOTE: Numbers and types of schools may differ from those published by states. See Appendix B: Common Core of Data Glossary. A school may also be included under the Charter, Magnet, and/or Title I statuses, which are independent of one another and of school type.

$\ddagger$ Reporting standards not met. For individual states, Data reported for less than 80 percent of schools in the state or jurisdiction; for U.S. total,
${ }^{1}$ Number of schools excludes schools also reported by the Bureau of Indian Education (BIE). The number of schools shared with the BIE include two in Arizona, one in Michigan, and eight in North Dakota.
${ }^{2}$ U.S. totals include the 50 states and the District of Columbia.
NOTE: Pupil/teacher ratio is the number of students (membership) for each full-time equivalent (FTE) teacher. Membership is the count of students enrolled on October 1 of the reported school year. FTE is the amount of time required to perform an assignment stated as a proportion of a full-time position. Instructional levels are primary (low-grade prekindergarten to 3, high-grade up to 8); middle (low-grade 4 to 7 , high-grade 4 to 9 ); high (low-grade 7 to 12, high-grade 12 only); and other (any configuration not falling within the previous three, including ungraded schools). U.S. total averages are the ratio of total students to total teacher FTE.

— Not available.
$\dagger$ Not applicable.
${ }^{1}$ Total number of schools excludes schools also reported by the Bureau of Indian Education (BIE). The number of schools shared with the BIE include two in Arizona, one in Michigan, and eight in North Dakota.
${ }^{2}$ Total number of students is the count of students enrolled on October 1 of the reported school year.
${ }^{3}$ U.S. totals include the 50 states and the District of Columbia.
NOTE: Detail may not sum to total due to rounding. City includes the subcategories of Large City, Mid-size City, and Small City. Suburban includes the subcategories of Large Suburb, Mid-size Suburb, and Small Suburb. Town includes the subcategories of Town, Fringe; Town, Distant; and Town, Remote. Rural includes the subcategories of Rural, Fringe; Rural, Distant; and Rural, Remote. See Appendix B: Common Core of Data Glossary.

$\dagger$ Not applicable.
${ }^{1}$ This table only includes schools where the enrollment counts and the free or reduced-price lunch counts are reported.
${ }^{2}$ A reporting states total is shown if data for any item in the table were not available for some, but not more than 15 percent, of all schools in the United States.
NOTE: Membership is the count of students enrolled on October 1 of the reported school year. City includes the subcategories of Large City, Midsize City, and Small City. Suburban includes the subcategories of Large Suburb, Mid-size Suburb, and Small Suburb. Town includes the subcategories of Town, Fringe; Town, Distant; and Town, Remote. Rural includes the subcategories of Rural, Fringe; Rural, Distant; and Rural, Remote. See Appendix B: Common Core of Data Glossary. The number of students eligible for free or reduced-price lunch was unavailable for .42 percent of U.S. schools, which included .29 percent of all students.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2010-11 provisional version 2a.

## Appendix A: Methodology and Technical Notes

Common Core of Data survey system. The State Nonfiscal Survey of Public Elementary/ Secondary Education, the Local Education Agency Universe Survey, and the Public Elementary/Secondary School Universe Survey are the nonfiscal components of the Common Core of Data (CCD) survey system. State Education Agencies (SEAs) report these data annually to the National Center for Education Statistics (NCES).

Participation in 2010-11. SEAs report nonfiscal data through the Department of Education's EDFacts collection system. The 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and the Bureau of Indian Education participated in EDFacts for the 2010-11 school year; Guam and the Commonwealth of the Northern Mariana Islands reported directly to the CCD. The Department of Defense schools and American Samoa did not report data for the 2010-11 school year.

States report data to the EDFacts collection system through multiple file groups that fall into different reporting schedules throughout the year. The 2010-11 school year EDFacts collection of CCD data opened in January 2011. Depending on the specific variable or state, the data for the original 1a version of the report were extracted from EDFacts between January 21, 2011 and November 15, 2011. In June 2012, NCES conducted a special collection effort to improve data quality on the 2010-11 school universe file. This revised report includes corrections made by states resulting from this special collection effort which were extracted from EDFacts on July 18, 2012. Further updates from states may be included in subsequent file releases.

Totals. "United States" and "reporting states" totals in the tables include only the 50 states and the District of Columbia. These totals exclude data from the Bureau of Indian Education, DoDEA, Puerto Rico, or the other jurisdictions of American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, or the U.S. Virgin Islands.

Missing data. Not all states collect and report all of the data items requested in the CCD surveys. National Center for Education Statistics (NCES) attempts to correct missing data first by drawing on other sources. For example, a state may be unable to report data during the collection period, but publish them later, through a written report or website. NCES imports data from these other published sources to complete missing directory items. NCES may carry some information, such as address or telephone number, forward from a prior year's report if it is missing in the current year. In general, NCES does not carry forward prior year statistical information, such as the number of students in membership, to replace missing data items. An exception was made in 2010-11 for the DoDEA schools and American Samoa, neither of which reported data for the 2010-11 school year; the numbers and statuses of schools in these jurisdictions were carried over from prior year files and all the other data items were left as missing.

While NCES does not impute (replaces a nonresponse with a plausible value) missing items in the Public Elementary/Secondary School Universe Survey (used in this report) or the Local Education Agency Universe Survey, NCES imputes some missing items in the State Nonfiscal Survey of Public Elementary/Secondary Education.

When reporting results, NCES treats missing data within individual states differently than it treats missing data across all states and the District of Columbia. In order to report a state total of an item, the SEA must have reported at least 80 percent of possible cases. If information is missing for some, but no more than 15 percent, of possible cases (e.g., schools) across the 50 states and District of Columbia, NCES calculates totals and identifies them as "reporting states" totals (rather than totals for the United States).

The EDFacts collection system accepted blank responses in 2010-11 school year reports and did not require that states distinguish among missing, not applicable, and "zero" values. NCES used statistical editing procedures to identify responses as missing, not applicable, or zero after the fact, but it is possible that some blank responses were categorized incorrectly.

Data quality. NCES performed extensive quality review of all CCD data submissions. Data editors ask state CCD coordinators to correct or confirm any numbers that appear out of range when compared with other states' data or with the state's reports in previous years. If no explanation is forthcoming for anomalous data, NCES will either edit the value (as an example, replace a reported value with the sum of detail) or change it to missing. For example, if a state reported a school's enrollment of $12^{\text {th }}$-grade students that was substantially larger than the enrollment of $11^{\text {th }}$-grade students in the previous year, and the state could not explain the discrepancy, NCES would change the reported number of $12^{\text {th }}$-grade students to missing.

NCES also applies additional data edits to all three data files to reduce data anomalies. For example, in 2010-11, some states reported more full-time equivalent (FTE) counts at the school level than the local education agency (LEA) level and the states confirmed that the LEA figures were accurate. NCES edited the FTE data at the school level to match the data at the LEA level by proportionately adjusting the counts.

Special collection effort to improve data quality. In May 2012, NCES became aware of data errors for key data items for several schools on the published version of the SY 2009-10 school file; in some cases these errors also affected district level data on the published 1a version of the LEA universe files for SY 2009-10. As a result, NCES conducted an in depth quality review of both the school and LEA universes for both the published SY 2009-10 school and LEA universe files and not yet published SY 2010-11 school and LEA universe files. During this review, NCES developed a revised editing strategy that more accurately identified data items that were likely to have errors. The review focused on school and school district enrollment, grade 12 enrollment, and free and reduced price lunch variables and related ratios such as pupil/teacher ratio, percent of enrollment from grade 12, and percent of students eligible for free and reduced price lunch. In the past data items were only compared to the reported data from the prior year for each school or LEA. The revised methodology used data from multiple years and was applied to both the reported data items and related ratios. Specifically, an average variation over the prior 4 years was computed based on the differences between each year and the other 3 years. Then, the average variation between the target year and the four preceding years was computed based on the differences between target year and each of the 4 prior years. The average variation for the target year was compared to the average variation among the prior years; cases with large differences were flagged as potential errors. Additionally, a requirement was added that in order for an item to be identified as a potential error, both the count and a related ratio must be identified as potential errors. For example, for total student membership to be flagged as a
potential error, both total membership and a related ratio, such as pupil/teacher ratio, must be flagged.

NCES subsequently applied this revised editing methodology to both the SY 2009-10 and SY 2010-11 school and LEA universe files. This resulted in identification of over 1,000 questionable data items in the school and LEA universe files for both school years. In June 2012, NCES generated edit reports for each state with affected data items and provided these to the SEA EDFacts coordinators asking them to submit corrected data or provide a justification for the large variation in the reported data. In most cases, SEAs provided corrections of the data items in question or provided an acceptable explanation for the apparent data anomaly. CCD Survey staff reviewed the revised data and explanations submitted by SEAs to ensure that revised data were of acceptable quality and that any unchanged items were adequately explained. For data items that were not adequately resolved CCD Survey Staff applied suppression codes indicating that these items did not meet NCES data quality standards. This report is based on the 2010-11 provisional version 2a data file, which contains revisions to only the data items that NCES identified as potential errors during this process.

School and agency operational and membership status. In order to ensure continuity over time, the CCD includes schools and agencies that may not be operating during the school year reported. "Inactive" schools and agencies are those that are closed temporarily with the intention that they will be reopened; these schools and agencies retain their original NCES identification code. When an LEA or school ceases to operate permanently, the CCD includes these as "Closed" schools or agencies for one school year after closing. "Future" schools are those that are scheduled to open, but have not yet begun to operate.

Some operational schools or agencies may legitimately not report students. A vocational school or a LEA operating only vocational schools may provide classes for students from a number of regular schools or school districts. In this case, the students are usually reported in the membership of their school of record, and the vocational school (identified as a "shared time" school) shows no student membership. It is also possible that an operational school that is not "shared time" can be reported with no membership. For example, the number of students may be missing, or the school could have not yet enrolled students when it was reported.

Reportable programs. NCES makes every effort to ensure that the CCD and EDFacts files agree in the numbers of schools they contain. Because the EDFacts system collects data for a number of programs in the U.S. Department of Education, it includes some entities that do not meet the CCD's definition of a school (e.g., a self-contained magnet or alternative program within a school is counted as a separate school in EDFacts, but not in the CCD). A total of 301 of these entities, referred to as "reportable programs," were excluded from this report.

School type edits. Beginning with the 2007-08 school year, the CCD edits the reported school type if it does not agree with the CCD definition. For example, if a school name indicated that it focused primarily on the needs of students with disabilities or if the state reported that at least 80 percent of the students enrolled in the school had special education individual education programs (IEPs), NCES reclassified the school as a special education school. (The number of students with IEPs was reported to EDFacts collection system at the school and LEA level, but the CCD only contains IEP data at the LEA level.) Similarly, if a school name suggested that it
was a vocational or alternative school, NCES researched the school through different resources (e.g., school website or education association) or by calling the school to determine if the school should be reclassified as a vocational or alternative school. NCES asked CCD Coordinators to review these reclassifications, and if they provided evidence that a school met CCD criteria for the originally reported type, the school type was not changed.

Agreement across survey levels. For LEA membership counts, SEAs report students in the LEA that initially receives funds for their education and has responsibility for their education. For school membership counts, SEAs report students in the school they attend. Each student may only be reported for a single school and for a single agency. Some students receive a public education outside a regular school district (for example, they may attend a state-operated residential school). Some students in a regular school district may not be served by a school. Hospitalized and homebound students, for example, may be reported in the membership for a regular school district but not for any of the district's schools. NCES derives the numbers of students and staff shown in the tables for each CCD First Look report from the survey represented in that report. Therefore, the numbers may differ across reports. NCES considers the numbers reported in the State Nonfiscal Survey of Public Elementary/Secondary Education to be the official statistics for a state.

Staff counts. All staff counts (including teachers) are reported in FTE units. This is the amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time an individual is employed by the time normally required for a full-time position.

For more detailed explanations on CCD methodology and technical information, see the documentation to the NCES Common Core of Data School Universe Survey: School Year 201011, which can be accessed at http://nces.ed.gov/ccd/ccddata.asp.

## Appendix B: Common Core of Data Glossary

Added School-A school that is reported for the first time although it has been in operation for more than 1 year.

Alternative Education School-A public elementary/secondary school that (1) addresses needs of students that typically cannot be met in a regular school, (2) provides nontraditional education, (3) serves as an adjunct to a regular school, or (4) falls outside the categories of regular, special education, or vocational education.

Bureau of Indian Education School and District-A school or district that is directly funded by the Bureau of Indian Education (formerly Bureau of Indian Affairs), U.S. Department of the Interior.

Changed Agency School-A school that is affiliated with a different local education agency than was reported on the previous year's Common Core of Data.

Charter School-A school providing free public elementary and/or secondary education to eligible students under a specific charter granted by the state legislature or other appropriate authority, and designated by such authority to be a charter school.

City Locale-See "Locale, Urban-Centric".
Closed School-A school that was operating in the prior year, but is closed in the current reporting year with no expectation of re-opening.

Elementary/secondary Education-Programs providing instruction, or assisting in providing instruction, for students in prekindergarten, kindergarten, grades 1 through 12, and ungraded programs.

Free or Reduced-Price Lunch Eligible-The number of students who are eligible for free or reducedprice lunch under the National School Lunch Act, which provides cash subsidies for free and reducedprice lunches to students based on income and family size.

Full-Time Equivalency (FTE)-The amount of time required to perform an assignment stated as a proportion of a full-time position and computed by dividing the amount of time employed by the time normally required for a full-time position.

Future School-A school that is scheduled to become operational within 2 years.
High School-A school offering a low grade of 7 or higher and a high grade of 12 .
Inactive School-A school that is temporarily closed and expected to reopen within 3 years.
Instructional Level-The lowest and highest grade offered by a school determines its instructional level. The four instructional levels are primary (lowest grade of prekindergarten to 3 ; highest grade up to 8), middle (lowest grade 4 to 7 ; highest grade 4 to 9 ), high (lowest grade 7 to 12 ; highest grade 12), and other (all other configurations, including prekindergarten, kindergarten, or grades 1 to 12).

Kindergarten-A group or class that is part of a public school program and is taught during the year preceding first grade.

Local Education Agency (LEA)-The agency at the local level whose primary responsibility is to operate public schools or to contract for public school services.

Locale Code, Metro-Centric-See "Locale, Metro-Centric".

## Locale Code, Urban-Centric-See "Locale, Urban-Centric".

Locale, Metro-Centric-An indication of school's location relative to a populous area. The locales assigned to school districts are based on the locale code of their schools, weighted by the size of the schools' membership. The metro-centric locale assignment system was used until 2005-06.

The locale code categories are defined below.
Large city: A principal city of a metropolitan core based statistical area (CBSA), with the city having a population greater than or equal to 250,000 .

Mid-size city: A principal city of a metropolitan CBSA, with the city having a population less than 250,000.

Urban fringe of a large city: Any incorporated place, Census-designated place, or non-place territory within a metropolitan CBSA of a large city and defined as urban by the Census Bureau.

Urban fringe of a mid-size city: Any incorporated place, Census-designated place, or non-place territory within a metropolitan CBSA of a mid-size city and defined as urban by the Census Bureau.

Large town: An incorporated place or Census-designated place with a population greater than or equal to 25,000 and located outside a metropolitan CBSA or inside a micropolitan CBSA.

Small town: An incorporated place or Census-designated place with a population less than 25,000 and greater than or equal to 2,500 and located outside a metropolitan CBSA or inside a micropolitan CBSA.

Rural, outside CBSA: Any incorporated place, Census-designated place, or non-place territory not within a metropolitan CBSA or within a micropolitan CBSA and defined as rural by the Census Bureau.

Rural, inside CBSA: Any incorporated place, Census-designated place, or non-place territory within a metropolitan CBSA and defined as rural by the Census Bureau.

Locale, Urban-Centric-An indication of school's location relative to a populous area. The locales assigned to school districts are based on the locale code of their schools, weighted by the size of the schools' membership. The urban-centric locale assignment system has been used starting in 2006-07.

The locale code categories are defined below.
City, Large: Territory inside an urbanized area and inside a principal city with population of 250,000 or more.

City, Mid-size: Territory inside an urbanized area and inside a principal city with population less than 250,000 and greater than or equal to 100,000 .

City, Small: Territory inside an urbanized area and inside a principal city with population less than 100,000 .

Suburb, Large: Territory outside a principal city and inside an urbanized area with population of 250,000 or more.

Suburb, Mid-size: Territory outside a principal city and inside an urbanized area with population less than 250,000 and greater than or equal to 100,000 .

Suburb, Small: Territory outside a principal city and inside an urbanized area with population less than 100,000 .

Town, Fringe: Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.

Town, Distant: Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.

Town, Remote: Territory inside an urban cluster that is more than 35 miles from an urbanized area.

Rural, Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster.

Rural, Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

Rural, Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.

Magnet School or Program—A special school or program designed to attract students of different racial/ethnic backgrounds for the purpose of reducing, preventing, or eliminating racial isolation (50 percent or more minority enrollment); and/or to provide an academic or social focus on a particular theme (e.g., science/mathematics, performing arts, gifted/talented, or foreign language).

Middle School-A school offering a low grade of 4 to 7 and a high grade of 9 or lower.
New School-A school that is opened for the first time within the reported school year.
Nonoperating School-A school that does not provide services during the reported school year. Includes inactive, closed, and future schools.

Operating School-A school that provides services during the reported school year. Includes continuing, added, reopened, changed agency, and new schools.

Operational Status, School-Classification of the operational condition of a school. Classifications include currently operational ("continuing"); added; reopened; changed agency; new; temporarily closed and may reopen within 3 years ("inactive"); closed; and scheduled to be operational within 2 years ("future").

Other Instructional Level School-A school offering a grade span that is not included in primary, middle, or high school definitions.

Prekindergarten - A group or class that is part of a public school program taught during the year or years preceding kindergarten, excluding Head Start students, unless Head Start is part of an authorized public education program of an LEA.

Primary School-A school offering a low grade of prekindergarten to 3 and a high grade of 8 or lower.

Public School-An institution that provides educational services and (1) has one or more grade groups (prekindergarten through grade 12) or is ungraded, (2) has one or more teachers to give instruction, (3) is located in one or more buildings or sites, (4) has an assigned administrator, (5) receives public funds as primary support, and (6) is operated by an education agency.

Pupil/Teacher Ratio-The ratio of pupils to teachers within an entity (i.e., state, school district, or school). The district-level pupil/teacher ratio uses the total of pupils and the total FTE number of teachers reported in the schools associated with the school district. The pupil/teacher ratio does not represent class size, but rather is a district-level measure of pupils and teachers.

Regular School-A public elementary/secondary school providing instruction and education services that does not focus primarily on special education, vocational/technical education, or alternative education, or on any of the particular themes associated with magnet/special program emphasis schools.

Reopened School-A school that was closed in the prior year and is reopened during the reported school year.

Reportable Program-A program within a school that may be self-contained, but does not have its own principal.

Rural Locale-See "Locale, Urban-Centric".
Schoolwide Title I Eligible School-A school that is Title I eligible and its percentage of low-income students is at least 40 percent. (See also "Title I Eligible School".)

Shared Time School-A school in which some or all of the students are enrolled at a different school of record and attend the shared time school on a part-day basis: for example, a regional vocational center attended by students from multiple high schools on a part-day basis.

Special Education School-A public elementary/secondary school that focuses primarily on special education-including instruction for students with any of the following conditions: autism, deafblindness, developmental delay, hearing impairment, mental retardation, multiple disabilities, orthopedic impairment, serious emotional disturbance, specific learning disability, speech or language impairment, traumatic brain injury, visual impairment, and other health impairments-and that adapts curriculum, materials, or instruction for students served.

State Education Agency (SEA)-An agency of the state charged with primary responsibility for coordinating and supervising public instruction, including setting standards for elementary and secondary instructional programs.

Student-An individual for whom instruction is provided in an elementary or secondary education program that is not an adult education program and is under the jurisdiction of a school, school system, or other education institution.

Student Membership-Annual headcount of students enrolled in school on October 1 or the school day closest to that date. In any given year, some small schools will not have any students.

Suburb Locale-See "Locale, Urban-Centric".
Teacher-A professional school staff member who instructs students in prekindergarten, kindergarten, grades 1 through 12, or ungraded classes and maintains daily student attendance records.

Title I Eligible School-A school designated under appropriate state and federal regulations as being high poverty and eligible for participation in programs authorized by Title I of P.L. 107-110. A Title I
eligible school is one in which the percentage of children from low-income families is at least as high as the percentage of children from low-income families served by the LEA as a whole or that the LEA has designated as Title I eligible because 35 percent or more of the children are from low-income families.

Town Locale-See "Locale, Urban-Centric".
Ungraded Class-A class that is not organized on the basis of grade grouping and has no standard grade designation. This includes regular classes that have no grade designations and special classes for exceptional students that have no grade designations. Such a class is likely to contain students of different ages who, frequently, are identified according to level of performance in one or more areas of instruction rather than according to grade level or age level.

Vocational Education School—A public elementary/secondary school that focuses primarily on providing formal preparation for semiskilled, skilled, technical, or professional occupations for high school-age students who have opted to develop or expand their employment opportunities, often in lieu of preparing for college entry.

[^0]:    ${ }^{1}$ The CCD includes the 50 states, the District of Columbia, DoDEA, BIE, Puerto Rico and the four other jurisdictions of American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands. For ease of reading, in this report, the term "state" or "states" refers to these entities.
    ${ }^{2}$ Membership is the count of students enrolled on October 1 of the reported school year.

[^1]:    ${ }^{3}$ Pupil/teacher ratio is the number of students for each full-time equivalent (FTE) teacher. FTE is the amount of time required to perform an assignment stated as a proportion of a full-time position.
