

ERRATA SHEET

SASS PFS First Look Report (NCES 2014-064)

The following tables were identified as having an error in *Principal Attrition and Mobility: Results From the 2012–13 Principal Follow-up Survey* (NCES 2014-064):

- Table 10. Number and percentage distribution of 2012-13 status of public school principal leavers, by total years of experience as a principal in any school in 2011-12: 2012-13.
- Table 11. Number and percentage distribution of 2012-13 status of private school principal leavers, by total years of experience as a principal in any school in 2011-12: 2012-13.

In the published First Look Report, Tables 10 and 11 listed the column variable as “Years of experience as a principal in ANY school in 2011-12”. The estimates in the table were identified as corresponding to the variable “Years of experience as a principal in THIS school”.

Tables 10 and 11 and their corresponding standard error tables (Table A-10 and Table A-11) have been updated to reflect the correct estimates for “Years of experience as a principal in ANY school in 2011-12”.

The revised PDF for *Principal Attrition and Mobility: Results From the 2012–13 Principal Follow-up Survey* (NCES 2014-064rev) can be found here:
