# Rounds to zero.

<sup>1</sup> Bias is significant at the 0.05 level.<sup>2</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>3</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>4</sup> Bias in the sample mean is estimated as the product of the base-weighted nonresponse rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight)<sup>5</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).

† Not applicable.

# Rounds to zero.

<sup>1</sup> Bias is significant at the 0.05 level.<sup>2</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>3</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>4</sup> Bias in the sample mean is estimated as the product of the base-weighted nonresponse rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight)<sup>5</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).

**Table H-5b. Nonresponse bias before and after weight adjustments for the sample using the F3F1 panel weight, by selected categorical variables: 2012**

# Rounds to zero.

<sup>1</sup> Bias is significant at the 0.05 level.<sup>2</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using base weight) and the mean of all sample cases (using the base weight).<sup>3</sup> Relative bias is defined as the ratio of estimated bias to the weighted mean of the respondent cases.<sup>4</sup> Bias in the sample mean is estimated as the product of the base-weighted nonresponse rate and the difference between the mean of respondent cases (using base weight) and the mean of nonrespondent cases (using the base weight)<sup>5</sup> Bias in the sample mean is estimated as the difference between the mean of respondent cases (using the specified weight) and the mean of all sample cases (using the specified weight).

**Table H-6b. Nonresponse bias before and after weight adjustments for the sample using the F3F1 transcript weight, by selected categorical variables: 2012**

## **Appendix K. Extant Sources**

---

*This page left intentionally blank.*

## K.1 ECB-based Linked Data From External Sources

Ancillary data from various extant sources have, in a number of instances, been imported into the Education Longitudinal Study of 2002 (ELS:2002) database and integrated into the electronic codebook (ECB). For each external data source, separate files were constructed that can be linked to the student file. Sample members have one or more records on each data source file when data are available. If information is not available for that data source, then the student record was excluded from that data source file. The following data source files may be accessed:

- the Central Processing System (CPS),
- the National Student Loan Data System (NSLDS),
- the Scholastic Assessment Test (SAT),
- the ACT, and
- the General Educational Development Test (GED).

Some composite variables have been constructed from data obtained from the various extant data sources and included on the student file. In some instances, such as the ACT and SAT, the available data represent the merging of sources: test scores obtained from schools in the high school transcript component of ELS:2002, and data obtained from records matching with the College Board (SAT) or ACT.

Each of the ancillary data sources is briefly described in this appendix.

### K.1.1 CPS (Central Processing System—FAFSA)

This database contains all information from the FAFSA (Free Application for Federal Student Aid) for all students who applied for aid in any given academic year and has been matched to academic years 2004–05, 2005–06, 2006–07, 2009–10, 2010–11, 2011–12, 2012–13, and 2013–14. Information includes Expected Family Contribution (EFC) as well as responses to FAFSA questions.

### K.1.2 NSLDS (National Student Loan Data System)

The NSLDS database contains records of all federal loan and Pell grant information for anyone who has such a loan or grant. Information includes dates and amounts for loans, name of loan program (e.g., Stafford, Perkins), and dates and amounts for Pell grants.

### K.1.3 SAT

SAT scores were collected in the ELS:2002 high school transcript study and have been augmented through records matching with the College Board, based on the year 2004 and earlier. Verbal and math scores are included as well as AP scores. Additionally, school-level mean scores have been included for individual sample members. An SAT-ACT concordance was created, so that both sets of scores would be on a common scale.

#### **K.1.4 ACT**

ACT scores were collected in the ELS:2002 transcript study and have been augmented through records matching. Scores include the ACT composite score and scores in English, math, reading, and science. In addition, school-level mean ACT composite scores have been linked to individual ELS:2002 sample members. An SAT-ACT concordance was created, so that both sets of scores would be on a common scale.

#### **K.1.5 GED Test and Survey Data**

The GED provides the basis for high school equivalency certification. Where records could be matched for ELS:2002 sample members who took the GED, this information has been incorporated into the ELS:2002 database. Specific information includes state in which tested, whether passed or failed, and responses to certain GED survey items.

*Accessing the data.* All of the ancillary data files contain a Stu\_ID field which corresponds to the Stu\_ID field contained in the student file. The student file can be linked to any of the extant data files using that field. The following ancillary data files all have up to one record per applicable sample member: CPS 2004–2005, CPS 2005–2006, CPS 2006–2007, CPS 2009–2010, CPS 2010–2011, CPS 2011–2012, CPS 2012–2013, CPS 2013–2014, and GED. The only extant data files that have multiple records per sample member are the NSLDS Loan and Pell files. Noting the absence of CPS data for academic years 2007-08 and 2008-09, this is a product of timing with respect to the period between second follow-up and third follow-up data file construction. At the time the second follow-up files were constructed, data was gathered from the CPS for all academic years available at that time, beginning with the modal academic year, 2004-05. Similarly, data was gathered from CPS for all academic years available during third follow-up data file construction, during which time data was no longer available for academic years 2007-08 and 2008-09.

When merging the NSLDS Loan file with the student file, the resulting dataset will contain at least one row for cases common to both files and multiple rows for cases where multiple rows exist in the NSLDS Loan file. The values of student file variables included in the resulting dataset will be replicated on each row for any case that has multiple rows in the resulting dataset.

Like the NSLDS Loan file, when merging the NSLDS Pell file with the student file, the resulting dataset will contain at least one row for cases common to both files and multiple rows for cases where multiple rows exist in the NSLDS Pell file. The values of student file variables included in the resulting dataset will be replicated on each row for any case that has multiple rows in the resulting dataset.

If information for a given external data source was not available for any given sample member, that particular data file will not contain a record for that case. When merged with the

student file, only cases common to both the student file and the target extant data file will be included in the resulting dataset.

## **K.2 Non-ECB Restricted Files: Augmented Geocode Data From 2000 Decennial Census**

In addition to restricted-use data that have been integrated into the ECB, student-level geocode data are available as a separate file, linkable to the ECB data. The base-year geocode file can be obtained from NCES only through a separate licensing agreement.

A layout file, a SAS program, and an SPSS program have been provided for use of the geocode data. Student ID is provided to facilitate merges to the ECB data.

In constructing the geocode file, the best available source of residential address information was geographically matched to zip code, FIPS state and county code, and Census tract and block code. Claritas Prizm NE codes were used as a source of additional geodemographic and neighborhood lifestyle data. More information about Prizm NE codes can be obtained from <http://www.claritas.com>.

## **K.3 Listing of Variables Associated With the Ancillary Data; Explication of Composite Variables Based on These Sources**

Please refer to appendixes L, M, and N for further information. Specifically, appendix L contains a listing of all extant data source variables. Appendix M contains a listing of all variables. Variables from the external extant data sources are included in this listing. Further information about third follow-up composite variables based on these sources can be found in appendix N.

| File number | Variable name | Variable label                            | Section Description             | Position            |
|-------------|---------------|-------------------------------------------|---------------------------------|---------------------|
| 12          | F1TRS67       | BRR F1 transcript weight for replicate 67 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6707 |
| 12          | F1TRS68       | BRR F1 transcript weight for replicate 68 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6717 |
| 12          | F1TRS69       | BRR F1 transcript weight for replicate 69 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6727 |
| 12          | F1TRS70       | BRR F1 transcript weight for replicate 70 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6737 |
| 12          | F1TRS71       | BRR F1 transcript weight for replicate 71 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6747 |
| 12          | F1TRS72       | BRR F1 transcript weight for replicate 72 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6757 |
| 12          | F1TRS73       | BRR F1 transcript weight for replicate 73 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6767 |
| 12          | F1TRS74       | BRR F1 transcript weight for replicate 74 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6777 |
| 12          | F1TRS75       | BRR F1 transcript weight for replicate 75 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6787 |
| 12          | F1TRS76       | BRR F1 transcript weight for replicate 76 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6797 |
| 12          | F1TRS77       | BRR F1 transcript weight for replicate 77 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6807 |
| 12          | F1TRS78       | BRR F1 transcript weight for replicate 78 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6817 |
| 12          | F1TRS79       | BRR F1 transcript weight for replicate 79 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6827 |
| 12          | F1TRS80       | BRR F1 transcript weight for replicate 80 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6837 |
| 12          | F1TRS81       | BRR F1 transcript weight for replicate 81 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6847 |
| 12          | F1TRS82       | BRR F1 transcript weight for replicate 82 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6857 |
| 12          | F1TRS83       | BRR F1 transcript weight for replicate 83 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6867 |
| 12          | F1TRS84       | BRR F1 transcript weight for replicate 84 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6877 |
| 12          | F1TRS85       | BRR F1 transcript weight for replicate 85 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6887 |
| 12          | F1TRS86       | BRR F1 transcript weight for replicate 86 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6897 |
| 12          | F1TRS87       | BRR F1 transcript weight for replicate 87 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6907 |
| 12          | F1TRS88       | BRR F1 transcript weight for replicate 88 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6917 |
| 12          | F1TRS89       | BRR F1 transcript weight for replicate 89 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6927 |
| 12          | F1TRS90       | BRR F1 transcript weight for replicate 90 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6937 |
| 12          | F1TRS91       | BRR F1 transcript weight for replicate 91 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6947 |
| 12          | F1TRS92       | BRR F1 transcript weight for replicate 92 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6957 |
| 12          | F1TRS93       | BRR F1 transcript weight for replicate 93 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6967 |
| 12          | F1TRS94       | BRR F1 transcript weight for replicate 94 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6977 |
| 12          | F1TRS95       | BRR F1 transcript weight for replicate 95 | F1 Transcript Weight Replicates | Rec #: 1, Pos: 6987 |

| 12          | F2BYP151      | BRR F2 and BY (2006 and 2002) panel weight for replicate 151 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13577 |
| 12          | F2BYP152      | BRR F2 and BY (2006 and 2002) panel weight for replicate 152 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13587 |
| 12          | F2BYP153      | BRR F2 and BY (2006 and 2002) panel weight for replicate 153 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13597 |

**Table M-1. Full Scale All Variables—Continued**

| File number | Variable name | Variable label                                               | Section Description               | Position             |
|-------------|---------------|--------------------------------------------------------------|-----------------------------------|----------------------|
| 12          | F2BYP154      | BRR F2 and BY (2006 and 2002) panel weight for replicate 154 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13607 |
| 12          | F2BYP155      | BRR F2 and BY (2006 and 2002) panel weight for replicate 155 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13617 |
| 12          | F2BYP156      | BRR F2 and BY (2006 and 2002) panel weight for replicate 156 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13627 |
| 12          | F2BYP157      | BRR F2 and BY (2006 and 2002) panel weight for replicate 157 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13637 |
| 12          | F2BYP158      | BRR F2 and BY (2006 and 2002) panel weight for replicate 158 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13647 |
| 12          | F2BYP159      | BRR F2 and BY (2006 and 2002) panel weight for replicate 159 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13657 |
| 12          | F2BYP160      | BRR F2 and BY (2006 and 2002) panel weight for replicate 160 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13667 |
| 12          | F2BYP161      | BRR F2 and BY (2006 and 2002) panel weight for replicate 161 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13677 |
| 12          | F2BYP162      | BRR F2 and BY (2006 and 2002) panel weight for replicate 162 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13687 |
| 12          | F2BYP163      | BRR F2 and BY (2006 and 2002) panel weight for replicate 163 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13697 |
| 12          | F2BYP164      | BRR F2 and BY (2006 and 2002) panel weight for replicate 164 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13707 |
| 12          | F2BYP165      | BRR F2 and BY (2006 and 2002) panel weight for replicate 165 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13717 |
| 12          | F2BYP166      | BRR F2 and BY (2006 and 2002) panel weight for replicate 166 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13727 |
| 12          | F2BYP167      | BRR F2 and BY (2006 and 2002) panel weight for replicate 167 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13737 |
| 12          | F2BYP168      | BRR F2 and BY (2006 and 2002) panel weight for replicate 168 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13747 |
| 12          | F2BYP169      | BRR F2 and BY (2006 and 2002) panel weight for replicate 169 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13757 |
| 12          | F2BYP170      | BRR F2 and BY (2006 and 2002) panel weight for replicate 170 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13767 |
| 12          | F2BYP171      | BRR F2 and BY (2006 and 2002) panel weight for replicate 171 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13777 |
| 12          | F2BYP172      | BRR F2 and BY (2006 and 2002) panel weight for replicate 172 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13787 |
| 12          | F2BYP173      | BRR F2 and BY (2006 and 2002) panel weight for replicate 173 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13797 |
| 12          | F2BYP174      | BRR F2 and BY (2006 and 2002) panel weight for replicate 174 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13807 |
| 12          | F2BYP175      | BRR F2 and BY (2006 and 2002) panel weight for replicate 175 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13817 |
| 12          | F2BYP176      | BRR F2 and BY (2006 and 2002) panel weight for replicate 176 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13827 |
| 12          | F2BYP177      | BRR F2 and BY (2006 and 2002) panel weight for replicate 177 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13837 |
| 12          | F2BYP178      | BRR F2 and BY (2006 and 2002) panel weight for replicate 178 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13847 |
| 12          | F2BYP179      | BRR F2 and BY (2006 and 2002) panel weight for replicate 179 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13857 |
| 12          | F2BYP180      | BRR F2 and BY (2006 and 2002) panel weight for replicate 180 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13867 |
| 12          | F2BYP181      | BRR F2 and BY (2006 and 2002) panel weight for replicate 181 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13877 |
| 12          | F2BYP182      | BRR F2 and BY (2006 and 2002) panel weight for replicate 182 | F2 and BY Panel Weight Replicates | Rec #: 1, Pos: 13887 |

## **Appendix N. F3 Composites**

---

*This page left intentionally blank.*

**F3QWT**

A weight for sample members who completed a questionnaire in the third follow-up.

**F3BYPNLWT**

A panel weight for all sample members who completed a questionnaire in the base year and third follow-up.

**F3F1PNLWT**

A panel weight for all sample members who completed a questionnaire in the first follow-up and third follow-up.

**F3QTSCWT**

A weight for all sample members who completed a questionnaire in the third follow-up and for whom high school transcript data has been collected.

**F3BYTSCWT**

A panel weight for all sample members who completed a questionnaire in the base year and the third follow-up and for whom high school transcript data has been collected.

**F3FITSCWT**

A panel weight for all sample members who completed a questionnaire in the first follow-up and the third follow-up and for whom high school transcript data has been collected.

**F3UNIV**

Indicates simultaneously the base-year, first follow-up, second follow-up, and third follow-up response status of each sample member. This variable has values that account for all possible binary response status patterns (respondent versus nonrespondent) of ELS:2002 sample members across all rounds.

**F3UNIVG10**

Indicates simultaneously the base-year, first follow-up, second follow-up and third follow-up response status of sample members belonging to the 10th-grade cohort. The high school transcript population is also represented. This variable has values that account for all possible binary response status patterns (respondent versus nonrespondent) of ELS:2002 sample members across all rounds. It should be noted that a designation of nonrespondent in the context of this variable represents all varieties of nonresponse including sample members that were out of the country, incapacitated, institutionalized, refused, could not be located or were otherwise out-of-scope.

**F3UNIVG12**

Indicates simultaneously the base-year, first follow-up, second follow-up and third follow-up response status of sample members belonging to the 12th-grade cohort. The high school

transcript population is also represented. This variable has values that account for all possible binary response status patterns (respondent versus nonrespondent) of ELS:2002 sample members across all rounds. It should be noted that a designation of nonrespondent in the context of this variable represents all varieties of nonresponse including sample members that were out of the country, incapacitated, institutionalized, refused, could not be located or were otherwise out-of-scope.

**F3NRSTAT**

Reason for third follow-up survey nonresponse, if applicable, as indicated in the Survey Control System.

**F3QSTAT**

F3QSTAT indicates whether the sample member responded to the third follow-up survey. If the sample member was in fact a third follow-up survey respondent, F3QSTAT also indicates both the interview mode (web self-administered, CATI, or CAPI) and interview type (full-length or abbreviated) for their third follow-up participation.

**F3QDATE**

Month and year the sample member responded to the third follow-up interview.

**F3HSSTAT**

Final high school completion statuses from F2HSSTAT are carried forward to F3HSSTAT (i.e., if F2HSSTAT in (1,2,3,4,5,6) then F3HSSTAT = F2HSSTAT). Third follow-up respondents with a nonfinal high F2HSSTAT value (i.e., “Still enrolled in high school” (F2HSSTAT = 7); “Working towards GED or equivalent” (F2HSSTAT = 8); “No diploma, not in HS, not pursuing GED” (F2HSSTAT = 9); and “Status cannot be determined” (F2HSSTAT = 10)) were asked about their high school completion status as a part of their third follow-up interview, and F3HSSTAT then updates F2HSSTAT accordingly. See F2HSSTAT for more information on the previous version of this variable.

NOTE: F3HSSTAT is ultimately built from sample members’ responses to questionnaire items, supplemented by high school transcript information when necessary. F3HSSTAT does not, however, use information from the GED Testing Program as an input; for additional information on GED completion, including information gathered from the GED Testing Program, please see F3EVRGED. Please also note that although ELS:2002 survey instruments treat ““certificate of attendance”” as a final high school completion status, sample members may have earned a high school diploma, GED, or other high school equivalency subsequent to receiving a certificate of attendance.

**F3HSCPDR**

All nonmissing values from F2HSCPDR are carried forward to F3HSCPDR; for all other cases, F3HSCPDR updates F2HSCPDR when a final high school completion status and an

associated high school completion date can be determined based on responses to the third follow-up questionnaire. See F2HSCPDR for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

### **F3EVERDO**

F3EVERDO updates F2EVERDO in cases where third follow-up questionnaire responses indicate receipt of a GED, or indicate the respondent has not earned a high school credential; F3EVERDO is therefore ultimately built from information collected from the first follow-up survey control system, from high school transcripts, and during the second and third follow-ups. See F2EVERDO for more information on the previous version of this variable.

NOTE: While the third follow-up interview included questions regarding high school completion status, it did not include questions regarding high school dropout episodes (questions regarding high school dropout episodes were last asked as a part of the 2006 second follow-up questionnaire). Data users should therefore note the existence of cases where no direct evidence of a high school dropout episode was ever obtained (F3EVERDO = 0), but the high school completion date (F3HSCPDR) is much later than expected for a 2002 high school sophomore or 2004 high school senior.

### **F3EVRGED**

F3EVRGED updates F2EVRGED in cases where third follow-up questionnaire responses indicate receipt of a GED; F3EVRGED is therefore ultimately built from information collected during the first follow-up, the second follow-up, the third follow-up, from high school transcripts, and from the GED Testing Program. See F2EVRGED for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up; see the F2 GED File ("GED.PRI") for external source data drawn from the American Council on Education (ACE) GED Testing Service.

### **F3GEDPRG**

F3GEDPRG updates F2GEDPRG in cases where third follow-up questionnaire responses indicate receipt of a GED; F3GEDPRG is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See F2GEDPRG for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

### **F3WYGED1**

F3WYGED1 updates F2WYGED1 in cases where third follow-up questionnaire responses indicate receipt of a GED; F3WYGED1 is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See

F2WYGED1 for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

NOTE: While F3EVRGED draws on nonsurvey data (i.e., high school transcripts and the GED Testing Program), F3WYGED1 is built exclusively from survey data; it is possible, therefore, for some sample members to have F3EVRGED = 1 and F3WYGED1 = -3 (legitimate skip), e.g., if high school transcript indicated receipt of a GED, but the respondent indicated receipt of a diploma.

### **F3WYGED2**

F3WYGED2 updates F2WYGED2 in cases where third follow-up questionnaire responses indicate receipt of a GED; F3WYGED2 is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See F2WYGED2 for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

NOTE: While F3EVRGED draws on nonsurvey data (i.e., high school transcripts and the GED Testing Program), F3WYGED2 is built exclusively from survey data; it is possible, therefore, for some sample members to have F3EVRGED = 1 and F3WYGED2 = -3 (legitimate skip), e.g., if high school transcript indicated receipt of a GED, but the respondent indicated receipt of a diploma.

### **F3WYGED3**

F3WYGED3 updates F2WYGED3 in cases where third follow-up questionnaire responses indicate receipt of a GED; F3WYGED3 is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See F2WYGED3 for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

### **F3WYGED4**

F3WYGED4 updates F2WYGED4 in cases where third follow-up questionnaire responses indicate receipt of a GED; F3WYGED4 is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See F2WYGED4 for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

### **F3WYGED5**

F3WYGED5 updates F2WYGED5 in cases where third follow-up questionnaire responses indicate receipt of a GED; F3WYGED5 is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See F2WYGED5 for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

**F3WYGED6**

F3WYGED6 updates F2WYGED6 in cases where third follow-up questionnaire responses indicate receipt of a GED; F3WYGED6 is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See F2WYGED6 for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

**F3GEDST**

F3GEDST updates F2GEDST in cases where third follow-up questionnaire responses indicate receipt of a GED; F3GEDST is therefore ultimately built from information collected during the first follow-up, the second follow-up, and the third follow-up. See F2GEDST for more information on the previous version of this variable; see F3HSSTAT for further details on updating high school completion status as of the third follow-up.

**F3JUNEDSTAT**

F3JUNEDSTAT characterizes the respondent's postsecondary enrollment status as of June 2012; for postsecondary enrollment status as of the respondent's third follow-up interview date, see composite variable F3EDSTAT. Users should note that (1) there are subtle differences between the coding scheme for F3JUNEDSTAT and the coding scheme for F3EDSTAT, and (2) while F3EDSTAT uses IPEDS data to categorize postsecondary school type, F3JUNEDSTAT is based exclusively on sample members' responses to survey items. In instances where respondents provided potentially conflicting information regarding their June 2012 enrollment status (for example, when F3A03D = 1 but F3A12 < 201206; or, when F3A03D = 0 and F3A03E = 0, but F3PSLSTART < 201206 and F3A12 > 201206), F3JUNEDSTAT is coded as "possibly enrolled as of June 2012" (F3JUNEDSTAT = 2).

**F3EVRATT**

This variable indicates whether the respondent has ever attended a postsecondary institution; it is taken directly from the third follow-up interview (F3A11) if available, and imputed for third follow-up respondents if missing (use F3EVRATTIM to identify imputed F3EVRATT values).

**F3EDSTAT**

Indicates the respondent's postsecondary enrollment status as of the third follow-up interview; F3EDSTAT is imputed when missing for third follow-up respondents (use F3EDSTATIM to identify imputed F3EDSTAT values). Respondents are coded as "currently taking courses, institutional level unknown" (F3EDSTAT = 4) when they were known to be taking postsecondary courses as of their third follow-up interview (F3A01D = 1 or F3A01E = 1), and one of the following is true: (1) their current institution is unknown; (2) the level of their current institution is unknown; or (3) there is an inconsistency between respondent report and the level of their current institution as indicated by IPEDS data, e.g., the respondent reports they are currently attending a 2- or 4-year school (F3A01D = 1), but

IPEDS data indicates the level of their current institution is a <2-year school (F3PSLLVL = 3).

**F3PS1START**

F3PS1START indicates the year and month of the respondent began attending their first-attended postsecondary institution (i.e., F3PS1START stores the F3ISTDATE value from the sample member's record on the ELS third follow-up student-institution file where F3IFIRSTINST = 1). See F3IFIRSTINST for further information regarding identification of the respondent's first-attended postsecondary institution.

**F3PS1LVL**

F3PS1LVL indicates the level of the respondent's first-attended postsecondary institution (i.e., F3PS1LVL stores the F3ILEVEL value from the sample member's record on the ELS third follow-up student-institution file where F3IFIRSTINST = 1). See F3IFIRSTINST for further information regarding identification of the respondent's first-attended postsecondary institution.

**F3PS1CTR**

F3PS1CTR indicates the control of the respondent's first-attended postsecondary institution (i.e., F3PS1CTR stores the F3ICNTRL value from the sample member's record on the ELS third follow-up student-institution file where F3IFIRSTINST = 1). See F3IFIRSTINST for further information regarding identification of the respondent's first-attended postsecondary institution.

**F3PS1SEC**

F3PS1SEC indicates the sector of the respondent's first-attended postsecondary institution (i.e., F3PS1SEC stores the F3ISECTR value from the sample member's record on the ELS third follow-up student-institution file where F3IFIRSTINST = 1). See F3IFIRSTINST for further information regarding identification of the respondent's first-attended postsecondary institution.

**F3PS1SLC**

F3PS1SLC indicates the selectivity of the respondent's first-attended postsecondary institution (i.e., F3PS1SLC stores the F3ISELC value from the sample member's record on the ELS third follow-up student-institution file where F3IFIRSTINST = 1). See F3IFIRSTINST for further information regarding identification of the respondent's first-attended postsecondary institution.

**F3PS1OUT**

F3PS1OUT indicates whether the respondent's first-attended postsecondary institution was out of state with respect to their permanent address as of the third follow-up interview. The indicator is set via comparing the state associated with the respondent's residential zip code

(F3RESZIP) with the state identified by F3ISTATE from the sample member's record on the ELS third follow-up student-institution file where F3IFIRSTINST = 1. See F3IFIRSTINST for further information regarding identification of the respondent's first-attended postsecondary institution.

### **F3PS1RETAIN**

F3PS1RETAIN indicates the respondent's status with respect to their first-attended postsecondary institution (i.e., whether they earned a credential from their first-attended postsecondary institution, whether they are still enrolled at their first-attended postsecondary institution, or whether they left their first attended postsecondary institution without a credential and attended some other postsecondary institution). Data users should note that "No credential from PS1; no longer attending PS1; did attend another postsecondary institution" (F3PS1RETAIN = 4) does not necessarily indicate a transfer, since enrollment at an additional school which is concurrent with, but not subsequent to, enrollment at their first-attended postsecondary institution may be coded as F3PS1RETAIN = 4. See F3IFIRSTINST for further information regarding identification of the respondent's first-attended postsecondary institution.

### **F3PSTIMING**

F3PSTIMING indicates the timing of the respondent's first postsecondary enrollment by comparing their high school completion date (F3HSCPDR) to the date the respondent began attending their first-attended postsecondary institution (F3PS1START). F3PSTIMING distinguishes between "delayed" and "immediate" attendance in the same manner as is done in the second follow-up variable F2RTYPE; that is, respondents are coded as having "immediate" postsecondary attendance if their postsecondary attendance began by October of their high school completion/exit year (if their high school completion/exit date was between January and July), or by the following February (if their high school completion/exit date was after July). Respondents are coded as having "delayed" postsecondary attendance if their postsecondary attendance did not begin by October of their high school completion/exit year (if their high school completion/exit date was between January and July), or by the following February (if their high school completion/exit date was after July). See variable F3HS2PS1 for additional detail regarding the timing of initial postsecondary attendance relative to high school completion.

### **F3PSLLVL**

F3PSLLVL indicates the level of the respondent's last/currently attended postsecondary institution (i.e., F3PSLLVL stores the F3ILEVEL value from the sample member's record on the ELS third follow-up student-institution file where F3ILASTINST = 1). See F3ILASTINST for further information regarding identification of the respondent's last/currently attended postsecondary institution.

### **F3PSLCTR**

F3PSLCTR indicates the control of the respondent's last/currently attended postsecondary institution (i.e., F3PSLCTR stores the F3ICNTRL value from the sample member's record on the ELS third follow-up student-institution file where F3ILASTINST = 1). See F3ILASTINST for further information regarding identification of the respondent's last/currently attended postsecondary institution.

### **F3PSLSEC**

F3PSLSEC indicates the sector of the respondent's last/currently attended postsecondary institution (i.e., F3PSLSEC stores the F3ISECTR value from the sample member's record on the ELS third follow-up student-institution file where F3ILASTINST = 1). See F3ILASTINST for further information regarding identification of the respondent's last/currently attended postsecondary institution.

### **F3PSLSLC**

F3PSLSLC indicates the selectivity of the respondent's last/currently attended postsecondary institution (i.e., F3PSLSLC stores the F3ISELC value from the sample member's record on the ELS third follow-up student-institution file where F3ILASTINST = 1). See F3ILASTINST for further information regarding identification of the respondent's last/currently attended postsecondary institution.

### **F3PSLSTART**

F3PSLSTART indicates the year and month the respondent began attending their last/currently attended postsecondary institution (i.e., F3PSLSTART stores the F3ISTDATE value from the sample member's record on the ELS third follow-up student-institution file where F3ILASTINST = 1). See F3ILASTINST for further information regarding identification of the respondent's last/currently attended postsecondary institution.

### **F3PSLCRED**

F3PSLCRED indicates whether the respondent earned a credential from their last/currently attended postsecondary institution (i.e., the institution on the ELS third follow-up student-institution file where F3ILASTINST = 1). See F3ILASTINST for further information regarding identification of the respondent's last/currently attended postsecondary institution.

### **F3PS2BA**

This variable indicates the number of months between postsecondary entry and receipt of a bachelor's degree. F3PS2BA is calculated by comparing the date the respondent first attended a postsecondary institution (F3PS1START) to the date they received a bachelor's degree. If the respondent reported receipt of multiple bachelor's degrees, then the earliest bachelor's-receipt date is used in the calculation of F3PS2BA; if the respondent had not earned a bachelor's degree as of the third follow-up (F3ATTAINMENT = 1, 2, 3, 4, or 5),

then F3PS2BA is coded as -3. F3PS2BA is imputed when missing for third follow-up respondents (use F3PS2BAIM to identify imputed F3PS2BA values).

NOTE: Data users should note the existence of cases where the number of months between postsecondary entry and bachelor's completion (F3PS2BA) is greater than the number of months between high school completion and bachelor's completion (F3HS2BA). This data pattern is associated with sample members who reported an initial postsecondary enrollment date which precedes their high school credential date.

### **F3HS2PS1**

F3HS2PS1 updates F2HS2PS1 by indicating the number of months between the respondent's high school credential date and the date they first attended a postsecondary institution. F2HS2PS1 values are carried forward to F3HS2PS1 for all sample members where F2HS2PS1 > 0; for all remaining sample members with evidence of postsecondary attendance, F3HS2PS1 values are calculated by comparing the respondent's high school credential date (F3HSCPDR) to the date they first attended a postsecondary institution (F3PS1START). Cases where F3PS1START precedes F3HSCPDR are handled as follows: if the sample member ultimately earned a postsecondary credential from their first-attended postsecondary school (F3PS1RETAIN = 1 or 2), or was still attending their first-attended postsecondary school as of the third follow-up (F3PS1RETAIN = 1 or 3) then F3HS2PS1 is set to 0; else if the date the sample member last attended any postsecondary school (F3A12) does not precede F3HSCPDR, and the sample member did not subsequently attend another postsecondary institution (F3PS1RETAIN = 5), then F3HS2PS1 is set to 0. For any remaining sample member where F3PS1START precedes F3HSCPDR, F3HS2PS1 is set to -9. F3HS2PS1 is also set to -9 for sample members who reported no postsecondary attendance in the second follow-up (F2EVRATT = 0), but did not respond to the third follow-up interview.

NOTE: For sample members who indicated postsecondary attendance during their second follow-up interview, a distinction is made between the first chronological institution and the first "real" institution (though those institutions are often one in the same), and such a distinction is reflected in both F2HS2PS1 and F3HS2PS1 (see F2PS1 for further information on the distinction between the first chronological institution and the first "real" institution; see F2HS2PS1 for further information on the previous version of this variable). Such a distinction is not possible, however, for sample members who did not respond in the second follow-up, or did not report postsecondary enrollment during their second follow-up participation.

### **F3HS2BA**

This variable indicates the number of months between high school completion and receipt of a bachelor's degree. F3HS2BA is calculated by comparing the respondent's high school credential date (F3HSCPDR) to the date they received a bachelor's degree. If the respondent

reported receipt of multiple bachelor's degrees, then the earliest bachelor's-receipt date is used in the calculation of F3HS2BA; if the respondent had not earned a Bachelor's degree as of the third follow-up (i.e., F3ATTAINMENT = 1, 2, 3, 4, or 5), then F3HS2BA is coded as -3. F3HS2BA is imputed when missing for third follow-up respondents (use F3HS2BAIM to identify imputed F3HS2BA values).

NOTE: Data users should note the existence of cases where the number of months between postsecondary entry and bachelor's completion (F3PS2BA) is greater than the number of months between high school completion and bachelor's completion (F3HS2BA). This data pattern is associated with sample members who reported an initial postsecondary enrollment date which precedes their high school credential date.

**F3NATTND**

F3NATTND stores the number of postsecondary institutions attended by the respondent (i.e., F3NATTND is the number of postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file). Data users should note that in some cases F3NATTND is smaller than F2NATTND; this inconsistency is at least partially a function of the fact that second follow-up respondents were asked to provide an explicit number of postsecondary institutions they had attended (that number is stored in F2NATTND even if it is greater than the number of individual institutions about which the respondent actually provided attendance information), while third follow-up respondents were not asked to provide such a number (F3NATTND is instead calculated by simply tallying the number of individual institutions about which the respondent actually provided information). See F2NATTND for further detail regarding this nuance.

**F3NUMPUB**

F3NUMPUB stores the number of public postsecondary institutions attended by the respondent (i.e., F3NUMPUB is the number of public postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file).

**F3NUMPRIFOR**

F3NUMPRIFOR stores the number of private for-profit postsecondary institutions attended by the respondent (i.e., F3NUMPRIFOR is the number of private for-profit postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file).

**F3NUMPRINOT**

F3NUMPRINOT stores the number of private not-for-profit postsecondary institutions attended by the respondent (i.e., F3NUMPRINOT is the number of private not-for-profit postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file).

**F3NUM4YR**

F3NUM4YR stores the number of 4-year postsecondary institutions attended by the respondent (i.e., F3NUM4YR is the number of 4-year postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file).

**F3NUM2YR**

F3NUM2YR stores the number of 2-year postsecondary institutions attended by the respondent (i.e., F3NUM2YR is the number of 2-year postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file).

**F3NUMLT2**

F3NUMLT2 stores the number of less-than 2-year postsecondary institutions attended by the respondent (i.e., F3NUMLT2 is the number of less-than-2-year postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file).

**F3NUMMOD4**

F3NUMMOD4 stores the number of moderately selective 4-year postsecondary institutions attended by the respondent (i.e., F3NUMMOD4 is the number of moderately selective 4-year postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file). The ELS:2002 institutional selectivity measure is based on the Integrated Postsecondary Education Data System (IPEDS) variable “CCUGPROF” (Carnegie Classification 2010: Undergraduate Profile); “moderately selective” 4-year institutions refer to those whose first-year students’ test scores places them in roughly the middle two-fifths of baccalaureate institutions.

**F3NUMINCL4**

F3NUMINCL4 stores the number of inclusive 4-year postsecondary institutions attended by the respondent (i.e., F3NUMINCL4 is the number of inclusive 4-year postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file). The ELS:2002 institutional selectivity measure is based on the Integrated Postsecondary Education Data System (IPEDS) variable “CCUGPROF” (Carnegie Classification 2010: Undergraduate Profile); “inclusive” 4-year institutions either did not report test score data, or their scores indicate that they extend educational opportunity to a wide range of students with respect to academic preparation and achievement.

**F3NUMHI4**

F3NUMHI4 stores the number of highly selective 4-year postsecondary institutions attended by the respondent (i.e., F3NUMHI4 is the number of highly selective 4-year postsecondary institutions associated with the respondent on the ELS third follow-up student-institution file). The ELS:2002 institutional selectivity measure is based on the Integrated Postsecondary Education Data System (IPEDS) variable “CCUGPROF” (Carnegie Classification 2010:

Undergraduate Profile); “highly selective” 4-year institutions refer to those whose first-year students’ test scores places them in roughly the top fifth of baccalaureate institutions.

**F3NUMHBCU**

F3NUMHBCU stores the number of Historically Black Colleges or Universities attended by the respondent (i.e., F3NUMHBCU is the number of Historically Black Colleges or Universities associated with the respondent on the ELS third follow-up student-institution file).

**F3EVRPUB**

F3EVRPUB indicates whether the respondent has ever attended a public postsecondary institution (i.e., F3EVRPUB indicates whether there is a public postsecondary institution associated with the respondent on the ELS third follow-up student-institution file).

**F3EVRPRIFOR**

F3EVRPRIFOR indicates whether the respondent has ever attended a private for-profit postsecondary institution (i.e., F3EVRPRIFOR indicates whether there is a private for-profit postsecondary institution associated with the respondent on the ELS third follow-up student-institution file).

**F3EVRPRINOT**

F3EVRPRINOT indicates whether the respondent has ever attended a private not-for-profit postsecondary institution (i.e., F3EVRPRINOT indicates whether there is a private not-for-profit postsecondary institution associated with the respondent on the ELS third follow-up student-institution file).

**F3EVR4YR**

F3EVR4YR indicates whether the respondent has ever attended a 4-year postsecondary institution (i.e., F3EVR4YR indicates whether there is a 4-year postsecondary institution associated with the respondent on the ELS third follow-up student-institution file).

**F3EVR2YR**

F3EVR2YR indicates whether the respondent has ever attended a 2-year postsecondary institution (i.e., F3EVR2YR indicates whether there is a 2-year postsecondary institution associated with the respondent on the ELS third follow-up student-institution file).

**F3EVRLT2**

F3EVRLT2 indicates whether the respondent has ever attended a less-than 2-year postsecondary institution (i.e., F3EVRLT2 indicates whether there is a less-than-2-year postsecondary institution associated with the respondent on the ELS third follow-up student-institution file).

**F3EVRMOD4**

F3EVRMOD4 indicates whether the respondent has ever attended a moderately-selective 4-year postsecondary institution (i.e., F3EVRMOD4 indicates whether there is a moderately-selective 4-year postsecondary institution associated with the respondent on the ELS third follow-up student-institution file). The ELS:2002 institutional selectivity measure is based on the Integrated Postsecondary Education Data System (IPEDS) variable “CCUGPROF” (Carnegie Classification 2010: Undergraduate Profile). Four-year institutions coded as “moderately selective” refer to those whose first-year students’ test scores places them in roughly the middle two-fifths of baccalaureate institutions.

**F3EVRINCL4**

F3EVRINCL4 indicates whether the respondent has ever attended an inclusive 4-year postsecondary institution (i.e., F3EVRINCL4 indicates whether there is an inclusive 4-year postsecondary institution associated with the respondent on the ELS third follow-up student-institution file). The ELS:2002 institutional selectivity measure is based on the Integrated Postsecondary Education Data System (IPEDS) variable “CCUGPROF” (Carnegie Classification 2010: Undergraduate Profile). Four-year institutions coded as “inclusive” either did not report test score data, or their scores indicate that they extend educational opportunity to a wide range of students with respect to academic preparation and achievement.

**F3EVRHI4**

F3EVRHI4 indicates whether the respondent has ever attended a highly-selective 4-year postsecondary institution (i.e., F3EVRHI4 indicates whether there is a highly-selective 4-year postsecondary institution associated with the respondent on the ELS third follow-up student-institution file). The ELS:2002 institutional selectivity measure is based on the Integrated Postsecondary Education Data System (IPEDS) variable “CCUGPROF” (Carnegie Classification 2010: Undergraduate Profile). Four-year institutions coded as “highly selective” refer to those whose first-year students’ test scores places them in roughly the top fifth of baccalaureate institutions.

**F3EVRHBCU**

F3EVRHBCU indicates whether the respondent has ever attended a Historically Black College or University (i.e., F3EVRHBCU indicates whether there is a Historically Black College or University associated with the respondent on the ELS third follow-up student-institution file).

**F3PSSELECT**

F3PSSELECT indicates the highest level of admissions selectivity among all postsecondary institutions attended by the respondent. The ELS:2002 institutional selectivity measure is based on the Integrated Postsecondary Education Data System (IPEDS) variable “CCUGPROF” (Carnegie Classification 2010: Undergraduate Profile): “highly selective” 4-

year institutions refer to those whose first-year students' test scores places them in roughly the top fifth of baccalaureate institutions; "moderately selective" 4-year institutions refer to those whose first-year students' test scores places them in roughly the middle two-fifths of baccalaureate institutions; "inclusive" 4-year institutions either did not report test score data, or their scores indicate that they extend educational opportunity to a wide range of students with respect to academic preparation and achievement.

**F3ATTAINMENT**

Indicates the respondent's highest level of education as of the third follow-up interview.

F3ATTAINMENT is imputed when missing for third follow-up respondents (use F3ATTAINMENTIM to identify imputed F3ATTAINMENT values).

**F3ATTAINDATE**

Indicates the month and year the respondent completed their highest level of education (i.e., the month and year the respondent completed the level of education indicated by F3ATTAINMENT). If F3ATTAINMENT indicates "no high school credential and no postsecondary attendance" (F3ATTAINMENT = 1), then F3ATTAINDATE is set to -3; if F3ATTAINMENT indicates "some postsecondary attendance, but no postsecondary credential" (F3ATTAINMENT = 3), then F3ATTAINDATE is set to the sample member's high school completion date (if available).

**F3FIRSTPSCRED**

Indicates the type of postsecondary credential first earned by the respondent, if any.

F3FIRSTPSCRED may be equal to or less than, but not greater than, the type of postsecondary credential indicated by F3ATTAINMENT. F3FIRSTPSCRED is set to missing (-9) in instances where the respondent reported a graduate degree but did not report an undergraduate degree.

**F3FIRSTPSCRDATE**

Indicates the month and year the respondent received their first postsecondary credential, if any. F3FIRSTPSCRDATE may be earlier than or the same as, but not later than, F3ATTAINDATE. F3FIRSTPSCRDATE is set to missing (-9) in instances where the respondent reported a graduate degree but did not report an undergraduate degree.

**F3BYEDEXPFF**

F3BYEDEXPFF compares the sample member's highest level of education as of the third follow-up (F3ATTAINMENT) to their base-year educational expectations (BYSTEXP), and indicates whether the respondent exceeded those expectations, met those expectations exactly, or did not meet those expectations. Sample members coded as "base-year expectations and third follow-up attainment are not comparable" (F3BYEDEXPFF = 5) are those whose base-year expectations were "attend or complete a 2-year school course in a community college or vocational school" (BYSTEXP = 3) or "attend college, but not

complete a 4-year degree” (BYSTEXP = 4), but their educational attainment as of the third follow-up was “some postsecondary attendance, no postsecondary credential” (F3ATTAINMENT = 3), “undergraduate certificate” (F3ATTAINMENT = 4), or “associate’s degree” (F3ATTAINMENT = 5).

NOTE: Since nonmissing F3BYEDEXPFF values are dependent on both base-year and third follow-up response, analyses involving F3BYEDEXPFF are best conducted using the panel weight F3BYPNLWT.

### **F3F1EDEXPFF**

F3F1EDEXPFF compares the sample member’s highest level of education as of the third follow-up (F3ATTAINMENT) to their educational expectations as of the first follow-up (F1STEXP), and indicates whether the respondent exceeded those expectations, met those expectations exactly, or did not meet those expectations. Sample members coded as “first follow-up expectations and third follow-up attainment are not comparable” (F3F1EDEXPFF = 5) are those whose expectations as of the first follow-up were “attend or complete a 1- or 2-year program in a community college or vocational school” (F1STEXP = 4) or “attend college, but not complete a 4- or 5-year degree” (F1STEXP = 5), but their educational attainment as of the third follow-up was “some postsecondary attendance, no postsecondary credential” (F3ATTAINMENT = 3), “undergraduate certificate” (F3ATTAINMENT = 4), or “associate’s degree” (F3ATTAINMENT = 5).

NOTE: Since nonmissing F3F1EDEXPFF values are dependent on both first follow-up and third follow-up response, analyses involving F3F1EDEXPFF are best conducted using the panel weight F3F1PNLWT.

### **F3FURTHERED**

F3FURTHERED compares the respondent’s highest level of education (F3ATTAINMENT) to the highest level of education they ever expect to receive (F3STEXP), and indicates whether they have already attained their highest expected education level.

### **F3STEXP**

F3STEXP indicates whether the highest level of education the respondent ever expects to complete; it is taken directly from the third follow-up interview (F3A17) if available, and imputed for third follow-up respondents if missing (use F3STEXPIM to identify imputed F3STEXP values).

### **F3HIIMPACT**

This variable summarizes F3A14A—F3A14F by summing the number of high-impact educational activities in which the respondent reported participating as a part of their postsecondary enrollment. The third follow-up questionnaire asked respondents about the following high-impact educational activities:

- Internship, co-op, field experience, student teaching, or clinical assignment (F3A14A)
- Research project with a faculty member outside of course or program requirements (F3A14B)
- Study abroad (F3A14C)
- Community-based project as part of a regular course (F3A14D)
- Culminating senior experience, such as a capstone course, senior project or thesis, or comprehensive exam (F3A14E)
- A program in which the respondent was mentored (F3A14F)

### **F3EVRJOB**

This variable indicates whether the respondent has ever worked for pay since January 2006; it is drawn directly from the third follow-up survey when available (F3B09), and is imputed when missing. Use variable F3EVRJOBIM to identify imputed values for F3EVRJOB.

### **F3EMPSTAT**

F3EMPSTAT characterizes the respondent's employment status as of their third follow-up interview in terms of the number and type (full-time v. part-time) of job(s) they were working. If the respondent was working multiple jobs, F3EMPSTAT also indicates the number of hours worked across all their jobs. If the respondent was not working for pay as of their third follow-up interview, F3EMPSTAT distinguishes between those looking for work ("unemployed") and those not looking for work ("out of the labor force"). F3EMPSTAT is built from third follow-up survey variables, and is imputed when missing for third follow-up respondents. Use variable F3EMPSTATIM to identify imputed values for F3EMPSTAT.

### **F3JUNEMPSTAT**

F3JUNEMPSTAT characterizes the respondent's employment status as of June 2012; for employment status as of the respondent's third follow-up interview date, see composite variable F3EMPSTAT. Users should note that while the third follow-up interview collected extensive detail regarding employment status as of the third follow-up interview (e.g., exact number of jobs worked, number of hours worked per week, whether looking for work if not currently employed, etc.), relatively less detail was collected regarding employment status as of June 2012. As such, F3JUNEMPSTAT categories are not identical to (i.e., are less detailed than) F3EMPSTAT categories.

### **F3ONET2CURR**

F3ONET2CURR stores the 2-digit (general category) Occupational Information Network (O\*NET) code associated with the respondent's current or most recent job. Occupation codes were assigned primarily by the survey instrument assisted coder, and secondarily by upcoding activities. see [www.onetonline.org](http://www.onetonline.org) for further information regarding the O\*NET codeframe.

**F3ONET6CURR**

F3ONET6CURR stores the Occupational Information Network (O\*NET) code associated with the respondent's current or most recent job. F3ONET6CURR is a 6-digit code with the first 2 digits (equivalent to F3ONET2CURR) indicating a general category, the third digit indicating a mid-level category, and the last 3 digits a specific category. Occupation codes were assigned primarily by the survey instrument assisted coder, and secondarily by upcoding activities. See the ELS:2002 Third Follow-up Data File Documentation (Ingels et al. 2013, NCES 2014-364) for further information regarding upcoding activities; see [www.onetonline.org](http://www.onetonline.org) for further information regarding the O\*NET codeframe.

**F3SEICURR**

The respondent's current or most recent job, mapped from the Occupational Information Network (O\*NET) coding scheme to the ELS:2002 base-year / first follow-up coding scheme (e.g., the scheme used in variable BYOCCUF). Occupation codes were assigned primarily by the survey instrument assisted coder, and secondarily by upcoding activities. For further upcoding information, see the ELS:2002 Third Follow-up Data File Documentation (op. cit.).

**F3HOURWAGE**

F3HOURWAGE indicates the respondent's earnings at their current/most recent job, standardized to dollars per hour. Please note that F3HOURWAGE is set to missing (-9) for third follow-up respondents who reported a "per day" wage (i.e., where F3B26 = 2 and F3B27 < 1), due to lack of information regarding the number of hours such respondents worked per day.

**F3EMPMONTHS**

For respondents who were employed at the time of their third follow-up interview, F3EMPMONTHS calculates the number of months the respondent was employed at their current job by comparing the start date for their current job (F3B16) to the date of their third follow-up interview (F3QDATE); for respondents who were not employed at the time of their third follow-up interview (but were employed at some point in the past), F3EMPMONTHS calculates the number of months the respondent was employed at their most recent job by comparing the start date for their most recent job (F3B16) to the date they last worked for pay (F3B13).

**F3ERN2011**

The respondent's earnings from employment during the 2011 calendar year are drawn directly from the third follow-up interview when available (F3D20), and are imputed when missing. Imputed values for F3ERN2011 can be identified by using F3ERN2011IM.

**F3EMPINC2011**

This variable is the 2011 income from employment for the respondent (or, if applicable, for the respondent and the respondent's spouse/partner); more specifically, this variable is the sum of F3ERN2011 (the respondent's 2011 earnings from employment), and F3SPERN2011 (the respondent's spouse/partner's 2011 earnings from employment); note that F3ERN2011 and F3SPERN2011 include some imputed values. If the respondent does not have a spouse/partner, then F3EMPINC2011 will be equal to F3ERN2011. See variables F3MARRSTATUS, F3D01, or F3D04 to distinguish respondents who are married/partnered from those who are not.

**F3SPERN2011**

The respondent's spouse/partner's earnings from employment during the 2011 calendar year are drawn directly from the third follow-up interview when available (F3D22), and are imputed when missing. Imputed values for F3SPERN2011 can be identified by using F3SPERN2011IM.

**F3ALLINC2011**

This variable is the 2011 income from all sources for the respondent (or, if applicable, for the respondent and the respondent's spouse/partner's); more specifically, this variable is the sum of F3EMPINC2011 (2011 employment income: respondent + spouse/partner, if applicable) and F3D26 (2011 income from nonemployment sources: respondent + spouse/partner, if applicable). Note that F3EMPINC2011 is based on two variables (F3ERN2011 and F3SPERN2011) which include some imputed values. See variables F3MARRSTATUS, F3D01, or F3D04 to distinguish respondents who are married/partnered from those who are not.

**F3DEBTEMP2011**

This variable is the ratio of total debt to 2011 income from employment for the respondent (or, if applicable, for the respondent and the respondent's spouse/partner); more specifically, this variable is the ratio of F3D33 (Total nonmortgage debt: R + spouse/partner, if applicable) to F3EMPINC2011 (2011 employment income: respondent + spouse/partner, if applicable). If F3EMPINC2011 = 0, then F3DEBTEMP2011 is coded as -3 (legitimate skip). Note that F3EMPINC2011 is based on two variables (F3ERN2011 and F3SPERN2011) which include some imputed values. See variables F3MARRSTATUS, F3D01, or F3D04 to distinguish respondents who are married/partnered from those who are not.

**F3DEBTALL2011**

This variable is the ratio of total debt to 2011 income from all sources for the respondent (or, if applicable, for the respondent and the respondent's spouse/partner); more specifically, this variable is the ratio of F3D33 (Total nonmortgage debt: R + spouse/partner, if applicable) to F3ALLINC2011 (2011 income from all sources: respondent + spouse/partner, if applicable). If F3ALLINC2011 = 0, then F3DEBTALL2011 is coded as -3 (legitimate skip). Note that

F3ALLINC2011 is based on two variables (F3ERN2011 and F3SPERN2011) which include some imputed values. See variables F3MARRSTATUS, F3D01, or F3D04 to distinguish respondents who are married/partnered from those who are not.

**F3STLOANEVR**

Whether the respondent has taken out any student/postsecondary education loans is drawn directly from the third follow-up interview when available (F3A18), and is imputed when missing for third follow-up respondents. Imputed values for F3STLOANEVR can be identified by using F3STLOANEVRIM.

**F3STLOANAMT**

The total amount the respondent has borrowed in student/postsecondary education loans is drawn directly from the third follow-up interview when available (F3A19), and is imputed when missing for third follow-up respondents. Imputed values for F3STLOANAMT can be identified by using F3STLOANAMTIM.

**F3STLOANPAY**

The monthly amount the respondent is currently paying toward their student/postsecondary education loans is drawn directly from the third follow-up interview when available (F3A21), and is imputed when missing for third follow-up respondents. Imputed values for F3STLOANPAY can be identified by using F3STLOANPAYIM.

**F3JOBSUPP**

This variable is a scale of the respondent's perceived work support at their current/most recent job. Higher values represent greater perceived work support. Variable was created through principal factor analysis (weighted by F3QWT) and standardized to a mean of 0 and standard deviation of 1. Only respondents who provided a full set of input responses (F3B34A, F3B34B, and F3B34C) were assigned a scale value. The coefficient of reliability (alpha) for the scale is 0.80.

**F3JOBSATIS**

This variable is a scale of the respondent's job satisfaction at their current/most recent job. Higher values represent greater job satisfaction. Variable was created through principal factor analysis (weighted by F3QWT) and standardized to a mean of 0 and standard deviation of 1. Only respondents who provided a full set of input responses (F3B34D, F3B34E, and F3B34F) were assigned a scale value. The coefficient of reliability (alpha) for the scale is 0.90.

**F3JOBPERSIST**

This variable is a scale of the respondent's job persistence intentions at their current/most recent job. Higher values represent greater job persistence intentions. Variable was created through principal factor analysis (weighted by F3QWT) and standardized to a mean of 0 and

standard deviation of 1. Only respondents who provided a full set of input responses (F3B34G, F3B34H, and F3B34I) were assigned a scale value. The coefficient of reliability (alpha) for the scale is 0.89.

**F3ONET2AGE30**

F3ONET2AGE30 stores the 2-digit (general category) Occupational Information Network (O\*NET) code associated with the respondent's anticipated occupation at age 30.

Respondents indicating that they do not plan on working for pay at age 30 are coded as F3ONET2AGE30 = -3, and respondents indicating that they don't know what their occupation at age 30 will be are coded as F3ONET2AGE30 = -1. Occupation codes were assigned primarily by the survey instrument assisted coder, and secondarily by upcoding activities. See the Education Longitudinal Study of 2002 Third Follow-Up Data File Documentation for further information regarding upcoding activities; see [www.onetonline.org](http://www.onetonline.org) for further information regarding the O\*NET codeframe.

**F3ONET6AGE30**

F3ONET6AGE30 stores the Occupational Information Network (O\*NET) code associated with the respondent's anticipated occupation at age 30. F3ONET6AGE30 is a 6-digit code with the first 2 digits (equivalent to F3ONET2AGE30) indicating a general category, the third digit indicating a mid-level category, and the last 3 digits a specific category.

Respondents indicating that they do not plan on working for pay at age 30 are coded as F3ONET6AGE30 = -3, and respondents indicating that they don't know what their occupation at age 30 will be are coded as F3ONET6AGE30 = -1. Occupation codes were assigned primarily by the survey instrument assisted coder, and secondarily by upcoding activities. F3ONET6AGE30 is imputed when missing for third follow-up respondents (use F3ONET6AGE30IM to identify imputed F3ONET6AGE30 values).

**F3SEIAGE30**

The respondent's anticipated occupation at age 30, mapped from the Occupational Information Network (O\*NET) coding scheme to the ELS:2002 base-year / first follow-up coding scheme (e.g., the scheme used in variable BYOCCUF). Respondents indicating that they do not plan on working for pay at age 30 are coded as F3SEIAGE30 = -3, and respondents indicating that they don't know what their occupation at age 30 will be are coded as F3SEIAGE30 = -1. Occupation codes were assigned primarily by the survey instrument assisted coder, and secondarily by upcoding activities

**F3OCC30BYVF3**

F3OCC30BYVF3 indicates whether the prestige score associated with the respondent's expected age-30 occupation as reported in the third follow-up (F3SEIAGE30) is higher than, equal to, or less than the prestige score associated with the respondent's expected age-30 occupation as reported in the base year (BYOCC30). In both the base-year and third follow-

up surveys, respondents were able to indicate either “don’t plan to work for pay at age 30” or “don’t know” as their expected age-30 occupation; such sample members will be coded as BYOCC30BYVF3 = 4 or BYOCC30BYVF3 = 5 since no prestige scores can be assigned to these responses. Likewise, prestige scores are not available for F3SEIAGE30 / BYOCC30 categories of “homemaker,” “military,” or “other,” and so sample members responding as such in either the base-year or third follow-up surveys will also be coded as BYOCC30BYVF3 = 4 or BYOCC30BYVF3 = 5.

### **F3OCC30F1VF3**

F3OCC30F1VF3 indicates whether the prestige score associated with the respondent’s expected age-30 occupation as reported in the third follow-up (F3SEIAGE30) is higher than, equal to, or less than the prestige score associated with the respondent’s expected age-30 occupation as reported in the first follow-up (F1OCC30). In both the first and third follow-up surveys, respondents were able to indicate either “don’t plan to work for pay at age 30” or “don’t know” as their expected age-30 occupation; such sample members will be coded as BYOCC30F1VF3 = 4 or BYOCC30F1VF3 = 5 since no prestige scores can be assigned to these responses. Likewise, prestige scores are not available for F3SEIAGE30 / F1OCC30 categories of “homemaker,” “military,” or “other,” and so sample members responding as such in either the first or third follow-up surveys will also be coded as BYOCC30F1VF3 = 4 or BYOCC30F1VF3 = 5.

### **F3OCC30BYVF1**

F3OCC30BYVF1 indicates whether the prestige score associated with the respondent’s expected age-30 occupation as reported in the first follow-up (F1OCC30) is higher than, equal to, or less than the prestige score associated with the respondent’s expected age-30 occupation as reported in the base-year (BYOCC30). In both the base-year and first follow-up surveys, respondents were able to indicate either “don’t plan to work for pay at age 30” or “don’t know” as their expected age-30 occupation; such sample members will be coded as BYOCC30BYVF1 = 4 or BYOCC30BYVF1 = 5 since no prestige scores can be assigned to these responses. Likewise, prestige scores are not available for F1OCC30 / BYOCC30 categories of “homemaker,” “military,” or “other,” and so sample members responding as such in either the base-year or first follow-up surveys will also be coded as BYOCC30BYVF1 = 4 or BYOCC30BYVF1 = 5.

### **F3CURRV30**

F3CURRV30 compares the Occupational Information Network (O\*NET) code associated with the respondent’s current or most recent job (F3ONET6CURR) to the O\*NET code associated with the respondent’s anticipated occupation at age 30 (F3ONET6AGE30). F3CURRV30 indicates whether there is a match between those two O\*NET codes, and if there is, whether the two codes match at the 2-digit (general) level, the 3-digit mid-level, or the 6-digit (specific) level. Jobs which match at the 6-digit level (indicating the respondent’s

current/most recent job is the same, or nearly the same, as their anticipated age 30 occupation), are more related than jobs which match at the 3-digit level only, just as jobs which match at the 3-digit level are more related than jobs which match at the 2-digit level only. Respondents who indicated that they have not worked for pay since January 2006 (F3B09 = 0), as well as respondents who indicated “don’t know” or “don’t plan to work for pay” for their expected age-30 occupation, are coded as F3CURRV30 = -3 (legitimate skip). See [www.onetonline.org](http://www.onetonline.org) for further information regarding the O\*NET codeframe.

### **F3SES**

F3SES is the average of 3 inputs (2011 earnings from employment, the prestige score associated with the respondent’s current/most recent job, and educational attainment), each of which is standardized to a mean of 0 and a standard deviation of 1 prior to averaging. Data users should note that, as of the third follow-up, socioeconomic status may be less-than fully stable for some third follow-up respondents, e.g., respondents with graduate-level education who are just beginning or have yet to begin their careers. Users should also note that F3SES does not account for the income, occupation, or education of the respondent’s spouse/partner, and therefore may not be fully indicative of household socioeconomic status as of the third follow-up. NOTE: While the two versions of the BY family SES composites (BYSES1 and BYSES2) were created by differential assignment of prestige scores based on the 16-category BY occupation variables, F3SES is created by assigning prestige scores based on the 2-digit ONET code associated with the respondent’s current/most recent job as of the third follow-up.

### **F3SESQU**

F3SESQU is a weighted quartile coding of F3SES; F3SES is the average of 3 inputs (2011 earnings from employment, the prestige score associated with the respondent’s current/most recent job, and educational attainment), each of which is standardized to a mean of 0 and a standard deviation of 1 prior to averaging. Data users should note that, as of the third follow-up, socioeconomic status may be less-than fully stable for some third follow-up respondents, e.g., respondents with graduate-level education who are just beginning or have yet to begin their careers. Users should also note that neither F3SESQU nor F3SES account for the income, occupation, or education of the respondent’s spouse/partner, and therefore may not be fully indicative of household socioeconomic status as of the third follow-up. NOTE: While the two versions of the BY family SES composites (BYSES1 and BYSES2) were created by differential assignment of prestige scores based on the 16-category BY occupation variables, F3SES / F3SESQU are created by assigning prestige scores based on the 2-digit ONET code associated with the respondent’s current/most recent job as of the third follow-up.

**F3LIVARR**

F3LIVARR indicates the respondent's living arrangement as of their third follow-up interview. Respondents are coded with the lowest F3LIVARR value which appropriately characterizes their living arrangement as of the third follow-up interview. For example, a respondent living with a spouse and a biological child is coded as "Not in parent's home, lives w/spouse"" (F2LIVARR = 3) as opposed to "Not in parent's home, lives w/children (w/o spouse/partner)"" (F2LIVARR = 5). Likewise, a respondent living with both a sibling and a nonrelative roommate is coded as "Not in parent's home, lives w/sibling (w/o spouse/partner or children)"" (F2LIVARR = 6) as opposed to "Not in parent's home, lives w/friend(s)/roommate(s)"" (F2LIVARR = 7).

**F3MARRSTATUS**

F3MARRSTATUS simultaneously indicates (1) the sample member's legal marital status as of third follow-up (never married, married, divorced, separated, or widowed), and (2) whether the sample member was living with a significant other in a marriage-like relationship as of the third follow-up.

**F3MARRAGE**

F3MARRAGE indicates the age at which the sample member first married by comparing F1DOB\_P (sample member's date of birth) with F3D03\_1 (date of first marriage).

**F3NUMCHILD**

F3NUMCHILD sums the number of biological children born to the respondent as of the third follow-up, and the number of children adopted by the respondent as of the third follow-up. See variable F3D07 for counts of biological children only; see variable F3D11 for counts adopted children only. Please note that while the number of biological children was collected in both the third follow-up full-length interview and the third follow-up abbreviated interview, the number of adopted children was only collected in the third follow-up full-length interview; thus, F3D07 will have fewer missing values (-9) than will F3D11 or F3NUMCHILD.

**F3PARAGE**

F3PARAGE indicates the age at which the respondent first had a biological child by comparing F1DOB\_P (sample member's date of birth) with F3D08\_1 (date of first marriage).

**F3SINGLEPAR**

Respondents are coded as single parents in F3SINGLEPAR if they indicate that (1) they are not currently married and not currently living with a significant other in a marriage-like relationship, (2) they have had a biological child or have adopted a child, and (3) that there is one or more children currently living in their household.

### **F3HHNUM**

This variable summarizes F3D15A—F3D15H by totaling the number of members in the respondent's household (including the respondent him/herself) as of their third follow-up interview.

### **F3NUMDPNDNT**

F3NUMDPNDNT sums the respondent's number of dependents less than age 18 (F3D19A), and the sample member's number of dependents age 18 or older (F3D19B).

### **F3VOTEBEH**

F3VOTEBEH summarizes the respondent's recent voting behavior by indicating whether they (1) voted in both the 2008 presidential election AND in a 2009, 2010, or 2011 nonpresidential election; (2) voted in either the 2008 presidential election OR in a 2009, 2010, or 2011 nonpresidential election; or (3) voted in neither the 2008 presidential election NOR in a 2009, 2010, 2011 nonpresidential election.

### **F3MOBILITYBYF3**

Distance (in miles) between the respondent's base-year residence and their third follow-up residence; F3MOBILITYBYF3 is calculated by comparing the distance between the ZIP code centroid associated with their base-year residence to the ZIP code centroid associated with their third follow-up residence (the SAS ZIPCITYDISTANCE function is used to make this calculation).

### **F3MOBILITYF1F3**

Distance (in miles) between the respondent's first follow-up residence and their second follow-up residence; F3MOBILITYF1F2 is calculated by comparing the distance between the ZIP code centroid associated with their second follow-up residence to the ZIP code centroid associated with their third follow-up residence (the SAS ZIPCITYDISTANCE function is used to make this calculation).

### **F3MOBILITYF2F3**

Distance (in miles) between the respondent's second follow-up residence and their third follow-up residence; F3MOBILITYF2F3 is calculated by comparing the distance between the ZIP code centroid associated with their second follow-up residence to the ZIP code centroid associated with their third follow-up residence (the SAS ZIPCITYDISTANCE function is used to make this calculation).

### **F3MOBILITYF1F2**

Distance (in miles) between the respondent's first follow-up residence and their second follow-up residence; F3MOBILITYF1F2 is calculated by comparing the distance between the ZIP code centroid associated with their second follow-up residence to the ZIP code

centroid associated with their third follow-up residence (the SAS ZIPCITYDISTANCE function is used to make this calculation).

**F3REGION**

Geographic region of the respondent's residence as of the third follow-up. The Northeast region includes CT, MA, ME, NH, NJ, NY, PA, RI, and VT; the Midwest includes IA, IL, IN, KS, MI, MN, MO, ND, NE, OH, SD, and WI; the South includes AL, AR, DC, DE, FL, GA, KY, LA, MD, MS, NC, OK, SC, TN, TX, VA, and WV; the West includes AK, AZ, CA, CO, HI, ID, MT, NM, NV, OR, UT, WA, and WY.

**F3RESZIP**

ZIP code associated with the respondent's residence as of the third follow-up. F3RESZIP is taken directly from the third follow-up questionnaire (F3D13) if available; if F3D13 is missing, F3RESZIP is taken from the mailing address to which the respondent's third follow-up survey incentive was mailed.

**F3PELLCUM**

Pell grants received cumulatively as of the fall of 2006 as reported by the National Student Loan Data System (NSLDS).

**F3PELLYRS**

Indicates the number of years the sample member received Pell grants as reported by the National Student Loan Data System (NSLDS).

**F3PLUSCUM**

Parent Loan for Undergraduate Students (PLUS) received cumulatively as of the fall of 2006 as reported by the National Student Loan Data System (NSLDS).

**F3GPLUSCUM**

Cumulative Direct PLUS Loans to graduate students ever borrowed by the student.

**F3SUBCUM3**

Cumulative federal subsidized loan amount borrowed for undergraduate and graduate education. Perkins Loans may be understated, because Perkins Loans are not always reported to NSLDS.

**F3STFCUM3**

Cumulative Direct Subsidized and Unsubsidized Loan (also known as subsidized and unsubsidized Stafford Loan) amount borrowed for undergraduate and graduate education.

**F3FEDCUM3**

Cumulative federal loan amount borrowed for undergraduate and graduate education. Perkins Loans may be understated, because Perkins Loans are not always reported to NSLDS.

Excludes Direct PLUS Loans to parents of undergraduate students, which are only available to the parents of dependent undergraduates.

**F3FEDDUE3**

Indicates total amount owed, both principal and interest, on all federal loans. Based primarily on the total amount outstanding as reported in the National Student Loan Data System history files. This variable combines both loan principal and interest amounts for all loans still outstanding. Since loans accumulate interest over time, the amount owed may be greater than the original amount borrowed.

**F3NSLOANSTAT**

This variable indicates whether the sample member had any associated records in the NSLDS loan data files as of the third follow-up ELS:2002 ECB.

**F3NSPELLSTAT**

This variable indicates whether the sample member has any associated records in the NSLDS Pell grant data files of the third follow-up ELS:2002 ECB.

**F3CPS10STAT**

This variable indicates whether the sample member has associated records in the 2009-2010 Central Processing System (CPS) data files of the ELS:2002 ECB. The U.S. Department of Education Central Processing System houses data collected from the Free Application for Federal Student Aid (FAFSA).

**F3CPS11STAT**

This variable indicates whether the sample member has associated records in the 2010-2011 Central Processing System (CPS) data files of the ELS:2002 ECB. The U.S. Department of Education Central Processing System houses data collected from the Free Application for Federal Student Aid (FAFSA).

**F3CPS12STAT**

This variable indicates whether the sample member has associated records in the 2011-2012 Central Processing System (CPS) data files of the ELS:2002 ECB. The U.S. Department of Education Central Processing System houses data collected from the Free Application for Federal Student Aid (FAFSA).

**F3CPS13STAT**

This variable indicates whether the sample member has associated records in the 2012-2013 Central Processing System (CPS) data files of the ELS:2002 ECB. The U.S. Department of Education Central Processing System houses data collected from the Free Application for Federal Student Aid (FAFSA).

**F3CPS14STAT**

This variable indicates whether the sample member has associated records in the 2013-2014 Central Processing System (CPS) data files of the ELS:2002 ECB. The U.S. Department of Education Central Processing System houses data collected from the Free Application for Federal Student Aid (FAFSA).
