Acting Commissioner

The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

FOREWORD

The 2013 edition of the *Digest of Education Statistics* is the 49th in a series of publications initiated in 1962. The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the *Digest*, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to data on educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the *Digest* contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The *Digest* contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Funds for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Technology. Each chapter is divided into a number of topical subsections. Preceding the seven chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the *Digest* tables; the second, Definitions, is included to help readers understand terms used in the *Digest*; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics.

In addition to providing updated versions of many statistics that have appeared in previous years, this edition incorporates new material on the following topics:

- Number, percentage, and percentage distribution of total resident population and population under 18 years old, by nativity and race/ethnicity (including selected subgroups) (table 101.30)
- Number of persons 25 to 34 years old, percentage with a bachelor's or higher degree, and percentage distribution, by undergraduate field of study and selected student characteristics (table 104.60)
- Percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012 and selected student characteristics (table 104.90)
- First-time kindergartners' primary type of child care arrangement prior to kindergarten entry, by selected child, family, and school characteristics (table 202.65)
- Public school enrollment in prekindergarten through grade 8 and public school enrollment in grades 9 through 12, by region, state, and jurisdiction (tables 203.25 and 203.30)
- Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education (table 203.60)
- Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and type of disability (table 204.50)
- Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics (table 209.10)
- Functional age of public schools' main instructional buildings and percentage of schools with permanent and portable (temporary) buildings, by selected school characteristics and condition of permanent and portable buildings (table 217.10)
- Percentage of public schools with plans for major repair, renovation, or replacement of building systems or features in the next 2 years and percentage distribution of schools with such plans, by selected school characteristics, type of system or feature, and main reason for the plans (table 217.15)
- Public high school graduates, by race/ethnicity (including historical and projected data) (table 219.30)
- Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics (table 223.25)
- Number and percentage of high school graduates who took foreign language courses in high school and average number of credits earned, by language and number of credits (table 225.70)
- A variety of topics related to crime, environment, and security at elementary and secondary schools:
 - School-associated homicides, suicides, and other violent deaths (table 228.10)
 - Nonfatal criminal victimization of students ages 12–18 (tables 228.20, 228.25, and 228.30)
 - Reports by students in grades 9–12 of being threatened or injured with a weapon on school property (table 228.40), with state-level data for public school students (table 228.50)

- Reports by teachers of being threatened with injury or physically attacked by a student (table 228.70), with state-level data for public school teachers (table 228.80)
- Incidents of crime recorded by public schools and reported by the schools to the police (tables 229.10, 229.30, and 229.40)
- Violent crime incidents and serious violent crime incidents recorded and reported to the police by public schools (table 229.50)
- Selected discipline problems reported by public schools (table 230.10)
- Reports by students ages 12–18 of gang presence at school (table 230.20)
- Reports by students ages 12–18 of being the target of hate-related words and seeing hate-related graffiti at school (tables 230.30 and 230.35)
- Reports by students ages 12–18 of being bullied at school or cyber-bullied anywhere during the school year (tables 230.40, 230.45, 230.50, 230.55, and 230.60)
- Public school reports of selected types of cyber-bullying problems (table 230.65)
- Reports by students ages 12–18 of fearing attack or harm at school and of avoiding places, school activities, or classes because of fear of attack or harm (tables 230.70 and 230.80)
- Teachers' agreement that student misbehavior and student tardiness/class cutting interfered with their teaching and that other teachers and their principal enforced school rules (tables 230.90 and 230.92), with state-level data for public school teachers (table 230.95)
- Reports by students in grades 9–12 of being in physical fights (tables 231.10 and 231.20), with state-level data for public school students (table 231.30)
- Reports by students in grades 9–12 of carrying a weapon (tables 231.40 and 231.50), with state-level data for public school students (table 231.60)
- Reports by students ages 12–18 of having access to a loaded gun without adult permission (table 231.70)
- Reports by students in grades 9–12 of using alcohol (tables 232.10 and 232.20), with state-level data for public school students (table 232.30)
- Reports by students in grades 9–12 of using marijuana (tables 232.40 and 232.50), with state-level data for public school students (table 232.60)
- Reports by students in grades 9–12 that illegal drugs were made available to them on school property (table 232.70), with state-level data for public school students (table 232.80)
- Public schools taking serious disciplinary actions in response to specific offenses (table 233.10)
- Public schools with security staff present and with security staff routinely carrying a firearm (table 233.70)
- Reports by students ages 12–18 of various security measures at school (table 233.80)
- Number and percentage distribution of students enrolled in degree-granting postsecondary institutions, by distance education participation, level of enrollment, and control and level of institution (table 311.15)
- Number and percentage of undergraduate students taking night, weekend, or online classes, by selected characteristics (table 311.20)
- Number and percentage of graduate students taking night, weekend, or online classes, by selected characteristics (table 311.30)
- Selected statistics for degree-granting postsecondary institutions that primarily offer online programs, by control of institution and selected characteristics (table 311.33)
- On-campus crimes, arrests, and referrals for disciplinary action at degree-granting postsecondary institutions, by location of incident, control and level of institution, and type of incident (table 329.10)
- On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time-equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident (table 329.20)
- Percentage of undergraduate students ages 18 to 24 in their 4th (senior) year or above who had ever received federal loans, nonfederal loans, or Parent Loans for Undergraduates (PLUS), and average cumulative amount borrowed, by selected student characteristics and control and level of institution (table 331.95)
- Among 25- to 34-year-olds with a bachelor's or higher degree, percentage who were employed in any occupation, by undergraduate field of study, sex, race/ethnicity, nativity, and citizenship status (table 505.20)
- Among employed 25- to 34-year-olds with a bachelor's degree in a science, technology, engineering, or mathematics (STEM) field, percentage with STEM and non-STEM occupations, by sex, race/ethnicity, nativity, and citizenship status (table 505.30)

The *Digest* can be accessed from <http://nces.ed.gov/programs/digest>.

Figure	Page
1. The structure of education in the United States	14
2. Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2012–13	15
3. Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2013	16
4. Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2013	16
5. Highest level of education attained by persons 25 through 29 years old: March 2013	17
6. Percentage of persons 25 through 29 years old, by selected levels of educational attainment and race/ethnicity: 2003 and 2013	17
7. Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public elementary and secondary schools: 1960–61 through 2011–12	71
8. Percentage change in public elementary and secondary enrollment, by state: Fall 2006 to fall 2011	72
9. Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2012 . . .	72
10. Percentage of revenue for public elementary and secondary schools, by source of funds: 1970–71 through 2009–10	73
11. Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970–71 through 2010–11	73
12. Enrollment, degrees conferred, and expenditures in degree-granting postsecondary institutions: 1960–61 through 2012–13	382
13. Percentage change in total enrollment in degree-granting postsecondary institutions, by state: Fall 2007 to fall 2012	383
14. Enrollment in degree-granting postsecondary institutions, by age: Fall 1970 through fall 2023 . . .	383
15. Ratio of full-time-equivalent (FTE) students to total FTE staff and to FTE faculty in degree-granting institutions, by control of institution: 1991, 2001, and 2011	384
16. Bachelor's degrees conferred by postsecondary institutions in selected fields of study: 2001–02, 2006–07, and 2011–12	384
17. Percentage distribution of total revenues of public degree-granting postsecondary institutions, by source of funds: 2011–12	385
18. Percentage distribution of total revenues of private nonprofit degree-granting postsecondary institutions, by source of funds: 2011–12	386
19. Percentage distribution of total revenues of private for-profit degree-granting postsecondary institutions, by source of funds: 2011–12	387
20. Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2013	683
21. Percentage of federal on-budget funds for education, by agency: Fiscal year 2012	684
22. Unemployment rates of persons 25 to 34 years old, by highest level of educational attainment: 1990 through 2013	703
23. Employment to population ratios of persons 25 to 34 years old, by highest level of educational attainment: 1990 through 2013	703
24. Percentage distribution of 2011–12 high school dropouts and high school completers not enrolled in college, by labor force status: October 2012	704
25. Median annual earnings of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 2012	704
26. Median annual salaries of bachelor's degree recipients employed full time 1 year after graduation, by field of study: 1991, 2001, and 2009	705
27. Percentage change in enrollment, by major areas of the world and level of education: 2000 to 2011 .	755
28. Percentage of the population 25 to 34 years old with a bachelor's or higher degree, by OECD country: 2011	756
29. Public direct expenditures on education institutions as a percentage of gross domestic product (GDP), by OECD country: 2010	757

List of Text Tables

Table	Page
A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 to fall 2023	12
B. Number of public school staff, by selected categories: 1969–70, 1980, and 2011	66
C. Postsecondary students denied access to Title IV financial aid because eligibility was suspended due to a drug-related conviction: 2009–10.	381
D. Federal on-budget funding for education, by category: Selected fiscal years, 1965 through 2012	675
E. Median annual earnings of full-time year-round workers 25 years old and over, by selected levels of educational attainment and sex: Selected years, 1995 through 2012	702
F. Population and enrollment at different levels in major areas of the world: 2000 and 2011	752

List of Reference Tables

Chapter 1. All Levels of Education

Population

Table	Page
101.10. Estimates of resident population, by age group: 1970 through 2012	18
101.20. Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2012	19
101.30. Number, percentage, and percentage distribution of total resident population and population under 18 years old, by nativity and race/ethnicity (including selected subgroups): 2002, 2007, and 2012	20
101.40. Estimated total and school-age resident populations, by state: Selected years, 1970 through 2012	22

Characteristics of Households With Children

102.10. Number and percentage distribution of family households, by family structure and presence of own children under 18: Selected years, 1970 through 2012	23
102.20. Number and percentage of family households with own children under age 18, under age 6, and under age 3, by race/ethnicity and family structure: 2012	24
102.30. Median household income, by state: Selected years, 1990 through 2012	25
102.40. Poverty rates for all persons and poverty status of 5- to 17-year-olds, by region and state: Selected years, 1990 through 2012	26
102.50. Official and supplemental measures of poverty status for all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1960 through 2012	27
102.60. Number and percentage of children under age 18 living in poverty, by family structure and race/ethnicity with selected subgroups: 2007 and 2012	30

Enrollment Rates

103.10. Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age group: Selected years, 1980 through 2012	31
103.20. Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2012	33

Educational Attainment

104.10. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and sex: Selected years, 1910 through 2013	35
104.20. Percentage of persons 25 to 29 years old with selected levels of educational attainment, by race/ethnicity and sex: Selected years, 1920 through 2013	38
104.30. Number of persons age 18 and over, by highest level of educational attainment, sex, race/ethnicity, and age: 2013	40
104.40. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and race/ethnicity (including selected subgroups): 2007 and 2012	42
104.50. Persons age 25 and over who hold a bachelor's or higher degree, by sex, race/ethnicity, age group, and field of bachelor's degree: 2012	43
104.60. Number of persons 25 to 34 years old, percentage with a bachelor's or higher degree, and percentage distribution, by undergraduate field of study and selected student characteristics: 2012	44
104.70. Percentage distribution of 6- to 18-year-olds, by parent's highest level of educational attainment, household type, and child's race/ethnicity: 2007 and 2012	45
104.80. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and state: 2000, 2011, and 2012	46
104.85. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and state: 2011 and 2012	48

104.88.	Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by sex and state: 2011 and 2012	50
104.90.	Percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012 and selected student characteristics: 2012	51
104.95.	Number of persons age 25 and over in metropolitan areas with populations greater than 1 million and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex: 2013.	52

Summary of Enrollment, Teachers, and Schools

105.10.	Projected number of participants in educational institutions, by level and control of institution: Fall 2013 .	53
105.20.	Enrollment in educational institutions, by level and control of institution, enrollment level, and attendance status and sex of student: Selected years, fall 1990 through fall 2023	54
105.30.	Enrollment in educational institutions, by level and control of institution: Selected years, 1869–70 through fall 2023	55
105.40.	Number of teachers in elementary and secondary schools, and instructional staff in degree-granting postsecondary institutions, by control of institution: Selected years, fall 1970 through fall 2023	56
105.50.	Number of educational institutions, by level and control of institution: Selected years, 1980–81 through 2011–12	57

Summary of Finances

106.10.	Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2012–13	58
106.20.	Expenditures of educational institutions, by level and control of institution: Selected years, 1899–1900 through 2012–13.	59
106.30.	Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970–71 through 2010–11	60
106.40.	Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2009–10 and 2010–11	61
106.50.	Direct general expenditures per capita of state and local governments for all functions and for education, by level of education and state: 2009–10 and 2010–11	62
106.60.	Gross domestic product, state and local expenditures, national income, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2013.	63
106.70.	Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2013	64

Chapter 2. Elementary and Secondary Education

Historical

201.10.	Historical summary of public elementary and secondary school statistics: Selected years, 1869–70 through 2010–11	74
201.20.	Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889–90 through fall 2013.	76

Enrollment Status and Child Care Arrangements of Young Children

202.10.	Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level of program, control of program, and attendance status: Selected years, 1965 through 2012	77
202.20.	Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by attendance status, level of program, and selected child and family characteristics: 2012	78
202.30.	Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005	79

202.40.	Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Various years, 1991 through 2005	80
202.50.	Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003–04 and 2005–06	81
202.60.	Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005–06	82
202.65.	First-time kindergartners' primary type of child care arrangement prior to kindergarten entry, by selected child, family, and school characteristics: 2010–11	83
202.70.	Children of prekindergarten through second-grade age, by enrollment status, selected maternal characteristics, and household income: 1995, 2001, and 2005.	85

Enrollment in Public Schools

203.10.	Enrollment in public elementary and secondary schools, by level and grade: Selected years, fall 1980 through fall 2023	86
203.20.	Enrollment in public elementary and secondary schools, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2023	87
203.25.	Public school enrollment in prekindergarten through grade 8, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2023	89
203.30.	Public school enrollment in grades 9 through 12, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2023	91
203.40.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2011	93
203.45.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2010	95
203.50.	Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region: Selected years, fall 1995 through fall 2023	97
203.60.	Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1998 through fall 2023	98
203.70.	Percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and state or jurisdiction: Fall 2001 and fall 2011	100
203.80.	Average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2010–11	101
203.90.	Average daily attendance (ADA) as a percentage of total enrollment, school day length, and school year length in public schools, by school level and state: 2007–08 and 2011–12.	102

Participation in Public School Services

204.10.	Number and percentage of public school students eligible for free or reduced-price lunch, by state: Selected years, 2000–01 through 2011–12	103
204.20.	Number and percentage of public school students participating in programs for English language learners, by state: Selected years, 2002–03 through 2011–12	104
204.30.	Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by type of disability: Selected years, 1976–77 through 2011–12	105
204.40.	Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and age group: 2000–01 through 2011–12.	106
204.50.	Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and type of disability: 2010–11 and 2011–12	107
204.60.	Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2011	108
204.70.	Number and percentage of children served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2011–12	109

204.80.	Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006	110
204.90.	Percentage of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006	111

Private School Education

205.10.	Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2011	112
205.20.	Enrollment and percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and grade level: Selected years, fall 1995 through fall 2011	113
205.30.	Percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and selected characteristics: Fall 2009 and fall 2011	115
205.40.	Number and percentage distribution of private elementary and secondary students, teachers, and schools, by orientation of school and selected characteristics: Fall 1999, fall 2009, and fall 2011 . . .	117
205.50.	Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: Selected years, 1999–2000 through 2011–12.	118
205.60.	Private elementary and secondary school full-time-equivalent (FTE) staff and student to FTE staff ratios, by orientation of school, school level, and type of staff: 2007–08 and 2011–12	120
205.70.	Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919–20 through 2012–13	122
205.80.	Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Selected years, 2001 through 2011	123

Homeschooling and School Choice

206.10.	Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: 2003, 2007, and 2012	124
206.20.	Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999, 2003, and 2007	125

Parent Involvement in Education

207.10.	Number of 3- to 5-year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 1993, 2001, and 2007.	126
207.20.	Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past month, by selected child, parent, and school characteristics: 1999, 2003, and 2007	127
207.30.	Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past week, by selected child, parent, and school characteristics: 1999, 2003, and 2007	128
207.40.	Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 1999, 2003, and 2007	129

Teachers and Pupil/Teacher Ratios

208.10.	Public elementary and secondary pupil/teacher ratios, by selected school characteristics: Selected years, fall 1990 through fall 2011	130
208.20.	Public and private elementary and secondary teachers, enrollment, pupil/teacher ratios, and new teacher hires: Selected years, fall 1955 through fall 2023	131

208.30.	Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2011	132
208.40.	Public elementary and secondary teachers, enrollment, and pupil/teacher ratios, by state or jurisdiction: Selected years, fall 2000 through fall 2011	133
<i>Teacher Characteristics, Class Sizes, and Assignments</i>		
209.10.	Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987–88 through 2011–12	134
209.20.	Number, highest degree, and years of full-time teaching experience of teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 through 2011–12	136
209.30.	Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2011–12	138
209.50.	Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2011–12.	139
<i>Teacher Attitudes and Teacher Mobility</i>		
210.10.	Percentage of teachers indicating that certain issues are serious problems in their schools, by level and control of school: Selected years, 1987–88 through 2011–12	140
210.20.	Percentage of teachers agreeing with statements about teaching and school conditions, by control and level of school: Selected years, 1993–94 through 2011–12	141
210.30.	Mobility of public and private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2008–09	142
<i>Teacher Salaries</i>		
211.10.	Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2011–12.	143
211.20.	Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of full-time teaching: Selected years, 1990–91 through 2011–12.	145
211.30.	Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993–94 through 2011–12.	147
211.40.	Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94 through 2011–12.	148
211.50.	Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959–60 through 2012–13	149
211.60.	Estimated average annual salary of teachers in public elementary and secondary schools, by state: Selected years, 1969–70 through 2012–13	150
<i>School Principals</i>		
212.10.	Number, highest degree, average years of experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: 1993–94, 2003–04, and 2011–12	151
<i>School Staff</i>		
213.10.	Staff employed in public elementary and secondary school systems, by type of assignment: Selected years, 1949–50 through fall 2011	152
213.20.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2011	153
213.30.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2010	154

213.40.	Staff, teachers, and teachers as a percentage of staff in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2011	155
213.50.	Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2011	156

Overview of Schools and School Districts

214.10.	Number of public school districts and public and private elementary and secondary schools: Selected years, 1869–70 through 2011–12	157
214.20.	Number and percentage distribution of regular public school districts and students, by enrollment size of district: Selected years, 1979–80 through 2011–12	158
214.30.	Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2010–11 and 2011–12	159
214.40.	Public elementary and secondary school enrollment, number of schools, and other selected characteristics, by locale: 2008–09 through 2011–12	160

Large School Districts

215.10.	Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: Selected years, 1990 through 2011	162
215.20.	Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2010–11 and fiscal year 2013	173
215.30.	Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2011: Selected years, 2010–11 through 2013	185

Public Schools

216.10.	Public elementary and secondary schools, by level of school: Selected years, 1967–68 through 2011–12	188
216.20.	Number and enrollment of public elementary and secondary schools, by school level, type, and charter and magnet status: Selected years, 1990–91 through 2011–12	189
216.30.	Number and percentage distribution of public elementary and secondary students and schools, by traditional or charter school status and selected characteristics: Selected years, 1999–2000 through 2011–12	190
216.40.	Number and percentage distribution of public elementary and secondary schools and enrollment, by level, type, and enrollment size of school: 2009–10, 2010–11, and 2011–12	191
216.45.	Average enrollment and percentage distribution of public elementary and secondary schools, by level, type, and enrollment size: Selected years, 1982–83 through 2011–12	192
216.50.	Number and percentage distribution of public elementary and secondary school students, by percentage of minority enrollment in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2011	193
216.55.	Number and percentage distribution of public elementary and secondary school students, by percentage of student's racial/ethnic group enrolled in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2011	194
216.60.	Number and percentage distribution of public school students eligible for free or reduced-price lunch, by school level, locale, and student race/ethnicity: 2011–12	195
216.70.	Public elementary and secondary schools, by level, type, and state or jurisdiction: 1990–91, 2000–01, 2010–11, and 2011–12	196
216.75.	Public elementary schools, by grade span, average school enrollment, and state or jurisdiction: 2011–12	197
216.80.	Public secondary schools, by grade span, average school enrollment, and state or jurisdiction: 2011–12	198
216.90.	Public elementary and secondary charter schools and enrollment, by state: Selected years, 1999–2000 through 2011–12	199
216.95.	Number and enrollment of public elementary and secondary schools that have closed, by school level, type, and charter status: Selected years, 1995–96 through 2011–12	200

School Facilities

217.10.	Functional age of public schools' main instructional buildings and percentage of schools with permanent and portable (temporary) buildings, by selected school characteristics and condition of permanent and portable buildings: 2012	201
217.15.	Percentage of public schools with plans for major repair, renovation, or replacement of building systems or features in the next 2 years and percentage distribution of schools with such plans, by selected school characteristics, type of system or feature, and main reason for the plans: 2012–13.	202
217.20.	Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005	206

Computers and Technology

218.10.	Number and internet access of instructional computers and rooms in public schools, by selected school characteristics: Selected years, 1995 through 2008.	207
218.20.	Percentage of public school districts with students enrolled in technology-based distance education courses and number of enrollments in such courses, by instructional level and district characteristics: 2002–03, 2004–05, and 2009–10	208

High School Completers and Dropouts

219.10.	High school graduates, by sex and control of school: Selected years, 1869–70 through 2023–24 . . .	209
219.20.	Public high school graduates, by region, state, and jurisdiction: Selected years, 1980–81 through 2023–24 .	210
219.30.	Public high school graduates, by race/ethnicity: 1998–99 through 2023–24	212
219.35.	Averaged freshman graduation rates for public secondary schools, by state or jurisdiction: Selected years, 1990–91 through 2009–10	213
219.40.	Public high school graduates and averaged freshman graduation rate, by race/ethnicity and state or jurisdiction: 2009–10	214
219.50.	Number and percentage of 9th- to 12th-graders who dropped out of public schools, by race/ethnicity, grade, and state or jurisdiction: 2009–10	215
219.60.	Number of people taking the general educational development (GED) test and percentage distribution of those who passed, by age group: 1971 through 2012.	216
219.70.	Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2012	217
219.75.	Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and years of school completed: 1970 through 2012.	218
219.80.	Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate) and number of status dropouts, by noninstitutionalized or institutionalized status, birth in or outside of the United States, and selected characteristics: 2010 and 2011.	219
219.90.	Number and percentage distribution of 14- through 21-year-old students served under Individuals with Disabilities Education Act, Part B, who exited school, by exit reason, age, and type of disability: 2009–10 and 2010–11	220

Skills of Young Children

220.10.	Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001–02	221
220.20.	Percentage of children demonstrating specific cognitive skills, motor skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04	223
220.30.	Children's reading, language, mathematics, color knowledge, and fine motor skills at about 4 years of age, by child's age and selected characteristics: 2005–06	225
220.40.	First-time kindergartners' reading, mathematics, science, cognitive flexibility, and approaches to learning scale scores in fall and spring of the kindergarten year, by selected child, family, and school characteristics: 2010–11.	226

220.50.	Number and percentage distribution of kindergartners, by fall 2010 kindergarten entry status and selected child, family, and school characteristics: 2010–11	228
220.60.	Kindergartners' reading, mathematics, science, cognitive flexibility, and approaches to learning scale scores in fall and spring of the kindergarten year, by fall 2010 kindergarten entry status: 2010–11	229
220.70.	Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007	230
220.80.	Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007	231

Reading Achievement

221.10.	Average National Assessment of Educational Progress (NAEP) reading scale score, by grade and selected student and school characteristics: Selected years, 1992 through 2013.	232
221.20.	Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading achievement levels, by grade and selected student characteristics: Selected years, 1998 through 2013	233
221.30.	Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of students, by age, amount of reading for school and for fun, and time spent on homework and watching TV/video: Selected years, 1984 through 2012.	234
221.40.	Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students and percentage attaining reading achievement levels, by state: Selected years, 1992 through 2013	235
221.50.	Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of 4th-grade public school students, by race/ethnicity and state: 2013.	236
221.60.	Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students and percentage attaining reading achievement levels, by locale and state: Selected years, 2003 through 2013	237
221.70.	Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2013	238
221.75.	Average National Assessment of Educational Progress (NAEP) reading scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1992 through 2013	239
221.80.	Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-grade public school students and percentage attaining reading achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, and 2013	240
221.85.	Average National Assessment of Educational Progress (NAEP) reading scale score, by age and selected student characteristics: Selected years, 1971 through 2012	241
221.90.	Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2012	242

Mathematics Achievement

222.10.	Average National Assessment of Educational Progress (NAEP) mathematics scale score, by grade and selected student and school characteristics: Selected years, 1990 through 2013	243
222.20.	Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics achievement levels, by grade and selected student characteristics: Selected years, 1996 through 2013	244
222.30.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-graders with various attitudes toward mathematics and percentage reporting these attitudes, by selected student and school characteristics: 2013	245
222.40.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of high school graduates at grade 12, by highest mathematics course taken in high school and selected student and school characteristics: 2009.	246

222.50.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1992 through 2013	247
222.60.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1990 through 2013	248
222.70.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by race/ethnicity, highest level of parental education, and state: 2013	249
222.80.	Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, and 2013	250
222.85.	Average National Assessment of Educational Progress (NAEP) mathematics scale score, by age and selected student characteristics: Selected years, 1973 through 2012	251
222.90.	Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics score levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2012	252
222.95.	National Assessment of Educational Progress (NAEP) mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2012 . . .	253

Science Achievement

223.10.	Average National Assessment of Educational Progress (NAEP) science scale score, standard deviation, and percentage of students attaining science achievement levels, by grade level, selected student and school characteristics, and percentile: 2009 and 2011	254
223.20.	Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-grade public school students, by race/ethnicity and state: 2009 and 2011	255
223.25.	Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2011	256
223.30.	Average National Assessment of Educational Progress (NAEP) science scale scores of 12th-graders with various educational goals and attitudes toward science, and percentage reporting these goals and attitudes, by selected student characteristics: 2009	257

Achievement in Other Subjects

224.10.	Average National Assessment of Educational Progress (NAEP) arts scale score of 8th-graders, percentage distribution by frequency of instruction, and percentage participating in selected activities, by subject and selected characteristics: 2008	258
224.20.	Average National Assessment of Educational Progress (NAEP) civics scale score and percentage of students attaining civics achievement levels, by grade level and selected student characteristics: 1998, 2006, and 2010	259
224.30.	Average National Assessment of Educational Progress (NAEP) economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected characteristics: 2006 and 2012	260
224.40.	Average National Assessment of Educational Progress (NAEP) geography scale score, standard deviation, and percentage of students attaining geography achievement levels, by grade level, selected student characteristics, and percentile: 1994, 2001, and 2010	261
224.50.	Average National Assessment of Educational Progress (NAEP) U.S. history scale score, standard deviation, and percentage of students attaining achievement levels, by grade level, selected characteristics, and percentile: Selected years, 1994 through 2010	262
224.60.	Average National Assessment of Educational Progress (NAEP) writing scale score of 8th- and 12th-graders, standard deviation, and percentage of students attaining writing achievement levels, by selected student and school characteristics and percentile: 2011	263

Coursetaking and Grades

225.10.	Average number of Carnegie units earned by public high school graduates in various subject fields, by sex and race/ethnicity: Selected years, 1982 through 2009	264
225.20.	Average number of Carnegie units earned by public high school graduates in career/technical education courses in various occupational fields, by sex and race/ethnicity, and percentage distribution of students, by units earned: Selected years, 2000 through 2009.	266
225.30.	Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2009	268
225.40.	Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by selected student and school characteristics: Selected years, 1990 through 2009	269
225.50.	Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2009	272
225.60.	Number and percentage of public high school graduates taking dual credit, Advanced Placement (AP), and International Baccalaureate (IB) courses in high school and average credits earned, by selected student and school characteristics: 2000, 2005, and 2009.	273
225.70.	Number and percentage of high school graduates who took foreign language courses in high school and average number of credits earned, by language and number of credits: 2000, 2005, and 2009.	275
225.80.	Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 1996, 2003, and 2007	276

College Admission Tests

226.10.	SAT mean scores of college-bound seniors, by race/ethnicity: Selected years, 1986–87 through 2012–13.	277
226.20.	SAT mean scores of college-bound seniors, by sex: 1966–67 through 2012–13.	278
226.30.	SAT mean scores and percentage distribution of college-bound seniors, by selected student characteristics: Selected years, 1995–96 through 2012–13	279
226.40.	Mean SAT scores of college-bound seniors and percentage of graduates taking SAT, by state: Selected years, 1995–96 through 2012–13	281
226.50.	ACT score averages and standard deviations, by sex and race/ethnicity, and percentage of ACT test takers, by selected composite score ranges and planned fields of postsecondary study: Selected years, 1995 through 2013.	282

Student Activities, Homework, and Attendance

227.10.	Percentage of 9th-grade students participating in various school-sponsored and non-school-sponsored activities, by sex and race/ethnicity: 2009	283
227.20.	Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004	284
227.30.	Percentage of high school seniors who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1992 and 2004	285
227.40.	Percentage of elementary and secondary school students who do homework outside of school, whose parents check that homework is done, and whose parents help with homework, by frequency and selected student and school characteristics: 2003 and 2007.	286
227.50.	Percentage of 4th-, 8th-, and 12th-graders absent from school in the last month, by selected student and school characteristics and number of days absent: 2002, 2009, and 2013	288

School Crime Victims

228.10.	School-associated violent deaths of all persons, homicides and suicides of youth ages 5–18 at school, and total homicides and suicides of youth ages 5–18, by type of violent death: 1992–93 to 2010–11	289
228.20.	Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization, location, and year: 1992 through 2012.	290
228.25.	Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization, location, and selected student characteristics: 2012	291

228.30.	Percentage of students ages 12–18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2011	292
228.40.	Percentage of students in grades 9–12 who reported being threatened or injured with a weapon on school property during the previous 12 months, by selected student characteristics and number of times threatened or injured: Selected years, 1993 through 2011	294
228.50.	Percentage of public school students in grades 9–12 who reported being threatened or injured with a weapon on school property at least one time during the previous 12 months, by state: Selected years, 2003 through 2011	295
228.70.	Number and percentage of public and private school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by selected teacher and school characteristics: Selected years, 1993–94 through 2011–12	296
228.80.	Percentage of public school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by state: Selected years, 1993–94 through 2011–12	297

School Crime Incidents

229.10.	Percentage of public schools recording incidents of crime at school and reporting incidents to police, number of incidents, and rate per 1,000 students, by type of crime: Selected years, 1999–2000 through 2009–10	298
229.20.	Number and percentage of public schools recording at least one crime incident that occurred at school, and number and rate of incidents, by school characteristics and type of incident: 1999–2000 and 2009–10	299
229.30.	Percentage of public schools recording incidents of crime at school, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2009–10	301
229.40.	Percentage of public schools reporting incidents of crime at school to the police, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2009–10	302
229.50.	Percentage distribution of public schools, by number of violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2009–10	303
229.60.	Percentage distribution of public schools, by number of serious violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2009–10	304

School Environment

230.10.	Percentage of public schools reporting selected discipline problems that occurred at school, by frequency and selected school characteristics: Selected years, 1999–2000 through 2009–10	305
230.20.	Percentage of students ages 12–18 who reported that gangs were present at school during the school year, by selected student and school characteristics and urbanicity: Selected years, 2001 through 2011	306
230.30.	Percentage of students ages 12–18 who reported being the target of hate-related words and seeing hate-related graffiti at school during the school year, by selected student and school characteristics: Selected years, 1999 through 2011	307
230.35.	Percentage of students ages 12–18 who reported being the target of hate-related words at school, by type of hate-related word and selected student and school characteristics: 2011	308
230.40.	Percentage of students ages 12–18 who reported being bullied at school or cyber-bullied anywhere during the school year, by type of bullying at school, reports of injury, and selected student and school characteristics: 2011	309
230.45.	Percentage of students ages 12–18 who reported being bullied at school during the school year, by type of bullying and selected student and school characteristics: Selected years, 2005 through 2009	310
230.50.	Percentage of students ages 12–18 who reported being bullied at school during the school year and, among bullied students, percentage who reported being bullied in various locations, by selected student and school characteristics: 2011	311
230.55.	Percentage of students ages 12–18 who reported being cyber-bullied anywhere during the school year, by type of cyber-bullying and selected student and school characteristics: 2011	312

230.60.	Among students ages 12–18 who reported being bullied at school or cyber-bullied anywhere during the school year, percentage reporting various frequencies of bullying and the notification of an adult at school, by selected student and school characteristics: 2011	313
230.65.	Percentage of public schools reporting selected types of cyber-bullying problems occurring at school or away from school at least once a week, by selected school characteristics: 2009–10.	314
230.70.	Percentage of students ages 12–18 who reported being afraid of attack or harm, by location and selected student and school characteristics: Selected years, 1995 through 2011.	315
230.80.	Percentage of students ages 12–18 who reported avoiding one or more places in school or avoiding school activities or classes because of fear of attack or harm, by selected student and school characteristics: Selected years, 1995 through 2011.	316
230.90.	Percentage of public and private school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching, by selected teacher and school characteristics: Selected years, 1987–88 through 2011–12	317
230.92.	Percentage of public and private school teachers who agreed that other teachers and the principal enforced school rules, by selected teacher and school characteristics: Selected years, 1987–88 through 2011–12	318
230.95.	Percentage of public school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching and that other teachers and the principal enforced school rules, by state: 2011–12	319

Fights and Weapons

231.10.	Percentage of students in grades 9–12 who reported having been in a physical fight at least one time during the previous 12 months, by location and selected student characteristics: Selected years, 1993 through 2011	320
231.20.	Percentage distribution of students in grades 9–12, by number of times they reported having been in a physical fight anywhere or on school property during the previous 12 months and selected student characteristics: 2011	321
231.30.	Percentage of public school students in grades 9–12 who reported having been in a physical fight at least one time during the previous 12 months, by location and state: Selected years, 2003 through 2011	322
231.40.	Percentage of students in grades 9–12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2011	323
231.50.	Percentage distribution of students in grades 9–12, by number of days they reported carrying a weapon anywhere or on school property during the previous 30 days and selected student characteristics: 2011	324
231.60.	Percentage of public school students in grades 9–12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and state: Selected years, 2003 through 2011	325
231.70.	Percentage of students ages 12–18 who reported having access to a loaded gun, without adult permission, at school or away from school during the school year, by selected student and school characteristics: 2007, 2009, and 2011	326

Alcohol, Illicit Drugs, and Cigarettes

232.10.	Percentage of students in grades 9–12 who reported using alcohol at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2011	327
232.20.	Percentage distribution of students in grades 9–12, by number of days they reported using alcohol anywhere or on school property during the previous 30 days and selected student characteristics: 2011.	328
232.30.	Percentage of public school students in grades 9–12 who reported using alcohol at least 1 day during the previous 30 days, by location and state: Selected years, 2003 through 2011	329
232.40.	Percentage of students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2011	330
232.50.	Percentage distribution of students in grades 9–12, by number of times they reported using marijuana anywhere or on school property during the previous 30 days and selected student characteristics: 2011	331
232.60.	Percentage of public school students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and state: Selected years, 2003 through 2011	332

232.70.	Percentage of students in grades 9–12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by selected student characteristics: Selected years, 1993 through 2011	333
232.80.	Percentage of public school students in grades 9–12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by state: Selected years, 2003 through 2011 . . .	334
232.90.	Percentage of high school seniors reporting use of alcohol and illicit drugs, by frequency of use and substance used: Selected years, 1975 through 2012	335
232.95.	Percentage of 12- to 17-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used, sex, and race/ethnicity: Selected years, 1985 through 2011	336

Discipline, Safety, and Security Measures

233.10.	Number and percentage of public schools that took a serious disciplinary action in response to specific offenses, number of serious actions taken, and percentage distribution of actions, by type of offense, school level, and type of action: Selected years, 1999–2000 through 2009–10	337
233.30.	Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006	338
233.40.	Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006	340
233.50.	Percentage of public and private schools with various safety and security measures, by school level: 2003–04, 2007–08, and 2011–12	341
233.60.	Percentage of public and private schools with various safety and security measures, by school control and selected characteristics: 2011–12	342
233.70.	Percentage of public schools with one or more full-time or part-time security staff present at least once a week, and percentage of schools with security staff routinely carrying a firearm, by selected school characteristics: 2005–06, 2007–08, and 2009–10	343
233.80.	Percentage of students ages 12–18 who reported various security measures at school: Selected years, 1999 through 2011	344

State Regulations

234.10.	Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 2000 through 2014 .	345
234.20.	Minimum amount of instructional time per year and policy on textbook selection, by state: Selected years, 2000 through 2013	346
234.30.	Course credit requirements and exit exam requirements for a standard high school diploma and the use of other high school completion credentials, by state: 2013	348
234.40.	States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006–07	349
234.50.	Required testing for initial certification of elementary and secondary school teachers, by type of assessment and state: 2012 and 2013	350

Revenues

235.10.	Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919–20 through 2010–11	351
235.20.	Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2010–11	353
235.30.	Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2009–10	354
235.40.	Public elementary and secondary revenues and expenditures, by type of locale: 2010–11	355

Expenditures

236.10.	Summary of expenditures for public elementary and secondary education and other related programs, by purpose: Selected years, 1919–20 through 2010–11	356
236.15.	Current expenditures and current expenditures per pupil in public elementary and secondary schools: 1989–90 through 2023–24.	357
236.20.	Total expenditures for public elementary and secondary education and other related programs, by function and subfunction: Selected years, 1990–91 through 2010–11	358
236.25.	Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2010–11	360
236.30.	Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2010–11	362
236.40.	Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2009–10	364
236.50.	Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2009–10 and 2010–11	366
236.55.	Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919–20 through 2010–11	367
236.60.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and subfunction: Selected years, 1990–91 through 2010–11	368
236.65.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2010–11	370
236.70.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2010–11	372
236.75.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2010–11	374
236.80.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2009–10	375
236.90.	Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2010–11	376

Chapter 3. Postsecondary Education**Overview and Historical**

301.10.	Enrollment, staff, and degrees/certificates conferred in degree-granting and non-degree-granting postsecondary institutions, by control and level of institution, sex of student, type of staff, and level of degree: Fall 2010, fall 2011, and 2011–12.	388
301.20.	Historical summary of faculty, enrollment, degrees, and finances in degree-granting postsecondary institutions: Selected years, 1869–70 through 2011–12	389

Enrollment Rates

302.10.	Recent high school completers and their enrollment in 2-year and 4-year colleges, by sex: 1960 through 2012	390
302.20.	Percentage of recent high school completers enrolled in 2- and 4-year colleges, by race/ethnicity: 1960 through 2012.	391
302.30.	Percentage of recent high school completers enrolled in 2-year and 4-year colleges, by income level: 1975 through 2012	392
302.40.	Number of high schools with 12th-graders and percentage of high school graduates attending 4-year colleges, by selected high school characteristics: Selected years, 1998–99 through 2011–12	393
302.50.	Estimated rate of 2009–10 high school graduates attending degree-granting institutions, by state: 2010	394
302.60.	Percentage of 18- to 24-year-olds enrolled in degree-granting institutions, by level of institution and sex and race/ethnicity of student: 1967 through 2012	395

Total Fall Enrollment—General

303.10.	Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2023	396
303.20.	Total fall enrollment in all postsecondary institutions participating in Title IV programs and annual percentage change in enrollment, by degree-granting status and control of institution: 1995 through 2012	398
303.25.	Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2012	399
303.30.	Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2023	400
303.40.	Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age: Selected years, 1970 through 2023	402
303.45.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and age of student: 2007, 2009, and 2011	403
303.50.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, control and level of institution, attendance status, and age of student: 2011	404
303.55.	Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution, attendance status, and age of student: 2011	405
303.60.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2012	406
303.65.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2011	407
303.70.	Total undergraduate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control and level of institution: Selected years, 1970 through 2023 . . .	408
303.80.	Total postbaccalaureate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: 1967 through 2023	410
303.90.	Fall enrollment and number of degree-granting postsecondary institutions, by control and religious affiliation of institution: Selected years, 1980 through 2012	411

Total Fall Enrollment—State-Level

304.10.	Total fall enrollment in degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2012	413
304.15.	Total fall enrollment in public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2012	414
304.20.	Total fall enrollment in private degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2012	415
304.30.	Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2011 and 2012	416
304.35.	Total fall enrollment in public degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2011 and 2012	417
304.40.	Total fall enrollment in private degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2011 and 2012	418
304.45.	Total fall enrollment in private nonprofit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2011 and 2012	419
304.50.	Total fall enrollment in private for-profit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2011 and 2012	420
304.60.	Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2011 and 2012	421
304.70.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment and state or jurisdiction: Selected years, 2000 through 2012	422
304.80.	Total fall enrollment in degree-granting postsecondary institutions, by control, level of enrollment, level of institution, and state or jurisdiction: 2012	423

First-Time Students and Admissions

305.10.	Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, and level and control of institution: 1955 through 2023	424
305.20.	Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, control of institution, and state or jurisdiction: Selected years, 2000 through 2012	425
305.30.	Number and percentage of degree-granting postsecondary institutions with first-year undergraduates using various selection criteria for admission, by control and level of institution: Selected years, 2000–01 through 2012–13	426
305.40.	Acceptance rates; number of applications, admissions, and enrollees; and enrollees' SAT and ACT scores for degree-granting postsecondary institutions with first-year undergraduates, by control and level of institution: 2012–13	427

Enrollment of Racial/Ethnic Groups

306.10.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and race/ethnicity of student: Selected years, 1976 through 2012	428
306.20.	Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution and race/ethnicity of student: Selected years, 1976 through 2012	431
306.30.	Fall enrollment of U.S. residents in degree-granting postsecondary institutions, by race/ethnicity: 1998 through 2023	433
306.40.	Fall enrollment of males and females and specific racial/ethnic groups in degree-granting postsecondary institutions, by control and level of institution and percentage of U.S. resident enrollment in the same racial/ethnic group: 2012	434
306.50.	Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution, level of enrollment, and race/ethnicity of student: 2012	436
306.60.	Fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2012	438
306.70.	Fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2011	440

Full-Time-Equivalent Fall Enrollment

307.10.	Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1967 through 2023	442
307.20.	Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2000, 2010, and 2012	443
307.30.	Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: 2000, 2010, and 2012	444

Twelve-Month Enrollment

308.10.	Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2010–11 and 2011–12	445
308.20.	Total 12-month enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: Selected years, 2004–05 through 2011–12	446

Student Residence and Migration

309.10.	Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions, by state or jurisdiction: Fall 2012	447
---------	--	-----

309.20.	Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2012	448
309.30.	Residence and migration of all first-time degree/certificate-seeking undergraduates in 4-year degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2012	449
<i>Study Abroad and Foreign Students</i>		
310.10.	Number of U.S. students studying abroad and percentage distribution, by sex, race/ethnicity, and other selected characteristics: Selected years, 1996–97 through 2010–11.	450
310.20.	Foreign students enrolled in institutions of higher education in the United States, by continent, region, and selected countries of origin: Selected years, 1980–81 through 2011–12.	451
<i>Programs and Courses</i>		
311.10.	Number and percentage distribution of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2007–08 and 2011–12	452
311.15.	Number and percentage of students enrolled in degree-granting postsecondary institutions, by distance education participation, location of student, level of enrollment, and control and level of institution: Fall 2012	453
311.20.	Number and percentage of undergraduate students taking night, weekend, or online classes, by selected characteristics: 2011–12	454
311.30.	Number and percentage of graduate students taking night, weekend, or online classes, by selected characteristics: 2011–12	455
311.33.	Selected statistics for degree-granting postsecondary institutions that primarily offer online programs, by control of institution and selected characteristics: 2012.	456
311.40.	Percentage of first-year undergraduate students who reported taking remedial education courses, by selected student and institution characteristics: 2003–04, 2007–08, and 2011–12	457
311.50.	Percentage of degree-granting postsecondary institutions with first-year undergraduates offering remedial services, by control and level of institution: 1989–90 through 2012–13	459
311.60.	Enrollment in postsecondary education, by level of enrollment, level of institution, student age, and major field of study: 2011–12	460
311.70.	Course enrollments in languages other than English compared with total enrollment at degree-granting postsecondary institutions, by enrollment level, institution level, and language: Selected years, 1965 through 2009	462
311.80.	Number and percentage distribution of course enrollments in languages other than English at degree-granting postsecondary institutions, by language and enrollment level: 2002, 2006, and 2009.	463
311.90.	Graduate enrollment in science and engineering programs in degree-granting postsecondary institutions, by discipline: Fall 1999 through fall 2011	464
<i>Large Institutions and Institutions Serving Specific Groups</i>		
312.10.	Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2012	465
312.20.	Selected statistics for degree-granting postsecondary institutions enrolling more than 15,000 students in 2012, by selected institution and student characteristics: Selected years, 1990 through 2011–12	466
312.30.	Enrollment and degrees conferred in degree-granting women’s colleges, by selected characteristics and institution: Fall 2012 and 2011–12	476
312.40.	Enrollment and degrees conferred in degree-granting postsecondary institutions that serve large proportions of Hispanic undergraduate students, by institution level and control, percentage Hispanic, degree level, and other selected characteristics: Fall 2012 and 2011–12	477
312.50.	Fall enrollment and degrees conferred in degree-granting tribally controlled postsecondary institutions, by state and institution: Selected years, fall 2000 through fall 2012, and 2010–11 and 2011–12	489

Historically Black Colleges and Universities

313.10.	Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2011, 2012, and 2011–12	490
313.20.	Fall enrollment in degree-granting historically Black colleges and universities, by sex of student and level and control of institution: Selected years, 1976 through 2012	492
313.30.	Selected statistics on degree-granting historically Black colleges and universities, by control and level of institution: Selected years, 1990 through 2012	493

Staff

314.10.	Total and full-time-equivalent (FTE) staff and FTE student/FTE staff ratios in postsecondary institutions participating in Title IV programs, by degree-granting status, control of institution, and primary occupation: Fall 1991, fall 2001, and fall 2011	494
314.20.	Employees in degree-granting postsecondary institutions, by sex, employment status, control and level of institution, and primary occupation: Selected years, fall 1991 through fall 2011	495
314.30.	Employees in degree-granting postsecondary institutions, by employment status, sex, control and level of institution, and primary occupation: Fall 2011	496
314.40.	Employees in degree-granting postsecondary institutions, by race/ethnicity, sex, employment status, control and level of institution, and primary occupation: Fall 2011	498
314.50.	Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in public degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2011 . . .	499
314.60.	Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in private degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2011 . . .	500

Faculty and Instructional Staff

315.10.	Number of instructional faculty in degree-granting postsecondary institutions, by employment status, sex, control, and level of institution: Selected years, fall 1970 through fall 2011	501
315.20.	Full-time instructional faculty in degree-granting postsecondary institutions, by race/ethnicity, sex, and academic rank: Fall 2007, fall 2009, and fall 2011	502
315.30.	Percentage distribution of full-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003	503
315.40.	Percentage distribution of part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003	505
315.50.	Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003	507
315.60.	Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003	509
315.70.	Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003	511
315.80.	Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003	513

Faculty Salaries and Benefits

316.10.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, control and level of institution, and sex: Selected years, 1970–71 through 2012–13	515
316.20.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, sex, and control and level of institution: Selected years, 1999–2000 through 2012–13	518
316.30.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2012–13	519

316.40.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2011–12	520
316.50.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2012–13	521
316.60.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2011–12	522
316.70.	Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by type of benefit and control of institution: Selected years, 1977–78 through 2010–11	523
316.80.	Percentage of full-time instructional faculty with tenure for degree-granting postsecondary institutions with a tenure system, by academic rank, sex, and control and level of institution: Selected years, 1993–94 through 2011–12	525

Institutions

317.10.	Degree-granting postsecondary institutions, by control and level of institution: Selected years, 1949–50 through 2012–13.	526
317.20.	Degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2012–13	527
317.30.	Number of non-degree-granting Title IV institutions offering postsecondary education, by control of institution and state or jurisdiction: Selected years, 2000–01 through 2012–13	529
317.40.	Number of degree-granting postsecondary institutions and enrollment in these institutions, by enrollment size, control, and level of institution: Fall 2012	530
317.50.	Degree-granting postsecondary institutions that have closed their doors, by control and level of institution: 1969–70 through 2012–13	532

Summary of Degrees Conferred

318.10.	Degrees conferred by degree-granting postsecondary institutions, by level of degree and sex of student: Selected years, 1869–70 through 2023–24	533
318.20.	Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2011–12.	534
318.30.	Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2011–12	535
318.40.	Degrees/certificates conferred by postsecondary institutions, by control of institution and level of degree: 1969–70 through 2011–12	549
318.50.	Degrees conferred by postsecondary institutions, by control of institution, level of degree, and field of study: 2011–12	550
318.60.	Number of postsecondary institutions conferring degrees, by control, level of degree, and field of study: 2011–12	551

Degrees Conferred—State-Level

319.10.	Degrees conferred by postsecondary institutions, by control, level of degree, and state or jurisdiction: 2011–12	552
319.20.	Degrees conferred by postsecondary institutions, by level of degree and state or jurisdiction: 2008–09 through 2011–12.	553
319.30.	Bachelor's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2011–12	554
319.40.	Master's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2011–12	555

Certificates Below the Associate's Degree Level

320.10.	Certificates below the associate's degree level conferred by postsecondary institutions, by length of curriculum, sex of student, institution level and control, and discipline division: 2011–12	556
320.20.	Certificates below the associate's degree level conferred by postsecondary institutions, by race/ethnicity and sex of student: 1998–99 through 2011–12	558

Associate's Degrees

321.10.	Associate's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2001–02 through 2011–12	559
321.20.	Associate's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2011–12	560
321.30.	Associate's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	561
321.40.	Associate's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	562
321.50.	Associate's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	563

Bachelor's Degrees

322.10.	Bachelor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2010–11	564
322.20.	Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2011–12	565
322.30.	Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	566
322.40.	Bachelor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	567
322.50.	Bachelor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	568

Master's Degrees

323.10.	Master's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2011–12	569
323.20.	Master's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2011–12	570
323.30.	Master's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	571
323.40.	Master's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2009–10 and 2010–11	572
323.50.	Master's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	573

Doctor's Degrees

324.10.	Doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2011–12	574
324.20.	Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2011–12	575
324.25.	Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	576
324.30.	Doctor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	577

324.35.	Doctor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2010–11 and 2011–12	578
324.40.	Number of postsecondary institutions conferring doctor's degrees in dentistry, medicine, and law, and number of such degrees conferred, by sex of student: Selected years, 1949–50 through 2011–12 . .	579
324.50.	Degrees conferred by postsecondary institutions in selected professional fields, by sex of student, control of institution, and field of study: Selected years, 1985–86 through 2011–12	580
324.55.	Degrees conferred by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2010–11 and 2011–12	581
324.60.	Degrees conferred to males by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2010–11 and 2011–12	581
324.70.	Degrees conferred to females by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2010–11 and 2011–12	582
324.80.	Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2009–10 and 2010–11	583
324.90.	Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees, by rank order: 2002–03 through 2011–12	584

Trends in Degrees by Field

325.10.	Degrees in agriculture and natural resources conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2011–12	585
325.15.	Degrees in architecture and related services conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2011–12	586
325.20.	Degrees in the biological and biomedical sciences conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1951–52 through 2011–12	587
325.22.	Degrees in biology, microbiology, and zoology conferred by postsecondary institutions, by level of degree: 1970–71 through 2011–12	588
325.25.	Degrees in business conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1955–56 through 2011–12	589
325.30.	Degrees in communication, journalism, and related programs and in communications technologies conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2011–12	590
325.35.	Degrees in computer and information sciences conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2011–12	591
325.40.	Degrees in education conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2011–12	592
325.45.	Degrees in engineering and engineering technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2011–12	593
325.47.	Degrees in chemical, civil, electrical, and mechanical engineering conferred by postsecondary institutions, by level of degree: 1970–71 through 2011–12	594
325.50.	Degrees in English language and literature/letters conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2011–12	595
325.55.	Degrees in foreign languages and literatures conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959–60 through 2011–12	596
325.57.	Degrees in French, German, Italian, and Spanish language and literature conferred by postsecondary institutions, by level of degree: Selected years, 1949–50 through 2011–12	597
325.59.	Degrees in Arabic, Chinese, Korean, and Russian language and literature conferred by postsecondary institutions, by level of degree: 1969–70 through 2011–12	598
325.60.	Degrees in the health professions and related programs conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2011–12	599
325.65.	Degrees in mathematics and statistics conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2011–12	600

325.70.	Degrees in the physical sciences and science technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959–60 through 2011–12	601
325.72.	Degrees in chemistry, geology and earth science, and physics conferred by postsecondary institutions, by level of degree: 1970–71 through 2011–12	602
325.80.	Degrees in psychology conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2011–12	603
325.85.	Degrees in public administration and social services conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2011–12	604
325.90.	Degrees in the social sciences and history conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2011–12	605
325.92.	Degrees in economics, history, political science and government, and sociology conferred by postsecondary institutions, by level of degree: Selected years, 1949–50 through 2011–12	606
325.95.	Degrees in visual and performing arts conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2011–12	607

Completion Rates

326.10.	Graduation rates of first-time, full-time bachelor's degree-seeking students at 4-year postsecondary institutions, by race/ethnicity, time to completion, sex, and control of institution: Selected cohort entry years, 1996 through 2006	608
326.20.	Graduation rates of first-time, full-time degree/certificate-seeking students at 2-year postsecondary institutions who completed a credential within 150 percent of normal time, by race/ethnicity, sex, and control of institution: Selected cohort entry years, 2000 through 2009	613
326.30.	Retention of first-time degree-seeking undergraduates at degree-granting postsecondary institutions, by attendance status, level and control of institution, and percentage of applications accepted: 2006 to 2012	615
326.40.	Percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2003–04 academic year, by highest degree attained, enrollment status, and selected characteristics: Spring 2009.	617

Achievement and Admissions Testing

327.10.	Average scores and standard deviations on Graduate Record Examination (GRE) general and subject tests: 1965 through 2012.	619
---------	---	-----

Security and Crime

329.10.	On-campus crimes, arrests, and referrals for disciplinary action at degree-granting postsecondary institutions, by location of incident, control and level of institution, and type of incident: 2001 through 2011	621
329.20.	On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time-equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident: 2001 through 2011	623

Student Charges

330.10.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by level and control of institution: 1963–64 through 2012–13	625
330.20.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2011–12 and 2012–13	629
330.30.	Average undergraduate tuition, fees, room, and board rates for full-time students in degree-granting postsecondary institutions, by percentile, control, and level of institution: Selected years, 2000–01 through 2012–13	630

330.40.	Average total cost of attendance for first-time, full-time undergraduate students in degree-granting postsecondary institutions, by control and level of institution, living arrangement, and component of student costs: 2009–10 through 2012–13	631
330.50.	Average graduate tuition and required fees in degree-granting postsecondary institutions, by control of institution and percentile: 1989–90 through 2012–13	632

Financial Aid for Undergraduates

331.10.	Percentage of undergraduates receiving financial aid, by type and source of aid and selected student characteristics: 2011–12	633
331.20.	Full-time, first-time degree/certificate-seeking undergraduate students enrolled in degree-granting postsecondary institutions, by participation and average amount awarded in financial aid programs, and control and level of institution: 2000–01 through 2011–12	634
331.30.	Average amount of grant and scholarship aid and average net price for first-time, full-time students receiving Title IV aid, and percentage distribution of students, by control and level of institution and income level: 2009–10, 2010–11 and 2011–12	636
331.40.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2011–12	637
331.45.	Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2011–12	638
331.50.	Amount borrowed, aid status, and sources of aid for full-time and part-time undergraduates, by control and level of institution: 2007–08 and 2011–12	639
331.60.	Percentage of full-time, full-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12	640
331.70.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12	641
331.80.	Percentage of part-time or part-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12	643
331.90.	Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and level of institution: 2007–08 and 2011–12	644
331.95.	Percentage of undergraduate students ages 18 to 24 in their 4th (senior) year or above who had ever received federal loans, nonfederal loans, or Parent Loans for Undergraduates (PLUS), and the average cumulative amount borrowed, by selected student characteristics and control and level of institution: 1989–90, 1999–2000, and 2011–12	645

Financial Aid for Postbaccalaureate Students

332.10.	Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992–93 through 2011–12	647
332.20.	Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992–93 through 2011–12	648
332.30.	Percentage of full-time, full-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992–93 through 2011–12	649
332.40.	Percentage of part-time or part-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992–93 through 2011–12	650
332.50.	Number of postsecondary students who entered the student loan repayment phase, number of students who defaulted, and student loan cohort default rates, by 2-year or 3-year default period and level and control of institution: Fiscal years 2009 through 2011	651

Revenues

333.10.	Revenues of public degree-granting postsecondary institutions, by source of revenue and level of institution: 2005–06 through 2011–12	652
333.20.	Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2011–12	654

333.25.	Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2010–11	655
333.30.	Appropriations from state and local governments for public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1990–91 through 2011–12	656
333.40.	Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and level of institution: 1999–2000 through 2011–12	657
333.50.	Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and classification of institution: 2011–12	659
333.55.	Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years, 1999–2000 through 2011–12	660
333.60.	Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and classification of institution: 2011–12	661
333.70.	Revenue received from the federal government by the 120 degree-granting postsecondary institutions receiving the largest amounts, by control and rank order: 2011–12	662
333.80.	Voluntary support for degree-granting postsecondary institutions, by source and purpose of support: Selected years, 1949–50 through 2011–12	663
333.90.	Endowment funds of the 120 degree-granting postsecondary institutions with the largest endowments, by rank order: Fiscal year 2012	664

Expenditures

334.10.	Expenditures of public degree-granting postsecondary institutions, by purpose of expenditure and level of institution: 2005–06 through 2011–12	665
334.20.	Expenditures of public degree-granting postsecondary institutions, by level of institution, purpose of expenditure, and state or jurisdiction: 2008–09 through 2011–12	667
334.30.	Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and level of institution: 1999–2000 through 2011–12	668
334.40.	Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and classification of institution: 2011–12	670
334.50.	Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and level of institution: 1999–2000 through 2011–12	671
334.60.	Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and classification of institution: 2011–12	673
334.70.	Total expenditures of private nonprofit and for-profit degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1999–2000 through 2011–12	674

Chapter 4. Federal Funds for Education and Related Activities

On-Budget and Off-Budget Support

401.10.	Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2013	685
401.20.	Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2012 . . .	687
401.30.	Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2013	689
401.60.	U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2012 .	696
401.70.	Appropriations for Title I and selected other programs under the No Child Left Behind Act of 2001, by program and state or jurisdiction: Fiscal years 2012 and 2013	697

Federal Obligations for Research and Development

402.10.	Federal obligations for research, development, and R&D plant, by category of obligation, performers, and fields of science: Fiscal years 2005 through 2013	698
---------	--	-----

Chapter 5. Outcomes of Education***Labor Force Status by Educational Attainment***

501.10.	Labor force participation, employment, and unemployment of persons 25 to 64 years old, by sex, race/ethnicity, age group, and educational attainment: 2010, 2011, and 2012	706
501.20.	Labor force participation, employment, and unemployment of persons 16 to 24 years old who are not enrolled in school, by age group, sex, race/ethnicity, and educational attainment: 2010, 2011, and 2012	708
501.30.	Number and percentage of persons 16 to 24 years old who were neither enrolled in school nor working, by educational attainment, age group, family poverty status, and race/ethnicity: 2013	710
501.40.	Percentage distribution of 25- to 34-year-olds with various levels of educational attainment, by labor force status, sex, race/ethnicity, and U.S. nativity and citizenship status: 2012	711
501.50.	Employment to population ratios of persons 16 to 64 years old, by age group and educational attainment: Selected years, 1975 through 2013	712
501.60.	Employment to population ratios of males 16 to 64 years old, by age group and educational attainment: Selected years, 1975 through 2013	713
501.70.	Employment to population ratios of females 16 to 64 years old, by age group and educational attainment: Selected years, 1975 through 2013	714
501.80.	Unemployment rates of persons 16 to 64 years old, by age group and educational attainment: Selected years, 1975 through 2013	715
501.85.	Unemployment rates of males 16 to 64 years old, by age group and educational attainment: Selected years, 1975 through 2013	716
501.90.	Unemployment rates of females 16 to 64 years old, by age group and educational attainment: Selected years, 1975 through 2013	717

Occupation and Earnings by Educational Attainment

502.10.	Occupation of employed persons 25 years old and over, by highest level of educational attainment and sex: 2012.	718
502.20.	Median annual earnings of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2012	719
502.30.	Median annual earnings of full-time year-round workers 25 to 34 years old and full-time year-round workers as a percentage of the labor force, by sex, race/ethnicity, and educational attainment: Selected years, 1995 through 2012	723
502.40.	Distribution of earnings and median earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2012	726

Employment of Students

503.10.	Percentage of high school students age 16 and over who were employed, by age group, sex, race/ethnicity, family income, nativity, and hours worked per week: Selected years, 1970 through 2012	728
503.20.	Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and control and level of institution: Selected years, October 1970 through 2012	730
503.30.	Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and selected characteristics: October 2010 through 2012	731

Labor Force Status of Recent High School Completers and Dropouts

504.10.	Labor force status of 2010, 2011, and 2012 high school completers, by college enrollment status, sex, and race/ethnicity: October 2010, 2011, and 2012.	732
504.20.	Labor force status of high school dropouts, by sex and race/ethnicity: October, selected years, 1980 through 2012.	734
504.30.	Among special education students out of high school up to 8 years, percentage attending and completing postsecondary education, living independently, and working competitively, by type of disability: 2007 and 2009	735

Labor Market Outcomes for Recent Bachelor's Degree Completers

505.10.	Number, percentage distribution, unemployment rates, and median earnings of 25- to 29-year-old bachelor's degree holders and percentage of degree holders among all 25- to 29-year-olds, by field of study: 2009 and 2012	736
505.20.	Among 25- to 34-year-olds with a bachelor's or higher degree, percentage who were employed in any occupation, by undergraduate field of study, sex, race/ethnicity, nativity, and citizenship status: 2011	738
505.30.	Among employed 25- to 34-year-olds with a bachelor's degree in a science, technology, engineering, or mathematics (STEM) field, percentage with STEM and non-STEM occupations, by sex, race/ethnicity, nativity, and citizenship status: 2011	739
505.40.	Percentage distribution of recipients of bachelor's degrees in various fields of study 1 year after graduation, by time to completion, enrollment and employment status, and occupation: 2001 and 2009	740
505.50.	Percentage, selected employment characteristics, and annual salaries of bachelor's degree recipients employed full time 1 year after graduation, by field of study: 1991, 2001, and 2009 . .	741

Attitudes of Young Adults

506.10.	Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were "very important," by sex: Selected years, 1972 through 2004	742
---------	---	-----

Skills of Adults and Continuing Education

507.10.	Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003	743
507.20.	Participants in state-administered adult basic education, secondary education, and English as a second language programs, by type of program and state or jurisdiction: Selected fiscal years, 2000 through 2011	744
507.30.	Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: 1995, 1999, and 2005	745
507.40.	Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005	748

Chapter 6. International Comparisons of Education***Population, Enrollment, and Teachers***

601.10.	Population, school enrollment, and number of teachers, by major areas of the world and level of education: Selected years, 1980 through 2011	758
601.20.	Selected population and enrollment statistics for countries with populations of at least 10 million in 2011, by continent and country: Selected years, 1990 through 2011	759
601.30.	School-age populations as a percentage of total population, by age group and OECD or other country: Selected years, 1985 through 2010	762
601.40.	Percentage of population enrolled in secondary and postsecondary education, by age group and OECD or other country: Selected years, 2002 through 2011	763
601.50.	Pupil/teacher ratios in public and private elementary and secondary schools, by level of education and country: Selected years, 2000 through 2011	764
601.60.	Teachers' statutory teaching and total working time and average class size in public elementary and secondary schools, by level of education and country: 2011	765

Achievement and Instruction

602.10.	Average reading literacy scale scores of fourth-graders and percentage whose schools emphasize reading skills and strategies at or before second grade or at third grade, by sex and country or other education system: 2001, 2006, and 2011	766
602.20.	Average fourth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2011	767
602.30.	Average eighth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2011	768
602.40.	Average reading literacy, mathematics literacy, and science literacy scores of 15-year-old students, by sex and country or other education system: 2009 and 2012	770
602.50.	Average reading literacy scores of 15-year-old students and percentage attaining reading literacy proficiency levels, by country or other education system: 2012	771
602.60.	Average mathematics literacy scores of 15-year-old students and percentage attaining mathematics literacy proficiency levels, by country or other education system: 2012	773
602.70.	Average science literacy scores of 15-year-old students and percentage attaining science literacy proficiency levels, by country or other education system: 2012	775

Attainment, Degrees, and Outcomes

603.10.	Percentage of the population 25 to 64 years old who completed high school, by age group and country: Selected years, 2001 through 2011	777
603.20.	Percentage of the population 25 to 64 years old who attained selected levels of postsecondary education, by age group and country: 2001 and 2011	778
603.30.	Percentage of the population 25 to 64 years old who attained a bachelor's or higher level degree, by age group and country: Selected years, 1999 through 2011	779
603.40.	Percentage of the population 25 to 64 years old who attained a postsecondary vocational degree, by age group and country: Selected years, 1999 through 2011	780
603.50.	Number of bachelor's degree recipients per 100 persons at the typical age of graduation, by sex and country: 2005 through 2011	781
603.60.	Percentage of bachelor's and higher level degrees awarded to women, by field of study and country: 2011	782
603.70.	Percentage of bachelor's degrees awarded in mathematics, science, and engineering, by field of study and country: Selected years, 1990 through 2010	783
603.80.	Percentage of graduate degrees awarded in mathematics, science, and engineering, by field of study and country: Selected years, 1990 through 2010	784
603.90.	Employment to population ratios of 25- to 64-year-olds, by sex, highest level of educational attainment, and country: 2011	785

Finances

605.10.	Gross domestic product per capita and public and private education expenditures per full-time-equivalent (FTE) student, by level of education and country: Selected years, 2005 through 2010	786
605.20.	Public and private direct expenditures on education institutions as a percentage of gross domestic product, by level of education and country: Selected years, 1995 through 2010	788

Chapter 7. Libraries and Technology***Libraries***

701.10.	Selected statistics on public school libraries/media centers, by level of school: Selected years, 1999–2000 through 2011–12	790
701.20.	Selected statistics on public school libraries/media centers, by level and enrollment size of school: 2011–12	791
701.30.	Selected statistics on public school libraries/media centers, by state: 2011–12	792

701.40.	Collections, staff, and operating expenditures of degree-granting postsecondary institution libraries: Selected years, 1981–82 through 2011–12.	793
701.50.	Collections, staff, operating expenditures, public service hours, and reference services of the 60 largest college and university libraries: Fiscal year 2012.	794
701.60.	Public libraries, books and serial volumes, library visits, circulation, and reference transactions, by state: Fiscal years 2009 and 2010	795

Computer and Internet Use

702.10.	Number and percentage of persons 3 years old and over using the Internet and percentage distribution by means of internet access from home and main reason for not having high-speed access, by selected characteristics of students and other users: 2012.	796
---------	--	-----

READER'S GUIDE

Data Sources

The data in this volume were obtained from many different sources—including students and teachers, state education agencies, local elementary and secondary schools, and colleges and universities—using surveys and compilations of administrative records. Users should be cautious when comparing data from different sources. Differences in aspects such as procedures, timing, question phrasing, and interviewer training can affect the comparability of results across data sources.

Most of the tables present data from surveys conducted by the National Center for Education Statistics (NCES) or conducted by other agencies and organizations with support from NCES. Some tables also include other data published by federal and state agencies, private research organizations, or professional organizations. Brief descriptions of the surveys and other data sources used in this volume can be found in Appendix A: Guide to Sources. For each NCES and non-NCES data source, the Guide to Sources also provides information on where to obtain further details about that source.

Data are obtained primarily from two types of surveys: universe surveys and sample surveys. In universe surveys, information is collected from every member of the population. For example, in a survey regarding certain expenditures of public elementary and secondary schools, data would be obtained from each school district in the United States. When data from an entire population are available, estimates of the total population or a subpopulation are made by simply summing the units in the population or subpopulation. As a result, there is no sampling error, and observed differences are reported as true.

Since a universe survey is often expensive and time consuming, many surveys collect data from a sample of the population of interest (sample survey). For example, the National Assessment of Educational Progress (NAEP) assesses a representative sample of students rather than the entire population of students. When a sample survey is used, statistical uncertainty is introduced, because the data come from only a portion of the entire population. This statistical uncertainty must be considered when reporting estimates and making comparisons. For information about how NCES accounts for statistical uncertainty when reporting sample survey results, see “Data Analysis and Interpretation,” later in this Reader’s Guide.

Common Measures and Indexes

Various types of statistics derived from universe and sample surveys are reported. Many tables report the size of a population or a subpopulation, and often the size of a subpopulation is expressed as a percentage of the total population.

In addition, the average (or *mean*) value of some characteristic of the population or subpopulation may be reported. The average is obtained by summing the values for all members of the population and dividing the sum by the size of the population. An example is the average annual salary of full-time instructional faculty at degree-granting postsecondary institutions. Another measure that is sometimes used is the *median*. The median is the midpoint value of a characteristic at or above which 50 percent of the population is estimated to fall, and at or below which 50 percent of the population is estimated to fall. An example is the median annual earnings of young adults who are full-time year-round workers. Some tables also present an *average per capita*, or per person, which represents an average computed for every person in a specified group or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population. An example is the per capita expenditure on education in each state.

Many tables report financial data in dollar amounts. Unless otherwise noted, all financial data are in *current dollars*, meaning not adjusted for changes in the purchasing power of the dollar over time due to inflation. For example, 1991–92 teacher salaries in current dollars are the amounts that the teachers earned in 1991–92, without any adjustments to account for inflation. *Constant dollar* adjustments attempt to remove the effects of price changes (inflation) from statistical series reported in dollars. For example, if teacher salaries over a 20-year period are adjusted to constant 2012–13 dollars, the salaries for all years are adjusted to the dollar values that presumably would exist if prices in each year were the same as in 2012–13, in other words, as if the dollar had constant purchasing power over the entire period. Any changes in the constant dollar amounts would reflect only changes in real values. Constant dollar amounts are computed using *price indexes*. Price indexes for inflation adjustments can be found in table 106.70. Each table that presents constant dollars includes a note indicating which index was used for the inflation adjustments; in most cases, the Consumer Price Index was used.

When presenting data for a time series, some tables include both *actual* and *projected* data. Actual data are data that have

already been collected. Projected data can be used when data for a recent or future year are not yet available. Projections are estimates that are based on recent trends in relevant statistics and patterns associated with correlated variables. Unless otherwise noted, all data in this volume are actual.

Standard Errors

Using estimates calculated from data based on a sample of the population requires consideration of several factors before the estimates become meaningful. When using data from a sample, some margin of error will always be present in estimations of characteristics of the total population or subpopulation because the data are available from only a portion of the total population. Consequently, data from samples can provide only an approximation of the true or actual value. The margin of error of an estimate, or the range of potential true or actual values, depends on several factors such as the amount of variation in the responses, the size and representativeness of the sample, and the size of the subgroup for which the estimate is computed. The magnitude of this margin of error is measured by what statisticians call the “standard error” of an estimate.

When data from sample surveys are reported, the standard error is calculated for each estimate. In the tables, the standard error for each estimate generally appears in parentheses next to the estimate to which it applies. In order to caution the reader when interpreting findings, estimates from sample surveys are flagged with a “!” when the standard error is between 30 and 50 percent of the estimate, and suppressed with a “‡” when the standard error is 50 percent of the estimate or greater. The term “coefficient of variation (CV)” refers to the ratio of the standard error to the estimate; for example, if an estimate has a CV of 30 percent, this means that the standard error is equal to 30 percent of the value of the estimate.

Nonsampling Errors

In addition to standard errors, which apply only to sample surveys, all surveys are subject to nonsampling errors. Nonsampling errors may arise when individual respondents or interviewers interpret questions differently; when respondents must estimate values, or when coders, keyers, and other processors handle answers differently; when people who should be included in the universe are not; or when people fail to respond, either totally or partially. Total nonresponse means that people do not respond to the survey at all, while partial nonresponse (or item nonresponse) means that people fail to respond to specific survey items. To compensate for nonresponse, adjustments are often made. For universe surveys, an adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often a substitution of the “average” questionnaire response for the nonresponse. For universe surveys, imputations are usually made separately within various groups of sample members that have similar survey

characteristics. For sample surveys, total nonresponse is handled through nonresponse adjustments to the sample weights. For sample surveys, imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent. For additional general information about imputations, see the *NCES Statistical Standards* (NCES 2003-601). Appendix A: Guide to Sources includes some information about specific surveys’ response rates, nonresponse adjustments, and other efforts to reduce nonsampling error. Although the magnitude of nonsampling error is frequently unknown, idiosyncrasies that have been identified are noted in the appropriate tables.

Data Analysis and Interpretation

When estimates are from a sample, caution is warranted when drawing conclusions about one estimate in comparison to another, or about whether a time series of estimates is increasing, decreasing, or staying the same. Although one estimate may appear to be larger than another, a statistical test may find that the apparent difference between them is not reliably measurable due to the uncertainty around the estimates. In this case, the estimates will be described as having no measurable difference, meaning that the difference between them is not statistically significant.

Whether differences in means or percentages are statistically significant can be determined using the standard errors of the estimates. In reports produced by NCES, when differences are statistically significant, the probability that the difference occurred by chance is less than 5 percent, according to NCES standards.

Data presented in the text do not investigate more complex hypotheses, account for interrelationships among variables, or support causal inferences. We encourage readers who are interested in more complex questions and in-depth analysis to explore other NCES resources, including publications, online data tools, and public- and restricted-use datasets at <http://nces.ed.gov>.

In text that reports estimates based on samples, differences between estimates (including increases and decreases) are stated only when they are statistically significant. To determine whether differences reported are statistically significant, two-tailed *t* tests at the .05 level are typically used. The *t* test formula for determining statistical significance is adjusted when the samples being compared are dependent. The *t* test formula is not adjusted for multiple comparisons, with the exception of statistical tests conducted using the NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). When the variables to be tested are postulated to form a trend, the relationship may be tested using linear regression, logistic regression, or ANOVA trend analysis instead of a series of *t* tests. These alternate methods of analysis test for specific relationships (e.g., linear, quadratic, or cubic) among variables. For more information on data analysis, please see the *NCES Statistical Standards*, Standard 5-1, available at http://nces.ed.gov/statprog/2002/std5_1.asp.

A number of considerations influence the ultimate selection of the data years to include in the tables and to feature in the text. To make analyses as timely as possible, the latest year of available data is shown. The choice of comparison years is often also based on the need to show the earliest available survey year, as in the case of NAEP and the international assessment surveys. The text typically compares the most current year's data with those from the initial year and then with those from a more recent year. In the case of surveys with long time frames, such as surveys measuring enrollment, changes over the course of a decade may be noted in the text. Where applicable, the text may also note years in which the data begin to diverge from previous trends. In figures and tables, intervening years are selected in increments in order to show the general trend.

Rounding and Other Considerations

All calculations are based on unrounded estimates. Therefore, the reader may find that a calculation, such as a difference or a percentage change, cited in the text or a figure may not be identical to the calculation obtained by using the rounded values shown in the accompanying tables. Although values reported in the tables are generally rounded to one decimal place (e.g., 76.5 percent), values reported in the text are generally rounded to whole numbers (with any value of 0.50 or above rounded to the next highest whole number). Due to rounding, cumulative percentages may sometimes equal 99 or 101 percent rather than 100 percent.

Race and Ethnicity

The Office of Management and Budget (OMB) is responsible for the standards that govern the categories used to collect and present federal data on race and ethnicity. The OMB revised the guidelines on racial/ethnic categories used by the federal government in October 1997, with a January 2003 deadline for implementation. The revised standards require a minimum of these five categories for data on race: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, and White. The standards also require the collection of data on the ethnicity categories Hispanic or Latino and Not Hispanic or Latino. It is important to note that Hispanic origin is an ethnicity rather than a race, and therefore persons of Hispanic origin may be of any race. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. The race categories White, Black, Asian, Native Hawaiian or Other Pacific Islander, and American Indian or Alaska Native exclude persons of Hispanic origin unless otherwise noted.

For a description of each racial/ethnic category, please see the "Racial/ethnic group" entry in Appendix B: Definitions. Some of the category labels are shortened for more concise presentation in text, tables, and figures. American Indian or Alaska Native is denoted as American Indian/Alaska Native (except when separate estimates are available

for American Indians alone or Alaska Natives alone); Black or African American is shortened to Black; and Hispanic or Latino is shortened to Hispanic. When discussed separately from Asian estimates, Native Hawaiian or Other Pacific Islander is shortened to Pacific Islander.

Many of the data sources used for this volume are federal surveys that collect data using the OMB standards for racial/ethnic classification described above; however, some sources have not fully adopted the standards, and some tables include historical data collected prior to the adoption of the OMB standards. Asians and Pacific Islanders are combined into a single category for years in which the data were not collected separately for the two groups. The combined category can sometimes mask significant differences between the two subgroups. For example, prior to 2011, NAEP collected data that did not allow for separate reporting of estimates for Asians and Pacific Islanders. The population counts presented in table 101.20, based on the U.S. Census Bureau's Current Population Reports, indicate that 96 percent of all Asian/Pacific Islander 5- to 17-year-olds were Asian in 2010. Thus, the combined category for Asians/Pacific Islanders is more representative of Asians than of Pacific Islanders.

Some surveys give respondents the option of selecting either an "other" race category, a "two or more races" or "multiracial" category, or both. Where possible, tables present data on the "two or more races" category; however, in some cases this category may not be separately shown because the information was not collected or due to other data issues. Some tables include the "other" category. Any comparisons made between persons of one racial/ethnic group and persons of "all other racial/ethnic groups" include only the racial/ethnic groups shown in the reference table. In some surveys, respondents are not given the option to select more than one race. In these surveys, respondents of two or more races must select a single race category. Any comparisons between data from surveys that give the option to select more than one race and surveys that do not offer such an option should take into account the fact that there is a potential for bias if members of one racial group are more likely than members of the others to identify themselves as "two or more races."¹ For postsecondary data, foreign students are counted separately and are therefore not included in any racial/ethnic category.

In addition to the major racial/ethnic categories, several tables include Hispanic ancestry subgroups (such as Mexican, Puerto Rican, Cuban, Dominican, Salvadoran, Other Central American, and South American) and Asian ancestry subgroups (such as Asian Indian, Chinese, Filipino, Japanese, Korean, and Vietnamese). In addition, selected tables include "two or more races" subgroups (such as White and Black, White and Asian, and White and American Indian/Alaska Native).

¹For discussion of such bias in responses to the 2000 Census, see Parker, J. et al. (2004). Bridging Between Two Standards for Collecting Information on Race and Ethnicity: An Application to Census 2000 and Vital Rates. *Public Health Reports*, 119(2): 192–205. Available at <http://www.pubmedcentral.nih.gov/articlerender.fcgi?artid=1497618>.

Limitations of the Data

Due to large standard errors, some differences that seem substantial are not statistically significant and, therefore, are not cited in the text. This situation often applies to estimates involving American Indians/Alaska Natives and Pacific Islanders. The relatively small sizes of these populations pose many measurement difficulties when conducting statistical analysis. Even in larger surveys, the numbers of American Indians/Alaska Natives and Pacific Islanders included in a sample are often small. Researchers studying data on these two populations often face small sample sizes that increase the size of standard errors and reduce the reliability of results. Readers should keep these limitations in mind when comparing estimates presented in the tables.

As mentioned, caution should be exercised when comparing data from different sources. Differences in sampling, data

collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, and data processing and coding mean that results from different sources may not be strictly comparable. For example, the racial/ethnic categories presented to a respondent, and the way in which the question is asked, can influence the response, especially for individuals who consider themselves of mixed race or ethnicity. In addition, data on American Indians/Alaska Natives are often subject to inaccuracies that can result from respondents self-identifying their race/ethnicity. Research on the collection of race/ethnicity data suggests that the categorization of American Indian and Alaska Native is the least stable self-identification.²

²See U.S. Department of Labor, Bureau of Labor Statistics (1995). *A Test of Methods for Collecting Racial and Ethnic Information* (USDL 95-428). Washington DC: Author.

INTRODUCTION

The Introduction provides a brief overview of current trends in American education, highlighting key data that are presented in more detail later in this volume. Topics outlined include the participation of students, teachers, and faculty in U.S. educational institutions; the performance of U.S. elementary/secondary students overall and in comparison to students in other countries; the numbers of high school graduates and postsecondary degrees; and the amounts of expenditures on education at the elementary/secondary and postsecondary levels.

In fall 2013, about 75.4 million people were enrolled in American schools and colleges (table 105.10). About 4.5 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.3 million. All data for 2013 in this Introduction are projected, except for data on educational attainment. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

Elementary/Secondary Education

Enrollment

A pattern of annual increases in total public elementary and secondary school enrollment began in 1985, but enrollment stabilized at 49.3 million between 2006 and 2008, before beginning to increase again (table 105.30). Overall, public school enrollment rose 26 percent, from 39.4 million to 49.8 million, between 1985 and 2013. Private school enrollment fluctuated during this period, with the fall 2013 enrollment of 5.1 million being 8 percent lower than the enrollment of 5.6 million in 1985. About 9 percent of elementary and secondary school students were enrolled in private schools in 2013, reflecting a decrease from 12 percent in 1985.

In public schools between 1985 and 2013, there was a 30 percent increase in elementary enrollment (prekindergarten through grade 8), compared with an 18 percent increase in secondary enrollment (grades 9 through 12) (table 105.30). Part of the higher growth in public elementary school enrollment resulted from the expansion of prekindergarten enrollment (table 203.10). Between fall 1985 and fall 2011,

enrollment in prekindergarten increased 753 percent, while enrollment in other elementary grades (including kindergarten through grade 8 plus ungraded elementary programs) increased 25 percent. The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.3 million in 2011, and the number enrolled in other elementary grades increased from 26.9 million to 33.5 million. Public secondary school enrollment declined 8 percent from 1985 to 1990, but then increased 33 percent from 1990 to 2007, before declining 3 percent from 2007 to 2013 (table 105.30). Between 1990 and 2013, the net increase in public secondary school enrollment was 29 percent, compared with an 18 percent increase in public elementary school enrollment. Over the most recent 10-year period (between 2003 and 2013), public school enrollment rose 2 percent. Elementary enrollment was 3 percent higher in 2013 than in 2003, and secondary enrollment was 2 percent higher.

Since the enrollment rates of 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds changed by about 3 or fewer percentage points from 1985 to 2012, increases in public elementary and secondary school enrollment primarily reflect increases in the number of children in these age groups (tables 101.10 and 103.20). For example, the enrollment rate of 7- to 13-year-olds decreased from 99 to 98 percent between 1985 and 2012, but the number of 7- to 13-year-olds increased by 25 percent. Increases in both the enrollment rate of 3- and 4-year-old children (from 39 percent in 1985 to 54 percent in 2012) and the number of children in this age group (from 7.1 million to 8.1 million) also contributed to overall enrollment increases.

The National Center for Education Statistics (NCES) projects record levels of public elementary and secondary enrollment from 2013 (49.8 million) through at least 2023 (52.1 million) (table 105.30). For public schools, the projected fall 2013 enrollment is expected to be a new record, and new records are expected every year through 2023, the last year for which NCES enrollment projections have been developed. Public elementary school enrollment (prekindergarten through grade 8) is projected to increase by 5 percent between 2013 and 2023. Public secondary school enrollment (grades 9 through 12) is expected to increase 3 percent between 2013 and 2023. Overall, total public school enrollment is expected to increase 5 percent between 2013 and 2023.

Teachers

A projected 3.5 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in fall 2013 (table 105.40). This number is about 1 percent higher than in fall 2003. The 2013 projected number of FTE teachers includes 3.1 million public school teachers and 0.4 million private school teachers.

Both public school enrollment and the number of public school teachers were about 2 percent higher in 2013 than they were in 2003 (table 208.20). In fall 2003, the number of public school pupils per teacher was 15.9, compared with a projected number of 16.0 public school pupils per teacher in fall 2013.

The average salary for public school teachers in 2012–13 was \$56,383 in current dollars (i.e., dollars that are not adjusted for inflation) (table 211.50). In constant (i.e., inflation-adjusted) dollars, the average salary decreased 1 percent between 1990–91 and 2012–13.

Student Performance

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state NAEP provide current information about student performance in subjects including reading, mathematics, science, and writing, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the *Digest*, while the information in this Introduction includes only selected results from the national main and state NAEP.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

Reading

The main NAEP assessment data are reported on a scale of 0 to 500. In 2013, the average reading score for 4th-grade students (222) was not measurably different from the 2011 score, but it was higher than the scores on assessments between 1992 (217) and 2009 (221) (table 221.10). At grade 4, only the average reading scores for White students were higher in 2013 (232) than in both 2011 (231) and 1992 (224). The 2013 scores for Black (206), Hispanic (207), and Asian/

Pacific Islander (235) 4th-graders were not measurably different from the 2011 scores, but the 2013 scores were higher than the 1992 scores (192, 197, and 216, respectively). For 8th-grade students, the average reading score in 2013 (268) was more than 2 points higher than in 2011 (265), was 8 points higher than in 1992 (260), and was higher than the average scores in all previous years. At grade 8, the average reading scores for White (276), Black (250), Hispanic (256), and Asian/Pacific Islander (280) students were higher in 2013 than in 2011 and 1992. At grade 12, average scores did not change measurably from 1992 to 2009 for White, Black, Hispanic, Asian/Pacific Islander, or American Indian/Alaska Native students.

While there was no measurable change from 2011 to 2013 in the average score for 4th-grade public school students nationally, average scores were higher in 2013 than in 2011 in Colorado, the Department of Defense dependents schools, Indiana, Iowa, Maine, Minnesota, Tennessee, Washington, and the District of Columbia; scores were lower in 2013 than in 2011 in Massachusetts, Montana, and North Dakota (table 221.40). At grade 8, although the average reading score for public school students nationally was 2 points higher in 2013 than in 2011, only 12 states (Arkansas, California, Florida, Hawaii, Iowa, Nevada, New Hampshire, Oregon, Pennsylvania, Tennessee, Utah, and Washington) plus the District of Columbia and the Department of Defense dependents schools had higher scores in 2013 than in 2011 (table 221.60). In the other states, scores did not change measurably from 2011 to 2013.

Mathematics

The 2013, the average NAEP mathematics scores for 4th-grade and 8th-grade students were higher than the average scores in all previous assessment years (table 222.10). The average 4th-grade NAEP mathematics score increased from 213 in 1990 (the first assessment year) to 242 in 2013, an increase of 28 points (based on unrounded scores). During that same period, the average 8th-grade score increased by 22 points, from 263 to 285. At grade 4, the average mathematics scores in 2013 for White (250) and Hispanic students (231) were higher than the scores in both 2011 and 1990. The 2013 score for Black 4th-graders (224) was not measurably different from the 2011 score, but it was higher than the 1990 score. The 2013 score for Asian 4th-graders (259) was also not measurably different from the 2011 score; prior to 2011, separate data on Asians were not available. At grade 8, the average mathematics scores in 2013 for all racial/ethnic groups were not measurably different from the 2011 scores. However, the 2013 scores for White (294), Black (263), and Hispanic (272) 8th-graders were higher than the scores in 1990.

NAEP results also permit state-level comparisons of the mathematics achievement of 4th- and 8th-grade students in public schools (tables 222.50 and 222.60). The average mathematics scores for 4th-grade public school students increased from 2011 to 2013 in 14 states (Arizona, Colorado, Delaware, Hawaii, Indiana, Iowa, Minnesota,

Nebraska, New York, North Dakota, Tennessee, Washington, West Virginia, and Wyoming) and the District of Columbia and did not decrease for any states. At grade 8, scores were higher in 2013 than in 2011 in five states (Florida, Hawaii, New Hampshire, Pennsylvania, and Tennessee), the District of Columbia, and the Department of Defense dependents schools, and scores decreased in three states (Montana, Oklahoma, and South Dakota).

Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. The average eighth-grade science score increased from 150 in 2009 to 152 in 2011 (table 223.10). Average scores for both male and female students were higher in 2011 than in 2009. Male students scored 5 points higher on average than female students in 2011, which was not significantly different from the 4-point gap in 2009. Score gaps between White and Black students and between White and Hispanic students narrowed from 2009 to 2011. The 5-point gain from 2009 to 2011 for Hispanic students was larger than the 1-point gain for White students, narrowing the score gap from 30 points to 27 points. Black students scored 3 points higher in 2011 than in 2009. The 35-point score gap between White and Black students in 2011 was smaller than the 36-point gap in 2009. The average scores of Asian/Pacific Islander and American Indian/Alaska Native students were not significantly different in 2011 from their scores in 2009.

International Comparisons

The 2011 Trends in International Mathematics and Science Study (TIMSS) assessed students' mathematics and science performance at grade 4 in 45 countries and at grade 8 in 38 countries. In addition to countries, a number of subnational entities—including the public school systems in several U.S. states—also participated in TIMSS as separate education systems. Results for the participating states are included in the discussion in chapter 6 of the *Digest*, while this Introduction includes only results for the United States and other countries. TIMSS assessments are curriculum based and measure what students have actually learned against the subject matter that is expected to be taught in the participating countries by the end of grades 4 and 8. At both grades, TIMSS scores are reported on a scale of 0 to 1,000, with the scale average set at 500.

On the 2011 TIMSS, the average mathematics scores of U.S. 4th-graders (541) and 8th-graders (509) were higher than the scale average (tables 602.10 and 602.30). U.S. 4th-graders scored higher in mathematics, on average, than their counterparts in 37 countries and lower than those in 3 countries (table 602.20). Average mathematics scores in the other 4 countries were not measurably different from the U.S. average. At grade 8, the average U.S. mathematics score was higher than the average scores of students in 27 countries in

2011 and below the average scores of students in 4 countries (table 602.30). Average 8th-grade mathematics scores in the other 6 countries were not measurably different from the U.S. average. The average science scores of both U.S. 4th-graders (544) and U.S. 8th-graders (525) were higher than the TIMSS scale average of 500 in 2011. The average U.S. 4th-grade science score was higher than the average scores of students in 39 countries and lower than those of students in 5 countries. At grade 8, the average U.S. science score was higher than the average scores of students in 28 countries, lower than those in 6 countries, and not measurably different from those in the other 3 countries.

The Program for International Student Assessment (PISA), coordinated by the Organization for Economic Cooperation and Development (OECD), has measured the performance of 15-year-old students in reading, mathematics, and science literacy every 3 years since 2000. PISA assesses 15-year-old students' application of reading, mathematics, and science literacy to problems within a real-life context. In 2012, PISA assessed students in the 34 OECD countries as well as in a number of other education systems. Some subnational entities participated as separate education systems, including public school systems in the U.S. states of Connecticut, Florida, and Massachusetts. Results for the participating U.S. states are included in the discussion in chapter 6, while this Introduction includes only results for the United States in comparison with other OECD countries. PISA scores are reported on a scale of 0 to 1,000.

On the 2012 PISA assessment, U.S. 15-year-olds' average score in reading literacy was 498, which was not measurably different from the OECD average of 496 (table 602.50). The average reading literacy score in the United States was lower than the average score in 13 of the 33 other OECD countries, higher than the average score in 10 of the other OECD countries, and not measurably different from the average score in 10 of the OECD countries. In all countries, females outperformed males in reading (table 602.40). The U.S. gender gap in reading (31 points) was smaller than the OECD average gap (38 points) and smaller than the gaps in 14 of the OECD countries.

In mathematics literacy, U.S. 15-year-olds' average score of 481 on the 2012 PISA assessment was lower than the OECD average score of 494 (table 602.60). The average mathematics literacy score in the United States was lower than the average in 21 of the 33 other OECD countries, higher than the average in 5 OECD countries, and not measurably different from the average in 7 OECD countries. In 25 of the OECD countries, males outperformed females in mathematics literacy (table 602.40). In the United States, however, the average score of males (484) was not measurably different from that of females (479).

In science literacy, U.S. 15-year-olds' average score of 497 was not measurably different from the OECD average score of 501 (table 602.70). The average science literacy score in the United States was lower than the average in 15 OECD countries, higher than the average in 8 OECD countries, and not measurably different from the average in 10 OECD countries.

The Progress in International Reading Literacy Study (PIRLS) measures the reading knowledge and skills of 4th-graders over time. On the 2011 PIRLS, U.S. 4th-graders had an average reading literacy score of 556 (table 602.10). The U.S. average score in 2011 was 14 points higher than in 2001 and 16 points higher than in 2006. In all three assessment years, the U.S. average score was higher than the PIRLS scale average. (PIRLS scores are reported on a scale from 0 to 1,000, with the scale average set at 500.) In 2011, PIRLS assessed 4th-grade reading literacy in 40 countries. The average reading literacy score of 4th-graders in the United States was higher than the average score in 33 of the 39 other participating countries, lower than the average score in 3 countries, and not measurably different from the average in the remaining 3 countries.

High School Graduates and Dropouts

About 3,323,000 high school students are expected to graduate during the 2014–15 school year (table 219.10), including about 3,031,000 public school graduates and 291,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The number of high school graduates projected for 2014–15 is lower than the record high in 2011–12, but exceeds the baby boom era’s high point in 1975–76, when 3,142,000 students earned diplomas. In 2011–12, an estimated 80.8 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 219.35).

The number of General Educational Development (GED) credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service. Between 2002 and 2012, the number of persons passing the GED tests increased by 22 percent, from 330,000 to 401,000.¹

The percentage of dropouts among 16- to 24-year-olds has decreased over the past two decades. This percentage, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts in this measure.) Between 1990 and 2012, the status dropout rate declined from

12.1 percent to 6.6 percent (table 219.70). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates in 2012 (7.5 and 12.7 percent, respectively) remained higher than the rate for Whites (4.3 percent). This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

Postsecondary Education

College Enrollment

College enrollment was 20.6 million in fall 2012, which was about 2 percent lower than the record enrollment in fall 2010 (table 105.30). College enrollment is expected to set new records from fall 2015 through fall 2023. Between fall 2012 and fall 2023, enrollment is expected to increase by 15 percent. Despite decreases in the size of the traditional college-age population (18 to 24 years old) during the late 1980s and early 1990s, total enrollment increased during this period (tables 101.10 and 105.30). The traditional college-age population rose 10 percent between 2002 and 2012, and total college enrollment increased 24 percent during the same period. Between 2002 and 2012, the number of full-time students increased by 28 percent, compared with a 19 percent increase in part-time students (table 303.10). During the same time period, the number of males enrolled increased 24 percent, and the number of females enrolled increased 25 percent.

Faculty

In fall 2011, degree-granting institutions—defined as postsecondary institutions that grant an associate’s or higher degree and are eligible for Title IV federal financial aid programs—employed 1.5 million faculty members, including 0.8 million full-time and 0.8 million part-time faculty (table 314.30). In addition, degree-granting institutions employed 0.4 million graduate assistants.

Postsecondary Degrees

During the 2013–14 academic year, postsecondary degrees are projected to number 1,031,000 associate’s degrees; 1,844,000 bachelor’s degrees; 791,000 master’s degrees; and 177,000 doctor’s degrees (table 318.10). The doctor’s degree total includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees. Between 2001–02 and 2011–12 (the last year of actual data), the number of degrees conferred increased at all levels. The number of associate’s degrees was 71 percent higher in 2011–10 than in 2001–02, the number of bachelor’s degrees was 39 percent higher, the number of master’s degrees was 55 percent higher, and the number of doctor’s degrees was 42 percent higher.

Between 2001–02 and 2011–12, the number of bachelor’s degrees awarded to males increased 39 percent, while the number of bachelor’s degrees awarded to females increased 38 percent. Females earned 57 percent of all bache-

¹Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

clor's degrees in 2011–12, the same percentage as in 2001–02. Between 2001–02 and 2011–12, the number of White students earning bachelor's degrees increased 26 percent, compared with the larger increases of 59 percent for Black students, 104 percent for Hispanic students, and 52 percent for Asian/Pacific Islander students (table 322.20). The number of American Indian/Alaska Native students earning bachelor's degrees increased 25 percent over the same period. In 2011–12, White students earned 70 percent of all bachelor's degrees awarded (vs. 77 percent in 2001–02), Black students earned 11 percent (vs. 9 percent in 2001–02), Hispanic students earned 10 percent (vs. 7 percent in 2001–02), and Asian/Pacific Islander students earned about 7 percent (increasing their share of the degrees from 6.6 percent in 2001–02 to 7.3 percent in 2011–12). American Indian/Alaska Native students earned about 1 percent of the degrees in both years.

Undergraduate Prices

For the 2012–13 academic year, annual prices for undergraduate tuition, room, and board were estimated to be \$15,022 at public institutions, \$39,173 at private nonprofit institutions, and \$23,158 at private for-profit institutions (table 330.10). Between 2002–03 and 2012–13, prices for undergraduate tuition, room, and board at public institutions rose 39 percent, and prices at private nonprofit institutions rose 27 percent, after adjustment for inflation. Prices for total tuition, room, and board at private for-profit institutions decreased 7 percent between 2002–03 and 2012–13.

Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 2003 and 2013, the percentage of the adult population 25 years of age and over who had completed high school rose from 85 percent to 88 percent, and the percentage of adults with a bachelor's degree increased from 27 percent to 32 percent (table 104.10). High school completers include those people who graduated from high school with a diploma, as well as those who completed high school through equivalency programs. The percentage of young adults (25- to 29-year-olds) who had completed high school increased from 87 percent in 2003 to 90 percent in 2013 (table 104.20). The percentage of young adults who had completed a bachelor's degree increased from 28 percent in 2003 to 34 percent in 2013.

Education Expenditures

Expenditures for public and private education, from pre-kindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), are estimated at \$1.2 trillion for 2012–13 (table 106.10). Expenditures of elementary and secondary schools are expected to total \$669 billion, while those of degree-granting postsecondary institutions are expected to total \$496 billion. Total expenditures for education are expected to amount to 7.2 percent of the gross domestic product in 2012–13, about the same as in 2002–03, but lower than the percentage in 2009–10 (7.6 percent).

CHAPTER 1

All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American educational system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, computer and internet usage, family characteristics, and population. Economic indicators and price indexes have been added to facilitate analyses.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

The U.S. System of Education

The U.S. system of education can be described as having three levels of formal education (elementary, secondary, and postsecondary) (figure 1). Students may spend 1 to 3 years in preprimary programs (prekindergarten [PK] and kindergarten [K]), which may be offered either in separate schools or in elementary schools that also offer higher grades. (In *Digest of Education Statistics* tables, prekindergarten and kindergarten are generally defined as a part of elementary education.) Following kindergarten, students ordinarily spend from 6 to 8 years in elementary school. The elementary school program is followed by a 4- to 6-year program in secondary school. Students normally complete the entire program through grade 12 by age 18. Education at the elementary and secondary levels is provided in a range of institutional settings—including elementary schools (preprimary schools, middle schools, and schools offering broader ranges of elementary grades); secondary schools (junior high schools, high schools, and senior high schools); and combined elementary/secondary schools—that vary in structure from locality to locality.

High school graduates who decide to continue their education may enter a specialized career/technical institution, a

2-year community or junior college, or a 4-year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal career and technical education programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A career/technical institution offers postsecondary technical training programs of varying lengths leading to a specific career.

An associate's degree requires at least 2 years of postsecondary coursework, and a bachelor's degree normally requires 4 years of postsecondary coursework. At least 1 year of coursework beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Enrollment

Total enrollment in public and private elementary and secondary schools (prekindergarten through grade 12) grew rapidly during the 1950s and 1960s, reaching a peak year in 1971 (table A, table 105.30, and figure 2). This enrollment rise reflected what is known as the "baby boom," a dramatic increase in births following World War II. Between 1971 and 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the size of the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and continued to reach new record levels every year through 2006. Enrollment in fall 2011 (54.8 million) was about the same as in fall 2010 (54.9 million) but slightly lower than in fall 2006 (55.3 million). However, a pattern of annual enrollment increases is projected to begin with a slight increase in fall 2015 (no substantial change from fall 2014) and continue at least through fall 2023 (the last year for which NCES has projected school enrollment), when enrollment is expected to reach 57.0 million.

Table A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 to fall 2023

Trend and year	Number of students (in millions)
"Baby boom" increases	
1949–50 school year	28.5
Fall 1959	40.9
Fall 1969	51.1

Annual increases from 1985 to 2006	
Fall 1985	45.0
Fall 1996 (new record highs begin)	51.5
Fall 2006 (final year of record highs)	55.3
Slight declines or stable enrollment	
Fall 2007	55.2
Fall 2010	54.9
Fall 2011	54.8
Fall 2014	54.7
Annual increases projected to start again	
Fall 2015	54.7
Fall 2023	57.0

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States, 1949–50; Statistics of Public Elementary and Secondary School Systems, 1959 through 1972; Common Core of Data (CCD), 1984 through 2011; Private School Universe Survey (PSS), 1997–98 through 2011–12; and National Elementary and Secondary Enrollment Projection Model, 1972 through 2023.*

Between 1985 and 2012, the total public and private school enrollment rate decreased by 3 percentage points for 5- and 6-year-olds. The enrollment rate for 7- to 13-year-olds decreased from 99 percent in 1985 to 98 percent in 2012; however, the enrollment rate for 14- to 17-year-olds increased from 95 to 97 percent during this period (table 103.20). Since these enrollment rates changed by 3 or fewer percentage points between 1985 and 2012, increases in public and private elementary and secondary school enrollment primarily reflect increases in the number of children in these age groups. Between 1985 and 2012, the number of 5- and 6-year-olds increased by 19 percent, the number of 7- to 13-year-olds increased by 25 percent, and the number of 14- to 17-year-olds increased by 12 percent (table 101.10). Increases in the enrollment rate of prekindergarten-age children (ages 3 and 4) from 39 percent in 1985 to 54 percent in 2012 (table 103.20) and in the number of 3- and 4-year-olds from 7.1 million to 8.1 million (table 101.10) also contributed to overall prekindergarten through grade 12 enrollment increases.

Public school enrollment at the elementary level (prekindergarten through grade 8) rose from 29.9 million in fall 1990 to 34.2 million in fall 2003 (table 105.30). After a decrease of less than 1 percent between fall 2003 and fall 2004, elementary enrollment generally increased to a projected total of 35.1 million for fall 2013. Public elementary enrollment is projected to increase about 5 percent overall between 2013 and 2023. Public school enrollment at the secondary level (grades 9 through 12) rose from 11.3 million in 1990 to 15.1 million in 2007, but then declined 3 percent to a projected enrollment of 14.6 million in 2013.

Public secondary enrollment is projected to increase about 3 percent between 2013 and 2023. Total public elementary and secondary enrollment is projected to increase every year from 2014 to 2023.

The percentage of students in private elementary and secondary schools declined from 11.7 percent in fall 2001 to 9.6 percent in fall 2011 (table 105.30). In fall 2013, an estimated 5.1 million students were enrolled in private schools at the elementary and secondary levels.

Total enrollment in public and private degree-granting postsecondary institutions reached 14.5 million in fall 1992 and decreased to 14.3 million in fall 1995 (table 105.30). Total enrollment increased 47 percent between 1995 and 2010 (to 21.0 million), but declined 2 percent between 2010 and 2012 (to 20.6 million). Total enrollment is expected to increase 15 percent between fall 2012 and fall 2023, reaching 23.8 million. The percentage of students who attended private institutions rose from 23 to 28 percent between 2002 and 2012. In fall 2012, about 5.8 million students attended private institutions, with about 4.0 million in nonprofit institutions and 1.8 million in for-profit institutions (table 303.10). Enrollment increases in degree-granting postsecondary institutions have been driven by both increases in population and some increases in enrollment rates. Although the percentage of 18- and 19-year-olds enrolled in degree-granting postsecondary institutions in 2002 was not measurably different from the percentage in 2012 (45 and 47 percent, respectively), the number of 18- and 19-year-olds rose 7 percent (tables 101.10 and 103.20). The enrollment rate of 20- to 24-year-olds rose from 34 to 40 percent, and the number of 20- to 24-year-olds rose 12 percent during the same period.

Educational Attainment

The percentages of adults 25 years old and over completing high school and higher education have been rising. Between 2003 and 2013, the percentage of the population 25 years old and over who had completed at least high school increased from 85 to 88 percent, and the percentage who had completed a bachelor's or higher degree increased from 27 to 32 percent (table 104.10 and figure 3). In 2013, about 8 percent of people 25 years old or over held a master's degree as their highest degree and 3 percent held a doctor's or first-professional degree (table 104.30).

Among young adults (25- to 29-year-olds), the percentage who had completed at least high school increased from 87 percent in 2003 to 90 percent in 2013 (table 104.20 and figure 4). The percentage of young adults who had completed a bachelor's or higher degree increased from 28 percent in 2003 to 34 percent in 2013. In 2013, about 6 percent of young adults held a master's degree as their highest degree and 2 percent held a doctor's or first-professional degree (table 104.30 and figure 5).

In both 2003 and 2013, the educational attainment of young adults differed by race/ethnicity. From 2003 to 2013, the percentage of Hispanic 25- to 29-year-olds who had completed at least high school increased from 62 to 76 per-

cent (table 104.20 and figure 6). During this period, there were no measurable changes in the percentages of White, Black, and Asian 25- to 29-year-olds who had completed high school. In 2013, the percentage of 25- to 29-year-olds who had completed high school was higher for Whites (94 percent) and Asians (95 percent) than for Blacks (90 percent); the percentage for Hispanics (76 percent) was lower than for Whites, Asians, and Blacks. In 2013, the percentage of bachelor's degree holders also varied among 25- to 29-year-olds of different racial/ethnic groups, with 60 percent of Asians in this age group holding a bachelor's or higher degree, compared with 40 percent of Whites, 20 percent of Blacks, and 16 percent of Hispanics. From 2003 to 2013, the percentage of 25- to 29-year-olds who held a bachelor's or higher degree increased for Whites and Hispanics, but showed no measurable change for Blacks and Asians.

Teachers and Faculty

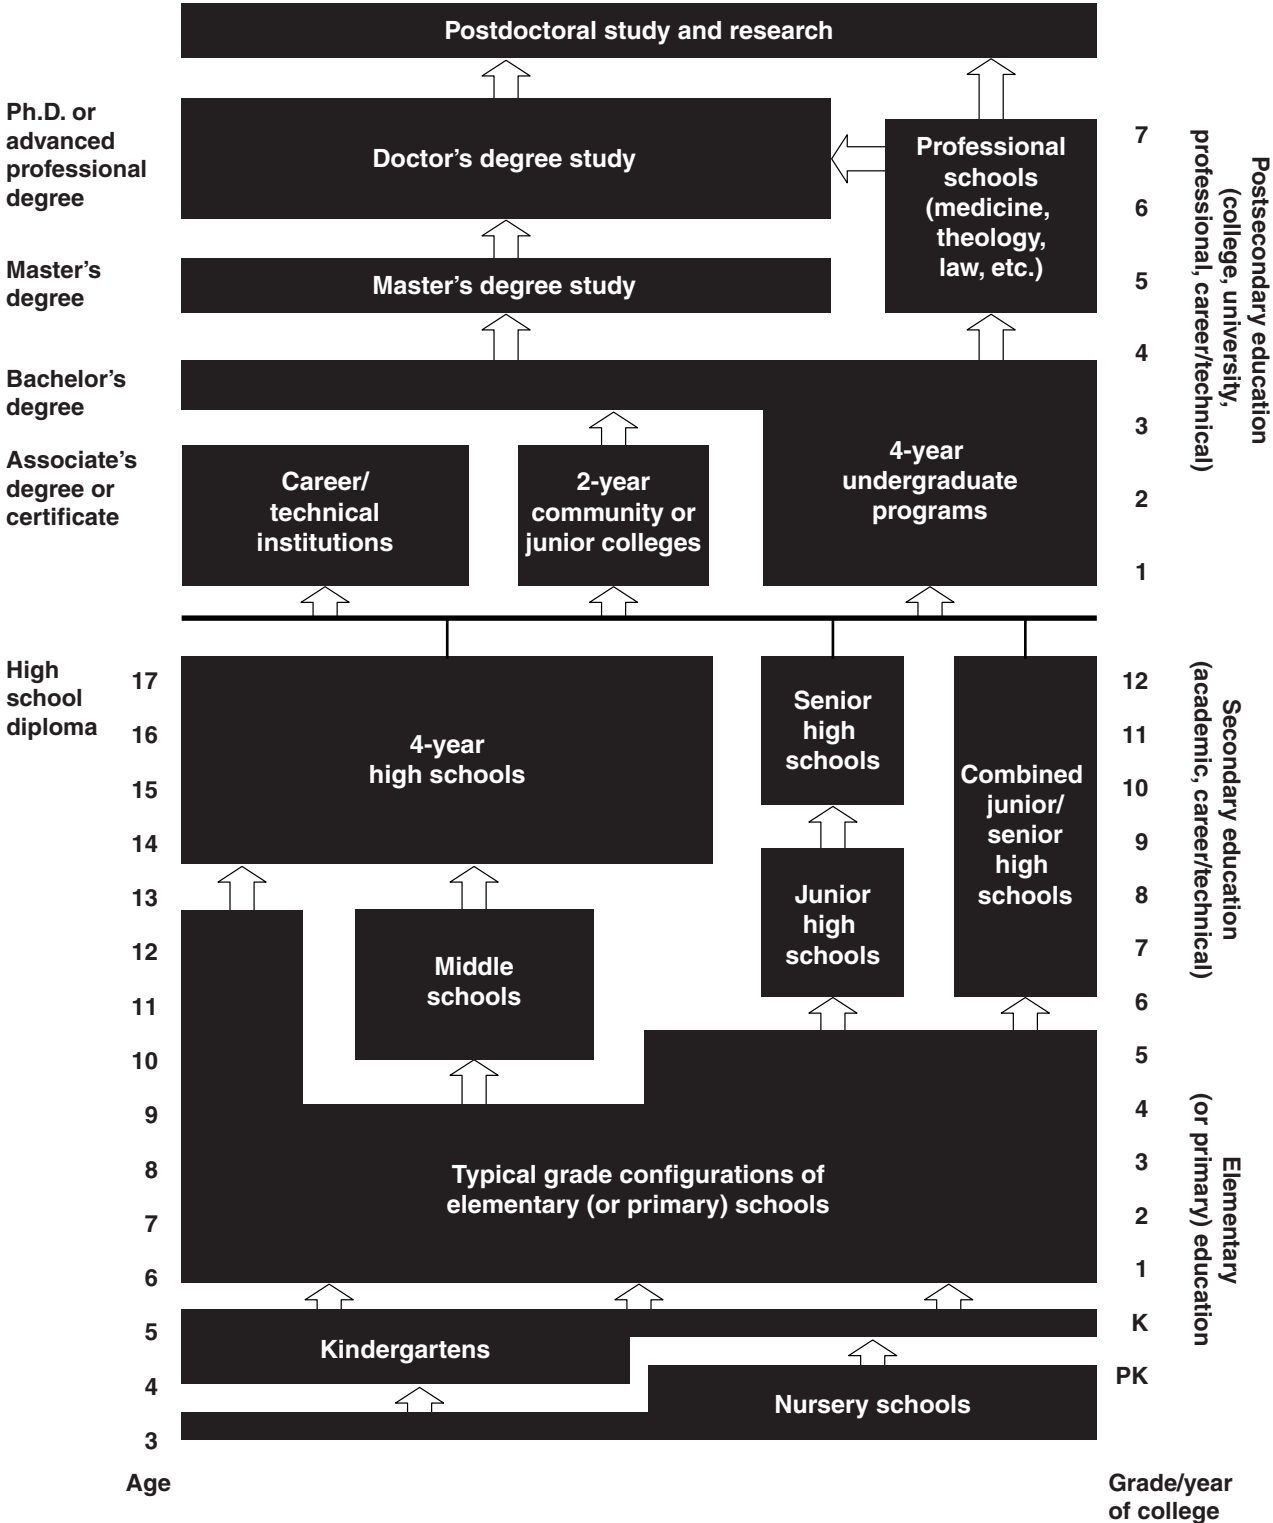

A projected 3.5 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2013 (table 105.40), which was about 1 percent higher than in 2003. The number of FTE public school

teachers in 2013 was about 3.1 million, and the number of FTE private school teachers was about 0.4 million. FTE faculty at degree-granting postsecondary institutions totaled a projected 1.0 million in 2013, including 0.6 million at public institutions and 0.4 million at private institutions (table 105.10).

Expenditures

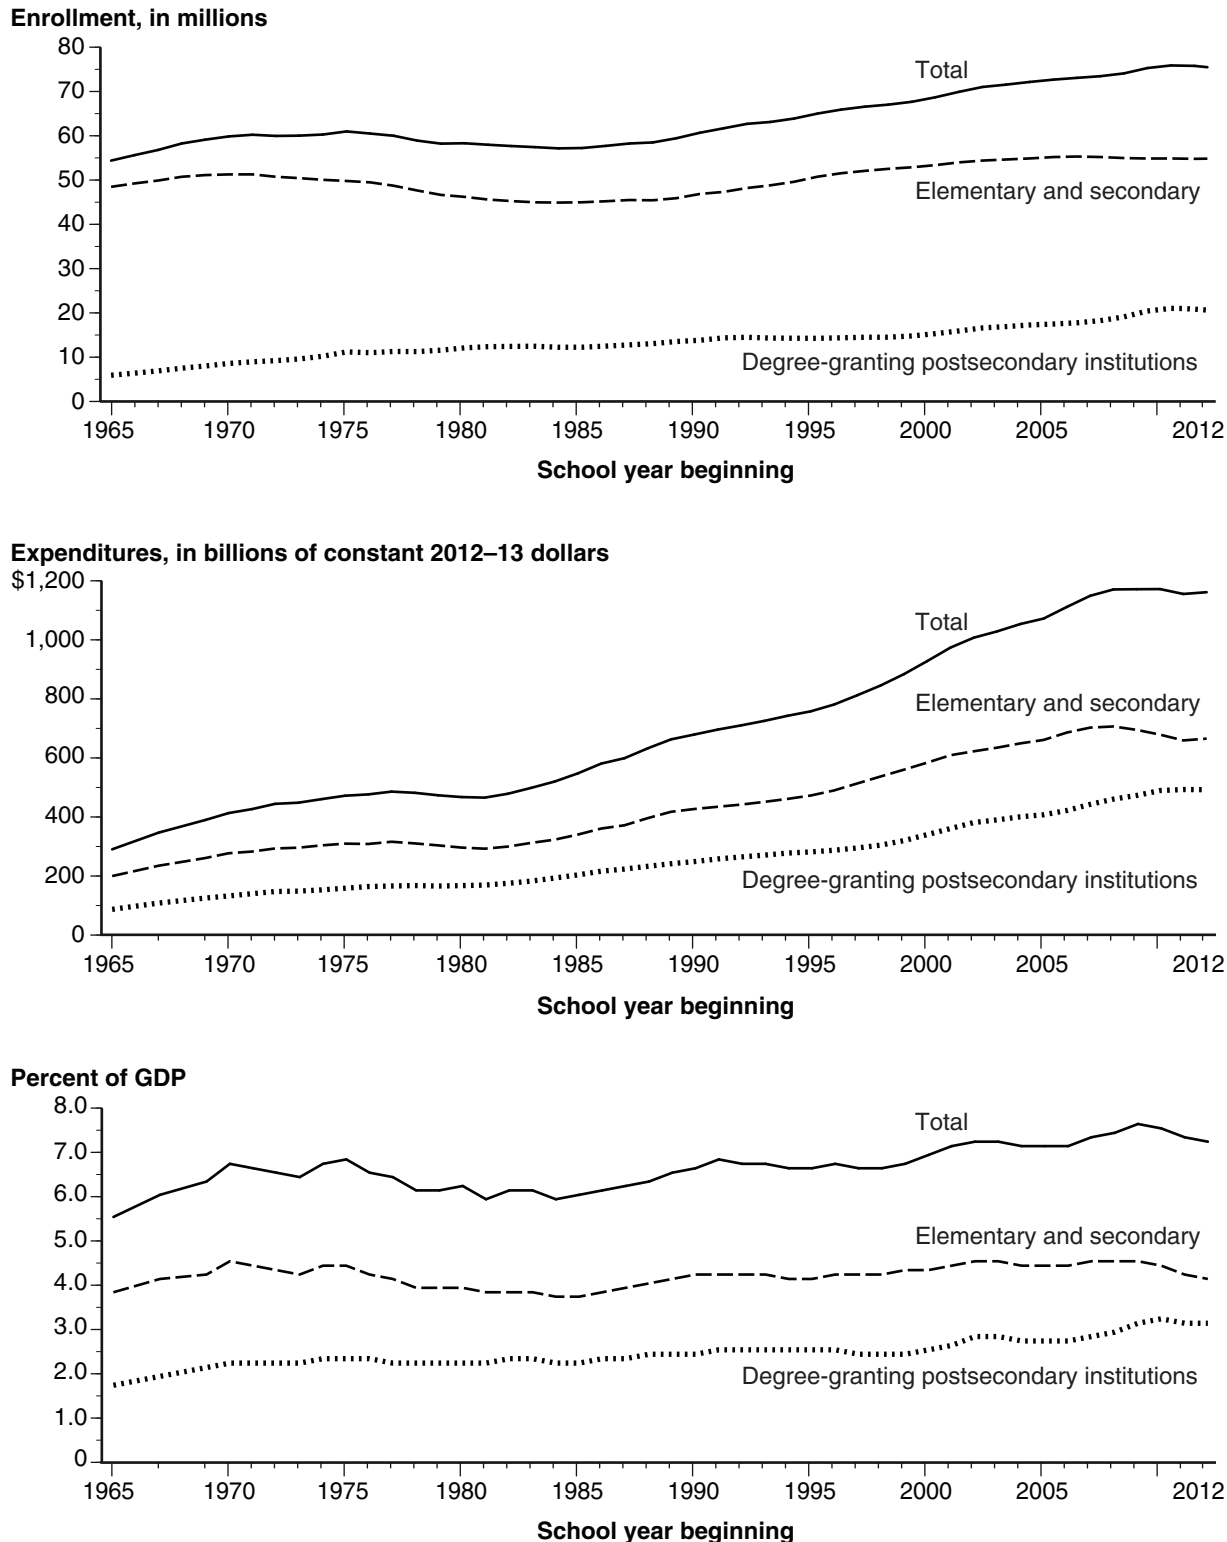

Expenditures of educational institutions were an estimated \$1.2 trillion for the 2012–13 school year (table 106.20 and figure 2). Elementary and secondary schools spent about 57 percent of this total (\$669 billion), and colleges and universities spent the remaining 43 percent (\$496 billion). After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 15 percent between 2002–03 and 2012–13. Inflation-adjusted expenditures of degree-granting postsecondary institutions rose by an estimated 29 percent. Expenditures of elementary and secondary schools were about 7 percent higher in 2012–13 than in 2002–03. In 2012–13, expenditures of educational institutions were an estimated 7.2 percent of the gross domestic product (table 106.10).

Figure 1. The structure of education in the United States

NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels. SOURCE: U.S. Department of Education, National Center for Education Statistics, Annual Reports Program.

Figure 2. Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2012–13

NOTE: Elementary and secondary enrollment data for school year 2012 (2012–13) are projected. Elementary and secondary expenditure data for school years 2011 and 2012 (2011–12 and 2012–13) are estimated. Postsecondary expenditure data for school year 2012 (2012–13) are estimated.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

±Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes those born in the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas, as well as those born abroad to U.S.-citizen parents.²Total includes other racial/ethnic groups not shown separately.³Excludes Taiwanese. Taiwanese is included in the "Other Asian" category.

NOTE: Data are from the American Community Survey and may differ from data shown in other tables obtained from the Current Population Survey. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2002, 2007, and 2012. (This table was prepared February 2014.)

¹As of April 1.²Estimates as of July 1.

NOTE: Resident population includes civilian population and armed forces personnel residing within the United States and within each state; it excludes armed forces personnel residing overseas. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

¹Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (mainly) the housing unit.

²Based on 1989 incomes and family sizes collected in the 1990 census. May differ from Current Population Survey data that are shown in other tables.

³Based on 1999 incomes and family sizes collected in the 2000 census. May differ from Current Population Survey data that are shown in other tables.

⁴Based on income and family size data from the American Community Survey (ACS). May differ from Current Population Survey data that are shown in other tables. ACS respondents were interviewed throughout the given year and reported the income they received during the previous 12 months.

NOTE: For information about how the Census Bureau determines who is in poverty, see <http://www.census.gov/hhes/www/poverty/about/overview/measure.html>. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Commerce, Census Bureau, 1990 Summary Tape File 3 (STF 3), "Median Household Income in 1989" and "Poverty Status in 1989 by Family Type and Age"; Decennial Census, 1990, *Minority Economic Profiles*, unpublished data; Decennial Census, 2000, *Summary Social, Economic, and Housing Characteristics*; Census 2000 Summary File 4 (SF 4), "Poverty Status in 1999 of Related Children Under 18 Years by Family Type and Age"; and American Community Survey, 2011 and 2012. (This table was prepared January 2014.)

Table 102.50. Official and supplemental measures of poverty status for all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1960 through 2012

[Standard errors appear in parentheses]

Year, race/ethnicity, and type of poverty measure ¹	Number below the poverty level (in thousands)						Percent below the poverty level							
	In all families					In families with female householder, no husband present		All persons	In all families				In families with female householder, no husband present	
	All persons	Total	Householder ²	Related children under 18 ³	Total	Related children under 18 ³	Total		Householder ²	Related children under 18 ³	Total	Related children under 18 ³

¹All data for 2008 and earlier years are based on the official poverty measure. Supplemental Poverty Measure (SPM) data are available only for 2009 and later years.

²Refers to the person who owns or rents (maintains) the housing unit.

³Refers to all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). For 1960 and 1965 only, the data exclude related children who have ever been married.

⁴The official poverty measure consists of a set of thresholds for families of different sizes and compositions that are compared to before-tax cash income to determine a family's poverty status. For more information about how the Census Bureau determines who is in poverty, see <http://www.census.gov/hhes/www/poverty/about/overview/measure.html>.

⁵The Supplemental Poverty Measure (SPM) extends the information provided by the official poverty measure by adding to family income the value of benefits from many government programs designed to assist low-income families, subtracting taxes and necessary expenses such as child care costs (for working families) and medical expenses, and adjusting poverty thresholds for differences in housing costs. To match the population included in the current official poverty measure,

SPM estimates presented in this table exclude unrelated children under age 15. For more information about the SPM, see http://www.census.gov/hhes/povmeas/methodology/supplemental/research/Short_ResearchSPM2011.pdf.

⁶Includes persons of Hispanic ethnicity.

⁷Includes Pacific Islanders as well as Asians.

NOTE: Data are from the Current Population Survey and may differ from data shown in other tables obtained from the Decennial Census and the American Community Survey. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. This table includes only children related to the householder. It excludes unrelated children and householders who are themselves under the age of 18.

²To determine family structure, children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related

to the children. Mother-only households are those that have only a female householder, and father-only households are those that have only a male householder.

³Excludes Taiwanese. Taiwanese is included in "Other Asian."

NOTE: Data may differ from Current Population Survey data that are shown in other tables. American Community Survey respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. For information about how the Census Bureau determines who is in poverty, see <http://www.census.gov/hhes/www/poverty/about/overview/measure.html>. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey, 2007 and 2012. (This table was prepared January 2014.)

Table 103.10. Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age group: Selected years, 1980 through 2012

[†]Not applicable.

[‡]Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

[§]Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.

²Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years.

NOTE: Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, pre-schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Total includes persons from other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

¹Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.

²Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years.

NOTE: Data for 1940 are for April. Data for all other years are as of October. Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges,

universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

¹Includes persons of Hispanic ethnicity for years prior to 1980.

²Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.

³Estimates based on Census Bureau reverse projection of 1940 census data on education by age.

⁴Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years. For 1960 and prior years, data were collected in April. For all other years, data were collected in March. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

SOURCE: U.S. Department of Commerce, Census Bureau, *U.S. Census of Population: 1960*, Vol. I, Part 1; J.K. Folger and C.B. Nam, *Education of the American Population* (1960 Census Monograph); Current Population Reports, Series P-20, various years; and Current Population Survey (CPS), March 1970 through March 2013. (This table was prepared February 2014.)

Table 104.20. Percentage of persons 25 to 29 years old with selected levels of educational attainment, by race/ethnicity and sex: Selected years, 1920 through 2013

[Standard errors appear in parentheses]

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes persons of Hispanic ethnicity for years prior to 1980.²Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.³Estimates based on Census Bureau reverse projection of 1940 census data on education by age.⁴Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years. For 1960 and prior years, data were collected in April. For all other years, data were collected in March. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Total includes other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors were computed using replicate weights.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Total includes other racial/ethnic groups not shown separately.

²Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified.

³Includes those born in the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas, as well as those born abroad to U.S.-citizen parents.

NOTE: Estimates are for the entire population in the indicated age range, including persons living in households and persons living in group quarters (such as college residence halls, residential treatment centers, military barracks, and correctional facilities). The first bachelor's degree major reported by respondents was used to classify their field of study, even though they were able to report a second bachelor's degree major and may possess advanced degrees in other fields. STEM fields, as defined here, consist of the fields specified in columns 6 through 13. Data were assembled based on major field aggregations, except that management of STEM activities was counted as a STEM field instead of a business field. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2012. (This table was prepared January 2014.)

Table 104.70. Percentage distribution of 6- to 18-year-olds, by parent's highest level of educational attainment, household type, and child's race/ethnicity: 2007 and 2012

[Standard errors appear in parentheses]

Year, household type, and race/ethnicity	Highest level of education attained by any parent residing with child ¹

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Includes adoptive and stepparents, but excludes parents not residing in the same household as their children.²Includes parents who completed high school through equivalency programs, such as a GED program.

NOTE: Table includes only 6- to 18-year-olds who resided with at least one parent (including an adoptive or stepparent). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Total includes racial/ethnic groups not shown separately.

NOTE: Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Commerce, Census Bureau, 2011 and 2012 American Community Survey (ACS) 1-Year Public Use Microdata Sample (PUMS) data. (This table was prepared January 2014.)

Table 104.88. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by sex and state: 2011 and 2012

[Standard errors appear in parentheses]

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

¹Information on metropolitan status was suppressed for a small portion of sample observations. As a result, population estimates for these areas may be slightly underestimated.
NOTE: CSA = Combined Statistical Area; CBSA = Core Based Statistical Area. Detail may not sum to totals because of rounding. Standard errors were computed using replicate weights.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), March 2013. (This table was prepared February 2014.)

Table 105.10. Projected number of participants in educational institutions, by level and control of institution: Fall 2013
[In millions]

Participants	All levels (elementary, secondary, and degree-granting postsecondary)	Elementary and secondary schools			Degree-granting postsecondary institutions		
		Total	Public	Private	Total	Public	Private
1	2	3	4	5	6	7	8
Total.....	85.2	61.7	55.9	5.8	23.5	16.7	6.8
Enrollment	75.4	54.8	49.8	5.1	20.6	14.9	5.7
Teachers and faculty	4.5	3.5	3.1	0.4	1.0	0.6	0.4
Other professional, administrative, and support staff.....	5.3	3.4	3.1	0.3	1.9	1.2	0.7

NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal Bureau of Indian Education schools and Department of Defense schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and col-

leges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

¹Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.

²Estimated.

³Includes prorated proportion of students classified as ungraded.

⁴Data are actual.

NOTE: Postsecondary data for 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-

year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

¹Beginning in fall 1989, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.

²Data for 1869–70 through 1949–50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.

³Estimated.

⁴Projected data. Fall 2012 data for degree-granting institutions are actual.

NOTE: Data for 1869–70 through 1949–50 reflect enrollment for the entire school year. Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes homeschooled children and students in subcollegiate departments of colleges and in federal schools. Excludes preprimary pupils in private schools that do not offer kindergarten or above. Postsecondary data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education

classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

¹Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.

²Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.

³Estimated.

⁴Inclusion of institutions is not consistent with surveys for 1987 and later years.

⁵Projected.

NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions instructional staff.

†Not applicable.

¹Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.

²Data for 1980–81 and 1990–91 include schools with first or higher grades. Data for 1997–98 and later years include schools with kindergarten or higher grades.

³Included in the elementary, secondary, and combined categories.

NOTE: Postsecondary data for 1980–81 and 1990–91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher educa-

tion classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

¹Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.

²Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Postsecondary data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education

classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.²Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.³Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Expenditures for public and private colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years are for total expenditures. Postsecondary data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions.

Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

¹Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.²Includes assistance and subsidies to individuals, private elementary and secondary schools, and private colleges and universities, as well as miscellaneous education expenditures. Does not include expenditures for public libraries.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Commerce, Census Bureau, Governmental Finances. Retrieved October 16, 2013, from <http://www.census.gov/govs/local/>. (This table was prepared October 2013.)

¹Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.

²Includes assistance and subsidies to individuals, private elementary and secondary schools, and private colleges and universities, as well as miscellaneous education expenditures. Does not include expenditures for public libraries.

NOTE: Per capita amounts for 2010–11 are based on population estimates for July 2011. Per capita amounts for 2009–10 are based on the latest population estimates for July 2010 and have been revised from previously published figures. Detail may not sum to totals because of rounding.

¹Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years that ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.

²Constant dollars based on a chain-price index, which uses the geometric mean of output weights of adjacent time periods compiled over a time series. Chain-price indexes reflect changes in prices, while implicit price deflators reflect both changes in prices and in the composition of output. More information is available at https://www.bea.gov/scb/account_articles/national/05970d/maintext.htm.

³Data adjusted by the CPU-RS, which is a price index of inflation that incorporates most of the improvements in methodology made to the current CPI-U since 1978 into a single, uniform series. See Census Bureau, *Money Income in the United States: 1999* (www.census.gov/prod/2000pubs/p60-209.pdf).

⁴Population of the United States including armed forces overseas. Includes Alaska and Hawaii beginning in 1960.

⁵Resident population of the United States. Includes Alaska and Hawaii beginning in 1958. Data for 1990 and later years include revisions based on the 2000 census. Excludes overseas armed personnel.

NOTE: Gross domestic product (GDP) data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

CHAPTER 2

Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys, censuses, and administrative data collections conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

Enrollments

Public elementary and secondary school enrollment rose from 49.3 million in 2006 to 49.5 million in 2011, an increase of less than 1 percent (table 203.10 and figure 7). Public elementary enrollment (prekindergarten through grade 8) was 2 percent higher in 2011 (34.8 million) than in 2006 (34.2 million), while public secondary enrollment was 2 percent lower in 2011 (14.7 million) than in 2006 (15.1 million). Although public school enrollment increased slightly overall between 2006 and 2011, there were increases in enrollment for some racial/ethnic groups and decreases for other groups (table 203.50). Between 2006 and 2011, the enrollment of Hispanic students increased 16 percent and the enrollment of Asian/Pacific Islander students increased 8 percent. In contrast, the enrollment of White students decreased 8 percent, the enrollment of Black students decreased 7 percent, and the enrollment of American Indian/Alaska Native students decreased 8 percent.

From 2006 to 2011, changes in public school enrollment varied from state to state (table 203.20 and figure 8). Increases occurred in 28 states and the District of Columbia from 2006 to 2011, while decreases occurred in 22 states. The largest public school enrollment increases occurred in Utah (14 percent) and Texas (9 percent), and 4 other states had increases of at least 5 percent. The largest decrease in public school enrollment occurred in Michigan (a decrease of 9 percent), and 5 other states had decreases of at least 5 percent.

Enrollments in private elementary and secondary schools decreased by an estimated 12 percent between 2006 and 2011, from 6.0 million to 5.3 million (table 208.20). In 2011, private school students made up about 10 percent of all elementary and secondary school students.

In 2012, about 64 percent of 3- to 5-year-olds were enrolled in preprimary education (nursery school and kindergarten), the same as the percentage in 2000 (table 202.10 and figure 9). However, the percentage of children in full-day programs increased from 2000 to 2012. In 2012, about 60 percent of the children enrolled in preprimary education attended a full-day preprimary program, compared with 53 percent in 2000.

A higher percentage of 4-year-old children (57 percent) were cared for primarily in center-based programs during the day in 2005–06 than had no regular nonparental care (20 percent) or were cared for primarily in home-based settings by relatives (13 percent) or by nonrelatives (8 percent) (table 202.50). There were differences in the average quality of care children received in these settings. A higher percentage of children in Head Start and other center-based programs (35 percent) received high-quality care than those in home-based relative and nonrelative care (9 percent), according to the ratings of trained observers (table 202.60).

The Individuals with Disabilities Education Act (IDEA), enacted in 1975, mandates that children and youth ages 3–21 with disabilities be provided a free and appropriate public school education. The percentage of total public school enrollment that represents children served by federally supported special education programs increased from 8.3 percent to 13.8 percent between 1976–77 and 2004–05 (table 204.30). Much of this overall increase can be attributed to a rise in the percentage of students identified as having specific learning disabilities from 1976–77 (1.8 percent) to 2004–05 (5.7 percent). The overall percentage of students being served in programs for those with disabilities decreased between 2004–05 (13.8 percent) and 2011–12 (12.9 percent). However, there were different patterns of change in the percentages served with some specific conditions between 2004–05 and 2011–12. The percentage of children identified as having other health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes) rose from 1.1 to 1.5 percent of total public school enrollment, the percentage with autism rose from 0.4 to 0.9 percent, and the percentage with developmental delay rose from 0.7 to 0.8 percent. The percentage of children with specific learning disabilities declined from 5.7 percent to 4.7 percent of total

public school enrollment during this period. In fall 2011, some 95 percent of 6- to 21-year-old students with disabilities were served in regular schools; 3 percent were served in a separate school for students with disabilities; 1 percent were placed in regular private schools by their parents; and less than 1 percent each were served in one of the following environments: in a separate residential facility, homebound or in a hospital, or in a correctional facility (table 204.60).

Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers generally increased. For public schools, the number of pupils per teacher—that is, the pupil/teacher ratio¹—declined from 22.3 in 1970 to 17.9 in 1985 (table 208.20 and figure 7). After enrollment started increasing in 1985, the public school pupil/teacher ratio continued to decline, reaching 17.2 in 1989. After a period of relative stability during the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 15.4 in 2009. The public school pupil/teacher ratio increased to 16.0 in 2011. By comparison, the pupil/teacher ratio for private schools was 12.5 in 2011. The average class size in 2011–12 was 21.2 pupils for public elementary schools and 26.8 pupils for public secondary schools (table 209.30).

In 2011–12, some 76 percent of public school teachers were female, 44 percent were under age 40, and 56 percent had a master’s or higher degree (table 209.10). Compared with public school teachers, a lower percentage of private school teachers had a master’s or higher degree (43 percent).

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2011–12, some 20 percent of public school principals were under age 40, and 98 percent of public school principals had a master’s or higher degree (table 212.10). Compared with public school principals, a lower percentage of private school principals had a master’s or higher degree (69 percent). A lower percentage of principals than of teachers were female: About 52 percent of public school principals were female, compared with 76 percent of teachers. At private schools, 55 percent of principals were female in 2011–12, compared with 75 percent of teachers.

From 1969–70 to 1980, there was an 8 percent increase in the number of public school teachers, compared with a 48 percent increase in the number of all other public school staff² (table B and table 213.10). Consequently, the percentage of staff who were teachers declined from 60 per-

cent in 1969–70 to 52 percent in 1980. From 1980 to 2011, the number of teachers and the number of all other staff grew at more similar rates (42 and 53 percent, respectively) than they did in the 1970s. As a result, the proportion of teachers among total staff was 2 percentage points lower in 2011 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. Two staff categories increased more than 100 percent between 1980 and 2011—instructional aides, which rose 118 percent, and instruction coordinators, which rose 229 percent. Taken together, the percentage of staff with direct instructional responsibilities (teachers and instructional aides) increased from 60 to 62 percent between 1980 and 2011. In 2011, there were 8 pupils per staff member (total staff) at public schools, compared with 10 pupils per staff member in 1980 (table 213.10). At private schools in 2011–12, the number of pupils per staff member was 6 (table 205.60).

Table B. Number of public school staff, by selected categories: 1969–70, 1980, and 2011
[In thousands]

Selected staff category	1969–70	1980	2011
Total	3,361	4,168	6,139
Teachers.....	2,016	2,184	3,103
Instructional aides	57	326	710
Instruction coordinators.....	32	21	68

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1969–70; Statistics of Public Elementary and Secondary Schools, 1980*; and Common Core of Data (CCD), “State Nonfiscal Survey of Public Elementary/Secondary Education,” 2011–12.

Schools

During most of the last century, the trend to consolidate small schools brought declines in the total number of public schools in the United States. In 1929–30, there were approximately 248,000 public schools, compared with about 98,000 in 2011–12 (table 214.10). However, the number of public schools has increased in recent decades: between 1988–89 and 2006–07, there was an increase of approximately 15,600 schools. Since 2006–07, the number of public schools has remained relatively stable, varying by about 500 schools or less from year to year.

While the total number of public schools in the country has remained between 98,000 and 99,000 in recent years, new schools have opened and some schools have closed. In 2011–12, there were 1,840 school closures (table 216.95). The schools that closed had enrolled about 301,000 students in the prior school year (2010–11). Of the schools that closed, 1,340 were regular schools, 87 were special education schools, 11 were vocational schools, and 402 were alternative schools. The number of schools that closed in 2011–12 was higher than the number in 2000–01 (1,193); however, the number of annual school closures has fluctuated during this period, ranging from around 1,200 to 2,200. School closures do not necessarily reflect the number of school buildings that have been closed, since a single school may share a building with another school, or one school may have multiple buildings.

¹The pupil/teacher ratio is based on all teachers—including teachers for students with disabilities and other special teachers—and all students enrolled in the fall of the school year. Unlike the pupil/teacher ratio, the average class size excludes students and teachers in classes that are exclusively for special education students. Class size averages are based on surveys of teachers reporting on the counts of students in their classes.

²“All other public school staff” includes administrative staff, principals, librarians, guidance counselors, secretaries, custodial staff, food service workers, school bus drivers, and other professional and nonprofessional staff.

Since the early 1970s, public school systems have been shifting away from junior high schools (schools consisting of either grades 7 and 8 or grades 7 to 9) and moving toward middle schools (a subset of elementary schools beginning with grade 4, 5, or 6 and ending with grade 6, 7, or 8) (table 216.10). Although the number of all elementary schools (schools beginning with grade 6 or below and having no grade higher than 8) was similar in 1970–71 and 2000–01 (64,000 in 1970–71 and 64,600 in 2000–01), the number of middle schools was 462 percent higher in 2000–01 than in 1970–71 (11,700 vs. 2,100). During the same period, the number of junior high schools declined by 57 percent (from 7,800 in 1970–71 to 3,300 in 2000–01). Between 2001–02 and 2011–12, the number of all elementary schools rose by 2 percent to 66,700, while the subset of middle schools rose by 8 percent to 13,000. During the same period, the number of junior high schools declined by 13 percent to 2,900.

The average number of students in public elementary schools in 2011–12 (479) was higher than in 2001–02 (477) (table 216.45). The average enrollment size of public secondary schools decreased from 718 in 2001–02 to an average of 690 students in 2011–12. The average size of regular public secondary schools—which exclude alternative, special education, and vocational education schools—decreased from 807 in 2001–02 to 788 in 2011–12.

High School Graduates and Dropouts

About 3,323,000 high school students are expected to graduate during the 2014–15 school year (table 219.10), including about 3,031,000 public school graduates and 291,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2014–15 projection of high school graduates is lower than the record high of 3,452,000 graduates for 2011–12, but exceeds the baby boom era’s high point in 1975–76, when 3,142,000 students earned diplomas. In 2011–12, an estimated 80.8 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman (9th-grade) year (table 219.35).

The number of General Educational Development (GED) credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service. In 2012, some 401,000 people

passed the GED tests, up from 330,000 in 2002, the first year of the new test series.³

The percentage of dropouts among 16- to 24-year-olds has decreased over the past 20 years (table 219.70). This percentage, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1990 and 2012, the status dropout rate declined from 12.1 to 6.6 percent. Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates (7.5 and 12.7 percent, respectively) remained higher than the rate for Whites (4.3 percent) in 2012. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

Achievement

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP (which includes the Trial Urban District Assessment), and national long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. For mathematics, reading, science, and writing assessments since 2002, a combined sample of public schools has been selected for 4th- and 8th-grade national NAEP and state NAEP (including the Trial Urban District Assessment).

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America’s youth since the early 1970s. They are administered nationally and report student performance in reading and mathematics at ages 9, 13, and 17. Measuring long-term trends of stu-

³Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

dent achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500 (table 221.10). In 2013, the average reading score for 4th-grade students (222) was not measurably different from the 2011 score, but it was higher than the scores on assessments between 1992 (217) and 2009 (221). At grade 4, only the average reading scores for White students were higher in 2013 (232) than in both 2011 (231) and 1992 (224). The 2013 scores for Black (206), Hispanic (207), and Asian/Pacific Islander (235) 4th-graders were not measurably different from the 2011 scores, but the 2013 scores were higher than the 1992 scores (192, 197, and 216, respectively). The difference in the reading scale scores of White and Black 4th-graders decreased from 32 points in 1992 to 26 points in 2013. For 8th-grade students, the average reading score in 2013 (268) was more than 2 points higher than in 2011 (265), was 8 points higher than in 1992 (260), and was higher than the average scores in all previous years. At grade 8, the 2013 average reading scores for White (276), Black (250), Hispanic (256), and Asian/Pacific Islander (280) students were higher than in 2011 and 1992. The difference in the reading scale scores of White and Hispanic 8th-graders decreased from 26 points in 1992 to 21 points in 2013.

While there was no measurable change from 2011 to 2013 in the average score for 4th-grade public school students nationally, average scores were higher in 2013 than in 2011 in Colorado, the Department of Defense dependents schools, Indiana, Iowa, Maine, Minnesota, Tennessee, Washington, and the District of Columbia; scores were lower in 2013 than in 2011 in Massachusetts, Montana, and North Dakota (table 221.40). At grade 8, the average reading score for public school students nationally was 2 points higher in 2013 than in 2011, and 12 states (Arkansas, California, Florida, Hawaii, Iowa, Nevada, New Hampshire, Oregon, Pennsylvania, Tennessee, Utah, and Washington) plus the District of Columbia and the Department of Defense dependents schools had higher scores in 2013 than in 2011 (table 221.60). In the other states, scores did not change measurably from 2011 to 2013.

Reported on a scale of 0 to 500, NAEP long-term trend results in reading are available for 13 assessment years going back to the first in 1971. The average reading score for 9-year-olds was higher in 2012 (221) than in assessment years prior to 2008, increasing 5 points since 2004 and 13 points in comparison to 1971 (table 221.85). The average score for 13-year-olds in 2012 (263) was higher than in all previous assessment years, except for 1992. The average reading score for 17-year-

olds was higher in 2012 (287) than in 2004 (283), but was not significantly different from the score in 1971 (285).

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average reading scores in 2012 than they did in the first assessment year (which is 1975 for Hispanic students because separate data for Hispanics were not collected in 1971). Average reading scores were higher in 2012 than in 2004 for White, Black, and Hispanic students at all three ages (table 221.85). Reading results for 2012 continued to show gaps in scores between White and Black students (ranging from 23 to 26 points, depending on age) and between White and Hispanic students (about 21 points at all three ages). The White-Black and the White-Hispanic reading gaps were smaller in 2012 than in 1971 (1975 for Hispanic students) at all three ages. For example, the White-Black reading gap for 17-year-olds was 53 points in 1971 compared with 26 points in 2012. Similarly the White-Hispanic reading gap for 17-year-olds narrowed from 41 points in 1975 to 21 points in 2012.

In 2012, female 9-, 13-, and 17-year-old students continued to have higher average reading scores than male students at all three ages (table 221.85). The gap between male and female 9-year-olds was 5 points in 2012; this was narrower than the gap in 1971 (13 points). The 8-point gender gap for 13-year-olds in 2012 was not significantly different from the gap in 1971. At age 17, the 8-point gap between males and females in 2012 was not significantly different from the gap in 1971.

Mathematics

The main NAEP mathematics assessment data for 4th- and 8th-graders are reported on a scale of 0 to 500. In 2013, the average NAEP mathematics scores for 4th-grade and 8th-grade students were higher than the average scores in all previous assessment years (table 222.10). From 1990 (the first assessment year) to 2013, the average 4th-grade NAEP mathematics score increased by 28 points, from 213 to 242. During that same period, the average 8th-grade score increased by 22 points, from 263 to 285. At grade 4, the average mathematics scores in 2013 for White (250) and Hispanic students (231) were higher than the scores in both 2011 and 1990. The 2013 score for Black 4th-graders (224) was not measurably different from the 2011 score, but it was higher than the 1990 score. Prior to 2011, separate data on Asians were not available; the 2013 score for Asian 4th-graders (259) was also not measurably different from the 2011 score. The difference in the mathematics scale scores of White and Black 4th-graders decreased from 32 points in 1990 to 26 points in 2013. At grade 8, the mathematics scores of White (294), Black (263), and Hispanic (272) students were higher in 2013 than in 1990. However, the 31-point gap between the mathematics scores of White and Black 8th-graders in 2013 was not significantly different from the 33-point gap in 1990.

NAEP results also permit state-level comparisons of the mathematics achievement of 4th- and 8th-grade students in public schools (tables 222.50 and 222.60). The average

mathematics scores for 4th-grade public school students increased from 2011 to 2013 in 14 states (Arizona, Colorado, Delaware, Hawaii, Indiana, Iowa, Minnesota, Nebraska, New York, North Dakota, Tennessee, Washington, West Virginia, and Wyoming), the District of Columbia, and the Department of Defense dependents schools, and scores did not decrease for any states. At grade 8, scores were higher in 2013 than in 2011 in five states (Florida, Hawaii, New Hampshire, Pennsylvania, and Tennessee), the District of Columbia, and the Department of Defense dependents schools, and scores decreased in three states (Montana, Oklahoma, and South Dakota).

NAEP long-term trend mathematics results, reported on a scale of 0 to 500, are available for 12 assessment years, going back to the first in 1973. In 2012, the average mathematics score for 9-year-olds (244) was higher than in all previous assessment years prior to 2008 (table 222.85). The average score for 9-year-olds in 2012 was 5 points higher than in 2004 and 25 points higher than in 1973. The average mathematics score for 13-year-olds in 2012 (285) was higher than in all previous assessment years. For 13-year-olds, the average score in 2012 was 6 points higher than in 2004 and 19 points higher than in 1973. In contrast, the average score for 17-year-olds in 2012 (306) was not significantly different from the scores in 2004 and 1973.

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average mathematics scores in 2012 than in 1973 (table 222.85). In comparison to 2004, average mathematics scores were higher in 2012 for White 9-, 13-, and 17-year-olds, Hispanic 9- and 13-year-olds, and Black 13-year-olds. Mathematics results for 2012 continued to show score gaps between White and Hispanic students (ranging from 17 to 21 points [based on unrounded scores], depending on age) and between White and Black students (ranging from 25 to 28 points). Across all three age groups, both the White-Black and White-Hispanic gaps in mathematics scores were lower in 2012 than in 1973. For example, among 17-year-olds, the White-Black gap was 40 points in 1973 compared to 26 points in 2012, and the White-Hispanic gap was 33 points in 1973 compared to 19 points in 2012.

While there was no significant difference between the average mathematics scores of male and female 9- and 13-year-olds in 2012, male students did score higher than female students at age 17 (table 222.85). At both age 9 and age 13, the gap between males and females in 2012 was not significantly different from the gap in 1973. At age 17, the 4-point gender score gap in 2012 was smaller than the gap in 1973 (8 points).

Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. Scores are based on a scale ranging from 0 to 300. In 2009, White 4th-graders had a higher average science score

(163) than did Black (127), Hispanic (131), Asian/Pacific Islander (160), and American Indian/Alaska Native (135) 4th-graders (table 223.10). The average science score was higher for male 4th-graders (151) than for female 4th-graders (149). In 2009, the pattern of differences in average science scores by students' race/ethnicity at grade 8 was similar to the pattern at grade 4. The average science score also was higher for male 8th-graders (152) than for female 8th-graders (148). At grade 12, average scores for White (159) and Asian/Pacific Islander (164) students were higher than the scores for Black (125), Hispanic (134), and American Indian/Alaska Native (144) students. The average science score in 2009 for male 12th-graders (153) was higher than the score for female 12th-graders (147). In 2011, a science assessment was conducted at grade 8 only. The average 8th-grade science score increased from 150 in 2009 to 152 in 2011. While there were no significant changes from 2009 to 2011 in the average scores for Asian/Pacific Islander or American Indian/Alaska Native 8th-graders, average scores increased 1 point for White 8th-graders, 3 points for Black 8th-graders, and 5 points for Hispanic 8th-graders. The average science score of White 8th-graders continued to be higher than the average scores of 8th-graders in all other racial/ethnic groups in 2011, but score gaps between White and Black 8th-graders and between White and Hispanic 8th-graders narrowed from 2009 to 2011. Average scores for both male and female 8th-graders were higher in 2011 than in 2009. In 2011, the average score was 5 points higher for male 8th-graders than for female 8th-graders, which was not significantly different from the 4-point gap in 2009.

Skills of Young Children

In addition to student performance data available through NAEP, the *Digest* presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of cognitive skills have been demonstrated at relatively early ages in the Early Childhood Longitudinal Survey's Birth Cohort (ECLS-B) study as well as its Kindergarten Class (ECLS-K) studies.

In 2003–04, about 64 percent of 2-year-olds demonstrated proficiency in expressive vocabulary, which measured toddlers' ability to communicate using gestures, words, and sentences (table 220.20). The percentage of 2-year-olds demonstrating expressive vocabulary was higher for females (69 percent) than for males (59 percent). Also, a higher percentage of White (71 percent) and Asian (62 percent) 2-year-olds demonstrated expressive vocabulary than of Black, Hispanic, or American Indian/Alaska Native 2-year-olds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status (SES) who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low-SES families who did so (52 percent).

Patterns of differences were also observed by race/ethnicity and SES for children at about 4 years of age (48 to 57 months old). In 2005–06, average early reading scores were

higher for White (27) and Asian (31) 48- to 57-month-old children than for Black (23), Hispanic (21), and American Indian/Alaska Native (20) children (table 220.30). Also, high-SES children (33) had higher average early reading scores than low-SES children (19) at this age. These same patterns were observed among 48- to 57-month-old children with respect to average mathematics scores. White (32) and Asian (35) 48- to 57-month-old children had higher mathematics scores than Black (27), Hispanic (26), and American Indian/Alaska Native children (23). High-SES 48- to 57-month-old children (36) had higher average mathematics scores than low-SES children (24).

Children who enrolled in kindergarten for the first time in 2010–11 showed similar patterns of score differences by race/ethnicity and SES. In fall 2010, average mathematics scores were higher for first-time kindergartners from high-SES families (36) than for those from low-SES families (22) (table 220.40). White (32) and Asian (35) first-time kindergartners had higher mathematics scores than their Black (26), Hispanic (25), and American Indian/Alaska Native (26) counterparts. Similarly, reading scores in fall 2010 were higher for White (37) and Asian (40) first-time kindergartners than for their Black (33), Hispanic (30), and American Indian/Alaska Native (31) counterparts. High-SES children (42) had higher average early reading scores than low-SES children (28).

SAT Scores of College-Bound Seniors

The SAT (formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test) is not designed as an indicator of student achievement, but rather as an aid for predicting how well students will do in college. Between 1998–99 and 2004–05, the mathematics SAT average score increased by 9 points, but it decreased 6 points between 2004–05 and 2012–13 (table 226.20). The critical reading average score decreased 9 points between 1999–2000 (505) and 2011–12 (496). The writing average score in 2012–13 (488) was 9 points lower than in 2005–06 (497), the year in which the SAT writing section was introduced.

Coursetaking in High School

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2009. The average number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982 to 3.9 in 2009, and the number of science courses rose from 2.2 to 3.5 (table 225.10). The average number of courses in career/technical areas completed by public high school graduates was lower in 2009 (2.5 units) than in 2000 (2.9 units). As a result of the increased academic course load, the percentage of public and private high school graduates completing the 1983 National Commission on Excellence recommendations (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics,

and 2 units of foreign language) rose from 10 percent in 1982 to 62 percent in 2009 (table 225.50).

School Violence

In 2009–10, about 85 percent of public schools had a criminal incident, which is defined as theft, vandalism, drug possession, weapons possession, a serious violent crime, or a less serious violent crime such as a fight without weapons (table 229.20). In 2009–10, some 74 percent of schools reported one or more violent incidents, 44 percent of schools reported one or more thefts/larcenies, and 46 percent reported vandalism. The percentage of schools reporting a serious violent crime in 2009–10 (16 percent) was lower than the percentage of schools reporting a serious violent crime in 1999–2000 (20 percent). Also, the percentage of schools reporting an incident of vandalism was lower in 2009–10 (46 percent) than in 1999–2000 (51 percent). Overall, there were 4 criminal incidents reported per 100 students in 2009–10, which was lower than the 5 criminal incidents per 100 students reported in 1999–2000.

Revenues and Expenditures

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 235.10 and figure 10).⁴ However, this pattern changed in the late 1980s, when the local share began to increase at the same time the state share decreased. Between 1986–87 and 1993–94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993–94 and 2000–01, the state share rose again to 49.7 percent, the highest share since 1986–87, but declined every school year thereafter until 2005–06, when the state share was 46.5 percent. Overall, between 2000–01 and 2010–11, the federal share increased from 7.3 percent to 12.5 percent, while the state share decreased from 49.7 to 44.1 percent. The local share in 2010–11 (43.4) was higher than the percentage in 2000–01 (43.0).

After adjustment for inflation, current expenditures per student in fall enrollment at public schools rose during the 1980s, remained stable during the first part of the 1990s, and then rose again (table 236.55 and figure 11). There was an increase of 37 percent from 1980–81 to 1990–91, followed by minor fluctuations from 1990–91 to 1994–95 and then an increase of 31 percent from 1994–95 to 2010–11. In 2010–11, current expenditures per student in fall enrollment were \$10,658 in unadjusted dollars. In 2007–08, the expenditure for public school student transportation was \$854 per student transported (also in unadjusted dollars), and 55 percent of students were transported at public expense (table 236.90).

⁴For data on individual years from 1980–81 through 1988–89, see *Digest of Education Statistics 2011* (NCES 2012-001), table 180.

Figure 7. Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public elementary and secondary schools: 1960–61 through 2011–12

Fall enrollment, in millions

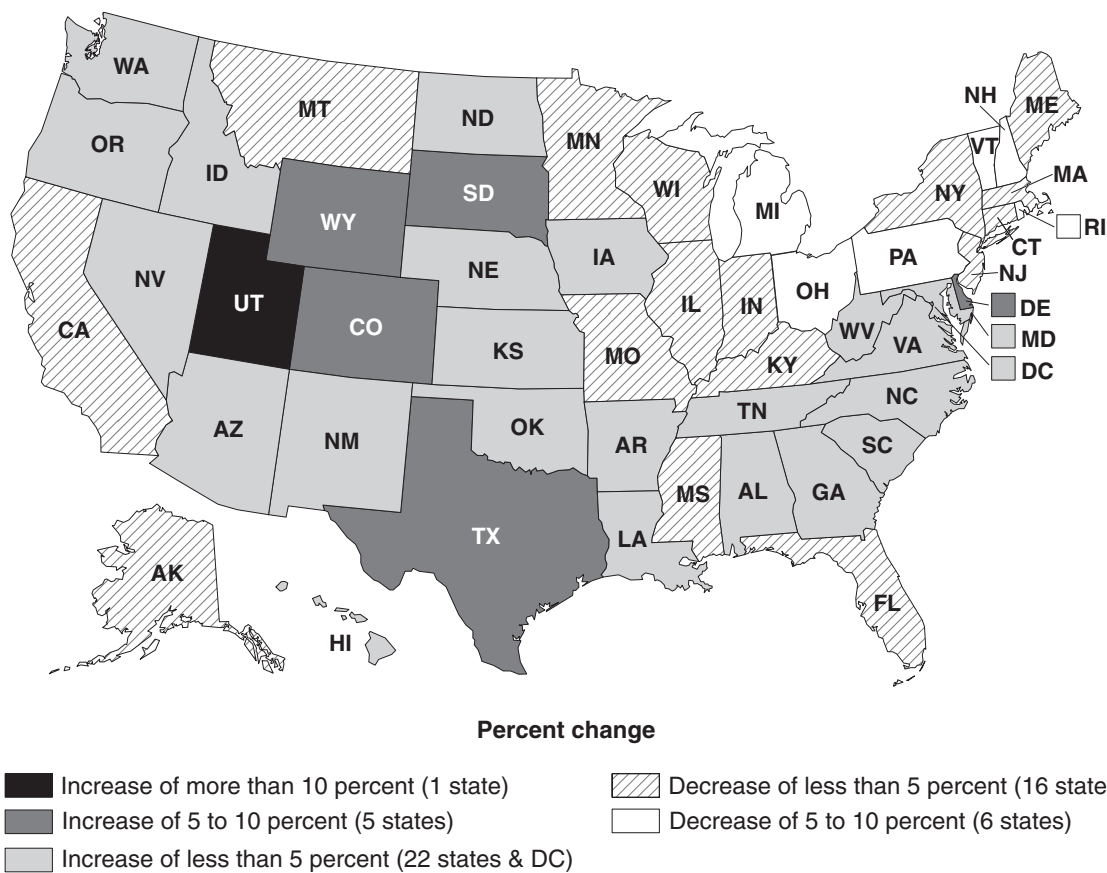

Teachers, in millions

Current expenditures, in billions

—Not available.

¹Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.

²Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment. Total counts of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports.

³Data for 1870–71.

⁴Estimated by the National Center for Education Statistics.

⁵Prior to 1919–20, data are for the number of different persons employed rather than number of positions.

⁶Prior to 1919–20, includes interest on school debt.

⁷Because of the modification of the scope of “current expenditures for elementary and secondary schools,” data for 1959–60 and later years are not entirely comparable with prior years.

⁸Beginning in 1969–70, includes capital outlay by state and local school building authorities.

⁹Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with “current expenditures for elementary and secondary schools.”

¹⁰Excludes community colleges and adult education.

¹¹Prior to 1959–60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959–60 and later years are estimated by the National Education Association.

¹²Excludes current expenditures not allocable to pupil costs.

¹³“ADA” means average daily attendance in elementary and secondary schools.

¹⁴Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.

¹⁵Per-day rates derived by dividing annual rates by average length of term.

¹⁶Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals because of rounding.

—Not available.

¹Includes a relatively small number of secondary ungraded students.²Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year.³Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables, which are based on the enrollment of persons in the given age group only.⁴Data are for 1927–28.⁵Data are for 1940–41.⁶Estimated.⁷Projected.

NOTE: Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. The enrollment for ungraded public school students was estimated based on the secondary proportion of ungraded students in prior years. The enrollment of ungraded private school students was estimated based

on the secondary proportion of ungraded students in individual high schools. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. —Not available.

†Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

!Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.

²Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years.

³Enrollment data include only those students in preprimary programs.

NOTE: Preprimary programs provide educational experiences for children and include kindergarten, preschool, and nursery school programs. Enrollment data for 5-year-olds include only those students in preprimary programs and do not include those enrolled in primary programs. Data are based on sample surveys of the civilian noninstitutional population. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Preprimary Enrollment*, 1965, 1970, and 1975. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1980 through 2012. (This table was prepared May 2013.)

Table 202.20. Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by attendance status, level of program, and selected child and family characteristics: 2012
[Standard errors appear in parentheses]

[!]Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

[‡]Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Data pertain only to parents or guardians who live in the household with the child.

NOTE: Preprimary programs provide educational experiences for children and include kindergarten, preschool, and nursery school programs. Enrollment data for 5-year-olds include only those students in preprimary programs and do not include those enrolled in primary programs. Race categories exclude persons of Hispanic ethnicity. Data are based on sample surveys of the civilian noninstitutional population. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.

²Children who spend equal hours per week in multiple nonparental care arrangements.

³Includes persons of all other races and two or more races.

⁴Excludes children living apart from their parents.

⁵Excludes children living in households with no mother or female guardian present.

⁶Poverty status was determined by household income and number of persons in household. NOTE: A child's "primary arrangement" was defined as the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

¹Includes persons of all other races and two or more races.

²Center-based programs include day care centers, nursery schools, prekindergartens, pre-schools, and Head Start programs.

NOTE: Row percents for nonparental and parental care do not add to 100 percent because some children participated in more than one type of nonparental care arrangement. Race

categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population with data on primary care arrangements.²Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.³Care provided in the child's home or in another private home by a relative (excluding parents).⁴Care provided in the child's home or in another private home by a person unrelated to the child.⁵Care provided in places such as early learning centers, nursery schools, and preschools.⁶Children who spent an equal amount of time in each of two or more arrangements.⁷Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 44 and 65 months of age with data on primary care arrangements.⁸Mothers who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.⁹Poverty status based on Census Bureau guidelines from 2002 (for 2-year-olds in 2003–04) and 2005 (for 4-year-olds in 2005–06), which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392 (in current dollars).¹⁰Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Data are based on a representative sample of children born in 2001. Estimates for children at about 2 years of age weighted by W2R0. Estimates for children at about 4 years of age weighted by W3R0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.²Care provided in the child's home or in another private home by a relative (excluding parents) or by a person unrelated to the child.³Quality rating based on the Family Day Care Rating Scale (FDCRS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.⁴Quality rating based on the Early Childhood Environment Rating Scale (ECERS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.⁵Care provided in places such as early learning centers, nursery schools, and preschools, not classified as Head Start.⁶Mothers who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.⁷Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392 (in current dollars).⁸Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.

NOTE: Estimates weighted by W33P0. Estimates pertain to children assessed between 44 months and 65 months of age. Rating is for child's primary type of care arrangement, which was the type of nonparental care in which the child spent the most hours. Children who were primarily cared for by parents or in multiple arrangements are not included in this table. Ratings of care arrangement quality using both the FDCRS and ECERS scales were based on interviewer observations of children's interactions with adults and peers, children's exposure to materials and activities, the extent to which and the manner in which routine care needs were met, and the furnishings and displays in the classroom. The FDCRS and ECERS metrics are designed to be equivalent. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹The type of nonparental care in which the child spent the most hours. Multiple arrangements refers to children who spent an equal amount of time in each of two or more types of arrangements.

²Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.

³Parents highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

⁴Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its annual income was less than \$17,552 in 2010.

⁵Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.

NOTE: Estimates weighted by W1_2P0. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010–11 school year. Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

NOTE: Due to changes in reporting and imputation practices, prekindergarten enrollment for years prior to 1992 represent an undercount compared to later years. The total ungraded counts of students were prorated to the elementary and secondary levels based on prior reports. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

¹For this year, data on students of two or more races were reported by only a small number of states. Therefore, the data are not comparable to figures for 2010 and later years.

²Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008, data on students of two or more races were not collected separately. Total counts

of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met. Either the response rate is under 50 percent or there are too few cases for a reliable estimate.

NOTE: Averages reflect data reported by schools rather than state requirements. School-reported length of day may exceed state requirements, and there is a range of statistical error in reported estimates.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Data File," 2007–08 and 2011–12. (This table was prepared May 2013.)

Table 204.10. Number and percentage of public school students eligible for free or reduced-price lunch, by state: Selected years, 2000–01 through 2011–12

State	Number of students				Number of students eligible for free/reduced-price lunch				Percent of students eligible for free/reduced-price lunch

¹U.S. total includes imputation for nonreporting states.

²Imputation for survey nonresponse. State-level imputations for 2000–01 were based on the reported percentages for 2001–02 applied to the 2000–01 enrollments. State-level imputations for 2011–12 were based on the reported percentages for 2010–11 applied to the 2011–12 enrollments.

NOTE: Table reflects counts of students enrolled in all schools for which both enrollment data and free/reduced-price lunch eligibility data were reported. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2000–01, 2005–06, 2010–11, and 2011–12. (This table was prepared September 2013.)

¹U.S. total includes imputation for nonreporting states.

²Imputation for survey nonresponse. State-level imputations were based on the percentages reported by the state for other years applied to the enrollment for the given year.

³Based on data reported by the California Education Agency (<http://www.cde.ca.gov/ds/sd/cb/cefelfacts.asp>).

NOTE: Includes students served in regular school districts, excluding regional education service agencies and supervisory union administrative centers, state-operated agencies,

federally operated agencies, and other types of local education agencies, such as independent charter schools.

†Not applicable.

#Rounds to zero.

¹Data do not include Vermont, for which 2007–08 and 2008–09 data were not available. In 2006–07, the total number of 3- to 21-year-olds served in Vermont was 14,010.

²Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

³For 1990–91, preschool children are not included in the counts by disability condition but are separately reported. For other years, preschool children are included in the counts by disability condition.

⁴Based on the total enrollment in public schools, prekindergarten through 12th grade. For total enrollment in public schools, see table 203.20.

NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities

Education Act (IDEA), Part B. Data reported in this table for years prior to 1994–95 include children ages 0–21 served under Chapter 1. Data are for the 50 states and the District of Columbia only. Increases since 1987–88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3- to 5-year-old children with disabilities. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

¹For years prior to 2010–11, Asian data include Pacific Islanders.

²Data do not include Vermont, for which 2007–08 and 2008–09 data were not available.

³For 2008–09 and 2009–10, data on children of two or more races were reported by only a small number of states. Therefore, these data are not comparable to figures for 2010–11 and 2011–12.

⁴Based on the total enrollment in public schools, prekindergarten through 12th grade, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.50.

NOTE: Data include only those children served for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, Office of Special Education Programs, Individuals with Disabilities Education Act (IDEA) database, retrieved May 17, 2013, from <https://www.ideadata.org/PartBChildCount.asp>; and National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 2000–01 through 2011–12. ¹Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.²Based on the total enrollment in public schools, kindergarten through 12th grade, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.50.

NOTE: Data include only those children served for whom race/ethnicity and type of disability were reported. Although data are for the 50 states and the District of Columbia, data limitations result in inclusion of a small (but unknown) number of stu-

dents from Bureau of Indian Education and Puerto Rican schools. For these reasons, totals may differ from those shown in other tables. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

#Rounds to zero.

¹Students who are enrolled by their parents or guardians in regular private schools and have their basic education paid through private resources, but receive special education services at public expense. These students are not included under "Regular school, time inside general class" (columns 3 through 5).

²Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

NOTE: Data are for the 50 United States, the District of Columbia, and the Bureau of Indian Education schools. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, Office of Special Education Programs, Individuals with Disabilities Education Act (IDEA) database. Retrieved May 22, 2013, from https://www.ideadata.org/DACAnalyticTool/Intro_2.asp. (This table was prepared May 2013.)

Table 204.70. Number and percentage of children served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2011–12

State or jurisdiction	3- to 21-year-olds served								3- to 5-year-olds served					
	1990–91	2000–01	2005–06	2009–10	2010–11	2011–12	As a percent of public school enrollment, 2011–12 ¹	Percent change in number served, 2000–01 to 2011–12	1990–91	2000–01	2005–06	2009–10	2010–11	2011–12

¹Based on the total enrollment in public schools, prekindergarten through 12th grade. For total enrollment in public schools, see table 203.10.

NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for 1990–91 include children ages 0–21 served under Chapter 1. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, Office of Special Education Programs, *Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act*, selected years, 1992 through 2006, and Individuals with Disabilities Education Act (IDEA) database, retrieved May 12, 2013, from <https://www.ideoadata.org/StateLevelFiles.asp>. National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2011–12. (This table was prepared May 2013.)

#Rounds to zero.

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Ungraded students are prorated into prekindergarten through grade 8 and grades 9 through 12. Detail may not sum to totals because of rounding.

†Not applicable.

¹Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Ungraded students are prorated into prekindergarten through grade 8 and grades 9 through 12. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 1995–96 through 2011–12. (This table was prepared April 2013.)

#Rounds to zero.

¹Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.

²Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level.

³Race/ethnicity was not collected for prekindergarten students (788,370 out of 5,488,490 students in 2009 and 773,240 out of 5,268,090 students in 2011). Percentage distribution is based on the students for whom race/ethnicity was reported.

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.

¹Includes students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade.²Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level.³Race/ethnicity was not collected for prekindergarten students (773,000 in fall 2011). Percentage distribution is based on the students for whom race/ethnicity was reported.⁴For 1999, Pacific Islander students are included under Asian. Prior to 2009, data were not collected on Pacific Islander students as a separate category.⁵Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.

NOTE: Tabulation includes schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 1999–2000, 2009–10, and 2011–12. (This table was prepared April 2013.)

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Only includes kindergarten students who attend schools that offer first or higher grade.

²Each school reports the highest annual tuition charged for a full-time student; this amount does not take into account discounts that individual students may receive. This amount is weighted by the number of students enrolled in each school and averaged.

NOTE: Excludes schools not offering first or higher grade. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level. Excludes prekindergarten students. Includes a small percentage of schools reporting tuition of 0; these private schools are often under contract to public school districts to provide special education services. Detail may not sum to totals because of rounding and cell suppression. Some data have been revised from previously published figures.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

±Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Includes schools beginning with grade 6 or below and with no grade higher than 8.²Schools with no grade lower than 7.³Schools with grades lower than 7 and higher than 8, as well as schools that do not classify students by grade level.⁴Includes student support services professional staff, such as school psychologists, social workers, and speech therapists or pathologists.⁵Includes other employees not identified by function.

NOTE: FTE staff consists of the total number of full-time staff, plus 48 percent of the part-time staff; this percentage was estimated based on the number of hours that part-time staff reported working. Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Excludes all prekindergarten students from calculations, but includes kindergarten students attending schools that offer first or higher grade. Includes only schools that offer first or higher grade. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

¹Elementary enrollment is for kindergarten through grade 8, and secondary enrollment is for grades 9 through 12.

²From 1919–20 through fall 1960, includes part-time teachers. From 1969–70 through 1993–94, excludes part-time teachers. Beginning in 1994–95, reported in full-time equivalents (FTE). Prekindergarten teachers not counted separately but may be included with elementary teachers.

³Includes middle schools.

⁴Prekindergarten enrollment was not reported separately, but may be included in elementary enrollment.

⁵Includes estimates for the nonreporting schools.

⁶Excludes the Archdiocese of New Orleans.

NOTE: Data collected by the National Catholic Educational Association and data collected by the National Center for Education Statistics are not directly comparable because survey procedures and definitions differ.

!Interpret data with caution. The coefficient of variation (CVV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.

NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.

#Rounds to zero.

!Reporting standards not met (too few cases for a reliable estimate).

¹Refers to all students in public and private schools and homeschooled students.

²Numbers and percentages of homeschoolers exclude students who were enrolled in school for more than 25 hours a week or who were homeschooled only due to a temporary illness.

³The National Center for Education Statistics uses a statistical adjustment for estimates of total homeschoolers in 2012. For more information about this adjustment, please see *Homeschooling in the United States: 2012* (NCES 2015-019, forthcoming). All other estimates about homeschoolers do not use a statistical adjustment.

⁴Students whose grade equivalent was “ungraded” were excluded from the grade analysis. The percentage of students with an “ungraded” grade equivalent was 0.02 percent in 2003 and 2007. There were no students with an “ungraded” grade equivalent in 2012.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2007, and 2012). (This table was prepared November 2014.)

Table 206.20. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999, 2003, and 2007

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Excludes students who were enrolled in school for more than 25 hours a week; also excluded in 1999 and 2003 are students who were homeschooled only due to a temporary illness and, in 2007, students who were homeschooled primarily due to a temporary illness.²Students whose grade equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003 and 2007.

NOTE: Data are based on parent reports. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003 and PFI:2007) of the National Household Education Surveys Program. (This table was prepared July 2010.)

Table 207.10. Number of 3- to 5-year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 1993, 2001, and 2007

¹The respondent was the parent most knowledgeable about the child's care and education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household.

²In 1993, there were two versions of the survey question that asked how often the child was read to. Each respondent was asked one version of the question. Percentages represent all respondents who indicated a frequency of three or more times in the past week in response to either version of the question.

³Excludes children living in households with no mother or female guardian present.

⁴Poverty status was determined by household income and number of persons in household.

NOTE: Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹In 1999 and 2007, a single item asked parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.²GED = General Educational Development.

NOTE: The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. Excludes homeschooled children. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003 and 2007) of the National Household Education Surveys Program. (This table was prepared July 2009.)

Table 207.30. Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past week, by selected child, parent, and school characteristics: 1999, 2003, and 2007

[Standard errors appear in parentheses]

Selected child, parent, or school characteristic	Told child a story			Did arts and crafts			Discussed family history/ethnic heritage			Played board games or did puzzles

‡Reporting standards not met (too few cases for a reliable estimate).

¹GED = General Educational Development.

NOTE: The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. Excludes homeschooled children. Totals

include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003 and 2007) of the National Household Education Surveys Program. (This table was prepared August 2010.)

Table 207.40. Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 1999, 2003, and 2007
 [Standard errors appear in parentheses]

¹Includes imputations for California and Wyoming.

NOTE: Pupil/teacher ratios are based on data reported by types of schools rather than by instructional programs within schools. Only includes schools that reported both enrollment and teacher data. Ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states.

¹A teacher is considered to be a new hire for a public or private school if the teacher had not taught in that control of school in the previous year. A teacher who moves from a public to private or a private to public school is considered a new teacher hire, but a teacher who moves from one public school to another public school or one private school to another private school is not considered a new teacher hire.

²Estimated.

³Projected.

NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupil/teacher ratio includes teachers for students

with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported by states and differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

¹Includes imputed values for states.

²Includes imputations for underreporting of prekindergarten teachers.

³Imputed.

⁴Includes imputations for underreporting of kindergarten teachers.

NOTE: Distribution of elementary and secondary teachers determined by reporting units. Teachers reported in full-time equivalents (FTE). DoD = Department of Defense. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2011–12. (This table was prepared August 2013.)

Table 208.40. Public elementary and secondary teachers, enrollment, and pupil/teacher ratios, by state or jurisdiction: Selected years, fall 2000 through fall 2011

¹Includes imputed values for states.

²Includes imputations to correct for underreporting of prekindergarten teachers/enrollment.

³Imputed.

⁴Includes imputations to correct for underreporting of kindergarten teachers.

NOTE: Teachers reported in full-time equivalents (FTE). DoD = Department of Defense. The

pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios reflect totals reported by states and differ from totals reported for schools or school districts.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2011–12. (This table was prepared August 2013.)

Table 209.10. Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987–88 through 2011–12

[Standard errors appear in parentheses]

Selected teacher characteristic	Number of teachers (in thousands)								Percentage distribution of teachers

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Data for years 1987–88 through 1999–2000 are only roughly comparable to data for later years, because the new category of two or more races was introduced in 2003–04.²Includes Pacific Islander for years 1987–88 through 1999–2000.³Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding, missing data, and cell suppression. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.²Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.³Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.⁴Data for 1999–2000 are only roughly comparable to data for later years, because the new category of two or more races was introduced in 2003–04.⁵Includes Pacific Islander.⁶Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and

those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

⁷Included under Other elementary.⁸Included under Other secondary.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

¹Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, sec-

ondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

²Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Detail may not sum to totals because of rounding and cell suppression.

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificates of advanced graduate studies.

²Data may sum to more than 100 percent because (1) a teacher who reported more than one major is represented in more than one field of study and (2) a teacher with multiple degrees in different fields of study is represented in more than one field of study.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

#Rounds to zero.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

±Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

¹For 2003–04, combined schools are included in the total but not shown separately.

NOTE: Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12, and none of grades kindergarten through grade 6. Combined schools have both elementary and secondary grades, or have all students in ungraded classrooms.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

¹Includes retirement pension funds paid during the school year.

²Includes compensation for extracurricular or additional activities such as coaching, student activity sponsorship, or teaching evening classes.

³Includes teaching summer sessions and other non-teaching jobs at any school.

⁴Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificates of advanced graduate studies.

⁵Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and missing values in cells with too few cases to report.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File" and "Private School Teacher Data File," 2011–12. (This table was prepared May 2013.)

‡Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Includes teachers with levels of education below the bachelor's degree (not shown separately).

²Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

¹The average monetary remuneration earned by FTE employees across all industries in a given year, including wages, salaries, commissions, tips, bonuses, voluntary employee contributions to certain deferred compensation plans, and receipts in kind that represent income. Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.

²Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics,

U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

¹Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.
NOTE: Some data have been revised from previously published figures. Standard errors are not

available for these estimates, which are based on state reports.
SOURCE: National Education Association, *Estimates of School Statistics*, 1969–70 through 2012–13. (This table was prepared April 2013.)

Table 212.10. Number, highest degree, average years of experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: 1993–94, 2003–04, and 2011–12

[Standard errors appear in parentheses]

†Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Counts of principals in this table differ from totals appearing in some other tables because this table reflects counts of full- and part-time principals, while other counts of principals are reported as full-time equivalents.²Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. Excludes principals reporting a salary of \$0.³Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.⁴Data include Pacific Islanders.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

—Not available.

¹Includes school district administrative support staff, school and library support staff, student support staff, and other support services staff.

²Because of classification revisions, categories other than teachers, principals, librarians, and guidance counselors are only roughly comparable to figures for years after 1980.

³Data included in column 8.

NOTE: Data for 1949–50 through 1969–70 are cumulative for the entire school year, rather than counts as of the fall of the year. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

¹Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools.

²Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.

³Data for most years prior to 1976–77 are partly estimated. Prior to 1995–96, excludes schools with highest grade of kindergarten.

⁴Includes regular schools and special schools not classified by grade span.

⁵Includes elementary, secondary, and combined elementary/secondary schools.

⁶These data cannot be compared directly with the data for years after 1980–81.

⁷Because of expanded survey coverage, data are not directly comparable with figures after 1983–84.

†Not applicable.

NOTE: Size not reported (column 11) includes school districts reporting enrollment of zero. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment totals

differ from other tables because this table represents data reported by regular school districts rather than states or schools. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 1979–80 through 2011–12. (This table was prepared August 2013.)

¹Regular school districts include both independent districts and those that are a dependent segment of a local government. Also includes components of supervisory unions that operate schools, but share superintendent services with other districts.

²New York City counted as one school district.

#Rounds to zero.

¹Located inside an urbanized area and inside a principal city with a population of at least 250,000.²Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.³Located inside an urbanized area and inside a principal city with a population less than 100,000.⁴Located inside an urbanized area and outside a principal city with a population of 250,000 or more.⁵Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.⁶Located inside an urbanized area and outside a principal city with a population less than 100,000.⁷Located inside an urban cluster that is 10 miles or less from an urbanized area.⁸Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.⁹Located inside an urban cluster that is more than 35 miles from an urbanized area.¹⁰Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.¹¹Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.¹²Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.¹³Average for schools reporting enrollment. Enrollment data were available for 94,820 out of 98,706 schools in 2008–09, 95,222 out of 98,817 schools in 2009–10, 95,111 out of 98,817 schools in 2010–11, and 94,743 out of 98,328 schools in 2011–12.¹⁴Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.¹⁵Data are based on locales of school districts rather than locales of schools as in the rest of the table. Includes imputed data for California and Vermont.

NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Enrollment and ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states. Some data have been revised from previously published figures.

†Not applicable.

#Rounds to zero.

¹Percentages are for those schools that reported on free and reduced-price lunch eligibility.

²The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.

³Includes regular diplomas only.

⁴Total for districts reporting data.

⁵Reported data indicated an averaged freshman graduation rate of greater than 100.0 percent.

⁶Number of teachers based on data reported through the "Public Elementary/Secondary School Universe Survey."

NOTE: Total enrollment, staff, and teacher data in this table reflect totals reported by school districts and may differ from data derived from summing school-level data to school district aggregates. ISD = independent school district. CSD = consolidated independent school district. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2011–12; "Local Education Agency Universe Survey," 1990–91, 2000–01, 2010–11, and 2011–12; and "Local Education Agency-Level Public-Use Data File on Public School Dropouts: School Year 2008–09." (This table was prepared April 2014.)

Table 215.20. Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2010–11 and fiscal year 2013

Name of district	State	Revenues by source of funds, 2010–11 (in thousands of current dollars)				Percentage distribution of revenues, 2010–11				Expenditures, 2010–11 (in thousands of current dollars)					Poverty rate of 5- to 17-year-olds, 2012 ¹	Current expenditure per pupil, ² 2010–11 (in current dollars)	Title I allocations, fiscal year 2013	
		Total	Federal	State	Local	Total	Federal	State	Local	Total ⁵	Current expenditures		Capital outlay	Interest on school debt			(in thousands of current dollars)	Per poverty child ⁴ (in current dollars)

[†]Not applicable.

¹Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds, see <http://www.census.gov/hhes/www/poverty/data/threshld>.

²Current expenditure per pupil based on fall enrollment collected through the "Local Education Agency (School District) Finance Survey (Form F-33)."

³Fiscal year 2013 Department of Education funds available for spending by school districts beginning with the 2013–14 school year.

⁴Fiscal year 2013 Department of Education funds available for spending by school districts beginning with the 2013–14 school year divided by number of poverty children in 2012.

⁵Includes other expenditures not shown separately.

⁶Includes data for both Modesto City Elementary and Modesto City High.

NOTE: Detail may not sum to totals because of rounding. ISD = independent school district. CISD = consolidated independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2011–12; "Local Education Agency (School District) Finance Survey (F33)," 2010–11; and unpublished Department of Education budget data. (This table was prepared May 2014.)

Table 215.30. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2011: Selected years, 2010–11 through 2013—Continued

¹Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds, see <http://www.census.gov/hhes/www/poverty/data/threshld/>.

²Fiscal year 2013 Department of Education funds available for spending by school districts in the 2013–14 school year.

³Federal revenue per student is based on fall enrollment collected through the "Local Education Agency (School District) Finance Survey (F33)."

NOTE: Detail may not sum to totals because of rounding. ISD = independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2011–12; "Local Education Agency (School District) Finance Survey (F33)," 2010–11; and unpublished Department of Education budget data. U.S. Department of Commerce, Census Bureau, Small Area Income and Poverty Estimates (SAIPE) Program, 2012 Poverty Estimates for School Districts. (This table was prepared May 2014.)

¹Includes special education, alternative, and other schools not reported by grade span.

²Includes schools beginning with grade 6 or below and ending with grade 9 or above.

³Includes schools beginning with grade 6 or below and with no grade higher than 8.

⁴Includes schools with grade spans beginning with 4, 5, or 6 and ending with 6, 7, or 8.

⁵Includes schools with no grade lower than 7.

⁶Includes schools with grades 7 and 8 or grades 7 through 9.

⁷Because of revision in data collection procedures, figures not comparable to data for other years.

¹Data for 2010 include imputations for teachers in California and Vermont.

²Includes schools beginning with grade 6 or below and with no grade higher than 8.

³Includes schools with no grade lower than 7.

⁴Includes schools beginning with grade 6 or below and ending with grade 9 or above.

⁵The National School Lunch Program is a federally assisted meal program. To be eligible for free lunch under the program, a student must be from a household with an income at or below 130 percent of the poverty threshold; to be eligible for reduced-price lunch, a student

must be from a household with an income between 130 percent and 185 percent of the poverty threshold.

NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1999–2000 through 2011–12. (This table was prepared March 2014.)

#Rounds to zero.

¹Totals differ from those reported in other tables because this table represents data reported by schools rather than by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.

²Includes elementary, secondary, combined elementary/secondary, and other schools.

³Includes schools beginning with grade 6 or below and with no grade higher than 8.

⁴Includes schools with no grade lower than 7.

⁵Includes schools beginning with grade 6 or below and ending with grade 9 or above.

⁶Includes special education, alternative, and other schools not reported by grade span.

⁷Excludes special education schools, vocational schools, and alternative schools.

⁸Data are for schools reporting enrollments greater than zero. Enrollments greater than zero were reported for 95,178 out of 98,817 schools in 2009–10, 95,111 out of 98,817 in 2010–11, and 94,743 out of 98,328 in 2011–12.

NOTE: Detail may not sum to totals because of rounding.

¹Includes data for two or more races reported by 5 states in 2008 and by 14 states in 2009. NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not

reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey", 1995–96 through 2011–12. (This table was prepared September 2013.)

Table 216.55. Number and percentage distribution of public elementary and secondary school students, by percentage of student's racial/ethnic group enrolled in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2011

Racial/ethnic group	Number of students in each racial/ethnic group, by percent of that racial/ethnic group in the school							Percentage distribution of students in each racial/ethnic group, by percent of that racial/ethnic group in the school						
	Total	Less than 10 percent of group	10 to 24 percent of group	25 to 49 percent of group	50 to 74 percent of group	75 to 89 percent of group	90 percent or more of group	Total	Less than 10 percent of group	10 to 24 percent of group	25 to 49 percent of group	50 to 74 percent of group	75 to 89 percent of group	90 percent or more of group

NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

¹Includes students enrolled in schools that did not report free or reduced-price lunch eligibility.

²Excludes 9,583 students whose race/ethnicity was not available. Includes students who attended combined elementary/secondary schools and schools not reported by grade span, which are not shown separately.

³Combined elementary/secondary schools and schools not reported by grade span are not shown separately.

⁴Includes schools beginning with grade 6 or below and with no grade higher than 8.

⁵Includes schools with no grade lower than 7.

NOTE: The National School Lunch Program is a federally assisted meal program. To be eligible for free lunch under the program, a student must be from a household with an income at or below 130 percent of the poverty threshold; to be eligible for reduced-price lunch, a student must be from a household with an income between 130 percent and 185 percent of the poverty threshold. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

¹Excludes vocational, special education, and alternative schools.

²Vocational schools are also included under appropriate grade span. Includes vocational schools not classified as secondary schools.

³Average for schools reporting enrollment data. Enrollment data were available for 22,753 out of 24,357 public secondary schools in 2011–12.

NOTE: Includes schools with no grade lower than 7. Excludes schools not reported by grade level, such as some special education schools for the disabled. DoD = Department of Defense.

—Not available.

¹Includes schools that provide nontraditional education, address needs of students that typically cannot be met in regular schools, serve as adjuncts to regular schools, or fall outside the categories of regular, special education, or vocational education.

²Includes schools beginning with grade 6 or below and with no grade higher than 8.

³Includes schools with no grade lower than 7.

⁴Includes schools beginning with grade 6 or below and ending with grade 9 or above.

⁵Charter schools are also included under the school level and type categories, as appropriate.

NOTE: This table indicates the school year by which the school no longer operated (generally it closed between that school year and the prior school year). The closure of a school does not necessarily mean that a building is no longer used for educational purposes. A single school may share a building with another school, or one school may be housed in several buildings.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Excludes special education, vocational, and alternative schools; schools without enrollment data; and schools offering only preprimary education.²The functional age of the main instructional building is the number of years since its most recent major renovation or since its construction if no major renovation has ever occurred.³Based on schools whose main instructional building has undergone a major renovation.⁴Based on the 99 percent of public schools with permanent buildings.⁵Based on schools with the specified environmental factor in their permanent buildings. Includes ratings of "unsatisfactory" and "very unsatisfactory."⁶Based on the 31 percent of public schools with portable (temporary) buildings.⁷Based on schools with the specified environmental factor in their portable (temporary) buildings. Includes ratings of "unsatisfactory" and "very unsatisfactory."

NOTE: Detail may not sum to totals because of rounding.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Life safety features include sprinklers, fire alarms, and smoke detectors.

NOTE: Percentage of schools with major repair, renovation, or replacement plans is based on schools having the specified building system or feature. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Data for combined schools are included in the totals and in analyses by other school characteristics, but are not shown separately.²Due to definitional changes for community type, estimates for years prior to 2005 may not be directly comparable with estimates for later years.³Free or reduced-price lunch information was obtained on the questionnaire and supplemented, if necessary, with data from the Common Core of Data (CCD).⁴Includes computers used for instructional or administrative purposes.⁵In 2008, instructional rooms included classrooms only and excluded computer labs and library/media centers. Prior to 2008, instructional rooms included classrooms, computer labs and other labs, library/media centers, and other rooms used for instructional purposes.⁶Some data differ slightly (e.g., by 1 percent) from previously published figures.

NOTE: Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Based on students regularly enrolled in the districts. Enrollments may include duplicated counts of students, since districts were instructed to count a student enrolled in multiple courses for each course in which he or she was enrolled.

²Combined or ungraded schools are those in which the grades offered in the school span both elementary and secondary grades or that are not divided into grade levels.

NOTE: Percentages are based on unrounded numbers. For the 2002–03 FRSS study sample, there were 3 cases for which district enrollment size was missing and 112 cases for which poverty concentration was missing. For the 2004–05 FRSS study sample, there were 7 cases for which district enrollment size was missing and 103 cases for which poverty concentration was missing. Detail may not sum to totals because of rounding or missing data.

¹Includes graduates of public and private schools.²Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates from high schools that failed to report to the Office of Education. Includes estimates for jurisdictions not reporting counts of graduates by sex.³The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity.⁴Derived from Current Population Reports, Series P-25. For years 1869–70 through 1989–90, 17-year-old population is an estimate of the October 17-year-old population based on July data. Data for 1990–91 and later years are October resident population estimates prepared by the Census Bureau.⁵Estimated.⁶Includes imputations for nonreporting states.⁷Projected by private schools responding to the Private School Universe Survey.⁸Includes estimates for public schools in New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.⁹Includes estimate for Connecticut, which did not report graduates by sex.¹⁰Projected by NCES.NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. ¹U.S. total includes estimates for nonreporting states.

²Estimated high school graduates from NCES 2011–312, *Public School Graduates and Dropouts from the Common Core of Data: School Year 2008–09*.

³Beginning in 1989–90, graduates from adult programs are excluded.

⁴Projected data from NCES 2009–062, *Projections of Education Statistics to 2018*.

⁵Includes 1,161 graduates in 2007–08 and 1,169 graduates in 2008–09 from private high schools that received a majority of their funding from public sources.

⁶Projected data from NCES 91–490, *Projections of Education Statistics to 2002*.

NOTE: Data include regular diploma recipients, but exclude students receiving a certificate of attendance and persons receiving high school equivalency certificates. DoD = Department of Defense. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

¹Data on students of two or more races were not reported by all states; therefore, the data are not comparable to figures for 2010–11 and later years.

²Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2007–08, data on students of two or more races were not collected separately. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

¹Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

²U.S. total includes estimates for nonreporting states.

³Estimated high school graduates from NCES 2011-312, *Public School Graduates and Dropouts From the Common Core of Data: School Year 2008–09*.

⁴Projected high school graduates from NCES 2009-062, *Projections of Education Statistics to 2018*.

⁵Includes 1,161 graduates in 2007–08 and 1,169 graduates in 2008–09 from private high schools that received a majority of their funding from public sources.

⁶Includes 1,419 fall 2006 9th-graders who attended publicly funded private schools that were not reported in the 2006–07 Common Core of Data, but were reported in data for later years.

⁷Estimated high school graduates from NCES 2006-606rev, *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*.

NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2007–08; "State Dropout and Completion Data File," 2005–06 through 2009–10; *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*; *Public School Graduates and Dropouts From the Common Core of Data, 2007–08 and 2008–09*; and *Projections of Education Statistics to 2018*. (This table was prepared October 2012.)

—Not available.

†Not applicable. AFGR could not be calculated because applicable enrollment was zero.

¹The AFGR provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.

²AFGR data were imputed based on prior year rates.

³Includes 1,419 fall 2006 9th-graders who attended publicly funded private schools that were not reported in the 2006–07 Common Core of Data, but were reported in data for later years.

Of these 1,419 students, 15 were American Indian/Alaska Native, 24 were Asian/Pacific Islander, 9 were Hispanic, 20 were Black, and 1,351 were White.

NOTE: Includes only graduates for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. DoD stands for Department of Defense.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Dropout and Completion Data File," 2009–10; and "State Nonfiscal Survey of Public Elementary/Secondary Education," 2005–06, 2006–07, and 2007–08. (This table was prepared November 2012.)

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Data were imputed based on prior year rates.

NOTE: Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of

school between one October and the next. Enrollment and dropout data for ungraded students were prorated into grades 9 through 12 based on the counts for graded students. DoD stands for Department of Defense.

—Not available.

¹Age data for 1988 and prior years are for all test takers and may not be comparable to data for later years. For 1989 and later years, age data are only for test passers. The less than 1 percent of people who failed to report their date of birth—245 of the 401,388 test passers in 2012—were excluded from the calculation.

²All people taking the GED tests (one or more subtests).

³People completing the entire GED battery of five tests.

⁴Data for 2002 and later years are for people passing the GED tests (i.e., earning both a passing total score on the test battery and a passing score on each individual test). Data for 2001 and prior years are for high school equivalency credentials issued by the states to GED test passers. In order to receive high school equivalency credentials in some states, GED test passers must meet additional state requirements (e.g., complete an approved course in civics or government).

⁵Includes other jurisdictions, such as Puerto Rico, Guam, and American Samoa.

⁶For 1988 and prior years, 19-year-olds are included with the 16- to 18-year-olds instead of the 19- to 24-year-olds.

⁷A revised GED test was introduced in 2002. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002.

NOTE: Data are for the United States only and exclude other jurisdictions, except where noted. Detail may not sum to totals because of rounding.

SOURCE: American Council on Education, General Educational Development Testing Service, the GED annual *Statistical Report*, 1971 through 1992; *Who Took the GED?* 1993 through 2001; *Who Passed the GED Tests?* 2002 through 2005; and *GED Testing Program Statistical Report*, 2006 through 2012, retrieved July 15, 2013, from <http://www.gedtesting-service.com/educators/historical-testing-data>. —Not available.

†Not applicable.

¹Includes other racial/ethnic categories not separately shown.

²Based on the April 1960 decennial census.

³For 1967 through 1971, White and Black include persons of Hispanic ethnicity.

⁴Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

⁵White and Black exclude persons identifying themselves as two or more races.

⁶Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2012. (This table was prepared May 2013.)

Table 219.75. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and years of school completed: 1970 through 2012

[Standard errors appear in parentheses]

Year	Status dropout rate	Status dropout rate, by family income quartile				Percentage distribution of status dropouts, by labor force status				Percentage distribution of status dropouts, by years of school completed				
		Lowest quartile	Middle low quartile	Middle high quartile	Highest quartile	Total	Employed ¹	Unemployed	Not in labor force	Total	Less than 9 years	9 years	10 years	11 or 12 years

†Not applicable.

¹Includes persons who were employed but not at work during the survey week.

²Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

³Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2012. (This table was prepared May 2013.)

Table 219.80. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate) and number of status dropouts, by noninstitutionalized or institutionalized status, birth in or outside of the United States, and selected characteristics: 2010 and 2011

[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Persons living in households as well as persons living in noninstitutionalized group quarters. Noninstitutionalized group quarters include college and university housing, military quarters, facilities for workers and religious groups, and temporary shelters for the homeless.²Persons living in institutionalized group quarters, including adult and juvenile correctional facilities, nursing facilities, and other health care facilities.³United States refers to the 50 states and the District of Columbia.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school and whether they ever attended school in the United States. People who have received GED credentials are counted as high school completers. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Status dropout rates in this table may differ from those in tables based on the Current Population Survey (CPS) because of differences in survey design and target populations.

†Not applicable.

¹Students may exit special education services due to maximum age beginning at age 18 depending on state law or practice or order of any court.

²"Dropped out" is defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit for any of the other reasons described. Includes students previously categorized as "moved, not known to continue."

³Transferred to regular education" was previously labeled "no longer receives special education."

⁴"Moved, known to be continuing" is the total number of students who moved out of the administrative area or transferred to another district and are known to be continuing in an educational program.

⁵Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

NOTE: Data are for the 50 states, the District of Columbia, and the Bureau of Indian Education schools. Detail may not sum to totals because of rounding.

†Not applicable.

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

²Based on assessments collected using the Bayley Short Form Research Edition (BSF-R), a shortened field method of administering the Bayley Scales of Infant Development-II (BSID-II) (Bayley 1993). The scores are fully equated with the BSID-II; for more information, see NCES's *Early Childhood Longitudinal Study, Birth Cohort (ECLS-B) Psychometric Report for the 2-year Data Collection*. The proficiency probabilities indicate mastery of a specific skill or ability within cognitive or physical domains.

³Ability to explore objects, for example, reaching for and holding objects. The child may have no specific purpose except to play or discover.

⁴Ability to explore objects with a purpose, such as to explore a bell to understand the source of the sound.

⁵Measures proficiency in communication through diverse nonverbal sounds and gestures, such as vowel and vowel-consonant sounds.

⁶Measures proficiency in engaging in early problem solving, such as using a tool to reach an out-of-reach toy or locating a hidden toy.

⁷Measures proficiency in early communication skills, such as saying simple words like "mama" and "dada."

⁸Measures proficiency in being able to use visual tracking to guide hand movements to pick up a small object.

⁹Measures proficiency in ability to maintain control of the muscles used in sitting with and without support.

¹⁰Measures proficiency in ability to engage in various prewalking types of mobility, with and without support, such as shifting weight from one foot to the other.

¹¹Measures proficiency in ability to walk with help and to stand independently.

¹²Measures proficiency in being able to walk independently.

¹³Measures proficiency in ability to maintain balance while changing position.

¹⁴The type of nonparental care in which the child spent the most hours.

¹⁵Care provided in the child's home or in another private home by a relative (excluding parents).

¹⁶Care provided in the child's home or in another private home by a person unrelated to the child.

¹⁷Care provided in places such as early learning centers, nursery schools, and preschools.

¹⁸Children who spent an equal amount of time in each of two or more types of arrangements.

¹⁹Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

²⁰Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.

NOTE: Estimates weighted by W1C0. This table is based on a survey that sampled children born in 2001 and was designed to collect information about them for the first time when the children were about 9 months of age (i.e., 8 to 10 months). As shown in the table, some children were older than this at the time data were collected, although only 6.5 percent were over 13 months of age. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Weighted distribution of Early Childhood Longitudinal Study, Birth Cohort survey population between 22 and 25 months of age.

²Based on assessments collected using the Bayley Short Form Research Edition (BSF-R), a shortened field method of administering the Bayley Scales of Infant Development-II (BSID-II) (Bayley 1993). The scores are fully equated with the BSID-II; for more information, see NCES's *Early Childhood Longitudinal Study, Birth Cohort (ECLS-B) Psychometric Report for the 2-year Data Collection*. The proficiency probabilities indicate mastery of a specific skill or ability within cognitive or physical domains.

³Attachment was measured by trained observers using the Toddler Attachment Sort-45 Item (TAS-45) assessment. The formation of secure attachments in early childhood is an indicator that the child is able to use the parent as a secure base from which to explore novel stimuli in the environment freely and acquire a sense of self-confidence and adaptability to new and challenging situations. Other possible attachment classifications were avoidant, ambivalent, and disorganized/disoriented.

⁴Ability to recognize and understand spoken words or to indicate a named object by pointing.

⁵Verbal expressiveness using gestures, words, and sentences.

⁶Ability to understand actions depicted by a story, in pictures, or by verbal instructions.

⁷Ability to match objects by their properties (e.g., color) or differentiate one object from another.

⁸Knowledge of counting words, knowledge of ordinality, and understanding of simple quantities.

⁹Ability to walk independently.

¹⁰Ability to maintain balance when changing position.

¹¹Ability to use fine motor control with hands, such as grasping a pencil or holding a piece of paper while scribbling.

¹²Ability to walk up and down stairs, with or without alternating feet.

¹³Ability to maintain balance when changing position or when in motion, such as jumping.

¹⁴Ability to anticipate, regulate, and execute motor movements, such as being able to replicate the motions of others.

¹⁵The type of nonparental care in which the child spent the most hours.

¹⁶Care provided in the child's home or in another private home by a relative (excluding parents).

¹⁷Care provided in the child's home or in another private home by a person unrelated to the child.

¹⁸Care provided in places such as early learning centers, nursery schools, and preschools.

¹⁹Children who spent an equal amount of time in each of two or more types of arrangements.

²⁰Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

²¹Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.

NOTE: Estimates weighted by W2R0. Estimates pertain to sample of children born in 2001 and assessed between 22 months and 25 months of age. Children younger than 22 months (less than 1 percent of the survey population) and children older than 25 months (approximately 9 percent of the survey population) are excluded from this table. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.

†Not applicable.

¹Reflects performance on language and literacy items (e.g., conventions of print, letter recognition, understanding of letter-sound relationships, phonological awareness, sight word recognition, and understanding words in the context of simple sentences). Potential score ranges from 0 to 85.²Verbal expressiveness using gestures, words, and sentences. Potential score ranges from 0 to 5.³Includes number sense, geometry, counting, operations, and patterns. Potential score ranges from 0 to 71.⁴Percentage of children who scored 10 on a test with a potential score range of 0 to 10. These children were able to name the colors of five pictured objects (2 points per correct answer).⁵Measures the ability to use fine motor skills in drawing basic forms and shapes. Potential score ranges from 0 to 7.⁶Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.⁷The type of nonparental care in which the child spent the most hours.⁸Care provided in the child's home or in another private home by a relative (excluding parents).⁹Care provided in the child's home or in another private home by a person unrelated to the child.¹⁰Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.¹¹Children who spent an equal amount of time in each of two or more types of arrangements.¹²Poverty status based on Census Bureau guidelines from 2005, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2005, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$19,971.

NOTE: Estimates weighted by W3R0. Estimates pertain to a sample of children who were born in 2001. This table was designed to present data collected when the children were about 4 years of age (i.e., 48 to 57 months old). As shown in the table, some children were younger or older than this at the time data were collected, although 75 percent were within the target age range. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort (ECLS-B), Longitudinal 9-Month–Kindergarten 2007 Restricted-Use Data File. (This table was prepared December 2010.)

†Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Reflects performance on questions measuring basic skills (print familiarity, letter recognition, beginning and ending sounds, rhyming words, and word recognition), vocabulary knowledge, and reading comprehension (including locate/recall questions, integrate/interpret questions, and critique/evaluate questions about text the children were asked to read). Actual scores for all kindergartners range from 6 to 83.

²Reflects performance on questions on number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics, and probability (measured with a set of simple questions assessing children's ability to read a graph); and prealgebra skills such as identification of patterns. Actual scores for all kindergartners range from 5 to 75.

³Science was assessed only in the spring of kindergarten. Reflects performance on questions on physical sciences, life sciences, environmental sciences, and scientific inquiry. Actual scores for all kindergartners range from 4 to 18.

⁴To measure cognitive flexibility, children were administered the Dimensional Change Card Sort (DCCS) (developed by Philip Zelazo in 2006). Children were asked to sort a series of cards into one of two trays according to different rules (e.g., by color, by shape). Actual scores for all kindergartners range from 0 to 12.

⁵The approaches to learning scale is based on teachers' reports on how students rate in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, flexibility, organization, and ability to follow classroom rules. Actual scores for all kindergartners range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often.

⁶The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.

⁷Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.

⁸Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

⁹Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010.

¹⁰Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.

NOTE: Estimates weighted by W1_2P0. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010–11 school year. Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes students with missing kindergarten entry status information.

²A child who enrolled in kindergarten for the first time in 2010–11 is classified as an early, on-time, or delayed kindergarten entrant depending on whether the parent reported enrolling the child early, enrolling the child when he or she was old enough, or waiting until the child was older relative to school guidelines about when children can start school based on their birth date. A child is classified as a kindergarten repeater if the parent reported that 2010–11 was the child's second (or third or more) year of kindergarten.

³Most of the children first entered kindergarten in 2010–11, but the children who were repeating kindergarten in 2010–11—that is, the "Kindergarten repeaters" shown in column 8—had first entered kindergarten in an earlier school year.

⁴The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.

⁵Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.

⁶Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

⁷Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010.

⁸Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.

NOTE: Estimates weighted by W1_2P0. Estimates pertain to a sample of children who were enrolled in kindergarten in the 2010–11 school year. Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

¹Includes students with missing kindergarten entry status information.

²A child who enrolled in kindergarten for the first time in 2010–11 is classified as an early, on-time, or delayed kindergarten entrant depending on whether the parent reported enrolling the child early, enrolling the child when he or she was old enough, or waiting until the child was older relative to school guidelines about when children can start school based on their birth date. A child is classified as a kindergarten repeater if the parent reported that 2010–11 was the child's second (or third or more) year of kindergarten.

³Reflects performance on questions measuring basic skills (print familiarity, letter recognition, beginning and ending sounds, rhyming words, and word recognition), vocabulary knowledge, and reading comprehension (including locate/recall questions, integrate/interpret questions, and critique/evaluate questions about text the children were asked to read). Actual scores for all kindergartners range from 6 to 83.

⁴Reflects performance on questions on number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics, and probability (measured with a set of simple questions assessing children's ability to read a graph); and prealgebra skills such as identification of patterns. Actual scores for all kindergartners range from 5 to 75.

⁵Science was assessed only in the spring of kindergarten. Reflects performance on questions on physical sciences, life sciences, environmental sciences, and scientific inquiry. Actual scores for all kindergartners range from 4 to 18.

⁶To measure cognitive flexibility, children were administered the Dimensional Change Card Sort (DCCS) (developed by Philip Zelazo in 2006). Children were asked to sort a series of cards into one of two trays according to different rules (e.g., by color, by shape). Actual scores for all kindergartners range from 0 to 12.

⁷The approaches to learning scale is based on teachers' reports on how students rate in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, flexibility, organization, and ability to follow classroom rules. Actual scores for all kindergartners range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often.

NOTE: Estimates weighted by W1_2P0. Estimates pertain to a sample of children who were enrolled in kindergarten in the 2010–11 school year.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Includes persons of all other races and two or more races.

²Status during kindergarten year.

NOTE: Reading scale ranges from 0 to 209. Estimates for each assessment round include all children assessed in English in that round, even if they were not assessed in English in a previous round. In fall 1998, 8 percent of the kindergarten sample was not administered the English battery because of nonpassing scores on the OLDS (Oral Language Development Scale) English proficiency assessment. By spring of first grade, this percentage had decreased to 2 percent. In the third grade and subsequent years, the OLDS was not administered and all children were assessed in English. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third

grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade, ungraded classrooms); most were in eighth grade in 2006–07, but 14 percent were in seventh grade or other grades (e.g., ninth grade or ungraded classrooms). Data were calculated using C1_7FC0 weight. Estimates differ from previously published figures because the data were recalibrated to represent the kindergarten through eighth-grade reading assessment item pool. Race categories exclude persons of Hispanic ethnicity.

¹Includes persons of all other races and two or more races.²Status during kindergarten year.

NOTE: Mathematics scale ranges from 0 to 172, and science scale ranges from 0 to 108. Estimates for each assessment round include all children assessed in that round, including children assessed in Spanish. In kindergarten and first grade, the mathematics assessment was administered in Spanish for Spanish-speaking children who did not pass the English OLDS (Oral Language Development Scale). All assessments were administered in English in third grade through eighth grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade,

ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade, ungraded classrooms); most were in eighth grade in 2006–07, but 14 percent were in seventh grade or other grades (e.g., ninth grade or ungraded classrooms). Data were calculated using C1_7FC0 weight. Estimates differ from previously published figures because the data were recalibrated to represent the kindergarten through eighth-grade mathematics assessment item pool and the third-grade through eighth-grade science assessment item pool. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 1998–99 (ECLS-K), Longitudinal Kindergarten–Eighth Grade Full Sample Public-Use Data File, fall 1998, spring 1999, spring 2000, spring 2002, spring 2004, and spring 2007. (This table was prepared September 2009.)

‡Reporting standards not met (too few cases for a reliable estimate).

¹Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.²Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Includes public and private schools. Includes students tested with accommodations (1 to 11 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were

unable to be tested even with accommodations (2 to 6 percent of all students). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Grade 12 results for the 2013 NAEP Reading Assessment were not yet available at the time this table was created.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material.

NOTE: Includes public and private schools. For 1984, 1994, and 1999, accommodations were not permitted. For 2008 and later

years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 4 percent of all students, depending on age and assessment year). Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met. Participation rates fell below the required standards for reporting.

¹Scale ranges from 0 to 500.²Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.³Proficient represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.⁴Advanced signifies superior performance.⁵Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.⁶Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.⁷Did not satisfy one or more of the guidelines for school participation in 1992. Data are subject to appreciable nonresponse bias.⁸Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: With the exception of 1992, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1998, 2002, 2003, 2005, 2007, 2009, 2011, and 2013 Reading Assessments, retrieved November 8, 2013, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared November 2013.)

Table 221.50. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of 4th-grade public school students, by race/ethnicity and state: 2013

[Standard errors appear in parentheses]

†Not applicable.

#Rounds to zero.

†Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 500.

NOTE: Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and

exclusion rates vary from state to state. Race/ethnicity based on school records. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and because table does not include students classified as "Two or more races."

‡Reporting standards not met. Either there are too few cases for a reliable estimate or item response rates fell below the required standards for reporting.

¹Scale ranges from 0 to 500.

²Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.

³Proficient represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

⁴Did not satisfy one or more of the guidelines for school participation in 2003. Data are subject to appreciable nonresponse bias.

⁵Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and

overseas schools into a single jurisdiction. Data shown in this table for 2003 were recalculated for comparability.

NOTE: Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.

†Not applicable.

#Rounds to zero.

†Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 500.

²Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

³Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: The results for English language learners are based on students who were assessed and cannot be generalized to the total population of such students. Although testing accommodations were permitted, some English language learners did not have a sufficient level of English proficiency to participate in the 2013 Reading Assessment.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2013 Reading Assessment, retrieved November 8, 2013, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared November 2013.)

Table 221.75. Average National Assessment of Educational Progress (NAEP) reading scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1992 through 2013

[Standard errors appear in parentheses]

Selected student characteristic, percentile, and grade	1992 ¹	1998	2000	2002	2003	2005	2007	2009	2011	2013		
										Total	Male	Female

†Not applicable.

¹Accommodations were not permitted for this assessment.²Scale ranges from 0 to 500.³The percentile represents a specific point on the percentage distribution of all students ranked by their reading score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.⁴The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 4th-graders in 2013 was 222, and the standard deviation was 37. This means that we would expect about two-thirds of the students to have scores between 259 (one standard deviation above the average) and 185 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.

NOTE: Includes public and private schools. For 1998 and later years, includes students tested with accommodations (1 to 11 percent of all students, depending on grade level and

year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 6 percent of all students). On the student questionnaire, the format of the question about reading for fun on your own time changed slightly beginning with the 2002 assessment year. In 1992 through 2000, reading for fun was one of several activities included in the same question ("How often do you do each of the following?"), and the response options were listed in order from most frequent to least frequent (that is, "Almost every day" was listed first, and "Never or hardly ever" was listed last); in 2002 through 2011, reading for fun was the only activity in the question, and the order of the response options was reversed. Grade 12 results for the 2013 NAEP Reading Assessment were not yet available at the time this table was created.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1998, 2000, 2002, 2003, 2005, 2007, 2009, 2011, and 2013 Reading Assessments, retrieved November 19, 2013, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared November 2013.)

Table 221.80. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-grade public school students and percentage attaining reading achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, and 2013
[Standard errors appear in parentheses]

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 500.

²Includes data for students of two or more races, which are not separately shown.

³Basic denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at a given grade.

⁴Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Race categories exclude persons of Hispanic ethnicity. Totals include racial/ethnic groups not shown separately.

†Not applicable.

¹In 2004, two assessments were conducted—one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 12 are for the format that was used in previous assessment years, while the 2004 data in column 13 are for the revised format. In subsequent years, only the revised format was used.

²Data for 1971 include persons of Hispanic ethnicity.

³Test scores of Hispanics were not tabulated separately.

NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and

social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 5 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity, except where noted. Totals include other racial/ethnic groups not shown separately.

†Not applicable.

¹Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks.

²Students scoring 200 (or higher) are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information.

³Students scoring 250 (or higher) are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials.

⁴Students scoring 300 (or higher) are able to find, understand, summarize, and explain relatively complicated literary and informational material.

⁵Data for 1971 include persons of Hispanic ethnicity.

⁶Test scores of Hispanics were not tabulated separately.

NOTE: The NAEP reading scores have been evaluated at certain performance levels, as outlined in footnotes 1 through 4. Scale ranges from 0 to 500. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 5 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity, except where noted. Totals include other racial/ethnic groups not shown separately.

†Not applicable.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Accommodations were not permitted for this assessment.²For assessment years prior to 2011, Pacific Islander students are included with Asian students.³Because of major changes to the framework and content of the grade 12 assessment, scores from 2005 and later assessment years cannot be compared with scores from earlier assessment years. Therefore, this table does not include scores from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to comparisons between earlier years, see the *Digest of Education Statistics 2009*, table 138 (http://nces.ed.gov/programs/digest/d09/tables/dt09_138.asp).

NOTE: For the grade 4 and grade 8 assessments, scale ranges from 0 to 500. For the

grade 12 assessment, scale ranges from 0 to 300. Includes public and private schools. For 1996 and later years, includes students tested with accommodations (1 to 12 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Gaps are computed based on unrounded scores. Grade 12 results for the 2013 NAEP Mathematics Assessment were not yet available at the time this table was created.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1992, 1996, 2000, 2003, 2005, 2007, 2009, 2011, and 2013 Mathematics Assessments, retrieved November 9, 2013, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared November 2013.)

†Not applicable.

¹Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

²Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

³Because of major changes to the framework and content of the grade 12 assessment, results from 2005 and later assessment years cannot be compared with results from earlier assessment years. Therefore, this table excludes grade 12 results from 1996 and 2000.

NOTE: Includes public and private schools. Includes students tested with accommodations (1 to 12 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Grade 12 results for the 2013 NAEP Mathematics Assessment were not yet available at the time this table was created.

¹Scale ranges from 0 to 500.

NOTE: Includes public and private schools. Includes students tested with accommodations (12 percent of all 8th-grade students); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 percent of all 8th-grade students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Includes basic math, general math, applied math, prealgebra, and algebra I.

²Includes courses such as actuarial sciences, pure mathematics, discrete math, and advanced functions and modeling.

³Includes other racial/ethnic groups not shown separately, as well as students for whom information on race/ethnicity or sex was missing.

⁴SD estimates include both students with an Individualized Education Plan (IEP) and students with a plan under Section 504 of the Rehabilitation Act (a “504 plan”). IEPs are only for students who require specialized instruction, whereas 504 plans apply to students who require accommodations but may not require specialized instruction.

NOTE: Scale ranges from 0 to 300. Includes students tested with accommodations (6 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (3 percent of all 12th-graders). For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more than 0 Carnegie credits in English courses. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

¹Scale ranges from 0 to 500.

²Accommodations were not permitted for this assessment.

³The 1996 data in this table do not include students who were tested with accommodations. Data for students tested with accommodations are not available at the state level for 1996.

⁴Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.

⁵Proficient represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

⁶Advanced signifies superior performance.

⁷Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

⁸Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or item response rates fell below the required standards for reporting.

¹Data for students of two or more races are not separately shown.

²Excludes students who responded "I don't know" to the question about educational level of parents.

NOTE: Scale ranges from 0 to 500. Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language

learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2013 Mathematics Assessment, retrieved November 11, 2013, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared November 2013.)

Table 222.80. Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, and 2013
[Standard errors appear in parentheses]

Grade level and jurisdiction or specific urban district	Average reading scale score ¹											Percent of students	
	2009	2011					2013					2013

‡Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 500.

²Includes data for students of two or more races, which are not separately shown.

³Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

⁴Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Race categories exclude persons of Hispanic ethnicity. Totals include racial/ethnic groups not shown separately.

#Rounds to zero.

¹In 2004, two assessments were conducted—one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 11 are for the format that was used in previous assessment years, while the 2004 data in column 12 are for the revised format. In subsequent years, only the revised format was used.

NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) know some basic addition and subtraction facts. Students scoring 200 have a considerable understanding of two-digit numbers and know some basic multiplication and division facts. Students scoring 250 have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations. Students scoring 300 can perform reasoning and problem solving

involving fractions, decimals, percents, elementary geometry, and simple algebra. Students scoring 350 can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), *NAEP 2012 Trends in Academic Progress*; and 2012 NAEP Long-Term Trend Mathematics Assessment, retrieved August 29, 2013, from Long-Term Trend NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared August 2013.)

—Not available.

¹Students scoring 150 (or higher) know some basic addition and subtraction facts.

²Students scoring 200 (or higher) have a considerable understanding of two-digit numbers and know some basic multiplication and division facts.

³Students scoring 250 (or higher) have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations.

⁴Students scoring 300 (or higher) can perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra.

⁵Students scoring 350 (or above) can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability.

NOTE: The NAEP mathematics scores have been evaluated at certain performance levels, as outlined in footnotes 1 through 5. Scale ranges from 0 to 500. Includes public and pri-

ate schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Includes Asians/Pacific Islanders and American Indians/Alaska Natives.

NOTE: Scale ranges from 0 to 500. Students scoring 200 (or higher) have a considerable understanding of two-digit numbers and know some basic multiplication and division facts. Students scoring 250 have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations. Students scoring 300 can perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Students scoring 350 can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability.

Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 300 for all three grades, but scores cannot be compared across grades. For example, the average score of 163 for White 4th-graders does not denote higher performance than the score of 159 for White 12th-graders.

²The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

³The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 4th-graders was 150, and the standard deviation was 35. This means that we would expect about two-thirds of the students to have scores between 185 (one standard deviation above the average) and 115 (one standard deviation below). Standard errors

also must be taken into account when making comparisons of these ranges. For a discussion of standard errors, see Appendix A: Guide to Sources.

⁴Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

⁵Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

⁶Advanced signifies superior performance.

NOTE: In 2011, only 8th-grade students were assessed in science. Includes students tested with accommodations (7 to 11 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 3 percent of all students). Race categories exclude persons of Hispanic ethnicity.

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

NOTE: Scale ranges from 0 to 300. Includes students tested with accommodations (10 percent of all students in 2009 and 9 percent of all students in 2011); excludes only those students with disabilities and English language learners who were unable to be tested even with

accommodations (2 percent of all students in both years). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

¹Scale ranges from 0 to 300.

NOTE: Includes public and private schools. Includes students tested with accommodations (11 percent of all 8th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all 8th-graders). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹The educational goals columns exclude the 1 percent of students who reported that they would not finish high school and the 2 percent who reported that they did not know how much education they would complete.²Scale ranges from 0 to 300.

NOTE: Includes students tested with accommodations (7 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (3 percent of all 12th-graders). Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

#Rounds to zero.

¹Students were asked to analyze and describe aspects of music they heard, critique instrumental and vocal performances, and demonstrate their knowledge of standard musical notation and music's role in society.

²The visual arts assessment measured students' ability to respond to and create visual arts. Responding questions asked students to analyze and describe works of art and design, while creating questions required students to create works of art and design of their own.

NOTE: Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' music or visual arts proficiency). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

†Not applicable.

#Rounds to zero.

†Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 300 for all three grades, but scores cannot be compared across grades. For example, the average score of 167 for White 4th-graders in 2010 does not denote higher performance than the score of 160 for White 8th-graders.²*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.³*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.⁴*Advanced* signifies superior performance for a given grade.⁵These data are based on students' responses to questions about their parents' education level. Because the wording of the questions was different in 1998 than in the later assessment years, data from 1998 are not directly comparable to data from 2006 and 2010.

NOTE: Includes students tested with accommodations (1 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 5 percent of all students). Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Accommodations were not permitted for this assessment.

²Scale ranges from 0 to 500.

³The percentile represents a specific point on the percentage distribution of all students ranked by their geography score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

⁴The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 4th-graders in 2010 was 213, and the standard deviation was 33. This means that we would expect about two-thirds of the students to have scores between 246 (one standard deviation above the average) and 180 (one standard deviation below). Standard errors

also must be taken into account when making comparisons of these ranges. For a discussion of standard errors, see Appendix A: Guide to Sources.

⁵*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

⁶*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

⁷*Advanced* signifies superior performance.

NOTE: For 2001 and later years, includes students tested with accommodations (3 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Accommodations were not permitted for this assessment.

²Scale ranges from 0 to 500.

³The percentile represents a specific point on the percentage distribution of all students ranked by their U.S. history score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

⁴The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 4th-graders in 2010 was 214, and the standard deviation was 34. This means that we would expect about two-thirds of the students to have scores between 248 (one standard deviation above the average) and 180 (one standard deviation below). Stan-

dard errors also must be taken into account when making comparisons of these ranges. For a discussion of standard errors, see Appendix A: Guide to Sources.

⁵Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

⁶Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

⁷Advanced signifies superior performance.

NOTE: For 2001 and later years, includes students tested with accommodations (3 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 3 percent of all students). Race categories exclude persons of Hispanic ethnicity.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Scale ranges from 0 to 300.

²The percentile represents a specific point on the percentage distribution of all students ranked by their writing score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

³The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 12th-graders was 150 and the standard deviation was 35. This means that we would expect about two-thirds of the students to have scores between 185 (one standard deviation above the average) and 115 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.

⁴*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

⁵*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

⁶*Advanced* signifies superior performance.

NOTE: Writing scores from 2011 cannot be compared with writing scores from earlier assessment years. The 2011 writing assessment was developed under a new framework and is NAEP's first computer-based writing assessment. Includes public and private schools. Includes students tested with accommodations (8 percent of all 8th-graders and 7 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all students at both grades). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Includes occupational education in agriculture; business and marketing; communications and design; computer and information sciences; construction and architecture; engineering technologies; health sciences; manufacturing; repair and transportation; and personal, public, and legal services. Does not include general labor market preparation courses and family and consumer sciences education courses.²Includes general labor market preparation courses and family and consumer sciences education courses.³Includes general skills, personal health and physical education, religion, military sciences, special education, and other courses not included in other academic subject fields. Some personal-use courses are also included in the Career/technical (occupational) education column and the Labor market, family, and consumer education column.⁴Includes all science credits earned outside of biology, chemistry, and physics.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

§Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Includes Carnegie units earned in all occupational education courses. This table does not include general labor market preparation courses and family and consumer sciences education courses.

²Total includes other racial/ethnic groups not separately shown.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data may differ from figures appearing in other NCES reports because of differences in course taxonomies and/or inclusion criteria. The analysis was restricted to graduates who attained either a standard or honors diploma and whose transcripts reflected a total of 16 or more Carnegie credits, with credits in English making up some part of the total. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2000, 2005, and 2009 High School Transcript Study (HSTS). (This table was prepared September 2011.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹For each course category, percentages include only students who earned at least the number of credits shown in parentheses.

²Excludes prealgebra.

³Includes courses where trigonometry or geometry has been combined with algebra II.

⁴For 2000 and later years, includes International Baccalaureate (IB) courses in addition to Advanced Placement (AP) and honors courses.

⁵Percentages include only students who earned at least one credit in each of the indicated courses.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the student graduated with either a standard or honors diploma, (2) the student's transcript contained 16 or more Carnegie units, and (3) the student's transcript contained more than 0 Carnegie units in English courses. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course (0.5 = one semester; 1.0 = one academic year). Data differ slightly from figures appearing in other National Center for Education Statistics reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate)

¹Percentages are for students who earned at least one Carnegie credit.

²Excludes prealgebra.

³Percentages are for students who earned at least one-half of a Carnegie credit in a course that includes a focus on at least one of the listed content areas.

⁴Percentages are for students who earned at least one Carnegie credit each in biology and chemistry.

⁵Percentages are for students who earned at least one Carnegie credit each in biology, chemistry, and physics.

⁶Includes other racial/ethnic groups not shown separately, as well as students for whom information on race/ethnicity or sex was missing.

⁷SD data include both students with an Individualized Education Plan (IEP) and students with a plan under Section 504 of the Rehabilitation Act (a "504 plan"). IEPs are only for students who require specialized instruction, whereas 504 plans apply to students who require accommodations but may not require specialized instruction.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more than 0 Carnegie credits in English courses. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Eng = English; SS = social studies; Sci = science; and FL = foreign language.

²Totals include other racial/ethnic groups not separately shown.

³In 1983, the National Commission on Excellence in Education recommended that all college-bound high school students take these courses plus 0.5 credits of computer science as a minimum.

NOTE: Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Dual credit courses are those in which high school students can earn both high school and postsecondary credits for the same course. For 2009, includes some courses for which college credits were conditional upon the student meeting additional requirements. For example, one school offered a consumer economics course for which the student earned college credits only if the student later attended that college and took an advanced consumer economics course there. If the student did not attend that college and take the advanced course, then no college credits would be earned for the course (only high school credits would be earned). In 2009, such conditional college credit courses made up an unweighted 15 percent of the dual credit courses in the sample.

²Credits are shown in Carnegie units. The Carnegie unit is a standard unit of measurement that represents one credit for the completion of a 1-year course.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate graduated with either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more than 0 Carnegie credits in English courses. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Percentages are based on unrounded numbers. Each student is counted only once in each column, regardless of the number of courses taken. Students are counted only once in the total columns even if they earned credits in more than one category—e.g., a student may take both AP courses and dual credit courses, or a single course may fall into both the AP and the dual credit categories. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Includes children enrolled in kindergarten through grade 12. Excludes children whose programs have no classes with lettered grades. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

NOTE: Data for 2009–10 and earlier years are for seniors who took the SAT any time during their high school years through March of their senior year. Data for 2010–11 onwards are for seniors who took the SAT any time during their high school years through June of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known

as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section. The writing section was introduced in March 2005.

†Not applicable.

¹Data for 1966–67 to 1985–86 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1986–87 to 1994–95, individual student scores were converted to the recentered scale and then the mean was recomputed. For 1995–96 to 1998–99, nearly all students received scores on the recentered scale; any score on the original scale was converted to the recentered scale prior to recomputing the mean. From 1999–2000 on, all scores have been reported on the recentered scale.

²Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

NOTE: Data for 1966–67 through 1970–71 are estimates derived from the test scores of all participants. Data for 1971–72 through 2009–10 are for seniors who took the SAT any time

during their high school years through March of their senior year. Data for 2010–11 onwards are for seniors who took the SAT any time during their high school years through June of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section.

#Rounds to zero.

¹Prior to 2006, the critical reading section was known as the verbal section.

²Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

³Beginning in 2005–06, the College Board has reported third, fourth, and fifth quintiles as the bottom three quintiles instead of reporting them separately as in previous years.

⁴Data may not be comparable over time because of additions to the list of majors and changes in subspecialties within majors.

⁵Prior to 2006–07, family and consumer sciences/human sciences was called home economics.

NOTE: Prior to 2010–11, data are for seniors who took the SAT any time during their high school years through March of their senior year. Data for 2010–11 onwards are for seniors who took the SAT any time during their high school years through June of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. Detail may not sum to totals because of rounding.

¹Participation rate is based on the projection of high school graduates by the Western Interstate Commission for Higher Education (WICHE), and the number of seniors who took the SAT in each state.

²Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

³Beginning with the spring SAT administration in 2011, the SAT tests were administered to all high school juniors attending Delaware public high schools.

⁴Beginning with the spring SAT administration in 2006, all Maine high school juniors, including all students in their third year of high school, are required to take SAT tests in critical reading, writing, and mathematics.

NOTE: Data for 2005–06 and earlier years are for seniors who took the SAT any time during their high school years through March of their senior year. Data for 2010–11 onwards

are for seniors who took the SAT any time during their high school years through June of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section.

—Not available.

¹Minimum score is 1 and maximum score is 36.

²Standard deviations not available for racial/ethnic groups.

³For years prior to 2011, includes business and management, business and office, and marketing and distribution.

⁴For years prior to 2011, includes education and teacher education.

⁵Includes engineering and engineering-related technologies.

⁶Includes social sciences and philosophy, religion, and theology. For 2011 and later years, also includes law.

NOTE: Data are for high school graduates who took the ACT during their sophomore, junior, or senior year. If a student took a test more than once, the most recent score was used. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Students could indicate that they participated in clubs, competitions, camps, study groups, or tutoring programs.²Academic instruction outside of school such as from a Saturday academy, learning center, personal tutor, or summer school program.

NOTE: Data on school-sponsored activities are based on student responses and are weighted by W1STUDENT. Student reports about school-sponsored activities refer to the period "since the beginning of the last school year," which for most of these students was 8th grade, or the fall of 2008. Data on non-school-sponsored activities are based on parent responses and are weighted by W1PARENT. Parent reports about non-school-sponsored activities refer to the last 12 months. Race categories exclude persons of Hispanic ethnicity.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quartile; the "middle" SES group is the middle two quartiles; and the "high" SES group is the upper quartile.

²Question does not specify where computer is used.

NOTE: Race categories exclude persons of Hispanic ethnicity. Total includes other racial/ethnic groups not separately shown.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Interscholastic refers to competition between teams from different schools. Intramural refers to competition between teams or students within the same school. Data on these categories are available only for 2004.²These data were not collected in 2004.³Composite test performance quartile on mathematics, reading, science, and social studies in 1990 (for 1992 seniors) and composite test performance quartile on mathematics, reading, and science in 2002 (for 2004 seniors).⁴Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Refers to one or more parent or other household adult. Only includes students who had homework outside of school.

NOTE: Includes children enrolled in kindergarten through grade 12 and ungraded students. Data based on responses of the parent most knowledgeable about the student's education. Race categories exclude persons of Hispanic ethnicity. Poverty status was

determined based on household income and family size, using weighted averages from Census poverty thresholds. In 2007, for example, households with three members were classified as poor if their income was less than or equal to \$15,000 and as non-poor if their income exceeded \$15,000. Detail may not sum to totals because of rounding. Totals include data for other racial/ethnic groups not separately shown.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003 and 2007). (This table was prepared June 2008.)

Table 227.50. Percentage of 4th-, 8th-, and 12th-graders absent from school in the last month, by selected student and school characteristics and number of days absent: 2002, 2009, and 2013
[Standard errors appear in parentheses]

¹A school-associated violent death is defined as “a homicide, suicide, or legal intervention (involving a law enforcement officer), in which the fatal injury occurred on the campus of a functioning elementary or secondary school in the United States,” while the victim was on the way to or from regular sessions at school, or while the victim was attending or traveling to or from an official school-sponsored event.

²“At school” includes on school property, on the way to or from regular sessions at school, and while attending or traveling to or from a school-sponsored event.

³Total youth suicides are reported for calendar years 1992 through 2010 (instead of school years 1992–93 through 2010–11).

⁴Data from 1999–2000 onward are subject to change until interviews with school and law enforcement officials have been completed. The details learned during the interviews can occasionally change the classification of a case.

NOTE: Unless otherwise noted, data are reported for the school year, defined as July 1 through June 30. Some data have been revised from previously published figures.

SOURCE: Centers for Disease Control and Prevention (CDC), 1992–2011 School-Associated Violent Deaths Study (SAVD) (partially funded by the U.S. Department of Education, Office of Safe and Healthy Students), previously unpublished tabulation (August 2012); CDC, National Center for Injury Prevention and Control, Web-based Injury Statistics Query and Reporting System Fatal (WISQARS™ Fatal), 1999–2010, retrieved August 2013 from <http://www.cdc.gov/injury/wisqars/index.html>; and Federal Bureau of Investigation and Bureau of Justice Statistics, Supplementary Homicide Reports (SHR), preliminary data (August 2013). (This table was prepared November 2013.)

Table 228.20. Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization, location, and year: 1992 through 2012

¹Serious violent victimization is also included in all violent victimization.

²"At school" includes inside the school building, on school property, or on the way to and from school.

³Due to methodological differences, use caution when comparing 2006 estimates to other years.

NOTE: "Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "All violent victimization" includes serious violent crimes as well as simple assault. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Total victimization" includes theft

and violent crimes. Data in this table are from the National Crime Victimization Survey (NCVS); due to differences in time coverage and administration between the NCVS and the School Crime Supplement (SCS) to the NCVS, data in this table cannot be compared with data in tables that are based on the SCS. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

!Interpret data with caution. Estimate based on 10 or fewer sample cases, or the coefficient of variation is greater than 50 percent.

‡Reporting standards not met. There are too few cases for a reliable estimate.

¹Serious violent victimization is also included under all violent victimization.

²“At school” includes inside the school building, on school property, or on the way to and from school.

³Race categories exclude persons of Hispanic ethnicity. “Other” includes Asians, Pacific Islanders, American Indians/Alaska Natives, and persons of two or more races.

⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined in 2000 by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

NOTE: “Serious violent victimization” includes the crimes of rape, sexual assault, robbery, and aggravated assault. “All violent victimization” includes serious violent crimes as well as simple assault. “Theft” includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. “Total victimization” includes theft and violent crimes. Data in this table are from the National Crime Victimization Survey (NCVS); due to differences in time coverage and administration between the NCVS and the School Crime Supplement (SCS) to the NCVS, data in this table cannot be compared with data in tables that are based on the SCS. Detail may not sum to totals because of rounding and missing data on student characteristics. The population size for students ages 12–18 was 26,052,400 in 2012.

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, National Crime Victimization Survey (NCVS), 2012. (This table was prepared August 2013.)

Table 228.30. Percentage of students ages 12–18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2011

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons reporting that they are of two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

²Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

³Serious violent victimization is also included in violent victimization.

NOTE: "Total victimization" includes theft and violent victimization. A single student could report more than one type of victimization. In the total victimization rows, students who reported both theft and violent victimization are counted only once. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "Violent victimization" includes the serious violent crimes as well as simple assault. "At school" includes the school building, on school property, on a school bus, and, from 2001 onward, going to and from school.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Race categories exclude persons of Hispanic ethnicity.

²Before 1999, Asian students and Pacific Islander students were not categorized separately, and students were not given the option of choosing two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

NOTE: “On school property” was not defined for survey respondents. “Weapon” was defined as a gun, knife, or club for survey respondents. Detail may not sum to totals because of rounding.

¹Data include both public and private schools.

NOTE: "On school property" was not defined for survey respondents. "Weapon" was defined as a gun, knife, or club for survey respondents. State-level data include public schools only,

with the exception of data for Ohio and South Dakota. Data for the United States total, Ohio, and South Dakota include both public and private schools.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2003 through 2011. (This table was prepared September 2013.)

Table 228.70. Number and percentage of public and private school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by selected teacher and school characteristics: Selected years, 1993–94 through 2011–12
[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

²Includes American Indians/Alaska Natives, Asians, and Pacific Islanders; for 2003–04 and later years, also includes persons of two or more races.

³Includes traditional public and public charter schools.

NOTE: Teachers who taught only prekindergarten students are excluded. Instructional level divides teachers into elementary or secondary based on a combination of the grades taught, main teaching assignment, and the structure of the teachers' class(es). Please see the glossary for a more detailed definition. Race categories exclude persons of Hispanic ethnicity. Please see the glossary for a more detailed definition. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes traditional public and public charter schools. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as “the unlawful taking of another person’s property without personal confrontation, threat, violence, or bodily harm.” This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

²Caution should be used when making direct comparisons of “Other incidents” between years because the survey questions about alcohol and drugs changed, as outlined in footnotes 3, 4, and 5.

³The survey items “Distribution of illegal drugs” and “Possession or use of alcohol or illegal drugs” appear only on the 1999–2000 and 2003–04 questionnaires. Different alcohol- and drug-related survey items were used on the questionnaires for later years.

⁴The survey items “Distribution, possession, or use of illegal drugs” and “Distribution, possession, or use of alcohol” appear only on the questionnaires for 2005–06 and later years.

⁵The 2009–10 questionnaire was the first to include the survey item “Inappropriate distribution, possession, or use of prescription drugs.”

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, and after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding and because schools that recorded or reported more than one type of crime incident were counted only once in the total percentage of schools recording or reporting incidents.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999–2000, 2003–04, 2005–06, 2007–08, and 2009–10 School Survey on Crime and Safety (SSOCS), 2000, 2004, 2006, 2008, and 2010. (This table was prepared September 2013.)

Table 229.20. Number and percentage of public schools recording at least one crime incident that occurred at school, and number and rate of incidents, by school characteristics and type of incident: 1999–2000 and 2009–10

!Interpret data with caution. The coefficient of variation (CV) for this estimate is 30 percent or greater.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Theft/larceny (taking things worth over \$10 without personal confrontation) includes pocket picking, stealing a purse or backpack (if left unattended or if no force was used to take it from owner), theft from a building, theft from a motor vehicle or of motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts.

²This table shows only the “Other incidents” that were included on the 2009–10 questionnaire. In 1999–2000, most of the “Other incidents” differed from those shown in this table.

NOTE: “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places holding school-sponsored events or activities. Includes incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. All public schools also includes schools with other combinations of grades (including K–12 schools), which are not shown separately. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999–2000 and 2009–10 School Survey on Crime and Safety (SSOCS), 2000 and 2010. (This table was prepared August 2011.)

†Not applicable.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

§Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¶All violent incidents include serious violent incidents (see footnote 2) as well as physical attack or fight without a weapon and threat of physical attack without a weapon.

‡Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.

§Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as “the unlawful taking of another person’s property without personal confrontation, threat, violence, or bodily harm.” This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

¶Other incidents* include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; inappropriate distribution, possession, or use of prescription drugs; and vandalism.

§Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

§Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹All violent incidents include serious violent incidents (see footnote 2) as well as physical attack or fight without a weapon and threat of physical attack without a weapon.

²Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.

³Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as “the unlawful taking of another person’s property without personal confrontation, threat, violence, or bodily harm.” This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

⁴Other incidents include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; inappropriate distribution, possession, or use of prescription drugs; and vandalism.

⁵Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is

not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

⁶Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

²Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of

Data (CCD), the sampling frame for SSOCS.

NOTE: Violent incidents include rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.²Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.³Includes schools that reported the activity happens either at least once a week or daily.⁴Includes schools that reported the activity happens at all at their school during the school year. In the 1999–2000 survey administration, the questionnaire specified “undesirable” gang activities and “undesirable” cult or extremist group activities.⁵Prior to the 2007–08 survey administration, the questionnaire wording was “student racial tensions.”⁶Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.⁵Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.⁶“Violent incidents” include rape or attempted rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack or fight with or without a weapon, and robbery with or without a weapon.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session, unless the survey specified otherwise.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons reporting that they are of two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

²Starting in 2007, the reference period was the school year, whereas in prior survey years the reference period was the previous 6 months. Cognitive testing showed that estimates from 2007 onward are comparable to previous years.

NOTE: Urbanicity refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." All gangs, whether or not they are involved in violent or illegal activity, are included. "At school" includes in the school building, on school property, on a school bus, and going to and from school.

¹Starting in 2007, the reference period was the school year, whereas in prior survey years the reference period was the previous 6 months. Cognitive testing showed that estimates from 2007 onward are comparable to previous years.²Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons reporting that they are of two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

NOTE: "At school" includes in the school building, on school property, on a school bus, and, from 2001 onward, going to and from school. "Hate-related" refers to derogatory terms used by others in reference to students' personal characteristics.

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, selected years, 1999 through 2011. (This table was prepared September 2013.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Students who indicated that they had been called a hate-related word were asked to choose the specific characteristics that the hate-related word or words targeted. Students were allowed to choose more than one characteristic. If a student chose more than one characteristic, he or she is counted only once in the total percentage of students who reported being called a hate-related word; therefore, the total is less than the sum of the students' individual characteristics.

²Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/

Alaska Natives, Pacific Islanders, and persons reporting that they are of two or more races.

³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," "and not MSA (Rural)."

NOTE: "At school" includes in the school building, on school property, on a school bus, or going to and from school. "Hate-related" refers to derogatory terms used by others in reference to students' personal characteristics. Detail may not sum to totals because of rounding and because students may have reported being targets of hate-related words related to more than one student characteristic.

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.²Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.³Only students who reported that they were pushed, shoved, tripped, or spit on were asked if they suffered injuries as a result of the incident.⁴Students who reported that they were both bullied at school and cyber-bullied anywhere were counted only once in the total for students bullied at school or cyber-bullied anywhere.⁵Students who reported experiencing more than one type of bullying at school were counted only once in the total for students bullied at school.⁶Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Pacific Islanders, and persons reporting that they are of two or more races.⁵Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." These data by metropolitan status were based on the location of households and differ from those published in *Student Reports of Bullying and Cyber-Bullying: Results from the 2011 School Crime Supplement to the National Crime Victimization Survey*, which were based on the urban-centric measure of the location of the school that the child attended.⁶Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in *Student Reports of Bullying and Cyber-Bullying: Results from the 2011 School Crime Supplement to the National Crime Victimization Survey*.

NOTE: "At school" includes the school building, on school property, on a school bus, or going to and from school. Bullying types do not sum to totals because students could have experienced more than one type of bullying.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Pacific Islanders, and persons reporting that they are of two or more races.

²Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." These data by metropolitan status were based on the location of households and differ from those published in *Student Reports of Bullying and Cyber-Bullying: Results from the 2011 School*

Crime Supplement to the National Crime Victimization Survey, which were based on the urban-centric measure of the location of the school that the child attended.

³Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in *Student Reports of Bullying and Cyber-Bullying: Results from the 2011 School Crime Supplement to the National Crime Victimization Survey*.

NOTE: "At school" includes the school building, on school property, on a school bus, or going to and from school. Bullying types do not sum to totals because students could have experienced more than one type of bullying.

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, selected years, 2005 through 2009. (This table was prepared September 2013.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes all students who responded that another student had posted hurtful information about them on the Internet; purposely shared private information about them on the Internet; threatened or insulted them through instant messaging; threatened or insulted them through text messaging; threatened or insulted them through e-mail; threatened or insulted them while gaming; or excluded them online. Students could report more than one of these types of cyber-bullying. A student who reported more than one type is counted only once under total cyber-bullying.

²Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Pacific Islanders, and persons reporting that they are of two or more races.

³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's house-

hold as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." These data by metropolitan status were based on the location of households and differ from those published in *Student Reports of Bullying and Cyber-Bullying: Results from the 2011 School Crime Supplement to the National Crime Victimization Survey*, which were based on the urban-centric measure of the location of the school that the child attended.

⁴Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in *Student Reports of Bullying and Cyber-Bullying: Results from the 2011 School Crime Supplement to the National Crime Victimization Survey*.

NOTE: Detail may not sum to totals because of rounding and because students could have experienced more than one type of cyber-bullying.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

§Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

²Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

³“Violent incidents” include rape or attempted rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack or fight with or without a weapon, and robbery with or without a weapon. “At school” was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities and events were in session. NOTE: Includes schools reporting that cyber-bullying happens either “daily” or “at least once a week.” “Cyber-bullying” was defined for respondents as occurring “when willful and repeated harm is inflicted through the use of computers, cell phones, or other electronic devices.” Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Respondents were instructed to include cyber-bullying “problems that can occur anywhere (both at your school and away from school).”

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Starting in 2007, the reference period was the school year, whereas in prior survey years the reference period was the previous 6 months. Cognitive testing showed that estimates from 2007 onward are comparable to previous years.

²Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons reporting that they are of two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

NOTE: "At school" includes the school building, on school property, on a school bus, and, from 2001 onward, going to and from school. Students were asked if they "never," "almost never," "sometimes," or "most of the time" feared that someone would attack or harm them at school or away from school. Students responding "sometimes" or "most of the time" were considered fearful. For the 2001 survey only, the wording was changed from "attack or harm" to "attack or threaten to attack."

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, selected years, 1995 through 2011. (This table was prepared September 2013.)

⁴Before 2007, students were asked whether they avoided "any extracurricular activities." Starting in 2007, the survey wording was changed to "any activities."

NOTE: Students were asked whether they avoided places or activities because they thought that someone might attack or harm them. For the 2001 survey only, the wording was changed from "attack or harm" to "attack or threaten to attack." Detail may not sum to totals because of rounding and because a student who reported more than one type of avoidance was counted only once in the totals.

±Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

¹Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12 and none of grades kindergarten through grade 6. Combined elementary/secondary schools are included in totals but are not shown separately.²Includes traditional public and public charter schools.³Substantial improvements in geocoding technology and changes in the Office of Management and Budget's definition of metropolitan and nonmetropolitan areas allow for more precision in describing an area as of 2003–04. Comparisons with earlier years are not possible.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes both teachers who “strongly” agreed and those who “somewhat” agreed that student misbehavior or student tardiness and class cutting interfered with their teaching. Some data have been revised from previously published figures.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times in the past 12 months they had been in a physical fight.

²Race categories exclude persons of Hispanic ethnicity.

³Before 1999, Asian students and Pacific Islander students were not categorized separately, and students were not given the option of choosing two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined in 2000 by the U.S. Census Bureau. Categories include “central city of an MSA (Urban);” “in MSA but not in central city (Suburban);” and “not MSA (Rural).”

⁵In the question asking students about physical fights at school, “on school property” was not defined for survey respondents.

†Not applicable.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times in the past 12 months they had been in a physical fight.

²In the question asking students about physical fights at school, “on school property” was not defined for survey respondents.

³Data include both public and private schools.

NOTE: State-level data include public schools only, with the exception of data for Ohio and South Dakota. Data for the United States total, Ohio, and South Dakota include both public and private schools.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.²Race categories exclude persons of Hispanic ethnicity.³Before 1999, Asian students and Pacific Islander students were not categorized separately, and students were not given the option of choosing two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race

from 1993, 1995, and 1997 with data from later years.

⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined in 2000 by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."⁵In the question asking students about carrying a weapon at school, "on school property" was not defined for survey respondents.

NOTE: Respondents were asked about carrying "a weapon such as a gun, knife, or club."

—Not available.

†Not applicable.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.

²In the question asking students about carrying a weapon at school, “on school property” was not defined for survey respondents.

³Data include both public and private schools.

NOTE: Respondents were asked about carrying “a weapon such as a gun, knife, or club.” State-level data include public schools only, with the exception of data for Ohio and South Dakota. Data for the United States total, Ohio, and South Dakota include both public and private schools.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2003 through 2011. (This table was prepared September 2013.)

Table 231.70. Percentage of students ages 12–18 who reported having access to a loaded gun, without adult permission, at school or away from school during the school year, by selected student and school characteristics: 2007, 2009, and 2011

[Standard errors appear in parentheses]
