Variable label: N1 A13 Science teacher has started but not completed more advanced degree

Variable description:

- Have you started, but not completed, any work on a degree beyond [highest degree earned]?

(If you have started more than one of the degrees listed below, please select the higher degree.)

No, have not started any other degree

Yes, started but not completed an Associate's degree

Yes, started but not completed a Bachelor's degree

Yes, started but not completed a Master's degree

Yes, started but not completed an Education Specialist diploma

Yes, started but not completed a Ph.D., M.D., law degree, or other high level professional degree

Note: Question wording was customized in the survey instrument such that the respondent's actual highest degree earned was used in place of 'highest degree earned'; response options were conditionally displayed based on respondent's actual highest degree earned.

Comment: "Started but not completed BA degree" recoded as missing on the public use file.

- The following questions are about the [fall 2009 science] course you are teaching.

[if web mode: We would like to standardize the various course titles we receive from schools into defined categories. This course may or may not exactly match one of these categories. Regardless, please indicate which of the following best categorizes this course.]

[if TIO mode: We would like to standardize the various course titles we receive from schools into defined categories. Please indicate which of the following best categorizes this course.]

Life Science

Anatomy or Physiology

Biology I

Advanced Biology such as Biology II, AP, or IB

Other Biological Science such as botany, marine biology, or zoology

Chemistry I

Advanced Chemistry such as Chemistry II, AP, or IB

Environmental Science

Earth Science

Physical Science with Earth Science

Other Earth or Environmental Science such as ecology, geology, oceanography, or meteorology

Physics I

Advanced Physics such as Physics II, AP, or IB

Physical Science without Earth Science

Physical Science with Earth Science

Other Physical Science such as astronomy or electronics

Principles of Technology

Integrated Science I

Integrated Science II or above

General Science

Other science

Note: Question wording was customized in the survey instrument based on interview mode, as indicated above; question wording was also customized such that the actual name of the fall 2009 science course taught by the teacher respondent was used in place of "fall 2009 science course".

Comment: Sparse values recoded to "Other science" on the public use file.

TOTALS		23503	100.00

Variable name: N1ASSIGN

Record #1, Position:10092 - 10093, Format: N2.

Variable label: N1 C06 How science teacher assigns students to small groups

Variable description:

- Primarily, how do you [plan to] assign students to groups in [fall 2009 science course]?
- Intentionally create groups so students will be of similar ability levels
- Intentionally create groups so students will be of different ability levels
- Create groups without regard to ability level such as alphabetically or randomly
- Groups will be chosen by the students

Note: Question wording was customized in the survey instrument such that the actual name of the fall 2009 science course taught by the teacher respondent was used in place of "fall 2009 science course"; question wording was also customized such that "plan to" was used in cases where the teacher respondent indicated they did not currently have students work in small groups, but planned to at some point during the course.

Code	Value Label	Frequency	Percentage
1	Create groups of similar ability levels	617	2.63
2	Create groups of different ability levels	6045	25.72
3	Create groups w/o regard to ability level	2769	11.78
4	Groups chosen by the students	2286	9.73

Variable name: A1SCHCONTROL

Record #1, Position:10292 - 10293, Format: N2.

Variable label: A1 A02 School control

Variable description:

- Our records indicate that [your school] is a [public/private] school. Is this correct?

Yes

No

Note: Question wording was customized in the survey instrument such that the respondent's school name appeared in place of 'your school', and such that 'public' or 'private' was conditionally displayed based on sampling information. Although the actual survey instrument included this question with yes/no response options, pre-loaded school control information was combined with the administrator's yes/no response to produce A1SCHCONTROL values of 1=Public and 2=Private. Please note the composite variable X1CONTROL (which, unlike A1SCHCONTROL, is based on CCD and PSS data) contains more specific school control information than A1SCHCONTROL, i.e. it has values of Public, Catholic, and Other private; in addition, X1CONTROL contains non-missing values even where A1SCHCONTROL is missing.

Code	Value Label	Frequency	Percentage
1	Public	18020	76.67
2	Private	4116	17.51
-8	Unit non-response	1367	5.82

Variable name: A2SCHTYPE

Record #1, Position:10911 - 10912, Format: N2.

Variable label: A2 A01 School type

Variable description:

- Which of the following best describes [school name]?

1=A regular school

2=A charter school (a school that has been granted a charter exempting it from selected state or local rules and regulations)

3=A special program school , such as a science or math school, performing arts school, talented or gifted school, or a foreign language immersion school

4=A career, technical or vocational school

5=An alternative school (a school that offers a curriculum designed to provide nontraditional education to students, for example, to students at risk of school failure or dropout in a traditional setting)

Note: This item was included in the abbreviated instrument. Question wording was customized in the survey instrument such that the respondent's school name appeared in place of "school name", and the first item included instructions for respondents from public schools to exclude charter schools. Private schools did not see the second option.

Administered To: All first follow-up respondents.

Crossround Note: This variable is a repeat of the BY variable A1SCHTYPE.

Comment: Variable suppressed with -5 values on the public use file.

Code	Value Label	Frequency	Percentage

Variable name: X1TXMSEM1

Record #1, Position:12541 - 12547, Format: N7.4

Variable label: X1 Mathematics standard error of measurement - multiple imputation value 1 of 5

Variable description:

- Mathematics standard error of measurement multiple imputation value (1 of 5). When the math test data were missing for student survey respondents, the math standard error of measurement (SEM) for the raw theta score was imputed with multiple imputation technique, with 5 imputed values. X1TXMTH is the mean of X1TXMTH1-5. The standard error of measurement for the raw theta score indicates the precision in the ability estimate. It is calculated from the sum of item information functions for each item answered by each student. Unlike the classical standard error of measurement, which is a constant, the IRT standard error varies across the scale-score continuum. It is typically smaller for students whose theta score falls toward the center of the distribution because more students answered the items with average difficulty. However, students whose theta scores fall at the extremes of the distribution tend to have a higher SEM because their scores are based on items answered by fewer students overall. The associated standard error of measurement is X1TXMSEM.

Variable name: X2TXMTH1

Record #1, Position:12704 - 12710, Format: N7.4

Variable label: X2 Mathematics theta score - multiple imputation value 1 of 5

Variable description:

- Mathematics theta score multiple imputation value (1 of 5). When the math test data were missing for student survey respondents, the math theta score was imputed with multiple imputation technique, with 5 imputed values. X2TXMTH is the mean of X2TXMTH1-5. The theta score provides a norm-referenced measurement of achievement, that is, an estimate of achievement relative to the population (fall 2009 9th graders) as a whole. It provides information on status compared to peers (as distinguished from the IRT-estimated scale score which represents status with respect to achievement on a particular criterion set of test items). The associated theta score is X2TXMTH. The standardized form of the theta score is X2TXMTSCOR.

Variable name: X2TXMSEM1

Record #1, Position:12739 - 12745, Format: N7.4

Variable label: X2 Mathematics standard error of measurement - multiple imputation value 1 of 5

Variable description:

- Mathematics standard error of measurement multiple imputation value (1 of 5). When the math test data were missing for student survey respondents, the math standard error of measurement (SEM) for the raw theta score was imputed with multiple imputation technique, with 5 imputed values. X2TXMTH is the mean of X2TXMTH1-5. The standard error of measurement for the raw theta score indicates the precision in the ability estimate. It is calculated from the sum of item information functions for each item answered by each student. Unlike the classical standard error of measurement, which is a constant, the IRT standard error varies across the scale-score continuum. It is typically smaller for students whose theta score falls toward the center of the distribution because more students answered the items with average difficulty. However, students whose theta scores fall at the extremes of the distribution tend to have a higher SEM because their scores are based on items answered by fewer students overall. The associated standard error of measurement is X2TXMSEM.

Variable label: X2 SES derived with locale (urbanicity) - multiple imputation value 2 of 5

Variable description:

- This variable contains the imputed values (2 of 5) for X2SES_U, generated through a multiple imputation model, for responding students without a responding parent/guardian. X2SES_U is the mean of X2SES1_U-X2SES5_U.

Code	Value Label	Frequency	Percentage
C	-2.0982 - 2.5175	20919	89.01
-8	Unit non-response	2584	10.99
TOTALS		23503	100.00

Variable name: X2SES3_U

Record #1, Position:12823 - 12829, Format: N7.4

Variable label: X2 SES derived with locale (urbanicity) - multiple imputation value 3 of 5

Variable description:

- This variable contains the imputed values (3 of 5) for X2SES_U, generated through a multiple imputation model, for responding students without a responding parent/guardian. X2SES_U is the mean of X2SES1_U-X2SES5_U.

Code	Value Label	Frequency	Percentage
C	-2.3219 - 2.7097	20919	89.01
-8	Unit non-response	2584	10.99
TOTALS		23503	100.00

Variable name: X2SES4_U

Record #1, Position:12830 - 12836, Format: N7.4

Variable label: X2 SES derived with locale (urbanicity) - multiple imputation value 4 of 5

Variable description:

- This variable contains the imputed values (4 of 5) for X2SES_U, generated through a multiple imputation model, for responding students without a responding parent/guardian. X2SES_U is the mean of X2SES1_U-X2SES5_U.

Code	Value Label	Frequency	Percentage
C	-2.348 - 3.1045	20919	89.01
