¹Serious violent victimization is also included in all violent victimization.

²"At school" includes inside the school building, on school property, and on the way to and from school.

³Due to methodological differences, use caution when comparing 2006 estimates to other years.

NOTE: "Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "All violent victimization" includes serious violent crimes as well as simple assault. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not

include robbery, which involves the threat or use of force and is classified as a violent crime. "Total victimization" includes theft and violent crimes. Data in this table are from the National Crime Victimization Survey (NCVS); due to differences in time coverage and administration between the NCVS and the School Crime Supplement (SCS) to the NCVS, data in this table cannot be compared with data in tables that are based on the SCS. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, National Crime Victimization Survey (NCVS), 1992 through 2015. (This table was prepared August 2016).

Table 228.25. Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization, location, and selected student characteristics: 2015
[Standard errors appear in parentheses]

—Not available.

†Not applicable.

¹Interpret data with caution. Estimate based on 10 or fewer sample cases, or the coefficient of variation is greater than 50 percent.

²Serious violent victimization is also included in all violent victimization.

³At school includes inside the school building, on school property, and on the way to and from school.

⁴Race categories exclude persons of Hispanic ethnicity. "Other" includes Asians, Pacific Islanders, American Indians/Alaska Natives, and persons of Two or more races.

⁵Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

⁶Income data for 2015 were imputed. Estimates may not be comparable to previous years. For more information, see Criminal Victimization, 2015 (NCJ 250180, October 2016).

NOTE: "Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "All violent victimization" includes serious violent crimes as well as simple assault. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Total victimization" includes theft and violent crimes. Data in this table are from the National Crime Victimization Survey (NCVS) and are reported in accordance with Bureau of Justice Statistics standards. Detail may not sum to totals because of rounding and missing data on student characteristics. The population size for students ages 12–18 was 25,581,700 in 2015.

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, National Crime Victimization Survey (NCVS), 2015. (This table was prepared August 2016.)

Table 228.30. Percentage of students ages 12–18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2015
[Standard errors appear in parentheses]

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

²Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

³Serious violent victimization is also included in violent victimization.

NOTE: "Total victimization" includes theft and violent victimization. A single student could report more than one type of victimization. In the total victimization section, students who reported both theft and violent victimization are counted only once. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "Violent victimization" includes the serious violent crimes as well as simple assault. "At school" includes in the school building, on school property, on a school bus, and, from 2001 onward, going to and from school.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Race categories exclude persons of Hispanic ethnicity.

²Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

NOTE: Survey respondents were asked about being threatened or injured “with a weapon such as a gun, knife, or club on school property.” “On school property” was not defined for respondents. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

¹For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.

²Ohio data for 2003 through 2013 include both public and private schools.

³South Dakota data for all years include both public and private schools.

⁴Vermont data for 2013 include both public and private schools.

NOTE: Survey respondents were asked about being threatened or injured "with a weapon such as a gun, knife, or club on school property." "On school property" was not defined for respondents. For the U.S. total, data for all years include both public and private schools.

State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2003 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate). SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2003 through 2015. (This table was prepared June 2016.)

Table 228.70. Number and percentage of public and private school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by selected teacher and school characteristics: Selected years, 1993–94 through 2011–12
[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

²Includes American Indians/Alaska Natives, Asians, and Pacific Islanders; for 2003–04 and later years, also includes persons of Two or more races.

³Includes traditional public and public charter schools.

NOTE: Teachers who taught only prekindergarten students are excluded. Instructional level divides teachers into elementary or secondary based on a combination of the grades taught, main teaching assignment, and the structure of the teachers' class(es). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes traditional public and public charter schools. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Bullying was defined for respondents as "when one or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again."

^{2a}On school property" was not defined for survey respondents.

³Being electronically bullied includes "being bullied through e-mail, chat rooms, instant messaging, websites, or texting."

⁴The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times or how many days they engaged in the specified behavior.

⁵Survey respondents were asked about being threatened or injured "with a weapon such as a gun, knife, or club."

⁶Respondents were asked about carrying "a weapon such as a gun, knife, or club."

NOTE: Students were asked which sexual orientation—"heterosexual (straight)," "gay or lesbian," "bisexual," or "not sure"—best described them.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Data for 2013–14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013–14 results.

²Because the 2013–14 survey did not collect school enrollment counts, the rate per 1,000 students was calculated by dividing the number of incidents by the total number of students obtained from the Common Core of Data.

³Total not presented for 2013–14 because the survey did not collect information regarding theft and other incidents. Therefore, the total incident rate is not comparable with earlier years.

⁴Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as “the unlawful taking of another person’s property without personal confrontation, threat, violence, or bodily harm.” This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

⁵Caution should be used when making direct comparisons of “Other incidents” between years because the survey questions about alcohol and drugs changed, as outlined in footnotes 6, 7, and 8.

⁶The survey items “Distribution of illegal drugs” and “Possession or use of alcohol or illegal drugs” appear only on the 1999–2000 and 2003–04 questionnaires. Different alcohol- and drug-related survey items were used on the questionnaires for later years.

⁷The survey items “Distribution, possession, or use of illegal drugs” and “Distribution, possession, or use of alcohol” appear only on the questionnaires for 2005–06 and later years.

⁸The 2009–10 questionnaire was the first to include the survey item “Inappropriate distribution, possession, or use of prescription drugs.”

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, and after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding and because schools that recorded or reported more than one type of crime incident were counted only once in the total percentage of schools recording or reporting incidents.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is 30 percent or greater.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Theft/larceny (taking things worth over \$10 without personal confrontation) includes pocket picking, stealing a purse or backpack (if left unattended or if no force was used to take it from owner), theft from a building, theft from a motor vehicle or of motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts.

²This table shows only the “Other incidents” that were included on the 2009–10 questionnaire. In 1999–2000, most of the “Other incidents” differed from those shown in this table.

NOTE: “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places holding school-sponsored events or activities. Includes incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. All public schools also includes schools with other combinations of grades (including K–12 schools), which are not shown separately. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999–2000 and 2009–10 School Survey on Crime and Safety (SSOCS), 2000 and 2010. (This table was prepared August 2011.)

Table 229.30. Percentage of public schools recording violent incidents of crime at school, number of incidents, and rate per 1,000 students, by category of violent incident and selected school characteristics: 2009–10 and 2013–14

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Data for 2013–14 were collected using the Fast Response Survey System, while data for 2009–10 were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013–14 results.

²All violent incidents include serious violent incidents (see footnote 3) as well as physical attack or fight without a weapon and threat of physical attack without a weapon.

³Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.

⁴The 2013–14 survey collected neither school enrollment counts nor data on the percentage of students eligible for free or reduced-price lunch. For 2013–14, the rate per 1,000 students was calculated by dividing the number of incidents by the total

number of students obtained from the Common Core of Data (CCD). For 2013–14, the classification of schools by the percentage of students eligible for free or reduced-price lunch was also computed from CCD data.

⁵Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available for 2013–14.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹All violent incidents include serious violent incidents (see footnote 2) as well as physical attack or fight without a weapon and threat of physical attack without a weapon.

²Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.

³Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as “the unlawful taking of another person’s property without personal confrontation, threat, violence, or bodily harm.” This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

⁴“Other incidents” include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; inappropriate distribution, possession, or use of prescription drugs; and vandalism.

⁵Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is

not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

⁶Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

²Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of

full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCs.

NOTE: Violent incidents include rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

²Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of

full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCs.

NOTE: Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

—Not available.

‡Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes schools that reported the activity happens either at least once a week or daily.

²Includes schools that reported the activity happens at all at their school during the school year. In the 1999–2000 survey administration, the questionnaire specified “undesirable” gang activities and “undesirable” cult or extremist group activities.

³Prior to the 2007–08 survey administration, the questionnaire wording was “student racial tensions.”

⁴Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available for 2013–14.

⁵Data for 2013–14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 survey was designed to allow comparisons with SSOCS

data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013–14 results.

⁶Because the 2013–14 survey did not collect data on the percentage of students eligible for free or reduced-price lunch, the classification of schools by the percentage of students eligible for free or reduced-price lunch was computed based on data obtained from the Common Core of Data.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session, unless the survey specified otherwise.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.²In 2005 and prior years, the period covered by the survey question was "during the last 6 months;" whereas the period was "during this school year" beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

NOTE: "Urbanicity" refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." All gangs, whether or not they are involved in violent or illegal activity, are included. "At school" includes in the school building, on school property, on a school bus, and going to and from school.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹In 2005 and prior years, the period covered by the survey question was “during the last 6 months,” whereas the period was “during this school year” beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

²Race categories exclude persons of Hispanic ethnicity. “Other” includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).” NOTE: “At school” includes in the school building, on school property, on a school bus, and, from 2001 onward, going to and from school. “Hate-related” refers to derogatory terms used by others in reference to students’ personal characteristics.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Students who reported being called hate-related words were asked which specific characteristics these words were related to. If a student reported being called more than one type of hate-related word—e.g., a derogatory term related to race as well as a derogatory term related to sexual orientation—the student was counted only once in the total percentage of students who were the target of any hate-related words.

²Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/

Alaska Natives, Pacific Islanders, and persons of Two or more races.

³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

NOTE: "At school" includes in the school building, on school property, on a school bus, and going to and from school. "Hate-related" refers to derogatory terms used by others in reference to students' personal characteristics.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Students who reported experiencing more than one type of bullying at school were counted only once in the total for students bullied at school.

²In 2005 and prior years, the period covered by the survey question was “during the last 6 months,” whereas the period was “during this school year” beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

³Race categories exclude persons of Hispanic ethnicity. “Other” includes American Indians/Alaska Natives, Pacific Islanders, and persons of Two or more races.

⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include “central city of an

MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).” These data by metropolitan status were based on the location of households and differ from those published in *Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey*, which were based on the urban-centric measure of the location of the school that the child attended.

⁵Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in *Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey*.

NOTE: “At school” includes in the school building, on school property, on a school bus, and going to and from school.

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, selected years, 2005 through 2015. (This table was prepared August 2016.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Students who reported being cyber-bullied are those who responded that another student had done one or more of the following: posted hurtful information about them on the Internet; purposely shared private information about them on the Internet; threatened or insulted them through instant messaging; threatened or insulted them through text messaging; threatened or insulted them through e-mail; threatened or insulted them while gaming; or excluded them online.

²Teacher or other adult at school notified.

³Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Pacific Islanders, and persons of Two or more races.

⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

⁵Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in *Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey*.

⁶Data on cyber-bullying anywhere were not collected in 2015. However, students who reported being bullied at school in 2015 were asked whether any of the bullying occurred "online or by text."

NOTE: "At school" includes in the school building, on school property, on a school bus, and going to and from school. Detail may not sum to totals because of rounding.

†Not applicable.

¹Bullying was defined for respondents as “when one or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again.” “On school property” was not defined for survey respondents.

²Includes “being bullied through e-mail, chat rooms, instant messaging, websites, or texting.” Data on electronic bullying were not collected in 2009. Data on electronic bullying were not collected in 2009.

³For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.

⁴Ohio data for 2003 through 2013 include both public and private schools.

⁵South Dakota data for all years include both public and private schools.

⁶Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2003 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

§Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

²Student/teacher ratio was calculated by dividing the total number of students enrolled in the school by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

³“Violent incidents” include rape or attempted rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack or fight with or without a weapon, and robbery with or without a weapon. “At school” was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities and events were in session. NOTE: Includes schools reporting that cyber-bullying happens either “daily” or “at least once a week.” “Cyber-bullying” was defined for respondents as occurring “when willful and repeated harm is inflicted through the use of computers, cell phones, or other electronic devices.” Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Respondents were instructed to include cyber-bullying “problems that can occur anywhere (both at your school and away from school).”

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹In 2005 and prior years, the period covered by the survey question was “during the last 6 months,” whereas the period was “during this school year” beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

²Race categories exclude persons of Hispanic ethnicity. “Other” includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

NOTE: “At school” includes in the school building, on school property, on a school bus, and, from 2001 onward, going to and from school. Students were asked if they were “never,” “almost never,” “sometimes,” or “most of the time” afraid that someone would attack or harm them at school or away from school. Students responding “sometimes” or “most of the time” were considered afraid. For the 2001 survey only, the wording was changed from “attack or harm” to “attack or threaten to attack.”

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹In 2005 and prior years, the period covered by the survey question was “during the last 6 months,” whereas the period was “during this school year” beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

²Students who reported both avoiding one or more places in school and avoiding school activities or classes were counted only once in the total for any avoidance.

³Students who reported avoiding multiple places in school were counted only once in the total for students avoiding one or more places.

⁴Race categories exclude persons of Hispanic ethnicity. “Other” includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward,

persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

⁵Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

⁶Students who reported more than one type of avoidance of school activities or classes—e.g., reported that they avoided “any activities” and also reported that they stayed home from school—were counted only once in the total for avoiding activities or classes.

⁷Before 2007, students were asked whether they avoided “any extracurricular activities.” Starting in 2007, the survey wording was changed to “any activities.”

NOTE: Students were asked whether they avoided places or activities because they thought that someone might attack or harm them. For the 2001 survey only, the wording was changed from “attack or harm” to “attack or threaten to attack.”

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

¹Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12 and none of grades kindergarten through grade 6. Combined elementary/secondary schools are included in totals but are not shown separately.²Includes traditional public and public charter schools.³Substantial improvements in geocoding technology and changes in the Office of Management and Budget's definition of metropolitan and nonmetropolitan areas allow for more precision in describing an area as of 2003–04. Comparisons with earlier years are not possible.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes both teachers who “strongly” agreed and those who “somewhat” agreed that student misbehavior or student tardiness and class cutting interfered with their teaching. Some data have been revised from previously published figures.

†Not applicable.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

¹Respondents were asked whether “rules for student behavior are consistently enforced by teachers in this school, even for students not in their classes.”

²Respondents were asked whether their “principal enforces school rules for student conduct and backs me up when I need it.”

³Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12 and none of grades kindergarten through grade 6. Combined elementary/secondary schools are included in totals but are not shown separately.

⁴Includes traditional public and public charter schools.

⁵Substantial improvements in geocoding technology and changes in the Office of Management and Budget's definition of metropolitan and nonmetropolitan areas allow for more precision in describing an area as of 2003–04. Comparisons with earlier years are not possible.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes both teachers who “strongly” agreed and those who “somewhat” agreed that rules were enforced by other teachers and the principal. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), “Public School Teacher Data File” and “Private School Teacher Data File,” 1987–88, 1990–91, 1993–94, 1999–2000, 2003–04, 2007–08, and 2011–12; and “Charter School Teacher Data File,” 1999–2000. (This table was prepared October 2013.)

Table 230.95. Percentage of public school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching and that other teachers and the principal enforced school rules, by state: 2011–12
[Standard errors appear in parentheses]

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times in the past 12 months they had been in a physical fight.

²Race categories exclude persons of Hispanic ethnicity.

³Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

⁵In the question asking students about physical fights at school, “on school property” was not defined for survey respondents.

—Not available.

†Not applicable.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times in the past 12 months they had been in a physical fight.

²In the question asking students about physical fights at school, “on school property” was not defined for survey respondents.

³For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.

⁴Ohio data for 2005 through 2013 include both public and private schools.

⁵South Dakota data for all years include both public and private schools.

⁶Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

†Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.²Race categories exclude persons of Hispanic ethnicity.³Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."⁵In the question asking students about carrying a weapon at school, "on school property" was not defined for survey respondents.

NOTE: Respondents were asked about carrying "a weapon such as a gun, knife, or club."

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.

²In the question asking students about carrying a weapon at school, “on school property” was not defined for survey respondents.

³Race categories exclude persons of Hispanic ethnicity.

NOTE: Respondents were asked about carrying “a weapon such as a gun, knife, or club.” Detail may not sum to totals because of rounding.

†Not applicable.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.

²In the question asking students about carrying a weapon at school, “on school property” was not defined for survey respondents.

³For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.

⁴Ohio data for 2005 through 2013 include both public and private schools.

⁵South Dakota data for all years include both public and private schools.

⁶Vermont data for 2013 include both public and private schools.

NOTE: Respondents were asked about carrying “a weapon such as a gun, knife, or club.” For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year’s data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

¹Data for New York City Public Schools were not reported.

²The state reported a total state-level firearm incident count that was less than the sum of its reported district-level counts. The sum of the district-level firearm incident counts is displayed instead of the reported state-level count.

NOTE: Separate counts were collected for incidents involving handguns, rifles/shotguns, other firearms, and multiple types of firearms. The counts reported here exclude the “other firearms” category.

SOURCE: U.S. Department of Education, National Center for Education Statistics, ED^{Facts} file 094, Data Group 601, extracted August 1, 2016, from the ED^{Facts} Data Warehouse (internal U.S. Department of Education source); Common Core of Data (CCD), “State Nonfiscal Survey of Public Elementary and Secondary Education,” 2009–10 through 2014–15. (This table was prepared August 2016.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days during the previous 30 days they had at least one drink of alcohol.

²Race categories exclude persons of Hispanic ethnicity.

³Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

⁵In the question about drinking alcohol at school, “on school property” was not defined for survey respondents. Data on alcohol use at school were not collected in 2013 and 2015.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 1993 through 2015. (This table was prepared July 2016.)

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days during the previous 30 days they had at least one drink of alcohol.

²In the question about drinking alcohol at school, “on school property” was not defined for survey respondents.

³Race categories exclude persons of Hispanic ethnicity.

⁴Data on alcohol use at school were not collected in 2013 and 2015.

NOTE: Detail may not sum to totals because of rounding.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2009 through 2015. (This table was prepared July 2016.)

Table 232.30. Percentage of public school students in grades 9–12 who reported using alcohol at least 1 day during the previous 30 days, by location and state: Selected years, 2005 through 2015

[Standard errors appear in parentheses]

†Not applicable.

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

²The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days during the previous 30 days they had at least one drink of alcohol.

³In the question about drinking alcohol at school, “on school property” was not defined for survey respondents. Data on alcohol use at school were not collected in 2013 and 2015.

⁴For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.

⁵Ohio data for 2005 through 2013 include both public and private schools.

⁶South Dakota data for all years include both public and private schools.

⁶Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹The term "anywhere" is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.²Race categories exclude persons of Hispanic ethnicity.³Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.⁴Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."⁵In the question about using marijuana at school, "on school property" was not defined for survey respondents. Data on marijuana use at school were not collected in 2013 and 2015.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.

²In the question about using marijuana at school, “on school property” was not defined for survey respondents.

³Race categories exclude persons of Hispanic ethnicity.

⁴Data on marijuana use at school were not collected in 2013 and 2015.

NOTE: Detail may not sum to totals because of rounding.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2009 through 2015. (This table was prepared July 2016.)

Table 232.60. Percentage of public school students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and state: Selected years, 2005 through 2015
[Standard errors appear in parentheses]

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.²In the question about using marijuana at school, “on school property” was not defined for survey respondents. Data on marijuana use at school were not collected in 2013 and 2015.³For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.⁴Ohio data for 2005 through 2013 include both public and private schools.⁵South Dakota data for all years include both public and private schools.⁶Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Race categories exclude persons of Hispanic ethnicity.

²Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

³Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

NOTE: "On school property" was not defined for survey respondents.

— Not available.

†Not applicable.

¹For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country.

²Ohio data for 2003 through 2013 include both public and private schools.

³South Dakota data for all years include both public and private schools.

⁴Vermont data for 2013 include both public and private schools.

NOTE: "On school property" was not defined for survey respondents. For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years

include both public and private schools: Ohio (2003 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

¹Survey question changed in 1993; later data are not comparable to figures for earlier years.

²Other illicit drugs include any use of LSD or other hallucinogens, crack or other cocaine, or heroin, or any use of other narcotics, amphetamines, barbiturates, or tranquilizers not under a doctor's orders.

NOTE: Detail may not sum to totals because of rounding. Standard errors were calculated from formulas to perform trend analysis over an interval greater than 1 year (for example, a comparison between 1975 and 1990). A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of nonprescription stimulants. This slightly reduced the positive responses for some types of drug abuse.

¹Includes other illegal drug use not shown separately—specifically, the use of heroin, hallucinogens, and inhalants, as well as the nonmedical use of prescription-type pain relievers, tranquilizers, stimulants, and sedatives.

NOTE: Marijuana includes hashish usage. Data for 1999 and later years were gathered using Computer Assisted Interviewing (CAI) and may not be directly comparable to previous years. Because of survey improvements in 2002, the 2002 data constitute a new baseline for tracking trends. Valid trend comparisons can be made for 1985 through 1995, 1999 through 2001, and 2002 through 2015. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, *National Household Survey on Drug Abuse: Main Findings*, selected years, 1985 through 2001, and National Survey on Drug Use and Health, 2002 through 2015. Retrieved April 30, 2017, from <http://www.samhsa.gov/data/population-data-nsduh/reports?tab=38>. (This table was prepared May 2017.)

Table 233.10. Number and percentage of public schools that took a serious disciplinary action in response to specific offenses, number of serious actions taken, and percentage distribution of actions, by type of offense, school level, and type of action: Selected years, 1999–2000 through 2009–10
[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Prior to 2005–06, the questionnaire wording was simply “a weapon other than a firearm” (instead of “a weapon other than a firearm or explosive device”).

²In the 1999–2000 questionnaire, only two items are the same as in questionnaires for later years—the item on physical attacks or fights and the item on insubordination. There are no comparable 1999–2000 data for serious disciplinary actions taken in response to the other specific offenses listed in this table, nor for total actions taken in response to all the listed offenses.

³Totals for 2009–10 are not comparable to totals for other years, because the 2009–10 questionnaire did not include an item on insubordination.

⁴Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is

not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

NOTE: Serious disciplinary actions include out-of-school suspensions lasting 5 or more days, but less than the remainder of the school year; removals with no continuing services for at least the remainder of the school year; and transfers to specialized schools for disciplinary reasons. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session, unless the survey specified otherwise. Detail may not sum to totals because of rounding and because schools that reported serious disciplinary actions in response to more than one type of offense were counted only once in the total number or percentage of schools.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹The total includes all students whose parents provided a response about their child's suspension and expulsion status both on the base-year (2009) questionnaire and on the first follow-up (2012) questionnaire.²Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.³A school engagement scale was constructed based on students' responses to questions about how frequently they went to class without homework done, without pencil or paper, without books, or late. Students' school engagement is considered low if they were in the bottom quarter of the scale distribution, middle if they were in the middle two quarters, and high if they were in the highest quarter.⁴A school belonging scale was constructed based on the extent to which students agreed or disagreed that they felt safe at school, that they felt proud of being part of the school, that there were always teachers or other adults at school they could talk to if they had a problem, that school was often a waste of time, and that getting good grades was important to them. Students' sense of school belonging is considered low if they were in the bottom quarter of the scale distribution, middle if they were in the middle two quarters, and high if they were in the highest quarter.

NOTE: Estimates weighted by W2W1PAR. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

¹Corporal punishment is paddling, spanking, or other forms of physical punishment imposed on a student.

²An in-school suspension is an instance in which a student is temporarily removed from his or her regular classroom(s) for at least half a day but remains under the direct supervision of school personnel.

³For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act, out-of-school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer. This does not include students who served their suspension in the school. For students with disabilities served under the Individuals with Disabilities Education Act (IDEA), out-of-school suspensions are instances in which a student is temporarily removed from his or her regular school for disciplinary purposes to another setting (e.g., home, behavior center). This includes both removals in which no Individualized Education Program (IEP) services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided.

⁴Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.

⁵Referral to law enforcement is an action by which a student is reported to any law enforcement agency or official, including a school police unit, for an incident that occurs on school

grounds, during school-related events, or while taking school transportation, regardless of whether official action is taken.

⁶A school-related arrest is an arrest of a student for any activity conducted on school grounds, during off-campus school activities (including while taking school transportation), or due to a referral by any school official.

⁷Totals include expulsions with and without educational services.

⁸Includes all expulsions under zero-tolerance policies, including expulsions with and without educational services. A zero-tolerance policy results in mandatory expulsion of any student who commits one or more specified offenses (for example, offenses involving guns, other weapons, violence, or similar factors, or combinations of these factors). A policy is considered zero tolerance even if there are some exceptions to the mandatory aspect of the expulsion, such as allowing the chief administering officer of a local education agency to modify the expulsion on a case-by-case basis.

⁹Data by race/ethnicity exclude data for students with disabilities served only under Section 504 (not receiving services under IDEA).

NOTE: Student counts between 1 and 3 are displayed as 1-3 to protect student privacy. Detail may not sum to totals because of privacy protection routines applied to the data. Race categories exclude persons of Hispanic ethnicity.

‡Reporting standards not met (too few cases).

¹Corporal punishment is paddling, spanking, or other forms of physical punishment imposed on a student.

²An in-school suspension is an instance in which a student is temporarily removed from his or her regular classroom(s) for at least half a day but remains under the direct supervision of school personnel.

³For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act, out-of-school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer. This does not include students who served their suspension in the school. For students with disabilities served under the Individuals with Disabilities Education Act (IDEA), out-of-school suspensions are instances in which a student is temporarily removed from his or her regular school for disciplinary purposes to another setting (e.g., home, behavior center). This includes both removals in which no Individualized Education Program (IEP) services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided.

⁴Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.

⁵Referral to law enforcement is an action by which a student is reported to any law enforcement agency or official, including a school police unit, for an incident that occurs on school

grounds, during school-related events, or while taking school transportation, regardless of whether official action is taken.

⁶A school-related arrest is an arrest of a student for any activity conducted on school grounds, during off-campus school activities (including while taking school transportation), or due to a referral by any school official.

⁷Totals include expulsions with and without educational services.

⁸Includes all expulsions under zero-tolerance policies, including expulsions with and without educational services. A zero-tolerance policy results in mandatory expulsion of any student who commits one or more specified offenses (for example, offenses involving guns, other weapons, violence, or similar factors, or combinations of these factors). A policy is considered zero tolerance even if there are some exceptions to the mandatory aspect of the expulsion, such as allowing the chief administering officer of a local education agency to modify the expulsion on a case-by-case basis.

⁹Data by race/ethnicity exclude data for students with disabilities served only under Section 504 (not receiving services under IDEA).

NOTE: The percentage of students receiving a disciplinary action is calculated by dividing the cumulative number of students receiving that type of disciplinary action for the entire 2011–12 school year by the student enrollment based on a count of students taken on a single day between September 27 and December 31. Race categories exclude persons of Hispanic ethnicity.

¹For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act, out-of-school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer. This does not include students who served their suspension in the school. For students with disabilities served under the Individuals with Disabilities Education Act (IDEA), out-of-school suspensions are instances in which a student is temporarily removed from his or her regular school for disciplinary purposes to another setting (e.g., home, behavior center). This includes both removals in which no Individualized Education Program (IEP) services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided.

²Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes, with or without the continu-

ation of educational services, for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.

³Data by race/ethnicity exclude students with disabilities served only under Section 504 (not receiving services under IDEA).

NOTE: Student counts between 1 and 3 are displayed as 1-3 to protect student privacy. Detail may not sum to totals because of privacy protection routines applied to the data. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection, "2011–12 Discipline Estimations by State." (This table was prepared November 2015.)

#Rounds to zero.

†Reporting standards not met (too few cases).

¹For students without disabilities and students with disabilities served only under Section 504 of the Rehabilitation Act, out-of-school suspensions are instances in which a student is excluded from school for disciplinary reasons for 1 school day or longer. This does not include students who served their suspension in the school. For students with disabilities served under the Individuals with Disabilities Education Act (IDEA), out-of-school suspensions are instances in which a student is temporarily removed from his or her regular school for disciplinary purposes to another setting (e.g., home, behavior center). This includes both removals in which no Individualized Education Program (IEP) services are provided because the removal is 10 days or less and removals in which IEP services continue to be provided.

²Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes, with or without the continuation of educational services, for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.

³Data by race/ethnicity exclude students with disabilities served only under Section 504 (not receiving services under IDEA).

NOTE: The percentage of students receiving a disciplinary action is calculated by dividing the cumulative number of students receiving that type of disciplinary action for the entire 2011–12 school year by the student enrollment based on a count of students taken on a single day between September 27 and December 31. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection, “2011–12 Discipline Estimations by State” and “2011–12 Estimations for Enrollment.” (This table was prepared November 2015.)

—Not available.

¹Includes violent incidents with and without physical injury.

²U.S. totals exclude Vermont data, which were not reported.

³This state did not report state-level counts of discipline incidents, but did report school-level counts. The sums of the school-level counts are displayed in place of the unreported state-level counts.

⁴California reported alcohol incidents in the illicit drug category.

†Not applicable.

¹Data for 2013–14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013–14 results.

²Does not include random dog sniffs.

³For example, a system for reporting threats through online submission, telephone hotline, or written submission via drop box.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Access to buildings is controlled during school hours (e.g., by locked or monitored doors).²Access to grounds is controlled during school hours (e.g., by locked or monitored gates).³All students must pass through a metal detector each day.⁴Examples of contraband include drugs and weapons. The “sweeps” category does not include dog sniffs.⁵Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is

not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available.

⁶The classification of schools by the percentage of students eligible for free or reduced-price lunch was computed based on data obtained from the Common Core of Data.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

¹Schools were not asked whether they had drilled students on the use of a plan for suicide threat or incident, severe risk of terrorist attack, and pandemic flu.

²For example, earthquakes or tornadoes.

³For example, release of mustard gas, anthrax, smallpox, or radioactive materials.

⁴In 2007–08 and 2009–10, schools were asked whether they had a plan for procedures to be performed if the U.S. national threat level were changed to Red (Severe Risk of Terrorist Attack) by the Department of Homeland Security. In 2013–14, schools were asked whether they had a plan for procedures to be performed if an “imminent threat alert” were issued by the Department of Homeland Security’s National Terrorism Advisory System.

⁵Data on suicide threat or incident, severe risk of terrorist attack, and pandemic flu were not collected in 2003–04 and 2005–06.

⁶Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade

is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available for 2013–14.

⁷Data for 2013–14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013–14 results.

⁸Because the 2013–14 survey did not collect data on the percentage of students eligible for free or reduced-price lunch, the classification of schools by the percentage of students eligible for free or reduced-price lunch was computed based on data obtained from the Common Core of Data.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04, 2005–06, 2007–08, and 2009–10 School Survey on Crime and Safety (SSOCS), 2004, 2006, 2008, and 2010; Fast Response Survey System (FRSS), “School Safety and Discipline: 2013–14,” FRSS 106, 2014; and Common Core of Data (CCD), “Public Elementary/Secondary School Universe Survey,” 2013–14. (This table was prepared September 2015.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹“Security guards” and “security personnel” do not include law enforcement. School Resource Officers include all career law enforcement officers with arrest authority who have specialized training and are assigned to work in collaboration with school organizations.

²Data for 2013–14 were collected using the Fast Response Survey System, while data for earlier years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and change in survey administration may have impacted 2013–14 results.

³Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not

higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available for 2013–14.

⁴For 2013–14, the questionnaire did not include a question about the percentage of students eligible for free or reduced-price lunch, so the classification of schools by the percentage of eligible students was computed based on data obtained from the Common Core of Data.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Detail may not sum to totals because of rounding.

¹For 2006 and later years, includes the "Two or more races" category, which did not appear on earlier questionnaires. For 2003 and earlier years, includes an "Other" category. Respondents who selected "Other" were instructed to specify what this meant. Examination of these written-in responses, which account for less than 1 percent of the records, indicates that the majority refer to individuals of mixed racial/ethnic identity.

²Delinquent/criminal offenses range from those committed against persons (e.g., assault) to technical violations, which include violations of probation, parole, or valid court orders. A "status" offense is illegal for underage persons, but not for adults (e.g., truancy or underage drinking).

³Private facilities are operated by private nonprofit or for-profit corporations or organizations.

⁴Although respondents may select more than one type for their facility, this table assigns each facility to a single primary type based on an analysis that applies a hierarchy rule. For 1997, the facility type data exclude 327 juveniles who were in facilities identified only as "Other."

⁵Prior to 2003, residential treatment centers were included in the "Group home" category.

NOTE: Data are from a biennial survey of all secure and nonsecure residential placement facilities that house juvenile offenders, defined as persons younger than 21 who are held in a residential setting as a result of some contact with the justice system (they are charged with or adjudicated for an offense). Data do not include adult prisons, jails, federal facilities, or facilities exclusively for drug or mental health treatment or for abused or neglected youth. The data provide 1-day population counts of juveniles in residential placement facilities; 1-day counts differ substantially from the annual admission and release data used to measure facility population flow. For definitions of specific terms, see <http://www.ojdp.gov/ojstatbb/ezacjrp/asp/glossary.asp>.

—Not available.

X Denotes that the state has a policy. A blank denotes that the state does not have a policy.

¹Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first.

²Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal with or without meeting conditions for a diploma or equivalency.

³Parent/guardian may delay child's entry until a later age per state law/regulation.

⁴Student may continue in the program if 22nd birthday falls before the end of the school year.

⁵Attendance is compulsory until age 18 for Manatee County students, unless they earn a high school diploma prior to reaching their 18th birthday.

⁶Through age 21 or until child graduates with a high school or special education diploma or equivalent.

⁷Some schools operate on a multitrack system; the schools are open year-round, but different cohorts start and end at different times.

⁸Children enrolled in preschool programs (4 years old on or before September 15) are considered to be of compulsory school attendance age.

⁹To be determined by rules and regulations adopted by the state board.

¹⁰All districts have adopted a policy to raise the upper compulsory school age from 16 to 18. The policy will take effect for most districts in the 2015–16 school year.

¹¹Children from birth through age 2 are eligible for additional services.

¹²Must be age 5 before October 15, and not age 20 before start of school year.

¹³Policies about year-round schools are decided locally.

¹⁴State did not participate in 2008 online survey. Data are from 2006.

¹⁵In certain school districts in Nevada, the lowest performing schools with the highest numbers of limited English proficient students will start offering full-day kindergarten programs.

¹⁶The Abbott District is required to offer full-day kindergarten.

¹⁷Local boards of education can require school attendance until age 17 unless employed. The boards of education of Syracuse, New York City, Rochester, Utica, and Buffalo are authorized to require kindergarten attendance at age 5 unless the parents elect not to enroll their child until the following September or the child is enrolled in nonpublic school or in home instruction.

¹⁸Student may complete school year if 21st birthday occurs while attending school.

¹⁹All children must attend kindergarten before age 7.

²⁰Full-day kindergarten is being phased in beginning in the 2012–13 school year, starting with the highest poverty schools. Statewide implementation will be achieved by 2017–18.

²¹Children with severe disabilities may begin receiving services at age 3.

²²Statute requires one full-day program per district.

NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children.

—Not available.

†Not applicable.

X Denotes that the state has a policy. A blank denotes that the state does not have a policy.

¹Or an equivalent number of hours or minutes of instruction per year.

²Does not include time for in-service or staff development or parent-teacher conferences.

³Includes time for in-service or staff development or parent-teacher conferences.

⁴Students must enroll in at least 4 subjects that meet at least 720 hours.

⁵Fees permitted at the high school level for nonrequired or supplementary textbooks.

⁶State Department of Education prepares a list of suggestions, but the districts choose.

⁷Through 2014–15, districts are allowed to shorten the 180-day instructional year to 175 days without fiscal penalty.

⁸Statewide textbook adoption is only at the elementary level. Adoption practices have been suspended until the 2015–16 school year.

⁹No statewide policy; varies by district.

¹⁰1996 data.

¹¹For schools on double-session or approved experimental calendar: 630 (K–3); 810 (4–12).

¹²Does not apply to charter and multitrack schools.

¹³For the 2014–15 and 2015–16 school years.

¹⁴Fees for lost or damaged books permitted.

¹⁵Instructional time for graduating seniors may be reduced.

¹⁶1998 data.

¹⁷Fees permitted, but if 5 percent or more of the voters in a district petition the school board, a majority of the district's voters may decide to furnish free textbooks to students.

¹⁸Fees permitted for students in grades 9–12, but students who qualify for free or reduced-price lunch are exempted.

¹⁹Refundable or security deposits permitted.

²⁰174 days required for a 5-day week; 142 days required for a 4-day week.

²¹Local districts may select textbooks not on the state recommended list provided the textbooks meet specific criteria and the selection is based on recommendations by the district's curriculum materials review committee.

²²Starting in the 2015–16 school year, grades 9 through 12 will transition to 1,080 hours and kindergarten will transition to 1,000 hours statewide by the 2017–18 school year.

²³A district may provide free textbooks to students when, in its judgment, the best interests of the district will be served.

NOTE: Minimum number of instructional days refers to the actual number of days that pupils have contact with a teacher. Some states allow for different types of school calendars by setting instructional time in both days and hours, while others use only days or only hours. For states in which the number of days or hours varies by grade, the relevant grade(s) appear in parentheses.

†Not applicable.

¹Exit exam subjects tested: E = English (including writing), M = Mathematics, S = Science, and H = History/social studies.

²A certificate of attendance is an example of an alternative credential for students who do not meet all requirements for a standard diploma. Depending on an individual state's policies, alternative credentials may be offered to students with disabilities, students who fail exit exams, or other students who do not meet all requirements.

³Requirement takes effect for class of 2020.

⁴Students must pass either the science or social studies components of the Graduation Exit Examination (GEE) to receive a standard diploma.

⁵Students can graduate by passing statewide reading and writing assessments and either passing mathematics assessments or meeting other requirements.

⁶Expressed in semester credits instead of Carnegie units.

⁷To receive the standard diploma, students must pass tests in algebra 1, English 2, and two of the following five subjects: algebra 2, biology 1, English 3, geometry, and U.S. history.

⁸Requirement takes effect for class of 2014.

⁹To receive the standard diploma, students must earn at least six verified credits by passing end-of-course assessments. One of those credits may be earned by passing a student-selected test in computer science, technology, career and technical education, or other areas. NOTE: Local school districts frequently have other graduation requirements in addition to state requirements. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course.

—Not available.

#Rounds to zero.

¹Includes revenues from gifts, and tuition and fees from patrons.

²Data have been revised from previously published figures.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Beginning in 1989–90, revenues for state education agencies were excluded and new survey collection procedures were initiated; data may not be entirely comparable with figures for earlier years. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States*, 1919–20 through 1949–50; *Statistics of State School Systems*, 1959–60 and 1969–70; *Revenues and Expenditures for Public Elementary and Secondary Education, 1979–80*; and Common Core of Data (CCD), “National Public Education Financial Survey,” 1989–90 through 2013–14. (This table was prepared July 2016.)

¹Located inside an urbanized area and inside a principal city with a population of at least 250,000.

²Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.

³Located inside an urbanized area and inside a principal city with a population less than 100,000.

⁴Located inside an urbanized area and outside a principal city with a population of 250,000 or more.

⁵Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.

⁶Located inside an urbanized area and outside a principal city with a population less than 100,000.

⁷Located inside an urban cluster that is 10 miles or less from an urbanized area.

⁸Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.

⁹Located inside an urban cluster that is more than 35 miles from an urbanized area.

¹⁰Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.

¹¹Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

¹²Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.

¹³Excludes revenues from other in-state school systems.

¹⁴Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.
NOTE: Total includes data for some school districts not identified by locale. Detail may not sum to totals because of rounding.

—Not available.

¹Includes expenditures for summer schools, adult education, community colleges, and community services.²Prior to 1969–70, excludes capital outlay by state and local school housing authorities.³Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services.⁴Plant operation also includes plant maintenance.⁵Data not comparable to figures prior to 1989–90.⁶Data have been revised from previously published figures.⁷Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Beginning in 1959–60, includes Alaska and Hawaii. Beginning in 1989–90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989–90, extensive changes were made in the data collection procedures. Detail may not sum to totals because of rounding.

†Not applicable.

¹Data have been revised from previously published figures.

²Includes estimated data for subfunctions of food services and enterprise operations.

³Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

⁴Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.

⁵Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

Includes very small amounts for direct program support made by state education agencies for local school districts.

⁷Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

¹Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

²Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

³Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

⁴Includes expenditures for guidance, health, attendance, and speech pathology services.

⁵Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

—Not available.

¹Data for 1919–20 to 1953–54 are based on school-year enrollment.

²Unadjusted (or “current”) dollars have not been adjusted to compensate for inflation.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

⁴Excludes “Other current expenditures,” such as community services, private school programs, adult education, and other programs not allocable to expenditures per student at public schools.

⁵Estimated.

⁶Revised from previously published figures.

NOTE: Beginning in 1980–81, state administration expenditures are excluded from both “total” and “current” expenditures. Current expenditures include instruction, support services, food services, and enterprise operations. Total expenditures include current expenditures, capital outlay, and interest on debt. Beginning in 1988–89, extensive changes were made in the data collection procedures.

—Not available.

¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

²Data have been revised from previously published figures.

³Includes estimated data for subfunctions of food services and enterprise operations.

⁴Includes expenditures for guidance, health, attendance, and speech pathology services.

⁵Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

⁶Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.

⁷Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

⁸Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 1990–91 through 2013–14. (This table was prepared July 2016.)

—Not available.

¹Unadjusted (or “current”) dollars have not been adjusted to compensate for inflation.

²Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Current expenditures include instruction, support services, food services, and enterprise operations. Expenditures for state administration are excluded in all years except

1969–70 and 1979–80. Beginning in 1989–90, extensive changes were made in the data collection procedures. There are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1969–70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979–80; and Common Core of Data (CCD), “National Public Education Financial Survey,” 1989–90 through 2013–14.* (This table was prepared July 2016.)

(This table was prepared July 2016.)

CHAPTER 3

Postsecondary Education

Postsecondary education includes academic, career and technical, and continuing professional education programs after high school. American colleges and universities and career/technical institutions offer a diverse array of postsecondary educational experiences. For example, a community college normally offers the first 2 years of a standard college curriculum as well as a selection of terminal career and technical education programs. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as programs leading to advanced degrees. A specialized career/technical institution offers training programs of varying lengths that are designed to prepare students for specific careers.

This chapter provides an overview of the latest statistics on postsecondary education, including data on various types of postsecondary institutions and programs. However, to maintain comparability over time, most of the data in the *Digest* are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in Title IV federal financial aid programs.¹ Degree-granting institutions include almost all 2- and 4-year colleges and universities; they exclude institutions offering only career and technical programs of less than 2 years' duration and continuing education programs. The degree-granting institution classification currently used by the National Center for Education Statistics (NCES) includes approximately the same set of institutions as the higher education institution classification that was used by NCES prior to 1996–97.² This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

¹ Title IV programs, which are administered by the U.S. Department of Education, provide financial aid to postsecondary students.

² Included in the current degree-granting classification are some institutions (primarily 2-year colleges) that were not previously designated as higher education institutions. Excluded from the current degree-granting classification are a few institutions that were previously designated as higher education institutions even though they did not award an associate's or higher degree. The former higher education classification was defined as including institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The former higher education institutions offered courses that led to an associate's or higher degree, or were accepted for credit towards a degree.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for college graduates is shown in chapter 5. Chapter 7 contains data on college libraries. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes. See chapter 5 for information on adults' participation in nonpostsecondary education, such as adult secondary education classes (e.g., to prepare for the GED test) or English as a Second Language (ESL) classes.

Enrollment

Fall enrollment in degree-granting postsecondary institutions increased 23 percent between 1995 and 2005 (table 303.10 and figure 12). Between 2005 and 2015, enrollment in degree-granting postsecondary institutions increased 14 percent, from 17.5 million to 20.0 million. The overall increase between 2005 and 2015 reflects an increase of 20 percent between 2005 and 2010, followed by a decrease of 5 percent between 2010 and 2015. Similarly, the number of full-time students rose 21 percent from 2005 to 2010, then fell 6 percent from 2010 to 2015, for an overall increase of 14 percent between 2005 and 2015. The number of part-time students rose 20 percent from 2005 to 2011, then fell 4 percent from 2011 to 2015, for an overall increase of 15 percent between 2005 and 2015. Between 2005 and 2015, the number of female students rose 12 percent, while the number of male students rose 17 percent. Although male enrollment increased by a larger percentage than female enrollment between 2005 and 2015, the majority (56 percent) of students in 2015 were female. Both male and female enrollment increases between 2005 and 2015 reflect increases during the first part of this period followed by smaller decreases during the most recent part of the period (a decrease of 4 percent for males from 2010 to 2015 and a decrease of 6 percent for females). In addition to enrollment in degree-granting institutions, about 412,000 students attended non-degree-granting, Title IV eligible, postsecondary institutions in fall 2015 (table 303.20). These institutions are postsecondary institutions that do not award associate's or higher degrees; they include, for example, institutions that offer only career and technical programs of less than 2 years' duration.

Enrollment trends can be affected both by changes in population and by changing rates of enrollment. Between 2005 and 2015, the number of 18- to 24-year-olds in the population rose from 29.4 million to 31.2 million, an increase of 6 percent (table 101.10). The percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions was 40 percent in 2015, which was not measurably different from the percentage in 2005 (table 302.60). For male 18- to 24-year-olds, the enrollment rate was higher in 2015 (38 percent) than in 2005 (35 percent). The comparable enrollment rate for females (43 percent) was not measurably different from the rate in 2005. The enrollment rate for Hispanic 18- to 24-year-olds rose from 25 percent in 2005 to 37 percent in 2015. In 2015, the enrollment rate for Whites in the same age group was 42 percent, and the enrollment rate for Blacks was 35 percent; neither of these rates was measurably different from the corresponding rate in 2005.

Like enrollment in degree-granting institutions for the United States as a whole, the number of students enrolled in degree-granting institutions located within individual states generally has been lower in recent years (table 304.10 and figure 13). Overall, fall enrollment in degree-granting institutions declined 5 percent between 2010 and 2015. Similarly, fall 2015 enrollment was lower than fall 2010 enrollment in the majority of states (42). The largest declines were in Iowa (-28 percent), Arizona (-18 percent), New Mexico (-15 percent), and Michigan (-14 percent). In contrast, enrollment was higher in 2015 than in 2010 in 8 states and the District of Columbia. The largest increases were in New Hampshire (64 percent), followed by Idaho (42 percent), Utah (15 percent), and Delaware (9 percent).

Between fall 2005 and fall 2015, the percentage increase in the number of students enrolled in degree-granting institutions was higher for students under age 25 than for older students; and this pattern is expected to continue in the coming years (table 303.40 and figure 14). The enrollment of students under age 25 increased by 15 percent from 2005 to 2015, while the enrollment of those age 25 and over increased by 13 percent. From 2015 to 2026, NCES projects the increase for students under age 25 to be 17 percent, compared with 8 percent for students age 25 and over.

Enrollment trends have differed at the undergraduate and postbaccalaureate levels. Undergraduate enrollment increased 47 percent between fall 1970 and fall 1983, when it reached 10.8 million (table 303.70). Undergraduate enrollment dipped to 10.6 million in 1984 and 1985, but then increased each year from 1985 to 1992, rising 18 percent before stabilizing between 1992 and 1998. Between 2005 and 2015, undergraduate enrollment rose 14 percent overall, from 15.0 million to 17.0 million. This overall increase reflects a 21 percent increase in undergraduate enrollment between 2005 and 2010 (when undergraduate enrollment reached 18.1 million), followed by a 6 percent decrease between 2010 and 2015. Postbaccalaureate enrollment increased 34 percent between 1970 and 1984, with most of this increase occurring in the early and mid-1970s (table 303.80). Postbaccalaureate enrollment increased from 1985

to 2015, rising a total of 78 percent. During the last decade of this period, between 2005 and 2015, postbaccalaureate enrollment rose 17 percent, from 2.5 million to 2.9 million.

Since fall 1988, the number of female students in postbaccalaureate programs has exceeded the number of male students. Between 2005 and 2015, the number of full-time male postbaccalaureate students increased by 24 percent, compared with a 25 percent increase in the number of full-time female postbaccalaureate students. Among part-time postbaccalaureate students, the number of males enrolled in 2015 was 6 percent higher than in 2005, while the number of females was 8 percent higher.

Eleven percent of undergraduates in both 2007–08 and 2011–12 reported having a disability (table 311.10). In 2011–12, the percentage of undergraduates who reported having a disability was 11 percent for both male and female students. However, there were some differences in the percentages of undergraduates with disabilities by characteristics such as veteran status, age, dependency status, and race/ethnicity. For example, 21 percent of undergraduates who were veterans reported having a disability, compared with 11 percent of undergraduates who were not veterans. The percentage of undergraduates having a disability was higher among those age 30 and over (16 percent) than among 15- to 23-year-olds (9 percent) and 24- to 29-year-olds (11 percent). Among dependent undergraduates, 9 percent reported having a disability, which was lower than the percentages for independent undergraduates who were married (13 percent) or unmarried (14 percent). Compared to undergraduates of other racial/ethnic groups, a lower percentage of Asian undergraduates (8 percent) had a disability. The percentage of postbaccalaureate students who reported having a disability in 2011–12 (5 percent) was lower than the percentage for undergraduates (11 percent).

The percentage of American college students who are Hispanic, Asian/Pacific Islander, and Black has been increasing (table 306.10). From fall 1976 to fall 2015, the percentage of Hispanic students rose from 4 percent to 17 percent of all U.S. residents enrolled in degree-granting postsecondary institutions, and the percentage of Asian/Pacific Islander students rose from 2 percent to 7 percent. The percentage of Black students increased from 10 percent in 1976 to 14 percent in 2015, but the 2015 percentage reflects a decrease since 2011, when Black students made up 15 percent of all enrolled U.S. residents. The percentage of American Indian/Alaska Native students was higher in 2015 (0.8 percent) than in 1976 (0.7 percent). During the same period, the percentage of White students fell from 84 percent to 58 percent. Race/ethnicity is not reported for nonresident aliens, who made up 5 percent of total enrollment in 2015.

Of the 20.0 million students enrolled in degree-granting postsecondary institutions in fall 2015, some 15 percent took at least one distance education course as part of their program that included a mix of in-person and distance education courses (table 311.15). In addition, 14 percent of students took their college program exclusively through distance education courses. The remaining 70 percent of stu-

dents took no distance education courses. About 10 percent of students at public institutions took their coursework exclusively through distance education courses, compared to 16 percent of students at private nonprofit institutions and 56 percent of students at private for-profit institutions. About 12 percent of undergraduates took their coursework exclusively through distance education courses, compared to 26 percent of postbaccalaureate students.

Despite the sizable numbers of small degree-granting colleges, most students attend larger colleges and universities. In fall 2015, some 44 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 4 percent of all college students (table 317.40). While 12 percent of campuses enrolled 10,000 or more students, they accounted for 60 percent of total college enrollment.

In fall 2015, the five institutions with the highest enrollment were University of Phoenix, with 165,700 students; Ivy Tech Community College, with 81,700 students; Liberty University, with 80,500 students; Lone Star College System, with 70,700 students; and Western Governors University, with 70,500 students (table 312.10).

Faculty, Staff, and Salaries

Approximately 3.9 million people were employed in degree-granting postsecondary institutions in fall 2015, including 1.6 million faculty, 0.4 million graduate assistants, and 2.0 million other staff (table 314.20). Out of the 1.6 million faculty in 2015, 0.8 million were full-time and 0.7 million were part-time faculty. From 2005 to 2015, the proportion of staff who were faculty rose from 38 percent to 40 percent. During the same period, the proportion of other staff not engaged in teaching decreased from 52 percent to 51 percent. The proportion of graduate assistants was 9 percent in both 2005 and 2015. The full-time-equivalent (FTE) student/FTE staff ratio at degree-granting institutions was 5.1 in both 2005 and 2015 (table 314.10 and figure 15). The FTE student/FTE faculty ratio was lower in 2015 (14.3) than in 2005 (15.0).

Degree-granting postsecondary institutions differ in their practices of employing part-time and full-time staff. In fall 2015, some 48 percent of the employees at public 2-year institutions were employed full time, compared with 68 percent at public 4-year institutions, 69 percent at private nonprofit 4-year institutions, and 73 percent at private nonprofit 2-year institutions (table 314.30). The percentage of faculty employed full time was higher at public 4-year institutions (67 percent) than at private nonprofit 4-year institutions (55 percent), private for-profit 4-year institutions (15 percent), private nonprofit 2-year institutions (55 percent), private for-profit 2-year institutions (37 percent), and public 2-year institutions (32 percent). In general, the number of full-time staff has been growing at a slower rate than the number of part-time staff (table 314.20). Between 2005 and 2015, the number of full-time staff increased by 15 percent, compared to an increase of 17 percent in the number of part-time staff. Most of the increase in part-time staff was due to increases

in the number of part-time faculty (21 percent) and graduate assistants (17 percent) during this time period.

In fall 2015, some 7 percent of faculty at degree-granting institutions were Black (based on a faculty count that excludes nonresident aliens and other persons whose race/ethnicity was unknown), 8 percent were Asian, 5 percent were Hispanic, 0.5 percent were American Indian/Alaska Native, 1 percent were of Two or more races, and less than 0.5 percent were Pacific Islander (table 314.40). About 78 percent of all faculty were White; 40 percent were White males and 38 percent were White females. Staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, or of Two or more races made up 27 percent of graduate assistants and 30 percent of other staff in nonfaculty positions in 2015. The proportion of total staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races was similar at public 4-year institutions (27 percent), public 2-year institutions (26 percent) and private nonprofit 4-year institutions (25 percent), but the proportion was higher at private for-profit 4-year institutions (32 percent), private nonprofit 2-year institutions (34 percent), and private for-profit 2-year institutions (39 percent).

On average, full-time faculty and instructional staff spent 58 percent of their time teaching in 2003 (*web-only table 315.30*). Research and scholarship accounted for 20 percent of their time, and 22 percent was spent on other activities (administration, professional growth, etc.).

Faculty salaries generally lost purchasing power during the 1970s. In constant 2015–16 dollars, average salaries for faculty on 9-month contracts declined by 16 percent during the period from 1970–71 (\$76,200) to 1980–81 (\$64,100) (table 316.10). During the 1980s, average salaries rose and recouped most of the losses. Between 1990–91 and 2015–16, there was a further increase in average faculty salaries, resulting in an average salary in 2015–16 (\$82,100) that was 8 percent higher than the average salary in 1970–71. The average salary for male faculty was higher than the average salary for female faculty in all years for which data are available. The average salary for male faculty in 2015–16 (\$89,200) was 4 percent higher than in 2005–06 (\$85,700 in constant 2015–16 dollars). For female faculty, the average salary in 2015–16 (\$73,800) was 5 percent higher than the salary in 2005–06 (\$70,200). In 2015–16, average salaries for male faculty were 21 percent higher than for female faculty, compared to 22 percent higher in 2005–06.

The percentage of faculty with tenure has declined since 1993–94. Of those faculty at institutions with tenure systems, 47 percent of full-time faculty had tenure in 2015–16, compared with 56 percent in 1993–94 (table 316.80). Also, the percentage of institutions with tenure systems decreased between 1993–94 (63 percent) and 2015–16 (52 percent). Part of this change was due to the expansion in the number of for-profit institutions (table 317.10), relatively few of which have tenure systems (1.3 percent in 2015–16) (table 316.80). At institutions with

tenure systems, there were differences between males and females in the percentage of full-time instructional faculty having tenure. Fifty-six percent of males had tenure in 2015–16, compared with 42 percent of females. In 2015–16, about 52 percent of full-time instructional faculty had tenure at public institutions with tenure systems, compared with 45 percent at private nonprofit institutions with tenure systems and 17 percent at private for-profit institutions with tenure systems.

Degrees

During the 2015–16 academic year, 4,583 accredited institutions offered degrees at the associate's level or above (table 317.10). These included 1,620 public institutions, 1,701 private nonprofit institutions, and 1,262 private for-profit institutions. Of the 4,583 degree-granting institutions, 3,004 were 4-year institutions that awarded degrees at the bachelor's or higher level, and 1,579 were 2-year institutions that offered associate's degrees as their highest award. In 2014–15, associate's degrees were awarded by 2,971 institutions, bachelor's degrees by 2,597 institutions, master's degrees by 1,926 institutions, and doctor's degrees by 954 institutions (table 318.60). In addition to degree-granting institutions, 2,438 non-degree-granting institutions offered postsecondary education in 2015–16, but did not grant degrees at the associate's or higher level (table 317.30).

Growing numbers of people are completing postsecondary degrees. Between 2004–05 and 2014–15, the number of associate's, bachelor's, master's, and doctor's degrees that were conferred rose (table 318.10). During this period, the number of associate's degrees increased by 46 percent, the number of bachelor's degrees increased by 32 percent, the number of master's degrees increased by 31 percent, and the number of doctor's degrees increased by 33 percent. The doctor's degree total includes most degrees formerly classified as first-professional, such as M.D. (medical), D.D.S. (dental), and J.D. (law) degrees. In addition to degrees awarded at the associate's and higher levels, 961,000 certificates were awarded by postsecondary institutions participating in federal Title IV financial aid programs in 2014–15 (table 320.20).

Since the mid-1980s, more females than males have earned associate's, bachelor's, and master's degrees (table 318.10). Beginning in 2005–06, the number of females earning doctor's degrees has also exceeded the number of males. Between 2004–05 and 2014–15, the number of associate's and bachelor's degrees awarded to males increased at a higher rate than the number awarded to females. The number of associate's degrees awarded to males increased by 48 percent during this period, while the number awarded to females increased by 44 percent. The number of bachelor's degrees awarded to males increased by 33 percent, while the number awarded to females increased by 31 percent. In contrast, the number of master's and doctor's degrees increased at a higher rate for females than males between 2004–05 and 2014–15. The number of females earning master's degrees rose 32 percent during this period, while the number of

males earning master's degrees rose 29 percent. Also, the number of females earning doctor's degrees increased 39 percent, while the number of males earning doctor's degrees increased 26 percent.

Of the 1,895,000 bachelor's degrees conferred in 2014–15, the greatest numbers of degrees were conferred in the fields of business (364,000), health professions and related programs (216,000), social sciences and history (167,000), psychology (118,000), biological and biomedical sciences (110,000), engineering (98,000), visual and performing arts (96,000), and education (92,000) (table 322.10). At the master's degree level, the greatest numbers of degrees were conferred in the fields of business (185,000), education (147,000), and health professions and related programs (103,000) (table 323.10). At the doctor's degree level, the greatest numbers of degrees were conferred in the fields of health professions and related programs (71,000), legal professions and studies (40,300), education (11,800), engineering (10,200), biological and biomedical sciences (8,100), psychology (6,600), and physical sciences and science technologies (5,800) (table 324.10).

In recent years, the numbers of bachelor's degrees conferred have followed patterns that differed significantly by field of study. While the number of bachelor's degrees conferred increased by 32 percent overall between 2004–05 and 2014–15, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 322.10 and figure 16). For example, the number of degrees conferred in computer and information sciences decreased 27 percent between 2004–05 and 2009–10, but then increased 50 percent between 2009–10 and 2014–15. In contrast, the number of bachelor's degrees conferred in the combined fields of engineering and engineering technologies increased 12 percent between 2004–05 and 2009–10, and then increased a further 30 percent between 2009–10 and 2014–15. In a number of other major fields, the number of bachelor's degrees also increased by higher percentages in the second half of the 10-year period than in the first half. For example, the number of degrees conferred in agriculture and natural resources increased by 15 percent between 2004–05 and 2009–10 and then by 38 percent between 2009–10 and 2014–15. The number of degrees conferred in health professions and related programs increased by 61 percent between 2004–05 and 2009–10 and then by 67 percent between 2009–10 and 2014–15. Also, the number of degrees conferred in public administration and social services increased by 17 percent between 2004–05 and 2009–10 and then by 35 percent between 2009–10 and 2014–15. Other fields with sizable numbers of degrees (over 5,000 in 2014–15) that showed increases of 30 percent or more between 2009–10 and 2014–15 included homeland security, law enforcement, and firefighting (44 percent); parks, recreation, leisure, and fitness studies (47 percent); and mathematics and statistics (36 percent). Some fields with sizable numbers of degrees did not have increases during the 2009–10 to 2014–15 period. The number of degrees in English language and literature/letters was 14 percent lower in 2014–15 than in 2009–10, and the number of degrees in philosophy and

religious studies was 11 percent lower. The numbers of degrees in the fields of education; architecture and related services; and area, ethnic, cultural, gender, and group studies were each 10 percent lower in 2014–15 than in 2009–10. Also, the number of degrees in foreign languages, literatures, and linguistics was 9 percent lower in 2014–15 than in 2009–10; the number of degrees in liberal arts and sciences, general studies, and humanities was 7 percent lower; and the number of degrees in social sciences and history was 3 percent lower.

Among first-time students who were seeking a bachelor's degree or its equivalent and attending a 4-year institution full time in 2009, about 40 percent completed a bachelor's degree or its equivalent at that institution within 4 years, while 55 percent did so within 5 years, and 59 percent did so within 6 years (table 326.10). These graduation rates were calculated as the total number of completers within the specified time to degree attainment divided by the cohort of students who first enrolled at that institution in 2009. Graduation rates were higher at private nonprofit institutions than at public or private for-profit institutions. For example, the 6-year graduation rate for the 2009 cohort at private nonprofit institutions was 66 percent, compared with 59 percent at public institutions and 23 percent at private for-profit institutions. Graduation rates also varied by race/ethnicity. At 4-year institutions overall, the 6-year graduation rate for Asian students in the 2009 cohort was 73 percent, compared with 63 percent for Whites, 59 percent for students of Two or more races, 54 percent for Hispanics, 49 percent for Pacific Islanders, 41 percent for American Indians/Alaska Natives, and 39 percent for Blacks.

Finances and Financial Aid

For the 2015–16 academic year, annual current dollar prices for undergraduate tuition, fees, room, and board were estimated to be \$16,757 at public institutions, \$43,065 at private nonprofit institutions, and \$23,776 at private for-profit institutions (table 330.10). Between 2005–06 and 2015–16, prices for undergraduate tuition, fees, room, and board at public institutions rose 34 percent, and prices at private nonprofit institutions rose 26 percent, after adjustment for inflation. The price for undergraduate tuition, fees, room, and board at private for-profit institutions decreased 16 percent between 2005–06 and 2015–16, after adjustment for inflation.

In 2011–12, about 84 percent of full-time undergraduate students received financial aid (grants, loans, work-study, or aid of multiple types) (table 331.10). About 73 percent of full-time undergraduates received federal financial aid in 2011–12, and 57 percent received aid from nonfederal sources. (Some students receive aid from both federal and nonfederal sources.) Section 484(r) of the Higher Education Act of 1965, as amended, suspends a student's eligibility for Title IV federal financial aid if the student is convicted of certain drug-related offenses that were committed while the student was receiving Title IV aid. For 2013–14, less than 0.01 percent of postsecondary students had their eligibility to receive aid suspended due to a conviction (table C).

Table C. Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007–08 through 2013–14

Award year	No suspension of eligibility	Suspension of eligibility		
		For part of award year	For full award year	
			Due to conviction	Due to failure to report

#Rounds to zero.

NOTE: It is not possible to determine whether a student who lost eligibility due to a drug conviction otherwise would have received Title IV aid, since there are other reasons why an applicant may not receive aid. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, Federal Student Aid, Free Application for Federal Student Aid (FAFSA), unpublished data.

In 2014–15, total revenue was \$347 billion at public institutions, \$200 billion at private nonprofit institutions, and \$20 billion at private for-profit institutions (tables 333.10, 333.40, and 333.55 and figures 17, 18, and 19). The category of student tuition and fees typically accounts for a significant percentage of total revenue and was the largest single revenue source at both private nonprofit and for-profit institutions in 2014–15 (35 and 90 percent, respectively). Tuition and fees accounted for 21 percent of revenue at public institutions in 2014–15. Public institutions typically report Pell grants as revenue from federal grants, while private institutions report Pell grants as revenue from tuition and fees; this difference in reporting contributes to the smaller percentage of revenue reported as tuition and fees at public institutions compared to private institutions. At public institutions, the share of revenue from tuition and fees in 2014–15 (21 percent) was higher than the share from state appropriations (19 percent), while the share from state appropriations in 2007–08 (25 percent) was higher than that from tuition and fees (18 percent) (table 333.10). In 2014–15, tuition and fees constituted the largest revenue category at private nonprofit 2- and 4-year institutions, private for-profit 2- and 4-year institutions, and public 4-year institutions (tables 333.10, 333.40, and 333.55). At public 2-year institutions, tuition and fees constituted the fourth-largest revenue category.

Average total expenditures of institutions per full-time-equivalent (FTE) student in 2014–15—shown in constant 2015–16 dollars throughout this paragraph—varied by institution control and level, as did changes in average total expenditures per FTE student between 2009–10 and 2014–15 (after adjustment for inflation). In 2014–15, average total expenditures per full-time-equivalent (FTE) student at public degree-granting institutions were \$31,800 (table 334.10). These 2014–15 total expenditures per FTE student were 10 percent higher than in 2009–10. In 2014–15, public 4-year institutions had average total expenditures per FTE student of \$41,100, compared with \$14,700 at public 2-year institutions. At private nonprofit institutions, total expenditures per FTE student in 2014–15 were 7 percent higher than in 2009–10 (table 334.30). In 2014–15, total expenditures per FTE student at private nonprofit institutions averaged \$54,200 at 4-year institutions and \$20,200 at 2-year institutions. The expenditures per FTE student at private for-profit institutions in 2014–15 (\$15,700) were 7 per-

cent higher than in 2009–10 (table 334.50). In 2014–15, total expenditures per FTE student at private for-profit institutions averaged \$15,500 at 4-year institutions and \$16,700 at 2-year institutions. This difference in expenditures per FTE student between 4-year and 2-year private for-profit institutions was relatively small compared to the differences between 4-year and 2-year institutions in the public and private nonprofit sectors.

At the end of fiscal year 2015, the market value of the endowment funds of colleges and universities was \$547 billion, reflecting an increase of 3 percent compared to the beginning of the fiscal year, when the total was \$533 billion (table 333.90). At the end of fiscal year 2015, the 120 institutions with the largest endowments accounted for \$406 billion, or about three-fourths of the national total. The five institutions with the largest endowments in 2015 were Harvard University (\$38 billion), Yale University (\$26 billion), the University of Texas System (\$23 billion), Princeton University (\$22 billion), and Stanford University (\$22 billion).

†Not applicable.

¹Includes both degree-granting and non-degree-granting institutions.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Degree-granting institutions grant degrees at the associate's or higher level, while non-degree-granting institutions grant only awards below that level. The non-degree-granting classification includes some institutions transitioning to higher level program offer-

ings, though still classified at a lower level; therefore, a small number of associate's degrees are shown as awarded by non-degree-granting institutions.

—Not available.

¹Prior to 1979–80, excludes branch campuses.

²Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year.

³Estimated.

⁴Estimated number of senior instructional staff based on actual enrollment data for the designated year and enrollment/staff ratios for the prior staff survey. Excludes graduate assistants.

⁵Because of revised survey procedures, data may not be directly comparable with figures prior to 1989–90. Excludes graduate assistants.

⁶Data for 1869–70 to 1939–40 are for resident degree-credit students who enrolled at any time during the academic year.

⁷From 1869–70 to 1959–60, bachelor's degrees include degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

⁸Figures for years prior to 1969–70 are not precisely comparable with later data.

⁹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

¹⁰Data for 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Data for 1949–50 through 1989–90 are current-fund expenditures only. Data for 1999–2000 include total expenditures for private institutions and current-fund expenditures for public institutions. Data for later years are for total expenditures.

¹¹Includes unexpended plant funds.

¹²Book value. Includes other nonexpendable funds.

¹³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Data through 1989–90 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States; Education Directory, Colleges and Universities; Faculty and Other Professional Staff in Institutions of Higher Education; Fall Enrollment in Colleges and Universities; Earned Degrees Conferred; Financial Statistics of Institutions of Higher Education; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education," "Degrees and Other Formal Awards Conferred,"* and "Financial Statistics of Institutions of Higher Education" surveys; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:89–99), "Fall Staff Survey" (IPEDS-S:89–99), "Finance Survey" (IPEDS-F:FY90–00), "Completions Survey" (IPEDS-C:90–00), and "Institutional Characteristics Survey" (IPEDS-IC:89–99); IPEDS Winter 2009–10 and Spring 2014, Human Resources component, Fall Staff section; IPEDS Spring 2010 and Spring 2015, Fall Enrollment component; IPEDS Fall 2010 and Fall 2015, Completions component; and IPEDS Spring 2011 and Spring 2016, Finance component. (This table was prepared May 2017.)

†Not applicable.

¹Individuals ages 16 to 24 who graduated from high school or completed a GED.²Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.³Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. High school completion data in this table differ from figures appearing in other tables because of

varying survey procedures and coverage. High school completers include GED recipients. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2015. (This table was prepared July 2016.)

Table 302.20. Percentage of recent high school completers enrolled in 2- and 4-year colleges, by race/ethnicity: 1960 through 2015
[Standard errors appear in parentheses]

Year	Percent of recent high school completers ¹ enrolled in college ² (annual data)					3-year moving averages ³								
						Percent of recent high school completers ¹ enrolled in college ²					Difference between percent enrolled

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Individuals ages 16 to 24 who graduated from high school or completed a GED.²Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.³A 3-year moving average is a weighted average of the year indicated, the year immediately preceding, and the year immediately following. For the first and final years of available data, a 2-year moving average is used: The moving average for 1960 reflects an average of 1960 and 1961; for Black and Hispanic data, the moving average for 1972 reflects an average of 1972 and 1973; for Asian data, the moving average for 2003 reflects an average of 2003 and

2004; and the moving average for 2015 reflects an average of 2014 and 2015. Moving averages are used to produce more stable estimates.

⁴Prior to 2003, Asian data include Pacific Islanders.⁵Prior to 1972, White data include persons of Hispanic ethnicity.⁶White, Black, and Asian data exclude persons of Two or more races.⁷Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Total includes persons of other racial/ethnic groups not separately shown. Some data have been revised from previously published figures.

SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2015. (This table was prepared July 2016.)

Table 302.30. Percentage of recent high school completers enrolled in 2-year and 4-year colleges, by income level: 1975 through 2015
[Standard errors appear in parentheses]

Year	Percent of recent high school completers ¹ enrolled in college ² (annual data)				3-year moving averages ³

¹Individuals ages 16 to 24 who graduated from high school or completed a GED.

²Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.

³A 3-year moving average is a weighted average of the year indicated, the year immediately preceding, and the year immediately following. For 1975 and 2015, a 2-year moving average is used: The moving average for income groups in 1975 reflects an average of 1975 and 1976, and the moving average for 2015 reflects an average of 2014 and 2015. Moving averages are used to produce more stable estimates.

⁴Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Low income refers to the bottom 20 percent of all family incomes, high income refers to the top 20 percent of all family incomes, and middle income refers to the 60 percent in between. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

¹The 12th-grade graduation rate is the number of students who graduated from grade 12 with a diploma during the 2010–11 school year divided by 12th-grade enrollment in October 2010.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Includes all schools, including combined schools, with students enrolled in the 12th grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

Did not know you could complete a FAFSA	100.0 (†)	59.5 (4.12)	40.5 (4.12)	24.1 (3.29)	4.9 ! (1.86)	14.0 (2.44)	5.2 (1.45)	16.3 (3.32)	
Not planning to continue education after high school	100.0 (†)	93.4 (1.89)	6.6 (1.89)	3.2 ! (0.97)	‡ (†)	1.8 ! (0.81)	‡ (†)	3.4 ! (1.61)	
Selected measures of high school achievement									
Total number of credits earned in high school ⁵	25.8 (0.12)	23.9 (0.21)	26.4 (0.13)	26.6 (0.14)	24.2 (0.54)	26.1 (0.18)	27.3 (0.20)	25.6 (0.28)	
Overall GPA earned in high school ⁶	2.8 (0.01)	2.3 (0.02)	3.0 (0.01)	3.0 (0.01)	2.4 (0.06)	2.8 (0.02)	3.3 (0.01)	2.6 (0.03)	
Average SAT/ACT score (standardized to SAT) ⁷	988 (6.5)	854 (10.4)	1008 (6.4)	1023 (5.9)	811 (29.7)	936 (7.3)	1083 (6.4)	922 (14.1)	

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹A certificate or diploma program at a school that provides occupational training. Such a program usually takes 2 years or less to complete and often leads to a license, such as cosmetology.

²SES was measured by a composite score based on parental education and occupations, family income, and school urbanicity in the student's 11th-grade year. The weighted SES distribution (weighted by W2STUDENT) was divided into five equal groups. Low SES corresponds to the lowest one-fifth of the population, and high SES corresponds to the highest one-fifth of the population. The three fifths in the middle were combined to form the middle SES category.

³Includes integrated math, algebra III, probability and statistics, and non-calculus Advanced Placement (AP) or International Baccalaureate (IB) courses.

⁴Includes AP/IB calculus.

⁵Ranges from 0 to 59.

⁶Includes all courses and ranges from 0 to 4.

⁷The average applies to all students who took the SAT or ACT. For those who took the SAT, the combined critical reading and mathematics score was used. For those who took the ACT, scores were converted to the equivalent of the SAT combined score. Scale ranges from 400 to 1600.

NOTE: Includes students who completed high school by September 2013. Estimates weighted by W3W1W2STUTR. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

¹Total includes public high school graduates for 2011–12 and private high school graduates for 2012–13. Data on private high school graduates are not available for 2011–12.

²All U.S. resident students living in a particular state when admitted to an institution in any state. Students may be enrolled in any state.

³Students who attend institutions in their home state. Total includes 183 students attending U.S. Service Academies in their home state, not shown separately.

⁴U.S. total includes some U.S. residents whose home state is unknown.

⁵A percentage of the private high school graduates are not residents of the District of Columbia.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Total includes other racial/ethnic groups not shown separately.

²Includes other Central American subgroups not shown separately.

³Includes Taiwanese.

⁴In addition to the subgroups shown, also includes Sri Lankan.

⁵Consists of Indonesian and Malaysian.

NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those

living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other health-care facilities). Enrollment data in this table may differ from data in tables based on the Current Population Survey (CPS) because of differences in survey design and target populations. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

¹Degree-credit enrollment only.

²Includes part-time resident students and all extension students (students attending courses at sites separate from the primary reporting campus). In later years, part-time student enrollment was collected as a distinct category.

³Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

⁴Because of imputation techniques, data are not consistent with figures for other years.

⁵Projected.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and partici-

pate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

#Rounds to zero.

¹Includes degree-granting and non-degree-granting institutions.

²Data for 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

³Data are for institutions that did not offer accredited 4-year or 2-year programs, but were participating in Title IV federal financial aid programs. Includes some institutions transitioning to higher level offerings, though still classified at a lower level.

NOTE: Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:95-99); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared February 2017.)

Table 303.25. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2015

—Not available.

¹Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

²Because of imputation techniques, data are not consistent with figures for other years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and

excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HIGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1970 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86–99); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared February 2017.)

Table 303.30. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2026

—Not available.

¹Large increase in private 2-year institutions in 1980 is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90-99); IPEDS Spring 2001 through Spring 2016, Fall Enrollment component; and Enrollment in Degree-Granting Institutions Projection Model, 2000 through 2026. (This table was prepared February 2017.)

#Rounds to zero.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2012, 2014, and 2016, Fall Enrollment component. (This table was prepared October 2016.)

Table 303.50. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, control and level of institution, attendance status, and age of student: 2015

Attendance status and age of student	Undergraduate										Postbaccalaureate			
	Total	Public			Private, nonprofit			Private, for-profit			Total	Public	Private, nonprofit	Private, for- profit

¹Projected.

NOTE: Data include unclassified graduate students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1967 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86-99); IPEDS Spring 2001 through Spring 2016, Fall Enrollment component; and Enrollment in Degree-Granting Institutions Projection Model, 2000 through 2026. (This table was prepared February 2017.)

—Not available.

¹Counts of institutions in this table may be lower than reported in other tables, because counts in this table include only institutions reporting separate enrollment data.²Included under "Other public."³Religious affiliation as reported by institution.

NOTE: Data for 1980 and 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" and "Institutional Characteristics" surveys, 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90) and "Institutional Characteristics Survey" (IPEDS-IC:90); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared June 2017.)

¹Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

¹Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF-90); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared January 2017.)

Table 304.20. Total fall enrollment in private degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2015

†Not applicable.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF-90); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared January 2017.)

¹Many institutions have more than one admission requirement.

²Formal demonstration of competencies (e.g., portfolios, certificates of mastery, assessment instruments).

³Includes SAT, ACT, or other admission tests.

⁴Test of English as a Foreign Language.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes institutions not enrolling any first-time degree/certificate-seeking undergraduates. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2000 through Fall 2010, Institutional Characteristics component; and Winter 2015–16, Admissions component. (This table was prepared November 2016.)

¹The total on this table differs slightly from other counts of institutions with first-year undergraduates because approximately 1.0 percent of these institutions did not report application information.²Data are only for institutions that require test scores for admission. Relatively few 2-year institutions require test scores for admission. The SAT critical reading and mathematics scales range from 200 to 800. The ACT composite, English, and mathematics scales range from 1 to 36.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes institutions not enrolling any first-time degree/certificate-seeking undergraduates. Detail may not sum to totals because of rounding.

—Not available.

¹Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2010, institutions were not required to report separate data on Asians, Pacific Islanders, and students of Two or more races. Projections for Asian and Pacific Islander enrollment are not available due to the limited amount of historical data available upon which to base a projection model. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to

the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90–99); IPEDS Spring 2001 through Spring 2016, Fall Enrollment component; and Enrollment in Degree-Granting Institutions by Race/Ethnicity Projection Model, 1980 through 2026. (This table was prepared March 2017.)

¹Research universities with a very high level of research activity.²Research universities with a high level of research activity.³Institutions that award at least 20 doctor's degrees per year, but did not have high levels of research activity.⁴Institutions that award at least 50 master's degrees per year.⁵Institutions that primarily emphasize undergraduate education. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie system because they primarily award associate's degrees.⁶Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.⁷Nonresident alien enrollment percentages based on total enrollment in the institution, rather than on the U.S. resident enrollment. NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from <http://carnegieclassifications.iu.edu/>. Includes imputed Carnegie system classifications for institutions with missing data. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

¹Research universities with a very high level of research activity.

²Research universities with a high level of research activity.

³Institutions that award at least 20 doctor's degrees per year, but did not have high levels of research activity.

⁴Institutions that award at least 50 master's degrees per year.

⁵Institutions that primarily emphasize undergraduate education. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie system because they primarily award associate's degrees.

⁶Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.

NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from <http://carnegieclassifications.iu.edu/>. Includes imputed Carnegie system classifications for institutions with missing data. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.

NOTE: Race categories exclude persons of Hispanic ethnicity. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

—Not available.

¹Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

²Because of imputation techniques, data are not consistent with figures for other years.

³Projected.

NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the full-time equivalent of the part-time students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification,

but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the full-time equivalent of the part-time students. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2001, 2011, and 2016, Fall Enrollment component. (This table was prepared May 2017.)

Table 308.10. Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2013–14 and 2014–15

State or jurisdiction	2013–14							2014–15

¹Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.

²Includes students coming to U.S. institutions from foreign countries and other jurisdictions.

³Students whose residence is in the same state as the service academy.

⁴Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2015, Fall Enrollment component. (This table was prepared May 2017.)

Table 309.20. Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2014

¹Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.

²Includes students coming to U.S. institutions from foreign countries and other jurisdictions.

³Students whose residence is in the same state as the service academy.

⁴Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students who graduated from high school in the previous 12 months and were enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

#Rounds to zero.

¹North Africa was combined with the Middle East to create the "Middle East and North Africa" category as of 2011–12, and the former "Africa" category was replaced by "Sub-Saharan Africa" (which excludes North Africa). Data for years prior to 2011–12 have been revised for comparability.

²Asia excludes the Middle Eastern countries (Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, the Palestinian Authority, Qatar, Saudi Arabia, Syria, the United Arab Emirates, and Yemen).

³Cyprus and Turkey were classified as being in the Middle East prior to 2004–05, but in Europe for 2004–05 and later years. Data for 2000–01 have been revised for comparability.

⁴Mexico and Central America are included in Latin America, not in North America.

⁵Includes Antarctica from 2002–03 onward.

NOTE: Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Students with disabilities are those who reported that they had one or more of the following conditions: a specific learning disability, a visual impairment, hard of hearing, deafness, a speech impairment, an orthopedic impairment, or a health impairment.

NOTE: Data are based on a sample survey of students who enrolled at any time during the school year. Data exclude Puerto Rico. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Students who reported taking more than one type of class (e.g., night classes and online classes) are counted only once in the total.

²Excludes students not in a degree or certificate program.

³Excludes work-study/assistantships.

⁴Includes separated.

NOTE: Night classes start after 6:00 p.m. on Monday through Thursday nights; weekend classes start after 6:00 p.m. on Friday or take place any time on Saturday or Sunday; and online classes are taught only online. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

¹Excludes students not in a degree or certificate program.

²Excludes work-study/assistantships.

³Includes separated.

NOTE: In 2011–12, students were asked whether they took classes that were “taught only online” and, if so, whether their entire degree program was online. In 2003–04 and

2007–08, students were asked about distance education, which was defined in 2007–08 as “primarily delivered using live, interactive audio or videoconferencing, pre-recorded instructional videos, webcasts, CD-ROM, or DVD, or computer-based systems delivered over the Internet.” The 2003–04 definition was very similar, with only minor differences in wording. In both years, distance education did not include correspondence courses. Data exclude Puerto Rico. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04, 2007–08, and 2011–12 National Postsecondary Student Aid Study (NPSAS:04, NPSAS:08, and NPSAS:12). (This table was prepared October 2014.)

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Students who reported taking more than one type of class (e.g., night classes and online classes) are counted only once in the total.

²Excludes work-study/assistantships.

³Includes separated.

NOTE: Night classes start after 6:00 p.m. on Monday through Thursday nights; weekend classes start after 6:00 p.m. on Friday or take place any time on Saturday or Sunday; and online classes are taught only online. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Excludes students not in a degree or certificate program.

²Includes students who are not in a degree program or have not declared a major. For 2003–04 and 2007–08, includes physical sciences.

³Excludes work-study/assistantships.

⁴Includes separated.

NOTE: In 2011–12, students were asked whether they took classes that were “taught only online” and, if so, whether their entire degree program was online. In 2003–04 and 2007–08, students were asked about distance education, which was defined in 2007–08 as “primarily delivered using live, interactive audio or videoconferencing, pre-recorded instructional videos, webcasts, CD-ROM, or DVD, or computer-based systems delivered over the Internet.” The 2003–04 definition was very similar, with only minor differences in wording. In both years, distance education did not include correspondence courses. Data exclude Puerto Rico. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04, 2007–08, and 2011–12 National Postsecondary Student Aid Study (NPSAS:04, NPSAS:08, and NPSAS:12). (This table was prepared October 2014.)

Part-time entrants	43.6	40.7	†	44.5	‡	40.3	43.6	43.8	41.4	39.8

†Not applicable.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

¹Primarily online institutions have more than 90 percent of their students attending classes exclusively online. Other institutions may have some online offerings, but they are not primarily online.

²Includes only institutions reporting enrollment data in fall 2015.

³Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Fall Enrollment component; IPEDS, Fall 2015, Completions component; and IPEDS, Spring 2016, Graduation Rates component. (This table was prepared April 2017.)

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) is 50 percent or greater.

¹Student status was determined by accumulation of credits. Students attending postsecondary education part time, or not completing the credit accumulation requirements for second-year status, could be considered first-year students for more than one year.

NOTE: Data are based on a sample survey of students who enrolled at any time during the school year. Percentages of students who took remedial courses are based on student reports. Data exclude Puerto Rico. Detail may not sum to totals because of survey item nonresponse and rounding. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

NOTE: Remedial services are instructional activities designed for students deficient in the general competencies necessary for a regular postsecondary curriculum and educational setting. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes institutions not enrolling any first-time degree/certificate-seeking undergraduates.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹For undergraduate students, the field of study categories include students who had already declared a major as well as students who had decided on, but not yet declared, an intended major. The "Undecided" category consists of undergraduate students who had neither declared nor decided on a major.

²Also includes students attending more than one institution.

NOTE: Because of different survey editing and processing procedures, enrollment data in this table may differ from those appearing in other tables. Includes students who enrolled at any time during the 2011–12 academic year. Data exclude Puerto Rico. Data have been revised from previously published figures. Detail may not sum to totals because of rounding.

¹In 2014, the survey frame was updated following a comprehensive frame evaluation study. The study identified potentially eligible but not previously surveyed academic institutions in the United States with master's- or doctorate-granting programs in science, engineering, or health. A total of 151 newly eligible institutions were added, and 2 institutions offering mostly practitioner-based graduate degrees were determined to be ineligible.

²Excludes Psy.D. (Doctor of Psychology) programs, which focus on training for clinical practice. Enrollment declines after 2007 may be due to more rigorous follow-up with institutions to exclude such programs.

³Excludes enrollments in practitioner-oriented programs, which have the primary purpose of providing the knowledge and skills required for credentials or licensure to practice in a medical or other health field. Examples of excluded clinical medicine programs are those leading to M.D. (Doctor of Medicine) and D.D.S. (Doctor of Dental Surgery) degrees. Exam-

ples of excluded programs in other health fields are those leading to D.N.P. (Doctor of Nursing Practice) and D.P.T. (Doctor of Physical Therapy) degrees.

⁴For years after 2007, enrollment declines in other health fields such as nursing may be due to more rigorous follow-up with institutions to exclude enrollments in practitioner-oriented graduate degree programs.

NOTE: The survey on which this table is based includes all institutions in the United States and its territories (Guam and Puerto Rico) that grant research-based master's degrees or doctorates in science, engineering, and selected health fields.

¹College and university campuses ranked by fall 2015 enrollment data.

²"PrivNp" stands for private nonprofit. "PrivFp" stands for private for-profit.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes online and distance education courses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Fall Enrollment component. (This table was prepared May 2017.)

Table 312.20. Selected statistics for degree-granting postsecondary institutions enrolling more than 15,000 students in 2015, by selected institution and student characteristics: Selected years, 1990 through 2014–15

†Not applicable.

¹"PrivNp" stands for private nonprofit. "PrivFp" stands for private for-profit.

²Includes private and some public institutions reporting total expenses and deductions under Financial Accounting Standards Board (FASB) reporting standards and public institutions reporting total expenses and deductions under Governmental Accounting Standards Board (GASB) 34/35 reporting standards.

³Combined enrollment of Black, Hispanic, Asian/Pacific Islander, American Indian/Alaska Native, and Two or more races students who are U.S. citizens or resident aliens as a percentage of total enrollment, excluding nonresident aliens.

⁴Includes less-than-1-year awards and 1- to less-than-4-year awards (excluding associate's degrees) conferred by degree-granting institutions.

Table 312.20. Selected statistics for degree-granting postsecondary institutions enrolling more than 15,000 students in 2015, by selected institution and student characteristics: Selected years, 1990 through 2014–15—Continued

³Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

⁴Data for total enrollment in 1990 are for institutions of higher education, rather than degree-granting institutions.

⁵For years prior to 2013, fall enrollment data for Arizona State University, Tempe, include data for the following four branch campuses, which are now reported separately: Downtown Phoenix, SkySong, West, and Polytechnic.

⁶Data for University of Phoenix, Arizona, and for University of Phoenix, California, include branch campuses previously reported separately.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes online and distance education courses. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); Spring 2001 through Spring 2016, Fall Enrollment and Finance components; and Fall 2015, Completions component. (This table was prepared May 2017.)

¹Data are for colleges and universities identified by the Women's College Coalition as women's colleges in 2016. Excludes women's colleges whose IPEDS data are reported together with a coed institution or coordinate men's college. The following institutions were excluded for this reason: the Colorado Women's College of the University of Denver; Douglass Residential College of Rutgers University; and Russell Sage College of the Sage Colleges.

NOTE: The institutions in this table are all 4-year private nonprofit institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Fall Enrollment component; and Fall 2015, Completions component. (This table was prepared November 2016.)

Table 312.50. Fall enrollment and degrees conferred in degree-granting tribally controlled postsecondary institutions, by state and institution: Selected years, fall 2000 through fall 2015, and 2013–14 and 2014–15

¹1 = 4-year public; 2 = 2-year public; 3 = 4-year private nonprofit; and 4 = 2-year private nonprofit.

²2015 American Indian/Alaska Native enrollment (column 11) includes graduate students and therefore does not equal "Undergraduate American Indian/Alaska Native" enrollment (column 13).

NOTE: This table only includes institutions that were in operation during the 2015–16 academic year. They are all members of the American Indian Higher Education Consortium and, with few exceptions, are tribally controlled and located on reservations. Degree-granting institutions grant

associate's or higher degrees and participate in Title IV federal financial aid programs. Totals include persons of other racial/ethnic groups not separately identified. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2001 through Spring 2016, Fall Enrollment component; and Fall 2014 and Fall 2015, Completions component. (This table was prepared November 2016.)

—Not available.

†Not applicable.

¹1 = 4-year public; 2 = 2-year public; 3 = 4-year private nonprofit; and 4 = 2-year private nonprofit.

²Simmons College of Kentucky and American Baptist College in Tennessee were classified as historically Black colleges and universities in 2015, but not 2014. Therefore, the enrollment total for 2014 excludes these two institutions.

³Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

⁴Includes private and some public institutions reporting total expenses and deductions under Financial Accounting Standards Board (FASB) reporting standards and public institutions reporting total expenses and deductions under Governmental Accounting Standards Board (GASB) 34/35 reporting standards.

⁵Land-grant institution.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes historically Black colleges and universities that are not participating in Title IV programs. Historically Black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Totals include persons of other racial/ethnic groups not separately identified. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2015, Completions component; Spring 2015 and Spring 2016, Fall Enrollment component; and Spring 2016, Finance component. (This table was prepared November 2016.)

NOTE: Historically Black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year col-

leges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities," 1976 through 1985 surveys; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86-99); and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared November 2016.)

†Not applicable.

¹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

²Totals (column 2) of public and private institutions together are approximate because public and private nonprofit institutions fill out different survey forms with different accounting concepts.

³Includes independent operations.

⁴Includes contributions from affiliated entities.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Historically Black colleges and universities are

degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Federal, state, and local governments revenue includes appropriations, grants, and contracts. Totals include persons of other racial/ethnic groups not separately identified. Detail may not sum to totals because of rounding.

#Rounds to zero.

¹Data for 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

²Data are for institutions that did not offer accredited 4-year or 2-year degree programs, but were participating in Title IV federal financial aid programs. Includes some institutions transitioning to higher level program offerings, though still classified at a lower level.

NOTE: Full-time-equivalent staff is the full-time staff, plus the full-time equivalent of the part-time staff. Data for 2015 include institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

†Not applicable.

¹Included in other. Primary occupations were reclassified as of fall 2013; only the faculty and graduate assistant categories are comparable with data from earlier years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Beginning in

2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Some data have been revised from previously published figures.

†Not applicable.

#Rounds to zero.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes institutions with fewer than 15 full-time

employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Human Resources component, Fall Staff section. (This table was prepared December 2016.)

†Not applicable.

¹Combined total of staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races as a percentage of total staff, excluding race/ethnicity unknown and nonresident alien.²Race/ethnicity not collected.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes institutions with fewer than 15 full-time employees;

these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Human Resources component, Fall Staff section. (This table was prepared December 2016.)

Table 314.50. Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in public degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2015

State or jurisdiction	Full-time-equivalent (FTE) staff			FTE faculty			FTE faculty as a percent of FTE staff		FTE students per FTE staff			FTE students per FTE faculty

—Not available.

¹Estimated on the basis of enrollment. For methodological details on estimates, see National Center for Education Statistics, *Projections of Education Statistics to 2000*.

²Because of revised survey methods, data are not directly comparable with figures for years prior to 1987.

NOTE: Includes faculty members with the title of professor, associate professor, assistant professor, instructor, lecturer, assisting professor, adjunct professor, or interim professor (or the equivalent). Excluded are graduate students with titles such as graduate or teaching fellow who assist senior faculty. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more

2-year colleges and excludes a few higher education institutions that did not grant degrees. Beginning in 2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), *Employees in Institutions of Higher Education*, 1970 and 1972, and "Staff Survey" 1976; *Projections of Education Statistics to 2000*; Integrated Postsecondary Education Data System (IPEDS), "Fall Staff Survey" (IPEDS-S:87-99); IPEDS Winter 2001-02 through Winter 2011-12, Human Resources component, Fall Staff section; IPEDS Spring 2014 and Spring 2016, Human Resources component, Fall Staff section; and U.S. Equal Employment Opportunity Commission, Higher Education Staff Information Survey (EEO-6), 1977, 1981, and 1983. (This table was prepared December 2016.)

¹Combined total of faculty who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races as a percentage of total faculty, excluding race/ethnicity unknown and nonresident alien.

²Race/ethnicity not collected.

³Only instructional faculty were classified by academic rank. Primarily research and primarily public service faculty, as well as faculty without ranks, appear under "other faculty." NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes institutions with fewer than 15 full-time

employees; these institutions did not report staff data prior to 2007. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.
NOTE: Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for 1987–88 and later years include imputations for nonrespondent institutions. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Faculty Salaries, Tenure, and Fringe Benefits" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty Survey" (IPEDS-SA-87–99); and IPEDS, Winter 2001–02 through Winter 2011–12 and Spring 2013 through Spring 2016, Human Resources component, Salaries section. (This table was prepared December 2016.)

Table 316.20. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, sex, and control and level of institution: Selected years, 1999–2000 through 2015–16

†Not applicable.

‡Reporting standards not met (too few cases).

¹Institutions that awarded 20 or more doctor's degrees during the previous academic year.

²Institutions that awarded 20 or more master's degrees, but less than 20 doctor's degrees, during the previous academic year.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data include imputations for nonrespondent institutions.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Human Resources component, Salaries section. (This table was prepared December 2016.)

Table 316.80. Percentage of degree-granting postsecondary institutions with a tenure system and of full-time faculty with tenure at these institutions, by control and level of institution and selected characteristics of faculty: Selected years, 1993–94 through 2015–16

‡Reporting standards not met (too few cases).

¹Institutions that awarded 20 or more doctor's degrees during the previous academic year.

²Institutions that awarded 20 or more master's degrees, but less than 20 doctor's degrees, during the previous academic year.

³Includes instructional, research, and public service faculty.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data include imputations for nonrespondent institutions. Some data have been revised from previously published figures.

—Not available.

¹Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

NOTE: Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Changes in counts of institutions over time are partly affected by increasing or decreasing numbers of institutions submitting separate data for branch campuses.

†Not applicable.

¹Research universities with a very high level of research activity.

²Research universities with a high level of research activity.

³Institutions that award at least 20 doctor's degrees per year, but did not have a high level of research activity.

⁴Institutions that award at least 50 master's degrees per year.

⁵Institutions that primarily emphasize undergraduate education. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie classification system because they primarily award associate's degrees.

⁶Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.

NOTE: Branch campuses are counted as separate institutions. Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from <http://carnegieclassifications.iu.edu/>. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

See notes at end of table.

Table 317.40. Number of degree-granting postsecondary institutions and enrollment in these institutions, by enrollment size, control, and classification of institution: Fall 2015—Continued

¹ Excludes 21 institutions that had no enrollment.	⁸ Institutions that award less than 30 percent of their awards in career and technical programs.
² Research universities with a very high level of research activity.	⁹ Institutions that award 30 to 49 percent of their awards in career and technical programs.
³ Research universities with a high level of research activity.	¹⁰ Institutions that award 50 percent or more of their awards in career and technical programs.
⁴ Institutions that award at least 20 doctor's degrees per year, but did not have a high level of research activity.	NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from http://carnegieclassifications.iu.edu/ .
⁵ Institutions that award at least 50 master's degrees per year.	SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2016, Fall Enrollment component. (This table was prepared November 2016.)
⁶ Institutions that primarily emphasize undergraduate education. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as baccalaureate/associate's colleges in the Carnegie system because they primarily award associate's degrees.	
⁷ Institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.	

Table 317.50. Degree-granting postsecondary institutions that have closed their doors, by control and level of institution: 1969–70 through 2015–16

—Not available.

NOTE: This table indicates the year by which the institution no longer operated (generally it closed at the end of or during the prior year). Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education

institutions that did not grant degrees.

¹Includes degrees in Area, ethnic, cultural, gender, and group studies; English language and literature/letters; Foreign languages, literatures, and linguistics; Liberal arts and sciences, general studies, and humanities; Multi/interdisciplinary studies; Philosophy and religious studies; Theology and religious vocations; and Visual and performing arts.

²Includes Psychology; Social sciences; and History.

³Includes Biological and biomedical sciences; Mathematics and statistics; and Physical sciences and science technologies.

⁴Includes Computer and information sciences; Engineering; and Engineering technologies.

⁵Includes Agriculture and natural resources; Architecture and related services; Communication, journalism, and related programs; Communications technologies; Family and consumer sciences/human sciences; Health professions and related programs; Homeland security, law enforcement, and firefighting; Legal professions and studies; Library science; Military technologies and applied sciences; Parks, recreation, leisure, and fitness studies; Precision production; Public administration and social services; Transportation and materials moving; and Not classified by field of study.

⁶Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technologies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HIGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–96); and IPEDS Fall 2001 through Fall 2015, Completions component. (This table was prepared February 2017.)

¹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

²Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

NOTE: Data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. To facilitate trend comparisons, certain aggregations have been

made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2015, Completions component. (This table was prepared February 2017.)

¹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

²Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

NOTE: Data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. To facilitate trend comparisons, certain aggregations have been

made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2015, Completions component. (This table was prepared February 2017.)

¹Includes degrees in area, ethnic, cultural, gender, and group studies; English language and literature/letters; foreign languages, literatures, and linguistics; liberal arts and sciences, general studies and humanities; multi/interdisciplinary studies; philosophy and religious studies; theology and religious vocations; and visual and performing arts.

²Includes biological and biomedical sciences; physical sciences; science technologies/technicians; and mathematics and statistics.

³Includes engineering; engineering technologies/technicians; mechanic and repair technologies/technicians; and construction trades.

⁴Includes business management, marketing, and related support services; and personal and culinary services.

⁵Includes agriculture, agricultural operations, and related sciences; natural resources and conservation; architecture and related services; communication, journalism, and related

programs; communications technologies/technicians and support services; family and consumer services/human sciences; legal professions and studies; library science; military technologies and applied sciences; parks, recreation, leisure, and fitness studies; homeland security, law enforcement, and firefighting; public administration and social service professions; transportation and materials moving; and precision production.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. This table includes only those jurisdictions with 4-year institutions.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2015, Completions component. (This table was prepared February 2017.)

Table 320.10. Certificates below the associate's degree level conferred by postsecondary institutions, by length of curriculum, sex of student, institution level and control, and discipline division: 2014–15

¹Non-degree-granting institutions do not offer accredited 4-year or 2-year programs for degrees at the associate's or higher level, but they may include institutions offering programs 2 years or longer in duration for lower level awards.

²Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

³Includes design and applied arts, drama and theatre arts, film and photographic arts, and all other arts not included under "Fine and studio arts" or "Music and dance."

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Degree-granting institutions grant degrees at the associate's or higher level, while non-degree-granting institutions grant only awards below that level.

—Not available.

NOTE: Includes less-than-1-year awards and 1- to less-than-4-year awards (excluding associate's degrees) conferred by postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported.

Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:99); and IPEDS Fall 2000 through Fall 2015, Completions component. (This table was prepared September 2016.)

Table 321.10. Associate's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2004–05 through 2014–15

Not classified by field of study	0	0	0	14	0	0	0	0	0	0	0	0	0

¹Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

²Includes design and applied arts, drama and theatre arts, film and photographic arts, and all other arts not included under "Fine and studio arts" or "Music and dance."

NOTE: Data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:98–99); and IPEDS Fall 2003 through Fall 2005 through Fall 2015, Completions component. (This table was prepared September 2016.)

Table 321.20. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2014–15

Year and sex	Number of degrees conferred to U.S. citizens and nonresident aliens								Percentage distribution of degrees conferred to U.S. citizens							
	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races	Non- resident alien	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races

—Not available.

¹Excludes 1,170 males and 251 females whose racial/ethnic group was not available.²Excludes 4,819 males and 1,384 females whose racial/ethnic group was not available.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/eth-

nicity for students whose race/ethnicity was not reported. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

¹Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.
NOTE: Data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions that participate in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technolo-

gies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–99); and IPEDS Fall 2000 through Fall 2015, Completions component. (This table was prepared September 2016.)

¹Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natu-

ral resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions that participate in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technolo-

gies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–99); and IPEDS Fall 2000 through Fall 2015, Completions component. (This table was prepared September 2016.)

¹Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture

and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions that participate in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation;

"Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technologies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–99); and IPEDS Fall 2000 through Fall 2015, Completions component. (This table was prepared September 2016.)

—Not available.

¹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

²Excludes 500 males and 12 females whose racial/ethnic group was not available.

³Excludes 714 males and 21 females whose racial/ethnic group was not available.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic

distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

¹Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agricul-

ture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.

¹Includes naturopathic medicine and degrees that were not classified by field by the reporting institution.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Includes degrees that require at least 6 years of college work for completion (including at least 2 years of preprofessional training). Some data have been revised from previously published figures.

¹Includes naturopathic medicine and degrees that were not classified by field by the reporting institution.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Includes degrees that require at least 6 years of college work for completion (including at least 2 years of preprofessional training). Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex

were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Some data have been revised from previously published figures.

#Rounds to zero.

¹Includes agricultural sciences and natural resources; biological and biomedical sciences; and health sciences.²Distribution based on respondents reporting sex data.³Distribution based on U.S. citizens and permanent residents.⁴Includes Pacific Islanders and persons whose race was not reported.⁵Percentages are based on only those doctorate recipients who responded to questions about postgraduation plans.⁶Excludes doctorate recipients who indicated plans for another full-time degree program. Percentages are based on doctorate recipients reporting other definite postgraduation plans for study.⁷Includes respondents who indicated definite postgraduation study plans for traineeship, internship/clinical residency, or other study.⁸Percentages are based on only those doctorate recipients who indicated definite postgraduation plans for employment and who indicated the sector of employment.⁹Includes 2-year, 4-year, and foreign colleges and universities, and medical schools.¹⁰"Other" is mainly composed of elementary and secondary schools.¹¹Includes doctorate recipients who indicated that they did not plan to work or study, those who indicated some other type of postgraduation plans, and those who indicated definite plans for another full-time degree program.¹²Percentages are based on only those doctorate recipients who indicated definite postgraduation

plans for employment and who indicated their primary work activity.

¹³Percentages are based on only those doctorate recipients who indicated definite postgraduation plans and type of plans.

NOTE: The above classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). One major difference is that history is included under humanities rather than social sciences. Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes only graduates of research programs, which typically require the preparation and defense of a dissertation based on original research, or the planning and execution of an original project demonstrating substantial artistic or scholarly achievement. Excludes nonresearch professional practice doctor's degrees (e.g., M.D., D.D.S., and J.D.) that are conferred upon completion of a program providing the knowledge and skills for the recognition, credential, or license required for professional practice in such fields as health and theology. The number of doctor's degrees in this table differs from that reported in the NCES Integrated Postsecondary Education Data System (IPEDS), which includes both the research and nonresearch degrees. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

¹Institutions are ranked by the total number of doctor's degrees conferred during the 10-year period from July 1, 2005, to June 30, 2015.

²Includes degrees conferred by the University of Medicine and Dentistry of New Jersey, which merged with Rutgers University in 2013–14.

³Includes law degrees conferred by Texas Wesleyan University, which was acquired by Texas A&M in 2013, as well as degrees in all fields from Texas A&M Health Sciences Center.

⁴Includes degrees conferred by the University of Tennessee Health Sciences Center, which in

2014–15 began reporting separately from the University of Tennessee, Knoxville.

⁵Includes degrees conferred by the Endowed and Statutory Colleges.

NOTE: Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees. Some data have been revised from previously published figures.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Includes degrees in engineering, engineering-related technologies, mechanic and repair technologies, and construction trades for 1969–70 and later years. Degrees in engineering include degrees in all areas of engineering—for example, chemical, civil, electrical, and mechanical engineering—as well as degrees in general engineering. Some data have been revised from previously published figures.

—Not available.

¹Includes data for institutions not reporting admissions data, which are not separately shown.

NOTE: Data are for 4-year degree-granting postsecondary institutions participating in Title IV federal financial aid programs. Graduation rates refer to students receiving bachelor's degrees from their initial institutions of attendance only. Totals include data for persons whose

race/ethnicity was not reported. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2013 and Winter 2013–14 through Winter 2015–16, Graduation Rates component; and IPEDS Fall 2009, Institutional Characteristics component. (This table was prepared October 2016.)

Table 326.20. Graduation rate from first institution attended within 150 percent of normal time for first-time, full-time degree/certificate-seeking students at 2-year postsecondary institutions, by race/ethnicity, sex, and control of institution: Selected cohort entry years, 2000 through 2012

—Not available.

‡Reporting standards not met (too few cases).

NOTE: Data are for 2-year degree-granting postsecondary institutions participating in Title IV federal financial aid programs. Graduation rates refer to students receiving associate's degrees or certificates from their initial institutions of attendance only. Totals include data for persons whose race/ethnicity was not reported. Race categories exclude persons of

Hispanic ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2013 and Winter 2013–14 through Winter 2015–16, Graduation Rates component. (This table was prepared October 2016.)

†Not applicable.

[†]Adjusted student counts exclude students who died or were totally and permanently disabled, served in the armed forces (including those called to active duty), served with a foreign aid service of the federal government (e.g., Peace Corps), or served on official church missions. For 4-year institutions, the adjusted cohort is based on first-time bachelor's degree-seeking students.

NOTE: Returning students data for 2-year institutions include returning students, plus students who completed their program.

‡Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes a small percentage of students who had attained a degree and were still enrolled. Includes recipients of degrees not shown separately.

²Includes a small percentage of students who had attained an advanced degree.

³Includes students with a standard high school diploma who enrolled in postsecondary education in the same year as their graduation.

⁴Students starting at 2-year institutions include students whose goal was to transfer to a 4-year institution.

⁵Indicates the income quartile of the student, based on the student's total income in 2002 for independent students or the parents' total income in 2002 for dependent students. Income quartiles were determined separately for dependent and independent students based on percentile rankings and then combined into one variable.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2004/09 Beginning Postsecondary Students Longitudinal Study (BPS:04/09). (This table was prepared November 2011.)

Table 326.50. Number and percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2011–12 academic year, by attainment and enrollment status and selected characteristics: Spring 2014

[Standard errors appear in parentheses]

Selected characteristic	Total				Students starting at 2-year institutions				Students starting at 4-year institutions			
	Number (in thousands)	Percentage distribution	Percent who attained any degree or were still enrolled	Percent with no degree and not enrolled	Number (in thousands)	Percentage distribution	Percent who attained any degree or were still enrolled	Percent with no degree and not enrolled	Number (in thousands)	Percentage distribution	Percent who attained any degree or were still enrolled	Percent with no degree and not enrolled
1	2	3	4	5	6	7	8	9	10	11	12	13

[†]Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

¹Income quarters were computed separately for dependent and independent students. Quarters for independent students were based on the students' total family income, while quarters for dependent students were based on their parents' income.

²Indicates whether student has a long-lasting condition such as deafness or serious difficulty hearing; blindness or serious difficulty seeing; serious difficulty concentrating, remembering, or making decisions; or a long-term impairment that substantially limits one or more basic physical activities such as walking, climbing stairs, reaching, lifting, or carrying.

³Includes students who attended a foreign high school, were home schooled, or received a completion certificate, as well as those without a high school diploma, certificate, or equivalency.

⁴Survey questions regarding highest level of high school mathematics, college credits earned during high school, high school GPA, and SAT scores were restricted to respondents less than 30 years old.

⁵A grade point average (GPA) of 4.0 corresponds to an A, a GPA of 3.0 corresponds to a B, a GPA of 2.0 corresponds to a C, and a GPA of 1.0 corresponds to a D.

⁶Test score quarters are based on the SAT combined critical reading and mathematics score; scale ranges from 400 to 1600. ACT scores for students who only took the ACT exam were converted to SAT scores using a concordance table from the following source: Dorans, N. (1999). Correspondences Between ACT and SAT I Scores (College Board Report No. 99-1). New York: College Entrance Examination Board.

⁷Full-time enrollment may vary by school. Full-time undergraduate students are typically enrolled for at least 12 semester or quarter hours per term or at least 24 clock hours per week.

⁸The question regarding declaration of a major was restricted to students enrolled in a degree program.

⁹A stopout is a break in enrollment of 5 or more consecutive months.

¹⁰Includes amount of all loans received in 2011–12, including federal Direct PLUS Loans to parents of undergraduate students. NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2012/14 Beginning Postsecondary Students Longitudinal Study (BPS/12/14). (This table was prepared February 2017.)

Table 329.20. On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time-equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident: 2001 through 2014—Continued

—Not available.

¹Although crimes, arrests, and referrals include incidents involving students, staff, and campus guests, they are expressed as a ratio to FTE students because comprehensive FTE counts of all these groups are not available.

²Excludes suicides, fetal deaths, traffic fatalities, accidental deaths, and justifiable homicide (such as the killing of a felon by a law enforcement officer in the line of duty).

³Killing of another person through gross negligence (excludes traffic fatalities).

⁴Any sexual act directed against another person forcibly and/or against that person's will.

⁵Includes only statutory rape or incest.

⁶Taking or attempting to take anything of value using actual or threatened force or violence.

⁷Attack upon a person for the purpose of inflicting severe or aggravated bodily injury.

⁸Unlawful entry of a structure to commit a felony or theft.

⁹Theft or attempted theft of a motor vehicle.

¹⁰Willful or malicious burning or attempt to burn a dwelling house, public building, motor vehicle, or personal property of another.

¹¹If an individual is both arrested and referred to college officials for disciplinary action for a single offense, only the arrest is counted.

NOTE: Data are for degree-granting institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some institutions that report Clery data—specifically, non-degree-granting institutions and institutions outside of the 50 states and the District of Columbia—are excluded from this table. Crimes, arrests, and referrals include incidents involving students, staff, and on-campus guests. Excludes off-campus crimes and arrests even if they involve college students or staff. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, Office of Postsecondary Education, Campus Safety and Security Reporting System, 2001 through 2014; and National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2015, Fall Enrollment component. (This table was prepared September 2016.)

†Not applicable.

NOTE: Data are for the entire academic year and are average charges for full-time students. In-state tuition and fees were weighted by the number of full-time-equivalent undergraduates, but were not adjusted to reflect the number of students who were state residents. Out-of-state tuition and fees were weighted by the number of first-time freshmen attending the institution in fall 2014 from out of state. Institutional room and board rates are weighted by the number of full-time students. Degree-granting institutions grant associate's or higher degrees and par-

ticipate in Title IV federal financial aid programs. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

NOTE: Excludes students who previously attended another postsecondary institution or who began their studies on a part-time basis. Tuition and fees at public institutions are the lower of either in-district or in-state tuition and fees. Data illustrating

the average total cost of attendance for all students are weighted by the number of students at the institution receiving Title IV aid. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

¹Data are based on in-state tuition only.

NOTE: Average graduate student tuition weighted by fall full-time-equivalent graduate enrollment. Excludes doctoral students in professional practice programs. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and

excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:89–99); "Completions Survey" (IPEDS-C:90–99); "Institutional Characteristics Survey" (IPEDS-IC:89–99); IPEDS Fall 2000 through Fall 2015, Institutional Characteristics component; and IPEDS Spring 2001 through Spring 2016, Fall Enrollment component. (This table was prepared February 2017.)

Table 331.10. Percentage of undergraduates receiving financial aid, by type and source of aid and selected student characteristics: 2011–12

[Standard errors appear in parentheses]

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.²Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the school year. Includes all postsecondary institutions.³Includes students who reported they were awarded aid, but did not specify the source or type of aid.⁴Includes Department of Veterans Affairs and Department of Defense benefits.⁵Includes Parent Loans for Undergraduate Students (PLUS).⁶Details on federal and nonfederal work-study participants are not available.⁷Includes students who were single, divorced, or widowed.⁸Full-time, full-year includes students enrolled full time for 9 or more months. Part-time or part-year includes students enrolled part time for 9 or more months and students enrolled less than 9 months either part time or full time.⁹Excludes students attending more than one institution.

NOTE: Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data include undergraduates in degree-granting and non-degree-granting institutions. Data exclude Puerto Rico. Race categories exclude persons of Hispanic ethnicity. In 2012, no students were reported in the "Other" race category. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2011–12 National Postsecondary Student Aid Study (NPSAS:12). (This table was prepared January 2014.)

Table 331.20. Full-time, first-time degree/certificate-seeking undergraduate students enrolled in degree-granting postsecondary institutions, by participation and average amount awarded in financial aid programs, and control and level of institution: 2000–01 through 2014–15

¹Average amounts for students participating in indicated programs.

²Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

³Includes only loans made directly to students. Does not include Parent Loans for Undergraduate Students (PLUS) and other loans made directly to parents.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data through 2009–10 are for students receiving aid, while later data are for students awarded aid. Students receiving aid are those who were not only awarded aid, but also accepted it. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2011 and Winter 2011–12 through Winter 2015–16, Student Financial Aid component. (This table was prepared November 2016.)

Table 331.30. Average amount of grant and scholarship aid and average net price for first-time, full-time students receiving Title IV aid, by control and level of institution and income level: Selected years, 2009–10 through 2014–15

¹Grant and scholarship aid consists of federal Title IV grants, as well as other grant or scholarship aid from the federal government, state or local governments, or institutional sources. Title IV grants include Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (FSEOGs), Academic Competitiveness Grants (ACGs), National Science and Mathematics Access to Retain Talent Grants (National SMART Grants), and Teacher Education Assistance for College and Higher Education (TEACH) Grants. The average amount of grant and scholarship aid by income level was calculated based on all students who received any type of Title IV aid, even those students who received zero Title IV aid in the form of grants and received Title IV aid only in the form of work-study aid or loan aid.

²Net price is the total cost of attendance minus grant and scholarship aid from the federal government, state or local governments, or institutional sources. However, average net price by income level was calculated based on all students who received any type of Title IV aid, even those who received zero Title IV aid in the form of grants and received Title IV aid only in the form of work-study aid or loan aid.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

NOTE: Excludes students who previously attended another postsecondary institution or who began their studies on a part-time basis. Includes only first-time, full-time students who paid the in-state or in-district tuition rate (if they attended public institutions) and who received Title IV aid. Excludes the approximately 17 percent of students who did not receive any Title IV aid. Title IV aid includes grant aid, work-study aid, and loan aid. Data are weighted by the number of students at the institution receiving Title IV aid. Totals include students for whom income data were not available. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2011 and Winter 2013–14 through Winter 2015–16, Student Financial Aid component. (This table was prepared November 2016.)

Table 331.35. Percentage of full-time, full-year undergraduates receiving financial aid, and average annual amount received, by source of aid and selected student characteristics: Selected years, 1999–2000 through 2011–12—Continued

[Standard errors appear in parentheses. Amounts in constant 2015–16 dollars]

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes Parent Loans for Undergraduate Students (PLUS).²Includes students who reported they were awarded aid but did not specify the source of aid.³Includes Department of Veterans Affairs and Department of Defense benefits.⁴Low-income students have family incomes below the 25th percentile, middle-income students have family incomes from the 25th to the 75th percentile, and high-income students have family incomes above the 75th percentile.⁵The 2012 questionnaire did not offer students the option of choosing an "Other" race category.⁶Includes students who were single, divorced, or widowed.

NOTE: Full-time, full-year undergraduates are those who were enrolled full time for 9 or more months at one or more institutions. Data include undergraduates in degree-granting and non-degree-granting institutions. Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data exclude Puerto Rico. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

¹Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

±Reporting standards not met (too few cases for a reliable estimate).

²Includes students who reported they were awarded aid, but did not specify the source or type of aid.

³Includes Department of Veterans Affairs and Department of Defense benefits.

⁴Includes Parent Loans for Undergraduate Students (PLUS).

⁵Details on federal and nonfederal work-study participants are not available.

⁶Includes students who were single, divorced, or widowed.

NOTE: Aid averages are for those students who received the specified type of aid. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Full-time, full-year undergraduates were enrolled full time for 9 or more months at one or more institutions. Data include undergraduates in degree-granting and non-degree-granting institutions. Data exclude Puerto Rico. Race categories exclude persons of Hispanic ethnicity.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the academic year.

²Includes only those students who borrowed to finance their undergraduate education. Excludes loans from family sources.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

⁴Includes students who reported that they were awarded aid, but did not specify the source of the aid.

⁵Includes Department of Veterans Affairs and Department of Defense benefits.

NOTE: Excludes students whose attendance status was not reported. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data exclude Puerto Rico. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007–08 and 2011–12 National Postsecondary Student Aid Study (NPSAS:08 and NPSAS:12). (This table was prepared September 2016.)

Table 331.60. Percentage of full-time, full-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12
 [Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Details on nonfederal work-study participants are not available.²Includes students who reported they were awarded aid, but did not specify the source of aid.³Includes Department of Veterans Affairs and Department of Defense benefits.⁴Includes Parent Loans for Undergraduate Students (PLUS).

NOTE: Excludes students whose attendance status was not reported. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data exclude Puerto Rico. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1992–93, 1999–2000, 2007–08, and 2011–12 National Postsecondary Student Aid Study (NPSAS:93, NPSAS:2000, NPSAS:08, and NPSAS:12). (This table was prepared August 2014.)

Table 331.70. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12—Continued

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Details on nonfederal work-study participants are not available.²Includes students who reported that they were awarded aid, but did not specify the source or type of aid.³Includes Department of Veterans Affairs and Department of Defense benefits.⁴Indicates all grants, scholarships, or tuition waivers received from federal, state, institutional, or private sources, including employers.⁵Includes Parent Loans for Undergraduate Students (PLUS).⁶Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Aid averages are for those students who received the specified type of aid. Full-time, full-year students were enrolled full time for 9 or more months from July 1 through June 30. Data exclude Puerto Rico. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

¹Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any point during the year.

²Title IV of the Higher Education Act.

³Supplemental Educational Opportunity Grants.

⁴College Work Study. Prior to October 17, 1986, private for-profit institutions were prohibited by law from spending CWS funds for on-campus work. Includes persons who participated in the program but had no earnings.

⁵Formerly National Direct Student Loans (NDSL).

⁶Formerly Guaranteed Student Loans (GSL).

⁷Parent Loans for Undergraduate Students.

NOTE: Excludes students whose attendance status was not reported. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data exclude Puerto Rico. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007–08 and 2011–12 National Postsecondary Student Aid Study (NPSAS:08 and NPSAS:12). (This table was prepared July 2014.)

Table 331.95. !Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹For 1989–90, total includes loans from family and friends; because students were not told whether or not to include PLUS loans, some PLUS loans may also be included. For 1999–2000 and 2011–12, total excludes loans from family and friends as well as PLUS loans.

²Includes Stafford Loans and Perkins Loans only.

³Cumulative Stafford Loan amounts shown in the table include federal subsidized and unsubsidized Stafford Loans as well as any Supplemental Loans for Students (SLS) received in prior years. The SLS program was an unsubsidized student loan program limited to independent students and some dependent students with special circumstances. Beginning in 1993–94, the SLS program was replaced by unsubsidized Stafford Loans, which are available to both independent and dependent students regardless of need. Subsidized Stafford Loans are available only to students with demonstrated financial need. Stafford Loans were

available through both the William D. Ford Federal Direct Loan Program and the Federal Family Education Loan Program (FFELP) until FFELP was discontinued in 2010. Since then, Stafford Loans have been referred to as Direct Loans.

⁴Parent PLUS Loans are taken out by parents of dependent students and are used toward the students' undergraduate education. Parent PLUS Loans were available through both the William D. Ford Federal Direct Loan Program and the Federal Family Education Loan Program (FFELP) until FFELP was discontinued in 2010. Since then, Parent PLUS Loans have been referred to as Direct PLUS Loans.

⁵Includes Pacific Islanders in 1989–90.

⁶Average loan amounts were calculated only for students who took out a loan (or whose parents took out a PLUS loan on their behalf). Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Data exclude Puerto Rico. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1989–90, 1999–2000, and 2011–12 National Postsecondary Student Aid Study (NPSAS:90, NPSAS:2000, and NPSAS:12). (This table was prepared December 2016.)

Table 332.10. Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992–93 through 2011–12
[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

¹Includes all loans ever taken out for both graduate and undergraduate education. Does not include Parent Loans for Undergraduate Students (PLUS) or loans from families and friends.

²Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

³Includes students who reported they were awarded aid, but did not specify the source of aid.

⁴Includes Department of Veterans Affairs and Department of Defense benefits.

⁵Includes nonprofit 4-year nondoctoral institutions and for-profit 2-year-and-above institutions.

⁶Professional practice doctor's degrees include most degrees formerly classified as first-professional (such as M.D., D.D.S., and J.D.). "Other" doctor's degrees are those that are neither research/scholarship degrees nor professional practice degrees.

NOTE: Excludes students whose attendance status was not reported. Total includes some students whose level of study or control of institution was unknown. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data exclude Puerto Rico. Some data have been revised from previously published figures.

¹Includes borrowers from foreign and unclassified schools, which account for less than 1 percent of borrowers and are not included elsewhere.

²The repayment phase is the period when student loans must be repaid; it generally begins 6 months after a student leaves an institution. Students who enter the repayment phase during a particular federal fiscal year (October 1 through September 30) make up the cohort for that fiscal year. For example, members of the fiscal year (FY) 2013 cohort entered the repayment phase any time from October 1, 2012, through September 30, 2013.

³Borrowers are considered to be in default if they make no payments for 360 days after missing a regularly scheduled payment.

⁴The 3-year cohort default rate is the percentage of borrowers entering repayment during the specified fiscal year and defaulting by the end of the second fiscal year that follows. For example, the 3-year cohort default rate for FY 2010 is the percentage of borrowers who entered repayment during FY 2010 (any time from October 1, 2009, through September 30, 2010) and who defaulted by the end of FY 2012 (September 30, 2012). For purposes of computing default rates, if an indi-

vidual or entity affiliated with the institution makes a payment to prevent a borrower's default on a loan, the borrower is still considered in default.

NOTE: Data are for certain loans under the Federal Family Education Loan (FFEL) Program and the William D. Ford Federal Direct Loan Program (commonly referred to as the Direct Loan Program). Includes Federal Stafford Loans. Does not include PLUS loans, Federal Insured Student Loans (FISLs), or Federal Perkins Loans. For more details, see <https://itap.ed.gov/DefaultManagement/guide/attachments/CDRGuideCh2Pt1CDRCalculation.pdf>. The default rates shown in this table for the FY 2010 cohort are no longer available online; therefore, no source for the FY 2010 rates can be provided.

¹After deducting discounts and allowances.²Includes sales and services of educational activities.³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes data for public institutions reporting data according to either the Governmental Accounting Standards Board (GASB) or the Financial Accounting Stan-

dards Board (FASB) questionnaire. Data in this table pertain to institutions' fiscal years that end in the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2008 through Spring 2015, Fall Enrollment component; and Spring 2009 through Spring 2016, Finance component. (This table was prepared December 2016.)

Table 333.20. Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2014–15
[In thousands of current dollars]

State or jurisdiction	Total revenues	Operating revenue							Nonoperating revenue ¹			Other revenues and additions
		Total	Tuition and fees ²	Federal grants and contracts	State, local, and private grants and contracts	Sales and services of auxiliary enterprises ²	Sales and services of hospitals	Independent operations and other ³	Total	State appropriations	Local appropriations

NOTE: Data for 1990–91 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Includes data for public institutions reporting data according to either the Governmental Accounting Standards Board (GASB) or the Financial Accounting Standards Board

(FASB) questionnaire. Data in this table pertain to institutions' fiscal years that end in the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Finance Survey" (IPEDS-F:FY91); and selected years, Spring 2002 through Spring 2016, Finance component. (This table was prepared December 2016.)

Table 333.40. Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years: 1999–2000 through 2014–15

Level of institution and year	Total	Student tuition and fees (net of allowances)	Federal appropriations, grants, and contracts ¹	State and local appropriations, grants, and contracts	Private gifts, grants, and contracts			Investment return (gain or loss)	Educational activities	Auxiliary enterprises (net of allowances)	Hospitals	Other
					Total	Private grants and contracts	Private gifts and contributions from affiliated entities

—Not available.

¹Includes independent operations.

²Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data in this table pertain to institutions' fiscal years

that end in the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:99); Spring 2001 through Spring 2007, Enrollment component; Spring 2008 through Spring 2015, Fall Enrollment component; and Spring 2001 through Spring 2016, Finance component. (This table was prepared December 2016.)

#Rounds to zero.

¹Includes independent operations.²Research universities with a very high level of research activity.³Research universities with a high level of research activity.⁴Institutions that award at least 20 doctor's degrees per year, but did not have high levels of research activity.⁵Institutions that award at least 50 master's degrees per year.⁶Institutions that primarily emphasize undergraduate education. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as baccalaureate/associate's colleges in the Carnegie classification system because they primarily award associate's degrees.⁷Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.⁸Tribally controlled colleges, which are located on reservations and are members of the American Indian Higher Education Consortium.NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the Carnegie 2015 classification system used in this table may be obtained from <http://carnegieclassifications.iu.edu/>. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data in this table pertain to institutions' fiscal years that end in the academic year noted. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2015, Fall Enrollment component; and Spring 2016, Finance component. (This table was prepared December 2016.)

Table 333.55. Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years, 1999–2000 through 2014–15

Level of institution and year	Total	Student tuition and fees (net of allowances)	Federal appropriations, grants, and contracts	State and local appropriations, grants, and contracts	Private gifts, grants, and contracts	Investment return (gain or loss)	Educational activities	Auxiliary enterprises (net of allowances)	Other

¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data in this table pertain to institutions' fiscal years that end in the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:99); Spring 2009 through Spring 2015, Fall Enrollment component; and selected years, Spring 2001 through Spring 2016, Finance component. (This table was prepared December 2016.)

¹A "1" indicates a public institution, and a "2" indicates a private nonprofit institution.²Includes federal appropriations; operating, nonoperating, unrestricted, and restricted federal contracts and grants; and revenue for independent operations. Independent operations generally include only the revenues associated with major federally funded research and development centers. Pell grants are included for public institutions and may also be included for private nonprofit institutions that do not treat Pell grants as pass-through trans-

actions. Data for public, private nonprofit, and private for-profit institutions are only roughly comparable because they were collected using different survey instruments.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

#Rounds to zero.

¹Institutions ranked by size of endowment at end of 2016 fiscal year.²Change in market value of endowment. Includes growth from gifts and returns on investments, as well as reductions from expenditures and withdrawals.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

¹Includes other categories not separately shown.²Excludes discounts and allowances.³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes data for public institutions reporting data according to either the Governmental Accounting Standards Board (GASB) or the Financial Accounting Standards Board (FASB) questionnaire. All expenditures reported by institutions for operation and maintenance

of plant have been aggregated in the operation and maintenance of plant category, even in cases where they originally were reported by purpose. Similarly, all expenditures reported by institutions for depreciation have been aggregated in the depreciation category, even in cases where they originally were reported by purpose. Data in this table pertain to institutions' fiscal years that end in the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2008 through Spring 2015, Fall Enrollment component; and Spring 2009 through Spring 2016, Finance component. (This table was prepared December 2016.)

¹Essentially self-supporting operations of institutions that furnish a service to students, faculty, or staff, such as residence halls and food services.

²Excludes tuition, fee, and auxiliary enterprise allowances and agency transactions, such as student awards made from contributed funds or grant funds. These exclusions account for the majority of total student grants.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data in this table pertain to institutions' fiscal years

that end in the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

¹Essentially self-supporting operations of institutions that furnish a service to students, faculty, or staff, such as residence halls and food services.²Excludes tuition, fee, and auxiliary enterprise allowances and agency transactions, such as student awards made from contributed funds or grant funds. These exclusions account for the majority of total student grants.³Research universities with a very high level of research activity.⁴Research universities with a high level of research activity.⁵Institutions that award at least 20 doctor's degrees per year, but did not have high levels of research activity.⁶Institutions that award at least 50 master's degrees per year.⁷Institutions that primarily emphasize undergraduate education. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as baccalaureate/associate's colleges in the Carnegie classification system because they primarily award associate's degrees.⁸Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.⁹Tribally controlled colleges, which are located on reservations and are members of the American Indian Higher Education Consortium.NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the Carnegie 2015 classification system used in this table may be obtained from <http://carnegieclassifications.iu.edu/>. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data in this table pertain to institutions' fiscal years that end in the academic year noted. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2015, Fall Enrollment component; and Spring 2016, Finance component. (This table was prepared December 2016.)

Table 334.50. Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and level of institution: Selected years, 1999–2000 through 2014–15

Year and level of institution	Total	Instruction	Research and public service	Student services, academic and institutional support	Auxiliary enterprises ¹	Net grant aid to students ²	Other

¹Essentially self-supporting operations of institutions that furnish a service to students, faculty, or staff, such as residence halls and food services.²Excludes tuition, fee, and auxiliary enterprise allowances and agency transactions, such as student awards made from contributed funds or grant funds. These exclusions account for the majority of total student grants.³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data in this table pertain to institutions' fiscal years that end in

the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:99); Spring 2001 through Spring 2007, Enrollment component; Spring 2008 through Spring 2015, Fall Enrollment component; and Spring 2001 through Spring 2016, Finance component. (This table was prepared December 2016.)

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data in this table pertain to institutions' fiscal years that end in the academic year noted. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

CHAPTER 4

Federal Funds for Education and Related Activities

This chapter provides information on federal support for education. The tables include detailed data on funding by specific federal agencies, funding for different levels of education and types of education-related activities, and funding for specific programs. Preceding the tables is a brief chronology of federal education legislation enacted since 1787, which provides historical context for the education funding data.

The data in this chapter primarily reflect outlays and appropriations of federal agencies. The data are compiled from budget information prepared by federal agencies. In contrast, most of the federal revenue data reported in other chapters are compiled by educational institutions or state education agencies and reported to the federal government through standardized survey forms. Tabulations based on institution- or state-reported revenue data differ substantially from federal budget reports because of numerous variations in methodology and definitions. Federal dollars are not necessarily spent by recipient institutions in the same year in which they are appropriated. In some cases, institutions cannot identify the source of federal revenues because they flow through state agencies. Some types of revenues, such as tuition and fees, are reported as revenues from students even though they may be supported by federal student aid programs. Some institutions that receive federal education funds (e.g., Department of Defense overseas and domestic schools, state education agencies, Head Start programs, and federal libraries) are not included in regular surveys, censuses, and administrative data collections conducted by the National Center for Education Statistics (NCES). Thus, the federal programs data tabulated in this chapter are not comparable with figures reported in other chapters. Readers should also be careful about comparing the data on obligations shown in table 402.10 with the data on outlays and appropriations appearing in other tables in this chapter.

Federal Education Funding

Federal on-budget funding (federal appropriations) for education increased by 416 percent from fiscal year (FY) 1965 to FY 2015, after adjustment for inflation (table D, table 401.10, and figure 20). Federal on-budget funding for education in FY 1975 was 152 percent higher than in FY 1965. However, funding in FY 1985 was 16 percent lower than in FY 1975. Thereafter, federal on-budget funding for education generally increased. From FY 1990 to FY 2000, after adjustment for inflation, federal on-budget funding for education increased by 31 percent. From FY 2000 to FY 2015, it increased by 64 percent.

Table D. Federal on-budget funding for education, by category: Selected fiscal years, 1965 through 2015

[In billions of constant fiscal year (FY) 2016 dollars]

Fiscal year	Total	Elementary/ secondary	Post- secondary	Other education	Research at educational institutions
1965	\$38.7	\$14.1	\$8.7	\$2.7	\$13.2
1975	97.4	44.4	32.0	6.7	14.3
1980	98.3	45.7	31.6	4.4	16.5
1985	81.9	35.5	23.4	4.4	18.6
1990	93.2	39.7	24.6	6.1	22.8
1995	110.5	51.9	27.2	7.3	24.2
2000	121.9	61.9	21.2	8.2	30.6
2005	184.0	85.7	47.8	9.1	41.5
2010	189.3	83.4	54.6	10.2	41.0
2015	199.5	80.5	76.3	9.7	33.0

NOTE: Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, Budget Service and National Center for Education Statistics, unpublished tabulations. U.S. Office of Management and Budget, *Budget of the U.S. Government, Appendix*, various FYs. National Science Foundation, *Federal Funds for Research and Development*, various FYs.

Between FY 1990 and FY 2000, after adjustment for inflation, federal on-budget funding increased for three of the four major categories reported: elementary and secondary education (by 56 percent), other education (by 34 percent), and research at educational institutions (by 34 percent) (table D, table 401.10, and figure 20). However, funding for postsecondary education was 14 percent lower in FY 2000 than in FY 1990. From FY 2000 to FY 2015, after adjustment for inflation, federal on-budget funding showed a net increase of 260 percent for postsecondary education and 18 percent for other education. Federal on-budget funding for elementary and secondary education in FY 2015 was 30 percent higher than in FY 2000 while federal funding for research at educational institutions in FY 2015 was 8 percent higher than in FY 2000. In FY 2009, federal on-budget funding for elementary and secondary education was at a record-high level (\$194.6 billion in FY 2016 dollars) due to funds from the American Recovery and Reinvestment Act of 2009 (ARRA) (table 401.10).¹ For FY 2016, federal program funds totaled \$82.1 billion for elementary and secondary education, \$63.3 billion for postsecondary education, \$9.0 billion for other education programs, and an estimated \$34.5 billion for research at educational institutions (tables 401.10 and 401.30).

¹Throughout this chapter, all education funds from ARRA are included in FY 2009. Most of these funds had a 2-year availability, meaning that they were available for the U.S. Department of Education to obligate during FY 2009 and FY 2010.

After adjustment for inflation, off-budget support (federal support for education not tied to appropriations) and nonfederal funds generated by federal legislation (e.g., private loans, grants, and aid) showed an increase of 136 percent between FY 1990 (\$20.2 billion in FY 2016 dollars) and FY 2000 (\$47.6 billion in FY 2016 dollars) (table 401.10). In FY 2015, these same funds totaled \$97.8 billion in FY 2016 dollars, an increase of 106 percent over FY 2000. In FY 2016, these funds totaled \$95.8 billion.

In FY 2015, federal on-budget funds for education totaled \$195.8 billion in current dollars (figure 21 and table 401.20). The U.S. Department of Education provided 51 percent (\$100.4 billion) of this total. Funds exceeding \$3 billion also came from the U.S. Department of Health and Human Services (\$27.2 billion), the U.S. Department of Agriculture (\$23.9 billion), the U.S. Department of Veterans Affairs (\$13.6 billion), the U.S. Department of Defense (\$7.0 billion), the National Science Foundation (\$5.8 billion), the U.S. Department of Labor (\$4.8 billion), and the U.S. Department of Energy (\$3.5 billion).

Chronology of Federal Education Legislation

A capsule view of the history of federal education activities is provided in the following list of selected legislation:

- 1787** *Northwest Ordinance* authorized land grants for the establishment of educational institutions.
- 1802** *An Act Fixing the Military Peace Establishment of the United States* established the U.S. Military Academy. (The U.S. Naval Academy was established in 1845 by the Secretary of the Navy.)
- 1862** *First Morrill Act* authorized public land grants to the states for the establishment and maintenance of agricultural and mechanical colleges.
- 1867** *Department of Education Act* authorized the establishment of the U.S. Department of Education.²
- 1876** *Appropriation Act*, U.S. Department of the Treasury, established the U.S. Coast Guard Academy.
- 1890** *Second Morrill Act* provided for monetary grants for support of instruction in the agricultural and mechanical colleges.
- 1911** *State Marine School Act* authorized federal funds to be used for the benefit of any nautical school in any of 11 specified seaport cities.
- 1917** *Smith-Hughes Act* provided for grants to states for support of vocational education.
- 1918** *Vocational Rehabilitation Act* provided for grants for rehabilitation through training of World War I veterans.
- 1920** *Smith-Bankhead Act* authorized grants to states for vocational rehabilitation programs.
- 1935** *Bankhead-Jones Act* (Public Law 74-182) authorized grants to states for agricultural experiment stations.
- Agricultural Adjustment Act* (Public Law 74-320) authorized 30 percent of the annual customs receipts to be used to encourage the exportation and domestic consumption of agricultural commodities. Commodities purchased under this authorization began to be used in school lunch programs in 1936. The National School Lunch Act of 1946 continued and expanded this assistance.
- 1936** *An Act to Further the Development and Maintenance of an Adequate and Well-Balanced American Merchant Marine* (Public Law 74-415) established the U.S. Merchant Marine Academy.
- 1937** *National Cancer Institute Act* (Public Law 75-244) established the Public Health Service fellowship program.
- 1941** *Amendment to Lanham Act of 1940* authorized federal aid for construction, maintenance, and operation of schools in federally impacted areas. Such assistance was continued under Public Law 815 and Public Law 874, 81st Congress, in 1950.
- 1943** *Vocational Rehabilitation Act* (Public Law 78-16) provided assistance to veterans with disabilities.
- School Lunch Indemnity Plan* (Public Law 78-129) provided funds for local lunch food purchases.
- 1944** *Servicemen's Readjustment Act* (Public Law 78-346), known as the GI Bill, provided assistance for the education of veterans.
- Surplus Property Act* (Public Law 78-457) authorized transfer of surplus property to educational institutions.
- 1946** *National School Lunch Act* (Public Law 79-396) authorized assistance through grants-in-aid and other means to states to assist in providing adequate foods and facilities for the establishment, maintenance, operation, and expansion of nonprofit school lunch programs.
- George-Barden Act* (Public Law 80-402) expanded federal support of vocational education.
- 1948** *United States Information and Educational Exchange Act* (Public Law 80-402) provided for the interchange of people, knowledge, and skills between the United States and other countries.
- 1949** *Federal Property and Administrative Services Act* (Public Law 81-152) provided for donation of surplus property to educational institutions and for other public purposes.

²The U.S. Department of Education as established in 1867 was later known as the Office of Education. In 1980, under Public Law 96-88, it became a cabinet-level department. Therefore, for purposes of consistency, it is referred to as the "U.S. Department of Education" even in those tables covering years when it was officially the Office of Education.

1950 *Financial Assistance for Local Educational Agencies Affected by Federal Activities* (Public Law 81-815 and Public Law 81-874) provided assistance for construction (Public Law 815) and operation (Public Law 874) of schools in federally affected areas.

Housing Act (Public Law 81-475) authorized loans for construction of college housing facilities.

1954 *An Act for the Establishment of the United States Air Force Academy and Other Purposes* (Public Law 83-325) established the U.S. Air Force Academy.

Educational Research Act (Public Law 83-531) authorized cooperative arrangements with universities, colleges, and state educational agencies for educational research.

School Milk Program Act (Public Law 83-597) provided funds for purchase of milk for school lunch programs.

1956 *Library Services Act* (Public Law 84-597) provided grants to states for extension and improvement of rural public library services.

1957 *Practical Nurse Training Act* (Public Law 84-911) provided grants to states for practical nurse training.

1958 *National Defense Education Act* (Public Law 85-864) provided assistance to state and local school systems for instruction in science, mathematics, modern foreign languages, and other critical subjects; state statistical services; guidance, counseling, and testing services and training institutes; higher education student loans and fellowships as well as foreign language study and training; experimentation and dissemination of information on more effective use of television, motion pictures, and related media for educational purposes; and vocational education for technical occupations necessary to the national defense.

Education of Mentally Retarded Children Act (Public Law 85-926) authorized federal assistance for training teachers of the disabled.

Captioned Films for the Deaf Act (Public Law 85-905) authorized a loan service of captioned films for the deaf.

1961 *Area Redevelopment Act* (Public Law 87-27) included provisions for training or retraining of people in redevelopment areas.

1962 *Manpower Development and Training Act* (Public Law 87-415) provided training in new and improved skills for the unemployed and underemployed.

Migration and Refugee Assistance Act of 1962 (Public Law 87-510) authorized loans, advances, and grants for education and training of refugees.

1963 *Health Professions Educational Assistance Act of 1963* (Public Law 88-129) provided funds to expand teaching facilities and for loans to students in the health professions.

Vocational Education Act of 1963 (Public Law 88-210, Part A) increased federal support of vocational education schools; vocational work-study programs; and research, training, and demonstrations in vocational education.

Higher Education Facilities Act of 1963 (Public Law 88-204) authorized grants and loans for classrooms, libraries, and laboratories in public community colleges and technical institutes, as well as undergraduate and graduate facilities in other higher education institutions.

1964 *Civil Rights Act of 1964* (Public Law 88-352) authorized the Commissioner of Education to arrange for support for higher education institutions and school districts to provide inservice programs for assisting instructional staff in dealing with problems caused by desegregation.

Economic Opportunity Act of 1964 (Public Law 88-452) authorized grants for college work-study programs for students from low-income families; established a Job Corps program and authorized support for work-training programs to provide education and vocational training and work experience opportunities in welfare programs; authorized support of education and training activities and of community action programs, including Head Start, Follow Through, and Upward Bound; and authorized the establishment of Volunteers in Service to America (VISTA).

1965 *Elementary and Secondary Education Act of 1965* (Public Law 89-10) authorized grants for elementary and secondary school programs for children of low-income families; school library resources, textbooks, and other instructional materials for school children; supplementary educational centers and services; strengthening state education agencies; and educational research and research training.

Health Professions Educational Assistance Amendments of 1965 (Public Law 89-290) authorized scholarships to aid needy students in the health professions.

Higher Education Act of 1965 (Public Law 89-329) provided grants for university community service programs, college library assistance, library training and research, strengthening developing institutions, teacher training programs, and undergraduate instructional equipment. Authorized insured student loans, established a National Teacher Corps, and provided for graduate teacher training fellowships.

National Foundation on the Arts and the Humanities Act (Public Law 89-209) authorized grants and loans for projects in the creative and performing arts and for research, training, and scholarly publications in the humanities.

National Technical Institute for the Deaf Act (Public Law 89-36) provided for the establishment, construction, equipping, and operation of a residential school for postsecondary education and technical training of the deaf.

School Assistance in Disaster Areas Act (Public Law 89-313) provided for assistance to local education agencies to help meet exceptional costs resulting from a major disaster.

- 1966** *International Education Act* (Public Law 89-698) provided grants to higher education institutions for the establishment, strengthening, and operation of centers for research and training in international studies and the international aspects of other fields of study.

National Sea Grant College and Program Act (Public Law 89-688) authorized the establishment and operation of Sea Grant Colleges and programs by initiating and supporting programs of education and research in the various fields relating to the development of marine resources.

Adult Education Act (Public Law 89-750) authorized grants to states for the encouragement and expansion of educational programs for adults, including training of teachers of adults and demonstrations in adult education (previously part of Economic Opportunity Act of 1964).

Model Secondary School for the Deaf Act (Public Law 89-694) authorized the establishment and operation, by Gallaudet College, of a model secondary school for the deaf.

- 1967** *Education Professions Development Act* (Public Law 90-35) amended the Higher Education Act of 1965 for the purpose of improving the quality of teaching and to help meet critical shortages of adequately trained educational personnel.

Public Broadcasting Act of 1967 (Public Law 90-129) established a Corporation for Public Broadcasting to assume major responsibility in channeling federal funds to noncommercial radio and television stations, program production groups, and educational television networks; conduct research, demonstration, or training in matters related to noncommercial broadcasting; and award grants for construction of educational radio and television facilities.

- 1968** *Elementary and Secondary Education Amendments of 1968* (Public Law 90-247) modified existing programs and authorized support of regional centers for education of children with disabilities, model centers and services for deaf-blind children, recruitment of personnel and dissemination of information on education of children with disabilities; technical assistance in education to rural areas; support of dropout prevention projects; and support of bilingual education programs.

Handicapped Children's Early Education Assistance Act (Public Law 90-538) authorized preschool and early education programs for children with disabilities.

Vocational Education Amendments of 1968 (Public Law 90-576) modified existing programs and provided for a National Advisory Council on Vocational Education and collection and dissemination of information for programs administered by the Commissioner of Education.

- 1970** *Elementary and Secondary Education Assistance Programs, Extension* (Public Law 91-230) authorized comprehensive planning and evaluation grants to state and local education agencies; provided for the establishment of a National Commission on School Finance.

National Commission on Libraries and Information Science Act (Public Law 91-345) established a National Commission on Libraries and Information Science to effectively utilize the nation's educational resources.

Office of Education Appropriation Act (Public Law 91-380) provided emergency school assistance to desegregating local education agencies.

Environmental Education Act (Public Law 91-516) established an Office of Environmental Education to develop curriculum and initiate and maintain environmental education programs at the elementary/secondary levels; disseminate information; provide training programs for teachers and other educational, public, community, labor, and industrial leaders and employees; provide community education programs; and distribute material dealing with the environment and ecology.

Drug Abuse Education Act of 1970 (Public Law 91-527) provided for development, demonstration, and evaluation of curricula on the problems of drug abuse.

- 1971** *Comprehensive Health Manpower Training Act of 1971* (Public Law 92-257) amended Title VII of the Public Health Service Act, increasing and expanding provisions for health manpower training and training facilities.

- 1972** *Drug Abuse Office and Treatment Act of 1972* (Public Law 92-255) established a Special Action Office for Drug Abuse Prevention to provide overall planning and policy for all federal drug-abuse prevention functions; a National Advisory Council for Drug Abuse Prevention; community assistance grants for community mental health centers for treatment and rehabilitation of people with drug-abuse problems; and, in December 1974, a National Institute on Drug Abuse.

Education Amendments of 1972 (Public Law 92-318) established the Education Division in the U.S. Department of Health, Education, and Welfare and the National Institute of Education; general aid for higher education institutions; federal matching grants for state Student Incentive Grants; a National Commis-

sion on Financing Postsecondary Education; State Advisory Councils on Community Colleges; a Bureau of Occupational and Adult Education and State Grants for the design, establishment, and conduct of postsecondary occupational education; and a bureau-level Office of Indian Education. Amended current U.S. Department of Education programs to increase their effectiveness and better meet special needs. Prohibited sex bias in admission to vocational, professional, and graduate schools, and public institutions of undergraduate higher education.

- 1973** *Older Americans Comprehensive Services Amendment of 1973* (Public Law 93-29) made available to older citizens comprehensive programs of health, education, and social services.

Comprehensive Employment and Training Act of 1973 (Public Law 93-203) provided for employment and training opportunities for unemployed and underemployed people. Extended and expanded provisions in the Manpower Development and Training Act of 1962, Title I of the Economic Opportunity Act of 1962, Title I of the Economic Opportunity Act of 1964, and the Emergency Employment Act of 1971 as in effect prior to June 30, 1973.

- 1974** *Education Amendments of 1974* (Public Law 93-380) provided for the consolidation of certain programs and established a National Center for Education Statistics.

Juvenile Justice and Delinquency Prevention Act of 1974 (Public Law 93-415) provided for technical assistance, staff training, centralized research, and resources to develop and implement programs to keep students in elementary and secondary schools; and established, in the U.S. Department of Justice, a National Institute for Juvenile Justice and Delinquency Prevention.

- 1975** *Indian Self-Determination and Education Assistance Act* (Public Law 93-638) provided for increased participation of American Indians/Alaska Natives in the establishment and conduct of their education programs and services.

Harry S Truman Memorial Scholarship Act (Public Law 93-642) established the Harry S Truman Scholarship Foundation and created a perpetual education scholarship fund for young Americans to prepare for and pursue careers in public service.

Education for All Handicapped Children Act (Public Law 94-142) provided that all children with disabilities have available to them a free appropriate education designed to meet their unique needs.

- 1976** *Educational Broadcasting Facilities and Telecommunications Demonstration Act of 1976* (Public Law 94-309) established a telecommunications demonstration program to promote the development of nonbroadcast telecommunications facilities and services for the

transmission, distribution, and delivery of health, education, and public or social service information.

- 1977** *Youth Employment and Demonstration Projects Act of 1977* (Public Law 95-93) established a youth employment training program including, among other activities, promotion of education-to-work transition, literacy training and bilingual training, and attainment of certificates of high school equivalency.

Career Education Incentive Act (Public Law 95-207) authorized the establishment of a career education program for elementary and secondary schools.

- 1978** *Tribally Controlled Community College Assistance Act of 1978* (Public Law 95-471) provided federal funds for the operation and improvement of tribally controlled community colleges for American Indian/Alaska Native students.

Middle Income Student Assistance Act (Public Law 95-566) modified the provisions for student financial assistance programs to allow middle-income as well as low-income students attending college or other postsecondary institutions to qualify for federal education assistance.

- 1979** *Department of Education Organization Act* (Public Law 96-88) established a U.S. Department of Education containing functions from the Education Division of the U.S. Department of Health, Education, and Welfare (HEW) along with other selected education programs from HEW, the U.S. Department of Justice, U.S. Department of Labor, and the National Science Foundation.

- 1980** *Asbestos School Hazard Detection and Control Act of 1980* (Public Law 96-270) established a program for inspection of schools for detection of hazardous asbestos materials and provided loans to assist educational agencies to contain or remove and replace such materials.

- 1981** *Education Consolidation and Improvement Act of 1981* (Part of Public Law 97-35) consolidated 42 programs into 7 programs to be funded under the elementary and secondary block grant authority.

- 1983** *Student Loan Consolidation and Technical Amendments Act of 1983* (Public Law 98-79) established an 8 percent interest rate for Guaranteed Student Loans and an extended Family Contribution Schedule.

Challenge Grant Amendments of 1983 (Public Law 98-95) amended Title III of the Higher Education Act of 1965, and added authorization of the Challenge Grant program. The Challenge Grant program provides funds to eligible institutions on a matching basis as an incentive to seek alternative sources of funding.

Education of the Handicapped Act Amendments of 1983 (Public Law 98-199) added the Architectural Barrier amendment (providing funds for altering existing buildings and equipment to make them accessible to those with physical disabilities) and clarified participation of children with disabilities in private schools.

- 1984** *Education for Economic Security Act* (Public Law 98-377) added new science and mathematics programs for elementary, secondary, and postsecondary education. The new programs included magnet schools, excellence in education, and equal access.

Carl D. Perkins Vocational Education Act (Public Law 98-524) continued federal assistance for vocational education through FY 1989. The act replaced the Vocational Education Act of 1963. It provided aid to the states to make vocational education programs accessible to all people, including disabled and disadvantaged, single parents and homemakers, and the incarcerated.

Human Services Reauthorization Act (Public Law 98-558) created a Carl D. Perkins scholarship program, a National Talented Teachers Fellowship program, a Federal Merit Scholarships program, and a Leadership in Educational Administration program.

- 1985** *Montgomery GI Bill—Active Duty* (Public Law 98-525), brought about a new GI Bill for individuals who initially entered active military duty on or after July 1, 1985.

Montgomery GI Bill—Selected Reserve (Public Law 98-525), established an education program for members of the Selected Reserve (which includes the National Guard) who enlist, reenlist, or extend an enlistment after June 30, 1985, for a 6-year period.

- 1986** *Handicapped Children's Protection Act of 1986* (Public Law 99-372) allowed parents of children with disabilities to collect attorneys' fees in cases brought under the Education of the Handicapped Act and provided that the Education of the Handicapped Act does not preempt other laws, such as Section 504 of the Rehabilitation Act.

Drug-Free Schools and Communities Act of 1986 (Part of Public Law 99-570) established programs for drug abuse education and prevention, coordinated with related community efforts and resources, through the use of federal financial assistance.

- 1988** *Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988* (Public Law 100-297) reauthorized through 1993 major elementary and secondary education programs, including Chapter 1, Chapter 2, Bilingual Education, Math-Science Education, Magnet Schools, Impact Aid, Indian Education, Adult Education, and other smaller education programs.

Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Public Law 100-628) extended for 2 additional years programs providing assistance to the homeless, including literacy training for homeless adults and education for homeless youths.

Tax Reform Technical Amendments (Public Law 100-647) authorized an Education Savings Bond for the purpose of postsecondary educational expenses. The bill grants tax exclusion for interest earned on regular series EE savings bonds.

- 1989** *Childhood Education and Development Act of 1989* (Part of Public Law 101-239) authorized the appropriations to expand Head Start programs and programs carried out under the Elementary and Secondary Education Act of 1965 to include child care services.

- 1990** *Excellence in Mathematics, Science and Engineering Education Act of 1990* (Public Law 101-589) created a national mathematics and science clearinghouse and created several other mathematics, science, and engineering education programs.

Student Right-To-Know and Campus Security Act (Public Law 101-542) required higher education institutions receiving federal financial assistance to provide certain information about graduation rates of student-athletes and about campus crime statistics and security policies. (The 1990 campus crime and security legislation, along with later acts that amended it, is generally referred to as "the Clery Act.")

Americans with Disabilities Act of 1990 (Public Law 101-336) prohibited discrimination against people with disabilities.

National and Community Service Act of 1990 (Public Law 101-610) increased school and college-based community service opportunities and authorized the President's Points of Light Foundation.

- 1991** *National Literacy Act of 1991* (Public Law 102-73) established the National Institute for Literacy, the National Institute Board, and the Interagency Task Force on Literacy. Amended various federal laws to establish and extend various literacy programs.

High-Performance Computing Act of 1991 (Public Law 102-194) directed the President to implement a National High-Performance Computing Program. Provided for (1) establishment of a National Research and Education Network; (2) standards and guidelines for high-performance networks; and (3) the responsibility of certain federal departments and agencies with regard to the Network.

Veterans' Educational Assistance Amendments of 1991 (Public Law 102-127) restored certain educational benefits available to reserve and active-duty personnel under the Montgomery GI Bill to students whose courses of studies were interrupted by the Persian Gulf War.

Civil Rights Act of 1991 (Public Law 102-166) amended the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, and the Americans with Disabilities Act of 1990, with regard to employment discrimination. Established the Technical Assistance Training Institute.

1992 *Ready-To-Learn Act* (Public Law 102-545) amended the General Education Provisions Act to establish Ready-To-Learn Television programs to support educational programming and related materials for preschool and elementary school children and their parents, child care providers, and educators.

1993 *Student Loan Reform Act* (Public Law 103-66) reformed the student aid process by phasing in a system of direct lending designed to provide savings for taxpayers and students. Allows students to choose among a variety of repayment options, including income contingency.

National Service Trust Act (Public Law 103-82) amended the National and Community Service Act of 1990 to establish a Corporation for National Service. In addition, provided education grants up to \$4,725 per year for 2 years to people age 17 or older who perform community service before, during, or after postsecondary education.

1994 *Goals 2000: Educate America Act* (Public Law 103-227) established a new federal partnership through a system of grants to states and local communities to reform the nation's education system. The Act formalized the national education goals and established the National Education Goals Panel.

School-to-Work Opportunities Act of 1994 (Public Law 103-239) established a national framework within which states and communities can develop School-to-Work Opportunities systems to prepare young people for first jobs and continuing education. The Act also provided money to states and communities to develop a system of programs that include work-based learning, school-based learning, and connecting activities components.

Safe Schools Act of 1994 (Part of Public Law 103-227) authorized the award of competitive grants to local educational agencies with serious crime to implement violence prevention activities such as conflict resolution and peer mediation.

1996 *Contract With America: Unfunded Mandates* (Public Law 104-4) ended the imposition, in the absence of full consideration by Congress, of federal mandates on state, local, and tribal governments without adequate funding, in a manner that may displace other essential governmental priorities; and ensured that the federal government pays the costs incurred by those governments in complying with certain requirements under federal statutes and regulations.

1997 *The Taxpayer Relief Act of 1997* (Public Law 105-34) enacted the Hope Scholarship and Life-Long Learning Tax Credit provisions into law.

Emergency Student Loan Consolidation Act of 1997 (Public Law 105-78) amended the Higher Education Act of 1965 to provide for improved student loan consolidation services.

1998 *Workforce Investment Act of 1998* (Public Law 105-220) enacted the Adult Education and Family Literacy Act, and substantially revised and extended, through FY 2003, the Rehabilitation Act of 1973.

Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Public Law 105-244) expanded crime categories that must be reported by postsecondary institutions.

Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999 (Public Law 105-277) enacted the Reading Excellence Act, to promote the ability of children to read independently by the third grade; and earmarked funds to help states and school districts reduce class sizes in the early grades.

Charter School Expansion Act (Public Law 105-278) amended the charter school program, enacted in 1994 as Title X, Part C of the Elementary and Secondary Education Act of 1965.

Carl D. Perkins Vocational and Applied Technology Education Amendments of 1998 (Public Law 105-332) revised, in its entirety, the Carl D. Perkins Vocational and Applied Technology Education Act, and reauthorized the Act through FY 2003.

Assistive Technology Act of 1998 (Public Law 105-394) replaced the Technology-Related Assistance for Individuals with Disabilities Act of 1988 with a new Act, authorized through FY 2004, to address the assistive-technology needs of individuals with disabilities.

1999 *Education Flexibility Partnership Act of 1999* (Public Law 106-25) authorized the Secretary of Education to allow all states to participate in the Education Flexibility Partnership program.

District of Columbia College Access Act of 1999 (Public Law 106-98) established a program to afford high school graduates from the District of Columbia the benefits of in-state tuition at state colleges and universities outside the District of Columbia.

2000 *The National Defense Authorization Act for Fiscal Year 2001* (Public Law 106-398) included, as Title XVIII, the Impact Aid Reauthorization Act of 2000, which extended the Impact Aid programs through FY 2003.

College Scholarship Fraud Prevention Act of 2000 (Public Law 106-420) enhanced federal penalties for offenses involving scholarship fraud; required an annual scholarship fraud report by the Attorney

General, the Secretary of Education, and the Federal Trade Commission (FTC); and required the Secretary of Education, in conjunction with the FTC, to maintain a scholarship fraud awareness website.

Consolidated Appropriations Act 2001 (Public Law 106-554) created a new program of assistance for school repair and renovation, and amended the Elementary and Secondary Education Act of 1965 to authorize credit enhancement initiatives to help charter schools obtain, construct, or repair facilities; reauthorized the Even Start program; and enacted the Children's Internet Protection Act.

2001 *50th Anniversary of Brown v. the Board of Education* (Public Law 107-41) established a commission for the purpose of encouraging and providing for the commemoration of the 50th anniversary of the 1954 Supreme Court decision *Brown v. Board of Education*.

2002 *No Child Left Behind Act of 2001* (Public Law 107-110) provided for the comprehensive reauthorization of the Elementary and Secondary Education Act of 1965, incorporating specific proposals in such areas as testing, accountability, parental choice, and early reading.

Education Sciences Reform Act (Public Law 107-279) established the Institute of Education Sciences within the U.S. Department of Education to carry out a coordinated, focused agenda of high-quality research, statistics, and evaluation that is relevant to the educational challenges of the nation.

The Higher Education Relief Opportunities for Students Act of 2001 (Public Law 107-122) provided the Secretary of Education with waiver authority over student financial aid programs under Title IV of the Higher Education Act of 1965, to deal with student and family situations resulting from the September 11, 2001, terrorist attacks.

Public Law 107-139 amended Title IV of the Higher Education Act to establish fixed interest rates for student and parent borrowers.

2003 *The Higher Education Relief Opportunities for Students Act of 2003* (Public Law 108-76) provided the Secretary of Education with waiver authority over student financial aid programs under Title IV of the Higher Education Act of 1965, to deal with student and family situations resulting from wars or national emergencies.

2004 *Assistive Technology Act of 2004* (Public Law 108-364) reauthorized the Assistive Technology program, administered by the Department of Education.

Taxpayer-Teacher Protection Act of 2004 (Public Law 108-409) temporarily stopped excessive special allowance payments to certain lenders under the Federal Family Education Loan (FFEL) Program and increased the amount of loans that can be forgiven

for certain borrowers who are highly qualified mathematics, science, and special education teachers who serve in high-poverty schools for 5 years.

Individuals with Disabilities Education Improvement Act of 2004 (Public Law 108-446) provided a comprehensive reauthorization of the Individuals with Disabilities Education Act.

2005 *Student Grant Hurricane and Disaster Relief Act* (Public Law 109-67) authorized the Secretary of Education to waive certain repayment requirements for students receiving campus-based federal grant assistance if they were residing in, employed in, or attending an institution of higher education located in a major disaster area, or their attendance was interrupted because of the disaster.

Natural Disaster Student Aid Fairness Act (Public Law 109-86) authorized the Secretary of Education during FY 2006 to reallocate campus-based student aid funds to institutions of higher learning in Louisiana, Mississippi, Alabama, and Texas, or institutions that had accepted students displaced by Hurricane Katrina or Rita. The law also waived requirements for matching funds that are normally imposed on institutions and students.

Hurricane Education Recovery Act (Public Law 109-148, provision in the Defense Department Appropriations Act for FY 2006) provided funds for states affected by Hurricane Katrina to restart school operations, provide temporary emergency aid for displaced students, and assist homeless youth. The law also permitted the Secretary of Education to extend deadlines under the Individuals with Disabilities Education Act for those affected by Katrina or Rita.

2006 *Higher Education Reconciliation Act of 2005* (Public Law 109-171) made various amendments to programs of student financial assistance under Title IV of the Higher Education Act of 1965.

Public Law 109-211 reauthorized the "ED-FLEX" program (under the Education Flexibility Partnership Act of 1999), under which the Secretary of Education permits states to waive certain requirements of federal statutes and regulations if they meet certain conditions.

Carl D. Perkins Career and Technical Education Improvement Act of 2006 (Public Law 109-270) reauthorized the vocational and technical education programs under the Perkins Act through 2012.

2007 *America COMPETES Act* (or "America Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science Act") (Public Law 110-69) created new STEM (science, technology, engineering, and mathematics) education programs in various agencies, including the Department of Education.

College Cost Reduction and Access Act of 2007 (Public Law 110-84) reduced interest rates on student loans and made other amendments to the Higher Education Act of 1965 to make college more accessible and affordable.

Public Law 110-93 made permanent the waiver authority of the Secretary of Education with respect to student financial assistance during a war or other military operation or national emergency.

- 2008** *Ensuring Continued Access to Student Loans Act of 2008* (Public Law 110-227) provided various authorities to the Department of Education, among other provisions, to help ensure that college students and their parents continue to have access to loans in the tight credit market.

Higher Education Opportunity Act (Public Law 110-315) provided a comprehensive reauthorization of the Higher Education Act of 1965.

- 2009** *American Recovery and Reinvestment Act of 2009* (Public Law 111-5) provided about \$100 billion to state education systems and supplemental appropriations for several Department of Education programs.

Public Law 111-39 made miscellaneous and technical amendments to the Higher Education Act of 1965.

- 2010** *Health Care and Education Reconciliation Act of 2010* (Public Law 111-152) included, as Title II, the “SAFRA Act” (also known as the “Student Aid and Fiscal Responsibility Act”). The SAFRA Act ended the federal government’s role in subsidizing financial institutions that make student loans through the Federal Family Education Loan (FFEL) Program under Part B of Title IV of the Higher Education Act of 1965 (HEA), and correspondingly expanded the Federal Direct Student Loan Program administered by the Department of Education under Part D of Title IV of the HEA.

Public Law 111-226 provided an additional \$10 billion to states and school districts, through an “Education Jobs Fund” modeled closely on the State Fiscal Stabilization Fund created by the 2009 Recovery Act, to hire (or avoid laying off) teachers and other educators.

- 2013** *The Bipartisan Student Loan Certainty Act of 2013* (Public Law 113-28) amended the Higher Education Act of 1965 (HEA) to govern the interest rates on the various categories of student loans under Title IV of the HEA.

Violence Against Women Reauthorization Act of 2013 (Public Law 113-4) amended the Clery Act, increasing the responsibility of postsecondary institutions to prevent, address, and report crimes on campus.

- 2014** *Workforce Innovation and Opportunity Act* (Public Law 113-128) amended the Workforce Investment Act of 1998 to strengthen the U.S. workforce development system through innovation in, and alignment and improvement of, employment, training, and education programs in the United States, and to promote individual and national economic growth, and for other purposes.

Public Law 113-174 extended the National Advisory Committee on Institutional Quality and Integrity and the Advisory Committee on Student Financial Assistance for 1 year.

- 2015** *Need-Based Educational Aid Act of 2015* (Public Law 114-44) amended the Improving America’s Schools Act of 1994 to extend through FY 2022 the antitrust exemption that allows higher education institutions that admit all students on a need-blind basis to enter or attempt to enter into agreements among themselves regarding the administration of need-based financial aid.

STEM Education Act of 2015 (Public Law 114-59) defined STEM education to include computer science, and provided for continued support for existing STEM education programs at the National Science Foundation.

Every Student Succeeds Act (Public Law 114-95) reauthorized and amended the Elementary and Secondary Education Act of 1965, incorporating provisions to expand state responsibility over schools, provide grants to charter schools, and reduce the federal test-based accountability system of the No Child Left Behind Act.

Federal Perkins Loan Program Extension Act of 2015 (Public Law 114-105) temporarily extended the Federal Perkins Loan program, allowing continued disbursement of loans to current undergraduate borrowers through September 30, 2017.

- 2016** *National Defense Authorization Act for Fiscal Year 2017* (Public Law 114-328) authorizes appropriations to continue assistance to local educational agencies that benefit dependents of members of the Armed Forces and Department of Defense civilian employees, including assistance to schools with significant numbers of military dependents as well as impact aid for children with severe disabilities.

Figure 20. Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2016

Billions of constant fiscal year 2016 dollars

¹Other education includes libraries, museums, cultural activities, and miscellaneous research.
NOTE: On-budget funds are tied to appropriations for education programs. The increase in postsecondary expenditures in 2006 resulted primarily from an accounting adjustment. Amounts for 2009 include funds from the American Recovery and Reinvestment Act of 2009 (ARRA). Data for research at educational institutions are estimated for 2016.
SOURCE: U.S. Department of Education, Budget Service, unpublished tabulations. U.S. Department of Education, National Center for Education Statistics, unpublished tabulations. U.S. Office of Management and Budget, *Budget of the U.S. Government, Appendix*, fiscal years 1967 through 2017. National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1967 through 2016.

Figure 21. Percentage distribution of federal on-budget funds for education, by agency: Fiscal year 2015

¹In addition to the nine agencies shown in this figure, other agencies provide smaller amounts of funding for education.
NOTE: On-budget funds are tied to federal appropriations for education programs. Graphic display was generated using unrounded data. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

¹On-budget support includes federal funds for education programs tied to appropriations. Excludes federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Benefits are excluded because data before fiscal year (FY) 1990 are not available. This program existed since Medicare began, but was not available as a separate budget item until FY 1990. Excluded amounts range from an estimated \$4,440,000,000 in FY 1990 to an estimated \$12,100,000,000 in FY 2016.

²Losses of tax revenue attributable to provisions of the federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

³Other education includes libraries, museums, cultural activities, and miscellaneous research.

⁴The William D. Ford Federal Direct Loan Program (commonly referred to as the Direct Loan Program) provides students with the same benefits they were eligible to receive under the Federal Family Education Loan (FFEL) Program, but provides loans to students through federal capital rather than through private lenders.

⁵The Federal Family Education Loan (FFEL) Program, formerly known as the Guaranteed Student Loan Program, provided student loans guaranteed by the federal government and disbursed to borrowers. After June 30, 2010, no new FFEL loans have been originated; all new loans are originated through the Direct Loan Program.

⁶Student loans created from institutional matching funds (since 1993 one-third of federal capital contributions). Excludes repayments of outstanding loans.

⁷Student loans created from institutional matching funds (one-ninth of federal contributions). This was a demonstration project that involved only 10 institutions and had unsubsidized interest rates. Program repealed in fiscal year 1992.

⁸Formerly the State Student Incentive Grant Program. Starting in fiscal year 2000, amounts under \$30.0 million have required dollar-for-dollar state matching contributions, while amounts over \$30.0 million have required two-to-one state matching contributions.

⁹Institutions award grants to undergraduate students, and the federal share of such grants may not exceed 75 percent of the total grant.

¹⁰Employer contributions to student earnings are generally one-third of federal allocation.

¹¹The increase in postsecondary expenditures in 2006 resulted primarily from an accounting adjustment.

¹²All education funds from the American Recovery and Reinvestment Act of 2009 (ARRA) are included in the FY 2009 row of this table. Most of these funds had a 2-year availability, meaning that they were available for the Department of Education to obligate during FY 2009 and FY 2010.

¹³Estimated.

¹⁴Data adjusted by the federal budget composite deflator, as reported in the U.S. Office of Management and Budget's *Budget of the U.S. Government, Historical Tables, Fiscal Year 2017*.

NOTE: To the extent possible, federal education funds data do not represent obligations, but instead represent appropriations or (especially for earlier years) outlays. Negative amounts occur when program receipts exceed outlays. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

¹Excludes federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Benefits are excluded because data before fiscal year (FY) 1990 are not available. This program existed since Medicare began, but was not available as a separate budget item until FY 1990. Excluded amounts are estimated as follows: \$4,440,000,000 in FY 1990, \$8,020,000,000 in FY 2000, \$8,290,000,000 in FY 2005, \$9,080,000,000 in FY 2010, \$9,800,000,000 in FY 2012, \$10,000,000,000 in FY 2013, \$11,530,000,000 in FY 2014, and \$11,800,000,000 in FY 2015.

²The U.S. Department of Education was created in May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare. This table does not include education funds from the American Recovery and Reinvestment Act of 2009 (ARRA) because these funds are included only in tables that show FY 2009. Most of these funds had a 2-year availability, meaning that they were available for the Department of Education to obligate during FY 2009 and FY 2010.

³Data adjusted by the federal budget composite deflator, as reported in the U.S. Office of Management and Budget's *Budget of the U.S. Government, Historical Tables, Fiscal Year 2017*.

NOTE: To the extent possible, amounts reported do not represent obligations, but instead represent appropriations or (especially for earlier years) outlays. Negative amounts occur when program receipts exceed outlays. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, unpublished tabulations. U.S. Office of Management and Budget, *Budget of the U.S. Government, Appendix*, and supplemental agency budget documents, fiscal years 1972 through 2016. National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1970 through 2016. (This table was prepared April 2017.)

Table 401.30. Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2016—Continued

—Not available.

[†]Not applicable.

¹Excludes federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Benefits are excluded because data before fiscal year (FY) 1990 are not available. This program existed since Medicare began, but was not available as a separate budget item until FY 1990. Excluded amounts are estimated as follows: \$4,440,000,000 in FY 1990, \$8,020,000,000 in FY 2000, \$8,290,000,000 in FY 2005, \$9,080,000,000 in FY 2010, \$9,200,000,000 in FY 2011, \$9,800,000,000 in FY 2012, \$10,000,000,000 in FY 2013, \$11,530,000,000 in FY 2014, \$11,800,000,000 in FY 2015, and \$12,100,000,000 in FY 2016.

²The U.S. Department of Education was created in May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare.

³Includes funds used to support school districts with concentrations of children who reside on Indian lands, military bases, low-rent housing properties, and other federal properties, or who have parents in the uniformed services or employed on eligible federal properties.

⁴Includes many School Improvement Programs, Safe Schools and Citizenship Education, and the Office of Innovation and Improvement.

⁵Included the School-To-Work Opportunities program, which initiated a national system to be administered jointly by the U.S. Departments of Education and Labor. Programs in the Education Reform program were transferred to the school improvement programs or discontinued in FY 2002. Amounts after FY 2002 reflect balances that are spending out from prior-year appropriations.

⁶Under the Hurricane Education Recovery Act, short-term funds were provided to assist schools and students displaced by Hurricanes Katrina and Rita.

⁷Starting with FY 1994, funds for the Special Milk Program are included in child nutrition programs.

⁸Authorized under the Farm Security and Rural Investment Act of 2002 (Public Law 107-171), the McGovern-Dole International Food for Education and Child Nutrition Program carries out preschool and school feeding programs in foreign countries.

⁹These commodities are purchased under Section 32 of the Agricultural Adjustment Act of 1935 (Public Law 74-320), for use in child nutrition programs.

¹⁰Assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this program since FY 1977, and it was completely phased out in FY 1984.

¹¹The Department of Defense Domestic Dependent Elementary and Secondary Schools (DDESS) program supports students in military communities in the United States, Guam, and Puerto Rico.

¹²Established in 1979, with funds first appropriated in FY 1980.

¹³Formerly in the Office of Economic Opportunity. In FY 1972, program funds were transferred to the U.S. Department of Health, Education, and Welfare (later the U.S. Department of Health and Human Services). Today, the program is housed within the Administration for Children and Families within the U.S. Department of Health and Human Services.

¹⁴Created by the Family Support Act of 1988 (Public Law 100-485) to provide funds for the Job Opportunities and Basic Skills Training program. In 1997, AFDC was incorporated into the Temporary Assistance for Needy Families program.

¹⁵Transferred from the U.S. Department of Transportation to the U.S. Department of Homeland Security in March 2003.

¹⁶Data for 2013 through 2016 are estimated.

¹⁷Provides funding for supplemental programs for eligible American Indian students in public schools.

¹⁸Beginning in 2012, funding for vocational training programs is included in inmate programs.

¹⁹Finances the cost of education courses for inmates in federal prisons.

²⁰Formerly in the Office of Economic Opportunity. Transferred to the U.S. Department of Labor in FYs 1971 and 1972.

²¹Some of the work and training programs were in the Office of Economic Opportunity and were transferred to the U.S. Department of Labor in FYs 1971 and 1972. From FY 1994 through FY 2001, included the School-to-Work Opportunities program, which was administered jointly by the U.S. Departments of Education and Labor.

²²Established in FY 1972 and closed in FY 1986.

²³The states' share of revenue-sharing funds could not be spent on education in FYs 1981 through 1986.

²⁴Provided educational assistance allowances in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977.

²⁵This program is in the Readjustment Benefits program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterans requiring vocational rehabilitation.

²⁶This program is in the Readjustment Benefits program, Chapter 35, and provides benefits to children and spouses of veterans.

²⁷Appropriations began for this program in 1995 and ended in 2001.

²⁸Funding for education for the Appalachian Regional Commission is sorted by the type of grantee (e.g., local education agency, institution of higher education) as opposed to how the funding is actually used.

²⁹"Elementary/secondary" obligations for FYs 2014, 2015, and 2016 include those items that impact elementary and secondary (kindergarten through grade 12) students, and that are standards based. "Other education" obligations include all other arts education items not meeting the terms of "elementary/secondary."

³⁰Most of these programs were transferred to the U.S. Department of Health, Education, and Welfare, Office of Education in FY 1972.

³¹Transferred to the ACTION Agency in FY 1972.

³²The Social Security Administration was formerly part of the U.S. Department of Health, Education, and Welfare, which became the U.S. Department of Health and Human Services in 1980. In 1994, the Social Security Administration became an independent agency.

³³Benefits typically terminate at age 18, unless a child is still a full-time elementary or secondary student. In that case, benefits continue until the child graduates, or until 2 months after reaching age 19, whichever comes first. Disabled children are also eligible to receive benefits after age 18.

³⁴Under the William D. Ford Federal Direct Loan Program (commonly referred to as the Direct Loan Program), the federal government uses Treasury funds to provide loan capital directly to schools, which then disburse loan funds to students.

³⁵The Federal Family Education Loan (FFEL) Program eliminated the authorization to originate new FFEL loans after June 30, 2010; all new loans are originated through the Direct Loan Program. The FFEL Program made loan capital available to students and their families through private lenders. State and private nonprofit guaranty agencies administer the federal guarantee protecting FFEL lenders against losses related to borrower default. These agencies also collect on defaulted loans and provide other services to lenders.

³⁶Transferred from the U.S. Department of Housing and Urban Development to the U.S. Department of Education when it was established in 1980.

³⁷Transferred from the National Science Foundation to the National Oceanic and Atmospheric Administration within the U.S. Department of Commerce in October 1970.

³⁸Transferred from the U.S. Department of Commerce to the U.S. Department of Transportation in FY 1981.

³⁹Includes special education programs (military and civilian); legal education program; flight training; advanced degree program; college degree program (officers); and Armed Forces Health Professions Scholarship program.

⁴⁰Does not include Health Education Assistance Loans (HEAL).

⁴¹Alcohol, drug abuse, and mental health training programs are included starting in FY 1992.

⁴²Beginning in FY 1992, data were included in the National Institutes of Health training grants program.

⁴³This program closed in FY 2004.

⁴⁴Transferred from the U.S. Department of State to the United States Information Agency in 1977, then transferred back to the U.S. Department of State when the United States Information Agency was dissolved in 1999.

⁴⁵In FY 2014, the Regional Graduate Fellowship program was consolidated with the Fulbright Program.

⁴⁶Chapter 33 was enacted in the Post-9/11 Veterans Educational Assistance Act of 2008 (Public Law 110-252).

⁴⁷Part of the Ronald W. Reagan National Defense Authorization Act for FY 2005 (Public Law 108-375), enacted October 28, 2004. The Reserve Education Assistance Program (REAP) provides educational assistance to members of the National Guard and Reserves who serve on active duty in support of a contingency operation under federal authority on or after September 11, 2001. The National Defense Authorization Act of 2016 will phase out REAP by 2019.

⁴⁸Postsecondary student benefits were ended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) and were completely phased out by August 1985.

⁴⁹Dissolved in 1999; functions were transferred to the U.S. Department of State and the newly created Broadcasting Board of Governors.

⁵⁰Included in the Educational and Cultural Affairs program in FYs 1980 through 1983, and became an independent program in FY 1984.

⁵¹Includes funding for higher education financial services and preparation programs.

⁵²Transferred from the U.S. Department of Education to the Institute of Museum and Library Services when the Institute became an independent agency in 1996.

⁵³Transferred from the U.S. Department of the Treasury to the U.S. Department of Homeland Security in FY 2003.

⁵⁴The disaster relief program repairs and replaces damaged and destroyed school buildings. The Federal Emergency Management Agency, which administers this program, was transferred to the U.S. Department of Homeland Security in 2003.

⁵⁵The Second-Career Training Program for air traffic controllers was canceled in 1996.

⁵⁶The National and Community Service Trust Act of 1993 (Public Law 103-82) merged two agencies (ACTION and the Commission on National and Community Service) to establish the Corporation for National and Community Service.

⁵⁷The Federal Emergency Management Agency was created in 1979, representing a combination of existing agencies. The funds for the Federal Emergency Management Agency in FY 1970 were in other agencies. This agency was transferred to the U.S. Department of Homeland Security in 2003.

⁵⁸These programs include the Fall-Out Shelter Analysis, Blast Protection Design through FY 1992. Starting in FY 1993, earthquake training and safety for teachers and administrators for grades 1 through 12 are included.

⁵⁹Transferred from the General Services Administration to the National Archives and Records Administration in April 1985.

⁶⁰The Consolidated Appropriations Act of 2008 (Public Law 110-161) transferred the National Commission on Libraries and Information Science to the Institute of Museum and Library Services in 2008.

⁶¹Includes federal obligations for research and development centers and R & D plant administered by colleges and universities. Data for 2016 are estimated.

⁶²FY 1970 includes outlays for the Research and Training program. FY 1980 includes outlays for the National Institute of Education program. FY 1990 through FY 2000 amounts are outlays for the Office of Educational Research and Improvement. Amounts for FY 2005 and later years are for the Institute of Education Sciences; these amounts are outlays for years prior to FY 2010 and appropriations for later years.

⁶³The Office of Economic Opportunity was dissolved in 1981.

⁶⁴The U.S. Arms Control and Disarmament Agency was integrated into the U.S. Department of State in 1999.

⁶⁵Other agencies include the Appalachian Regional Commission, National Archives and Records Administration, and Social Security Administration.

NOTE: To the extent possible, amounts reported do not represent obligations, but instead represent appropriations or (especially for earlier years) outlays. Negative amounts occur when program receipts exceed outlays. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.
