Technical Review Panel

Jeff Allum
 Director, Research and Policy Analysis
 Council of Graduate Schools
 One Dupont Circle NW
 Washington, DC 20036
 Phone: (202) 223-3791
 E-mail: jallum@cgs.nche.edu

Michelle Appel
 Director, Enrollment Policy & Planning – IRPA
 University of Maryland
 1101 Mitchell Building
 College Park, MD 20742
 Phone: (301) 405-0475
 E-mail: mappel@umd.edu

Terry Bazan
 Executive Director of Student Assistance
 Austin Community College
 5930 Middle Fiskville Road
 Austin, TX 78752
 Phone: (512) 223-7550
 E-mail: tbazan@austincc.edu

Vasilios Bournas
 Senior Reporting & Policy Research Analyst
 DeVry Education Group
 3005 Highland Parkway
 Downers Grove, IL 60515
 Phone: (630) 515-5463
 E-mail: vbournas@devrygroup.com

Alberto Cabrera
 Professor
 University of Maryland
 3112 Benjamin Building
 College Park, MD 20742
 Phone: (301) 405-2875
 E-mail: cabrera@umd.edu

Margaret Cahalan
 Vice President for Research & Director
 The Pell Institute, Council for Opportunity in
 Education
 1025 Vermont Avenue NW
 Suite 1020
 Washington, DC 20005
 Phone: (202) 347-7430
 E-mail: margaret.cahalan@pellinstitute.org

Stephanie Cellini
 Associate Professor
 The George Washington University
 805 21st Street NW
 Room 601M
 Washington, DC 20052
 Phone: (202) 994-0019
 E-mail: scellini@gwu.edu

Kevin Eagan
 Assistant Professor in Residence
 University of California, Los Angeles
 405 Hillgard Avenue
 3101 D Moore Hall
 Box 951521
 Los Angeles, CA 90095
 Phone: (310) 206-3448
 E-mail: keagan@ucla.edu

Charlotte Etier
 Research Analyst
 National Association of Student Financial Aid
 Administrators
 1101 Connecticut Avenue NW
 Suite 1100
 Washington, DC 20036
 Phone: (202) 785-6943
 E-mail: etierc@nasfaa.org

Carla Fletcher
 Senior Research Analyst
 TG Research and Analytical Services
 301 Sundance Parkway
 Round Rock, TX 78681
 Phone: (512) 219-4637
 E-mail: carla.fletcher@tgsllc.org

Fred Galloway
 Professor, Leadership Studies
 University of San Diego, School of Leadership
 and Education Science
 5998 Alcalá Park
 Office: MRH-275H
 San Diego, CA 92110
 Phone: (619) 260-7435
 E-mail: galloway@sandiego.edu

Taylor Hansen
 Senior Government Relations Associate
 Association of Private Sector Colleges and
 Universities
 1101 Connecticut Avenue NW
 Suite 900
 Washington, DC 20036
 Phone: (202) 336-6707
 E-mail: taylor.hansen@apscu.org

Donald Heller
 Dean, College of Education
 Michigan State University
 501 Erickson Hall
 620 Farm Lane
 East Lansing, MI 48824
 Phone: (517) 355-1734
 E-mail: dheller@msu.edu

Brad Hershbein
 Economist
 W.E. Upjohn Institute for Employment Research
 300 South Westnedge Avenue
 Kalamazoo, MI 49007
 Phone: (269) 385-0437
 E-mail: hershbein@upjohn.org

Nick Hillman
 Assistant Professor
 University of Wisconsin-Madison
 1000 Bascom Mall
 Room 249
 Madison, WI 53706
 Phone: (608) 262-3106
 E-mail: nwhillman@wisc.edu

Ozan Jaquette
 Assistant Professor, College of Education
 University of Arizona
 1430 East Second Street
 Room 327A
 Tucson, AZ 85721
 Phone: (734) 709-3835
 E-mail: ozanj@email.arizona.edu

Daniel Klasik
 Assistant Professor of Higher Education
 Administration
 The George Washington University
 2134 G Street NW
 Washington, DC 20052
 Phone: (202) 994-1453
 E-mail: djklasik@gwu.edu

Alexander McCormick
 Associate Professor and NSSE Director
 Center for Postsecondary Research
 Indiana University Bloomington
 1900 East 10th Street, Suite 419
 Bloomington, IN 47406
 Phone: (812) 856-4435
 E-mail: amcc@indiana.edu

Catherine Millett
 Senior Research Scientist
 Educational Testing Service
 660 Rosedale Road
 MS 01-R
 Princeton, NJ 08541
 Phone: (609) 240-2556
 E-mail: cmillett@ets.org

Chad Muntz
 Director, Institutional Research
 University System of Maryland
 3300 Metzgerott Road
 Adelphi, MD 20783
 Phone: (301) 445-2737
 E-mail: cmuntz@usmd.edu

Christopher Nellum
 Senior Policy Research Analyst
 American Council on Education
 One Dupont Circle NW
 Suite 1B
 Washington, DC 20036
 Phone: (202) 939-9405
 E-mail: cnellum@acenet.edu

Toby Park
 Assistant Professor
 Florida State University, College of Education
 P.O. Box 3064452
 1205D Stone Building
 Tallahassee, FL 32311
 Phone: (850) 644-8168
 E-mail: tjpark@@fsu.edu

Kent Phillippe
 Associate Vice President, Research & Student
 Success
 American Association of Community Colleges
 One Dupont Circle NW
 Suite 410
 Washington, DC 20036
 Phone: (202) 416-4505
 E-mail: kphillippe@aacc.nche.edu

Jason Ramirez
 Director of Research and Policy Analysis
 National Association of Independent Colleges
 and Universities
 1025 Connecticut Avenue NW
 Suite 700
 Washington, DC 20036
 Phone: (202) 835-0003
 E-mail: jason@naicu.edu

Kim Rueben
 Senior Fellow
 Urban Institute
 2100 M Street NW
 Washington, DC 20037
 Phone: (202) 261-5662
 E-mail: krueben@urban.org

Rajat Shah
 Senior Vice President, Student Financial Services
 Lincoln Technical Institute
 200 Executive Drive
 Suite 340
 West Orange, NJ 07052
 Phone: (201) 953-2246
 E-mail: rshah@lincolntech.com

Kurt Slobodzian
 Vice President, Research
 Nexus Research and Policy Center
 5662 South Amberwood Drive
 Chandler, AZ 85248
 Phone: (602) 568-1178
 E-mail: kurt646@gmail.com

Jeff Strohl
 Director of Research
 Georgetown University Center on Education and
 the Workforce
 3300 White Haven, Suite 5000
 Washington, DC 20007
 Phone: (202) 687-4945
 E-mail: js787@georgetown.edu

Randy Swing
 Executive Director
 Association for Institutional Research
 1435 East Piedmont Drive
 Tallahassee, FL 32308
 Phone: (850) 385-4155

Appendix B: Sampling Details

This page intentionally left blank.

B.1 Institution Frame and Sample

For students to be eligible for the 2015–16 National Postsecondary Student Aid Study (NPSAS:16), they must have been enrolled in a NPSAS-eligible institution for any term or course of instruction at any time during the 2015–16 academic year (September to June). Institutions must have also met the following requirements for NPSAS eligibility:

- offer an educational program designed for persons who have completed secondary education;
- offer at least one academic, occupational, or vocational program of study lasting at least 3 months or 300 clock hours;
- offer courses that were open to more than the employees or members of the company or group (e.g. union) that administers the institution;
- be located in the 50 states, the District of Columbia, or Puerto Rico;
- not be a U.S. service academy institution; and
- have signed the Title IV participation agreement with the U.S. Department of Education.¹

Institutions providing only vocational, recreational, remedial, or only in-house courses for their own employees or members were excluded. U.S. service academies (the U.S. Air Force Academy, the U.S. Coast Guard Academy, the U.S. Military Academy, the U.S. Merchant Marine Academy, and the U.S. Naval Academy) were excluded because of their unique funding/tuition base.

The above institution eligibility criteria are consistent with all iterations of NPSAS with two exceptions: (1) Title IV participation and (2) inclusion of correspondence schools. The requirement that an institution be eligible to distribute federal Title IV aid was added as of NPSAS:2000. In NPSAS:2000, it was determined that there was sufficient comparability in survey design to ensure that important comparisons with data from previous NPSAS cycles could be made (Riccobono et al. 2002).

Institutions that offered only correspondence courses, provided these same

¹ A Title IV eligible institution is an institution that has a written agreement (program participation agreement) with the U.S. Secretary of Education that allows the institution to participate in any of the Title IV federal student financial assistance programs other than the State Student Incentive Grant (SSIG) and the National Early Intervention Scholarship and Partnership (NEISP) programs.

institutions were also eligible to distribute federal Title IV student aid, were first included as eligible in NPSAS:04.

B.1.1 Institution Sample Frame Construction

The NPSAS:16 field test and full-scale institution sampling frames were constructed separately, an approach that differed from the three previous NPSAS studies. The field test institution frame was constructed from the 2012–13 IPEDS Institutional Characteristics header, Institutional Characteristics (IC), Completions, and 12-Month Enrollment files. The full-scale institution frame was constructed from the 2014–15 IPEDS Institutional Characteristics header, Institutional Characteristics (IC), Completions, and 12-month Enrollment files. Creating a new institution sample frame for the full-scale study carried the advantage of having a more accurate and current frame constructed using the most current IPEDS files.

Large higher education systems (groups of higher education institutions with consolidated reporting) and institutions likely to be selected with certainty (i.e., with a probability of selection equal to one) in the full-scale frame were removed from the field-test frame to avoid burdening them with both field-test and full-scale data collections. Similarly, institutions selected for the field-test sample were removed from the full-scale frame.² The weights for the full-scale sample institutions were adjusted so that the sum of the weights would represent the full population of eligible institutions.

² It was decided for the full-scale study to oversample public 4-year, non-doctorate-granting, primarily subbaccalaureate institutions after field test results were analyzed. Therefore, 23 of these institutions were in both the field test and full-scale studies.

B.1.2 Institution Sample Selection

NPSAS statisticians selected 2,000 institutions using a variation of probabilities proportional to size (PPS) sampling called sequential probability minimum replacement (PMR) sampling (Chromy 1979). A composite size measure (Folsom, Potter, and Williams 1987) helped achieve self-weighting samples³ for student by institution strata and allowed for flexibility in changing sampling rates in selected strata without losing the self-weighting attribute of the sampling method. PMR, in this instance, would generally allow for institutions to be selected multiple times. To avoid multiple selections of sample institutions, institutions with expected frequencies of selection greater than one were selected with certainty, and removed from the frame. The remainder of the institutional sample was selected from the remaining institutions within each stratum. Institution composite measures of size were determined using enrollment data from the most recent IPEDS 12-Month and Completions Components.

The 11 institutional strata are based on institutional level, control, level of offering, and highest level of offering:⁴

1. public less-than-2-year
2. public 2-year
3. public 4-year, non-doctorate-granting, primarily subbaccalaureate
4. public 4-year, non-doctorate-granting, primarily baccalaureate
5. public 4-year, doctorate-granting
6. private nonprofit, less-than-4-year
7. private nonprofit, 4-year, non-doctorate-granting
8. private nonprofit, 4-year, doctorate-granting
9. private for-profit, less-than-2-year
10. private for-profit, 2-year
11. private for-profit, 4-year.

As shown above, the typical stratum of public 4-year non-doctorate-granting institutions was split into two strata (strata 3 and 4 above): public 4-year institutions that are primarily subbaccalaureate and those that are primarily baccalaureate. The subbaccalaureate institutions are mainly community colleges that offer a small

³ Self-weighting samples have equal weights within sampling domains.

⁴ The institutional strata can be aggregated by control or level for the purposes of reporting institution counts.

number of bachelor's degrees in select fields Splitting the public 4 year, non-doctorate-granting institutions into two strata, rather than combining them, allows for oversampling and controlling the sample size of the subbaccalaureate institutions and students in them, including the baccalaureate recipients. Within each institution stratum, additional implicit stratification was accomplished by sorting the sampling frame by the following classifications:⁵ (1) Historically Black Colleges and Universities (HBCUs) status; (2) Hispanic Serving Institutions (HSIs) status⁶ (3) INSTCAT (institutional category derived using the level of offerings reported on the IPEDS Institutional Characteristics [IC] component and the number and level of awards that were reported on the IPEDS Completions [C] component); (4) Carnegie classifications of degree-granting postsecondary institutions;⁷ (5) the Office of Business Economics Region from the IPEDS Institutional Characteristics Header file (Bureau of Economic Analysis of the U.S. Department of Commerce Region); (6) state and system for states with large systems, e.g., the SUNY and CUNY systems in New York, the state and technical colleges in Georgia, and the California State University and University of California systems in California; and (7) the institution composite measure of size. This implicit stratification helped ensure that the sample was approximately proportional to the population for these measures.

Each sampled institution verified as NPSAS-eligible was asked to provide a list of all students who satisfied all of the NPSAS eligibility conditions. Sampled institutions were asked to provide an “unduplicated” electronic list (i.e., one in which each student's name appeared only once), information needed to match to external data sources, create student sampling strata, and contact the sample member for the survey. The following data items were requested for NPSAS-eligible students enrolled at each sample institution:

- name
- Social Security number (SSN)
- student ID number (if different from SSN)
- student level (undergraduate, masters, doctoral-research/scholarship/other, doctoral-professional practice, other graduate)
- class level of undergraduates (first year, second year, etc.)
- date of birth (DOB)

⁵ Implicit stratification is the process of creating substrata by sorting the data within stratum when using the PMR sampling algorithm.

⁶ HSI status no longer exists in IPEDS, so an HSI proxy was created using IPEDS Hispanic enrollment data.

⁷ Some Carnegie categories were collapsed for the purposes of implicit stratification.

- Classification of Instructional Programs (CIP) or major
- undergraduate degree program
- high school/completion program completion date (month and year)
- baccalaureate recipient indicator (for students who have already received their bachelor's degree at the NPSAS institution since July 1, 2015)
- potential baccalaureate recipient indicator (for students who are expected to receive their bachelor's degree at the NPSAS institution by June 30, 2016)⁸
- enrollment in high school (or completion program)
- date of first enrollment (at the postsecondary level)
- veteran status
- grade point average (GPA)
- number of credits accumulated
- account overdue (student owes fee that would prevent bachelor's degree award)
- race
- ethnicity
- gender
- first-time graduate student at the NPSAS institution indicator
- contact information (local and permanent street address and phone number and school and home e-mail address)

The student sample was randomly selected via stratified systematic sampling from lists of students enrolled between July 1, 2015, and April 30, 2016, at the sampled institutions. The 17 student sampling strata were

1. baccalaureate recipients who are veterans
2. baccalaureate recipients from science, technology, engineering, and mathematics (STEM) programs
3. baccalaureate recipients from teacher education programs

⁸ Splitting the baccalaureate recipients into two items is based on the field test. It made providing baccalaureate information easier for institutions that could not identify the potential baccalaureate recipients and helped with QC checks against IPEDS counts for institutions that could not identify the potential baccalaureate recipients.

4. baccalaureate recipients from business programs
5. baccalaureate recipients from other programs
6. other undergraduate students who are veterans⁹
7. other undergraduate students⁷
8. graduate students who are veterans
9. first-time graduate students
10. master's degree students in STEM programs
11. master's degree students in education and business programs
12. master's degree students in other programs
13. doctoral-research/scholarship/other students in STEM programs
14. doctoral-research/scholarship/other students in education and business programs
15. doctoral-research/scholarship/other students in other programs
16. doctoral-professional practice students
17. other graduate students¹⁰

If students fell into multiple strata, such as students who are veterans or students with double majors, the ordering of the strata above was used to prioritize the stratification.

In determining student sample size allocation across the institution strata, the following notation was used:

$r = 1, 2, \dots, 11$ indexes the previously defined institutional strata;

$s = 1, 2, 3, \dots, 17$ indexes the previously defined student strata;

$j = 1, 2, \dots, J(r)$ indexes the institutions within stratum r ;

$M_{rs}(j)$ = number of students enrolled during the NPSAS year who belonged to student stratum s at the j th institution in institutional stratum r ;

⁹ *Other undergraduate students* are defined as any undergraduate student not classified as a baccalaureate recipient.

¹⁰ “Other graduate” students are those who are not enrolled in a degree program, such as students just taking graduate courses.

m_{rs} = number of students to be selected from student stratum s within the r th institutional stratum (i.e., student stratum rs); and

$\pi_r(j)$ = probability of selecting the j th institution in institutional stratum r .

The overall population sampling rate (f_{rs}) for student stratum rs is given by

$$f_{rs} = m_{rs} / M_{rs}(+),$$

where

$$M_{rs}(+) = \sum_{j=1}^{J(r)} M_{rs}(j).$$

The student sample was allocated to separate applicable institutional and student sampling strata, as defined above. Student sampling rates, which were used to compute institution-level composite measures of size, were based on the IPEDS:2014-15 12-Month Enrollment and Completions files and the student sample sizes, m_{rs} , (table B-1). The initially computed stratum-level student sampling rates, f_{rs} (used to define institutional measures of size), are shown in tables B-2 and B-3. Table B-2 shows the initially computed stratum-level student sampling rates for potential baccalaureate recipients and other undergraduate students for each of the 11 institutional strata. Table B-3 presents the initially computed stratum-level student sampling rates for graduate students.

¹ Control and level of institution reflects institutional categorization as determined from the 2013–14 Integrated Postsecondary Education Data System (IPEDS) files; some changes in this classification were uncovered when institutions were contacted.² Based on 2013–14 IPEDS.³ IPEDS identified only a few or no potential baccalaureate recipients for this stratum. However, during sampling, some of the sampled students in this stratum were classified as potential baccalaureate recipients, resulting in more potential baccalaureate recipients being sampled than were identified on the frame.

NOTE: Sample sizes rounded to the nearest 10 and, therefore, may not sum to total.

The composite measure of size for the j th institution in stratum r was then defined to be

$$S_r(j) = \sum_{s=1}^{17} f_{rs} M_{rs}(j),$$

which is the number of students that would be selected from the j th institution if all institutions on the frame were to be sampled. Chromy's (1979) sequential probability minimum-replacement sampling algorithm was used to select an sample of institutions for each institutional stratum. To ensure the positive pairwise probabilities of selection required for proper variance estimation (Chromy 1981), the sampling algorithm was implemented with a random start for each institutional stratum. Therefore, the probability of selection for the j th institution in institutional stratum r is given by

$$\pi_j(j) = \begin{cases} \frac{n_r S_r(j)}{S_r(+)} & \text{for noncertainty selections} \\ 1 & \text{for certainty selections,} \end{cases}$$

where

$$S_r(+) = \sum_{j=1}^{J(r)} S_r(j),$$

and n_r is the number of noncertainty selections from stratum r .

Table B-4 shows the institutional sampling rates and the sample size for each of the 11 institutional strata.

B.2 Student Universe and Samples

The NPSAS:16 target population consisted of all eligible students enrolled at any time between July 1, 2015, and June 30, 2016,¹¹ in eligible postsecondary institutions in the United States and who were

- enrolled in either: (a) an academic program; (b) at least one course for credit that could be applied toward fulfilling the requirements for an academic degree; (c) exclusively non-credit remedial coursework but determined by the institution to be eligible for Title IV aid; or (d) an occupational or vocational program that required at least 3 months or 300 clock hours of instruction to receive a degree, certificate, or other formal award;
- not currently enrolled in high school; and
- not solely enrolled in a General Educational Development (GED) or other high school completion program.

¹¹ So as not to delay data collection, enrollment lists covered the period of July 1, 2015, through April 30, 2016. The date of April 30 was selected to include virtually all students enrolled prior to the summer term.

B.2.1 Student Sampling Frame Construction

The sampling frames for selecting students were enrollment lists provided by the eligible sample institutions for students meeting eligibility criteria and enrolled during the 2015–16 academic year.

Each sampled institution verified as NPSAS-eligible was asked to provide a list of all students who satisfied all the NPSAS:16 eligibility conditions, preferably an “unduplicated” electronic list (i.e., one in which each student’s name appeared only once), together with identifying, classifying, and locating information (see section 2.2.2).

NPSAS staff asked all institutions that award baccalaureate degrees to identify baccalaureate recipients. Instead of waiting until June for institutions to positively identify students and send in lists, it was requested that the enrollment lists for 4-year institutions include indicators of students who have received or will potentially receive a baccalaureate degree during the NPSAS year (response options - yes, no, don’t know). Because most enrollment lists were received before June 30, and many were received before April, some sample students identified by the institution as baccalaureate candidates were determined during the interview not to be baccalaureate recipients (false positives). Likewise, some sample students not identified by the institution as baccalaureate candidates were determined during the interview to have actually received baccalaureate degrees (false negatives) during the specified timeframe. Institutions were asked to provide these indicators before most had completed their spring graduation to avoid delaying overall data collection.

Several checks on quality and completeness of enrollment lists were implemented before the sample students were selected. Enrollment lists failed quality control checks under the following conditions:

- Education level—undergraduate, master’s, doctoral-research/scholarship/other, doctoral-professional practice, or other graduate—was not included or was unclear; or
- Baccalaureate recipient students were not identified; or
- Major fields of study or CIP codes were not clearly identified for graduate students; or
- If the percentage of students who were less than 18 years of age and did not have a high school graduation date was greater than five percent; or
- Contact information appeared misaligned with student names in the enrollment list entry system; or

The number of students listed was inconsistent with the most recent IPEDS data. For undergraduates, baccalaureate recipients, and graduates, the list failed if its count differed by 50 percent or more (higher or lower) from the IPEDS enrollment count.

To keep institution burden to a minimum, no lists were failed if the absolute difference between the enrollment list count for a particular student level and the IPEDS count for that level was less than 200 students and the student list count was not zero. Likewise, if the IPEDS count was zero for any student level and the institution provided a list of any number of students at that particular level, the count passed the quality control check. Institutions providing lists that failed these checks were contacted so the detected problems could be resolved.

To identify and sample veterans, staff sent SSNs from the student enrollment lists to the Veterans Benefits Administration (VBA) for matching (see chapter 5 for further detail on administrative record matching). Staff placed students identified as veterans receiving benefits (through VBA matching) or as veterans on the enrollment list in the appropriate veteran stratum.

Staff also matched student SSNs from the enrollment lists to National Student Loan Data System (NSLDS) data and used the financial aid data for student implicit stratification¹². Within the student explicit strata, staff sorted students by a federally aided/unaided indicator in order to allow the sample proportions of aided and unaided students to approximately match the population within institution and student strata. This was done to help produce more accurate financial aid estimates.¹³

B.2.2 Student Sample Selection

As NPSAS statisticians received enrollment lists from institutions, they sampled students by means of stratified systematic sampling with predetermined sampling rates varying by student stratum. To eliminate cross-institution duplication, the staff compared SSNs of students selected from an institution with SSNs of students who had already been selected from other institutions. Multiplicity adjustments in the sample weighting (described in more detail in chapter 7) accounted for the fact that

¹² Implicit stratification is the process in which strata are created during the sampling process by sorting the data, rather than creating the strata prior to sampling and selecting an independent sample from each stratum.

¹³ Substantial differences in federal loan rates were observed in NPSAS:12 between the full-sample estimates and the poststratified estimates. This led to increased weight variation but, more importantly, could have led to bias in the weighted estimates depending on the reason for the discrepancy in estimates.

any students who attended more than one institution during the NPSAS year had more than one chance of selection.

The development of student sampling rates within student stratum r (i.e., the r th institutional stratum and the j th student stratum within the institutional stratum) were previously discussed in section B.1.2; the same notation applies here.

For the unconditional probability of selection to be a constant for all eligible students in stratum r , the overall probability of selection should be the overall student sampling fraction, f_{rs} ; in essence, it must be required that

$$\frac{m_{rs}(j)}{M_{rs}(j)} \pi_r(j) = f_{rs},$$

or equivalently,

$$m_{rs}(j) = f_{rs} \frac{M_{rs}(j)}{\pi_r(j)}.$$

Thus, the conditional sampling rate for stratum “ r ,” given selection of the j th institution, becomes

$$f_{rs|j} = f_{rs} / \pi_r(j).$$

It should be noted that, in this case, the desired overall student sample size, m_s , is achieved only *in expectation* over all possible samples.

Achieving the desired sample sizes with equal probabilities within strata in the particular sample that has been selected and simultaneously adjusting for institutional nonresponse and ineligibility requires that

$$\sum_{j \in R} m_{rs}(j) = m_{rs},$$

where R denotes the set of eligible, *responding* institutions. Letting the conditional student sampling rate for stratum r in the j th institution be

$$\hat{f}_{rs|j} = \hat{f}_{rs} / \pi_r(j),$$

then requires

$$\sum_{j \in R} \hat{f}_{rs} \frac{M_{rs}(j)}{\pi_r(j)} = m_{rs},$$

or, equivalently,

$$\hat{f}_{rs} = m_{rs} / \hat{M}_{rs},$$

where

$$\hat{M}_{rs} = \frac{\sum_{j \in R} M_{rs}(j)}{\pi_r(j)}.$$

Because setting student sampling rates was necessary before complete information on institutional eligibility and response status was available, \hat{M}_{rs} was calculated as follows:

$$\hat{M}_{rs} = \sum_{j \in S} \frac{M_{rs}(j)}{\pi_r(j)} * E_r * R_r,$$

where S denotes the set of all sample institutions, E_r is the institutional eligibility factor for institutional stratum r , and R_r is the institutional response factor for institutional stratum r . These factors were the proportions of institutions expected to be eligible or responding within the defined strata. Because this determination was made after eligibility status had already been determined for some institutions, values of zero (known not eligible) or 1 (known eligible) were used, if known at that time.

These sampling rates were sometimes modified as follows:

- Student sampling rates were increased for each institution to yield at least 10 students (if possible) to ensure sufficient yield for variance estimation.
- Student sampling rates were decreased, with few exceptions,¹⁴ if an institution sample size was greater than 300 students.
- Student sampling rates were adjusted higher or lower based on expected yield calculations for institutions where the sample had not yet been selected.

¹⁴ There were approximately 10 institutions that had a sample size greater than 300 due to the large size of the institution.

These adjustments to the initial sampling rates resulted in some additional variability in the student sampling rates and therefore in increased survey design effects (variance inflation; see section 7.3.1). Table B-5 reports the initial classification of the student sample by institutional and student types.

The achieved sample size of 122,030 was lower than the targeted 126,320 because many enrollment lists, especially those from for-profit institutions, contained fewer students than expected based on IPEDS counts. After sample rate adjustments, as described above, the sample size still fell short of the target. Overall, more baccalaureate recipients and graduate students were selected into the sample than planned, as were fewer undergraduates (see table B-6).

¹ As expected the sampling frames misclassified some individual students with respect to baccalaureates, undergraduate, and graduate status; statistics presented in this table are based on the sampling frame classification.

² Based on sample allocation and 2014–15 Integrated Postsecondary Education Data System (IPEDS) file enrollment counts.

³ The student sample was drawn from 1,750 eligible institutions determined to be eligible and providing enrollment lists.

⁴ Percent reported reflects the ratio of "achieved" to "expected."

NOTE: Sample sizes rounded to the nearest 10 and, therefore, may not sum to total.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2015–16 National Postsecondary Student Aid Study (NPSAS:16).

B.3 Determining Sample Sizes and Sampling Rates

Student sample allocation and sampling rates for NPSAS:16 were determined by means of cost/variance optimization procedures to maximize the inferences supported by the design while minimizing data collection costs. The sample allocation was first calculated as if all sample institutions would participate.

The cost/variance sample-optimization process consisted of the following steps:

1. Precision requirements were established for key estimates.
2. Institution-level and student-level sampling strata were developed to support the key estimates.
3. A cost model was developed.
4. A relative variance model was developed.

5. The optimum sample allocation was determined.

The cost/variance optimization process is discussed in detail below.

B.3.1 Precision Requirements for Key Estimates

The precision goal for NPSAS:16 was to achieve relative standard errors (*RSEs*) of 10 percent or less and comparable to or less than NPSAS:12 *RSEs* for key national estimates for the full population, undergraduate students, and graduate students, and to achieve *RSEs* of 10 percent or less and comparable to or less than NPSAS:08 *RSEs* for key national estimates for baccalaureate recipients.

The key estimates were based on acquired knowledge of the NPSAS data, how the data would be used for analysis, and what data were most important. A total of 936 precision constraints were developed for national-level student estimates. These estimates by domain are shown in table B-7.

B.3.2 Cost Model

The cost model necessary to support the cost/variance optimization process was the following:

$$C = C_0 + \sum_{r=1}^{11} n_r C_r + \sum_{r=1}^{11} \sum_{s=1}^{17} n_r n_{rs} C_{rs},$$

where C represents the total cost of NPSAS, C_0 represents the “fixed costs” that do not depend on the number of sample institutions or students, C_r represents the variable cost per participating institution in institutional stratum r , C_{rs} represents the variable cost per responding student in institutional stratum r and student stratum s (stratum (r,s)), n_r represents the number of participating institutions selected from institutional stratum r , and n_{rs} represents the number of responding students selected from stratum (r,s) .

Only the components of variable cost, C_r and C_{rs} , must be estimated to support the cost/variance optimization. They were estimated with the spreadsheet developed for the study budget. The cost per participating institution was estimated by holding the numbers of responding students constant while varying the numbers of participating institutions. The resulting estimate of the variable cost per participating institution was $C_r = \$636$ for institutions in stratum r that were eligible for NPSAS.

Likewise, the variable cost per participant was estimated by holding the number of participating institutions constant while varying the number of participating students. The resulting estimate of the variable cost per participant was $C_{rs} = \$64$ for students.

B.3.3 Relative Variance Model

NPSAS statisticians developed the following model to represent the relative variance of the NPSAS estimate g (e.g., percentage of students receiving any federal student aid) for students belonging to domain d (e.g., all students enrolled in public 2-year institutions):

$$\begin{aligned} \text{RelVar}_{gd} = & \sum_r \left\{ \sum_s W_{drs}^2 \text{UWE}_{rs} \right\} \left[\frac{\left[\sum_{2gd}^2 \right] \left[CV_{gd}^2 \right]}{RR_r} \right] \left[1 + CV_{md}^2 \right] \left[\frac{1}{n_r} - \frac{RR_r}{N_h} \right] \\ & + \sum_r \sum_k W_{drs}^2 \text{UWE}_{rs} \frac{\left[\sum_{4gd}^2 \right] \left[CV_{gd}^2 \right]}{\alpha_{drs}} \left[\frac{1}{n_{rs}} \right], \end{aligned}$$

where the parameters of this model are defined as follows:

$r = 1, 2, \dots, 11$ represents the institutional sampling strata;

$s = 1, 2, \dots, 17$ represents the student sampling strata;

W_{drs} = proportion of domain d members who belong to stratum (r,s) ;

UWE_{rs} = unequal weighting effect within stratum (r,s) ;

σ_{1gd}^2 = the variance between institutional strata;

σ_{2gd}^2 = the variance between institutions within strata;

σ_{3gd}^2 = the variance between student strata;

σ_{4gd}^2 = the variance between participants within student strata;

$\sigma_{Tgd}^2 = \sigma_{1gd}^2 + \sigma_{2gd}^2 + \sigma_{3gd}^2 + \sigma_{4gd}^2$ = total variance of NPSAS observations;

$\sum_{2gd}^2 = \sigma_{2gd}^2 / \sigma_{Tgd}^2$ = proportion of variance between institutions within institutional strata;

$\sum_{4gd}^2 = \sigma_{4gd}^2 / \sigma_{Tgd}^2$ = proportion of variance between participants within student strata;

$CV_{gd} = \sqrt{\sigma_{Tgd}^2} / \bar{y}_{gd}$ = coefficient of variation among NPSAS observations;

RR_r = stratum r institutional response rate;

CV_{md} = coefficient of variation of cluster sizes (m) among domain d members; and

a_{drs} = proportion of stratum (r,s) members who belong to domain d .

The proportion of domain d members who belonged to stratum (r,s) , W_{drs} , and the proportion of stratum (r,s) members who belong to domain d , α_{drs} , were estimated with use of NPSAS:08 and NPSAS:12 data. Each sample member was first assigned to the appropriate NPSAS institutional and student strata. Then, the analysis domains to which each sample student belonged were also identified (per table B-7). Statistical analysis weights were then used to estimate the size of the domain d population within each stratum (r,s) for each of the 11 NPSAS institutional sampling strata. These domain sizes were used to compute the domain prevalence, W_{drs} , and α_{drs} .

The components of variance, σ_{1gd}^2 , σ_{2gd}^2 , σ_{3gd}^2 , and σ_{4gd}^2 , were computed according to the method of moments procedures in SAS Proc Nested, which resulted in some negative estimates. When a within-stratum variance component was estimated to be negative, the variance component for that stratum was considered to be negligible, and the variance components were recomputed without inclusion of that stratum in the computation. Any unusually small or extremely large student-level components of variance were truncated so that the student-level component of variance was always between 40 percent and 95 percent of the total variance.

Unequal weighting effects, UWE_m , were set to 1.05 because their values, based on past experience, were expected to be highly variable. It was decided that past UWEs were not reliable predictors of the unequal weighting effects to be expected with the NPSAS:16 design.

The coefficient of variation, CV_{md} , of cluster sizes (numbers of students per institution) was computed for the members of each analysis domain d with use of NPSAS:08 and NPSAS:12 data and the domains in table B-7.

Table B-7. Domains and outcomes for NPSAS:16 sample optimization: 2015–16

Domains					Outcomes	
Control and level of institution	Student level ¹	Dependency/ income status	Attendance status	Other (Gender, Age group, Degree program, Race/ethnicity, Veteran status)	Percent	Average

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2015–16 National Postsecondary Student Aid Study (NPSAS:16).

B.3.4 Optimum Sample Allocation

The student sample allocation to the 11 institutional strata and 17 student strata (discussed above) was determined using a technique developed by Chromy (1987). This approach satisfied the precision constraints and other study objectives discussed in section B.3.1 at a cost that was minimal according to the cost model and relative variance model discussed in sections B.3.2 and B.3.3, respectively. The sample optimization was run conditional on the sample of institutions that had already been selected, to determine the optimum allocation of the student sample sizes to these institutions. The student sample size distributions were constrained to achieve approximately the desired institution- and student-level marginal distributions and RSEs. Precision constraints were relaxed, as necessary, during the optimization process to meet the marginal sample sizes.

Appendix C: Data Elements for Student Records

This page intentionally left blank.

The core data elements used in the 2015–16 National Postsecondary Student Aid Study (NPSAS:16) full-scale student records interview covered general topics that were organized into four main sections: general student information, enrollment, budget, and financial aid. Table C-1 provides a list of the data elements by section and topic, followed by the full-scale student records facsimile.

Table C-1. Full-scale student records core data elements, by section and topic: 2015–16

Section	Topic
General student information	Institute ID (IPEDS ID)
	Study ID
	Name
	Social Security number (SSN)
	Date of birth
	Gender
	Marital status
	Maiden name
	Spouse name
	Citizenship status
	Veteran status
	Year and type of high school completion
	Ethnicity and race
	Permanent and local address
	E-mail addresses
	Phone numbers
Enrollment	Parent name, address, e-mail address, and phone numbers
	Other contact name, address, e-mail address, phone numbers, and relationship to student
	Additional contact name, phone number, and relationship to student
	Program/degree
	Graduate degree type
	Class level
	Degree completion date and expected date of requirements met (by 6/30/2016)
	Cumulative (unweighted) GPA
	Ever received baccalaureate degree and date of receipt
	Major:
	– First and second major
	– First and second major CIP code
	– Undeclared major
	Date first and last enrolled at institution
	First time beginning student
	Accepted transfer credit
	Test scores:
	– ACT subject and composite scores
	– SAT critical reading, mathematics, and writing scores
	Clock hours and credits:
	– Total clock hours in program and cumulative completed
	– Total credit hours in program and cumulative completed
	Total tuition and mandatory fees charged
	Residency for tuition purposes
	Enrollment status (up to 12 terms)
	Credit units (up to 12 terms)

Your IPEDS UNITID:

Your password: (Password)

Dear (Salutation) (LastName):

(Institution) has been selected to participate in the 2015–16 National Postsecondary Student Aid Study (NPSAS:16). The 2008 Higher Education Opportunities Act (20 U.S.C. § 1015) mandates that the U.S. Department of Education, National Center for Education Statistics (NCES) periodically gather information from postsecondary institutions on how students and their families finance postsecondary education. In response to this requirement, NPSAS has collected information from postsecondary students and institutions since 1987. NPSAS:16 data collection is being administered for NCES by RTI International, a not-for-profit research organization.

I am writing to request that you appoint a NPSAS coordinator who will be asked to send a data file of students enrolled at your institution in 2015–2016. RTI will select a sample of students from your institution, and then ask the NPSAS coordinator to provide additional information on the enrollment status, demographic characteristics, and financial assistance provided for each sampled student. At the same time, the sampled students will be asked to complete a web-based questionnaire.

At your earliest convenience, please complete the *Designate a Coordinator* form online at the NCES Postsecondary Data Portal (PDP) website, using the IPEDS UNITID and password located at the top of this letter.

The enclosed brochure describes our data collection procedures and provides a summary description of the laws and procedures safeguarding the confidentiality of questionnaire responses, contact information, and other data collected. All responses that relate to or describe identifiable characteristics of individuals may be used only for statistical purposes and may not be disclosed, or used, in identifiable form for any other purpose, except as required by law (20 U.S.C. § 9573). Additional information, including reports based on data from previous NPSAS studies, is available on the PDP website: <https://surveys.nces.ed.gov/portal>.

We are aware that you and the staff at your institution are confronted with many competing demands for your time. Therefore, we are providing you—and the coordinator you designate—with this advance notice of the study to allow you adequate time to plan for this data collection effort and, if needed, to contact us for more information prior to the start of student list collection in early 2016. Once a coordinator is designated, an RTI representative will contact him or her to discuss the study timeline and the information needed from your institution.

If you have any questions about the study or procedures involved, please contact the RTI NPSAS Institution Contact, Tiffany Mattox, at 1-855-500-1441 or via e-mail at PortalHelp@rti.org. You may also direct questions to NCES by contacting Tracy Hunt-White, Ph.D. at 202-502-7438 (e-mail address: Tracy.Hunt-White@ed.gov).

We look forward to your participation in this important study. Thank you for your cooperation and prompt completion of the *Designate a Coordinator* form.

Sincerely,

(electronic signature)

Peggy Carr, Ph.D.

Acting Commissioner

National Center for Education Statistics

NPSAS:16 Brochure Text

COVER:

2015–16 National Postsecondary Student Aid Study (NPSAS:16)

<NCES logo>

National Center for Education Statistics

Institute of Education Sciences

NCES <xxxx-xxx>

About the Study

The affordability of education after high school is a vital concern for students and policymakers. That is why the information gathered by the 2015-16 National Postsecondary Student Aid Study (NPSAS:16) is so important. This study explores how students pay for postsecondary education and provides comprehensive data on the enrollment status, education goals, employment, and demographic characteristics of students continuing their education after high school.

NCES is authorized by federal law to collect, collate, analyze, and report complete statistics on the condition of education in the United States and other nations. Through the Higher Education Opportunity Act of 2008 (20 U.S.C. § 1015), Congress requires that NCES collect information from postsecondary institutions on how students and their families finance education beyond high school. In response to this requirement, NPSAS has collected information from postsecondary students and institutions since 1987.

The purpose of NPSAS is to compile comprehensive data about the full range of student financial aid programs, together with demographic and enrollment data. The study provides vital information about the affordability of postsecondary education and the effectiveness of existing financial aid programs. NPSAS includes students enrolled at public and private nonprofit, 2- and 4-year postsecondary institutions, as well as students at less-than-2-year and private for-profit institutions.

Importance of the Data

NPSAS is the primary source of data used by the agencies of the federal government and higher education associations to analyze the effectiveness of current federal student financial aid programs. It is used by the Congressional Budget Office (CBO), the Government Accountability Office (GAO), the Office of Management and Budget (OMB), the U.S. Department of Education, the American Council on Education (ACE), the National Association of Independent Colleges and Universities (NAICU), the National Association of Student Financial Aid Administrators (NASFAA), and many others to prepare the reports that influence the direction of federal student aid policies.

OVERVIEW OF DATA COLLECTION

Early fall 2015

The Chief Administrator at each selected institution will be asked to designate a NPSAS coordinator.

Early to Mid-fall 2015

The NPSAS coordinator will be provided with a user name and password and then asked to complete a brief institution registration page on the NCES Postsecondary Data Portal website.

Beginning in January 2016

The NPSAS coordinator provides a list of enrolled students at the institution. The NPSAS student sample is selected from the list of students received from each institution.

Beginning in February 2016

The NPSAS coordinator provides student record data for the sampled students. At the same time, sampled students are contacted to complete an online or telephone survey.

Confidentiality of Data

NCES is required to follow strict procedures to protect the confidentiality of persons in the collection, reporting, and publication of data. All individually identifiable information supplied by individuals or institutions to a federal agency may be used only for statistical purposes and may not be disclosed or used in identifiable form for any other purpose, except as required by law (ESRA 2002, 20 U.S.C. § 9573).

The *Family Educational Rights and Privacy Act of 1974 (FERPA)* (20 U.S.C. § 1232g) allows for the release of institution record information to the Secretary of Education or his agent without prior consent of survey members [20 U.S.C. 1232g(b)(3)]. RTI International, as the contractor for NCES, has been given the authority to collect information from institution records under the provisions of the Higher Education Opportunity Act of 2008 (20 U.S.C. § 1015). FERPA requires NCES and RTI to protect the confidentiality of all obtained data.

Protection of electronic files

All electronic files from institution records and student interviews will be protected. Computer accounts used to access data will be password protected with multilevel access controls to ensure that only authorized individuals are allowed access to confidential data. For the web-based data collection, proven methods of protection for online sessions and data security over the Internet will be used. Secure Sockets Layer (SSL) protocol will be used to encrypt the data. All of the data entry modules on the website will be password protected, which will require the user to log in to the site before accessing confidential data.

Protection of paper records

All paper records will be maintained in locked storage cabinets. A unique study identification

variable (not the Social Security Number or school ID) will be created and maintained for each sample member to protect against disclosure of confidential data.

Preparation of data for public release

It will not be possible to identify specific individuals in any data (e.g., statistical tables) released to the general public.

NPSAS:16 Overview of NPSAS Activities

2015-16 National Postsecondary Student Aid Study (NPSAS:16)

Overview of NPSAS Activities

First Institutional Coordinator Letter

November 15, 2015

(Salutation) (FirstName) (LastName)
(Title)
(Institution)
(Address)
(City), (State) (Zip)

Your IPEDS UNITID: (UnitID)
Your password: (Password)

Dear (Salutation) (LastName):

(Institution) has been selected to participate in the 2015–16 National Postsecondary Student Aid Study (NPSAS:16). The 2008 Higher Education Opportunities Act (20 U.S.C. § 1015) mandates that the U.S. Department of Education, National Center for Education Statistics (NCES) periodically gather information from postsecondary institutions on how students and their families finance education beyond high school. In response to the continuing need for these data, NPSAS has collected information from both postsecondary students and institutions since 1987. NPSAS:16 data collection is being administered for NCES by RTI International, a not-for-profit research organization.

The chief administrative officer of your institution has selected you as your institution's coordinator for NPSAS:16. As such, you will have three primary responsibilities:

- Complete the brief *Institution Registration Page* on the NCES Postsecondary Data Portal (PDP) website or by telephone within the next few weeks. We will schedule data collection for your institution based on the information you provide.
- Oversee the preparation of a list of students enrolled at your institution. The list will be used to draw a sample of students from your institution for participation in NPSAS:16.
- Complete a separate web-based program (or prepare a data file) providing institution records on such information as enrollment status, demographic characteristics, and financial assistance provided for the sampled students.

At your earliest convenience, please complete the *Institution Registration Page* online at the PDP website, using the IPEDS UNITID and password located at the top of this letter.

Complete instructions for your institution's participation will be sent directly to you in advance of the due date established for your institution. Enrollment lists will be collected January through May 2016. A specific due date will be determined based on your institution's term structure.

We are aware that you and other staff at your institution are confronted with many competing demands for your time. We hope that giving you this advance notice of the study will provide you with ample time to plan for your school's participation in NPSAS:16. A project representative will call you in the next few days to ensure that you have received this notification and to answer any questions that you may have.

The enclosed brochure and project timeline detail our data collection procedures and provide a detailed description of the laws and procedures safeguarding the confidentiality of questionnaire responses, contact information, and demographic data collected. All responses that relate to or describe identifiable characteristics of individuals may be used only for statistical purposes and may not be disclosed, or used, in identifiable form for any other purpose except as required by law (20 U.S.C. § 9573).

Additional information, including reports based on data from previous NPSAS studies, is available on the PDP website: <https://surveys.nces.ed.gov/portal>.

If you have questions about the study or procedures, please contact the RTI NPSAS Institution Contact, Tiffany Mattox, at 1-855-500-1441 or via e-mail at PortalHelp@rti.org. You may also direct questions to NCES by contacting Tracy Hunt-White, Ph.D. at 202-502-7438 (Tracy.Hunt-White@ed.gov).

We look forward to your participation in this important study.

Thank you for your cooperation.

Sincerely,

(electronic signature)

(Institution)

(Address)

(City), (State) (Zip)

Student Enrollment List Due: (Date)

Dear (Salutation) (LastName),

We are pleased that (Institution) has agreed to participate in the 2015–16 National Postsecondary Student Aid Study (NPSAS:16), which is conducted by the National Center for Education Statistics (NCES), U.S. Department of Education. As described in our earlier letter to you, NCES is mandated by Congress to conduct this important study on how students and their families finance education after high school. Data collection for this study is being administered for NCES by RTI International.

As you know, you have been designated as your institution's coordinator for NPSAS:16. We look forward to working with you on this important research effort, and are available to answer any questions you may have.

As the Institution Coordinator, you are asked to oversee completion of the following tasks:

- ✓ Complete the brief *Institution Registration Page* online at the NCES Postsecondary Data Portal (PDP) website <https://surveys.nces.ed.gov/portal> by using the UNITID and password printed at the end of this letter.

Thank you for completing this form; the information you submitted helps us schedule data collection for your institution.

- ☐ Oversee the preparation of a list of students enrolled at your institution and submit the list by the deadline below. The list of students will be used to draw a sample of students from your institution for participation in the study. Beginning in spring 2016, sampled students will be asked to complete a web-based questionnaire.
- ☐ Provide student records data—such as enrollment status, demographic characteristics, and financial aid—for the sampled students by uploading data files, keying data, or a combination of both through our secure web interface. After your list of enrolled students is submitted, we will contact you to confirm a due date for student records data.

The initial due date for providing your student enrollment list is (Date). Complete specifications for compiling this list and uploading it to the secure website are provided online at the PDP website.

If you are unable to meet your institution's deadline, or have any questions about the information requested for the student list, please contact the Help Desk at 1-855-500-1441.

The PDP website at <https://surveys.nces.ed.gov/portal> provides complete instructions for participation, including a summary description of the laws and procedures safeguarding the confidentiality of questionnaire responses, contact information, and demographic data collected. Additional information, including reports based on data from previous NPSAS studies, is also available on the PDP website. Be assured that all responses that relate to or describe identifiable characteristics of individuals may be used only for statistical purposes and may not be disclosed, or used, in identifiable form for any other purpose except as required by law (20 U.S.C. § 9573).

If you have questions about the study or procedures, please contact Tiffany Mattox, the RTI NPSAS Institution Contact, at 1-855-500-1441 or via e-mail at PortalHelp@rti.org. You may also direct questions to NCES by contacting Tracy Hunt-White, Ph.D. at 202-502-7438 (Tracy.Hunt-White@ed.gov).

Thank you for your cooperation.

List Preparation Instructions

National Postsecondary Student Aid Study (NPSAS)

INSTRUCTIONS FOR PREPARING YOUR STUDENT ENROLLMENT LIST

A sample of students will be randomly selected from the list of enrolled students that you provide, and will be combined with samples selected from other institutions to form a nationally representative sample of postsecondary students. To ensure a scientifically valid sample, it is extremely important that you follow the instructions provided in this document when preparing your institution's list. We realize that postsecondary institutions vary widely in their organizational structures, and that some of the criteria presented below may not apply to your institution. Should you have any questions about these instructions, or whether students should or should not be included on the list, we urge you to contact the NPSAS Help Desk:

- Phone: 1-855-500-1441
- E-mail: PortalHelp@rti.org

→ Step 1: Determine Which Students to Include

Include all students enrolled at your institution at any time between
July 1, 2015 and April 30, 2016

Your enrollment list should include students from all campuses, colleges, and schools, including graduate schools, reported under your IPEDS UNITID. Include students enrolled at any time between July 1, 2015 and April 30, 2016.

NPSAS Study Eligibility Requirements

Only include students on the list if they meet all of the eligibility requirements listed below.

1. The student must have been enrolled in at least one term or course of instruction that is one of the following:
 - an academic program; *or*
 - a course for credit that could be applied toward fulfilling the requirements for an academic degree; *or*
 - an occupational or vocational program that requires at least 3 months or 300 clock hours of instruction to receive a degree, certificate, or other formal award; *or*
 - non-credit remedial coursework *within a Title IV eligible program* (up to 30 semester or trimester hours, 45 quarter hours, or 900 clock hours). Students who are enrolled solely in a remedial program are not eligible.
2. The student was not enrolled concurrently in high school and your institution for the *entire* time he or she was enrolled at your institution. If the student completes high school and continues to be enrolled in a postsecondary course at your institution any time during the period specified in Step 1, the student is eligible.

3. The student was not enrolled in your institution during this *entire* period solely for the purpose of earning a general equivalency diploma (GED) or finishing another high school completion program. If the student completes such a program at your institution and then enrolls in another course of instruction there at any time during the above dates, the student is eligible.
4. The student did not drop out of your institution early enough to receive a *full refund* of their tuition.
5. The student did not pay tuition during these dates *solely* to a different institution.

→ Step 2: Prepare Student Enrollment List

Accepted File Types

You may choose to submit your Student Enrollment List as a comma-delimited (CSV) file or as an Excel spreadsheet. If you use another file type or layout, or codes other than those in Table 1, please provide us with a layout of your list and a detailed description of the codes.

Please provide the information listed in the file layout, shown in Table 1 below, for each eligible student. You may enter a blank space for missing values.

A special focus of this NPSAS will be students who receive baccalaureate degrees during the 2015-2016 academic year. In Fields 14 and 15 in the file layout, we ask you to identify each student who has received a baccalaureate degree since July 1, 2015 (Field 14) or is expected to receive a baccalaureate degree between now and June 30, 2016 (Field 15). Please do not leave these fields blank unless your school does not award baccalaureates.

Table 1. File Layout for NPSAS Student Enrollment List

Student data element	Code	Max field length
1. IPEDS UNITID		6
2. First name		100
3. Middle initial		50
4. Last name		100
5. Name suffix (e.g., Jr., Sr., III, etc.)		50
6. Student ID		10
7. Social Security Number (SSN)		9
8. Date of birth (MM/DD/YYYY)		10
9. Educational level	U = Undergraduate M = Masters D = Doctoral-research/scholarship/other P = Doctoral-professional practice O = Other graduate	1
10. Class level of undergraduates	1 = First year 2 = Second year 3 = Third year 4 = Fourth year 5 = Fifth year	1
11. High school completion date (MM/DD/YYYY)		10

Student data element	Code	Max field length
12. Student was enrolled in high school (or a high school completion program) during 2015-16	Y = Student is or was enrolled in high school between July 1, 2015 and June 30, 2016 N = Student was not enrolled in high school between July 1, 2015 and June 30, 2016 X = Unknown	1
13. Date of first enrollment (MM/DD/YYYY)		10
14. Received baccalaureate degree since July 1, 2015	Y = Student has received a baccalaureate degree since July 1, 2015 N = Student has not received a baccalaureate degree since July 1, 2015 X = Unknown	1
15. Expected to receive baccalaureate degree between the creation of this list and June 30, 2016	Y = Student is expected to receive a baccalaureate degree between now and June 30, 2016 N = Student is not expected to receive a baccalaureate degree between now and June 30, 2016 X = Unknown	1
16. Undergraduate degree program (leave blank if not undergraduate)	0 = Not in a postsecondary award, certificate, diploma, or degree program 1 = Postsecondary award, certificate or diploma of less than two academic years (less than 1800 contact or clock hours) 2 = Associate's degree 3 = Postsecondary award, certificate, or diploma of at least two but less than four academic years (at least 1800 contact or clock hours) 4 = Bachelor's degree or equivalent	1
17. Student's major for baccalaureate degree (or major for degree program if not pursuing baccalaureate) ¹		30
18. Student's Classification of Instructional Programs (CIP) code for baccalaureate degree (or for major for degree program if not pursuing baccalaureate) ²	--- . ----	7
19. Student's major 2 for baccalaureate degree, if double major (or for degree program if not pursuing baccalaureate)		30
20. Student's Classification of Instructional Programs (CIP) code for major 2		7
21. Local address 1		100
22. Local address 2		100
23. Local city		100
24. Local state		2
25. Local ZIP code		9
26. Local phone number – area code		3
27. Local phone number – without area code		7
28. Cell phone number – area code		3
29. Cell phone number – without area code		7
30. Campus e-mail		100

Student data element	Code	Max field length
31. Permanent address 1		100
32. Permanent address 2		100
33. Permanent city		100
34. Permanent state		2
35. Permanent country (if not U.S.)		50
36. Permanent ZIP code		25
37. Permanent phone number – country code (if not U.S.)		4
38. Permanent phone number – area code		5
39. Permanent phone number – without area code		25
40. Permanent e-mail		100
41. Grade point average (GPA)	–	3
42. Number of credits accumulated		3
43. Account overdue ³	Y = Yes, money is owed N = No, money is not owed	1
44. Veteran status	Y = U.S. military veteran N = Not a U.S. military veteran X = Unknown	1
45. Ethnicity	0 = Not Hispanic or Latino 1 = Hispanic or Latino X = Unknown	1
46. Race: White	Y = Yes N = No	1
47. Race: Black or African American	Y = Yes N = No	1
48. Race: Asian	Y = Yes N = No	1
49. Race: American Indian or Alaska Native	Y = Yes N = No	1
50. Race: Native Hawaiian or Pacific Islander	Y = Yes N = No	1
51. Sex	1 = Male 2 = Female	1
52. First-time graduate student at NPSAS institution	Y = First-time graduate student between July 1, 2015 and June 30, 2016 N = Not a first-time graduate student between July 1, 2015 and June 30, 2016 X = Unknown	1

¹ Please provide an explanation of any abbreviations or codes used for major.

² The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions. For more information about the Classification of Instructional Programs, see <http://nces.ed.gov/ipeds/cipcode/>.

³ Select "Y" only if the money owed (or the block placed on the student) would prevent award of an earned baccalaureate degree.

→ Step 3: Check for Errors

Please take the time to review your list for errors, including the following common errors:

- Is the contact information provided associated with the correct name (i.e., make sure that the “rows did not shift” during sorting or keying)?
- Is educational level (Field 9) provided for all students?
- If your institution awards baccalaureate degrees, is baccalaureate degree status (Fields 14 and 15) provided for all students?
- Did you include all eligible students from all campuses/schools (e.g., law school, medical school) reported under your IPEDS UNITID?

→ Step 4: Provide Preparer’s Contact Information

When you submit your Student Enrollment List on our secure website <https://surveys.nces.ed.gov/portal>, we ask that you provide the following information. (It will expedite the process if you have this information at hand when you log in to submit your list).

1. **Date list was prepared:** Please record the date your student list was prepared, even if it is not the same as the date you submit the list.
2. **Contact information:** Please provide the **name, department, e-mail address, and phone number** for all individuals responsible for preparing your Student Enrollment List. We will contact them only if we have questions.
3. **Comments:** Provide any details that will clarify the layout of the enrollment list you are submitting, as well as any information necessary to correctly interpret the data provided. Define any special codes or abbreviations (e.g., major codes, class levels).
4. **Exclusion counts:** Please provide counts of the students that were excluded from your Student Enrollment List by these categories: student did not meet the NPSAS eligibility requirements, student requested that their information not be provided to external parties, or student was excluded for any other reason.

→ Step 5: Submit Enrollment List

Upload to the NCES Postsecondary Data Portal Website

Please upload your completed list to the secure NCES Postsecondary Data Portal website (<https://surveys.nces.ed.gov/portal>). **Uploading is the most secure and most efficient method for submitting your list.**

After logging in, click “Provide Your Student Enrollment List,” and follow the on-screen instructions. You will be asked to provide your Student Enrollment List as well as the information you gathered in Step 4.

If you are unable to upload your list, please contact us to make other arrangements.

**For assistance, please contact the NPSAS Help Desk at
1-855-500-1441 or PortalHelp@rti.org.**

Student Records Quick Guide

Quick Guide to Providing Student Records Data

There are 3 steps for providing student records for the 2015-16 National Postsecondary Student Aid Study (NPSAS:16). To complete them, log in to the secure National Center for Education Statistics' Postsecondary Data Portal (PDP) website at <https://surveys.nces.ed.gov/portal>.

Log in at the **GET STARTED**  prompt using the username and password printed on the letter or email you received from RTI.

NOTE: To ensure the security of your student data, you must log off when you are going to be away from your computer and when you are finished with a data entry session.

1. Provide Institution Information for Student Records

Before you begin entering student data, you will need to enter information about your institution.

- From the Task Menu, click [Provide Institution Information for Student Records](#).
- Enter the requested school term information (institutions with continuous enrollment and no terms/periods with defined start and end dates should leave the Terms section blank).
- Select the number of credits awarded for a standard academic course.
- Click the [Submit & Return to Task Menu](#) or the [Submit & Go to Next Section](#) button at the bottom of the page.

After you submit, the information can be viewed, but not changed. The link on the Task Menu changes to [View Institution Information for Student Records](#) and the [Save](#) and [Submit](#) buttons on the Institution Information page disappear.

2. Review Sampled Student List

Review your list of sampled students and indicate if any are ineligible.

- From the Task Menu, click [Review Sampled Student List](#).
- Review the list, indicate if any students are ineligible for NPSAS, and click the [Submit & Return to Task Menu](#) or the [Submit & Go to Next Section](#) button.

After you submit, the information can be viewed, but not changed. The link on the Task Menu changes to [View Sampled Student List](#) and the [Submit](#) buttons on the Sampled Student List page disappear. If you discover that a student is ineligible after submitting, please call the Help Desk.

3. Provide Student Record Information

The student-level data we are requesting include contacting information as well as budget,

enrollment, and financial aid awarded during the study year (July 1, 2015-June 30, 2016).¹

- From the Task Menu, click [Provide Student Record Information](#).
- On the Mode Selection page, select which mode you will use to provide data.

There are 3 options available for providing the information: entering data online, entering data offline and then uploading, or uploading data files. Each is described below.

Option 1: Entering Data Online (Web Mode)

- Click [Web Mode](#).
- Select a student and section from the Web Mode Grid and begin keying.
- Save or finalize the section you completed using the buttons at the bottom of the section. [Save](#) allows you to leave and return to complete the section. [Finalize](#) saves and performs error checks and will highlight missing data and data values that are out of the expected range.
- After you have entered data for a section, you can either continue on to another section for that student or select another student. To select another student, click the link [Back to Web Mode Grid](#) and click on a new student and section.
- Once you have completed entering all data for a student, click [Finalize \(Student Name\)](#) at the bottom of his or her web page.
- When you are done entering data for all students, or if you want to check on your progress, return to the Web Mode Grid page. The grid contains icons indicating the status of each section: not started, in progress, errors present, or complete.
- After you have entered all available data for all students, click [Finalize All Student Record Information](#) at the bottom of the Web Mode Grid page. You will no longer be able to edit or enter data.

Option 2: Entering Data Offline and then Uploading (Excel Mode)

You may download an Excel template to key or cut and paste in the requested data and then upload the file.

- Click [Excel Mode](#).
- Check the “I agree” box in Step 1 and click [Download Excel Template](#). Save the file. For institutions with more than 100 sampled students, the template will generate overnight and be available to download the next day.

¹ Further detail on the data requested may be found by logging in to the portal website, clicking [Reference Materials](#), and then viewing the [Student Records Collection Data Elements](#).

- For Step 2, complete the worksheets in the template corresponding to the student information, enrollment, budget, and financial aid data for your students.
- When keying is complete, click [Select File](#) in Step 3 and select your saved file to upload. The grid in Step 3 displays a list of each file you have uploaded. When a file is uploaded, it is checked for errors (such as values outside of expected ranges). If errors are detected, a [Show Errors](#) button will appear. Please view and correct any errors before attempting to upload the file again.
- Click [Review Your Data](#) in Step 4 to review your uploaded data in a grid.
- After you have successfully uploaded your file and are ready to submit final data, click [Finalize All Student Record Information](#) in Step 5. You will no longer be able to edit data.

Option 3: Uploading Data Files (CSV Mode)

You or other staff at your institution can create and upload each of the four required comma separated values (CSV) data files following our specifications.

- Click [CSV Mode](#).
- Click [Download CSV Specs](#) to view or save the specifications in Step 1.
- Click [Download List](#) to view or save the list of sampled students in Step 2.
- When a file is ready for upload, click on the tab for the type of file, such as [Enrollment](#), in Step 3. Click [Browse](#), select your saved file to upload, and click [Upload File](#). The grid in Step 3 displays a list of each file you have uploaded. When a file is uploaded, it is checked for errors (such as values outside of expected ranges). If errors are detected, a [Show Errors](#) button will appear. Please view and correct any errors before attempting to upload the file again.
- Click [Review Your Data](#) in Step 4 to review your uploaded data in a grid.
- After you have successfully uploaded your 4 files and are ready to submit final data, click [Finalize All Student Record Information](#) in Step 5. You will no longer be able to edit data.

Regardless of the mode you select, clicking the [Finalize All Student Record Information](#) button alerts us that we may begin processing your data and will generate an e-mail to you confirming submission of the data.

Additional information, including answers to frequently asked questions, is available on the PDP website, <https://surveys.nces.ed.gov/portal>. If you need assistance, please contact the Help Desk toll-free at 1-855-500-1441 or via e-mail at PortalHelp@rti.org.

Student Records Request Letter to Coordinator

<date>

«salutation» «fname» «lname»

«Title»

«entity_name»

«phys_addr1»

«phys_city», «phys_state» «phys_zip»

Your IPEDS UNITID: «entity_id»

Your password: «password»

Student Records Data Due: «expected_Date_curr»

Dear «salutation» «lname»,

Thank you for your continued participation in the 2015-16 National Postsecondary Student Aid Study (NPSAS). We have finished processing the student enrollment file you provided, and have selected a random sample of **[# sampled]** students from your institution for participation in NPSAS. We now ask that you provide student record data for your sampled students using our secure Web application. Please complete the record abstraction and provide the requested data for these students on or before **[DUE DATE]**. We will send separate correspondence to the sampled students asking that they complete the NPSAS survey either online or by telephone interview.

We have developed an Internet-based Student Records System through which you (or someone on your staff) will be able to provide data for your selected students. The Student Records System is located on the same secure NCES Postsecondary Data Portal website that you have used for prior components of the study: <https://surveys.nces.ed.gov/portal>.

To assist you with the process of providing student record data, we have enclosed a *Quick Guide to Providing Student Records Data* describing how to access and use the Student Records software. You can find details on what data are needed for each sampled student from the Reference Materials page on the portal website. A list of your sampled students can also be found on the website, and you can easily print a hardcopy if you would like one.

There are three different methods available for providing the student data through the Student Records System:

- **Webmode** – enter data online for one student at a time.
- **Upload a data file created from our template** – download an Excel template, fill in the requested data for all students, and upload the completed file.
- **Upload data files created by an institution programmer** – create and upload data files following the specifications on the portal website.

Please be assured that the security of your students' data is of the utmost importance, and the Student Records software has been developed with this in mind. The system encrypts all data, with the latest technologies, before transmitting them over the Internet to NCES. In addition, access to the list of students (and to the forms used to enter their data) will require authentication using your IPEDS UNITID and unique password. They are printed near the top of this letter for your convenience. Please ensure that access is given only to those at your institution who will provide student records data.

Soon, we will call you to confirm your receipt of this material and the completion date for providing student records data. Help Desk staff will be available from 9:00 a.m. to 6:30 p.m. ET, Monday through Friday, to answer any questions you may have about the study or about using the Student Records System. You may contact the Help Desk at 1-855-500-1441, toll-free, or via e-mail at PortalHelp@rti.org.

Again, thank you for your continued participation in this important study.

Sincerely,

Jennifer Wine, Ph.D.
Project Director, NPSAS

Student Records Disclosure Notice

Information from student records for this individual has been provided to RTI International, a data collection agent for the U.S. Department of Education for NPSAS. This disclosure statement fulfills the requirement of 34 CFR 99.32(a) pursuant to the Family Educational Rights and Privacy Act of 1974 (20 U.S.C. 1232g).

This individual is included in the sample for the 2015-16 National Postsecondary Student Aid Study (NPSAS). Strict protection of all information obtained from individuals selected for participation in NPSAS is assured by current federal laws and regulations. All responses that relate to or describe identifiable characteristics of individuals may be used only for statistical purposes and may not be disclosed or used in identifiable form for any other purpose, except as required by law (20 U.S.C. § 9573).

Student Records Reminder Email 1

Dear «salutation» «lname»:

I am writing as a follow-up to the package you should have received recently that included a letter from me about NPSAS Student Records data collection, which is the final institutional component of the 2015-16 National Postsecondary Student Aid Study (NPSAS). The letter requests that you log on to the secure website and provide student records data for sampled students through the Student Records System.

NPSAS is being conducted by the National Center for Education Statistics (NCES), U.S. Department of Education, with the data collection carried out by RTI International, a not-for-profit research organization. The data your institution provides are very important to the success of the study.

Please find below a link to the NCES Postsecondary Data Portal website as well as the username and password needed to access the site and provide data.

Website: <https://surveys.nces.ed.gov/portal>

Your IPEDS UNITID: «entity_id»

Your PASSWORD: «password»

If you have any questions about the study or procedures involved, please contact the Help Desk at 1-855-500-1441 or via e-mail at PortalHelp@rti.org.

Thank you again for your cooperation.

Sincerely,

Jennifer Wine, Ph.D.
Project Director, NPSAS
RTI International

Student Records Reminder Email 2

Dear «salutation» «lname»:

I am writing to remind you about the 2015-16 National Postsecondary Student Aid Study (NPSAS) that your institution is participating in this [spring/summer]. Data collection is carried out by RTI International for the National Center for Education Statistics in the U.S. Department of Education's Institute of Education Sciences. By providing student records data for the sampled students, you make an important contribution to research that will help determine how students and their families meet the cost of education beyond high school.

If you are currently preparing the data, thank you. If you have not begun, please do so. We need representation of all the types of institutions and students to compile the most valuable, accurate data.

Please find below a link to the NCES Postsecondary Data Portal website as well as the username and password needed to access the site and provide data.

Website: <https://surveys.nces.ed.gov/portal>

Your IPEDS UNITID: «entity_id»

Your PASSWORD: «password»

If you have any questions about the study or procedures involved, please contact the Help Desk at 1-855-500-1441 or via e-mail at PortalHelp@rti.org.

Thank you for your participation in this important study.

Sincerely,

Jennifer Wine, Ph.D.
Project Director, NPSAS
RTI International

Appendix F: Data Elements for Student Interview

This page intentionally left blank.

The core data elements used in the 2015–16 National Postsecondary Student Aid Study (NPSAS:16) full-scale student interview covered general topics that were organized into seven main sections: enrollment, education experiences, financial aid, current employment, income and expenses, background, and locating. Table F-1 provides a list of the data elements by section and topic.

Table F-1. Full-scale interview core data elements, by section and topic: 2015-16

Section	Topic
Enrollment	Eligibility for NPSAS and B&B Enrollment information at NPSAS and other postsecondary schools in 2015–16 school year: <ul style="list-style-type: none"> • Dates of attendance • Enrollment intensity • Date degree completed • Level of degree program • Hours required • Year or level High school completion Previous degrees
Education experiences	Last high school attended High school GPA High school coursetaking Undergraduate entrance exams Remedial classes Major(s) or field(s) of study NPSAS institution GPA NPSAS institution online coursetaking Activities during undergraduate education Graduate school plans Highest degree ever expected
Financial aid	Grants, scholarships, and veteran benefits in 2015–16 Cost of books and supplies for 2015–16 Undergraduate work-study jobs and assistantships; graduate assistantships, fellowships, traineeships Federal loans, private loans, and other sources of aid used in the 2015–16 academic year Amount borrowed for the 2015–16 academic year in federal loans and private loans Total student loan debt Family help with debt Tuition refunds received during the 2015–16 academic year Awareness of loan forgiveness programs and repayment plans
Employment	Current employment during school year Employer information for each employer between July 2015 and June 2016: <ul style="list-style-type: none"> • Employer name • Worked while enrolled • Job was related to major • Earnings • Hours worked Career planning services used Whether primarily student or employee Work plans in year following 2015–16 academic year Expectations of future occupation and wages Ever employed as K–12 teacher Likelihood of teaching Preparation for teaching career

See notes at end of table.

Table F-1. Full-scale interview core data elements, by section and topic: 2015-16—Continued

Section	Topic
Income and expenses	Annual income
	Spouse's income
	Family and household composition
	Dependent information:
	• Number supported
	• Age
	• Average financial support
	• Childcare costs
	• College costs
	Help from family or friends for education or living expenses in 2015–16 academic year
	Use of and amount owed on credit cards
	Checking/savings accounts held
	Residence during school year, rent/mortgage
	Receipt of untaxed benefits
	Homelessness and dependency status
Background	Parent information:
	• Marital status
	• Income
	• Number of dependents supported
	Date of birth
	Marital status
	Biological sex
	Citizenship and nativity status
	Ethnicity and race
	Military status
	Disability status
	Physical and mental health
	ZIP code of permanent residence
	First language
	Understanding of financial concepts
Locating	Spouse in college in 2015–16
	Sibling who attended college first
	Parents' highest level of education
	Personal contact information:
	• Physical addresses
	• E-mail addresses
	• Phone numbers
	Parents' contact information:
	• Physical addresses
	• Phone numbers
	Spouse's name
	Social Security number

NOTE: B&B = Baccalaureate and Beyond Longitudinal Study; GPA = grade point average; NPSAS: National Postsecondary Student Aid Study.

WHAT IS NPSAS?

The 2015–16 National Postsecondary Student Aid Study (NPSAS) is a national survey of approximately 125,000 undergraduate and graduate students who were enrolled during the 2015–2016 academic year. In order to have a complete picture of the costs and benefits of postsecondary education, it is important that we include students from a wide variety of schools and backgrounds.

NPSAS will collect information about students' enrollment and employment history, income and educational expenses, and future plans. We also collect financial aid, student record, and related information from your institution and other sources, such as student loan databases and admissions testing agencies.

WHY AM I BEING ASKED TO PARTICIPATE?

You are being asked to participate in NPSAS because you were enrolled in postsecondary education during the 2015–2016 academic year. Postsecondary education is any education beyond high school, including career and technical school, college, and graduate school.

WHAT HAPPENS TO THE RESULTS?

Results from the current study are scheduled to be released in fall 2017 and will be posted on the NCES website (<http://nces.ed.gov/surveys/npsas/>) as soon as they are available. Your responses will be combined with those of other students and will be presented in summary form only. No individually identifiable information will be published.

Researchers will use NPSAS data to explore a wide variety of topics, including student loan debt and persistence in postsecondary education.

WHY IS MY PARTICIPATION IMPORTANT?

Your survey responses help educators, researchers, and policymakers at the local, state, and national levels understand national trends in enrollment patterns, education goals, employment, and backgrounds of students who pursue education after high school. Your experiences are unique, and, if you choose not to participate in NPSAS, no one else can be substituted for you.

Did you know?

About 71 percent of all undergraduates received some form of financial aid in the 2011–2012 school year. Nearly 60 percent of undergraduates received grant aid, and 42 percent took out loans to pay for their education.

Source: U.S. Department of Education, National Center for Education Statistics, 2011–12 National Postsecondary Student Aid Study (NPSAS:12)

Percentage of undergraduates receiving financial aid, by type of aid: 2011–12

WHO IS CONDUCTING NPSAS?

The 2015–16 National Postsecondary Student Aid Study is conducted by the National Center for Education Statistics (NCES) under the authority of the Higher Education Opportunity Act (HEOA) of 2008 (20 U.S.C. § 1015) and the Education Sciences Reform Act (ESRA) of 2002 (20 U.S.C. § 9543), which authorize NCES to collect and disseminate information about education in the United States.

NPSAS data are being collected under contract by RTI International*, a nonprofit research organization based in North Carolina.

HOW WILL MY INFORMATION BE PROTECTED?

NCES is required to follow strict procedures to protect personal information in the collection, reporting, and publication of data. All individually identifiable information supplied by individuals or institutions may be used only for statistical purposes and may not be disclosed or used in identifiable form for any other purpose, except as required by law (20 U.S.C. § 9573).

Data security procedures for NPSAS are reviewed and approved by NCES data security staff. Your answers are secured behind firewalls and are encrypted during internet transmission using Secure Sockets Layer (SSL) protocol. All data entry modules are password protected and require the user to log in before accessing confidential data. Project staff is subject to large fines or imprisonment if individual responses are disclosed.

*RTI International is a registered trademark and a trade name of Research Triangle Institute.

HOW DO I PARTICIPATE?

You can complete the NPSAS survey online or over the phone.

ONLINE

Log onto the study website at <https://surveys.nces.ed.gov/npsas/> using the Study ID and password provided in your welcome letter.

The survey is mobile-optimized, so it can be easily completed on a mobile device.

PHONE

Call our Help Desk at 1-877-677-2766 to speak to one of our professional interviewers.

Dear «fname»:

I am writing to inform you that you have been selected to participate in the 2016 National Postsecondary Student Aid Study (NPSAS), an important study that will help determine how students and their families meet the cost of education beyond high school.

Students from all types of institutions and all financial situations have been randomly selected for NPSAS. Many types of students are selected for NPSAS, ranging from first-time students to doctoral students, even if they are no longer enrolled in postsecondary education. Your survey responses will represent other students enrolled at «NPSASschool» who were not selected to participate in NPSAS. Therefore, your participation is critical to the success of the study.

After you complete the survey, you will receive \$«inc_amount» as a token of our appreciation, payable by PayPal or check.

To complete the survey on your computer, smartphone, or tablet

1. Go to: <https://surveys.nces.ed.gov/npsas/>.
2. Type the Study ID and password (provided below) on the Home/Login page.
3. Click “Login” to begin the survey.

Please complete the survey by **February 22, 2016**.

On average, the survey takes about «interviewtime» minutes to complete, depending on your answers. Your participation in this study is voluntary and will not affect any aid or other benefits you receive.

The enclosed brochure answers many common questions about the study and contains additional information on laws and procedures that protect the confidentiality of your responses. If you have questions about the study, or prefer to complete the survey over the phone, call the NPSAS help desk at 1-877-NPSAS-NOW (1-877-677-2766), or send an e-mail to npsas@rti.org. You can also learn more by visiting the study website at <https://surveys.nces.ed.gov/npsas/>.

I thank you in advance for your participation in this important study. Your cooperation is greatly appreciated.

Sincerely,

Peggy G. Carr, Ph.D.
Acting Commissioner
National Center for Education Statistics

Data Collection Announcement E-Mail

SUBJECT: The National Postsecondary Student Aid Study (NPSAS)

Congratulations, [FNAME], you have been selected to participate in the 2015-16 National Postsecondary Student Aid Study (NPSAS), an important study that will help determine how students and their families meet the cost of education beyond high school.

For your participation in NPSAS, we are asking you to complete a mobile-optimized survey. The survey will take about [time] minutes to complete, depending on your answers.

Click here to start your survey on our secure website.

If you complete the survey, you will receive \$30 as a token of our appreciation - payable by PayPal or check. Please complete the survey by [February 22, 2016].

If you'd like more information about NPSAS, visit the study website at <https://surveys.nces.ed.gov/npsas/>, or call the NPSAS help desk at **1-877-NPSAS-NOW** (1-877-677-2766). You can also complete the survey over the phone if you prefer.

Thank you for helping to make NPSAS a success.
